the vision. He was caught up beyond the first heaven, the region of our atmosphere, and beyond the second heaven, the region where are the stars and other heavenly bodies, and into the third heaven, the abode of the glorified. The fact that he did not know whether he was in the body or out of the body indicates Paul's belief that the soul can exist separate from the body. He heard things that it would not be lawful or possible to utter on earth. Paul could not and would not glory in it himself, except in his infirmities, but he could glory in the revelation which God gave to him. He refrains from saying anything further about it lest some might have too exalted an opinion of him.

IV. The sufficiency of grace (vs. 7-10). The fact that Paul uses the words, "And lest I should be exalted above measure through the abundance of the revelations," shows clearly that the revelation just recorded was given to him. The thorn in the flesh was given to him that he might not become unduly exalted. The scriptures do not explain what the thorn in the flesh was. It certainly was not sin remaining in him, for he declared repeatedly that Christians could be sanctified wholly. Many have thought it was some physical infirmity, and numerous ailments have been suggested. It seems more reasonable that the thorn in the flesh was the Judaizing teachers who followed up his work in an effort to overthrow it. The thorn was not removed, but a sufficiency of grace was promised Paul that he might be victorious.

Questions. Why was this epistle written? When, where, by whom was it written? What are some of the principal points in the epistle? In what respects was Paul superior to those who were opposing him? Give some of the points in the life of Paul enumerated in this lesson. What does Paul say of his visions? What can you say of Paul's thorn in the flesh?

PRACTICAL SURVEY.

Topic.—A life-career.

I. Physical afflictions.

II. Spiritual endowments.

I. Physical afflictions. We have in this lesson a summary of Paul's tribulations, many of which were occasioned by human perversity and enmity. He had been compelled by the evil things that were said of him to refer to his own life and to his sufferings for Christ's sake in self-vindication. His apostolic authority and consequently the value of his life's work, the credibility of his doctrines and the soundness of the churches which he had founded were all at stake. This enumeration of his privations and afflictions shows how deep an impression they had made upon his nature. His purpose was not his own self-exaltation but the spread of the gospel and the salvation of his fellow men, an object worthy of all his devotion and all his suffering. Almost incessant toil had continued throughout long years. The churches were dear to Paul's heart. All the dissensions, heresies or immoralities that appeared from time to time carried anguish to his heart. Paul had to vindicate his claims against the false teachers who had met with favor in Corinth and who had transformed themselves into "ministers of righteousness." He laid great stress upon the fact that true ministers are followers of Christ. All along Paul had been painfully aware that his enemies were citing his infirmities to his official disparagement. Paul had a profound sense of his own unworthiness. He felt that he owed everything to Jesus and to him he yielded all. Never was consecration more thorough than his. The long list of trials, so varied and tremendous, had long since been endured, but they were fresh in Paul's mind. It cannot be imagined that vainglory or self-exaltation prompted him to give this narration. He had proved that his own state of mind had corresponded with his call to suffer. Since the opening scene on the way to Damascus a long series of afflictions for the gospel had passed.

II. Spiritual endowments. Had Paul expected an earthly recompense, bitter indeed would have been his disappointment. The power of Christ had been imparted to him with such fullness as to transform pain into pleasure, so far as his spiritual nature was concerned. Sufficient grace was specially manifested in the power it had given him to be patient, forbearing and humble in his difficulties with the Corinthians. He could submit to have men despise him if he was able to serve and please his Master. It was enough if through his humiliation Christ was exalted, if through his suffering Christ might be glorified, if through his weakness the power of Christ might be more strikingly and impressively exhibited. Christ's humiliation and obedience unto death, in order to secure man's salvation, came to Paul a source of greater inspiration both in action and suffering. Paul's glorying had its source in his sympathy with his living Lord. Paul related not only what Christ promised him, but what he performed. Men treated Paul cruelly, but God gave him special and marvelous experiences to encourage him in his arduous labors and sufferings, and to quicken his faith in God. Paul was modest about his own experience. He did not record his heavenly rapture and what followed it until fourteen years had passed. His deepest heart experiences could not be put into words. They were not designed for the public. Upon the divine visions and revelations given to him, Paul, in great part, rested his apostolic claim. He had special reason for calling himself "a man in Christ." In so doing he met the question of how it came to pass that he was so highly honored. It was after Paul had received his vision that he was in spiritual danger. He knew his peril and acknowledged it. He knew that whatever lifted him above his brethren even in spiritual life, was in danger of exalting him above measure. He might be tempted to under-estimate others and to over-estimate himself. The safeguard was was provided where it was most needed. Paul obtained a completely new view of life in the view he took of his affliction and the denial of his request.

Kauri Gum Diggings.

[illegible] gum, found underground in [illegible] and dug to the amount [illegible] and a half pounds yearly [illegible] urniture polishes and varnish; most of it is exported to [illegible] industry of digging it [illegible] ther in the world. A [illegible] beautiful sight, but [illegible] try is treeless, barren [illegible] and swampy very [illegible] early heavy, cloggy [illegible] the gum formed on [illegible] ent and long van [illegible] or speared. There [illegible] of this treeless [illegible] hing but a lit [illegible] ing on it.

THE BORN CRIMINAL

The evil combination of defects, vicious impulses and hereditary taint which produce the innate criminal are seldom associated together; the born criminal, if there really is such a type, has them all. The question whether such a type exists has not been satisfactorily decided. When we attempt to define what we mean by a born criminal a hundred qualifications and distinctions present themselves to the mind. First, what is crime? As a legal matter, crime is classified in civilized nations in many ways, and even civilized nations have had different notions of what constitutes crime at different periods of their history. Our own statutes make new crimes every year, almost every month. In what sense then is it proper to say that a man is born to crime?

Experts generally divide children born with criminal instincts or with a defect of intellect or will that does not enable them to resist evil into several classes. The mental defective has of late been the subject of the most careful study. Thus if a child fails to pass the mental tests appropriate to his own age, but passes those for a child more than three years younger, he is, in the view of experts like Binet and Simon or Goddard, of the Vineland Training School, backward by one, two or three years; but if he is more than three years backward he is regarded as mentally defective.

This method of testing the defective child is no doubt useful, but it is not absolutely accepted by all experts. For example, Fernald, of the Massachusetts institution for these unfortunates, gives it a cautious approval. In his opinion mental deficiency cannot be determined by an automatic application of any method or scale of testing. This is a sound criticism, and is supported by legal decisions. Mental power has infinite degrees of strength or weakness, and they shade into one another in such a way that it is almost impossible to distinguish between them. Such is the condition of humanity that we easily see or quickly feel the wrong, but cannot always distinguish the right. Any mental defect, especially if it be inherited, is hurtful; that is, it may be a beginning of crime; but the difficulty is to determine when a mental defect is irremediable, and at what point criminality begins. A child born to drunken, vagabond or criminal parents is certainly as near a criminal as it is possible to be. Such a child, left wholly to its appetites and instincts, with no moral or mental teaching, with a congenital obtuseness to distinctions of right or wrong, is likely to become a criminal, and it may have particular inclinations of a perverted kind, as kleptomania, arson or the mania for setting fire to things, or it may have abnormal sexual instincts.

Such a creature is often described as a moral imbecile, but here again, in the opinion of the best authorities, we should be extremely cautious in passing a final judgment. An eminent English writer says on this subject: As regards moral imbeciles, "I am sure that in the majority of cases children who have been supposed to be moral defectives do not merit that title at all, and do very well as soon as they are removed from the surroundings which have prompted these evil doings." In such cases education and training may change a child of evil parentage into a well-behaved and well-ordered nature.

The histories of certain families of degenerates show us that children may be born of criminal parents and become in turn irreclaimable criminals. A sort of irresistible criminality is entailed upon generation after generation. One of these families has been known to have as many as 800 descendants who were thieves, tramps, prostitutes and murderers. These people have been fully described by the most unexceptionable authority in America, England, Germany and Switzerland. In this case we may speak of a born criminal. Those who communicate crime to their offspring by the agency of blood or example and bad teaching may be said to produce children born to crime—potential criminals, as it were—but it is not safe to draw hard and fast rules from such unusual families.—N. Y. Sun.

HE COULD PLAY CHESS.

And He Proved That Fact in a Most Emphatic Manner.

In Austria-Hungary some years ago there was a marvelous chess player, whose name and residence were unknown, but who every now and then displayed his remarkable skill in the game. The last story of him was told by James H. Hyatt, of Philadelphia, who had then just returned from Budapest.

"I was playing chess with a friend in a cafe," said Mr. Hyatt, "and plainly saw my defeat, when a little bit of a shriveled Pole with a tray of cheap jewelry stood in front of us and offered his wares in more persuasive tones.

"'Go away,' I said.

"'You can beat him,' answered the peddler, whose attention was on the game.

"'What do you know about it?' I asked.

"'May I tell him?' he inquired, looking at my opponent.

"'Certainly. Crack away,' came the reply in a tone of assurance.

"'Take his knight!' said my self-appointed instructor. I did so to humor him, though I lost my queen by the operation. But, much to my surprise, I found that the very next move gave me the game.

"'Let me play with you?' asked the peddler. 'I mate you in the moves you say and where you say.'

"'If you do I will give you 10 florins,' I answered. 'Take the white men. Mate me on my queen's fourth square in twenty-two moves if you can.'

"We started in, my friend keeping account of the moves, and moved rapidly. After about a dozen moves I had the advantage of a bishop and a pawn and was assured I would defeat my aggressive little opponent. When he let a castle go by an apparently careless play I was sure of victory. Then came a sudden change in the situation and I had to move my king out of check. I was on the defensive and in rapid retreat.

"'Twenty-one moves,' said my friend as the little peddler put me again in check with his knight.

"'Mate!' cried my opponent as he swung his queen across the board.

"My king was on the queen's fourth square.

"I gave him 10 florins, and he walked away shaking his head and hands with infinite satisfaction."

SUNDAY AT HOME

DOE YE NEXT THYNGE.

From an old English parsonage, down by the sea,
There came in the twilight a message to me.
Its quaint Saxon legend, deeply engraven,
Hath, as it seems to me, teaching for heaven;
And all through the hours the quiet words ring,
Like a low inspiration, "Doe ye nexte thynge."

Many a questioning, many a fear,
Many a doubt, hath its quieting here.
Moment by moment, let down from heaven,
Time, opportunity, guidance are given.
Fear not to-morrow, child of the king;
Trust them with Jesus, "Doe ye nexte thynge."

—Anonymous.

WE LOOK FOR THE SAVIOUR.

The grace of God that bringeth salvation hath appeared to all men, teaching us that, denying ungodliness and worldly lusts, we should live soberly, righteously, and godly, in this present world; looking for that blessed hope and the glorious appearing of the great God and our Saviour Jesus Christ; who gave Himself for us, that He might redeem us from all iniquity and purify unto Himself a peculiar people, zealous of good works. We, according to His promise, look for new heavens and a new earth, wherein dwelleth righteousness. Wherefore, beloved, seeing that ye look for such things, be diligent that ye may be found of him in peace, without spot, and blameless.

Christ was once offered to bear the sins of many; and unto them that look for Him shall He appear the second time without sin unto salvation. —And it shall be said in that day Lo, this is our God: we have waited for Him and He will save us; this is the Lord; we have waited for Him, we will be glad and rejoice in His salvation.

THE MORAL ORDER.

Nothing reveals the existence of a persistent moral order more clearly than the quiet way in which men of bad will and bad life are used against their wills for the ends of good. Once Pharaoh may have argued for evil; he can argue now only for good. His Pyramids proclaim him a bad paymaster; they stand to-day huge introduction to the bankruptcy court, and the winds as they whistle round the stony gate, say: He did not pay his debts. He built with slave labor. He built a monument to his hurt.

"Remember Lot's wife." Who was she? She was a woman of care. Lot entered into Sodom, and soon Sodom entered Lot, and his wife had to share his destiny. God in mercy sent His angel to rescue these from destruction. Was it for the sake of Abraham? The poor woman looked back with mixed feelings, and she was turned into a pillar of salt. What sort of a pillar? Well, it was not of hewn stone, like Cleopatra's needle; it was not a very elegant work of art, but it was a pillar all the same, and it conveys a lasting lesson. How was it built? Our Mrs. Lot, in her flurry, tumbled into a muddy spot on the shore of a salt lake, and swooned and died. The salt spray blew over her and stayed, then more salt spray, then more; it lodged and dried and hardened; the angry winds and waves built the pillar for all generations to look at and learn. And what is the lesson? Don't have half a heart; don't set your affections on the earth; don't think to feed your soul with the thing of this life. Follow the Lord, follow the Lord fully, stay not in all the plain, flee to the mountain, lest thou be consumed."

Passengers through the Suez Canal look out for tops of the Pyramids. The canal is a modern institution. It was built a few years ago; it shortens the way to India by weeks. How was it built? Strange how history repeats itself. It was built by slave labor, and the workmen were not paid (as I am informed).

There is a quiet assurance about the moral order. It takes plenty of time. It has no concern to end evil, or punish evil before sundown. It does not hasten. It can wait. We wonder that it does wait. There is a wonderful selective process going on all the while. We have no right to grow nervous about the punishment of evil. We do not know how much would be wise and good. We know men on one side, the bad side perhaps; but God knows another side, a good side, which deserves to be considered. God's moral order is on deck, it notes bad men. It shortens their influence, it takes away their power for evil. "The wicked live not out half their days."—T. Millar, Beamsville, Ont.

MYSTERY OF A DREAM.

He Heard True When Asleep and Heard True, Too, When Awake.

"In one of the East Indian border wars there was engaged an officer of high repute, the member of an ancient county family," says Mrs. Mayo in "Recollections of Fifty Years." One night the laird, its head, started from his sleep, exclaiming:

"'There's the shot that has killed my brother!'

"His wife told him it was but a dream. He must have given an anxious thought to his brother before going to sleep.

"The next day the laird and his wife were in the garden directing their gardeners when the laird suddenly exclaimed:

"'Do you hear the bagpipes?'

"'No,' answered the lady. 'I can hear nothing. I am sure there is no sound.'

"'Strange,' said the laird, 'for I can even hear what is played. It is "The Flowers o' the Forest Are A' Wede Away."'

"A few hours later came the telegram reporting that the brother had been shot down in some border warfare and over his lonely grave the men of his regiment had played the pathetic air whose mysterious echo seemed to have reached the laird."

* * *

Anger wishes that all mankind had only one neck; love, that it had only one heart; grief, two tear glands; and pride, two bent knees.—Richter.

DIARRHOEA
Was Caused By
Change of Diet, Etc.

Diarrhoea arises from many causes, such as, change of diet, change of water, change of climate, catching cold, the eating of unripe fruits, or anything that will cause or induce an excess of bile.

On the first sign of any looseness of the bowels it should not be neglected, but should be looked after immediately, for if not diarrhoea, dysentery or some other serious bowel complaint may ensue.

Mr. Geo. Smith, Victoria, B.C. writes: "It is five years ago since I first tried, Dr. Fowler's Extract of Wild Strawberry. I was then on a timber survey, and suffered greatly from diarrhoea, caused by change of diet, etc. A friend in the party gave me a few doses which gave me great relief. Since then I have been in survey work, and would as soon think of starting out on a trip without my compass and blankets as without my supply of Dr. Fowler's Extract of Wild Strawberry, which I consider the woodsman's best friend."

Dr. Fowler's Extract of Wild Strawberry has been on the market for the past seventy years, and is universally known as a positive cure for all complaints arising from any looseness of the bowels.

When you ask for "Dr. Fowler's" be sure you receive what you ask for as there are many rank imitations of this sterling remedy placed on the market to try and fool the unsuspecting public.

The genuine is manufactured by The T. Milburn, Co., Limited, Toronto, Ont.

Price, 35 cents.

Bradstreet's Trade Review

TORONTO—Retail trade generally is good and business conditions are much better than at this time in 1915. While summer quiet rules in most lines, seasonable commodities are finding a ready sale, and manufacturers and jobbers state that collections are good. Canners have given out a report on the prices which canned peas will command this year. Wholesale grocery houses have been notified that only 50 to 75 per cent. Canned strawberries, raspberries and cherries are correspondingly scarce and will bring much higher prices than last year. Conditions in the grocery trade are good, wholesalers assert, and collections are easier. In the leather industry, dealers report that conditions are fairly good. The shoe trade is fairly brisk. Some concerns refuse to fill further orders until they have caught up with those already on their hands. All grades of leather continue very high in price, and dealers anticipate further advances. Conditions for the fall trade looking fairly promising. Hardware trade conditions are asserted to be rather quiet at present, although firms having connections with contractors on munitions are doing an active business. In the dry goods trade, conditions are reported to be generally healthy, although August is regarded as the quiet month. Collections in the drygoods line are also said to be quite good, and more trade is passing now than a year ago. One Ontario crop that will break all previous records is that which Ontario bee-keepers have gathered this year. Over two and a quarter million pounds of white honey has been extracted from the hives.

MONTREAL.—Trade conditions are quite satisfactory. In the grocery trade a better feeling exists. Cheese and other dairy products are firm at advance prices.

OTTAWA.—Crop conditions in this district are quite poor, and greatly increased prices will obtain. Retail trade is seasonably quiet, but is reviving for the autumn.

LONDON.—Business conditions are active and a good retail trade is passing in most lines. The drygoods trade is fairly active, and groceries and hardware lines are also experiencing considerable movement.

HAMILTON.—The drygoods business is brisk, and retail trade generally has an active tone. The steel industries are prosperous, and there is a good demand for all kinds of labor. Collections are fairly good, and in the great majority of cases are better than last year.

WINNIPEG.—In spite of reports of extensive damage to Manitoba wheat crops, the tone of business is fairly good. On the wheat market there is an element of uncertainty prevalent. Retail trade is fair, in spite of a seasonable period of [illegible]. Wholesalers report that a fair volume of business is passing.

CALGARY.—Pessimism about the Western grain yield is not reflected to a great extent in general business. Edmonton reports show good trade is passing in general tone of optimism pervades the West, and prospects are bright for an average wheat crop.

VANCOUVER.—Business is good. General conditions in Vancouver are very satisfactory. The drygoods trade is fairly active. Collections are easier, and conditions generally are much better than twelve months ago.

QUEBEC.—Business conditions as a rule are satisfactory for the season. Wholesale and retail dry goods report favorably. Grocers and provisions are moving well. Construction trades are well employed, as a result, supplies, such as hardware, cement, lumber, etc., are in demand. Activity prevails in shipping circles. Local shoe factories are well employed. Collections continue fair.

Emotionally Senile.

I know no more dismal spectacle than a man talking shop on a moonlit hill in August, a woman gossiping by the rail of a steamer plunging through the sapphire of the gulf stream or a couple perusing advertisements throughout a Beethoven symphony. I will not advance as typical a drummer I once saw read a cheap magazine from cover to cover in the finest stretch of the Canadian Rockies. He was not a man, but a sample fed, word emitting machine. These people, emotionally speaking, are senile. They should not try to read poetry.—Henry Seidel Canby in Harper's Magazine.

You never can tell. Many a man who is blind to his own interests thinks he is out of sight.

COULD NOT SLEEP
Nerves Were So Bad.

To the thousands of people who are tossing on sleepless beds night after night, and to whose eyes sleep will not come, Milburn's Heart and Nerve Pills offer the blessing of sound, refreshing slumber, because they restore the equilibrium of the deranged nerve centres, thus restoring strength and vitality to the whole system.

Mr. Arthur McCutcheon, Mt. Pisgah, N.B., writes: "I have been much troubled with my nerves, and could not sleep for hours after I would go to bed. I would toss and turn from one side to the other before I could go to sleep. I would then wake up in the night, and lie awake a long time before I would get to sleep again. I thought I would try Milburn's Heart and Nerve Pills, as they were recommended so highly. I now get to sleep without any trouble; my nerves seem quieted, and when I lie down I go to sleep quickly. Anyone who is bothered with their nerves should keep a box on hand."

Milburn's Heart and Nerve Pills are 50 cents per box, 3 boxes for $1.25; at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

ARM AND GARDEN

PS FOR THE FARMERS.

cutting of asparagus in the ended about the middle of June. rowers at this time thoroughly tted, three inches deep, the be- d and give it a good dressing '-rotted barnyard manure. Some rs give a dressing of manure in l, but it is better to do so right is it permits the storing up of supply of plant food in the luring the season for the first the following spring. Beds tablished and well cared for for twenty years or more with- ewing.

oo frequently, after the season the asparagus field is neg- luring the summer months. is permitted to grow up in and weeds, which rob the ts of both moisture and plant This causes the plants to be weakened to some extent, there- ucing next season's growth.

asparagus is usually planted in from six to eight feet wide, is ample room between the rows nt some other crop after the g season is over. The fertiliza- nd cultivation of this companion will greatly benefit the aspara- s well as giving some returns.

the asparagus section fields are found that are absolutely neg- after the last harvest. If it is nually neglected year after year only a question of a few years e the plants will become so ened that the field will cease e profitable. If cultivated clean ughout the year and leguminous s planted between the rows to ly humus and nitrogen, the plants improve rather than deteriorate.

ERTILIZING THE VINEYARD

is impossible to expect the full ults of good manuring if the vine- d has not been well cultivated. soil should be kept well loosened, l, where necessary, should be well ined in order that any surplus ter may be removed speedily. Spe- l care should be taken that no grass ows in the vineyard. If this is at- nded to for several consecutive ars there will be very little trouble ith grass in the future. Many vine rmers make deep holes between ery four vines, or deep furrows be- ween the rows of vines, and then bury the manure in these holes or fur- rows. This method falls short of requirements. The aim must always be to make the plant develop its root in every direction in the soil. It is then able to feed evenly over the soil and take the necessary moisture out of it. Therefore, manure should be spread evenly over the soil and then plowed or dug under.

It should be borne in mind that by constantly applying more manure the production increases accordingly. Later the increased production is no more favorable proportion to the in- d cost of manuring. Under the stances certain manure for- must be used which have been t in practice and which can as is found necessary.

VE THE VINES.

s time of year the cucum- loupe and squash grower think that life is hardly worth living.

There are a thousand and one ways of fighting the insect enemies, and each man is apt to think that his method with the striped bug is the best ever. They can be overcome, and the plant brought beyond their period. But in places where many vines are grown, a much worse pest is the louse. When once established, this has been known to destroy acres of vines. This pest is a difficult one to manage. Ordinary spraying with kerosene emulsions is of little use, for the louse is found only upon the underside of the leaves.

Some experienced gardeners practise and recommend a heroic remedy. They destroy the affected vines as soon as found, to prevent the spread of the pest. This is something like cutting off a limb to save a life. The same plan is to be followed with the three-cornered squash bug. These pests get a foothold and spread from that point as a breeding centre. If you destroy totally the headquarters, you stop the invasion. Let the field be carefully watched, and when the enemy appears dig a hole a foot deep close to the affected hill. Bury the vines, insects and all, and stamp it down as you fill up. Some say surface covering is just as good, but the deep burying is safer, and in the case of the bug it would be better to burn than to bury.

In small lots of vines you are not likely to find more than one point of attack, but in large fields there may be several. This is probably the cheapest and surest method of proceeding against these enemies.

FARM NEWS AND VIEWS.

One of the greatest mistakes when shipping trees is that of allowing the roots to become exposed to sun and wind. It is absolutely necessary to keep the roots wet from the time the trees are received from the nursery until they are planted. All roots that are injured in digging should be cut with a keen knife on the under side, so that the roots will grow straight down. If the trees are not ready to plant, the roots may be protected by "heeling them in." By this is meant to set the tree in a trench and cover the roots with loose earth. If the weather is very windy and dry, throw a little straw over the trees and cover with burlap.

Cows produce food, but do not impoverish the soil. In fact, with the proper care and attention, one should be able to build up the soil year after year with dairy cows and at very reasonable expense.

Every precaution should be taken to give the cow about to freshen the most cleanly and sanitary surroundings. The cow should be allowed to calve in a clean freshly-bedded stall, or, better yet, in mild weather in the pasture. It is essential that surroundings be clean in order to avoid infection of the freshly severed navel cord. The cow will be in better condition and will yield more milk if she is dried up about six weeks before calving time than she would be if milked up to the time of calving.

Cows require regular and careful attention. There is work in keeping cows and giving the proper attention. But they bring in regular returns in dairy products and cash, and no farmer can afford to neglect them.

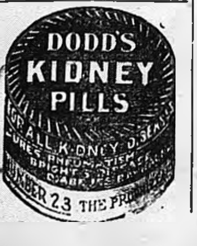
In many places community action in destroying weeds is necessary, as it may not be profitable for a farmer to clear his side of the road if the other side is allowed to remain a harboring place for pests.

A great deal is being written about the breeding and also about the feeding of the dairy cow, and the advocates of each claim quite all the virtues possible to attain. The fact is that to produce the cow we must have, requires a combination of the two—breed and feed. The cow, however well bred, even though her pedigree should be made up of the most celebrated milking strain known to the dairy world, without provided with proper feed could no more produce rich milk that would make prime butter than she would stand a chance for winning the prize in a fat cattle show. To reach the highest development in the dairy cow the breeder must breed till he can get a herd highly bred, and study feeding till he gets every cow to giving milk to her full capacity in quality and quantity.

Do not let cows drink from stagnant streams. Even by wading in such streams they can become infested with various harmful bacteria.

Washing the udder and flanks before milking is the simplest, least expensive and most effective method of keeping bacteria out of milk.

A good strainer for milk consists of three thicknesses of cheese cloth. Remember, however, that straining removes only the visible and least harmful dirt.



SUPERSTITION

It has been estimated that nearly 50 per cent. of the inhabitants of the United States confess a full or partial belief in superstitions. The belief may be faint hearted in some cases, but it is there. There are some 3,000 superstitions, and in a recent statistical investigation conducted by Professor F. B. Dresslar, of the University of Alabama, it was found that 45 per cent. of intelligent students preparing to be teachers believe in one or more of these 3,000 superstitions.

Is there any truth in these superstitions? The scientific man is likely to laugh at them an answer: "No; they represent merely the relics of ancient beliefs; they are superstitions pure and simple." And yet, only lately, Professor Sigmund Freud of Vienna, one of the most eminent psychologists of the day, asserted that there is a basis of truth in many of these beliefs. If we spill the salt or drop a knife this action is not the result of pure chance; we are entitled to believe that there is a psychological basis for the action which caused us to drop it.

The dropping of objects or the overturning of the same are very frequently utilized as the expression of unconscious streams of thought, but more often they serve to represent the superstitions or odd significances connected with popular sayings.

In order to understand the scientific basis for many of these beliefs we must comprehend that, besides our wake-a-day consciousness, there is another mind constantly active within us—the subconscious mind — which is constantly trying to express itself in various ways. If it is contrary to a person's instinct or innate belief to do a certain thing he may try to and indeed actually performs the action, but the unconscious mind is always trying to prevent it. It tries to prevent the action by checks, hesitations, errors, slips of speech, action or writing, and in a thousand ways tries to prevent the individual from carrying out the intended action. These unconscious impulses show themselves in various errors on our part—careless actions, forgetfulness, etc., which form the basis for many superstitions.

Thus, it has always been considered "bad luck" for a woman to lose or mislay her wedding ring on her wedding tour. There is a true foundation for this belief. We do not lose what we really want as easily as we lose other things. Hence, if a woman mislays her wedding ring at this time its signifies that she does not think as much of it as she should—the obvious inference from which is that the future married life will not be a happy as it should be. Hence, the foundation for this belief.

If a married woman signs her maiden name constantly this also signifies that she is subconsciously discontented, and these slips of the pen betray that fact. Unconsciously, she wishes that she was not married, and this wish comes out in the automatic writing. It betrays her inner feelings.

If, instead of ringing the bell at the door of a friend's house, you unconsciously take out your own house keys this shows that you really feel at home there. Your actions have betrayed this. Similar instances could be multiplied in which the unconscious actions really betray feelings of the inner life.

Professor Freud says, however, that he differs from the superstitious person in his interpretation of the observed facts. Instead of believing that some external, malign influence brings these results to pass, he sees in their fulfillment (when they are fulfilled) only the realization of the subject's own unconscious wishes. Thus he says:

"I, therefore, differ from the truly superstitious person in the following manner:

"I do not believe that an occurence in which my mental life takes part can teach me anything hidden concerning the future shaping of reality; but I do believe that an unintentional manifestation of my own mental activity surely contains something concealed which belongs only to my mental life—that is, I believe in outer (real) chance, but not in inner (psychic) accidents. With the superstitious person the case is reversed; he knows nothing of the motive of his chance and faulty action; he believes in the existence of psychic contingencies; he is, therefore, inclined to attribute meaning to external chance, which manifests itself in actual occurence, and to see in the accident a means of expression for something hidden outside of him.

"There are two differences between me and the superstitious person—first, he projects the motive to the outside, while I look for it in myself; second, he explains the accident by an event which I trace to thought. What he considers hidden corresponds to the unconscious with me, and the compulsion not to let chance pass as chance, but to explain it as common to both of us.

"Thus I admit that this conscious ignorance and unconscious knowledge of the motivation of psychic accidentalness is one of the psychic roots of superstition. Because the superstitious person knows nothing of the motivation of his own accidental actions, and because of the fact that this motivation strives for a place in his recognition, he is compelled to dispose of them by displacing them into the outer world. If such a connection exists it can hardly be limited to this single case. As a matter of fact, I believe that a large portion of the mythological conceptions of the world, which reaches far into the most modern religions, is nothing but psychology projected into the outer world. The dim perception of psychic factors and relations of the unconscious was taken as a model in the construction of the transcendental reality, which is destined to be changed again by science into psychology of the unconscious."

Thus we are led into a purely scientific view of mythology, as well as of many superstitious beliefs. By believing that things exist as causes in the outer world, while, as a matter of fact, the true cause lies in the mental life, we are enabled to explain all these facts scientifically and satisfactorily.—New York Herald.

In Tropical Countries
Liver Chill Very Common

In northern latitudes also the liver is a very unruly organ and required careful watching. The concentrated vegetable juices in Dr. Hamilton's Pills act directly upon the liver and stimulate its action to a normal basis. The blood is purified, the skin grows clear, headaches disappear and robust health is firmly established. No medicine for the stomach, liver or kidneys can compare with Dr. Hamilton's Pills; 25c a box at all dealers.

CHRISTENING FONT HUMOR.

Unlucky Infants Whose Parents Label Them for Life.

It would seem a poor sort of humor to label a child with a Christian name which fits the surname all too well, like Sardine Box, Jolly Death, Holly Stick, Rose Bush, Long Street, Seldom Early and the like, but it is done nevertheless.

Of course, Nemesis is sometimes on the track of these practical jokers, only his revenge is probably wreaked on the name-bearer rather than on the parents. For instance, Wild Rose sounded very appropriate in infancy, but when the pretty Miss Rose married the fascinating Mr. Bell, and she had to sign her registration paper Wild Bull, it sounded a bit queer.

Sometimes, of course, nobody is to blame. Nobody was in the case of Hetta Simpson, who married Mr. John Lott, but she got unmercifully chaffed over the combination, Hetta Lott.

But the fast-fiend who perpetrated the following joke upon his unconscious though wildly protesting bairn must have known what he was doing. Probably if the parson had twigged the diabolical design of the smiling father he might have transposed two of the names and spoiled the plot.

The parents were called Gunn, and when the parson asked for the child's baptismal names the father whispered "Benjamin Isaac Geoffrey," and it sounded all right. But fancy that lad writing all his life such a conceived signature as B. I. G. Gunn! It's too dreadful!

There are certain names that are "off the map." Such as Jezebel, Ananias, Sapphira, Judas, and Beelzebub. But occasionally parents have been known to take a mean revenge on a new and unwelcome arrival, as, for instance, One-too-many Johnson, Not-wanted Smith, Odious Heaton. Too bad, poor kids!

Sometimes the idea is the reverse. So profoundly thankful are the happy pair to have a new baby that they must express their joy at the font. Thus we get Merry Christmas Figgot, Welcome Jones, but it is difficult to admire such names as Noah's Ark Smith and Anno Domini Davis.

Many people wrongfully conclude that the names bestowed by Bunyan upon his immortal jury at Vanity Fair were very exceptional. But his Mr. Hatelight and Mr. Liveloose had their counterpart in the local directory of Bunyan's time.

Singularly enough, a volume published in 1700 gives a copy of a "Jury Return made at Rye Sussex, in the late Rebellious Troublous Times."

The names of the twelve were: Meek Brewer, Graceful Harding, Killsin Pimple, Earth Adams, Weep-not Billing, More Fruit Fowler, Hope-for Bending, Return Shelman, Fly Debate Roberts, Stand Fast on High Stringer, Be Faithful Joiner, and Fight the Good Fight of Faith White.

When a man tells a girl his first thought is of her, she isn't apt to remind him that second thoughts are best.

"I'll bet money that woman is the wife of a golf player." "What makes you think so?" "She looks so sad and lonely."—Detroit Free Press.

INSURES PERFECT BAKING RESULTS
MAGIC BAKING
POWDER
CONTAINS NO ALUM - MADE IN CANADA

Sweet Pickles of Cucumbers

Select cucumbers as near the same size as possible. Those about a finger in length are best. Put them in a stone jar and cover with a strong brine made by dissolving salt in hot water and then allowing it to cool. The test for strong brine is when it will bear up an egg. But a reasonably strong brine will do for small cucumbers. Cover with a plate and a weight and let stand for two days. Then remove the cucumbers, throwing away any that have become soft. Bring the brine to the boiling point and pour over the cucumbers again and leave stand over night. Drain off the brine and your boiling water in which powdered alum has been dissolved (using half teaspoonful of alum to a quart of water) over the cucumbers. It will take about one gallon of water to cover a gallon of pickles. Let stand three or four hours and then pack cucumbers or pickles in glass jars. Meanwhile boil one gallon of medium strong vinegar with two cups of sugar (if not liked very sweet add one cup of sugar), two dozen whole black peppers, two dozen whole cloves and two sticks of cinnamon for ten minutes, and then cover over the pickles in the jars and seal just as you would fruit. The jars should have been sterilized as for canning fruit also. If a scum should arise on the vinegar in the jars, pour it off, add a little fresh vinegar and a little spice, boil and pour over the pickles. Be sure your jars are full to the top with vinegar before sealing them. That will help to keep the scum from forming. This scum does not affect the pickles in any way. If the vinegar is too strong it sometimes softens the pickles. In making brine for small pickles or gherkins, as they are called, I find that a brine made by using half cupful of salt to one quart of boiling water is right. Too much salt might wrinkle the small pickles, I imagine. If you do not care for sweet pickles, the same recipe may be followed, omitting the sugar. A piece of horse radish root placed in each jar of pickles adds a pungent taste that is agreeable to many palates. A teaspoonful of whole mustard seed is also fine to use. Indeed, there are many changes that may be made by adding more spices, such as allspice or seeds as caraway, coriander and anise. A few seeds will give quite a distinct flavor to a quart jar of pickles.

It is well to remember that pickles should never be made in vessels of brass, copper or tin. Indeed, I do not think they should be made in anything except porcelain-lined ware or granite ware. A wooden spoon is best to use also. The vinegar must be good and it must be scalded before using in making any kind of pickles, but it never should be boiled long. A piece of alum as large as a small pea to a quart of pickles will help to keep the pickles green and crisp, and in that amount will do no harm. But on no account put in much alum.

SNEEZING COLDS, BAD COUGHS
IRRITABLE THROAT, ALL CURED

Just think of it, a cold cured in ten minutes—that's what happens when you use "Catarrhozone." You inhale its soothing balsams and out goes the cold—sniffles are cured—headache is cured—symptoms of catarrh and grippe disappear at once. It's the healing pine essences and powerful antiseptics in Catarrhozone that enable it to act so quickly. In disease of the nose, for irritable throat, bronchitis, coughs and catarrh it's a marvel. Safe even for children. Beware of dangerous substitutes offered under misleading names and meant to deceive you for genuine Catarrhozone which is sold everywhere large size containing two months' treatment costs $1; small size, 50c; trial size 25c.

CHINESE PUNISHMENTS.

Flogging is Common, and Rank Does Not Protect an Offender.

Chinese lawgivers are not troubled with any sentimental scruples on the subject of flogging. Even a criminal condemned to death is given a preliminary thrashing instead of, as with us, being treated with sympathy and consideration until the hour of doom. Another feature of Chinese justice, so far as the lash is concerned, is its strict impartiality.

Highborn offenders are flogged as relentlessly as criminals of the lower orders. The back of many a silken robed dignitary has been scored with the leather thongs of the whips wielded by sturdy Chinese officials, whose duty it has been to lay on the lash heavily, regardless of the rank of the victim, on pain of being flogged themselves.

The Chinese legal code proscribes the lash for many offences so trivial that in Europe they would be quite outside the scope of the law. Not all of the enactments are enforced nowadays, but we may quote two of them as quaint examples. Fifty lashes were ordered to be given to any merchant or tradesman offering for sale goods not of the quality they are represented to be, while self glorification is discouraged by a law that any military man who raises a monument to himself for deeds of heroism which he has never performed is to receive 100 lashes—Pearson's Weekly.

"The early bird catches the worm," quoted the Wise Guy. "Yes, but then he finds it a mighty long wait to dinner time," added the Simple Mug.

LANDING IN IRELA

Most Attempts Have Been successful as Was Casen

There have been many para to the recent German attemp arms in Ireland, which ende a fiasco and the capture of Casement. The most notable t at the end of the eighteenth the first being that of th French General Hoche, who panied by the Irish rebel, W attempted in December, 17 6,000 troops, an imposing heavy guns and thousands with which it was proposed t Irish people. Bad weather, upset the calculations of t of the expedition, which nev and with great difficulty g Brest.

Two years later Gen. Hu with little better success landed 1,000 French troops Bay. The Irish people, ho fused to join the daring r was forced to surrender. was followed a few weeks la landing at Rutland Island, of a number of French sold supply of arms and ammuni the guidance of the famou Irishman, Napper Tandy.

He brought with him Gen was to lead the Irish p they flew to arms. Unfort Tandy, the population refu the standard of rebellion, bills, and would have noth with him, with the result th back to France with h helpers.

Much more serious was t made about the same time per Tandy fiasco, when attempted to land troops Bay. It was promptly ta British squadron, which ca tically the whole of the Fr in an engagement off Blo head. Wolfe Tone came ov expedition, and was captur tried by court-martial as a sentenced to be hanged, but suicide in prison a few da

It was not until 1867 attempt was made to use base for attacking Engla the Fenian excitement ship sailed from New York rifles and field pieces, wit 40 or 50 Irishmen on b whom had been soldiers in armies during the Americ and attempted to land at half the men did land promptly arrested, while fled to America, suffering shortage of food and voyage.

It is interesting to note the men of this expeditio captured were Colonel Captain Costello, who treason, and who caused in the British law of natio claimed to be naturalize but at that time British recognize the right of the subject to transfer his another country. Warren were consequently convic tenced to long terms of tude. The United State protested against this, secured the release of t Ultimately a naturalizat passed in 1871, which, time, enabled a British-b renounce his allegiance.—

Bread Making Contests

At Rural School Fairs

PRIZES—Free Courses at Macdonald Institute, Guelph
Free Poultry Raising Courses at Ontario Agricultural College
Free Cook Books and Magazines

Over 1,500 prizes in all will be offered in bread-making contests which will be held this fall at over 250 rural school fairs taking place in Ontario. It will be a great event at the fairs and will stimulate interest in bread-making among young girls between the ages of 12 and 17 years.

Here is a wonderful opportunity for your daughter to win for herself a Free Course in Domestic Science at the famous Macdonald Institute, Guelph. All she has to do is to bake one double loaf of bread and enter it in the contest at the fair according to the conditions explained below and more fully told in the folder we will send you on request. The loaf must be baked with

Cream of the West Flour

the hard wheat flour guaranteed for bread.

This is a splendid flour which makes the biggest, bulging loaves—whitest, lightest and most wholesome bread you ever baked. Is this not a splendid opportunity to interest your daughters in breadmaking?

Here are the Splendid Prizes offered for the best loaf of bread baked with Cream of the West Flour. The following are offered at each local Fair:

1st Prize.—1 paid-up subscription to "My Magazine" for 1 year. This magazine is full from cover to cover every month with articles suitable for young people of all ages. It is published in England. Value $2.50 per year.

2nd Prize.—6 months paid-up subscription to "My Magazine." Value $1.25.

Extra Prizes.—When entries exceed ten a 3rd prize will be awarded of 6 mos. paid-up subscription to "My Magazine." When the number of entries exceeds twenty the judges at the fair will award 4th, 5th, and 6th prizes of one year's paid up subscriptions to "The Little Paper." This is a wonderful little publication issued every month in England. Its eight pages are packed with highly engaging information and stories relating to history, nature study, animals, bird life, etc.

Important—The winners of 1st prizes at the fairs automatically become competitors for the Provincial Prizes. The second half of the double loaf is sent to Ontario Agricultural College, Guelph, by the district representative in special containers provided. The judging is done by Miss M. A. Purdy of the Department of Breadmaking and Flour Testing at the College.

Provincial Prizes—The winners of first prize at each local fair compete for following Provincial prizes. The first and second prizes, or third and fourth prizes, will not be awarded in any one county.

1st Prize.—Short Course (3 months) in Domestic Science at Macdonald Institute, Guelph. The Macdonald Institute does not accept students under the age of 17 years. If the winner be less than 17 we present her with a certificate entitling her to take the course when she reaches the right age. Value of course $72.00, which pays for fees, room, board and washing. The winner lives at Macdonald Hall while taking course.

2nd Prize.—Short Course (3 months) in Domestic Science at Macdonald Institute, Guelph.

3rd Prize.—Short Course (4 weeks) in Poultry Raising at Ontario Agricultural College, Guelph. Girls taking this course do not live at the College, but good boarding houses will be secured for them in Guelph. Value of course $35.00, which pays board of student in Guelph. (No fees are charged for course.)

4th Prize.—Short Course (4 weeks) in Poultry Raising at the Ontario Agricultural College.

5th to 29th Prizes.—The Famous Boston Cooking school Cook Book by Fannie Merritt Farmer, latest edition (1914). There are 2117 thoroughly tested recipes and 130 photographic reproductions of dishes, etc., besides much special information.

Conditions of the Contest

Every girl may compete at the rural school fair in her district, whether or not she attends school, providing that her 12th birthday occurs before November 1st, 1916, or her 17th birthday does not occur before Nov. 1, 1916. One loaf of bread must be submitted baked in pan about 7 x 8 inches and 3 inches deep, and divided into twin loaves so that they may be separated at the fair. The loaf must be baked with Cream of the West Flour. One half will be judged at the fair. The other half first prize loaf will be sent to Ontario Agricultural College, Guelph, to compete in the Provincial Contest. The local contest at the fair will be conducted under the same rules as all the other regular contests at your fair.

The standard by which bread will be judged will be as follows:

1. Appearance of Loaf		15 marks
(a) Color	5 marks	
(b) Texture of crust	5 marks	
(c) Shape of loaf	5 marks	
2. Texture of Crumb		40 marks
(a) Evenness	15 marks	
(b) Silkiness	20 marks	
(c) Color	5 marks	
3. Flavor of Bread		45 marks
(a) Taste	25 marks	
(b) Odor	20 marks	

Each loaf must be accompanied by the part of the flour bag containing the face of the Old Miller (important) and an entry form must be signed by the girl and parents or guardian stating date of birth, P.O. address, and giving name of dealer from whom Cream of the West Flour was purchased. The form will state that the girl actually baked the loaf entered in the competition. The forms will be provided at the time of the fair. The decision of the judges is final. Not more than one entry may be made by each girl and not more than one prize will be awarded to the same family.

The Results of the contests at the fair will be made known in the usual way as in the case of all the other regular contests. The Provincial results will be announced as soon as possible after the conclusion of the Rural School Fairs in the Province.

Do Not Miss this Great Opportunity: Every girl between 12 and 17 years should compete. What a splendid way to stir up increased interest in breadmaking! Get a supply of Cream of the West Flour at your dealers and practise using it as often as possible to increase the chances of winning. If your dealer cannot sell it to you, write to the Campbell Flour Mills Co., Ltd., Toronto, and they will promptly tell you the nearest place to get it.

No Competitions in Counties Named Below: The competition is open to all parts of the province where Rural School Fairs are held, except the districts of Rainy River, Kenora, Manitoulin and Thunder Bay. These districts are the only parts of the province where school fairs are held by the Department of Agriculture in which this competition will not be a feature. There are no district representatives of the Department of Agriculture in the Counties of Huron, Perth, Wellington, Haliburton, Prescott, Russell or Lincoln, and no rural school fairs are held in these Counties by the Department of Agriculture. We regret, therefore, that the competition cannot include these Counties.

Write for free folder giving full and complete information about every feature of this great contest.

AUTOINTOXICATION OR SELF-POISONING

The Dangerous Condition Which Produces Many Well Known Diseases.

HOW TO GUARD AGAINST THIS TROUBLE

"FRUIT-A-TIVES" — The Wonderful Fruit Medicine — will Protect You

Autointoxication means self-poisoning, caused by continuous or partial constipation, or insufficient action of the bowels.

Instead of the refuse matter passing daily from the body, it is absorbed by the blood. As a result, *the Kidneys and Skin are overworked*, in their efforts to rid the blood of this poisoning.

Poisoning of the blood in this way often causes Indigestion, Loss of Appetite and Disturbed Stomach. It may produce Headaches and Sleeplessness. *It may irritate the Kidneys* and bring on Pain in the Back, Rheumatism, Gout, and Rheumatic Pains. It is the chief cause of Eczema—and *keeps the whole system unhealthy* by the constant absorption into the blood of this refuse matter.

"Fruit-a-tives" will always cure Autointoxication or self-poisoning—as "Fruit-a-tives" acts gently on bowels, kidneys and skin, strengthens the bowels and tones up the nervous system.

50c. a box, 6 for $2.50, trial size, 25c. At all dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

Work is being rushed on Mr. Charles Stephan's new house. The brickwork is finished.

The Women's Institute meets at the home of Mrs. John Richardson on Thursday, Sept. 7th.

Mr. and Mrs. John Becker are visiting their daughter Mrs. Wm. Schwalm in Toronto this week.

Hear Ex-Controller Frank S. Spence of Toronto at the Town Hall next Sunday night after church.

Miss Tressa Doyle returned to her home in Alma, Mich. after spending the last two months with her cousin Miss Marion Ernest.

Mary had a little lamb
She fed it kerosene;
One day it got near the fire
Since then it's out benzine.

—The annual convention of the E. L. C. E. of the Walkerton district will be held in the Paisley Methodist church on Labour Day, Sept. 4th.

Ex-Mayor and Mrs. Thos. Urquhart of Toronto, spent the week-end with their friends, Mr. and Mrs. Isaac Kunzenhauser of Brant.

Michael Sadler, postmaster of Sadler's Corner, is building the first brick house in the township of Lindsay. He is a bachelor at that.

Miss Mabel Cook of Durham has been engaged as teacher for Greenock School. Miss Mabel Kirktown will teach near Durham this year.

Women are queer, but whenever they meet an old friend they don't insist on rushing in somewhere and buying her a drink.—Durham Chronicle.

Misses Fanny and Florence, daughters of J. W. South, left Saturday on a visit to Kingston. They will attend the Toronto exhibition on their return journey.

Free advice to Wiarton: Pave your streets with the stone blocks in the walls of the Beet Sugar Factory. They are useless where they are.—Lionhead News.

Kincardine tax rate will be 35.8. It would take 63 mills to clean up the Town Council's overdraft, but the Councillors didn't have nerve enough to strike the higher rate.

Mr. and Mrs. Howard Todd, and Helen and Harrison, of Guelph, are spending the week in town. Mr. Todd sang a solo at the Methodist Church on Sunday evening which was greatly enjoyed.

Port Elgin is beginning to come into its own as a summer resort. The hotels have been crowded with visitors during the hot spell, and many Inlanders are buying lots on the beach and will build cottages there for summer occupation.

William Carr, Hepworth, was sent down to Walkerton by Magistrate Miller to be tried at the next court of competent jurisdiction because of interfering with Abe Tenant, mail carrier, while in the performance of his duties.

Mr. Mungo M. Sutherland, secretary of the Grayton Cooperative Association, Windthorst, Sask. an old Walkerton boy who left here 16 years ago speaks of the very great changes in the old town since then as evidenced by the names among the news items in the Telescope.

Who was or is the greatest woman in all history. Two hundred school teachers answered the question with enthusiasm and unanimity and the Judges awarded the prize to the one who made this reply: "The wife of a farmer of moderate means, who does her own cooking, washing, ironing and sewing and brings up a family of boys and girls to be useful members of society, and finds time for intellectual improvement.

Dr. H. H. Sto[illegible] was called to Hamilton for a couple of days this week.

Mr. A. S. Royce has completed the addition to his residence, and is now having the building bricked over.

Mrs. Robt. Long had a wire from Ottawa last week stating that her son, Gunner John Long, had arrived safely at Liverpool. Before enlisting in the Artillery, Gunner Long was a student at the McMaster University, Toronto.

If 711 more men are to be raised in Bruce County for military purposes it looks as if the south end of the County will have to do it's share.—Chesley Echo. Yes, and the town of Wiarton as we understand that [illegible] of [illegible] in that town have enlisted thus far.—Lionhead News.

It is too bad that the foremost Province of Canada should be so misrepresented by men who know neither Ontario's mind nor their own minds. Ministers have a right either to support or to oppose prohibition. But they ought not to try to be on both sides at once.—Toronto Star.

Mr. John Cunningham of Greenock who toured the Southern part of the Province on business last week, states that the crops in most sections are burned out for lack of rain. Between St. Thomas and Ingersoll there will little if any threshing done.

Major Ernest Gillies, who has been with the Canadian expeditionary force for the last three years is paying a visit to his brother, Dr. M. H. Gillies. Major Gillies has seen much hard service in England, Egypt and Salonika. He is now on a thirty days furlough.—Teeswater News.

Miss Mary Webb, daughter of Mr. and Mrs. Geo. Webb near Glamis has returned from a pleasant visit with friends at Paisley, Port Elgin, Allenford and Owen Sound. She has also been engaged to teach S. S. No. 11 Brant for the coming year. Her many friends wish her every success.

Wanted

By 15th of Aug. or 1st of Sept. a good reliable girl with good disposition and morals to do housework on farm (no milking) one mile from town, wages $250 per year with promise of increase at end of a year if satisfactory. Apply Mrs. R. A. Anderson, Cardiff, Sask. 31-31.

✣ ✣ ✣

Who Pays For The Advertising?

Who pays for the advertising of the large progressive stores? The answer of a successful advertiser is that neither the merchant nor the customer pays for the advertising but the merchant who does not advertise pays for it. The man who spends from $500 to $1,000 in advertising gets extra business that he could not have got in any other way at that cost and he has also added enough cash value to the good will of his business to pay for the advertising in itself.

✣ ✣ ✣

Young Women "Do Their Bit"

One of the ways in which women can "do their bit" is by assisting in keeping the wheels of commerce in motion by taking the place of office men who are going to the front. Training in bookkeeping, stenography and other business subjects is necessary. This can be obtained without delay at the Northern Business College, Owen Sound, which has special courses of study designed for preparing young people quickly for war time office work. Fall term begins Sept. 4th. Catalogue free.

✣ ✣ ✣

The License Inspectors

The appointment of License Inspectors for the various districts of Ontario under the new Temperance Act will probably be announced within a few days. The salaries will vary from $600 to $1800 and each officer will have at least a whole County under his supervision. In Bruce the three districts will no doubt be merged into one, and it is probable that the license inspectorship will go to Mr. J. M. White, the present inspector for East Bruce. Mr. White is a "live wire", in fact a thoroughly all round good man, and his appointment will give general satisfaction here.

✣ ✣ ✣

A Former Pinkertonian

Robert P. [illegible], a pioneer settler and railway employee, aged eighty, died quite suddenly at Palmerston on the 14th inst. He came with his parents from Norfolk, England, in 1853, and, following the Saugeen River north by boat and portage, settled near the present site of Port Elgin twenty years before the advent of railways. His mother was the first white woman settler in that region. Upon the construction of the Toronto Grey and Bruce Railway he served it and G. T. R. as baggageman at most of the stations north of Fergus, and for some years was agent at G[illegible] and Pinkerton.

✣ ✣ ✣

Walkerton Boy Married

Mr. Elvin White, an old Walkerton boy, son of Mr. and Mrs. Joseph M. White, was united in marriage at Calgary on June 29th to Miss Pearl Archibald, by Rev. Mr. Mahaffy. Elvin was one of the town's best athletes a few years ago and was a member of Walkerton's crack football team. He taught school for several years in this vicinity before going West. He is now the Postmaster and hardware merchant of Sunnyside, Alta. His bride is also a schoolteacher, and a native of Nova Scotia. It is an odd coincidence that the minister who performed the ceremony was the groom's pastor at Port Elgin a number of years ago when he attended High School there as a lad.

THE FLOWER SHOW

Directors Well Pleased With the Turnout—Flowers Scarce This Year.

The Horticultural Society held its Annual Flower Show in the Town Hall Friday night. The display of flowers was small, but considering the poor season [illegible] highly satisfactory. A large number came to see the flowers. Afterwards the young people had an enjoyable dance. [illegible]

The prize winners were as follows:—

Sweet Peas—1. H. M. Lay.

Asters—1. H. M. Norrish, 2. H. M. Lay.

Gladioli—1. H. M. Norrish.

Pansies—1. James Tolton, 2. Miss B. Howard.

Zinnias—1. Mrs. James Tolton, 2. H. M. Lay.

Balsams—1. Mrs. B. Howard, 2. Mrs. James Tolton.

Single Petunias—1. H. M. Norrish, 2. H. M. Lay.

Phlox Drummondi—1. H. M. Norrish, 2. Mrs. John Lambertus.

Marigolds—1. Mrs. John Lambertus.

Flowering Geraniums—H. M. Norrish, 2. Mrs. S. [illegible].

Begonias—H. M. Norrish, 2. Mrs. James Tolton.

Annuals—1. H. M. Lay, 2. Mrs. John Lambertus.

Table Bouquet in Vase—1. Miss B. Howard, 2. Mrs. H. Pletsch.

Basket of Cut Flowers—1. Mrs. James Tolton, 2. H. M. Lay.

Ferns—1. H. M. Norrish, 2. Mrs. W. G. [illegible].

Collection Plants—1. H. M. Norrish, 2. Mrs. W. G. [illegible].

Window Box—1. Bank of Commerce, 2. Merchants Bank.

Hanging Basket—Mrs. John Lambertus, 1. and 2.

Table Bouquet of Wild Flowers (Competition for Children of Pub. and Sep. Schools)—1. Ella May Searle, 2. Melville [illegible].

THE PRIZE WINNERS

Result of Children's Plot Competition in This District Announced.

Mr. R. A. McKay announced the names of the prize winners in the plot competition of the School Fair district of Brant and Carrick as follows:—

OATS, O. A. C. No. 72	
1. [illegible]	No. 1 Brant.
2. Melinda Hossfeld	No. 6 "

CURRENT COMMENT

With Gen. Haig it is just one thrust after another.

Save your money and invest in the new Canadian war loan.

Of course, the Dutchsland and the Bremen may have collided in mid-ocean.

So Roger Casement may prefer death to an appeal for mercy to the King.

It is said that 4,000,000 women will have the privilege of voting for or against the next President of the United States. By 1920 that number may be doubled.

Publisher McClure is a great man in his own country, but when he reached England he found that he was only a suspect. Did he hobnob too much with the Kaiser while in Germany?

From the farthest east line of the western grain country through to the foothills in the far west the prospects for a bountiful harvest are magnificent, we are told. Forty thousand harvesters are required. If possible, it would be good business to throw a few battalions of Canadian soldiers into the harvest fields.

In the four months of the fiscal year ending July 31, the Dominion revenue has reached $67,000,000 as against $45,000,000 for the corresponding period of 1915, an increase of $22,000,000 or fifty per cent. Much of this is due to increased customs and inland revenue duties. Canada is spending a million dollars a day on war, two-thirds of this being spent in Canada. When peace comes all this will vanish. How is Canada to meet the new situation?

We do not know if Sir Sam Hughes is making any political appointments to high commands of the Canadians at the front, but it looks to us as if politics, or religion, or personal grudge is standing between General Lessard getting to the front. By general consent, this officer is one of the most efficient and proficient in Canada, yet he has been studiously ignored when officers were wanted for the front.

Under the heading "A Servant of Canada," the Toronto Star editorially paid the following tribute to the late James Somerville, of Dundas:

A veteran Canadian journalist passes away just as the Canadian Press Association is about to hold its annual meeting. James Somerville was born in Dundas nearly eighty-two years ago. * * * A man with such a career must have possessed in a singular degree the confidence of his neighbors. That is, he had character. He was a strong man, he was a broad man. But he was also a modest man. He made no big speeches. He had no poses. At Ottawa, as elsewhere, he was regarded as a good comrade, and so enjoyed the love and respect of his fellows. Even as he passes away, those who praise him do so with a pang of regret, because the recognition perhaps comes a little too late. We see his worth so plainly now. For so many years we took it as a matter of course.

Japan's new factory law went into effect to-day. The following are certain features of the bill:

"The maximum working day for women and young hands under 16 years old is twelve hours a day. It is forbidden for these hands to be engaged in work after 10 o'clock at night.

"Night work is allowed in factories where the hands are divided into two sections. In this case hands must be given two days' vacation a month at least.

"The new law prohibits the employment in factories of boys or girls under 12 years old, though hands now employed who will be more than 10 years old by June 1 may be retained in their factories."

The average wages of partly skilled male workers in Japan is about 22 cents a day; those of women about 14 cents a day.

We are left in the dark as to whether there is any limit to the hours of the workingmen.

The Canadians fought gamely and died game.

Inducements to Matrimony.

There prevails in some parts of Brittany a curious marriage custom. On certain fete days the marriageable girls appear in red petticoats, with white or yellow borders around them. The number of borders denotes the portion the father is willing to give his daughter. Each white band denotes 100 francs per annum; each yellow band represents 1,000 francs a year.

The Dead in India.

Three distinct methods of disposing of the dead are in vogue in India. While the Mohammedans inter the dead, the Hindus prefer to throw the bodies into the purifying waters of the Ganges, and even now there are constant infractions of the severe regulations framed to suppress this dangerous practice. The form of funeral adopted by the Parsees is that of simply exposing their dead at a great altitude to the scavenging services of crows and vultures.

PITY THE AMERICAN.

(Chicago Tribune.)

In parts of the world the American is afraid he will not be taken for an Englishman; in other parts he is in deadly fear he will be. He never knows whether he will get a punch or a kick.

The Cynical Spinster rises to remark that it may be better to cherish an ideal than to allow him to develop into a mere husband.

Randall—Is Delaney a vulgar person? Rogers—No, he's too poor. Only a rich person can be vulgar suc-

CROSS PURPOSES

The warm September days slipped away one after the other, and the only thing of which the young lover could complain was that they were shortened in a quite unjustifiable way, which was not mentioned in the almanac. The sun was slow to rise; but when once breakfast-time had arrived, he rushed across the heavens, went headlong down the west, and Frank found himself dressing for dinner, and with the certainty that only a few short hours parted him from bed-time. It is true that the nights had grown long, so long that they could not all be spent in sleep. His light burnt late, and even when it was extinguished it did not follow that he was at rest. Sometimes he was star-gazing. He had never taken such particular notice of the stars before, but they attracted him now because they reminded him of Mrs. Austin. He had made the discovery that certain things—besides old tea-pots—were in harmony with Mrs. Austin, and consequently possessed something of her charm; and he was beginning a classification of the contents of the universe, as tried by this test. He felt that the midnight sky was very sublime, and that he himself was absurdly unimportant. How could he become more worthy of notice? What sort of destinies used people to fancy they read in the stars? Frank, as he leaned against the window, and fixed his eyes upon the far-off points of light, reflected that in all probability he would be high-sheriff one of these days. He wondered whether Mrs. Austin would like a man to be sheriff. But that would only be for a year. Perhaps it would be better to try to get into Parliament. There was a neighboring borough which was something of a forlorn hope—he might try that. There must be an election before long; perhaps Mrs. Austin would come down, wear his colors, encourage his supporters, and rejoice in his victory. Only—confound it! the ballot had spoiled all the fun, and there was no chance of a real good contest, such as they used to have in old times, when the flags were flying, the money going, and the agents outwitting each other for days together. He would have liked the gathering excitement of a prolonged battle; he would not even have minded a little rioting; in fact, an unfriendly mob, howling down any attempt at speech, and to be confronted only with good-humored coolness, and the superior manners of a gentleman, seemed less terrible to Frank than cold-blooded voters, asking questions about his views on unexpected subjects. Nevertheless, for Mrs Austin's sake he would face even that ordeal. He remembered, moreover, that the father of one of the neighboring land-owners had been made a baronet—why might he not be made a baronet? It is true that for his own part he had no especial desire to be called "Sir Francis"; but Lady Leicester" seemed to him a name not unworthy to be uttered softly at night, in the presence of the stars.

Mrs. Austin knew nothing of these soaring dreams, which only awaited a word from her lips to become serious intentions. She had no particular ambition on Frank's behalf; in fact, the young squire and his surroundings seemed to her almost ideally perfect. The very heaviness of life at Culverdale pleased her; there was something solid, respectable, and sincere about it; a sense of prosperous restfulness and security deeply rooted in the earth—that she found charming—for a fortnight. She liked to walk with Frank under his spreading trees, and call up faint visions of wives and sisters of by-gone Leicesters, who had known the great trunks as tender saplings, and lived and died under their gradually widening shadows. She could even find names for a few of these phantoms, for she had been to the neat little church (Frank's father had restored it), and had seen their monuments, with urns, and cherubs and festoons of marble drapery upon the walls. It was strange to look at Frank, with the sunshine glancing through a little lancet-window on his head; and to think that he too would have a tablet on those neat, cold walls one day, and that other guests would stay at the hall, and come on Sundays, and study it during service time. Frank, at her elbow read the responses, with a consciousness of his importance to the Established Church, which might have been absurd if it had not been so simple and honest. He sat through the sermon in an attitude expressive of deeper interest than Mrs. Austin found practicable. How was she to know that the whole of that discourse, as the young man heard it, was about herself?

For her own part, she had dreams; but, less happy than Frank, her dreams were of the past instead of the future. When Gilbert South had asked her if she remembered the old time at West Hill, she had answered, "Perfectly." It was quite true; the picture was there, but it had not been called up for years as his words called it up. Even when he did not speak, the knowledge that it was continually in his thoughts seemed to give it a kind of independent existence. Mrs. Austin found herself recalling it in idle moments, and dwelling on all manner of little incidents and details, which had been thrust into the background by later events. The old house and garden rose up before her as she knew them in her childish days: the gateway hung with ivy, the apple-tree under her bedroom window, warped, and leaning away from the strong west winds; the countless blossoms of narcissus and daffodil in early spring. She remembered the hoarse roar of the sea as she lay in bed on stormy nights, the shrieking of the hurrying gusts, the fierce lashing of the driven drops upon the pane, and then the stillness and the rain-washed sweetness of the morning when she woke. It all came back to her, even to the tufts of fern, and the small green leafcups growing on the garden wall; but it came back with that peculiar charm of tender remembrance which, combining many impressions of that which we have lost, creates one more beautiful than all. She saw it with a deeper color in the sea, a wilder splendor of sunsets, a pearly clearness in the morning sky, and a wonderful purity in the lucid depths of air. More than once since she came to Culverdale, it had chanced to her, falling asleep at night, while poor Frank was seeking his fortune in the stars, to dream that she saw Gilbert coming toward her along the grassy path. It was almost impossible to wake from such a dream, and not to look with curious interest at the real man when he came down to breakfast.

With all these preoccupations, it was hardly surprising that Mr. Austin did not give much thought to Tiny Vivian, beyond a vague and general good-will, which the girl did not return. Tiny had never changed her mind about Mrs. Austin. "I said I shouldn't like her, and I don't," she triumphantly repeated, one day as she stood talking to Frank.

"It's a fine thing to be consistent, isn't it?" said Frank, dryly.

"It's much better than changing one's mind forever. I can't see anything so very wonderful about her. Of course, she has been good-looking, but so have lots of people, according to what they say. And anybody might talk in that affected way, as if her words were much more precious than anybody else's. It makes me cross."

"So I see."

"I could talk like that, and walk like that too! Look here." And Tiny swept round the room in an imitation of Mrs. Austin, which would have been very tolerable to anybody but Frank.

"Oh, of course!" he said. "That's always the way. Let one woman get hold of another, and one knows what to expect."

"And pray what does one expect?"

"Well, neither justice nor mercy. I suppose you can't help it."

"Oh, indeed!" said Tiny. "Then I should like to know what Mrs. Austin says of me!"

"As far as I know she doesn't say anything," he answered, coolly.

Tiny was pained at Frank's manner, but she looked him in the face and smiled only the more resolutely. "No," she said, "of course she doesn't. That's just what I say. She's awfully stuck up and cold. I can quite understand her jilting Mr. South."

"How do you know she did jilt Mr. South?" he inquired, in an irritating tone.

"Why, Frank, didn't she go and marry that other man? Of course she jilted him, and she'd do it again just as likely as not, only I hope he won't give her the chance. He's worth fifty of her! Oh my goodness!" Tiny exclaimed, with a burst of defiant laughter, "what a regiment that would be!"

It was quite right that Tiny should speak up for Mr. South, since but for him she would have stood a chance of being somewhat neglected. Gilbert, however, would not suffer that. Apart from the fact that he found Tiny very fascinating, with her great eager eyes, her quick smiles, and the supreme charm of being still in her teens, he could never endure to see any one slighted. His nature was sweet and kindly to the core, and he was always ready to give the sympathy, which, to say the truth, he required rather lavishly. He liked to talk about himself in tones of confidential melancholy, slightly dashed with bitterness. But he would talk to you just as readily about yourself, showing a gentle warmth of interest which was flattering and agreeable. This kind of thing was new to Tiny. Frank was not in the habit of saying much about his inner feelings, and certainly would not have known what to make of Tiny's if she had attempted to express them. Perhaps the girl had been less conscious of having such feelings to express before Mr. South came. It was new to her, too, being accustomed to play a subordinate part, in consequence of youth and inexperience, to meet with some one who considered youthful impressions of far greater value than the dull and blunted opinions of middle age. The squires and rectors about Culverdale did not express such views, nor did their wives and daughters set such value on the artless ideas of a girl who had been nowhere and known nobody. Tiny, in a simple, unthinking way, had loved the country lanes and meadows among which she had been brought up; but with Mr. South's arrival came a quickened consciousness of their beauty and of her feelings about them. She was already a little less simple in consequence of his worship of simplicity, and her great brown eyes were more eager, and sometimes more thoughtful.

The time passed on till Mrs. Austin's visit was within three days of its close. She was to leave Culverdale on the Thursday, and this was the Monday evening, when a garden-party at the house of some friends of the Leicesters ended in an impromptu dance. Gilbert came up to her as she sat fanning herself, and watching the revolving couples. She shook her head in answer to his request. "Don't ask me," she said. "I haven't danced for years." And she glanced, not without a touch of amusement, at Frank, who had already been rejected, and who stood a little off, very erect and melancholy.

"Why not?" said Gilbert.

"My dancing days are over," she replied simply. "Go and dance with some of these young people. I see plenty of pretty girls who will be quite ready for a new partner."

He neither moved nor answered, and she turned her head and looked up at him from her low chair. He stood by her side with downcast eyes, pulling his moustache with what would have looked almost like an air of irritation, if she had not known that he was never really out of temper. His expression and attitude remind her of old days, when he was apt to be offended for a moment because some one had laughed at him, and he never liked to be laughed at. But after a brief pause she looked at him more attentively. Old use had taught her to read Gilbert's face like an open book more readily than any other face on earth, yet there was something perplexing in it now. Did he care so much to dance with her? She leaned back and waited, knowing that he was sure to speak before long.

"It is always the same thing," he said, presently. "This is over, and that is over. And, when I remember you, everything was just beginning."

"But that was a long while ago—as I think we have frequently remarked."

Gilbert's eyes were fixed on a bit of scarlet geranium, which had fallen on the floor. "Yes," he said, "I have missed everything somehow."

"One would think you were a second Rip Van Winkle, you seem to find it so hard to realize the lapse of time. You haven't by chance been asleep for a dozen years or so, have you?"

"Upon my word, I don't know. I think perhaps I may have been." He moved the bit of red blossom with his foot, and studied it under its new aspect. "Asleep and dreaming, perhaps," he said, in a low voice.

"Well," Mrs. Austin replied, "as far as I am concerned, there is no great difficulty. Since you know the year in which I was born, you have only to buy an almanac, or to look at the top of a newspaper, and I think you will be able to calculate that I am thirty-seven."

"Oh, I know that very well. You will not let me forget it."

"Will not let you forget it? Could you forget it if I would let you?"

"No," said South, lowering his voice still more, "I don't suppose I could. I have learned my lesson, I think. But I can swear to you that I never remembered it till you taught me."

The music stopped abruptly as he spoke, and seemed to make a sudden vacancy in the air, into which there poured a confused murmur of voices and sweeping of dresses as the dancers strolled by. Among them, with a carmine flush on her soft brown cheek, went Tiny Vivian, and raised her long lashes for one brilliant glance as she passed. "Miss Vivian looks especially well to-night," Mrs. Austin remarked, looking after her, and Gilbert murmured some reply, but the expression which had perplexed his companion deepened on his face. Her attention was distracted for a moment by the arrival of the master of the house, a stout, white-whiskered old gentleman, who benignantly expressed the opinion that it was a pleasant sight to see the young people enjoying themselves. When she had agreed with him as completely as he could wish, she looked quickly round, but the tall figure had vanished from her side.

He had gone away to follow once more a useless round of thought which had grown drearily familiar to him of late. He was haunted by the memories which he had called up. He had tried to bring them to life again, and instead they flitted around him like mocking ghosts, to be seen, but never to be touched. Those happy days in Cornwall were like the opening of a poem, but it had ended in the flattest and feeblest prose. At twenty he was to have been a hero; at thirty-nine he was nothing, and knew that he never would be anything. The experience was not remarkable, but in most cases the contrast is rendered endurable by the gentle influence of time. We become accustomed to it before it is so terribly defined, and half forget the splendor of the starting-point before we reached the pitiful goal. But South was not so fortunate. He saw them both, and saw them always, in Mildred's eyes.

As he stood by the door gazing idly round, his glance suddenly encountered Tiny Vivian's. She looked at him as if she dimly divined his trouble, but turned away her head the moment he noticed her, and yet that swift glance, with its vague proffer of sympathy, came like a ray of light into his dull perplexity. Tiny's eyes, at least, had no reflection of a failure.

It happens occasionally that an unexpected chill will suddenly depress us, an undefinable blight which seems to come from nowhere in particular and to be everywhere. The weather may have something to do with it; but the chill is within as well as without, and the outward aspect of things can only emphasize its dreariness.

Something of the kind befell the inhabitants of the Manor-house on the Tuesday morning. Every one was dull, the sky was clouded, and the world seemed to have grown old. Gilbert South had a harassed and weary expression; Tiny owned to a headache; Mrs. Leicester was worried by the knowledge that fifteen people were coming to dinner, and that she must keep awake all the evening; and Frank was conscious of nothing but the shadow of Mrs. Austin's approaching departure. Mrs. Austin herself was inclined to think that she had more than enough of Culverdale. She had never known a place which depended so much on the sunshine for what beauty it possessed, and, in the uniformly diffused shadow, the low lying park and the meadows with their lines of hedge and ditch oppressed her with a sense of unendurable monotony. There was really nothing to distinguish one inclosure from another, unless it were the presence of cows or sheep. One would have said that the soil of Frank's inheritance was heavy with the dullness of many generations, which rose on sunless days like an exhalation, not precisely poisonous, since good family feelings and respectable virtues would take no harm in it, but far too dense for winged and delicate fancies. Consequently, there was no chance of escaping from it even in thought. In truth, there seemed no limit to its influence. Mrs. Austin, while she dressed, looked across the river to the village and saw how the church stood solidly planted among its white grave-stones, and pointed with a sharp little spire to a gray and dreary region on high. It was hardly an encouraging prospect.

Frank, poor fellow, suffered from her depression. He was too closely connected with his surroundings to be a congenial companion on such a day; his acres burdened him and dragged him down, and he found her not unkind, but languid and cold. Gilbert South might have called up other scenes and times by the mere sound of his voice, but he was silent at breakfast-time, and disappeared almost immediately afterward. It was vaguely understood that he had important letters to write. And, after all, Mrs. Austin was not very sure that she needed any company. As she sat in the drawing-room turning the pages of a novel as an excuse for silence, she half-unconsciously followed a thread of thought which stretched backward to her girlish days and onward to her future. She was still pursuing it in the afternoon when she drove with Tiny Vivian to the neighboring town to make some purchases for Mrs. Leicester.

(To Be Continued).

You never can tell. Many a bankrupt who hasn't a dollar he can call his own has a good many he calls his wife's.

She—Mr. Pufldup is so original. He is unlike any other man I ever met. He—Well, I don't see that the other men have any kick coming.

Cynicus—Oh, all women are alike. Silicus—Then, why should any man commit bigamy?

Inflammatory Rheumatism Permanently Cured

NEW BRUNSWICK LADY GIVES FULL PARTICULARS OF HER RECOVERY.

There are many types of rheumatism, but none worse than inflammatory.

It was this kind that almost killed Mrs. Edward Warman, of Kent Junction, N. B.

Every known remedy she tried, different doctors gave their advice, but the disease increased.

Weak and despairing, she was at her wits' end when the remarkable case of Thos Cullen was published. This gentleman was cured of rheumatism by "Ferrozone." Consequently Mrs. Warman used the same remedy. Here is her statement:

"For five years I have been rheumatic. I tried various forms of relief, without success. The disease increased, settled in my joints and muscles; these swelled, caused excruciating pain and kept me from sleeping. My limbs and arms stiffened, my shoulders were lame and prevented me from working. Week by week I was losing strength and despaired of finding a cure. It was a happy day I heard of Ferrozone. Every day I took Ferrozone I felt better; it eased the painful joints, gave me energy and a feeling of new life. Ferrozone cured my rheumatism, cured it so that not an ache has ever returned. Even damp weather no longer affects me."

Ferrozone has power to destroy Uric Acid, neutralize and enrich the blood, and therefore doth cure the worst cases. Mrs. Warman's statement proves this.

By removing the cause of the disease and building up a reserve of energy, Ferrozone is certain to cure. Sufferer, isn't it about time to stop experimenting? Ferrozone is a CURE. Order to-day, 50c. per box, or six for $2.50, sold by all dealers or direct from The Catarrhozone Co., Kingston Ont.

CHANGED IRON TO COPPER.

Curious Transformation Wrought by Nature's Alchemy.

Not so very long ago a curious find was made in one of the copper mines at El Cobre, Cuba. These mines, once among the richest in the world were abandoned for a long time on account of the insurrections in Cuba against the Spanish rule. In [illegible] the coal supply was cut off by the insurgents, and consequently pumping became impossible, and the mines became filled with water.

After the Spanish war an American company bought the mines and proceeded to pump out the water. In one of the shafts thus made accessible was found what once represented an iron pickax as well as some crowbars. The metal in these implements had, it is said, turned to copper. Extraordinary as this may appear, it can be scientifically explained.

The water, filtering through the rock and the copper ore vein dissolved some of the copper, the solution containing sulphate of copper. As soon as the sulphuric acid in this solution touched the iron it at once dissolved that metal and deposited copper in its place, for sulphuric acid has a greater affinity for iron than for copper. In the process certain impurities which had existed in the iron were left behind undisturbed. The wooden handle of the ax was in good condition. The metal was porous and irregular in shape, but in the general outline preserved the form o fthe axe somewhat enlarged in size.

Minard's Liniment for sale everywhere

A Peasant Boy Philosopher.

Very remarkable was the boyhood of the celebrated James Ferguson, who was born at Keith, in Banffshire, Scotland, in 1710. His father, who was a day laborer, taught him to read and write and sent him to school for three months at Keith. At the age of eight he constructed a clock of wood that kept remarkably good time and afterward made a wooden watch, with a whalebone spring. He began to earn his first money by cleaning and mending clocks in the neighborhood. His astronomical pursuits commenced soon afterward, his father having sent him to a neighboring farmer, who employed him in watching his sheep. While thus occupied he amused himself at night by watching the stars and during the day in making models. In 1747 he published his book on the phenomena of the harvest moon, and this was followed by other astronomical works. His books received the approval of the Royal society, before which he frequently appeared.

Minard's Liniment Co., Limited.

Dear Sirs,—I can recommend MINARD'S LINIMENT for Rheumatism and Sprains, as I have used it for both with excellent results.

Yours truly,
T. D. LAVERS
St. John.

Imprisonment for Debt.

About the middle of the last century the power of imprisoning a debtor for life was taken from the creditor, and it fills one with amazement to think that a system so ridiculous should have continued as long as it did. The three principal debtors' prisons in England were the King's Bench, the Marshalsea and the Borough Compter. In the year 1759 there were 20,000 prisoners for debt in Great Britain and Ireland. The futility of the system was quite as great as its barbarity. More than half the prisoners in some of the prisons were kept there solely because they could not pay the attorneys' costs. Many prisoners had their wives and children with them. There was no infirmary, no resident surgeon and no bath.—Dundee Advertiser.

A Baby Needs.

—A daily bath.
—To sleep alone.
—Regular feeding.
—Two healthy parents.
—Comfortable clothing.
—Its birth registered.
—One intelligent mother.
—Pure fresh air and water.
—Mother's milk for its food.
—A good doctor's supervision.

Don't flirt with destiny. Dame Fortune doesn't always smile on the man who stares her out of countenance.

IMPORTANT TO WHEAT GROWERS

This is important to you because it means dollars to you.

In a short time you will be preparing for the seeding of your fall wheat, and it is necessary to keep in mind the danger of loss from Smut. Especially last year, Smut was very general in Ontario. Grain dealers advise me that it has meant a difference of as much as 10c per bushel for the grain delivered at elevators, aside altogether from making some of the wheat unmarketable. This means a loss of $3 to $5 per acre, while the cost of treating to prevent Smut and prevent this loss is only a few cents per acre. Be sure this year and

TREAT YOUR SEED FOR SMUT.

The method usually adopted is as follows:

Mix one pint of FORMALIN with 40 gallons of water, or two tablespoonfuls to one pail of water. Place the grain to be treated in a heap on clean canvas or floor. Sprinkle the formalin solution over the grain, then shovel. Repeat this UNTIL EVERY GRAIN IS MOISTENED by the solution; then COVER THE PILE WITH SACKING and leave for three or four hours. At the end of this time spread the grain out thinly to dry; shovelling it three or four times will hasten the drying. Forty gallons of the formalin solution is sufficient to sprinkle thirty or forty bushels of grain; smaller amounts in proportion. Bags, machinery or anything with which grain comes in contact before being put in the ground should be thoroughly treated.

Immersing the grain in a bag is sometimes practiced and is equally effective.

Of course Smut is not as prevalent some years as others, being influenced to some extent by weather conditions. Treatment, however, is a form of insurance. You do not expect to have your barn burned down every year because you pay the insurance every year, and it is equally important to keep up your insurance on your wheat crop. This is important at the present time, not only on your own account, but on account of the Empire, which requires the maximum supply of high quality foodstuffs. The shipping of smutty wheat not only gives this Province a bad name, but reduces the price you receive for your wheat.

Further information on the subject may be secured for the asking, either from the local office of this department in your County or from the undersigned. Hon. Jas. S. Duff, Minister of Agriculture, Toronto.

BABY'S GREAT DANGER DURING HOT WEATHER

More little ones die during the hot weather than at any other time of the year. Diarrhoea, dysentery, cholera infantum and stomach troubles come without warning, and when a medicine is not at hand to give promptly the short delay too frequently means that the child has passed beyond aid. Baby's Own Tablets should always be kept in homes where there are young children. An occasional dose of the Tablets will prevent stomach and bowel troubles, or if the trouble comes suddenly the prompt use of the Tablets will cure the baby. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

SAVED HER FAMILY.

Climax to the Fearless Fight of a Plucky Spider.

Crossing a field one day, I came upon a large female spider of the hunter family carrying a round white sack of eggs half the size of a cherry attached to her spinnerets.

Plucking a long stem of herd's grass, I detached the sack of eggs without bruising it. Instantly the spider turned and sprang at the grass stem, fighting and biting until she got to the sack, which she seized in her strong jaws and made off with it as fast as her rapid legs would carry her.

I laid the stem across her back and again took the sack away. She came on for it again, fighting more fiercely than ever. Once more she seized it, once more I forced it from her jaws, while she sprang and bit at the grass stem to annihilate it.

The fight must have been on for two minutes when by a regrettable move on my part one of her legs was injured. She did not falter in her fight. On she rushed for the sack as fast as I pulled it away. The mother in her was rampant.

She would have fought for that sack, I believe, until she had not one of her eight legs to stand on had I been cruel enough to compel her. It did not come to this, for suddenly the sack burst, and out poured a myriad of tiny brown spiderlings.

Before I could think that mother had rushed among them and caused them to swarm upon her, covering her many deep, even to the outer joints of her long legs—so deep that I could not now have touched her with a needle except at the risk of crushing the young. I stood by and watched her slowly move off with her incrusting family to a place of safety.—Dallas Lore Sharp in Atlantic Monthly.

Minard's Liniment Cures Dandruff.

America's Largest Snake.

The largest American serpent is the anaconda, which may attain a length of thirty feet. It inhabits tropical America and is a handsome animal, with dark round spots scattered over its whole body on a groundwork of rich brown. It is very fond of water and haunts the banks of rivers, lakes and streams, there lying in wait for any deer or peccary which may come to the margin of the water to drink.

TREES IN SUMMER.

Good Advice as to Their Treatment This Weather.

Expert advice on what to do for trees in midsummer is given by the American Forestry Association, of Washington. July is the month, says the report, when most attention should be given to spraying for insects, watering and cultivating, and what to do is indicated in detail as follows:

1. Spray fruit trees with Bordeaux lead.
2. Spray elms for elm leaf beetle with arsenate of lead, one pound to ten gallons of water.
3. Spray for forest tent caterpillars with arsenate ow lead, one pound to ten gallons of water.
4. Spray tussock moth and other leaf-eating insects with arsenate of lead, one pound to ten gallons of water.
5. Examine the under side of beech leaves and if wooly aphis is present lars with arsenate of lead, one pound to ten gallons of water.
6. Examine evergreens, especially postrate junipers, box, yew, etc., for red spider, and if necessary, spray with whale oil soap, one pound to ten gallons of water.
7. Examine sycamore trees for sycamore blight (gloesporium nerveseaquum), which produces a white wooly mass on the under side of the leaves and causes them to curl and wilt. If this disease is present, spray with Bordeaux mixture, one pound to eight gallons of water. The disease is now common in the vicinity of New York city.
8. The black locusts are now being injured in the vicinity of New York city by the locust miner, a small beetle feeding on the leaves. Where the insect is present, and where the tree is of special ornamental value, spray with arsenate of lead, one pound to ten gallons of water.
9. Examine the peach trees for leaf curl, and watch all the other trees for some insect manifestation, because this is a month when the insects most commonly appear. If you discover something new, unknown to you, write for information.
10. Trim shrubs after flowering. Do not destroy the natural drooping effects of the shrubs, but confine yourself principally to dead and old wood and superfluous branches.—Indianapolis News.

Desbarats' "All Canada" Newspaper Directory for 1916, 1917

Newspaper facts are presented very clearly and fully in the Desbarats "All Canada" Newspaper Directory for 1916-17 just to hand. The book contains 218 pages, and is a useful addition not only to the advertiser's library but to that of any business man.

This Directory not only gives information concerning circulations of Canadian publications, their date of issue, size, publishers, etc., but presents in a unique form a very complete gazetteer of Canada, and gives statistical information concerning places where newspapers are issued which are difficult to find elsewhere.

The book sells for $5, but the Desbarats Advertising Agency, Ltd., Unity Building, Toronto, makes a most attractive ofer to advertisers and advertising managers. We would suggest those of our readers who are interested to communicate with them.

FRUIT STAINS.

Timely Hints to Housewives at This Season.

As the fruit season waxes it becomes burdensome to keep napery spotless. Who has not beheld with dismay one's favorite damask hopelessly discolored with peach, cherry and berry stains.

Some suggestions may be of assistance in remedying the mishap.

In the first place, do not wash the linen before applying other remedies. To do so sets the stain almost indelibly, and it then has to pass through all stages until time and the laundry leave but a pale yellow reminder, which consummation does not follow usually until the fabric is threadbare.

For berry stains have some one hold the cloth so that it sags a little and pour absolutely boiling water through the spot; rub well. If this fails, light a bit of sulphur and hold under the wet spot—a lighted match will answer; the sulphurous gas usually does the work, the stain gradually disappearing.

But there are some that will not "out"—peach stains, for example. Then you must have recourse to salts of lemon, which is good, but apt to leave a hole in lieu of the stain. By extreme carefulness in its use, however, it will not do much dire damage. Take a sunny day for the task; first moisten the spot and then rub on a very little of the salts of lemon; lay the linen in the sun for two or three minutes and then wash thoroughly with soap and warm water. Success nearly always follows.

Other stains, like iron rust, are more easily removed. After washing the article squeeze lemon juice on the spots and then cover thickly with salt. Lay in the sun all day, wash and if the rust is not entirely removed repeat the application. This is equally good for ink stains.

ISSUE NO. 85, 1916

HELP WANTED.

WANTED—GIRLS TO WORK ON knit underwear—seamers and finished stitchers preferred. We also teach learners, any girl with good knowledge of plain sewing; good wages; ideal factory conditions. Zimmerman Manufacturing Co., Ltd., Aberdeen and Garth streets, Hamilton, Ont.

WANTED — HOUSEMAIDS AND Waitresses. Previous experience not necessary. Apply, "The Welland", St. Catharines, Ontario.

WANTED—BY THE 3RD OF SEPTEMber—good competent general servant; no objection to child over 8 years. Apply, Mrs. Alex. Murray, [illegible] Duke St., Hamilton, Ont.

MISCELLANEOUS.

WANTED—GIRLS OF GOOD EDUCAtion to train for nurses. Apply, Wellandra Hospital St. Catharines, Ont.

GIRLS WANTED

Experienced knitters and loopers, also young girls to learn. Clean work and highest wages.

CHIPMAN-HOLTON KNITTING CO., LIMITED,
HAMILTON, ONTARIO.

RABBITS FOR SALE.

RUFUS RED BELGIAN HARES: Grey Flemish Giants. Fully pedigreed. All ages. D. C. Waters, [illegible] Jackson street west, Hamilton, Ont.

FOR SALE.

FOR SALE—PLANING SAW AND Chop Mill; doing good business; also motortruck, 1 1-4 ton capacity, in No. 1 condition. Apply to John McCormick, Lawrence Station, Ont.

How Tea is Named.

In India and Ceylon teas are named according to the different leaves of the plant. The two small leaves at the tip of the shoot produce, as a rule, the best tea, known as "flowery" and "orange" pekoe. Pekoe without an adjective (literally "white down") is made from the leaf immediately below those of the orange and flowery. Next in the descending scale is the leaf of the somewhat coarser souchong ("little sprouts"), and lower still are larger leaves yielding congou (laborers' tea, or tea on which much labor is required to make it fit for the market) and Bohea. Blended tea is now often described as "congou." Originally the name Bohea was applied to any kind of black tea, it being assumed that it all came from Wui (pronounced by the Chinese Bui).—London Chronicle.

Minard's Liniment Cures Burns, Etc.

Salting a Census.

Ernest Edgren, formerly commercial agent for a railroad at Nanking, [illegible]na, and later with the Pacific [illegible] Company at Hongkong, is [illegible] in the Kansas City Star:

"No one knows how many [illegible] there are in China," he said. [illegible] census figures say 400,000,000, but [illegible] is a guess. No census ever has been taken. The government arrives at its population figures by an old method. It has a monopoly on salt. By estimating the average per capita consumption of salt and dividing the total consumption of salt by that figure it is able to make a fair guess."

The Way He Excused Her.

It is said that a French ambassador at Vienna once bitterly complained to Metternich of the tongue lashing he had received from the wife of that great diplomatist. Metternich sighed then shrugged his shoulders, as one who would say, "Well, what are we to do about it?" Finally he declared: "My dear friend, I loved the young lady; married her; I continue to cherish her with the same affection as before, but remember this—I had nothing to do with her educating or bringing up!"

Minard's Liniment Relieves Neuralgia.

Blowing Flowers.

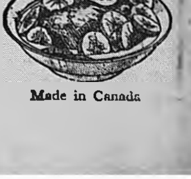
When amateurs speak of flowers "blowing" they are not using a mere vulgarism. They are speaking real old English. In the early tongue the verb "blowan" was used to indicate the opening of flowers. Instead of "blow" being a corruption of "bloom" it is the other way about. "Blossom" comes from the same root.

We do not grow the costard apple nowadays, but our forefathers set great store by the sort and bought it eagerly in the streets from the "mongers."

From costard monger to costermonger is a short step. Hawthorn, too, has its interest. The old form of haw was haga, which means hedge. Hawthorn is therefore simply hedge thorn.—London Graphic.

The Cynical Spinster rises to remark that it may be better to cherish an ideal than to allow him to develop into a mere husband.

Keeping Cool and Happy in Summer is easy for the man who knows what to eat. Keep cool and comfortable by eating **Shredded Wheat Biscuit** with fresh fruit and green vegetables. Make Shredded Wheat your meat during the sultry days. It contains more real body-building nutriment than meat or eggs. Serve with berries or sliced bananas or other fruits.



Made in Canada

The Dardanelles

(New York Tribune.)

Announcement from Petrograd, partly by official permission, that the question of the Dardanelles has been arranged and that granted the Allies win, France and Britain will not oppose Russian possession of both sides of the Straits—that is, of the city of Constantinople, the Scutari Peninsula, the Gallipoli Peninsula and the Troad shore—will excite little surprise. In point of fact Sir Edward Grey long ago declared that Britain was at one with her Russian ally as to an exit to warm water. The basis of a settlement of the Eastern question, so far as France, Russia and Britain are concerned, has long been foreshadowed.

Thus, by proclaiming a protectorate over Egypt, Britain was the first to harvest a profit. France has seized a small island off the Syrian coast, and it is generally understood that all Syria from Palestine to the Gulf of Alexandretta will fall to France if Turkey is defeated.

Russia will get the Straits; she will get Armenia. There will be no question of returning the surviving Armenians to the Turkish butchers. Much of Armenia is already in Russian hands, and the balance may be occupied before many weeks. Just where the French and Russian frontiers will join and what portion of Mesopotamia will fall to Britain remain obscure. But certainly the lower end toward the Persian Gulf containing the great oil fields, will stay in British hands.

In the same fashion, it is certain that Italy will keep Rhodes and probably the Dodecanesus, occupied in the Tripolitan war and held against Turkish evacuation of Tripoli. Now that a new war has supervened there will be no question of a return of these islands. Greece, not Turkey, will be the real loser, for the population is wholly Greek. Italy also lays claim to the Anatolian shore west of Alexandretta. Whether her claims are embodied in the Allied agreement is not yet known, although it is believed they are. Smyrna is the real prize toward which Italian eyes are fixed.

This is the rough of the Allied plank for the partition of Turkey. But it leaves the main mass of Asia Minor unaccounted for and here is the real question. Actually is it not inevitable that Russia, if she occupies Constantinople and Armenia, will in the end become the possessor of the Anatolian empire that lies between?

Years ago Hanotaux, a former French foreign minister, suggested that in digging the Suez Canal De Lesseps really solved the Anglo-Russian tangle in the near East. Position in Egypt and the Sinai Peninsula gives Britain her road for the East. Russian possession of Constantinople no longer threatens Britain, and the old policy of Disraeli passes to the discard—had passed actually before the present war.

Even if Britain, having agreed to the occupation of Constantinople by Russia, should some day oppose the absorption of Anatolia, she could accomplish little. Possessing Armenia, dominating the Black Sea, holding Constantinople, Russia would be beyond the reach of sea power, and no land power could intervene.

Given Russian victory, the plain truth is that all of Turkey north of the Taurus will pass into the actual if not the nominal control of Russia. It will become one more empire absorbed by the Slav, and he will be able in his own time to digest it. The nation which has ruled in Byzantium has generally ruled in Asia Minor. It is inconceivable that Russia will not follow the historical pathway.

But Russian power will not stop at the Straits. If the Slav comes to Byzantium Bulgaria will become once more a Russian ward—inclosed between a restored and enlarged Serbia and Russian armies camped at Gallipoli and Constantinople. Actually the frontier between Austria and Russia will be extended, and Serbia will be a Slav outpost on the Danube.

Back of all else, in its origin this war was a struggle between the Slav and the Teuton. The struggle between Hapsburg and Romanoff in the Balkans and for the Osmanli estate has been going on for a century and a half. France, under both Napoleons, under the kings before, was the champion of the Moslem before Britain adopted the "Sick Man of the East."

Always, however, the main obstacle to Russian advance, the steady obstacle, has been in Vienna. Paris and London have intervened only occasionally. Napoleon III.'s intervention in the Crimea cost France Russian support in 1870. Bismarck's support of Austria in the Congress of Berlin laid the foundation for the Franco-Russian alliance and the regrouping of the great powers.

There can be no settlement of the Eastern question as long as Austria and Russia are rivals in this region. Russian intrigue procured the first Balkan war and the crushing of Turkey. Austrian intrigue broke up the Balkan Alliance and procured the second Balkan war. To-day Serbia is an ally of one group of powers, Bulgaria of the other. Greece is torn by the partisans of the two warring systems.

If Austria and Germany win, Serbia will disappear, Greece and Bulgaria will become Austro-German vassals, and Roumania may fall to the same level. Turkey will be a Teutonic "place in the sun," and the Russian road to the warm water will be blocked by German forts and ships at the Bosphorus, as it is now.

If Austria and Germany are beaten, Russia will get the Straits, become the dominant force in the Balkans, and at no distant date absorb all of Asia Minor from Smyrna to Erzerum and from Trebizond to Bagdad. France will have Syria and Britain the balance of the Arabian segment of the Osmanli Empire, as well as Egypt.

Either way there will be a liquidation of the Eastern question, but if Russia has her way the liquidation will be more complete, more likely to be definite. We may all live to see Russia seated at Smyrna and become a great Mediterranean power.

At all events, Britain and France have set their seal to the Constantinople bargain. Russia has bought their claims to Turkish influence in Galicia and Poland, and she has paid a good price. The fate of Constantinople is now being settled before Lemberg and in the Carpathians. A century of British diplomacy and policy, many centuries of French policy, have gone by the board. The road to Constantinople may run through Berlin, but it does not pass through London or Paris.

The really momentous changes flowing from the war must come in the Near East and in Africa. We are beginning to see clearly what some of them may be, and it is no longer to be doubted that if the Allies win the real prizes will fall to the Slav. His hour seems to be at hand.

THE WORTH OF A SMILE.

The writer is traveling here and there seeing things. He rubs elbows with them all. He can't help noticing the difference in the frail pieces of humanity with which he comes in contact. What is the difference and how does it affect us? When all's said and done, it's the smile, my boys, that makes the difference. The smile, which is but the reflection of a stout heart and true; a coward never smiles—he doesn't dare to.

Travel about this work-a-day world of ours, in sunshine or in rain, and it is easy to judge which of those belong to that time-honored legion of the Lion Hearted. To some, in their opinion, Dame Fortune never smiled. Can you blame her—I can't. They see the world with eyes of disappointment and distrust; they refuse to believe in the doctrine that "clouds will be sunshine to-morrow," and as a result, they live in an ever-darkening gloom. And the Other Fellow! What of him? Ah, doesn't it stir you just a little to see him smile? His heart may ache with the sorrow of the past, and his sleep may be troubled with the trials and tribulations of the present, but he smiles. And you smile. He makes you. It's contagious; you can't help it, and you feel better for it. Why do you like the man who smiles? Because he's got a great, big heart, and he sympathizes with everyone and wants to make them as happy as he is—or appear to be.

The truly "big" man smiles at his employees, and thereby lightens their labors. They love him because he is not afraid to show them that he can be human and still be "boss." The man whom the world loves because of his smile has an army at his back which is yet to be defeated—it is the great army of the successful. The unsuccessful never smile; had they done so, their lot would have been different.

Some men can meet reverses with a smile. They "come back," as they say in sportdom; they are bound to "come back" because they smile and try again, and the world believes in them because it knows that a smile from a man who has just been knocked down, is an announcement to this same world that he is undaunted, cannot be put down, is bound to succeed. And what's more to the point, he will, and he'll do it smilingly. You'll patronize a man who smiles, because you think he is doing well and will give your money's worth; but it's ten to one you will dodge the fellow with the habitually "long face" and "sour voice," for the reason that you know he has made a failure of life and his goods may be old or short weight.

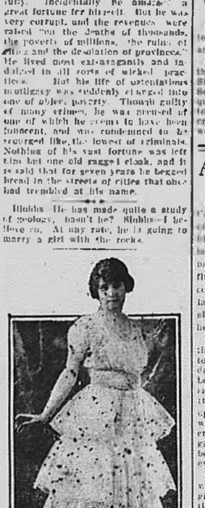
A smile that is a smile lights up the face, throws out a warmth not to be denied; makes the hand-shake felt in the heart; lifts the burden from the shoulders of the heavy laden; encourages the strong; supports the weakling; makes glad the sick; shows approval to the worthy; and is the God-given sunshine, which dispels the gloom of the devil.

'Tis easy enough to be pleasant,
When life flows along like a song;
But the man worth while is the man
who will smile,
When everything goes dead wrong.
For the test of the heart is trouble,
And it always comes with the years;
And the smile that is worth the praise
of the earth,
Is the smile that comes through
tears.

His Remarkable Career.

Few careers have covered wider extremes of fortune than did that of John of Cappadocia. He was a Roman officer of very high rank under the Emperor Justinian in the sixth century. He was a very able man, and under his direction the finances of the government flourished wonderfully. Incidentally he amassed a great fortune for himself. But he was very corrupt, and the revenues were raised "on the deaths of thousands, the poverty of millions, the ruins of cities and the desolation of provinces." He lived most extravagantly and indulged in all sorts of wicked practices. But his life of ostentatious profligacy was suddenly changed into one of abject poverty. Though guilty of many crimes, he was accused of one of which he seems to have been innocent, and was condemned to be scourged like the lowest of criminals. Nothing of his vast fortune was left him but one old ragged cloak, and it is said that for seven years he begged bread in the streets of cities that once had trembled at his name.

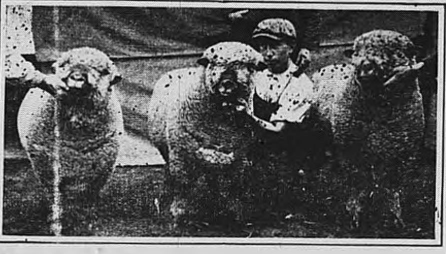
Blobbs—He has made quite a study of geology, hasn't he? Slobbs—I believe so. At any rate, he is going to marry a girl with the rocks.



Flounce upon flounce of soft tulle falling over a dainty flesh-colored satin lining goes far to make this dance gown a charming affair. Elaborate pearl bead festoons and embroidery afford rich trimming. The bodice is extremely simple, the only relief from the folds of tulle being the wide band of pearl embroidery.

THE SHEEP THAT COMBINES BEAUTY WITH UTILITY

The Shropshire is Aristocratic in Appearance, But at the Same Time Produces Mutton and Wool of the Finest Quality—Some of the Outstanding Points of the Breed Explained by Mr. John R. Kelsey, Woodville, Ontario.



A trio of champions. Reading from left to right—"Nock 43," at the head of the flock of Connecticut Agricultural College; "Kelsey's Pride," 391770, head of the flock at MacDonald College; "Forty-four's Triumph," 406368, head of the flock at the Central Experimental Farm, Ottawa.

How youth combined with energy and brains can make a success of any business has never been more strikingly illustrated than the way in which Mr. John R. Kelsey, of Woodville Ontario, has succeeded in the sheep business. Ten years ago Mr. Kelsey was practically unknown, but to-day he has a continental reputation as a breeder of Shropshire sheep.

Mr. Kelsey, like most of our best shepherds is of English extraction his father having come to this country thirty-four years ago. Although it was not until 1902 that Mr. Kelsey went in for Shropshires sheep have been raised on the Kelsey farm for the last twenty-four years, so that when Mr. Kelsey decided to raise nothing but pure-breds he was not a mere tyro at the business. The sheep that were kept formerly were grade animals, a cross between the Cotswold and Leicester, with the Leicester blood predominating.

Mr. Kelsey started to show at the smaller fairs in 1905, but it was not until 1911 that he tried his luck at the larger shows. It was in this year also that Mr. Lloyd Jones, of Burford, Ontario, won the grand championship at the International show at Chicago with a wether sired by one of Mr. Kelsey's rams. In 1913 the performance was duplicated by J. E. Campbell of Woodville. During 1911, in the eastern circuit of shows, Mr. Kelsey's sheep competed for 51 prizes and carried off 49 of them. In 1915, at the Canadian National Exhibition, the prize for the best ram was awarded to Mr. Kelsey's "Nock 43" (01469 R), 380951, whose picture is given on this page. Last year three rams were sold for an average price of $105, one selling for $150.

SHROP OF ANCIENT ORIGIN

The Shropshire, as is indicated by the name, originated in the county of Shropshire, England. As far back as 1341 there was a grade of wool designated as Shropshire, but the sheep which produced it must have been far different from the animal as we now see it. Indeed, the Shropshire cannot have taken its present form until considerably after the beginning of the nineteenth century, as Plymley writing on the agriculture of Shropshire thus describes the sheep of that county:

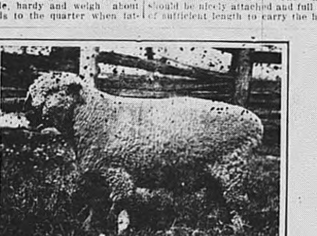
"There is a breed of sheep in Longmynd with horns and black faces, that seem an indigenous sort. They are nimble, hardy and weigh about ten pounds to the quarter when fatted. Their fleeces weigh about two and one-half pounds."

The sheep described were no doubt the progenitors of the present-day Shropshire, though it is thought the Southdown was used to improve the quality of the mutton and the Leicester and Cotswold were used to increase the size and the amount of wool.

"The Shropshire is a general purpose sheep," said Mr. Kelsey, "by some people it has been called the rent payer, as it is easy to raise and its wool and mutton always command high prices. The quality of its mutton is equalled only by that of the Southdown. The fleece is of good fibre and carries considerable oil. The wool usually sells for about four cents per pound more than that of common sheep. The breed is exceptionally hardy and the sheep do comparatively well on short pasture. They are also very prolific this year, which was by no means an exceptional good one with us, our ewes averaging one and three-quarters lambs each. One strong point about the Shropshire is its aristocratic appearance, if one can call a sheep aristocratic. Although good looks and fancy points are of no value as far as the butcher and wool dealer are concerned, they certainly have value when a sale is being effected. Other things being equal the buyer will take the sheep that has an attractive appearance every time."

Mr. Kelsey thus describes the Shropshire:

"The head should show refinement in every feature, with moderate length. A characteristic attribute is for it to be closely covered with wool, the cap between the ears being dense and running to the bridge of the nose and joining that which covers the cheek and lower part of the head. The ears should be far apart, pointed and moderate in thickness and preferably covered to the tip with fine curly wool. There should not be the least evidence of horns, as the places where these sometimes appear should be covered with wool. The neck should be nicely attached and full and of sufficient length to carry the head with peculiar style. The body to possess this characteristic smoothness and symmetry must be somewhat circular and round ribbed. The back should be straight, strong and knit so that the handling of this part shows it to be smooth and evenly covered. The loin must be wide and hips not prominent, and the quarters lengthy and deep, the width from the loin and hips should be carried out to the tail head and the fulness characteristic of this part be maintained on the outside of the thigh and on the inside as well, making the twist not only deep, but plump with flesh. The fleece should be strong and fine in fibre with all the density possible. From the bridge of the nose to the fetlock as well as along the belly, a dense covering of wool is desirable. In opening the fleece the fibres, which are generally about three inches long, should part readily, show clear white in strong contrast to the pink skin. About the ears or top of the head there should be no patches of black fibre nor should these appear distributed anywhere in the fleece. The characteristic markings for the face and legs are a rich dark brown in color.



Mr. Kelsey's new flock header—"Rewarder," 291394. First at Toronto in 1914. Sired by the champion ram "Concentration."

BUY ONLY THE BEST.

In raising stock of all kinds it pays to have the breeding animals of the best blood possible. Although in all cases it may not be advisable to have both sire and dam pure bred, the sire should always be pure bred. By having a pure bred animal whose breeding is known for generations back all speculation and guess work are eliminated. If an animal's sire, grandsire and great grandsire, and dam, granddam and great granddam are known there is not much doubt about how that animal's progeny will turn out.

Many breeders are "a penny wise and a pound foolish" in buying their breeding stock. They will often buy an animal that they know is inferior just because he is cheap. When breeding stock is being bought the best should be obtained even if the price may seem a trifle high.

The wisdom of this is well illustrated by the revenue that Mr. Kelsey got from one ewe. This ewe was lambed in 1909, and up to the present time she has made over $400 for her owner. She has raised nine lambs, of which seven have been sold. The seven lambs sold for $295. The wool from the ewe and her progeny until sold brought in another $82.07. The prize winnings from the ewe's progeny before they were sold amounted to $121, making a total of $444.07 made from one ewe. These figures should convince even the most skeptical that it pays to buy stock of good breeding.

At the present time Mr. Kelsey has 75 head of sheep. During the summer the ewes and their lambs run out on pasture together until weaning time. Towards fall when the rape is ready they are turned into it. They are only allowed to be in twenty minutes, as Mr. Kelsey has found from experience that if they are allowed to stay in longer than this they will bloat. They are turned into it twice a day.

Mr. Kelsey, unlike many other sheep breeders, has no bother from the sheep having stomach worms. All the time he has been raising sheep he has only lost one sheep from parasites.

Sometimes when the sheep are being fitted for the shows they get indigestion. Mr. Kelsey has found the following a sure cure: Four ounces of Epsom salt, half a teaspoonful of ginger dissolved in its own depth of water.

—CANADIAN COUNTRYMAN.

A Gale or Two

A fine May day, let the wind blow, Capt. Gasket, peering from the window of his cottage on Bayberry road, finds his indignant surprise at the weather's attitude toward a bit of a breeze modified by a spectacle of a wall of fluid earth, twenty feet high and of complete opacity, advancing down the lane at a speed of twelve knots. A slight frown disturbs his placid forehead of an experienced navigator.

"You can't stay ashore without getting dirty," he mutters, and turns back to the fire. It is a good fire, built of driftwood gathered at the surf's edge, borne without haste over the yielding sand and piled in grotesque shapes (the work of Poseidon's idle moments) upon a clean swept hearth. The wave washed fragments burn with a great crackle and a play of red, blue and green sparks. To the man who sits before the fire it is a magic blaze, evocative of many memories.

To these memories the roar of the westerly wind outside the cottage gives some of its own force and direction. Before Capt. Gasket rises the vision of his first passage, as an ordinary seaman, on a limejuicer bound homeward through the immense reaches of the blue Pacific. He fancies he can see again the remote Island of Mangareva with two summits rising 1,700 feet above the sea, their lovely verdure veiled by a blue mist that appears to be an exhalation from the brilliant color of the deep water surrounding. All day the ship had him becalmed within sight of the delicate contours of that distant bit of land. But in the first dog watch a black cloud, rising from the hidden valley ashore, had signalled the swift approach of a sharp squall.

All hands on deck were busy shortly with the first serious bit of ship's work of that memorable passage. While the Welsh skipper, screaming his orders and dancing about the poop in undignified excitement, gave no one aboard a second's peace until he had put his ship under topsails and set a course offshore from the dangerous coral reefs round about, the best of both watches took in eleven of the twenty-three sails that had been set in forty-four minutes, including the courses! Well, not a record, but still a lively bit of work. Having snugged up the main topgallant staysail, Ordinary Seaman Gasket hastened painfully to the deck (the railings tortured his bare feet) to watch with exhilaration his first storm at sea.

But that had been nothing. He had stored the merry recollection of it later when a rising pampero, emerging from the River Plate, had raged for three days and burst the soles from his sea boots. Another pair, a full size too small, had been procured from the captain's slop chest at the out[illegible] chargeable against his payday in Scotland. And these had gone to flinders in a hurricane in the North Sea. Ah! that storm was the climax of that passage. After you have actually sighted the friendly St. Abb's Head light off the entrance of the Firth of Forth, it is totally discouraging to spend thirty-six hours in a tumult which drifts you eighty miles to leeward and leave you somewhere off the coast of Holland in the midst of a lot of Dutch fishing boats ornamented with brown sails.

Clinging to the life lines and ledging the blackly glittering wall of water which, bursting, flooded the deck breast high with a boiling flood, young Gasket had crept aft, wet and shivering from head to foot, to ring a double stroke on the after bell. It was 9 o'clock at night. The mate, Mr. Walker, clung gloomily to a topsail sheet at the base of the mizzen.

"Any sign of a letup, sir?" ventured the ordinary seaman. Mr. Walker uttered a dismal sound indicative of negation.

"Well, this will about do me," commented the youth, with chattering teeth.

"Yes, I expect so!" was the enigmatic reply of the mate, whose irony was not customarily so polite.

Yet an end had come and with it a fresh beginning. In many voyages on many seas, through gales of a more formidable aspect than any of these, the romantic youthfulness of the ordinary seaman had matured into a manhood courageous, simple and enduring. For it is a fact that, for the term of their vouchsafed lives, the unchanging sea confers on its worshippers a measure of its own immortal freshness and boundless beauty.

THE POULTRY WORLD

CARE OF SUMMER CHICKS.

To make the most in poultry, and this is so in any business, the best system is that line of work will give the best results, and it means more than just hatching, more than breeding. Proper housing alone will not give results, but it is a chain of small details linked in the system that, faithfully carried out, means success, and it is many of these small things that the beginner overlooks or attaches no importance to it that causes the loss in his operations.

In the care of poultry in summer, water is one great essential. It plays a bigger part than the average poultry-keeper has any idea of. Yet in many cases this essential to success is neglected, water being given the poultry but once a day, and then in none too clean drinking vessels. The warmer the weather the more often the poultry should be supplied with fresh water. It means extra work. But it also results in increased profits. This water question is too often considered of minor importance even by those who have raised poultry long enough to know better. Summer chicks need extra care. The advocates of late-hatched chicks either had ideal growing conditions or reared but a few which could have extra care and attention. In a majority of cases the beginner will find that the success with late-hatched chicks is far below that of the early hatches. Those who have had the practical experience know full well from a commercial standpoint that he chicks hatched in late June, July and August never make winter layers, except on rare occasions when the conditions are just right and all the proper essentials have been complied with. This is the case of the beginner is rare, for it takes some experience to properly judge and know what and when to do the many small things that go to make a full success in raising chicks. The success with them that one can read in the poultry press was made in a majority of cases by the experienced poultry-keeper who has had several years' experience and realizes the importance of providing everything that will go toward making a success with them.

It is hardly to be expected that the beginner can know this in his first efforts in taking care of poultry. Nevertheless if the main essentials were faithfully followed even the beginner would have a fair measure of success. Yet the very first essential in many cases, that of providing fresh water, is neglected and thought of no great importance by the beginner.

Green feed in some form should never be neglected. It is one of the great aids to health. Poultry on free range or good grass runs will always be better chickens than those that have been confined to the yards that are bare, without grass, or even shade in some form. The feeding of cabbage, lawn cuttings, beets, etc., will go much to counterbalance the absence grass and clovers in the poultry yards. Yet when possible, and this can be made so with a little effort, grass runs can be had by erecting double yards and having fewer chickens, but better quality.

This brings one to the question of room and here, too, the mistake is made in growing more chicks than can properly be accomodated. In almost every case the poultry-keeper has too many, and this does not mean the beginner alone but many of those poultry-keepers who have a good-sized flock. Poultry, to do its best, must not be overcrowded. The growing quarters should be well ventilated, and at least four square feet per fowl allowed. It is quality that counts, not quantity, and fifty per cent. of the flocks growns could be culled and sold on the market. Those remaining would be more profitable and the improvement next year in the flock marked.

NOTES.

We do not believe in giving pepper or other condiments in the food of little things turkeys, though sometimes it is advised, for we have always found such things harmful to the digestive apparatus of the little turkey.

Never take the chicks out of the incubator as soon as they are hatched, but let them stay in the nursery under the egg tray for twenty-four hours and get well dried off, able to run around and strong.

When the turkey hen makes her own nest be careful that it is deep enough so that the eggs will not roll out. Sometimes it is necessary to build up one or more sides of the nest a little, using the material around the nest so that the hen will not suspect that the nest has been tampered with.

Ducklings when hatched in an incubator sometimes need more fresh air in the machine than chicks do and when the hatch is complete and the little ducklings are still in the machine getting strong before being taken out, it is well to open the door a little, say one-eighth of an inch, to let in more fresh air for them to breathe. This, of course, applies to a good hatch, not where there are only a few ducklings in the machine.

Real Tommy Atkins.

The picture of Tommy Atkins which recurs most vividly to my mind is that [illegible] in the trenches on the dreary November evening [illegible] before I bade him good-bye. It had been raining, sleeting, and snowing for a week. [illegible]

[illegible]

The Gaelic A B C.

Every letter in the Gaelic alphabet is represented by a tree. The alphabet of to-day consists of eighteen letters—in ancient Gaelic seventeen—and now, as of old, all the letters with the exception of g, t and u, which stand for ivy, furze and heather, are called after trees.

The Gaelic A B C of to-day runs: Ailm, beith, coll, dur, eagh, fearn, gath, huath, iogh, luis, muin, nuin, oir, peith, ruis, suil, teine, ur, which is equivalent to saying elm, birch, hazel, oak, aspen, alder, ivy, whitethorn, yew, rowan or quicken, vine, ash, spindle tree, pine, elder, willow, furze, heath.

In the ancient Gaelic alphabet the letter h (the heath or whitethorn) does not exist. The alphabet is called the beth-luis-nuin, because b l n and not a b c are its first three letters.

A towel wrung out of very hot water and placed at the back of the neck is the best treatment for a throbbing headache.

Here are shown Prince George of Battenberg and Countess Nada Torby, youngest daughter of Grand Duke Michael of Russia, whose engagement has been announced.

Chats With the Doctor

BY A PHYSICIAN

HEAT AND COLD.

There is a very common idea that one of the secrets of maintaining good health lies in the avoidance of variations of temperature. It seems likely this is altogether a fallacy. For one thing, it is an experiment which is impossible of absolute verification or disproof. What would happen to a human being literally and continuously kept at a uniform temperature day and night, winter and summer, it is impossible to say with certainty. But this we may say, that people who have, so far as possible, avoided variations of temperature, are generally least able to resist the effects of those changes of temperature which are absolutely unavoidable in normal human life, when they actually arrive. The over-coddled and pampered child is notoriously the first to catch cold, just as the plant which has been kept for months in the uniform temperature of a room or greenhouse is the first to succumb when placed in the open air. As a matter of fact, the body is provided with an elaborate, automatic apparatus for protecting us from the ill-effects of great and sudden variations in temperature. But this machinery, like most other machinery, is kept at its highest point of efficiency by occasional use. A function long left unexercised loses in potency, and the physiological processes to which I have referred are no exception.

Distributed over the entire surface of the body are thousands upon thousands of little glands whose main work it is to assist in maintaining a uniform temperature of the blood, no matter what may be the temperature of the surrounding atmosphere. This they do by eliminating from the body a greater or lesser amount of fluid or sweat; and this work is assisted, and, indeed, made possible by the co-operation of the smaller blood vessels, which, according as the surrounding air is hot or cold, expand or contract immediately below the surface of the body, thus causing those parts to be supplied with more or less fluid, capable of elimination, and evaporation. And it is found by experience, as indeed common sense would have suggested, that the more all this mechanism is used and tested, the more efficient it is in working. From this it does not follow, of course, that people in feeble health should suddenly expose themselves to chilling temperatures, or sit in draughts, or take cold baths in the middle of winter. But it does mean that the path of wisdom lies in the regular enuring of the body to steadily increasing variations of temperature. Hence the value of the morning cold bath or cold sponge-down, which sets on the body like firm resolution on the mind. And here, too, lies the explanation of the new discovery that a large part of the value of the open window consists not so much in the fact that pure air is thus provided for our lungs to inhale, but in the fact that it enables cold air to play around the skin of our face, whilst our feet and bodies are warm.

A FEW MEDICAL TERMS.

Correspondents are continually writing to me asking for the meaning of certain terms which they have heard their doctor use or have seen in some article or book. Three of the commonest of these are terms "aetiology," "diagnosis," and "prognosis." Aetiology means the study of the causes of the disease, but those which are immediate, and those which are "remote," or "predisposing." This, as an example in case of consumption, is concerned with the actual infection, that is the invasion of the tubercle bacillus, and also with the predisposing causes such as the constitutional tendency of the individual, and with those habits and surroundings which increase the liability. Diagnosis is the study of the distinguishing points by which a disease is recognized. It is the most highly technical branch of medicine, for it involves an accurate knowledge of and familiarity with the signs and symptoms of all other diseases with which it might possibly be confused. Capacity to diagnose disease is almost the supreme test of medical skill and knowledge, involving, as it does, first an accurate knowledge of what may be called the normal course of all diseases; second, a practical familiarity with the numerous variations which all diseases show in actual practice, and third, an alert mind, able to focus itself at once on the really salient and distinguishing features of the case.

Prognosis, the third term which I have mentioned, is concerned with the anticipation of the probable future course of events. This, as will be gathered, involves not only theoretical knowledge of disease but a very large practical experience of the course of each disease under all sorts of special circumstances. The kind of questions which a doctor is asked and expected to answer are these: Will the patient recover? How long will his illness last? If the patient recovers, what after-effects will be left? As these questions are often impossible to be answered with dogmatism the best reputed doctors have always cultivated an oracular method of reply, calculated to fit with very varying actualities.

SCABIES.

That very unpleasant skin disease known as scabies, or the itch, is not necessarily the result of dirt or neglect in the individual. It may easily be caught by the most cleanly. It is, unfortunately, by no means easy to get rid of. Drastic treatment is, in any case, called for. All underclothing should be changed daily, and should be boiled before being re-worn. Every morning and evening the entire surface of the body should be thoroughly washed with hot water and sulphur soap, the affected parts being thoroughly scrubbed with a nail brush. Afterwards they should should be rubbed with a little sulphur ointment. This treatment may have to be continued for many weeks.

"The eyes are the windows of the soul," quoted the Wise Guy. "And every man must look out for himself," snickered the Simple Mug.

KEEP THE BOWELS REGULA
AND AVOID
CONSTIPATION.

When the bowels are not kept regular they become clogged up with waste and poisonous matter, causing constipation, biliousness, sick headaches, piles, and all kinds of liver troubles.

Milburn's Laxa-Liver Pills will regulate the bowels so that you may have a free and easy motion every day. One pill every night for thirty days will cure the worst cases of constipation.

Mr. John J. Smith, Elginburg, Ont., writes: "I had been troubled for a great while with constipation, and tried many different remedies which did me no good. I happened to try Milburn's Laxa-Liver Pills and I have found them most beneficial."

Milburn's Laxa-Liver Pills are 25 cents per vial, or five vials for $1.00; for sale at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

ARAROBA POWDER.

Brazil Supplies the World—Used for Medicinal Purposes.

The world's supply of araroba, or goa, powder is said to come entirely from the state of Bahia. It contains the substance known as chrysarobin, widely used in medicine in the treatment especially of parasitic skin diseases.

The product is found in form of a pulp or small solid masses in crevices of the heart wood of the tree known locally as amargoso do matto (Andira araroba, of the natural order of the Leguminosae), and is said to be a morbid growth. The trees are not cultivated, but are found in considerable abundance in the forests in various parts of this state. They are of large size, from 80 to 100 feet high, and often attain a diameter of more than three feet. They have imparipinnate leaves, the leaflets of which are oblong, about 1½ inches long and three fourths of an inch broad, and somewhat truncate at the apex.

To extract the powder, the trees, which must have attained full growth and development, are felled and split open in order to reach the deposits of araroba are then removed, dried, and finally powdered. The product is a bright yellow color when extracted, but becomes a yellowish brown, varying considerably in tint when dried.

It yields about 50 per cent. of the substance known technically as chrysarobin, which is of therapeutic value. It occurs in a microcrystalline, odorless, tasteless powder, very slightly soluble in either water or alcohol. Chrysarobin gradually oxidizes to chrysophanic acid and glucose, and it is in the form of this acid that the drug is generally used. It is administered in the treatment of eczema, psoriasis and in ringworm and other similar maladies.

The yield per tree may be as high as 60 or 65 pounds, although it occasionally happens that trees which are sufficiently large and old enough to give a good yield are found to contain no araroba whatever.

The powder is an exceedingly dangerous article to handle, for if it enters the eyes it causes blindness, and burns from the caustic liquid referred to produce sores that may incapacitate the person afflicted for a long period. Those engaged in the work for any length of time, although protected by gloves and masks with eye pieces, invariably lose their hair, eyebrows and eyelashes, and sometimes even become blind. In a case known to the writer a cat lost its fur after sleeping on a bag of powder. It must be packed for shipment in hermetically sealed tins in wooden cases, or it will not be accepted by transportation companies.

At the present moment there is only a small stock available in Bahia, as immediately before the outbreak of the war some large shipments (amounting in all to 8,000 or 10,000 pounds) were made to Europe and fully supplied the foreign demand for the time being, so that inquiries for it are only now beginning to be made again. It is said that abundant quantities are available, and that with sufficient inducement in the matter of price as much as five or six tons per month could readily be obtained throughout the year.

The market price at this city has ranged from two to 3.5 milreis per kilo (at present exchange equivalent to 22 to 40 cents per pound), and is now about midway between those extremes. Goa powder pays a state export duty of 35 reis per kilo, which is equivalent to only a little more than $5 per ton of 2,204.6 pounds.

Unfortunately araroba lends itself to adulteration by the admixture of powdered wood from the tree with the pure powder, which is practically impossible to detect without analysis. The powder marketed is supposed to show a minimum of 50 per cent. of the pure drug upon analysis.—From the U. Commerce Reports.

"War is a terrible thing." "No doubt about that." "I see where some debutantes have called an urgent mass-meeting." "What's the idea?" "They are going to send sofa pillows to their friends at the front."—Birmingham Age-Herald.

Had Weak Back and Kidneys.
COULD HARDLY MOVE IN BED.

When the back becomes weak and starts to ache and pain it is a sure sign that the kidneys are not performing their functions properly.

On the first sign of backache Doan's Kidney Pills should be taken and serious kidney troubles prevented.

Mr. Francis McInnes, Woodbine, N.S., writes: "I deem it my duty to let you know the wonderful results I have received from the use of Doan's Kidney Pills. For a long time I had been suffering from weak back and kidneys. I used to suffer the most at night, and sometimes could hardly move in bed with the pain. I could do no hard labor on account of my back. A friend advised me to give Doan's Kidney Pills a trial, and I am glad I did for the pain in my kidneys is gone; my back is strong, and I can perform any hard labor and get my good night's sleep. I only used three boxes of the pills."

Doan's Kidney Pills are 50 cents per box, or 3 boxes for $1.25; at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont. When ordering direct specify "Doan's."

The New Coats For Fall

The First Lot of Ladies' Fall Jackets are Here.

You will like our Coats because they are particularly stylish, the cloths are the very latest and each coat is perfectly finished.

This season the coats are of loose swagger style, large sleeves and many with a generous cape collar.

The materials are very pretty, consisting of Cord Velvet, Plushes, Novelty Plaids, Fancy Mixtures and Beaver Cloths.

They are as attractive as we have ever shown.

Prices start at $10.00 up to $25.00.

Ladies' Raincoats

Special Quality at $5.00

Abnormal market conditions have made it impossible to secure materials at this price but we have been able to secure a line and mark this that the quality has not been sacrificed or the workmanship skimped for the sake of price.

These coats come in Pearl Grey and black and made of splendid quality Mercerized Poplin.

Special price—$5.00

News of the Week Collected by Staff of Live Correspondents

PINKERTON

The Young People's Society held a very successful lawn social at the home of Mr. D. Pinkerton on Wednesday evening last. A large number of young people attended and spent a very pleasant evening playing games.

Miss McLean is visiting her sister, Mrs. Fitzsimmons.

Mr. Fred and Miss Ellen Gibb spent a few days at Inverhuron.

Miss Aileen Pinkerton returned from visiting friends in Berlin.

Miss Mary Desmond of St. Michael's Hospital, Toronto, is spending her holidays at her home here.

Pte. Edgar Garland of 209th Batt. training at Camp Hughes, Saskatchewan, spent a few days at his home here, returning to the West on Tuesday. Edgar expects to go overseas about October.

Miss Annie McMillan returned to her home near Lucknow after spending the past two weeks with her cousin Miss Nellie Knox and other friends.

Misses Gladys Gale and Marie Pinkerton spent a few days with their friend, Miss Irene Moffatt of Narva.

Mrs. Arch. Campbell returned from visiting friends in Meaford.

We are sorry to report the severe illness of Miss Myrtle Garland and all hope for a speedy recovery.

GLAMIS

Mrs. Madden of Hamilton is visiting her friend Mrs. J. Graves.

Miss Couse of Beamsville is a guest of Miss Jennie McKeeman.

Miss Lizzie McCormick returned to Detroit, Mich., last week.

Mrs. Ruddell of Georgetown spent the past week with her sisters, the Misses Howson.

Miss Lila Cunningham left Thursday to visit friends in Hamilton.

Mrs. Bremen and children of Mount Clemens, Mich., spent a few days with her parents, Mr. and Mrs. S. Stevenson.

Misses Sara Blaire and A. Burns returned to Hamilton on Thursday after a short visit at Mr. Cunningham's.

Mr. Charles McKinnon arrived home on Wednesday after a couple of weeks' visit with friends in Huron Co.

Miss Margaret Campbell has returned to her position in Harriston.

Mr. and Mrs. McKenzie of Bruce Mines have been visitors at "The Crystal."

Mr. and Mrs. Earl Avery, Arnow, spent Sunday at Mr. D. Robertson's.

Mr. J. G. Purdy is in Galt attending the Conference of the Free Methodist Church. The Conference has decided to have Rev. Mr. De Mille and Mrs. De Mille stay with their appointment another year, at Glamis.

Miss Mary Dathan is holidaying at Port Elgin.

Miss Reta McKinnon, teuth of Kincardine, has returned from Toronto.

Pte. Edgar Garland who is visiting his home at Pinkerton, was in the village on Sunday.

Rev. Donald McIntyre occupied the pulpit of the Baptist Church Sunday evening. He and Mrs. McIntyre intend spending a week at Inverhuron Beach.

Mr. and Mrs. Nesbitt entertained friends from Chatsworth on Sunday.

In loving memory of Master Norman McLean, Glamis, who passed away Aug. 22, 1916.

Dearest Normie, thou hast left us,
And our loss we deeply feel,
But the God who hath bereft us,
He can all our sorrows heal.
'Tis true a year has flown, but Oh! we miss him
Never shall his memory fade.
Oh! how sad for friends and loved ones
Thus to have laid thee in the grave.
Only thirteen short years of life
Shone upon thy fair young face,
Then thy form lay cold and lifeless,
Once so full of youth and grace.
God but lent you to us, Normie,
Just to gladden and to cheer
All our hearts and make us better
By your short stay with us here.
Then it pleased our Heavenly Father
He who doeth all things well,
To transplant our precious darling
Over where the angels dwell.
While down here our hearts are bleeding.
Through our blinding tears we say
We shall meet again, dear Normie,
In that land of endless day.
Thou canst not come back to cheer us
As in happy days of yore,
But, thank God, we all can join thee,
With thy loving mother, on the Everlasting Shore.
There no parting words are spoken,
There our loved ones never die.
Yes we'll meet you in the morning
And we'll never say good-bye.

C. G.

FORMOSA

A sketch of Formosa appears on page 4 of this week's Telescope.

The marriage took place here on Tuesday morning, Aug. 29th, of two popular young people, Miss Annie Glaeser to Mr. John Fedy, the ceremony being performed by Rev. Father Brohman.

A party composed of Mr. and Mrs. Frank Baingessner, Mr. and Mrs. Anthony Beingessner, Mrs. Hunzlger and two children, left last week for the west. Mr. and Mrs. F. Beingessner were returning to their home at Champion, Alta. Mr. and Mrs. Anthony Beingessner will visit their children in Saskatchewan.

The end of an old sidewalk post sticking up out of the ground was the cause of rather a serious accident to Mrs. John Schill. Mrs. Schill stumbled on it and fell, badly injuring her arm. Some ligaments were broken and the arm swelled up very badly. This old sidewalk was removed a number of years ago and it is thought the frost caused the post to push up out of the ground.

SOLWAY

Mr. and Mrs. John Stroeder motored to Wiarton on Sunday and spent the day with friends there.

Mrs. John Hanmore and children are spending a few weeks at the home of the former's mother Mrs. Heenan in Campbellford.

Misses Selena and Florence Brocklebank spent last week with their aunt Mrs. Faucet in Tara.

Miss Eleanor McGarity left on Saturday for Toronto where she will spend a week with her sister Miss G. McGarity.

Messrs Martin and Michael Hanmore spent Sunday at the home of their brother Mr. Frank Hanmore near Pinkerton.

Miss Adeline Spitzig from Chepstow is spending a couple of weeks with her sister, Mrs. A. Knoll.

NARVA

Miss Carey of Brant is visiting at Mr. A. Foreman's.

Mr. and Mrs. C. McTeer spent Sunday at Mr. Sam Reid's.

Miss Agnes Moffat returned home on Thursday.

Misses Gladys Gale and Marie Pinkerton, of Pinkerton spent a few days with their friend, Miss Irene Moffat.

Miss Celia Heeny who has been working at Mrs Jack Keyes' returned to her home on Saturday.

Miss Minnie Fitzsimmons of Kingarf Sundayed at her home here.

Miss Bella Morrison went to Cargill on Saturday where she will spend a few days before returning to her home in Durham.

Mr. Petrie Moffat went to Toronto on Thursday to spend a few days before resuming his duties as teacher in Peterborough Co.

CARGILL

Mr. John Clancy left on Saturday for Quebec as a delegate to the Grand Convention of the C. M. B. A.

Mr. W. D. Cargill M. P. P. spent Thursday in Toronto.

Mr. and Mrs. P. Lenahan and family and Mr. Smith of Mildmay motored here and Sundayed with Mrs. Clancy.

Rev. J. Truax, formerly of Cargill, renewed acquaintances here last week.

MILDMAY

Mr. and Mrs. Thomas Evans (nee Miss Clara Sweitzer) of Lethbridge spent Thursday and Friday with relatives and old friends in town.

The Ford Agent Mr. Ed. Kalbfleisch made a business trip to London on Thursday, August 24th and brought one of the new model Ford cars back with him.

Mr. Ed. Diebel has secured a position in a chair factory in Elora and leaves for that place this week.

Rev. Mr. Marsh and Mr. Wm. Wendt, motored up to Brant and spent a few hours fishing in the Saugeen last Thursday.

Gunner Clarence Selling of Petawa, Camp made a farewell visit to his home here last week.

Gunner B. B. Patten who is in the same battery also made a farewell visit here last week.

Miss Lillie Selling returned from the London Openings last week.

About thirty of the young ladies of the vicinity gathered together on Wednesday afternoon, Aug. 23rd and had a good time at a picnic which they held in the Beaver meadow, north of the town. They finished up on a bon-fire and a marshmallow roast.

Rev. Mr. Marsh spent Friday at Southampton fishing.

The Mildmay Gazette is taking this week as a holiday week no paper being issued.

Mr. H. G. Wright Manager of the Merchants Bank was out of town a few days last week on his holidays.

Miss Mae Herringer of Winnipeg made a flying visit last Saturday and Sunday to renew old acquaintances and see old faces.

Mr. and Mrs. Herman Gutsha left for the West on Tuesday morning.

Mr. J. A. Johnston and wife are spending this week at the C. N. E. and visiting friends in Oakville and Bronte.

Mr. Anthony Schnider left for a trip to the West on Tuesday morning.

Mr. Herman Oliver and his sister Helen of Buffalo are spending a few days at the home of Mr. J. S. Milne.

Mr. J. H. Schnurr made a short visit to Linwood on Tuesday and Wednesday of this week.

Dr. and Mrs. Huck and grandson, Brooke Hogate, motored to Sauble Falls on Sunday.

Mr. and Mrs. Geo. Frank spent Sunday with Walkerton friends.

Inspector McCool made a short visit to Mildmay on Monday afternoon in his Dodge car.

Mr. Chas. Wendt is attending the C. N. E. in Toronto this week.

Lieut. Geo. Helwig of London Camp is home for a few days to take charge of their general store while Mr. Wm. Helwig is away on business in Toronto.

OTTER CREEK

Mr. Jacob Holtzmann was a visitor around these parts Sunday last.

Mr. Wesley Stemler was a visitor on the Fourteenth on Sunday last.

Mr. and Mrs. Frank Smith were visitors at Mr. and Mrs. Emerson Schumacher's on Sunday.

Mrs. John Fenner and Mrs. Claude Hughes arrived home from a very enjoyable trip to Brantford and Niagara.

Mr. and Mrs. L. A. Eedy of Walkerton were visitors at the home of Mr. Philip Gress on Sunday.

Master Allan and Henry Pfohl were visitors on the Fourteenth on Sunday.

Mr. John Ball was a visitor in Mildmay on Sunday last.

Mr. Conrad Biehl of Mildmay was a visitor at Mr. Philip Gress's Monday last.

Fall wheat seeding is the order of the day.

Quite a number of our boys intend taking in the Harvest Excursion to the North West on Thursday.

Mr. George Pfohl and Miss Lulu Pfohl were visitors in Mildmay on Saturday last.

Quite a number from here were seeing the Observation Tower which is 80ft. high back in Howick, Sunday last.

EDEN GROVE

Miss Pickney, Walkerton, is enjoying a week in town, the guest of Misses Lily and Jessie Alexander.

Messrs Abbie Seiler and Pat have arrived safe in the West and busy in the harvest field—they say threshers get six dollars a day. That's about what my school mam got a week and she was a good thresher at that.

Our town looked like a summer resort Sunday, Pat taking the lead. The following were visitors at the home of Mr. and Mrs. Pat O'Reilly, Rev. Father Goodrow, Chepstow, Mr. Thos. Pye and daughter Ruth, Mrs. McGarrity and son Peter, Walkerton, A. Hanmore, Vesta, Mr. Wm. Desmond, and Mr. and Mrs. John Desmond Pinkerton, Mr. and Mrs. Thos. Desmond, Corner King and 12th St.

Taking an interest in the kids—As the Council apparently could not afford to put down a cement walk to the school, they ploughed up a furrow so the kiddies wouldn't get into the road and be run over by the street cars.

Mr. Alex McLean and son John, of Paisley were the guests of Mrs. Tennant Sunday.

Mr. Durward, marble dealer Kincardine, placed a fine monument over the grave of the late James Alexander, Saturday.

They come from all over—Mr. John Seiler left Monday morning with a large load of furniture on a fourteen mile trip.

Miss Jennie Acton, Brant, was a Sunday visitor at the home of Mr. and Mrs. August Blue.

School opens Tuesday morning with Miss Blanche Powell at the helm.

Mr. and Mrs. Thos. Smith and Miss Jackson of Chesley visited at the home of Mr. and Mrs. W. Fair, Sunday.

We noticed the young men have not been backward in bringing the young ladies forward Saturday evening. Wonder how they knew there was no ice cream.

Mr. and Mrs. G. Campbell Leamington, and Mr. and Mrs. Robt. Perdue spent Sunday at the home of Mr. Emery, King St. West.

Misses Gertie and Winnie O'Reilly visited Walkerton friends this week.

Quite a number are taking in Toronto Exhibition this week.

Misses Lydia and Laura Cunningham, Glamis, called on their Grove friends, Thursday.

Mr. and Mrs. Cassidy spent Sunday with Dunkeld friends.

Mr. John Desmond, Palmerston, Sundayed at his home here.

Monday being Labor Day the stores will be closed; also the post office except at mail time. Cheap fare on railways to all points.

Miss Hattie Stevens of Paris, is the guest of Mrs. W. Todd.

Never mind where Tony is going after the 16th. Where are you going yourself?

Mr. Tulton from the Northwest was the guest of his friend at the home of Mr. and Mrs. Watson, last week.

Mr. Hub Allen spent Tuesday with Palmerston friends.

Autos have an outing—Friday is an unlucky day all right. One of our local autos struck a man near Chepstow and another threw a wheel near Dunkeld damaging the axle. Fortunately nobody was injured. Another auto was secured from Cargill and brought the party home towards morning.

Mr. and Mrs. Cruickshank (nee Mabel Watson) are spending a short time at the home of Mr. and Mrs. James Watson, Fairview farm, before taking up their new home in Detroit.

Messrs. Phillip and Jim Sparling, of Cargill, visited friends in the Grove on Friday and took in the social evening and dance in the Masonic Hall.

The Misses Reid, after enjoying a couple of months with friends in this vicinity, left Friday for their home in the West.

Mrs. Fair is visiting Palmerston friends this week.

Mr. and Mrs. Rosseau and Mr. and Mrs. McKeeman enjoyed a few hours Friday evening the guests of the Chevrolet, near Dunkeld.

Mr. A. McKeeman, our enterprising merchant, and wife are taking in the Toronto Exhibition this week.

Miss Olive Watson left Tuesday for Moosejaw, Sask.

Mrs. McColl and son left Tuesday for their home in Washington, D. C., after spending a very pleasant month's vacation with friends in this vicinity.

Mrs. Young and sons of Woodstock and Mrs. Loughleen of Cargill were the guests of Mr. and Mrs. H. Pearson on Tuesday.

GREENOCK

Harvesting is nearly over for another year and the crops are pretty good.

Mr. and Mrs. John Freiburger of Walkerton spent Sunday at Mr. Jake Schuster's.

Mr. Fred Kraemer spent Sunday visiting friends near Ambleside.

Mr. Jos. Koller after spending a couple of days with his parents here returned to Buffalo last Wednesday.

Mr. and Mrs. Clark of Toronto are spending a couple of weeks with the latter's parents here.

Mrs. Harry Goodhand returned to Rochester, Saturday.

The Kraemer Brothers who have been busy painting the school these last couple of weeks finished their job last Wednesday.

When "Someone" Comes

You can entertain him with the Edison Diamond Amberola, hearing the greatest singers of the day or dancing to the liveliest and latest popular hits.

And, all the while you can take pride in the fact that it is an Edison, the peer of all phonographs—and not a common everyday "talking machine" that you would feel like apologizing for.

The "humanness" of the Amberola is startling —hear it.

R L. Gibson
Jeweler - Walkerton

To My Patrons and the Public in General:-

I wish to express my sincere gratitude to you for your kind patronage to me while I have been amongst you trying to do my best for the last thirteen years and now as I have removed to the store beside Vogan's Hardware I will try to do even better than I have heretofore. I promise you that I shall try and keep none but the best goods and at the very best prices, that I can possibly live at. My stock will consist of nothing in the future but up-to-date worstings, suitings and all kinds of Classy Furnishings.

A SUDDEN CALL

H. H. Miller Ex-M. P. Died at Hanover Monday Morning.

H. H. Miller Ex-M. P. of Hanover, was removed rather suddenly by death on Monday morning. He had been ill only a few days with stoppage of the bowels. He was operated upon Thursday night but did not have vitality enough to pull him through. Mr. Miller was a man of outstanding character and ability and filled a large place in the life of Hanover and district. Mr. Miller was born in Owen Sound on January 10th, 1861, being a son of R. B. Miller, who still resides there at the age of eighty years. He went to Hanover in 1884 and opened up a conveyancing and insurance office, and by means of intense application, marked ability and absolute integrity, built up a large business. He was a director and shareholder in the Knechtel Furniture Company, the Spinz Furniture Company, and the Knechtel Kitchen Cabinet Company, all of Hanover, besides several other local concerns. He was a prominent Methodist, and a man of wide though unostentatious charity.

Mr. Miller was elected to the House of Commons for South Grey at the general election in 1904, and re-elected in 1908, sitting until the general election of 1911, or seven years in all. From 1905 he was Chairman of the Commons Committee on Banking and Commerce. He was prominently identified with legislative efforts to suppress race-track gambling.

He leaves to mourn his death his wife who was Miss M. Ellen Armstrong: one daughter, Mrs. W. E. Adams of Kelowna, B.C., and two sons, Moore A. a barrister at Weyburn, Sask., and Fraser, now with the Princess Pats in France. He also leaves one sister, Mrs. W. F. Gray of Owen Sound, and four brothers—George of Chicago, Major R. Boyd of Washington D.C., E.S. of Regina, Sask. and Dr. Hugh of South Bend, Ind.

The funeral takes place this afternoon at 1.30 o'clock to the Hanover Cemetery.

FARQUHARSON—In Walkerton, on Thursday, Aug. 31st, 1916, Catherine Morrison, widow of the late Wm. Farquharson, aged 66 years, 1 month, and 19 days.

MARRIED

WATSON—McLEAN.—At the Methodist Parsonage, Walkerton, on Aug 30th by Rev. C.W.Cosens, Miss Julia McLean to Mr. William R. Watson both of Paisley.

DIED A HERO'S DEATH

Reg. McCarter's Body Lies in a Soldier's Grave Behind the Trenches in France.

That the body of Reg. McCarter, who fell fighting for his country on the battlefields of France, is in a marked grave behind the trenches, the location of which is known, was the welcome information received by Coun. Alex. McCarter and family from their, Major J. J. Fraser. The Major writes to Gladys McCarter:—

Somewhere in France,
Aug. 20th, 1916.

Dear Friend,

I have been intending to write you, but we have been on the move a good deal lately and have not had much opportunity for writing.

I was extremely sorry when I heard your brother had been killed in action. You have my sincere sympathy. I know how poorly sympathy can be expressed in words, but if it be any consolation to your people and to his friends, tell them this. I know where his grave is, which is marked by a cross. I also know the exact map location so that it can be found at any time. It is just behind the trenches.

I talked to an officer of his platoon who said he was killed outright so that he did not suffer. His officer also said he was a good boy, and well liked by his comrades. He died a hero's death. His effects were sent to the Base, where they will be later sent to his next of kin. It may be some time before this is done.

How can man die better, than facing fearful odds,
For the ashes of his Fathers and the temples of his gods.

Yours sincerely,
J. J. Fraser, Major.

Further word comes in a letter from Gate Haas to his father:— 'You may tell Mr. McCarter about Reggie. I was talking to the boy who dug Reg. out. Reg. and an officer were standing together in a trench and a shell came over and buried the two of them. This chap being a pretty good friend of Reg. dug him out first. Reg was well liked by his platoon and all who knew him."

FAILED TO SHOW UP

Gordon Bonter, The Coal Mine Promoter Too Busy In New York to Come Here For Trial.

Gordon Bonter, the mining promoter, formerly of Toronto, now of New York, was to have appeared on Tuesday before Judge Klein here on a charge of obtaining money under false pretences but failed to show up. His lawyer, Mr.O. E. Klein said he had received a letter from Bonter, dated August 24th, stating that he was anxious to have the matter postponed for three months but would appear if necessary. The letter had only reached him that morning. Bonter said he was putting through an important business deal in New York and did not want to leave.

Judge Klein estreated his bail of $1,000 which will be returned to him however if he should make his appearance within three months.

It will be remembered that Bonter was acquitted by Judge Klein in December last on a "fraudulent conspiracy" charge arising out of the sale of certain "coal mine" shares to Walkerton people. Before he was released from custody, another charge was laid by Edward T. Gibson and wife, charging Bonter with obtaining $300 under false pretences. The judge at that time fixed his date of trial for Sept. 5, 1916, and took his bond for $1,000 to appear for trial at the proper time.

DEATH OF S. KROETSCH

Popular Walkerton Young Man Was Victim Of Pleurisy.

A bright young life was sadly cut off by death on Friday of Salvador Kroetch, youngest son of Mr. and Mrs. E. B. Kroetch, in his 24th year. He was a printer, having learned his trade at the Telescope. Latterly he was employed at Berlin where he developed a severe cold early last winter which forced him to return home. He had been poorly ever since and when he was seized with pleurisy recently it proved fatal. Sal. was a bright young fellow, well-liked by all his associates, and in their sad bereavement the family have the deepest sympathy of all. Two brothers and four sisters survive. They are:—Joe, of Regina, Ed. of Toronto, Mrs. Mac. (Lil) McKenzie of Regina, Mrs. E. (Margaret) Schnitzler of Lacombe, Alta., Mrs. (Kit) Stevens of Buffalo, and Jean at home. Funeral service was conducted at Walkerton R. C. Church on Monday morning by Rev. Father Cummings. Six young men, friends of the deceased, acted as pall-bearers:—Art Schnurr, Herb Weiler, Frank Smith, Bert Schumacher, Robt. McGregor, Pete Lambertus. Among those present from out-of-town were:—Mr. and Mrs. Stevens of Buffalo, Mr. and Mrs. Ed. Kroetch of Toronto, Mr. and Mrs. Jos. Brick of Waterloo, Mr. Zinger of Kitchener, Dr. Zinger of Detroit.

Mr. R. L. Gibson is in Toronto.

Mr. S. W. Vogan went to Toronto yesterday.

Sergt. James of the 160th Batt. is a visitor in town.

Mrs N. O. McKay has returned from a visit to Guelph.

Boss—Wiles.

A pretty wedding was solemnized at the home of Mr. and Mrs. J. H. Wiles at High Noon on Wednesday, September 6th, when their only daughter, Miss Elmina, was united in marriage to Mr. J Elgin Boss, son of Mr. and Mrs. J. E. Boss of Walkerton. The ceremony was performed in the presence of the immediate relatives by Rev. Thos. Wilson, pastor of Knox Church. The wedding march was played by Miss Emma Latchford. The bride looked pretty in white silk crepe de chine and carried a boquet of white roses and lilies of the valley, her travelling dress being of navy blue taffeta silk. Among the many fine gifts was a cheque for a handsome amount from the bride's father. The groom's gift was a lovely pearl necklace. Mr. and Mrs. Boss left on the afternoon train for a wedding trip to Toronto, Niagara Falls and Buffalo. On their return they will live in Walkerton, Mr. Boss having a responsible position with the Knechtel Furniture Co.

There are 83% Canadians in the 160th Bruce Battalion which has a higher Canadian born showing than other Battalions. Hurrah for the Johnny Canucks of Bruce!

An auto driven by a son of Geo. Francis of Hanover turned turtle on Zettlers' hill, Durham Road west, on Saturday night. The top was completely wrecked, but in some way the occupants escaped without injury.

Rev. Thos. Wilson had a letter this week from his son, Sergeant Melville Wilson, now at the Front. The first portion was dated, "Somewhere in France, July 10th" and the last part, "Somewhere in Belgium, July 15th."

Mr. Matthew Weber of Formosa enjoyed a visit recently to the old neighborhood where he went to school as a boy in New York State. He met a number of the old school friends of other days although a good many of them are scattered the length and breadth of the continent.

Lt.-Col. Knifton of Parry Sound was the guest of Judge Klein this week. The Col. who is Brigadier of the Infantry Brigade, has the distinction of being the oldest Canadian Officer in active service, having been 48 years in the militia. Both of his sons are officers in the Parry Sound Batt., C.E.F.

WELL-KNOWN LADY

Mrs. Farquharson of Walkerton Passed Away On Thursday.

An old and highly respected resident passed away on Thursday last in the person of Katherine Morrison, relict of the late Wm. Farquharson, aged 66 years. Mrs. Farquharson had been a sufferer from heart trouble for a number of years. In May last she underwent a very serious surgical operation and as it was unsafe to administer an anaesthetic, she suffered very greatly from shock. The powers of endurance which she displayed, and patience shown in suffering were truly remarkable. For a time it appeared that she would recover but lately her condition grew constantly worse. The sterling qualities of the early scotch pioneer who settled the Queen's Bush in the early days were hers, and she was loved and admired by a large circle of friends. Mrs. Farquharson was born in Glasgow, Scotland. At the age of 7 years she came to Canada with her parents who lived first at at Gananoque, later at Goderich, Lucknow, Teeswater and one or two other places. For the last 35 years she made her home in Walkerton, her husband conducting the Queen's Hotel up to the time of his death four years ago. Three daughters and one son mourn her loss. They are:—Mrs. John Vogt, and Mrs. John Arscott of Walkerton; Mrs. (Dr.) Coram of Toronto; and William Farquharson of Detroit. The funeral was held on Saturday afternoon, the remains being interred alongside those of her late husband in the Walkerton Cemetery. Service was conducted by Rev. Thos. Wilson, pastor of Knox Church.

PREPAREDNESS LEAGUE

Holds Big Gathering at Lint's School House, Carrick—Organization is Proceeding.

A patriotic entertainment given at Lint's School House, Carrick Tp. on Monday under the auspices of the local branch of the Bruce Preparedness League was well attended by people from the surrounding neighbourhood, and from Clifford, Mildmay, and Walkerton. The idea of the affair which was gotten up by Mr. Joseph Thompson, the local organizer of the League in that section, was to acquaint the people with the aim and objects of the League and at the same time interest them in its work. A tidy sum for patriotic purposes was also raised by the paid admissions, the refreshment booth, and the drawing for a handsome arm chair, which was won by the young son of Charles Dickison. Judge Klein, President of the Bruce Preparedness League, explained in detail the objects of the League and urged the people to turn out in large numbers at the district organization meeting of the League to be held shortly, probably at Mildmay. Col. Knifton of Parry Sound, who has two sons at the Front, and who himself is the oldest Canadian in Active Service with forty-eight years to his credit, gave a stirring address urging the needs of the Empire and our duty as Canadians. There were also stirring speeches by Mr. Joseph Thompson, the local clergy and others. Songs by Mr. Marsh, comic selections by Mr. John Fields, and recitations by Miss Lillian Mantz were greatly appreciated. The success of the affair augurs well the work of the Preparedness League in the neighbourhood.

With the 160th

The Bruce B'n received their second innoculation last Wednesday and expect to get the third on Thursday of this week.

+ + +

On Thursday of last week the boys struck their tents at Grosvenor camp and prepared to move to their new quarters. By noon, nearly everything was moved to the new camp and all was in readiness to raise the tents. A certain number of men were detailed to each tent and at the first note of the bugle the men sprang to their positions. Then the bugle blew again and all the tents went up together. The sand is quite plentiful on the Heights and last Friday even our dinner had a thin layer of it.

+ + +

Sergt. Wright and Sergt. McDonald returned to London last week from Kingston, where they have been taking a course in Bayonet Fighting and Physical Training.

+ + +

Major McNally also returned to camp last week from Ottawa.

+ + +

D Company of this unit go to the Cove Ranges on Tuesday of this week to take a course in Musketry.

+ + +

Monday was observed as a holiday and only the necessary work was carried on around the camp grounds.

AN EVIL HERITAGE

Marian had been sitting for some minutes, and was thinking of beginning her return journey, when she was somewhat surprised to see the figure of a rider on the road. From where she sat the road could be seen winding away for a considerable distance, and the figure was as yet not much more than a moving dot. She had never yet seen anyone here on horseback, at this hour, and she thought she would wait and see who it could be. After another minute or two, she began to grow puzzled, and presently, to her astonishment, she recognised that this person on horseback was a lady. She was mounted on a tall and very thin steed of a bleached yellow tint, and trotting along at a more than brisk pace. The lady herself seemed likewise to have no superfluous flesh, as Marian became aware the nearer she came. She could distinguish a slight, spare figure sitting very straight in the saddle, but as for the features, they were not yet recognizable. Marian's curiosity increased tenfold. Who could she be? Since the day on which she had landed, she had seen no women except negresses and coolies. No, certainly the seat on the tub must not be abandoned until the mysterious horse-woman had drawn close.

She was still staring with all her eyes when the mistress of the hut, who was known to her by the name of Roxana Cuffy, came lumbering down the piece of ladder which served as door-steps, and commenced making a raid upon the hens under the house.

'Me want eat chicken dinner," she explained to Marian. "Me pain stomach, chicken-broth make pain stomach get good," and she made a dash at a particular white hen, whose appearance seemed more especially to tickle her palate. But the white hen had no idea of being made into broth, and, after knocking over most of the calabashes in a desperate scramble, flew cackling round the hut and towards the banana, followed by its dusky mistress as well as by Marian, who had now joined in the chase.

"You will never catch that white hen," said Marian, after a breathless two minutes. "Take one of the others; that black one is close to your hand."

"No, thankee, missis; what kind of broth you think miserable black nigger chicken like that be making? Me want white chicken, and, praise the Lord, I got him now—oh, Holy Saints, what that be?"

Marian was so bewildered by what followed that it took her some minutes to understand exactly what had happened. In the very moment that the black hand had been laid upon the white hen, something that looked to her eyes like a lizard magnified about twentyfold had dropped down—apparently from the skies, but more probably from either the roof or the banana—right on to the top of the hen and had all but scuttled away with its prize, when a couple of smart blows coming from a riding-whip, and planted neatly on the head, caused it to drop the shrieking chicken and dart away like lightning among the tall grass.

All this had happened in less than a minute, and it was not until the baffled robber had disappeared that Marian looked round for the rescuer, for it was very evident that those timely blows had not come from Mrs. Cuffy's hand. The good woman had retained just enough presence of mind to possess herself of the unfortunate white hen, who appeared to be more paralysed with fear than rejoiced at its escape. The chances are that in a white hen's opinion there isn't a pin to choose between being boiled down into broth and being eaten for dinner by an iguana.

Besides Mrs. Cuffy there now stood a short wiry person in an exceedingly well-worn, and not particularly well-made, riding habit. She was very thin—almost as thin as Aunt Val, Marian told herself. In the excitement of the chicken-hunt she had forgotten the mysterious horse-woman, but she remembered her now, and to her astonishment became aware that she was old. That is to say, old according to Marian's idea of such things; and, at any rate, there could be no doubt that her youth lay behind her.

"Oh, Miss Mercury, ma'am," groaned Roxanna Cuffy, "may Lord pour thousands blessings on head! He Himself sent you this road; you save my dinner for me, you have, indeed!"

"I call that arriving in the nick of time," said the stranger briskly, while her grey eyes danced with enjoyment. "I saw you chasing the chicken, and as I was particularly anxious to speak to this young lady, I thought the best thing I could do was to jump off the Mosquito's back, and so here I am, and here's your chicken, too, let's be thankful."

She spoke in a quick, decisive voice, and this same briskness, as well as a certain old-fashioned primness, was visible in her whole person and all her movements. Her small, neat features were sharply cut. Whether she had been comely once upon a time it was hard to say; now the skin was both deeply tanned and deeply wrinkled, and the thin wisps of neutral-tinted hair, which escaped from under her pot-hat, were mixed with grey.

"You want to speak to me?" asked Marian, in surprise.

"Yes. That is to say, if you are the person I mean. I don't well see how you can help being Miss Berrincott?"

"I am called Berrincott."

"Splendid! And I am called McCrie, though the black people have turned it into Mercury. You mustn't think me unneighbourly. I should have looked in upon you long ago, only that I had a touch of fever. And now you'll take me to Lot 12, won't you, and give me a glass of lime-juice; and I'll tell you about everything as we go along. But first I must catch the Mosquito. Here, Mosquito, where are you? Come along, there's a dear old boy."

Marian had followed her new acquaintance on to the road, and stood by while the meagre yellow charger was coaxed to the side of its mistress, who, having passed her arm through the reins, turned to Marian.

"And now let us start. To begin with, I must tell you that I have been just dying to see you. It's always such a treat to see anyone fresh from home."

"I hope you are not disappointed," said Marian, who was beginning to feel amused.

Miss McCrie gave her a long, but not unkindly stare from out of her lively grey eyes.

"Not a bit. I don't know whether you are beautiful or not, because I have seen too few people in my life to be able to judge; but I like your face, and I have an idea that you and I are going to be friends. And now I suppose I ought to be explaining myself to you a little more. The fact is that I am a government official. You wouldn't have guessed that, would you?"

"A government official?"

"Exactly. It is the official registrar of the windward district who is speaking to you now, if you please; which means in plain English that I have to register the births, deaths, and marriages which take place on this side of the island. I have been at it for ten years now, but I haven't grown fat upon it yet, as you see."

"Are you sure that horse won't escape?" interrupted Marian. "Isn't he very restless?"

"Who? Mosquito? Never you fear. Of course he's a devil, everybody knows that; but he and I understand each other perfectly, don't we, Mosquito? Well, to resume. It's at Cane Hill that I sit with my books of registration, a few miles from here. We're nearer the hills, and a good deal higher than this. Cane Hill used to belong to my family, but we came down in the world. I was born there, and so were all my brothers and sisters, and the larger half of them died there, too."

"And the others?" asked Marian, timidly.

"They died in other places. I was the youngest of the eight, and now I am alone."

She was silent for about a minute, and, now that her face was in repose, Marian was struck by the expression of her mouth. It was the mouth that undoubtedly was Miss McCrie's characteristic feature, being small, very tightly closed and drooping almost imperceptibly at the corners. Something about the tightness seemed to suggest the battling down of some inconvenient sadness—as though its owner were trying not to cry—and contrasted strangely with the lively grey eyes.

"And your father and mother are dead also?"

"Both dead."

"Isn't it very lonely at Cane Hill?"

"Well, it is not as lively as it once was, but I must be thankful that the Company have left me the use of the house. It was a company, you know, that bought the estate when we were bankrupt. But you must come and see for yourself; I have got ever so many guest rooms at Cane Hill, especially since poor Walter's death."

"Was Walter your brother?"

"Yes, the last of them. He was paralyzed for the last eight years, and I took care of him. Harry, too, ended with paralysis, and Jane and Agnes died of fever. Three of them died violent deaths. But why do you let me chatter on like this, Miss Berrincott? It is not to talk of tragedies that I came here this morning; I have got something quite different in view. Can you guess what?"

"Indeed I cannot."

"A comedy—no, I ought rather to call it a love drama—in which you are to play a part."

"I?"

"Yes, you. I won't make myself out better than I am. It was not only to pay you a visit that I came here this morning, but also to ask a favor. The fact is that I require your services."

"As what?"

"As a gooseberry."

"What can you mean?"

"Surely you know what a gooseberry is!" and now Miss McCrie's eyes were dancing with enjoyment. "I thought it was in England that they grew. But first I must tell you the story. Jess Collins is the daughter of a manager on a windward estate, and Mr. Phillipps is manager of another; the latter generation is young and good looking, and Jess is a sweet girl, and has got delicious black eyes. Perhaps you can guess the rest for yourself. But they have very few opportunities of meeting and just now they haven't seen each other for ever so long, as they have both barely got over the fever; and so, in order to give them a chance, I've organized a picnic. There are plenty of gentlemen to be had, but ladies are rare with us; and, as I don't want the thing to look too barefaced, and also would prefer not to have all the gentlemen—Mr. Phillipps excepted—on my hands, I have made a raid upon you. Please say you will come."

"Of course I will come. Where is the picnic to be?"

"Wherever you like. It is supposed to be put up in your honor, you know; so of course you can choose your own point. Jess and Mr. Phillips will be just as happy on the beach as in the woods, or by the river."

"Oh, then, please let it be the woods! I have been a fortnight here, and I don't yet know what a tree fern is like. And—and I should like to hear more about Jess."

"She is a dear little thing; I will tell you as much as you like. But, stop a bit—I have got an idea. Instead of merely talking, would it not be much simpler if I made you acquainted? Prospect is only six miles from here, so while I am drinking my lime juice, you can put on your riding skirt and have your pony saddled, and I will take you straight off and introduce you to each other. I am very anxious to see Jess, at any rate, as I hear they have cut her hair, and I do hope it has not spoiled her."

Though slightly staggered, Marian acquiesced readily enough; and the house being reached, and no attendant quite forthcoming, Miss McCrie proceeded to saddle and bridle a mule in the same neat, prim manner that she did everything else, helped Marian into her seat, scrambled on to the back of the snorting and prancing Mosquito, and turned its pale yellow head in the direction of Prospect.

CHAPTER XVIII.

On the way to Prospect Marian learnt a few more details about the Collins family. Prospect was not their home, but an empty house near the sea, where they had gone for change of air while recovering from the fever, for they had pretty near all of them had it. Mr. Collins rode over at night when he could get away from the works; but his employers would not allow him to sleep off the estate. Poor man! he had a hard time of it, with eleven children, and eighty pounds a year.

Marian listened, somewhat aghast, and her sympathy for Jess increased. She was yet more aghast, as well as strangely touched, when they reached "the empty house near the sea." The rooms were only half furnished, and the whole place had a sort of scrambly look about it, for it had not been thought worth while to make oneself comfortable for such a short time. The children ran about with close-cropped hair and thin, sharp faces, and without a shade of pink in all their poor little cheeks. It was a pitiable and yet a glad sight; for, although they had all been in danger, they were all saved, and, though Death's bony hand had been very near closing over these small blossoms, yet it had passed on without plucking one—this time. On the tables, and even on the window-sills, spoons and glasses were standing about—remains of strengthening drinks or cups of soup which the various small convalescents had to take at various hours. And all the time the mother's patient brown eyes watched them out of a haggard leathery face. She looked like a woman who has borne a good deal, but who is ready to bear more.

"Matters are not so bad," she said, in answer to Miss McCrie's enquiries. "Charlie had only two fits of coughing in the night, and Hannah has only turned faint once since yesterday; I think they are improving." And then she fell again to watching her children, and left the talk to Miss McCrie. At the mention of the projected picnic, her haggard face had lighted up wonderfully. The faintest ray of comfort was enough to cheer her, and here she foresaw something good for Jess. The only question was whether the doctor would allow her to go.

"I'll settle it with the doctor," said Miss McCrie. "Jess will be stronger by next week, and besides we will take care of her, and we must see and get her a good steady mule that will not shake her. By-the-bye, if I am not mistaken, Mr. Phillipps has got just the very animal we want, and I daresay he wouldn't mind lending it to her."

Miss McCrie considered this to be a masterpiece of diplomacy, and, though she looked as demure as she could while uttering it, she could not quite succeed in keeping her eyes grave.

Jess' white cheeks had suddenly turned faintly pink—only for a minute, it is true, but for that minute it greatly improved her. Marian had decided from the first that if Jess was well she would certainly be pretty, and now she saw that she was right. While the elders talked, the two girls had been making acquaintance. Jess was not shy, but sat gazing at her visitor with awestruck and admiring eyes. The boyishly short hair made her face look still thinner than it was.

"Jess" said her mother's voice presently, "it is time for you to be taking your drops"—and Jess rose with something of a sigh.

"May I go with you?" asked Marian, noticing the sigh.

Jess' face brightened instantly.

"Please do. They are in the other room."

After the drops had been taken, Jess showed no inclination to go back to the so-called sitting-room. She looked at Marian tentatively, and then asked her whether she would like to see the garden. Marian had no objection to seeing the garden, though, to be sure, it was hotter outside than in; and Jess, with her trailing convalescent step, led the way out of doors.

There was remarkably little to see about the garden, as Marian immediately perceived: some weed-grown walks, the remains of a few flower-beds, and beside the doorstep a tree of purple-wreath which had done blossoming. A few stiff bunches still sat on the tree, but the sun has scorched them almost to white, and the slightest touch was enough to make them drop off with such alacrity that they seemed to have been only waiting for the chance. Was it to show her this that Jess had brought her out here?

"We are close to the beach here," said Jess, moving towards the end of the garden. "Look, the water is straight below us."

They stood now leaning over the low wall, and looking down to where long bright creepers stretched over the beach like huge green characters scrawled on the black sand.

"Have you been in this house for long?" asked Marian.

As Jess gave no answer, she looked up and found two black eyes fixed on her face, with something of an imploring look.

"Oh, Miss Berrincott—that is your name, is it not?—I should like to ask you something. You heard what Miss McCrie said about the mule for the picnic. Please tell me whether I looked very foolish at the moment. You didn't notice anything, did you?"

Marian was embarrassed. She could not truthfully say that she had noticed nothing, for there was no doubt that Jess had blushed at the mention of that steady animal.

"I think you looked glad," she said, after a moment's deliberation.

"I was glad, so I couldn't help looking it. Don't you always look exactly as you feel?"

Marian deliberated again.

"No, I don't think so. I think I prefer generally not to let people guess what I feel."

"How strange! That's an idea that never would have occurred to me. Why should one hide one's feelings, unless, of course, one had wicked ones? What makes you do that, I wonder?"

"I have never thought about it. I just do it because it comes naturally."

Jess seemed not to be listening now; she was picking nervously at the weeds on the top of the wall.

"There is something else I wanted to ask you. Miss McCrie has told you all about the picnic; did she—did she say for certain that the gentleman who is to lend me the mule will be there himself?"

"Yes, she said that Mr. Phillipps is going to be there."

"A—h!" and a great breath of relief was drawn. "That makes me happy! You mustn't think me very queer, please; but, there, I can't keep it to myself, and you have got such a good face, I think I should like to tell you about it."

(To Be Continued).

SUNDAY SCHOOL LESSON

LESSON XII. September 17, 1916.

A Prisoner in the Castle—Acts 22:1-30

COMMENTARY.—I. Paul's defence (vs. 1-21). From the fact that Paul addressed the excited crowd in Hebrew, the language known to every Jew, he gained a hearing. He used an honorable title in speaking to his opponents, classing himself with them as a fellow Jew. He was born in the important city of Tarsus, and at a suitable age was placed under the instruction of the great Gamaliel. He was a careful observer of the law of Moses and was active in his religious life. He was energetic in his efforts in behalf of the religion of his fathers. He sought to destroy the disciples of Jesus Christ. He had authority from officials, who were still living, to arrest them and to bring them as prisoners to Jerusalem. While on this mission of persecution, as he came near to Damascus, he was suddenly stricken down by the shining of a light brighter than the sun at noon. The Lord Jesus spoke to him and he harkened to His voice, acknowledging him as Lord. He became submissive, saying to Him, "What shall I do, Lord?" At the command of the Lord he went to Damascus and there found a man named Ananias, a devout man, a Jew who believed in Jesus. This man instructed and encouraged him, and Paul became converted. Ananias told him that he should be a witness to all men of what he had seen and heard.

17. When I was come again to Jerusalem—It is quite evident that this visit to Jerusalem was made more than three years after his conversion, for it was after the three years which he spent in Arabia (Gal. 1:18). While I prayed in the temple—Paul's mention of his visit to Jerusalem and of his praying in the temple would show his hearers that he was a Jew and had high regard for the city and the temple. He recognized the temple as the proper place for prayer. I fell into a trance (R. V.)—Paul became unconscious of his surroundings, and his mind was exercised in what was revealed to him by the Spirit. He here received one or more of the "visions and revelations of the Lord" (2 Cor. 12: 1) which came to him during his life. 18. Will not receive thy testimony—Thus Paul was informed of the attitude of the Jews of Jerusalem toward Jesus. The Lord commanded him to escape quickly. He had work for him to do in other lands. In Acts 9:26-30 an account of this visit to Jerusalem is given, and Paul's preaching stirred the Jews to such a pitch of enmity that the disciples thought it not best for him to remain longer and sent him away to Tarsus. Thus Paul was warned in a vision and his fellow Christians saw the danger, hence he fled from the enemies of the cross.

19. Lord, they know that I am imprisoned—In his trance condition Paul is speaking to the Lord in answer to what he had said to him. Some of the people in that crowd must have remembered him as a zealous persecutor of Christians and that he was constantly at it, in every synagogue—his efforts were not confined to narrow limits. He went wherever he heard that Christianity was gaining adherents. 20. Thy martyr—Thy witness. This is the original meaning of the word; but when those who witnessed to the resurrection and Messiahship of Jesus were being put to death for their testimony, the meaning of the word was extended to its present signification. Consenting—Paul approved of the stoning of Stephen. Kept the raiment—Those who hurled stones at the martyr laid off the loose outer garments. Paul was the man who took charge of these articles of clothing for the executioners. "This reference to Stephen must have thrilled the heart of Paul himself with emotion at the recollection of his own share in that deed of blood with some of his murderers now present, and ready to inflict upon himself the same doom." —Whedon. 21. He said unto me, Depart—In this vision in the temple Paul was warned to leave the city to escape his persecutors. I will send thee....unto the Gentiles—Here was a distinct call to Paul to become an apostle to the Gentiles.

II. The fury of the mob (vs. 22, 23). 22. Gave him audience unto this word—Up to this time the crowd listened to the apostle, but the saying that the Lord sent him as a messenger of salvation to the Gentiles was more than they would endure. Paul had set forth with clearness his attitude toward the law and had described plainly his conversion. He had preached the gospel to the rioters, but they would listen no further when the speaker said there was salvation for the Gentiles. Away with such a fellow—The rage of the mob knew no bounds. They thought a man who would preach such doctrines ought not to be allowed to live. 23. Cried out—With shouts of anger at Paul. Cast off their clothes—Threw off their loose outer garments as if they would rush at Paul to tear him in pieces. This act was also an expression of rage. Threw dust into the air—Another expression of anger, as if they must throw something at such an offender. "Then began one of the most despicable spectacles which the world can witness, the spectacle of an Oriental mob, hideous with impotent rage, howling, yelling, cursing, gnashing their teeth, flinging about their arms, waving and tossing their blue and red robes, casting dust into the air by handfuls, with all the furious gesticulations of an uncontrolled fanaticism.—Farrar.

III. Saved from being scourged (vs. 24-30.) 24. Brought into the castle—The captain ordered Paul to be placed in the tower of Antonia, where he would be protected from the rioters. Examined by scourging—The captain evidently did not understand Hebrew or he would have known why the Jews were thus enraged at Paul. To examine by scourging was to torture an accused victim until he would confess the crime with which he was charged. The scourge was a whip composed of two or more lashes, often with sharp pieces of metal attached to them to lacerate the flesh of the one beaten. 25. Bound him with thongs—The victim was bound or stretched along a whipping post with leathern straps, so that he would receive the full force of the scourges, and that upon his bared back. Is it lawful—Paul's Roman citizenship had once before been a help to him, and now he urged it to protect himself from the pain and disgrace of a scourging. The Roman law forbade the scourging of a Roman citizen under any circumstances, and protected him from punishment of every sort without a legal trial. It meant death for one to lay a false claim to Roman citizenship, hence the captain, when informed by the centurion of Paul's question, was troubled, for he was convinced that Paul was a Roman citizen.

27. The chief captain came — He wished to know from Paul's own lips about his citizenship. 28. With a good sum—At times Roman citizenship was sold in order to raise revenue. I was free born—Some of Paul's ancestors had Roman citizenship conferred upon them, hence he was a free-born citizen. 29. Departed from him—The soldiers who had been ordered to examine Paul by scourging left him, for they had no right to proceed further. The chief captain also was afraid—He had no fear on the ground that he had arrested Paul and put chains upon him, for that was allowable even in the case of a Roman citizen; but his fear was because he had ordered him to be scourged. 30. The captain showed consideration to Paul and speedily went about the task of ascertaining the facts concerning him.

Questions.—What was Paul's situation when he made his defense? Give an outline of his address. Why did the crowd listen to him? What vision did he relate? What was Paul's attitude toward the law? At what point did the crowd interrupt the speaker? How did they express their rage? What did the chief captain order to be done? What privilege did Paul have as a Roman citizen?

PRACTICAL SURVEY.

Topic.—Paul's life review.

I. Formed the basis of his defence.

II. Disarmed Jewish and Roman power.

I. Formed the basis of his defence. Upon a stairway leading to the castle stood the venerable apostle Paul in chains, surrounded by the Roman guard, while the bloodthirsty Jews formed a multitude of lookers-on. He had barely escaped with his life. His name had been held up as the author of blasphemies and sacrilege and as the enemy of his race. It was on a false and malicious charge that the uproar had been excited. Paul's confidence in truth, in his own mission, in the work of the Holy Spirit, in the future of the Christian church and his fearlessness of men enabled him to speak to the infuriated mob. Whether we consider the man, the circumstances, the speech or the effect produced, Paul's address is worthy to be ranked among the famous speeches of the ages. A man with a life of suffering and an unfathomable love for the Saviour, whose cause he would defend, was back of that speech. The elements of its greatness were its wisdom and moderation, its simplicity and its truthfulness. The simple story of his conversion was told without embellishment, nothing concealed, nothing modified. After the manifold experiences of a missionary's life, after having been beaten, stoned and imprisoned, Paul rehearsed the story exactly as it occurred in his early life. The circumstances of his early life were well known to his hearers. He appealed to them to listen with impartiality. His Hebrew speech, his thoroughly Jewish attitude, his unruffled spirit, his earnestness and noble courage seemed to subdue his hearers. The nature of the case made it absolutely necessary for him to speak of himself. He did this without any trace of vainglory or egotism, with no boastings, no affected humility, but with absolute simplicity. Paul related his experience with a definite purpose to show that throughout his life he had been loyal to Judaism and had followed the special divine direction given to him. The God of their fathers, by a gracious manifestation of himself and his will, had called the apostle to his service. That was the sole and all-sufficient explanation of his life and conduct, and that became his entire defence. No true Jew would deny that Jehovah might choose any of his people for special service and give to such immediate visions and directions. The leaders of the Judaic party knew perfectly well that they had no case against the apostle. They appealed to the prejudice of the people and excited their feelings into a passion which might have led to Paul's death within the temple courts. Because he had carried the gospel to the Gentiles, that mob had been aroused. Paul carried a good conscience which remained undisturbed in the storm of sinful rage which surrounded him.

II. Disarmed Jewish and Roman power. With national jealousy and religious bigotry aroused, the uncontrolled fury of the mob put Paul's life again in peril. He waited until the clamor subsided at the sight of preparations for his scourging. Then he spoke. The thought of using his Roman citizenship to secure relief from indignity and pain came like an inspiration of the Spirit. Paul was a free-born citizen of Rome while the chief captain was only a citizen by purchase. Without rage or excitement, before the first humiliating lash descended, Paul asked with all the heroism of a great man, "Is this right?" This question made the Roman quail and appeal to higher authority. Fear of the people in their exasperation against the defense of the apostle had determined the chief captain in his course with Paul, but greater fear of the Roman power caused him to desist. Utterly defective as Roman law was, it stood in strong contrast with Jewish frenzy. It afforded the safe custody of Roman soldiery. It regarded Paul's claims of Roman citizenship. It secured order, all of which was immeasurably superior to the violent excitements of an ungovernable mob. Divine deliverance was brought about by the right feeling of the Roman captain together with the civil privileges of the apostle. Outwardly ill-treated, Paul remained inwardly unhurt. Contending parties were silenced and their objects defeated by their own fury and violence.

T. R. A.

Lordly Disraeli.

Disraeli once told a woman that two possessions which were indispensable to other people he had always done without. "I made," she said, "every kind of conjecture, but without success, and on my asking him to enlighten me he solemnly answered that they were a watch and an umbrella. 'But how do you manage,' I asked, 'if there happens to be no clock in the room and you want to know the time?' 'I ring for a servant,' was the magniloquent reply. 'Well,' I continued, 'and what about the umbrella? What do you do, for instance, if you are in the park and are caught in a sudden shower?' 'I take refuge,' he replied, with a smile of excessive gallantry, 'under the umbrella of the first pretty woman I meet.'"

The wheel of fortune doesn't always demonstrate that one good turn deserves another.

How Deal With Them?

(London Advertiser.)

Now that the day of victorious peace begins to be considered, the question how Germany can be made to abide by terms of settlement will arise. It may be a hard matter to bring Germany to our terms, but it will be a still harder matter to devise a net to hold her to her engagements. We know the German Government to be most cunning and resourceful, and at the same time utterly regardless of any moral obligations. How shall the Teuton viper be bound?

A Slavonic writer in the July Nineteenth Century gives examples of Prussian cheating in the past, if the recent violations of treaties and Hague conventions were not enough. Tradition and heredity account considerably for the course of action pursued by the Kaiser, his bureaucracy and his people.

The Teutonic Knights, forerunners of the Hohenzollerns in a forward Polish and Baltic policy, made treaties with Poland in the 13th century, which they had planned to break before making them. A commission appointed by the Pope convicted the Knights of forgery (compare the passport business in this war), and condemned them to make restitution to Poland both in lands and in money. This was not done, and the Knights continued to satisfy their rapacity with every artifice of treachery and perjured faith.

In the 16th century the Teutonic order was crushed, and Albert of Hohenzollern was authorized by the Polish King to hold Prussia, their territory, as a fief of Poland. So the Brandenburg rule over Prussia got its first start. From this beginning sprang eventually the partition of Poland, suggested and engineered by Frederick the Great. Diplomatic letters and official announcements remain from the 1760's to show not only the leading part taken by Prussia in that transaction, but also that official falsehoods were given out respecting Prussian intentions, false denials that anything was contemplated against the integrity of Poland and Lithuania. With this may be compared the assurances given to and about Belgium for some years before the opening of the present war. One of the declarations was personally ratified as follows by that exquisite forefather of Kaiser Wilhelm, Frederick the Great:

"We having seen this declaration, and having maturely considered it, do assent to it and ratify it, approving it and confirmed it with our royal word, in our name, and in the name of our successors. We protest that we shall religiously respect it, and that we shall allow no one whomsoever for any reason whatsoever, to attaint it. In witness whereof........ etc.

"Given at our Palace of Berlin, the 12th day of June in the year of Grace, 1764, in the twenty-fifth year of our reign.

"Frederick R."

And the partitioning of Poland here repudiated was already planned! The "great" king was no youth at this time, but was 25 years on the throne, like the present Hohenzollern, a seasoned old bird. Notice how he "protests" both for himself and for others after him. Religion also is explicitly dragged in, and Frederick was still religious after the first partition had taken place, as shown in a letter to his brother in 1772:

"The partition of Poland will unite three religions, the Catholic, the Orthodox and the Protestant; Poland will thus be for us a sort of holy communion, of which we shall all partake. If this act does not bring salvation to our souls, it will at any rate contribute considerably to the prosperity of our realm."

The same kind of mock religious slaver came from the present Kaiser's grandfather, another "Great" as the Germans call him, when Alsace-Lorraine was annexed. Have the partition of Poland and annexation of Alsace-Lorraine "contributed" ultimately "to the prosperity of our realm?" The present Kaiser's religion is at bottom the same thing as that of his ancestor, the scandalous old skeptic of 1772.

The writer in "Nineteenth Century" goes on to show that Prussia continued the official assurances of friendship and innocence to Poland before the second and third partitions of that unhappy state. One would think that the Poles would not have been taken in a second and third time by such naive villainy, and probably they were not. In reference to reports in Warsaw of aggression contemplated by Berlin, the Prussian King wrote in 1791 to his envoy in Warsaw, "You will declare in the most solemn manner that these reports are malicious inventions. . . . No one will be able to prove to me that there has passed between me and the court of Vienna anything that might warrant such suppositions." "Prove to me!" No one can prove to the present Kaiser anything against his own supposed interest. The "solemn manner" is still used in denying facts that cry to heaven in Belgium.

When in 1793 this second partition of Poland had been consummated, the Prussian King pledged himself in the Treaty of Grodno "to guarantee the independence of the provinces still retained by Poland," and to the Poles newly annexed that they "should retain intact their national privileges, their religion and their language." A few months later he prohibited the employment of the Polish language in all public offices, and in 1795 he took part in the third and final partition of all remaining Poland, taking Warsaw as part of his share. How would Mr. Bourassa like that part about the language?

Such is the sort of enemy we have to deal with. Most rigorous measures will have to be taken for preventing Prussia from breaking the terms of peace we impose, when we consider how she has kept terms imposed by herself. Razing of gunworks, confiscation of navy, continued coercion, and military occupation while many billions of indemnity are being paid, these are possible means. We have to deal with "the wild asses of the devil," as H. G. Wells calls them.

Dip new brooms in hot soapsuds; it makes them tough and flexible.

"I'm harvesting pretty fair crops." "I didn't know you planted a garden." "I didn't. But a neighbor's bean vine is hanging over on one side and a cucumber plant has come through the fence on the other."—Kansas City Journal.

—THE— Quiet Hour

FOR THOUGHTFUL PEOPLE

LIFT UP MY EYES, O GOD!

Lift up my eyes, O God. Too much with me
Is sin's dark shadow, and I cannot see
The star of hope that ever shineth bright
Across the brow of night.

Lift up mine eyes, O Lord, for often sleep
Weighs down mine eyelids, and I cannot keep
The vigil that I ought. Till morning break
Keep my poor heart awake.

Lift up mine eyes, O Lord. Yet even so,
Though hid the winding way through which I go,
Lead me through darkness of enfolding night
With love's unfading light.

O Thou that slumberest not, remember me;
My going, coming and where'er I be;
Till, when my weariness and sin be past,
Thou bring me home at last.

Lauchlin MacLean Watt, in Canadian Baptist.

THE GOOD SHEPHERD.

I am the good shepherd, and know my sheep, and am known of mine. My sheep hear my voice, and I know them, and they follow me; and I give unto them eternal life; and they shall never perish, neither shall any man pluck them out of my hand.

The Lord is my shepherd; I shall not want. He maketh me to lie down in green pastures; he leadeth me beside the still waters. He restoreth my soul; he leadeth me in path of righteousness for his name's sake.

All we like sheep have gone astray; we have turned every one to his own way; and the Lord hath laid on him the iniquity of us all.—I am the good shepherd; the good shepherd giveth his life for his sheep.—I will seek that which was lost, and bring again that which was driven away, and will bind up that which was broken, and will strengthen that which was sick.—Ye were as sheep going astray; but are now returned unto the Shepherd and Bishop of your souls.

THE HORN LANTERN.

In our early days glass was dear, and the poor man's lantern had horn sides. The light was good, but the medium through which it shone was dull and distorted. The horn lantern has been superseded, but the parable has survived, and we see through a glass darkly, and not face to face.

"In no time or country has Christianity ever been exhibited in its simple integrity. The soul of its author was the only pure and perfect expression of its spirit; it was at once the creature and the sole director of His mind, born within that palace to be its Lord. In every other instance Christianity has been only one out of many influences in forming the character of its professors, and they have given it various shapes, according to the climate, the society, the occupation in which they have lived."—Martineau.

We have too many horn lanterns in our present night. The student, the patriot, the peasant, the merchant, each looks through their own lantern, and the light is modified by the medium through which it passes. The Blue Nile passes through a belt of blue clay, and the White Nile through a belt of white clay. The lantern sides give a color to the light.

When Christ was born the temple of Janus was closed; it was a time of peace. But what a peace! "They make a wilderness and call it peace." The fact is Christ came into a land most dreadfully oppressed. There was no king, no council, no flag; a foreign soldier was in the sentry box, the housewife went to market with foreign coin in her pocket, and at the wharf a foreign official taxed every boatload of fish that was landed. The Temple was defiled, and the devout grieved for the afflictions of Joseph.

Christian organizations abound. We put the label on the breast as we put the decoration on the breast of the hero, and we call it Christian, and when we look for the meek spirit of forgiveness and forbearance, as it is seen in Jesus, we are abashed, and perhaps it is true to-day that the glorious British Empire could not stand for five minutes on the sermon on the mount. Do we not need to clean the sides of our lanterns? We want the clear shining of the face of Christ in the face of those who bear His name.

I heard a voice from heaven, saying, "Arise and shine, for thy light is come."

H. T. Miller.

Beamsville, Ont.

What is This Monster?

I am more powerful than the combined armies of the world.

I have destroyed more men than all the wars of the nations.

I am more deadly than bullets, and I have wrecked more homes than the mightiest siege guns.

I steal in the United States alone, over $300,000,000 each year.

I spare no one, and I find my victims among the rich and poor alike, the young and old, the strong and weak. Widows and orphans know me.

I loom up to such proportions that I cast my shadow over every field of labor, from the turning of the grindstone to the moving every railroad train.

I massacre thousands upon thousands of wage-earners a year.

I lurk in unseen places, and do most of my work silently. You are warned against me, but you heed not.

I am relentless.

I am everywhere—in the house, on the street, in the factory, at railroad crossings, and on the sea.

I bring sickness, degradation and death, and yet few seek to avoid me.

I destroy, crush and maim; I give nothing, but take all.

I am your worst enemy.

Answer—"I am carelessness."—Toledo Blade.

"What makes you think Stiggins is a mollycoddle? He's always talking about wanting to fight." "That's the reason. He sounds to me as if he were so scared that he thought it necessary to bluff."—Washington Star.

GOT DIARRHOEA FROM DRINKING BAD WATER.

People moving from one place to another are very subject to diarrhoea on account of the change of water, change of climate, change of diet, etc., and what at first appears to be but a slight looseness of the bowels should never be neglected or some serious bowel complaint will be sure to follow.

The safest and quickest cure for diarrhoea, dysentery, colic, cholera, cholera morbus, cholera infantum, pains in the stomach and all looseness of the bowels is Dr. Fowler's Extract of Wild Strawberry.

Mr. Ernest Jeffery, Moose Jaw, Sask., writes: "A few years ago, when I first came out to Canada, I went to the harvest field to work. Somehow or other the water did not agree with me. I had the diarrhoea so bad that blood was coming from me, and I thought my last days had come. One of the harvest hands advised me to take Dr. Fowler's Extract of Wild Strawberry, and before I had used the bottle I was able to go to work again. My advice to all is always keep a bottle of this wonderful diarrhoea cure on hand."

"Dr. Fowler's" has been on the market for the past seventy years, and has been used in thousands of Canadian homes during that time, and we have yet to hear of a case of bowel complaint where it has not given perfect satisfaction.

The genuine "Dr. Fowler's" is manufactured only by the T. Milburn Co., Limited, Toronto, Ont.

Price, 35 cents.

"KEEP THE HEAD U

Good Advice for All On Ways Than One.

"He is running with his head [illegible] It's a pity," said the man who sat in front of me. We were on one of the swift moving trains that carries city workers to seashore homes in the summer. His remark concerned a handsome, tawnie collie that, separated from its master, who was wa[illegible]ing on the edge of the high bank [illegible] the railroad cut, had chosen to fo[illegible] the railroad track. Everyone who watched knew the dog's doom. From the opposite direction came a warning whistle. Around the curve came a huge engine, snorting, powerful, inescapable — unless the dog should raise his head, unless his eyes should be the channel to the brain of the warning of the imminence of the engine and his own approaching fate.

But he did not look up. He ran straight ahead with his head down, his eyes unseeing. The next second women turned from the windows with muffled cries. Men set their jaws a little firmer than they had been set to meet the onslaughts, the disappointments and exasperations of the day's business. The dog uttered no cry. Or if he did the rumble of the train drowned it. The few who had the hardihood to look back, whose nerves were of a steadiness to withstand the sight, saw a crushed heap of yel[illegible] and white, a plumed tail outstretched upon the track and a fast spreading stain of crimson. Down the shelving bank of the railroad came two men toward the yellow and white heap. They were the dog's master and a friend who were taking this Saturday afternoon stroll that ended in the petty tragedy.

There's a moral in this tale though it be but the story of a dog. The man who sat in the seat in front of me was right. "It was a pity he didn't look up." It is a pity that so many of us do not look up. A fine old book has said "I will look unto the hills whence cometh my help." The fine old book did not mean literal hills. At least I prefer to think it did not. I like to think that it meant that whatever our environment, whatever our task, that while we are doing our work, we shall look unto the hills of inspiration, "whence cometh our help."

Workers have need to remember that the law of gravitation is a hard master. Always it draws us toward the earth. Always it combats our desire to rise physically or in spirit. Yet one of the chief differences between individuals and peoples is in their buoyancy, their habit of looking above and beyond the sordidness of to-day into the beauty of to-morrow. When I see men of bent head and brooding brow going sullenly about his task I think of the dog that would not lift his head.

Planning Work.

What gigantic plans we scheme and how little we advance in the labor of a day! If there is one lesson which experience teaches surely it is this, to make plans that are strictly limited and to arrange our work in a practicable way within the limits which we must accept. Others expect so much from us that it seems as if we had accomplished nothing. "What! Have you done only that" they say, or we know by their looks that they are thinking it.—Hamerton.

Was Troubled With CONSTIPATION FOR OVER FIVE YEARS.

Unless one has a free action of the bowels, at least once a day, constipation is sure to ensue, then in the wake of constipation comes sick headache, bilious headaches, jaundice, piles, and many forms of liver complaint.

Milburn's Laxa-Liver Pills will regulate the flow of bile to act properly upon the bowels, thus making them active and regular, and removing the constipation and all its allied troubles.

Mr. Phil. O. Robichaud, [illegible] N.B., writes: "I have been [illegible] with constipation for over five years, and I feel it my duty to let you know that your Milburn's Laxa-Liver Pills have cured me. I only used three vials, and I can faithfully say that they have saved me from a large doctor's bill."

Milburn's Laxa-Liver Pills are 25 cents per vial, or five vials for $1.00; for sale at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

FARM WORK FOR AUGUST.

As for farm work in August continue the destruction of weeds; keep the ground mellow about young trees; pinch back shoots that are becoming too long in young trees and blackberry bushes; apply mulching to trees suffering from drought; and transplant strawberries according to directions given below, remembering that the sooner the work is done the more firmly will they become established for enduring winter, and the better they will bear next season.

TRANSPLANTING STRAWBERRY PLANTS.

Next to early spring planting, the season of partial rest to the plants which occurs immediately after bearing is the best time for transplanting. Take them up carefully, so as not to tear the fibres, cut off all the leaves except those just expanding, keep the roots moist by immersion in mud, and spread out when setting them. Settle the ground about them by pouring on water, then complete the surface by a covering of fine, mellow earth; next apply a mulching, an inch and a half in thickness, of fine, pulverized manure.

All, or nearly all, will grow without [illegible] further watering; but should the [illegible]ather become unusually dry, water [illegible] be applied without detriment, the [illegible]lch keeping the surface moist and [illegible]venting the formation of a crust. [illegible]se plants will immediately grow, [illegible]me well established before winter, and, if well cared for, will bear next year.

[illegible]ING INSECTS AND DISEASE.

[illegible]tinue to watch for insects, and [illegible]ially for aphides or plant lice, [illegible] often increase rapidly during [illegible]t. Whale-oil soap, strong [illegible]uds, or very strong tobacco [illegible]r, may be used for destroying [illegible]d. It may be thrown on with a [illegible]rse syringe, but it is more effect[illegible] where the shoots can be bent over and dipped in the liquid.

Keep a constant eye for black-knot on the plum and fire-blight on the pear, cutting off instantly the affected parts. Excision will prove a reliable and perfect remedy in the case of black-knot; and frequently, but not always so, in cases of fire-blight. But it is better to cut away half or even the whole of a tree than to have it wholly destroyed by disease and allow the malady to spread.

Budding may be continued. Finish up speedily on cherry, plum and standard pear, and commence early with apples. Peaches and quinces may be budded toward the close of the month. Watch the stocks in season and remove the ligatures as soon as they begin to cut into the bark.

GATHERING THE FRUIT.

Gather early pears as they approach maturity, but before they become ripe on the tree, and ripen them in drawers or boxes. This will much improve their quality and prevent rotting at the core, so common in summer pears.

The proper degree of maturity may be judged in most cases by bending the stem—if the fruit is nearly ripe it will loosen its hold of the tree, but if it adheres firmly, the pear has not sufficiently matured. There are, however, exceptions to this rule—the Bartlett, for instance, may be picked even before it has attained full size, and, in a week or two, will ripen into a fine, melting texture and excellent flavor. Ripening summer pears in the dark much improves their appearance. A Bartlett, for instance, fully exposed to the sun and allowed to ripen on the tree, or in a well-lighted apartment, will show perhaps only a light brown cheek, but if in a dark drawer, the light brown will become a beautiful carmine or crimson.

When drawers are not at hand, the maturing process may be accomplished on shelves by first spreading a thick piece of woolen cloth, laying the pears on this, and covering them with the same.

Pear growers who send their crops to distant markets should pack them early enough to reach their destination before the softening process has commenced. Large losses have sometimes occurred from bruising and other injury when sent later.

FARM NEWS AND VIEWS.

For hog pasture, Dwarf Essex rape is the best of the crops that must be sown each year. It may be sown alone or broadcast at the rate of six pounds per acre, after which a bushel of oats per acre can be drilled in. Sorghum is also to be recommended, and blue grass is excellent, especially for early and late pasture, but it is likely to take a rest during a hot, dry summer. At such times the green succulent sorghum will be very acceptable.

The paint brush is an instrument of magic in beautifying a rural landscape.

An agricultural college education will not make a good farmer out of a natural born piano tuner.

The Illinois milk producers won their fight for higher prices by organized co-operation. It is the power that wins success in every movement.

There's a lot of information coming from the would-be agricultural experts that is just as available for practical farm use as is the potash in powdered feldspar.

Many farmers believe that oats and peas make one of the very best hay crops, and they have planted largely of this mixed crop. And they are men whose opinions are worth while.

Farmers in the richest limestone sections find it profitable to apply lime to their soils. This being true, it is especially necessary that lime be used liberally on soils that are not of limestone formation.

When nitrogen is estimated at 16 cents a pound, phosphoric acid at 7 cents a pound and potash at 4½ cents, Halligan estimates the average value of farm manure as follows: Droppings from one horse, per ton, $2.19; cow, $2.43; sheep, $1.28; pig, $3.20. But as a matter of common experience we know when the manure is properly kept and applied to the land it is worth more, for the figures given do not include the value of the humus, which may be considerable.

The amount of manure voided by animals varies according to the kind, size and age of the animal. Haldane estimates that for every 100 pounds of dry matter in the feed the horse voids 210 pounds of fresh manure, the cow 380 pounds of fresh manure, the sheep 180 pounds.

MAGIC BAKING POWDER
IS THE MOST IMPORTANT ITEM
IN YOUR GROCERY ORDER
—SEE THAT YOU GET IT—
COSTS NO MORE THAN THE
ORDINARY KINDS
CONTAINS NO ALUM

As to the proportion of urine to the manure, Snyder estimates that a well-fed horse will produce about fifty pounds of moisture a day. Of this, one-quarter, or twelve and a half pounds, will be urine. In a stable, the horse will void about six tons of manure per year, according to the same authority.

A milch cow on an average will produce from 60 to 70 pounds of manure per day, estimating both solid excrement and liquid manure. Of this, from 20 to 30 pounds will be liquid manure. The daily droppings of a well-fed cow of average size are about 80 pounds, including the absorbents.

The best way to save manure is to apply it to the land as fast as enough accumulates to pay for the time required to spread it. Bedding should be used in the stalls to absorb the liquids, which are the most valuable parts of the manure. By applying this manure as fast as it accumulates the danger of flies breeding in it will be reduced and much of the ingredients will be saved. But if it is not possible to apply for some time, store in a pile, keep dry and screen or put hellebore on it occasionally to prevent flies from breeding in it.

Some farmers say the blossom test for cutting alfalfa is unreliable. The blossoms should be disregarded entirely and the alfalfa cut when the shoots are from one-half to three-fourths of an inch long.

Wood ashes should be saved and carefully stored in a dry place until applied to the soil. The potash in wood ashes gives them an unusually high value at the present time, says Prof. L. L. VanSlyke, of the Geneva station.

Listen for the Bronchial Wheeze When You Breathe Deeply

It means that disease will soon attack the lungs. Wheezing is distressing to the sufferer and annoying to his friends. Nothing half so certain in bronchitis and throat trouble as "Catarrhozone"; it gives instant relief and cures even the worst cases. Bronchitis fairly flees under the magic influence of Catarrhozone, which cures so thoroughly the disease never returns. Other remedies may relieve, but Catarrhozone cures bronchitis, catarrh and throat trouble for all time to come.

Beware of dangerous substitutes meant to deceive you for genuine Catarrhozone, which is sold everywhere. Large size, containing two months' treatment, costs $1.00; small size, 50c; sample size, 25c.

TO AN ENGLISH SPARROW.

Little feathered tuft of gray,
Skipping blithely through the day—
Never resting,
Yet protesting
In your querulous, quick way—
Little sparrow;
You who would the woodland spurn—
Bird-prized haunts of leaf and fern—
Ever grace the crowded streets
Seeking man's companionship
With your chippy-chip chip-chip
On your wing or tipping feet—
Ever lightly,
Always sprightly
Comes your note so neatly sweet,
English sparrow.

As you peck with greedy bill
Crevices about my sill—
Hither, yonder,
I would ponder,
Do you never get your fill,
Little Sparrow?
Are they true, my busy bird,
All those stories I have heard—
That there's nothing good in you;
That the stains upon your chest
Match the heart within your breast;
That no chirp you chirp is true?
Should I shoo you
If I knew you—
Are you blackguard through and through,
English sparrow?

Though you make no chirped defense,
Yet the absence of pretense
Casts about you,
As I doubt you,
Something tempting confidence,
Little sparrow,
For you've such an honest lay—
Such a frankly flaunting way;
And though man would fain disclose
All your past incarnadined
With the sins that you have sinned,
Yet mayhap your record shows
No more starkly,
Not more darkly
Than man's own, as just God knows,
English sparrow!
—Hazel Hall, in Boston Transcript.

"A millionaire boasts that he leads the simple life." "I doubt it." "What are your ideas on the subject?" "Well, when a person sleeps in a hall bedroom, eats in a cafeteria, wears a $9 suit of clothes, and never sees a movie show that costs more than a nickel, I should say he was leading the simple life."—Birmingham Age-Herald.

The man who buys his friends must guard against the fluctuations of the market.

Tuaregs of the Sahara

"In northern Africa there lies a traceless country, inhabited by a people, the masked Tuaregs, fascinating for the mystery and exclusiveness with which they have surrounded their life. These people, natives and rulers of the middle desert, are the allies of no one, but wage a furtive guerilla warfare, with all who invade the inhospitable Sahara sands of their domain. They are the buccaneers of the trackless sand, forever at war with all civilization and its restraints," says an article issued by the National Geographic Society at Washington, which describes the people always willing to fight for the maintenance of their power to levy tribute upon the ancient transsaharan caravan routes.

"Masked Tuaregs are Berber nomads, a white desert people, whose country is probably the most inaccessible on earth. Even before Egyptian civilization began to leave coherent records of its history the Tuaregs, or Berbers, were long established along northern Africa. The great Arab invasion of the eleventh century displaced them from their possessions upon the seacoast and drove them into the savage area of the interior desert, where, with their hands raised against all who came into their pathless country, they have maintained themselves through the intervening centuries despite lack of water, sand storms and lack of farming land, requisitioning by force of arms from the Arabs and Egyptians to the north and east, and from the blacks of the Soudan in the south, such necessities and luxuries as their cheerless portion of Mother Earth cannot supply them.

"There are five main tribes in the Tuareg confederation, and they inhabit the desert from the Tuat to Timbuktu and from Fezzan to Zinder. Their homes are reared in the heart of arid wastes, where vast solitudes, unnatural heats and unmarked distances shroud everything in uncanny mystery.

"The Tuaregs wear the end of their turban cloth drawn over the face, allowing nothing but the eyes to be seen. It is worn for the purpose of protecting the throat and lungs from the cutting blasts of fine desert sand, and also probably as an element enhancing the mystery of their life, for they seldom or never remove these masks, whether roving over the desert or visiting in the cities on the coast. Due to these cloths they are called masked Tuaregs, while the Arabs call them 'people of the veil.' The masks are dark blue and white, the former being worn by Tuareg nobles and the latter by the serfs and slaves.

"Some centres of trade, Tuareg towns, are situated in the middle desert. These are Wargla, Timbuktu, Ghat, Ghadames, Murzuk and Insalah. However, the Tuareg has little care for trade and industry. He is a fearless, enduring, hard-fighting adventurer along the merchandise trails that cross the desert. Two important trails leave Tripoli, on the coast, and traverse 3,000 miles of sands and barren wastes to the Soudan, where rich cargoes of skins, gold, ivory and other interior African products are loaded upon camels and brought northward. Sometimes a single caravan consists of thousands of camels and merchandise to the value of hundreds of thousands of dollars. When passing through the Tuareg country the leaders of such caravans have had to pay a tribute to the chieftains by the way for safe escort or run the risk of losing all their goods.

"From Morocco to Tripoli the relentless ferocity, the cunning and the daring of the Tuareg are mingled in all the traditions unpleasant to the more peaceful natives along the coast. The Tuaregs meanwhile openly spy upon the caravans in course of outfitting in the coast cities and thrive upon the tribute they are able to exact.

"The Tuaregs are of the purest Berber stock, the noble families unmixed with other blood, and in their own language they call themselves 'the noble people.' Nominally they are Mohammedans, and some of their number compose the most intolerant and warlike sect in Islam, the Senussite sect. Their hatred for the foreigner is greater even than that bred by their religion, and so they are more exclusive than ever were the Chinese or Japanese. Their social organization divides them into five classes—the nobles, the priests, the serfs, the cross-breeds and the slaves. All of these classes have this that is democratic—they form together the Tuareg family, which holds itself superior to all the other peoples of the earth."

A KINDLY QUEEN.

How Mother of Wilhelmina Saved Servant From Trouble.

The mother of the present Queen of Holland married King William when the King was pretty well on in years; it was his second matrimonial venture. He was so pleased with it that one day he purchased a tea set of costly porcelain as a gift for his queen. He felt that it was quite an extravagance, and threatened to discharge any servant who was careless enough to break a part of the set.

One day, says Novellen-Schatz, a man who has been in the service of the Royal house for many years had the misfortune to break one of the precious cups. He was heartbroken. Tearfully he went to Queen Emma and told her his story. The sympathetic Queen took the broken pieces and put them together, saying, "I think we can fix that. Just paste it together with cement. The edges are smooth and won't show much. Leave the rest to me. I'll do what I can to save you."

When the Royal family sat down to tea the next time, the injured cup was at Queen Emma's place. The Queen, pretending to be very thirsty, drank all the tea at once; and then, as if struck with a sudden idea, she turned quickly in her chair toward the King, and her arm swept the cup to the floor. As it crashed into a thousand pieces, the Queen affected an expression of deepest regret, and said timidly: "There, your Majesty, see what an awkward servant I am. Now, the only thing you can do is to dismiss me from your service."

But William was in a happy mood; seeing how grieved his wife appeared, he made light of the loss and consoled her affectionately, while the old servant stood trembling by, thanking his good fortune for a mistress whose tact and kindness had saved him his position.

GET MORE VIM!
RENEW YOUR STRENGTH!

If you are tired, languid, sleepless, have headaches and languor, you need Dr. Hamilton's Pills, they tone the stomach, assist digestion, brace you up at once. Taken at night—you're well by morning. Sickness and tired feeling disappear instantly. Vim, spirits, hearty health, all the joys of life come to everyone that uses Dr. Hamilton's Pills. No medicine so satisfactory. Get Dr. Hamilton's Pills to-day. 25 cents per box at all dealers.

A ROYAL SUMMER VISITOR.

Lightly poised on a beech leaf, or floating aimlessly among the sun-bathed branches, another monarch dallies in his fading realm. With brown, black-ribbed wings a-spread, the very artistry of easy motion, he drifts along on the autumn breezes with the capricious abandon of a summer's work wound up. At times he stirs into quickened action, and, in short, legato flights breasts the breezy stream, breaks into sweeping undulations, momentarily pauses in animato, then, with slender planes extended and taut, shoots off in sheer ecstasy of graceful security atop the fragrant August wind. Grieg and Macdowell, among others, have visualized in "Le Papillon" this monarch in his late summer moods, and following his flight one can in fancy fit the music to the changing rhythm of his movement.

He came in the late spring, when the blue bird's welcome had grown cold, and when the milk weed, his staff of life, was pushing forth a vigorous plant. While males of other species paraded their particular charms in the mating season, the tiny scented sacs dotted on either wing soon attracted a companion of his own order. Nature was served again, and in the early summer the brilliant green larva with his yellow and black stripes appeared on the leaves and stock of the milk weed. The color of the plant itself, he passed unnoticed except to the wayside rambler. To some he might have been a mere ugly worm, a species of the detested caterpillar family. Came the stage of his existence when he had reached maturity, full grown and fat from the nourishing substance of the wayside weed. Then he wandered off to a nearby fence or stone, wrapped himself in his pupal silk and passed into his chrysalis sleep.

The milk-weed nodded on in its own course and paid little heed to the lusty young Monarch butterfly, the very image of his parent, who had come up from the south in spring, that alighted one day upon the flower cluster. How could the weed recognize in this brown beauty, with wings black fringed and ribbed, the metamorphosed larva? But there it was, the green, black, and yellow striped caterpillar, a full grown butterfly, so wonderfully colored that it has been named the Monarch. It is a frequent visitor in our streets, but he is found in clouds on the edges of the woods. Restless he may be, but his parent idly lingers among the branches of the beech or floats with the breeze that plays through the open spaces and out across the sunlit fields.—Peterboro' Examiner.

Bukowina's Stormy History.

Bukowina, the Austro-Hungarian province, has undergone sundry political transitions. According to many Austrian authorities, it was wrested from Transylvania in the fifteenth century by Moldavia, but it not long before that formed an integral portion of the latter state, to which it belonged until it was ceded to Austria by the Turks in 1775. Bukowina, which means "Beech Land," abounds in woodland and mineral wealth and rears large numbers of cattle and horses.—London Globe.

PILES CURED AT HOME BY NEW ABSORPTION METHOD

If you suffer from bleeding, itching, blind or protruding Piles, send me your address, and I will tell you how to cure yourself at home by the new absorption treatment; and will also send some of this home treatment free for trial, with references from your own locality, if requested. Immediate relief and permanent cure assured. Send no money, but tell others of this offer. Write to-day to Mrs. M. Summers, Box P. 8, Windsor, Ont.

Kiddies' Height and Weight.

Do you know the average height and weight of children?

The average 5-year-old boy weighs, including clothing, 41.2 pounds.

At 7 years he has gained 8 pounds and his height has increased from 41.7 to 46.2 inches.

At 5 the average girl weighs 39.8 pounds and at 7 her weight is 48 pounds—a little less than the boy.

The average boy gains six pounds a year between the ages of 8 and 11, when he weighs 72.4 pounds—two pounds more than the average girl of 11.

The height of the average boy increases two inches each year until 11 when he measures 54 inches, as compared to the average girl 53.8 inches.

TENDER MEAT.

And How to Have It From the Cheaper Cuts.

It would seem that the last word had been said on cheaper cuts of meat. But the increase in the high cost of living makes the meat problem still as tough (no pun) as ever.

What are much maligned and equally much praised cuts called "cheaper"? To know this we must know the architecture of the animal in question. First, the most tender pieces are the less exposed parts of the animal. Whatever portions are subjected to muscular exercise (thus the loin) are tougher because the muscles have been used more. This does not mean that there is not as much nourishment in tough muscles as in tender ones. The cheaper cuts have tougher fibres, and the whole problem is to prepare and soften the fibers and thus put them on a par with more tender parts. The muscles of the abdomen are also tender, but give a very coarse meat.

The structure of the muscle fiber must be studied in order to apply the best methods of cooking. Each fiber is like a thin section of orange, being surrounded with a firm tissue and containing juice within. If we cut the fiber across the juice will escape. If we heat the fiber in a high temperature we will harden it still more and prevent the escape of juices. If we cut it and soak it in water the juices again will escape. But if we pour scalding water or liquid on the fiber it will have much the same effect as heating it rapidly to a high point.

Now, the ideal in handling all cheaper cuts is first to harden the fiber either by pouring on boiling water or by heating it to a high degree in order to avoid the escape of the juices, and second, to cook it slowly so that the fiber will eventually be very soft, the juices dissolved and the flavor as much as possible retained. None of these meats should be covered at first with cold liquid or cooked slowly before the outside fiber is seared.

What are some of these cuts by name? Perhaps this partial list will give suggestions which your butcher can help you carry out:

Cheaper cuts of beef:
Rump.—Roasts, brasing, a la mode, stewing.
Chuck ribs (1 and 2).—Roast, steak.
Chuck Ribs (last 3).—Stewing, braising.
"Plate."—Soup, stew, rolled pieces.
Brisket.—Corned and pot roast.
"Skirt" Steak.—Rolled, stew.
Planked Steak.—Rolled, stew, a la mode, soup.
Cross Ribs.—Pot roast.
Short Ribs.—Soup, stew, sliced cold.
Cheaper cuts of mutton?
Breast.—Stew, braising, soup.
Neck.—Soup, stew, meat for croquettes, etc.
Veal:
Breast.—Soup, stew, made dishes, veal loaf.

A slow oven, which is also used in cooking other foods, can be used, or, above all, the "fireless cooker," which cooks without heat. Here, too, the fireproof or earthenware dishes can be used to best advantage, for then the food may be cooked and served in the same dish.

Laundry Counsel.

A bag made of ordinary white mosquito netting will be found a great help in drying small articles such as collars and doilies. Tie the bag with a piece of white tape and pin on the line. This is better for the purpose than a pillow case, as it allows the wind to pass through more readily.

When linen pieces or small articles are spread on the grass to whiten, much trouble may be prevented by spreading a strip of cheesecloth over them and fastening this to the ground with wire hairpins. This, while it does not prevent bleaching, keeps off insects and prevents the articles from being blown away if there is wind.

Add a teaspoonful of glycerine and a half teaspoonful of soda to the starch in which summer dresses are to be dipped. The glycerine gives a pretty gloss and the soda prevents the starch from souring if the garments are not ironed as soon as brought from the line.

When laundering pongee, do not let it dry and then sprinkle it or it will spot. Iron it while it is damp all over if you wish it to look nice.

To wash white silk gloves, waists, men's shirts and other white silk articles so that they will not turn yellow, use ammoniated water—a tablespoonful of ammonia in two quarts of water is sufficient. Use no soap, and dry in a shady place whether outdoors or in the house. White silk will yellow if exposed to the sunlight while wet. Iron while slightly damp and the articles will be soft and white.

Corns Drop Out
INSTANT RELIEF
Paint on Putnam's Corn Extractor to-night, and corns feel better in the morning. Magical, the way "Putnam's" eases the pain, destroys the roots, kills a corn for all time. No pain. Cure guaranteed. Get a 25c bottle of "Putnam's" Extractor to-day.

MYSTERY OF THE MOLE.

He Lives in the Dark, Yet Yearns for the Midday Sun.

There is a great mystery about the moles. They live in the dark underground but yet they are sun worshippers. Just at the hour of noon, when the sun is at its highest point in the sky, the mole often comes to the surface. It is a habit of the race, a kind of religious observance, one might think.

Seldom does a mole willingly make its appearance in the upper world at any other time of the day, but at that moment they come of their own accord. This fact, which has been observed again and again, has never been explained by naturalists.

But, remembering the common belief that a mole is blind, you may ask: "How can it see the sun?" The myth of the blindness of moles has been brushed away. Some species perhaps cannot see, but most of them can. Their eyes are very small and hidden in the fine hair, but they serve as organs of vision.

Still, they can have very little use for them underground. Any leakings of daylight that may penetrate there must be extremely faint, and if their eyes were meant to enable them to see with so little illumination they ought to be large and free from obstruction, whereas they are minute and thatched with hair. But such eyes may be particularly well suited for an occasional look at the blinding sun.

Cholera Morbus.

"'Cholera morbus' is a term with a curious history" said the London Chronicle. "To our forefathers 'cholera' meant not necessarily a disease, but one of the four 'humors' present in every human body, as the bilious humor, excess of which made a man choleric.' 'Cholera' and 'choler,' in fact, meant just the same thing. So the comparatively mild ailment which we know as 'English' cholera was referred to as 'the disease cholera' or 'cholera morbus,' in order to distinguish it from the other sense of the word. Much later when Asiatic cholera was introduced to the alarmed native of England 'cholera' got transferred to it."

THE SPARROW

A Philosopher On Its Curious Domestic Habits.

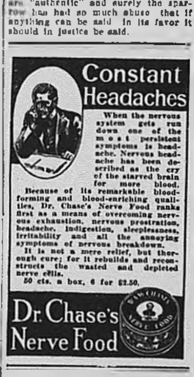
(Contributed).

Sometime ago I sent to you a statement that the vocal abilities of the sparrow could only be enjoyed if one turned philosopher, and having for some time held rather unkindly feelings toward "passer domesticus"—not for the "passer," but refusal to, also its desire to add because of its untidy habits, to the domestic trials of housekeepers—justice compels an admission, that if the sparrow would drop its "pugnacious" tricks, one might begin to change one's attitude towards it somewhat.

This year while occupying every spare moment "clicking the pricks" as a member of the sock brigade, it was possible to "observe nature" at the same time, and as sparrows, like the poor, are always with us, they came in for a considerable share of attention.

While only the results of one afternoon will be referred to, others equally fruitful in results could be given. On this occasion a parent had three restless, persistent youngsters to supply, and it meant much labor to, in any way, satisfy the appetites of the family. I watched with interest the parent chase and catch two cabbage moths, kill these, and feed the sections—including even the shredded wings—to the young. Then, there was an extra noisy time, as this parent had evidently secured a cicada, or something of that nature, judging by the sounds made by the victim, and the efforts of the parent to kill this for the consumption of its hungry young, almost made the knitting stop, as they were so intensely interesting. The young remained, strangely quiet, something they had not done before, as they had been so active in even chasing the parent for fear they might miss a scrap of food before this. The sparrow banged, and pinched, and just when it looked like a finished job, something frightened the birds, the young scurried up into the nearby tree and waited, while the parent with its prey flew out of the garden on to the road some little distance away where a view was not available, although the sounds indicated that the contest was still on. Later the parent came back and forth feeding first one and then another of its flock, so judging from the stopping of the victim's cries, and the rapid return of the sparrow with food, it must have been a successful killing. I had read just before this, and scoffed the statement, that in several places it had been observed that sparrows had reformed and returned to their insect-preying—a habit very largely neglected when becoming city residents—but after the observations of last year and this, I am inclined to accept the statement as correct, and in justice think more kindly in the future of "passer domesticus," though these do undoubtedly need to reform in other lines before any housekeeper can honestly welcome them.

There has been time for observing nature you will agree when I say that pair number 93 will be on the needles to-day, though, lately, to help get some shipments out, buttonholes by the dozen, caused the knitting to be set aside somewhat. You may use the facts relative to the sparrow as they are "authentic" and surely the sparrow has had so much abuse that if anything can be said in its favor it should in justice be said.



Constant Headaches
When the nervous system gets run down one of the most persistent symptoms is headache. Nervous headache has been described as the cry of the starved brain for more blood.
Because of its remarkable blood-forming and blood-enriching qualities, Dr. Chase's Nerve Food ranks first as a means of overcoming nervous exhaustion, nervous prostration, headache, indigestion, sleeplessness, irritability and all the annoying symptoms of nervous breakdown.
It is not a mere relief, but thorough cure; for it rebuilds and reconstructs the wasted and depleted nerve cells.
50 cts. a box, 6 for $2.50.
Dr. Chase's Nerve Food

The Artist and His Work.

The great artists, like the great heroes, have always done whatever came to hand.

Michelangelo grumbled and said he was a sculptor when Julius II. set him to paint, but he painted the roof of the Sistine chapel. Shakespeare chafed at the popularity of the fool in the drama of his time and then produced the fool in "Lear."

If either of them had waited for perfect conditions and an inspiration untrammeled by circumstances he would have done nothing. They produced masterpieces because they made the best of things as they were. And this is the business of the artist in life.—London Times.

Heaven ne'er helps the men who will not act.—Sophocles.

Some housewives make the iced tea so weak that guests think it best to let it rest.

WIT AND HUMOR

CAUTIONED.

(Louisville Courier-Journal)

"I'm building my political fences strong and high."

"Don't get 'em so high that you can't hop over in a hurry, if necessary," cautioned the old campaigner.

WIFE'S VIEW.

(Boston Transcript)

Hub—The doctor says that if I keep on working at this pace after today, I shall be a wreck at 45.

Wife—Never mind, dear, by that time we shall be able to afford it.

JOSH'S JOB.

(Washington Star)

"Does your boy Josh know how to run the farm?"

"Josh ain't supposed to bother with any triflin' detail like that," replied Farmer Corntassel. "Josh is the only one that knows how to run our new automobile."—Washington Star.

PROVED HIS CASE.

(Life)

She—Papa says that unless you know how to make money you cannot marry me.

He—But if I marry you I do know how to make money.

HIS MARRIAGE LICENSE.

(Puck)

Mistress—I have never seen your marriage license, Mandy.

Mandy—Lor', missus, ain't you seen dat nigger knock me around? S'pose I'd let him do dat if we wasn't married?

SOCIETY PRACTICE.

(Louisville Courier-Journal)

"Now, what are you going to prescribe for ailments?"

"Something efficacious, if I can."

"Not with a society practice, my boy. What they want is something new."

MISUNDERSTOOD.

(Boston Transcript)

"Is this a free translation?" asked a customer in the book store. "No sir," replied the clerk, "it will cost you a dollar fifty."

A QUIET VACATION.

(Buffalo Express)

"So you spent a quiet vacation on the farm?" "I thought it would be, but dogs were barking, frogs croaking and the farmer's baby was teething."

HIS NERVE.

(Boston Transcript)

Her Dad—"So you want to marry my daughter. I like your nerve!" Suitor—"Well, sir, you ought to. I spent a lot of time working it up."

ONE CARELESS WORD.

(Washington Star)

"A word carelessly spoken may do great harm." "That's right. You ought to see what one careless word from the umpire did to our ball team this afternoon."

A FINANCIER.

(Puck)

"I earned a penny to-day, papa!"

"Brave boy—and how?"

"Mother gave me tea, and I saved one!"

MUST BE CAREFUL.

(Washington Star)

"De man dat keeps his ears to de ground," said Uncle Eben, "natchelly has to be keerful not to git tired o' listenin' an' go to sleep."

RECOGNIZED.

(London Opinion)

Brown—See that girl in the filmsy dress? Her name's O'Brien.

Jones—Really. I should have known it couldn't be O'Paque.

CAUGHT.

(Pathfinder)

They were sitting on the porch and he was smoking. "Watch me blow you a ring," he said.

"Oh! This is so sudden," she cried.

MARRIED LIFE.

(Judge)

Meeker—Didn't I always give you my salary cheque the first of every month.

Mrs. Meeker—Yes; but you never told me that you got paid on the 1st and 15th you embezzler!

TIMES CHANGE.

(Louisville Courier-Journal)

"The ploughman homeward plods his weary way." The reader put aside his volume of poems. "Times change," he commented. "I see in Kansas they are taking hired hands to the harvest fields in taxicabs."

HARD WORK, ALL RIGHT.

(Boston Transcript)

"I want you to understand that I got my money by hard work."

"Why, I thought it was left by your uncle."

"So it was; but I had hard work to get it away from the lawyers."

BARELY ENOUGH.

(Puck)

Cholly—That dog knows as much as I do!

Ethel—Well, that's enough for a house-dog!

IMPOSSIBLE.

(Boston Transcript)

Guest (at seashore hotel)—I say, landlord, your food and service are worse than they were last year.

Landlord—Impossible, sir!

HIS CALLING.

(Baltimore American)

"Has your son selected any special calling?"

"Sure he has. He's got a good job at a theatre as a megaphone automobile announcer."

THREATENED HER.

(Boston Transcript)

Aunt—Why didn't you scream when he kissed you?

Niece—He threatened me.

Aunt—Threatened you?

Niece—Yes; he said if I did he'd never kiss me again.

A LESSON FIRST.

(Washington Star)

"You ought to forgive your enemies."

"I may eventually," replied Senator Sorghum. "But I should like to give them a lesson before hand, so that they will know my forgiveness is generous and strictly voluntary."

THE ONLY ONE.

(Houston Post)

"Mr. Softtop is different from any other man I have ever met." "You don't mean to tell me he has proposed to you?"

A MUSICIAN.

(Washington Star)

"How's your daughter getting on with her music?"

"Fine!" replied Mr. Cumrox.

"She sounds like a professional musician; 'specially a piano tuner."

A HEAVY MEAL.

(Boston Transcript)

"Last Friday I lunched on one of our battleships." "Didn't you find it rather hard to digest?"

NOT TO BLAME.

(Puck)

The Barber—Your hair is thinning, sir. Ever try our hair preparations?

The Patron—No, I can't blame it on that.

HIS GAME.

(Washington Star)

"You shouldn't lose your temper and say harsh things in debate."

"I'm not losing my temper," replied Senator Sorghum. "A man who loses his temper is at a disadvantage. I'm saying the harsh things so as to persuade the other fellow to lose his."

WALKERTON, SEPTEMBER 7th '16

EDITORIAL COMMENT

The real estate movement is picking up in Western boom places. In some towns a dish of ham and eggs can be obtained for one town lot and back taxes.

+ + +

The Hearst Government don't seem to be very lucky in the bye elections. In fact they seem to be good-bye elections to the government.—Winchester Press.

+ + +

Some lines of printer's paper have recently doubled in price. Black printer's ink has doubled in price. Some coloured inks are almost unobtainable at any figure.

+ + +

Wheat, cattle and hogs got a set back last week when Roumania joined the Allies and the probability is that the top notches have been touched for these commodities for the present year

+ + +

A hog weighing over 800 pounds was sold by the authorities of the Ladies College, Whitby, last week. The young ladies must have been feeding the big pig with chocolates and ice cream.—Winchester Press.

+ + +

The earliest example extant of a certain make of car appearing in history is where the Israelites "went down an took the Fords of Jordan."-(Judges 11,28. And another reason why the Ford habit may be regarded as a religious exercise, is because it shakes the devil out of you.

+ + +

An amazing thing is the number of farmers throughout the County who have not their barns and farm stock adequately insured. Farmers' fire insurance is sold for the merest trifle and yet many farmers will risk financial ruin by not spending a paltry sum for insurance.

+ + +

—"Advertising is the education of the public as to what you are, where you are, and what you have to offer in the way of skill, talent and commodity. The only man who should not advertise is the man who has nothing to offer the world in the way of commodity or service."

+ + +

R. E. Truax, the popular member for South Bruce, was in town on Wednesday of last week shaking hands with the electors. He was highly complimented on his "Independent vote" in parliament, and is assured of strong support from the Independent voters in this township. —Ripley Express.

+ + +

Mail box owners on the rural delivery routes are reminded that they should keep their names plainly painted on their boxes. This helps the mail carriers to do their work with despatch and accuracy. Also for the convenience of all who wish to know where a farmer lives, let your name shine on the mail box.

+ + +

Renfrew Mercury—The Methodist church might apply for a special act of Parliament requiring John Wesley Allison to change his Christian name. Some people, who pretend to know, say that if church records in Dundas County were looked up it would be found that Allison at the Baptismal font was called Isaac and not Wesley at all. It ought to have been Jacob.

+ + +

For two weeks Mr. J. J. Tyson has been measuring lumber and living at Wiarton. His auto carries him 22 miles to this village in time for an early start in the morning and in the evening he spins back home to Wiarton. No, he doesn't go home for lunch. If some of the old pioneers had heard a prophecy years ago that such would occur in 1916 they would have laughed in derision.—Lionhead News.

+ + +

There are doubtless many good women in Walkerton who might take to heart the following, from the July number of Our Dumb Animals: "If every housewife who reads this page would see to it that the delivery horse has to make but one trip a day to her door, a vast amount of work and actual suffering would be saved thousands of horses. The orders of the day thought out in the morning would make it unnecessary to ask for a second, sometimes even a third, delivery."

+ + +

Prohibition comes into operation in Ontario on Sept. 16 How is it going to work. We shall see. Meanwhile, here is the experience of Alberta as reported in the Edmonton Bulletin of Aug. 1. "Alberta has had a month of prohibition and likes it. The experience has effectually demonstrated that we can get along without the bars. The temptation to men to convert themselves into swill pails has been removed. A drunken man is consequently a rarity in Edmonton and the country towns. Store bills are being paid more promptly. The money that formerly went into booze is being expended for the necessaries of life. Homes are happier. Everybody is happier. The open bar, let us hope, has gone forever."

Bruce House of Refuge

Sketch of County Institution that is Doing a Worthy Work and Doing It Well.

The finest and largest residential property in Walkerton is situated on McGivern St, half way between the town proper and our suburban Grand Trunk Station. With its wide expanse of well-kept lawn, its lovely flower beds and hedges, backed by an imposing brick structure of towering dimensions a stranger might easily get the impression that here was the estate of some railway magnate or retired millionaire. It is to the lasting credit of the people of Bruce that they acquired this property, fitted it up so splendidly, and maintain it from year to year at considerable expense not for their own selfish benefit, but to be used as a haven of rest for those who through misfortune are not so favorably placed in life as themselves. The House of Refuge, that building of which the people of Bruce have reason to be proud, is a lasting monument to the humanity of the good folk of this County.

+ + +

The photograph reproduced on this page gives an excellent idea of what the building actually looks like. It was erected in 1899, the building and 62 acres of land costing in the neighborhood of twenty-five thousand dollars. The Institution is in charge of Superintendent John H. Wiles, his wife being matron of the Institution.

The Telescope man called at the House of Refuge on Thursday last and was very kindly shown through the establishment by Mr. Wiles. At present Mr. Wiles has a "family" of about fifty—that is about the average number. It is like a great household. Only very few households are conducted with so much system. It would probably be a good thing for most households if they would take a few ideas from the plan on which the House of Refuge is run. There are 12 women and 38 men in the institution at the present time. This is about the usual proportion between the sexes. The men and women live entirely separate, one side of the building being devoted to the inmates of each sex. Each side has its own dining room, sitting room, bath room, and dormitories. The rooms are well lighted and heated. The beds are single iron cots and are furnished with a good supply of bedding. Everybody rises at 6 o'clock. At 6.50 a. m. a bell announces breakfast. The morning meal is plain but substantial. It consists usually of oatmeal porridge, bread and butter and tea. At twelve o'clock noon dinner is served. For dinner the usual bill of fare is:—beef with soup, or roast beef, or some other meat, potatoes, bread, and tea. Supper at six o'clock, consists of bread and butter, cake, fruit, rice or tapioca, tea. "Lights out" is rung at nine o'clock. As a matter of fact most of the inmates retire earlier. Mr. Wiles has of course to have discipline in his "family." As the members are too old to punish corporeally, there is a lock-up in the basement which is just like the real thing. Its very presence in the building is all that is necessary. We are not sure that it has ever been used. As a rule the inmates are a very agreeable, and even satisfied lot, and the kindest relations exist between the Superintendent and his wards. It goes without saying that only a man of character and humanity could fill the position of Superintendent satisfactorily. And in the present Superintendent the County, has been fortunate in securing one who is peculiarly fitted for this responsible position.

+ + +

Besides the rooms mentioned above there are Mr. and Mrs. Wiles' private apartments, the servants' quarters, three maids being employed in the house, also the dispensary where a full line of pills and potions are constantly on hand under the direction of Dr. Hall, who makes a weekly visit as physician to the House of Refuge, besides any special calls. Then there is the Chapel, where religious service is held every Sunday afternoon. The Clergymen of the town take charge of this service in turn and their coming is greatly appreciated by the old folks.

+ + +

The high cost of living problem appears to have been solved here. All it costs for the board of each inmate is $1.62 per week. Of course the cost is reduced by the fact that those inmates who are able, work around the building and on the farm, there being partly self-sustaining. A capable man, Mr. George Detzler, is hired for the outdoor work with what assistance can be given by the inmates. Last year there was 40 acres under crop and here are some of the things produced:—12 tons of hay, 2,000 bushels mangolds, 45 bushels of wheat, 200 bushels of barley, 755 bushels of oats, 150 bags of potatoes, 2 acres of corn, 12 bushels of onions, 1187 lbs of butter, 834 doz. of eggs, 1000 lbs of pork. The Institution produces its own milk, butter, and pork entirely. At the barn are 7 milch cows, 2 horses, 5 hogs and 100 hens.

+ + +

Why are these men and women here? Whiskey. That is Mr. Wiles' answer to the question as to what is the most important contributing cause based on several years experience. The women have suffered from whiskey indirectly. Of course there are men in the Institution who are strictly temperate. A census taken some time ago revealed however that only two men in the institution were "teetotalers." Here are some of the reasons that the Reeves of the various townships have given for committing persons to the House of Refuge:—"sick", "lame", "old age", "no means", "cripple", "feeble", "feeble-minded", "desolate", "rheumatism", "lazy", "blind", "whiskey".

An interesting fact is that practically all the men in the Institution are bachelors. Does this prove the old assertion that two can live more cheaply than one, and thus make things go, where a man alone will starve? It may mean that when a man does not link up with a life-partner, there is a good prospect of him sooner or later becoming wedded to booze. Some of our old bachelors should take warning!

+ + +

A census taken of the denominational faith of the inmates last year showed the Presbyterians in the lead. The figures are as follows:—19 Presbyterians, 12 Methodists, 8 English Church, 11 Roman Catholics, 1 Deciple, 2 Latter Day Saints. There are more Scotch than any nationality—due not to the national canniness of the Scots but to their traditional fondness of a "wee drapple". The Irish come second, and the thrifty Germans last.

An institution of this kind reveals some strange side-lights on human nature. For instance, the men are always found to be more agreeable and companionable than the women, who frequently cannot get along with their neighbours and like to keep to themselves. This is found to be true in all institutions of this kind.

There are many interesting old people who call the House of Refuge their home and will spend the remaining days of their life there. The oldest inmate at present is Mr. Nicholas Benson of Bruce Tp., 96 years of age. Mr. Benson is a man of fine character, and more than ordinarily intelligent. He is a great reader. The genial Billy Burgess is of course the best known of all. "Billie" is an old-timer around Walkerton and everybody knows him. He was one of the first inmates and for sixteen years up to last New Years he carried His Majesty's mail from the Post Office to the House. He is now 77 years old, and although still in good shape, his legs will no longer stand the daily journey. John Weigle is another well known old man who is spending his last days here. For three years he has been bed-fast. Many folks have kindly recollection of good-natured John. Mrs. Vanderburg, a kindly old lady aged 93, is the oldest women in the institution.

One feature we overlooked mentioning was the reading room. The old folks take a great interest in this room which is a source of comfort to them. Citizens who would like to help the old people can do so by sending along a supply of newspapers and old magazines or books from time to time.

EX-CONTROLLER SPENCE

Says Only Amendment People would Tolerate Would be to Make Prohibition Act Stronger.

Ex-Controller F. S. Spence of Toronto was the speaker at a public meeting held at the Town Hall Sunday evening under the auspices of the Dominion Alliance. Mr. L. C. Benton, County President of the Citizen's Committee of One Hundred, occupied the chair. Mr. Benton stated that over seventy-five per cent of the people of Bruce had signed the recent petition to the Legislature which had resulted in total prohibition being enacted. The next duty of the people who signed the petition was to do everything in their power towards having the law enforced and to recognize the fact that they would have to put up their money.

Mr. Spence, who is one of the ablest speakers heard here in a long time, briefly outlined the wonderful progress in Temperance Reform throughout the world in a few brief years. Britain is fighting for the principle, one of the fundamentals of our christianity, that no man shall be permitted to do another wrong. He put Kaiserism and the Liquor Traffic in exactly the same class. All we enjoy of personal liberty comes from the working out of man's duty to his fellow-men—the active principle in christian life. He referred to the misapprehension some people have as to what liberty means. Liberty does not mean allowing a mad dog at large. No man should be allowed to do another wrong. He spoke of the necessity of continuing educational work along temperance lines and seeing that the new law is strictly enforced. He believed that Ontario had a Premier big enough to see his duty and do it. Public opinion was behind him and the only amendment to the Canada Temperance Act which would be tolerated, would be one making it stronger. Mr. Norris, the well-known Toronto vocalist, sang several fine numbers.

Bread Making Contests
At Rural School Fairs

PRIZES—Free Courses at Macdonald Institute, Guelph
Free Poultry Raising Courses at Ontario Agricultural College
Free Cook Books and Magazines

Over 1,600 prizes in all will be offered in bread-making contests which will be held this fall at over 250 rural school fairs taking place in Ontario. It will be a great event at the fairs and will stimulate interest in bread-making among young girls between the ages of 12 and 17 years.

Here is a wonderful opportunity for your daughter to win for herself a Free Course in Domestic Science at the famous Macdonald Institute, Guelph. All she has to do is to bake one double loaf of bread and enter it in the contest at the fair according to the conditions explained below and more fully told in the folder we will send you on request. The loaf must be baked with

Cream of the West Flour
the hard wheat flour guaranteed for bread.

This is a splendid flour which makes the biggest, bulging loaves—whitest, lightest and most wholesome bread you ever baked. Is this not a splendid opportunity to interest your daughters in breadmaking?

Here are the Splendid Prizes offered for the best loaf of bread baked with Cream of the West Flour. The following are offered at each local Fair:

1st Prize—1 paid up subscription to "My Magazine" for 1 year. This magazine is full from cover to cover every month with articles suitable for young people of all ages. It is published in England. Value $2.50 per year.

2nd Prize—6 months paid up subscription to "My Magazine." Value $1.25.

Extra Prizes—When entries exceed ten a 3rd prize will be awarded of 6 mos. paid up subscription to "My Magazine." When the number of entries exceeds twenty the judges at the fair will award 4th, 5th, and 6th prizes of one year's paid up subscriptions to "The Little Paper." This is a wonderful little publication issued every month in England. Its eight pages are packed with highly engaging information and stories relating to history, nature study, animals, bird life, etc.

Important—The winners of 1st prizes at the fairs automatically become competitors for the Provincial Prizes. The second half of the double loaf is sent to Ontario Agricultural College, Guelph, by the district representative in special container provided. The judging is done by Miss M. A. Purdy of the Department of Breadmaking and Flour Testing at the College

Provincial Prizes—The winners of first prize at each local fair compete for following Provincial prizes. The first and second prizes, or third and fourth prizes, will not be awarded in any one county:

1st Prize—Short Course (3 months) in Domestic Science at Macdonald Institute, Guelph. The Macdonald Institute does not accept students under the age of 17 years; if the winner be less than 17 we present her with a certificate entitling her to take the course when she reaches the right age. Value of course $75.00, which pays for fees, room, board and washing. The winner lives at Macdonald Hall while taking course.

2nd Prize—Short Course (3 months) in Domestic Science at Macdonald Institute, Guelph

3rd Prize—Short Course (4 weeks) in Poultry Raising at Ontario Agricultural College, Guelph. Girls taking this course do not live at the College, but good boarding houses will be secured for them in Guelph. Value of course [illegible], which pays board of student in Guelph. (No fees are charged for course.)

4th Prize—Short Course (4 weeks) in Poultry Raising at the Ontario Agricultural College.

5th to 29th Prizes—The Famous Boston Cooking school Cook Book by Fannie Merritt Farmer, latest edition (1916). There are 2117 thoroughly tested recipes and 130 photographic reproductions of dishes, etc., besides much special information.

Conditions of the Contest

Every girl may compete at the rural school fair in her district, whether or not she attends school, providing that her 12th birthday occurs before November 1st, 1916, or her 18th birthday does not occur before Nov. 1, 1916. One loaf of bread must be submitted baked in pan about 7 x 5 inches and 3 inches deep, and divided into twin loaves so that they may be separated at the fair. The loaf must be baked with Cream of the West Flour. One half will be judged at the fair. The other half first prize loaf will be sent to Ontario Agricultural College, Guelph, to compete in the Provincial Contest. The local contest at the fair will be conducted under the same rules as all the other regular contests at your fair.

The standard by which bread will be judged will be as follows:

1. Appearance of Loaf .... 15 marks
   (a) Color .... 5 marks
   (b) Texture of crust .... 5 marks
   (c) Shape of loaf .... 5 marks
2. Texture of Crumb .... 40 marks
   (a) Evenness .... 15 marks
   (b) Silkiness .... 20 marks
   (c) Color .... 5 marks
3. Flavor of Bread .... 45 marks
   (a) Taste .... 25 marks
   (b) Odor .... 20 marks

Each loaf must be accompanied by the part of the flour bag containing the face of the Old Miller (important) and an entry form must be signed by the girl and parents or guardian stating date of birth, P.O. address, and giving name of dealer from whom Cream of the West Flour was purchased. The form will state that the girl actually baked the loaf entered in the competition. The forms will be provided at the time of the fair. The decision of the judges is final. Not more than one entry may be made by each girl and not more than one prize will be awarded to the same family.

The Results of the contests at the fair will be made known in the usual way as in the case of all the other regular contests. The Provincial results will be announced as soon as possible after the conclusion of the Rural School Fairs in the Province.

Do Not Miss this Great Opportunity: Every girl between 12 and 17 years should compete. What a splendid way to stir up increased interest in breadmaking! Get a supply of Cream of the West Flour at your dealers and practice using it as often as possible to increase the chances of winning. If your dealer cannot sell it to you, write to the Campbell Flour Mills Co., Ltd., Toronto, and they will promptly tell you the nearest place to get it.

No Competitions in Counties Named Below: The competition is open to all parts of the province where Rural School Fairs are held, except the districts of Rainy River, Kenora, Manitoulin and Thunder Bay. These districts are the only parts of the province where school fairs are held by the Department of Agriculture in which this competition will not be a feature. There are no district representatives of the Department of Agriculture in the Counties of Huron, Perth, Wellington, Haliburton, Prescott, Russell or Lincoln, and no rural school fairs are held in these Counties by the Department of Agriculture. We regret, therefore, that the competition cannot include these Counties.

Write for free folder giving full and complete information about every feature of this great contest.

Cream of the West Flour is sold by J. W. South, Walkerton, and by E. Witter & Co., Mildmay and Geo. Lambert, Mildmay.

Showing a Roof Covered with Brantford Slates in Solid Color.

There is Safety Under This Roof

Have you ever had a fine job of decorating spoiled by a leaking roof? If you have, you certainly are in a position to appreciate the value of a roof that is positively water-proof. Some of the troubles common to wooden shingles to-day are that they are apt to split, warp or blow off as well as leak, soon after they are put on. Years ago they were good, but the quality has since gradually depreciated as the available supply of suitable timber became exhausted.

Brantford Slates have none of the faults of wooden shingles. They cannot rust. They do not allow rain to be driven under them as do metal roofs. They do not require rigid supporting as do the common tile or slate roofs. On the other hand *Brantford Slates* afford the utmost protection with little weight. They are made on a long-fibred felt "base" which is thoroughly saturated under pressure with asphaltum or mineral pitch. Crushed quarried slate particles are then deeply embedded in the surface of this "base", making it water-tight and fireproof.

Brantford Roofing

Brantford Slates are made in the natural slate colors of green, red, black and grey. The colors never fade and the slates do not require painting nor repairing. These slates are pliable and fit readily around gables and into the angles of any roof. This means a continuous roof without seams or joints. Sparks die on Brantford Slates. When you have these slates "on" you are done with the job. Remember they don't require painting or staining and may be selected to harmonize with almost any exterior color design, and the price is not beyond your reach. We would be pleased to send you samples and our Roofing Booklet.

HIS HEART BADLY AFFECTED

"Fruit-a-tives" Soon Relieved This Dangerous Condition

583 Gerrard St. East, Toronto.

"For two years, I was a victim of Acute Indigestion and Gas in The Stomach. It afterwards *attacked my Heart* and I had pains all over my body, so that I could hardly move around. I tried all kinds of Medicine but none of them did me any good. At last, I decided to try "Fruit-a-tives". I bought the first box last June, and now I am well, *after using only three boxes*. I recommend "Fruit-a-tives" to anyone suffering from Indigestion".

FRED J. CAVEEN.

50c. a box, 6 for $2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

BALLADE OF ADVERTISEMENTS

BY CAROLYN WELLS

Each day I read the war news grim,
And shudder at the pictured scene:
O'er sad sob-tales my eyes grow dim,
I rage at politics unclean.
Then I turn from the dull routine
Of current national events,
To new Dreadette or Pie Pastrine,—
I love to read advertisements!

The editorials I skim,
Skipping the prosy bits between:
The accidents of life and limb
From taxicab or limousine.
I spy a new, dread, war-machine,—
Then turn to where the page presents
A special sale of black moreen!—
I love to read advertisements!

The page of Women's Way and Whim
Has some few bits for me to glean:
It advertises Sorelyslim,
Or Try Bolisl's Baking Bean;
Perhaps a Blouse of Blue Maline,
Reduced to-day to ninety cents!
Or some new sort of Householdine,—
I love to read advertisements!

L'Envoi:
Editor, you are wise, I ween,
So couldn't you the news condense,
And have more "Ads," clear, terse and keen?
I love to read advertisements.

News About Town

Citizens are getting their coal bins filled. In time of peace prepare for war.

Rev. W. H. Laugton, pastor of Chesley Baptist Church, has accepted a call to Paris.

John McKay, probably the oldest man in Bruce Township at the age of over 90 years.

Vesta Methodist Church has been closed. The Congregation will hereafter attend Chesley Church.

The Austrians are retreating so much that to the Russians it must look as though their front had become their rear.

Listening at the telephone when the neighbors are talking is said to produce hydrothumpia of the adumbrational nerve.

Probably the oldest person in Bruce county is Mrs. Donald McDonald, of Kincardine, who is in her one hundredth year.

Joseph Goetz, a Hepworth man, stored $120 worth of booze in his cellar. The magistrate fined him $300 and costs for the offence.

Talk about the price of living striking home and striking hard—can you beat the announcement that beans have doubled in price in Boston.

The plant of the Wiarton Cement Co. has been bought by the Feldspar and Clay Products Limited, Wiarton, a company recently organized with an authorized capital of a million and a half.

Does it not seem strange, when only a few weeks ago we were told that the demand for power in Ontario was greater than the supply, to read now that power is to be exported to Detroit users?

Years ago the women used to wear skirts that swished up all sorts of microbes and things. But nowadays said microbes would have to be pretty fair on the high jump to catch on.—Guelph Mercury.

The local baker paid a fine this week for turning out bread that was light in weight when tested by the inspector. The loaves were full weight when baked, but were reduced by evaporation afterwards.—Paisley Advocate.

A Brant young man at Orr Lake went to see his girl one night last week. After the old folks had retired the young man edged his chair up to the girl and and gently put his arm round her. After chatting for some time he unfortunately fell asleep. This so annoyed the girl that she gently released herself and put the churn on the chair just vacated. The sleepy youth was hugging the churn when the old man came downstairs in the morning. He has not gone back since.

Within Sound of Guns

Chester Cunningham, who went to England with the 71st writes his parents, Mr. and Mrs. Thos. Cunningham from "Somewhere in Belgium" that he is now within hearing of the guns. He had just seen some of the boys come out of the trenches happy as larks. Chester is with a number of other Walkerton boys who went over with the 71st, now in a trench Mortar Company.

✦ ✦ ✦

Eric Robertson Promoted

Lieut. Eric Robertson of the Royal Flying Corps, son of Mr. and Mrs. Norman Robertson of Walkerton, was promoted on June 1st to the rank of Captain. Capt. Robertson went to England a member of the Flying Corps with the idea of doing avation work but was given an appointment in the British War Office. It is gratifying to learn that he has won promotion so soon in his new work.

✦ ✦ ✦

Best Battalion Yet

Rev. Dr. Johnston, who occupied the pulpit of Knox Church, Sunday, was in London last week with the 100th Batt. of which he is chaplain. He says the boys came back from harvest furloughs only one of them drunk. Col. Mowbray, the chief medical officer, inspected the Battalion and said it was the finest he had yet inspected. Dr. Johnston says it is unique, too, in being 85% native born.—Kincardine Review.

EMINENT LECTURER

The Late John King, K. C., Was Well Known in Walkerton.

Referring to the death of Mr. John King, K. C., the father of Mrs. H. M. Lay, which occurred at Toronto on the 30th ult., the Globe says in part:—By the death of Mr. John King, K.C. Toronto has lost one of its most honored and esteemed citizens. The deceased gained distinction in several spheres of life. In law he was a lecturer and author of note; in educational affairs he had the unique record of being for thirty-seven years a member of the Senate of the University of Toronto; of a military family, he served in the Fenian Raid with the University Company of the Queen's Own Rifles; and in religious connections he was a member of St. Andrew Presbyterian Church, King Street. Mr. King's illness was of brief duration. Just a week ago he returned from Ottawa, where he had been on a visit to his son, Hon. W. L. McKenzie King. He was taken ill late on Monday night, suffering from gastritis, and passed away at his residence, 230 Avenue Road, yesterday morning.

Mr. King in 1872, married Isabel Grace MacKenzie, youngest daughter of the late Wm. Lyon MacKenzie, M. P. There were four children. The eldest, Miss Isabel King, died in the Spring of last year. The others are: Hon. MacKenzie King, Ottawa, former Minister of Labor in the Laurier Government, Dr. D. MacDougald King, Denver, Colorado, and Mrs. H. M. Lay of Walkerton, Ontario. Deceased was a son of John King who came to Canada from Scotland, and commanded a detachment of the Royal Horse Artillery during the rebellion of 1837.

DARING DAY ATTACK

Capt. Kilmer's Casualty Happened in the Midst of a Most Venturesome Enterprise

How Capt. C. E. Kilmer, grandson of Mr. N. Crawford, received the wounds which necessitated the amputation of his leg, was told in detail by an official message from the Front last week which was published along with Capt. Kilmer's picture in the Toronto Star. It appears that this courageous young officer was participating in one of the most daring daylight raids yet pulled off on the Canadian Front when the casualty happened. The Star says:—

"First hand information of the thrilling daylight raid carried out by the 19th Canadian Battalion on the morning of July 29th was received by Lt.-Col. Robertson, chief recruiting officer, yesterday from Lt.-Col. Turnbull O. C. It is a copy of the official report which Lt.-Col. Turnbull made of the operations, and narrates how at 8.55 a. m. the raid was undertaken and carried to completion. The point of entry was carefully selected and on the night preceding the attack the wires were cut. Machine gun fire muffled the sound of the wire-cutting. The raiding party consisted of Capt. C. E. Kilmer, Lieut. H. E. Peppler and 18 N. C. O.'s and men. The party crawled along an old ditch for 120 yards to a point within 45 yards of the enemy parapet. They broke through the wires and into the enemy trench before being discovered.

Capt. Kilmer and Lieut. Peppler on entering the trench sent out a party of their men to the right and a party to the left, a third party remaining in the centre to support the flanking parties. The object was to locate evidence of gas tubes, mine shafts and if possible secure a prisoner for identification. The party remained in the trench for five minutes during which time one sentry and seven guards were shot and four large dugouts crowded with Germans were bombed. The estimated casualties to the Huns were 40 killed and wounded. On the signal being given, the party evacuated in an orderly manner. A number of bombs thrown by the enemy as the raiders were leaving caused eight casualties, mostly slight with the exception of Capt. Kilmer, Lieut. Peppler and Sergt. Holk, who sustained shrapnel wounds. Capt. Kilmer, the last out of the trenches, suffered a fractured ankle and crawled into a shell hole eight yards from the German trenches. He was quickly rescued by a party quickly organized, and carried back under heavy rifle and machine gun fire.

LETTER FROM PEERESS

English Lady who is Nursing at the Front Acknowledges Cargill Young Lady's Gift for Soldiers.

Miss Gertrude Kenny of Cargill slipped her name and address into the pocket of a bed shirt donated by the Pinkerton Red Cross Society some time ago. Last week she received a gracious acknowledgement from an English peeress, Lady Frances Ryder, who is nursing French soldiers at the Front. The letter follows:—

Hospital Militaire, V. R. 76,
Ris Orangis,
Seine at Oise.
France.

Lady Frances Ryder is writing to tell Miss Kenny that a half sheet of paper with her name on was found in one of the shirts which was given out to one of the Frenchmen last week in the ward where Lady Frances is nursing. She thought Miss Kenny would like to know how much the French wounded soldiers appreciate what is being done for them, and unless people from all parts of our Empire had helped to make things for them, Hospitals like these could not be started of which they are much in need. Some of the worst cases have come here from Verdun, and when they are very badly wounded they are so pleased to get into a nice clean shirt and a clean bed.

Miss Kenny will be interested to hear that the majority of nurses here are Canadians and that Lady Frances spent five weeks in Canada five years ago.

Aug. 14th 1916.

LETTER FROM CORP. W. YAECK.

Bramshot, England.
August 6, 1916.

Dear Parents:—

It is Saturday afternoon and as usual we are taking a rest after our weeks work. The weather is perfect to-day and one could not wish for better although last night it was rather cool. It is rather dry about the camp and sometimes the dust flyabout is quite unpleasant. This week has been quite interesting to us as we have had a great variety of things to do.

Our equipment is practically complete and we surely have enough apparatus to look after now.

We have had two night marches during the week, and believe me, it is some experience for all of us.

On the march the gun limbers which are drawn by two teams of mules each. In this way we have a limber followed by about fifteen men and the same all along the lines with the mules almost tramping on the heels of the last three fellows in the team. Really you can hardly know when they are going to tramp on you.

We travelled over all sorts of roads and in one place on our route we passed through a narrow dark lane about a quarter of a mile in length.

Now I am not exaggerating in the least when I say that you could not see your hand in front of you. In fact everything was in absolute darkness and the only thing to do was to all hold together and scramble through as best we could.

Then with mules in front of you and mules behind, balking and stumbling we had quite a merry time of it. However, we made it all O. K. and it gives us some idea of what we may have to do very soon.

The other night we had another march but instead of coming back immediately we carried a blanket and slept out for about two hours. We carried our field telephone with us and put our packs in the limbers.

We had only about half an hour in which to get our phones out of the stores and get them into shape. We had never laid a cable line before but where we halted we had communication through in about fifteen minutes and everything worked excellently. In packing up it only took us about ten minutes before we were ready to start again. Our captain was certainly well pleased with our work, and so were we considering it was our first experience and we had everything to do in darkness.

Have you received the two pictures I sent of the divisional signalling School class. The results of our examinations came out in orders a few days ago and I was the only one in the 11th Brigade to receive a 1st class certificate. There must have been at least about 25 out of the brigade at the school, of course there were two other brigades represented in the school but I do not know what their results are.

Last night we played the signallers of the 75th in baseball but they beat us easily.

Both Ted Kidd and I were playing but on opposite sides. It will probably be the last game of baseball we will have for some time unless something unusual happens.

Just stopped about two minutes to watch two aeroplanes travelling side by side. They are up an awful height at least about two miles. I think I'd take a chance on anything if I were up where they are.

Perhaps this may be my last letter before leaving but if anything prevents us from going, or if I can find an opportunity for writing, I will do so before I go.

Now if my letters do not come regularly in the future do not think anything of it, because it is quite different for the mail authorities to regulate the large quantities very well. It is certain that we will not go direct to the firing line but will be training at the base for some time.

With best wishes and a loving farewell to all,

I am your affectionate son,
Wilfred.
Corporal W. L. Yaeck, No. 126291,
11th Bde. M. G. Company,
4th Canadian Div.,
Army P. O.,
London, England.

P. T. Barnum Said

The late P. T. Barnum said:—"If you have $10 to use, put $10 of it into advertising. I can out talk any man but a printer. The man who talks every week to a thousand men while I am talking to a few is the man I am afraid of, and I want to be his friend. Trade with the men who advertise and you will get bargains and the worth of your money." Patronize your paper as you would any other enterprise because it helps you and not as an act of charity. The local weeklies are religiously read and are the very best avenues for imparting to customers or producers simple but extremely important information. Shop where you are invited to shop.

OUR OTTAWA LETTER

Secured for the Telescope By Special Arrangement

Recruiting is practically at a standstill because the impression has got abroad that the Borden Government never intended the five hundred thousand limit to be taken seriously anyway. It was what you might call a bluff. When Premier Borden said five hundred thousand he meant it in a Pickwickian sense.

Lately the Government has been visited by a gleam of common sense. The necessities of an army of three hundred and fifty thousand men are so great that the list of supernumerary officers has been cut down. These gentlemen will draw pay no longer for their superfluous services. They were mostly friends of the party or sons of friends and they were put on the pay roll while the paying was good. Now that the paying is not so good, and they have got their bit, they may be expected to drop out gracefully. There has never been any trouble at any stage of the game in getting supernumerary officers—they are thicker even than honorary colonels. The real difficulty has been getting private soldiers to do the work and the fighting at $1.10 a day, while supernumerary officers, who had no idea of running risks or incurring hardships, were drawing three dollars a day and up.

The truth of the matter is that so far as the Borden Government is concerned the greatest war in history has been a great bun feed for the friends of the Conservative party. The first, fine, careless rapture for recruiting has been killed by the disclosures in regard to Sam's friend, the late Honorary Colonel John Wesley Allison, the predatory operation of the Bertram Shell Committee, the revelations of the Public Accounts Committee, the report of the Duff-Meredith Commission, the inquiry into paper shoes, the belated excommunication, of De Witt Foster and W. F. Garland, the procrastinating methods of the Davidson Commission and other sins too numerous to mention.

Is it any wonder that recruiting lags under this accumulation of horrors?

Is it any wonder that men ask why should we go abroad to do the fighting and leave these fellows at home to do the looting.

A rumor is afloat that the Government is in no particular hurry about recruiting because it is hard put to it to supply the present demand for war supplies. Chairman Flavelle of the Munitions Committee complains that the manufacturers are far behind with their orders. They don't seem to turn out shells with the same zeal, speed and precision with which his own factories turn out sausages. If Chairman Flavelle looks closely into this he will find two reasons. One reason is that the Bertram Shell Committee spoiled things for the Munitions Committe by accustuming manufacture to a profit of nine hundred per cent. How generous the Bertram Shell Committee's idea of price was may be judged by the fact that Mr. Baillie, of Hamilton, who made a profit of one million dollars on his first order, could afford to be patriotic and hand back $750,000 to the Government as the difference between the manufacturers cost of shell cases and the price fixed by the Committee. Now that profits are more nearly normal, the manufacturers naturally do not show the same zeal to turn out enormous quantities in a tremendous hurry. The other reason—and Mr. Flavelle will not have to look far for it—is that the munition manufacturers, are not paying high enough wages to tempt skilled labor from other employments.

All of which is to say that the rich are making the gains out of this war while the poor have to take what they can get. The contrast between the ease and dispatch with which the munition manufacturer carries away his swag and the lingering red-tape which keeps widowed mothers out of their pensions is notorious. Only the other day a widowed mother in Toronto got a letter from the Pension Board saying that her application for a pension was refused because her husband had died a year later than her only son who was killed in action at Langemarck. That is to say the widowed mother was refused her pension because being deprived of both her supports she needed the money twice as badly. There's bureaucratic logic for you!

Another thing which chills recruiting is Camp Borden and its horrors. Camp Borden is the home of sunstroke, sand, sand storms and other discomforts. Its chief result is two-thousand desertions and an almost complete subversion of discipline among the soldiers stationed there. The only way to pacify the men is to promise that they will be sent overseas immediately. Thus it happens that a regiment goes to Camp Borden one week and leaves it the next. The shifting costs money. Camp Borden was designed as an all-year-round camp, but now it is announced that it will not be occupied in winter. The costly buildings will be allowed to run down, and the water pipes will freeze.

As for their registration scheme, it comes too late. It is only a ruse anyway. Its net effect will be to give a horde of party heelers soft jobs. Outside of that it looks like a general badge distribution, simply that and nothing more. While they are at it, the Government might issue a special badge for war profiteers, showing that they had got their bit and how much.

Ford

New Prices August 1, 1916

The following prices for Ford cars will be effective on and after August 1, 1916

CHASSIS . $450.00

ISSUE NO. 37, 1916

CURRENT COMMENT

Greece may be the next to jump, with Holland after her.

So far the United States has not joined in the war declarations.

Ambassador Gerard is being censured by the U. S. press for saying of the feat of the Deutschland: "Americans are convinced by nothing so quickly as success, and the captain and the builder of this ship scored a great political success for the German people." Why political?

To the 480,000,000 of francs which the Belgians pay annually to the German Empire as a war contribution, must be added the numerous fines paid to the military authority by the Belgian cities and towns. Thus, in 1916, Brussels was forced to pay off a fine, imposed arbitrarily, of one million francs; Ste. Josse-ten-Noode has had to pay 200,000 francs; Alost, 100,000 francs; Termonde, 50,000 francs; St. Nicolas, Lokeren and Deloe, 25,000 francs each; Deinze, 50,000 francs; Bruges, Tielt, Courtrai, Swevezele, Ruddervoorde, Thurnhout and several other cities, towns and villages, more or less important sums of money. The total amount of these fines exceeds ten millions of francs. To this must also be added the innumerable fines imposed upon private persons. So far no one has been fined for breathing, but some have had their breath stopped.

THE BALKAN CAMPAIGN.

Whatever must needs be done in the Balkans must be done quickly if a decision is to be reached before winter sets in, for winter there is of the old-fashioned sort, having terrors far more serious than have the winters in France or Flanders. Although the Roumanian plan of campaign has no doubt been laid out long ago in consultation with the Allies, there is considerable mystification as to its nature. Roumania in her thrust into Transylvania is acting in concert with Russia. She has taken the initiative here, fearing, no doubt, that Germany would attempt to make a swift dash into Roumanian territory as she did into Serbia.

While thus engaged against Austria it is not likely that Bulgaria will be forgotten. Gen. Sarrail appears to be moving slowly. His plan of campaign has not yet developed. He may be waiting on Russia to move, and then strike simultaneously. In the meantime Bulgaria is devoting her principal attention to attacking Greece. Her troops are reported to have captured Drama, in Northeastern Greece. Why she should waste her energies there, when her own borders are menaced, is something hard to understand.

With Roumania and Russia and the combined forces of Gen. Sarrail menacing Bulgaria, the latter's present attempt to capture Greek territory seems foolishness. What would gains here avail her when her own territory was overrun? Her present course looks like playing into the hands of the Allies, and it may drive Greece into the war against her.

Germany is unable to give Austria much help in meeting the onslaught of the Roumanian forces, and it is proposed that Turkey should lend her a few army corps. The line of battle has been largely extended just at a time when Germany was anxious to see it contracted. Roumania proposes to fight on the enemy's territory. She can do this all the better because her own territory has great natural protection as well as considerable fortifications.

PICTURE OF KITCHENER.

One Observer Writes of Him as Red, Ruthless and Resistless.

The following is taken from The Christian Worker, the parish paper of Calvary Protestant Episcopal Church, Toronto, N. C., which is edited by the Rev. Bertram E. Brown, brother, of the Rev. Dr. Wyatt Brown of Ascension Church, Pittsburgh:

I saw Lord Kitchener quite closely ten years ago, and it happened that I saw him at church. He sat in All Saints' Church, Cairo, and went through the service most devoutly. When he went out he passed within a foot of me and cast one lightning glance at me as I leaned over to see him well. He is a great giant of a man, with a sullen brick-red face, little pale, cold blue eyes, and moustache of tawny brindle. O. Henry wrote a short story of a New York shop-girl whose life was kept pure through the influence of a picture of Lord Kitchener, which she kept fastened in her mirror's frame. Had she seen the man himself she would have jumped out of the window. He might be taken as an incarnation of the genius of war, red, ruthless and resistless. Yet his face must be harder than his heart, for I saw him kneeling humbly and penitently in the Church of God.

NO WONDER.

(Baltimore American)

"That story about me was deliberately cooked up."

"Then I don't blame you for getting in a stew."

HARD TO BELIZVE.

(Yonkers Statesman)

Patience—I see it is reported that Maine last year recorded 4,222 marriages.

Patrice—It's hard to believe that when one considers that Maine is a summer resort.

Billy—Will you marry me? Milly—No! No. A thousand times no. Billy—Better be careful with that stuff. I might not ask you again.

Some housewives make the iced tea so weak that guests think it best to let it rest.

CROSS PURPOSES

Frank ran forward. It was his mother hurrying down the drive. "What is it?" he said.

"Oh, Frank!" she cried. "Oh, my dear boy! Those dreadful horses!"

"What's the matter? The new horses?"

"Yes. We went up Upton Lane because I wanted to inquire about Barker's wife—by the railway cutting, you know. She likes to see one, if it's only for a minute—at least she did like, poor thing!"

Frank stamped impatiently. "——Barker's wife!" he said. "Is anybody hurt? Is anybody dead?"

"She's dead—she died yesterday—nobody else."

"Oh, go on! go on! What happened?"

"Why, I went in just to speak to poor Barker——" Barker's final destiny was so nearly settled that Mrs. Leicester gasped and hurried on—"and the express rushed by—at least, I think it was the express—they shouldn't make them scream so, Frank; it isn't whistling, it's a downright scream—and the horses bolted down the lane to the left, and he couldn't hold them——"

"The lane to the gravel-pit?" said Frank, in a horror-struck voice.

"Yes! And Tiny and Mr. South! But they dashed against a bit of wall at the turning, and were thrown out."

"Are they hurt—much?"

"No, nobody hurt, only shaken. But oh, Frank!"

"The horses?" said Frank, greatly relieved.

"Nothing much. Robinson says it's quite wonderful. There's no harm done."

"What then?" Frank grasped his mother's arm. "There's something more. Tiny is hurt—I know she is! Why don't you say so?"

"No, she isn't; she isn't, indeed, nor Mr. South either."

"Well?"

"They are not hurt," said Mrs. Leicester, desperately, "but they're engaged to be married!"

"No, indeed; I was in the cottage when the train came. Oh, it's quite true, Frank. You know I really couldn't help it. Are you angry?"

"Angry!" he repeated; "why should I be angry? I'm dreaming, I think. It isn't a joke?" he said, suddenly, with a threatening frown.

"Oh; no, no. Is it wrong, do you think? What could I do?"

"Tiny and South!" said Frank. "Tiny! Well, if she likes him! I don't see why it should be wrong," he went on, bewildered, yet beginning to perceive how in some ways it might be marvelously right. "That's for her own people to decide. If they haven't any objection. But Tiny and South!"

"You are not angry, then? You don't mind?"

"No; why should I? If Tiny is happy, it's all right. But I don't seem able to believe it yet."

"Well, here is Mr. South," said Mrs. Leicester, more cheerfully. "Perhaps you'll believe him."

Frank looked up, and saw South coming across the grass. He was pale, but there was a peculiar brightness about his face. His eyes were shining; he smiled a little defiantly. Surprise is not the easiest thing in the world to encounter, especially if one is a little surprised at one's self. Gilbert had only just found himself out. Before Frank could take a step to meet him, Mrs. Austin, who had come up during the explanation, went forward swiftly and held out her hand.

"Gilbert, is this true?" she said. "I may congratulate you not only on your fortunate escape, but on your engagement, too?"

(Mrs. Leicester in the background arched her eyebrows and looked at Frank. "I had forgotten her!" she whispered).

South ceased to smile, but he met her questioning eyes honestly enough. "Yes," he said, slowly, "it's quite true." He looked at her as if he would have said more.

"Then I wish you all happiness—I wish it with all my heart," she replied. There was no tremor in her soft, clear, voice. "I think our old friendship gives me the right to be one of the first to congratulate you."

"Thank you," Gilbert replied, confusedly. He still held her hand, and looked anxiously at her as if he feared some hidden meaning in her words. "Mildred!" he said, and there was a world of pleading in his tone, "tell me——" he stopped short. What was he going to say?

"Believe me," she said, and he felt her fingers tighten on his in a kindly clasp as she spoke, "I have always wished your happiness—always. And I am glad to think that you have found it." And with that she nodded a smiling little farewell, and walked toward the house.

Gilbert gazed after her with a throb of regretful pain. He had known that it was impossible to go back to the old days; Mildred had taught him that. And yet, as he looked over his shoulder at the retreating figure, he had a strange fancy that it was the very past itself, the past which he had so long worshipped and from which he had so suddenly awakened, which was at that moment leaving him forever, a stately shape passing silently away, and never looking back. He would not have recalled her, since he could not recall the Mildred who believed in him and looked at him with happy hope in her eyes. It was Tiny who believed in him now. Mildred had no need of him. Tiny had called him "Gilbert!" in their peril that afternoon, and his heart had answered the innocently appealing cry, the name by which she had never called him, uttered as her one word then. Tiny had no need to grudge his old love that one backward glance. It was all over in a moment, and Gilbert drew a long breath, and went forward to receive Frank's congratulations.

They were rather briefly and bluntly given. Frank was eager to be gone; the picture which for Gilbert personified a softly sentimental regret was for him a vision of hope, which beckoned him to follow. He uttered such good wishes as came readily to his lips, and were suitable to anybody who was going to be married. He realized the accident by the gravel pit more clearly than the engagement, but he was too impatient and preoccupied to talk much even about that. "It's a mercy you weren't killed!" he said, shortly.

"Well, I suppose it was a narrow escape," Gilbert answered, with a smile.

"A narrow escape—yes, I should think so! It couldn't very well have been much narrower, as far as I can see. However, a miss is as good as a mile, I suppose."

"So they say," Gilbert replied; "but for my own part, I should prefer the mile next time. And so would your cousin, I fancy."

"Ah, Tiny knew what you were coming to! It's no wonder if she was scared, poor child!" said Frank. "There isn't a nastier place about here. By the way, I haven't seen Tiny yet." And he brushed past Gilbert and departed, as if to congratulate Tiny were the one object of life.

He went by the stable-yard, where he speedily ascertained that the amount of damage done was so absurdly small that there was nothing serious about the whole business, except what might have been. He cut Robinson's explanations short, and hurried to the house, where, as luck would have it, he met Tiny in the hall. She looked a little like Gilbert South, pale with agitation, and yet radiant. Her great brown eyes were shining, and her lips quivered with excitement, which might end either in sobs or smiles. "Oh, Frank!" she exclaimed; and she, too, looked up anxiously to see how the young master received the news.

"Well," he said, taking her hands in his; "this is a pretty afternoon's work! What will your people at home say, do you suppose?"

"Oh, my people at home They'll say what I say," Tiny answered, with a tremulous laugh. "I shall make them."

"And what do you say?"

"Oh, Frank, isn't it strange? I'm so glad, but I want you to say you are glad too. Frank, you do like him now, don't you? You are not vexed?"

"No, I'm not vexed, if you are happy. Oh, I like him well enough. But I think you ought to have had somebody younger," he said, doubtfully.

"Oh, no, Frank," Tiny replied, with great decision. "It doesn't matter the least bit when it's the man. If it were the woman now, it would matter; but not when it's the man."

"Well, you know best." And Frank released one of her hands. "I'm sure I wish you all happiness. It comes rather suddenly," he said, with a laugh.

"So it did to me," Tiny replied; "and I'm not sure he would have told everybody directly, but we were in the Barkers' garden; we couldn't go in, because poor Mrs. Barker is dead, you know, and we were waiting until they got something to bring us home——"

"Oh, that's where it was settled?"

"Yes," Tiny answered, with a conscious little laugh. "No; I think it was settled as we tumbled out, but that was where he said it properly. And your mother came round the corner upon us——"

"I see," said Frank.

"They do grow such a lot of southern wood there," Tiny went on, as the color rushed to her cheeks. "He leaned against the palings, and there was a great bush of it. He smelled like a Sunday school nosegay as we were coming back; but he says he shall always like it now."

The sight of Tiny alive, laughing and talking nonsense with quivering lips, suddenly brought the thought of her peril vividly before Frank. "Oh Tiny!" he said, "you might have been killed!"

"Don't," she said; "I saw it all—the gravel-pit, you know, just as we went into it one day; do you remember? Ever so long ago, almost the first time I staid here. I saw it all, as if there were a terrible light in it, and I said to myself, 'I shall die there!' And then I called to Gilbert, and I remember his face for one moment, and we got to the turning, and before we could jump out it was all over; and there we were, picking ourselves up and none the worse!"

"Thank God!" said Frank.

"Only so dusty; and somehow I felt very small when I found it had all ended in nothing at all."

Frank laughed "Never mind; it was better than being a smashed heroine."

"And it has ended in something, only a different sort of thing hasn't it?" said Tiny. "Where is everybody Frank? In the drawing-room?"

"Everybody?" No; I left him with my mother on the lawn."

Tiny made a face at him. "Oh, by the way, I know Mrs. Austin isn't there. I met her a minute ago on the stairs, and she kissed me and congratulated me. I say, who told her?"

"She heard my mother telling me, I believe."

"Oh, I wondered if Gilbert had. Do you suppose she minds much?"

"I don't believe she minds at all," said Frank. "Why should she? She told him she was very glad."

"I believe she does mind, though," Tiny nodded. "She was very fond of talking about old times."

"Rubbish!" Frank exclaimed; "you are as bad as my mother!" and he walked off, leaving Tiny happily convinced that it was impossible Mrs. Austin should not envy her the possession of Gilbert's love.

"Now or never!" he said to himself, as he went slowly up the stairs. His life hung in the balance, his heart was beating fast, and every throb brought him nearer the decisive moment. He turned into a little room where Mrs. Leicester and Tiny sometimes sat. He would lie in wait for Mrs. Austin there; she must pass the door as she went down.

Frank leaned against the window, looking at the dim undulations of the landscape, and vaguely recognizing familiar points. It was strange to stand in that little room which he had known all his life; he could remember learning his lessons there at his mother's knee, waiting for his fate to come to him. At any moment it might come, with a quiet step, and the soft sweeping of her dress in the passage. Before a dozen more of those strong heart-throbs were over, her eyes might be meeting his. She would look him in the face, he knew, but what would she say to him? Frank had never thought less of himself than he did at that moment, and yet beneath all his anxiety he had an unreasoning faith in his good-luck. Fortune had always been kind to him; people had always done what he wanted them to do. Yes, but Mrs. Austin was different. He dared not hope, and yet the mere thought that success was possible flushed him like a draught of wine. Then she would not be Mrs. Austin, but—Mildred; he would not have to count the days and nights as steps toward parting, they would all be his, other people would come and go, but she would stay. When she said "home" she would mean Culverdale. On that last thought he dwelt with exquisite delight, as if he could hear her uttering the word. It was the wildest dream, yet in a few minutes that dream might be his actual life; that was the wonder of it. And was not fortune smiling on him already? He had been afraid of Gilbert South, he had had misgivings about Tiny's troubled eyes, and now just at the right moment all his doubts and fears had vanished away, he was free to go to his love, and she was free to come to him. There could be no shadow of reproach or regret between them.

He heard her footfall in the passage; he called "Mrs. Austin!" It paused, and she appeared on the threshold of the open door.

He had been expecting and watching for her, and yet when she came in answer to his call, he felt as if he were taken by surprise, and had not a word to say. She stood in the doorway, waiting for him to speak, and on her delicate lips was that faint smile which seemed to Frank to be the sum of all the poetry in the world. "What is it?" she said. "Did you want me?"

"Don't go down for a few minutes," he entreated. "I have something to say to you!"

She looked unsuspectingly at him. "Some other time," she said; "I really must go to your mother."

"My mother? Oh, she will wait a few minutes for me!" And, before she could speak another word, Frank, with eager eyes and stammering speech, was telling the story of his love. Even as he looked at her pale, startled face, before she had opened her lips to answer him, he knew that he had failed. And yet failure, now that it had actually come, seemed so incredible that Frank tried to avert it, by repeating what he had already said, as if every second which elapsed before she spoke was something gained. But all at once he stopped short, with a sense of the utter uselessness of any words.

"Oh, I am sorry!" said Mrs. Austin, meeting his eyes with a simple, tender sorrow in hers. She might have looked something the same if she had inadvertently hurt some dumb creature in the Culverdale woods.

"Don't!" said Frank.

"I never dreamed of this—never! I'm more sorry than words can say if anything I have said or done——"

"No!" Frank exclaimed. "You have done nothing wrong. If I'm a fool, I don't know that it's my fault, but I'm sure it isn't yours."

She could not help smiling, so gentle a smile that it could not wound him. "You must not think of this," she said. "It can't be. For one thing, you must remember that you are a young man, and I am an old woman. You will choose better one of these days—you have your life before you." She added, after a moment, "Mine is behind me—at least the best of it."

"Don't talk like that!" said Frank. "What do a few years matter one way or the other? I would be older if I could, of course." (He could wish to be changed, but he could desire no change in her.) "But I shall grow older," he said, trying to laugh.

She shook her head. "And so shall I!"

"If that is all," he exclaimed, hotly, "it would be cruel——"

"But it isn't all. Believe me, Mr. Leicester, what you ask is impossible."

"I know I'm not good enough; but isn't there anything I could do? If I tried to get into Parliament, should you like me to do that?" said Frank, desperately. His hurried thought caught any possible advancement that might make him more worthy in her eyes. "I'm not clever, of course, but surely a man must be good for something if he tries with all his heart. Tell me what you would like me to do, and I'll do it!"

He stood opposite her; his face was pale and keen with excitement; he looked so roused, so manly, so earnest, that for one moment the thought crossed Mrs. Austin's mind that, if fate had but sent Frank instead of Gilbert into that earlier life of which she had spoken, he might have become such a hero as she had dreamed. But it was only a passing thought. Something told her that Frank, as he spoke, touched the highest point of which he was capable. It might be that he, too, felt that at this moment the flood of passion and resolution reached its limit; but he believed that the wave, if not repulsed, would have force enough to carry him onward through the lower waters of his later life.

"I think you are good for a great deal," he said; "but that isn't the question. You must believe me when I tell you that I am very sorry, but what you ask me can't be."

"You are quite sure? There is no chance for me?"

She paused for a moment, looking at him. Then, as if it pained her to speak that last word, she answered with a little negative movement of her head.

The eager expression died out of his eyes, and his face relaxed. "Very well," he said. "Then I suppose there's nothing to do but say goodbye." He seemed to be making an effort to master himself, and Mrs. Austin looked aside at the window and waited till he should speak again.

"See here," he said, after a brief silence, "I shall tell my mother I have to go up to town on business this evening, but that I'm coming down to-morrow morning. I shall get away so, without any fuss, and to-morrow I shall telegraph that I'm detained, and I sha'n't come back for a day or two."

"Yes, I understand," she answered. "This is good bye. And when we meet again, I hope——"

Frank had taken up a pencil which happened to be lying on the table, dropped it, and stooped to find it on the floor. He rose with a slight flush on his cheek. "People don't always meet," he said. "Sometimes it's years first. Perhaps we never shall meet again."

"Perhaps not. That is possible, of course." Mrs. Austin was a little puzzled by his manner.

THE END.

There are two bores in society—the woman who knows too much and the woman who knows too little.

Nearly Every Girl Can Make Herself Pretty and Attractive

SOME WHOLESOME TRUTHS EVERY GIRL SHOULD THINK ABOUT.

Probably you know just such a girl.

Perhaps she is sixteen—good to look at, and pretty—quite interesting because she reflects the graces and charm that give promise of happiness to herself and others. But she is not strong. The color in her cheeks, once so rosy, has faded away—her eyes are listless—the buoyancy of spirit and vigor she once possessed are sadly lacking. Parents, friends, this girl needs Ferrozone—needs it that her blood may be renewed—needs it to restore the nerve force that growth, study and the development of her fresh youth have exhausted. This girl will become a queen with Ferrozone—which will restore her color—bring back her old-time energy—give brightness to her eyes and vivacity to her spirits. In Ferrozone every girl finds strength—then she can do things. In Ferrozone there is endurance—that drives away morning tiredness and languor. For the girl or woman that wants to be happy, healthy, winning—who values rosy cheeks, laughing eyes and abundant good spirits, nothing can compare with Ferrozone. 50c. per box, or six for $2.50. Get it to-day from any dealer in medicine, or by mail from The Catarrhozone Co., Kingston, Ont.

TOMMY'S SLANG.

Some of the Phrases Which Are Current at the Front.

The following are some of the slang words used by the men of the British army on active service given by Thomas O'Toole, in his book, "A Way They Have in the Army.":

Atcha.—All right.

Badgy.—An enlisted boy.

Baggies.—"Tommy's" name for sailors in the navy—obviously a reference to the sailor's wide trousers.

Blighty.—Home.

Bobtack—Powder mixed into a paste to clean buttons and brass work on equipment.

Dobygee.—A soldier cook. In India a native one.

Bundook.—A rifle.

Bun-Wallah.—A soldier who drinks nothing stronger than tea, and is, in consequence, supposed to eat voraciously of buns.

Chips.—The "Tommy's" pet designation for the regimental pioneer sergeant, who is usually by trade a carpenter.

Chuckling a Dummy.—When a man faints on parade he is said to have "chucked a dummy." The term is also applied to men who report ill without reasonable cause.

Dog's Leg.—The first stripe a man receives on promotion.

Doolally Tap.—When a soldier becomes mentally unbalanced he is said to have received the "Doolally tap."

Gravel Crushers.—Infantry soldiers.

Muckin.—Butter.

Quarter Bloke.—The irreverent way in which the officer holding the rank of quartermaster is referred to.

Rookey.—A recruit.

Rooty.—Bread.

Scrounger.—A man with plenty of resource in obtaining that which he wants.

Slingers.—A meal of bread and tea.

Square Pushing.—Courting.

Square Bit.—A best girl.

Stir.—Imprisonment in a military detention barracks.

Swinging the Lead.—This is the equivalent of the civilian expression, "Telling the tale."

Tin Opener.—This is "Tommy's" light hearted name for his bayonet.

Vamping.—Eating heartily.

Yob.—One who is easily fooled.

SAVE THE CHILDREN

Mothers who keep a box of Baby's Own Tablets in the house may feel that the lives of their little ones are reasonably safe during the hot weather. Stomach troubles, cholera infantum and diarrhoea carry off thousands of little ones every summer, in most cases because the mother does not have a safe medicine at hand to give promptly. Baby's Own Tablets cure these troubles or if given occasionally in the well child will prevent their coming on. The tablets are guaranteed by a government analyst to be absolutely harmless even to the new-born babe. They are especially good in summer because they regulate the bowels and keep the stomach sweet and pure. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Rain Tree of Tropics.

The rain tree of the tropics has been wrongly credited many times with the quality of shedding water in such great quantities that it takes the place of an artificial irrigation plant. The common English name, rain tree, and its Spanish equivalent, arbol de la lluria, probably owe their origin to the fact that the "sleep," or closing of the leaflets, is a very conspicuous phenomenon at the approach of and during rains, as well as at night. In the Philippines, where it is by far the commonest shade tree found in the larger towns, the rain tree is commonly known as "acacia." In Hawaii it is called "monkey pod."

Minard's Liniment Cures Distemper.

Did as He Was Told.

One evening, just as it was getting dusk, a laborer walked down the main street of the city. Coming to a poultry dealer's place, he stopped and gazed admiringly at the fowls and game displayed on the window slab. One turkey of about fifteen pounds weight took his fancy. After running his fingers through the coins in his trousers pockets a few times he decided on having that turkey. Picking it up he entered the shop. The shopman was very busy. "Jest weigh this bird for me, will ye?" said he. "Why don't you take your bird somewhere else to be weighed?" snappily replied the poulterer without looking up. "Oh, I kin do that all right," he replied, cheerfully picking the bird up and walking out with it.—London Tit-Bits.

Laziness travels so slow that poverty catches up.

HUNGRY ALL THE TIME.

In Other Ways, Too, the Earthworm is a Curious Feature.

Midnight is the favorite play hour for earthworms. To catch a glimpse of them in the daytime you'll have to dig in the earth, which is their home, or watch for them after a heavy rain, when they can be found on top of the ground. But go out any warm night with a lantern, lie close to the ground on a lawn or terrace, and you'll probably see them in abundance.

Probably you've regarded the earthworm merely as a good fish bait and have never taken the trouble to learn his habits. When he's prowling around at night he's usually enjoying a feast on decaying leaves, grasses or animal matter. Before daylight he's back in the ground, burrowing his way in search of more food. His alimentary canal extends from one tip of his body to the other, so it's little wonder he's always hungry.

He has neither ears nor eyes, yet he's sensitive to light, and he knows when night comes just as other creatures with eyes. Another interesting fact is his method of laying eggs. He grows a band around his body like a belt, in which he deposits the eggs. Then he gradually works his way through this belt until he slips it off, when it closes up and forms a capsule to protect the eggs until they are hatched.

Vegetable growers sometimes regard the earthworm as a nuisance. They should be thankful, however, that those of North America are not so large as those in South Africa, where there are earthworms four and five feet long, and as thick as a man's finger.

Lame Back Strengthened Stiffness Taken Right Out

WAS RELIEVED IN AN HOUR AND CURED OVERNIGHT.

A lame back? Quite unnecessary. All you have to do is to rub on Nerviline, it is simply a wonder for backache—relieves after one rubbing. Nothing possibly could cure an aching back faster than Nerviline," writes Mrs. Arthur Kober, of Lower Chelsea, N. S. "I caught cold and was so prostrated with pain that I could not bend over. We always have Nerviline at home, and I had the painful region rubbed thoroughly with this grand liniment. At once the pain departed. The lameness was rapidly reduced, and in an hour I was able to be about my housework. I was rubbed again just before retiring, and awoke as usual in the morning without a sign of my back trouble."

There is no sort of muscular pain that Nerviline won't cure quickly. Thousands swear by it for rheumatism, neuralgia, sciatica and lumbago. It sinks to the core of the pain—right through muscle, tissue and nerve—it penetrates where no oily, greasy liniment can go, and invariably cures quickly. If you have an ache or a pain anywhere—use Nerviline—it will cure you. Family size bottle, very large, 50c; trial size, 25c, at all dealers.

Quietly Vanished.

The advantages of a glass eye give the point in the following joke:

A few days since a traveler for an optical instrument house called at a shop in Manchester, and while exhibiting his samples produced a box of artificial eyes of all colors and began to descant upon their superiority.

While enlarging ponpously upon the beauty of his goods, a little man broke in with:

"You may talk about your goods being the finest in the market, but can you prove your assertions? No, sir, you cannot. Just look at this left eye of mine if you would see perfection."

The optical man examined it closely and with a half sneer in his voice asked:

"Where did you get that eye?"

"Got it in London."

"Well, sir, I can assure you that you didn't get it from our house."

"No, I got it at another place."

"Exactly; such botch work as that is never allowed to leave our factory. The least defect of an eye condemns it, and yours is full of blemishes. In the first place, it is of to light a shade to match the other one and anyone can see that it is a size too small for you. Again, it is not natural in its appearance. It will deceive no one. Its artificial points creep out on every side, and it has not one single aspect of the natural eye. How long have you worn it?"

"Ever since I can remember. You see, I was born in London, and this eye was born with me. It's a natural one, and a mighty good one, too."

The eye man picked up his samples and faded from view.—Tit-Bits.

Minard's Liniment Cures Colds, Etc.

Saurian Delicacies.

Could you eat a lizard?

Many tribes in Africa eat lizard with relish.

The gray lizard is baked and fried in South Portugal.

Those who have eaten lizard say it tastes like chicken.

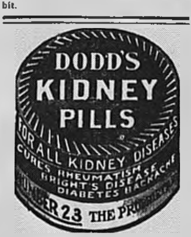
The great aquatic lizard (the crocodile) is said to taste like veal.

Crocodile flesh is publicly sold in the meat markets of Sennar, in Africa.

Carcasses of crocodile are hung up for sale to consumers in the butchers' shops in Siam.

Crocodile and alligator eggs taste like duck eggs, and are much prized as a table dainty by the Siamese, it is said, and also by the natives of Madagascar.

Certain inhabitants in South America value the alligator, or cayman, as food, boiling it and frying it in butter, the flesh being not unlike that of rabbit.



PILES.

You will find relief in Zam-Buk! It eases the burning, stinging pain, stops bleeding and brings ease. Perseverance, with Zam-Buk, means cure. Why not prove this? All Druggists and Stores.—50c box.

Zam-Buk

One Gladstone Interview.

An amusing glimpse of the famous statesman Gladstone was once given by John Murray, of the publishing house which issued many of Mr. Gladstone's writings and speeches. "The last time I was at Mr. Gladstone's house," said Mr. Murray, "I had breakfast early and alone, as I was going to Scotland. When I had finished I was told that Mr. Gladstone did not know that I was leaving so early, and that he wanted to have another talk with me. I went to his bedroom—a very large room, with a double bed in it. Mrs. Gladstone was in her dressing room.

"Gladstone was dressed in a nightgown with a brown shawl round him. He was lying flat on his face, his head at the foot of the bed and his feet on the pillows. In one hand he held a cup of coffee, and there was a book in the other. I shall never forget that interview and the comicality of the great lion head popping up as I went toward him."

Minard's Liniment Cures Garget in Cows.

STORE OR STAGE?

A Word to Ambitious Young People Seeking a Future.

There is just as much demand among store owners and managers for high-class salesmen, buyers and managers as there is among the theatrical and movie producers for actors. Merchants want to employ ambitious young men and women who can raise themselves above the ranks of the ordinary. The work is no harder, hours no longer and pay quite as good in the stores for help of all classes as it is in film or stage productions.

The "stars" in business are just as well paid as are those whose names grace the billboard. Where there is one film favorite who is paid $1,000 a month there are half a dozen mercantile managers who receive as much or more. There are hundreds who receive $200 a month to where there are five movie actors who receive the same. And there are ten dollar a week places among the members of the mob scenes, as there are ten dollar a week jobs among the "mobs" in the stores. Once a year or so some one graduates from the chorus or the "supes" to a place as an understudy or star, while in business many are promoted from the ranks to positions of trust and good salaries.

There are better opportunities for ambitious people in mercantile fields than as actors. The demand is many times greater. Owners are always on the watch for some one who will justify a promotion. But positions cannot be had without effort. They must be won by hard work, study and an overwhelming desire to get ahead. At all events we say, Stick to the store.—Farm Machinery.

"Dost Thou Love Pictures"?
--Taming of the Shrew

In addition to our large stock of Antique Furniture, China and Glassware, we have a very choice collection of paintings of more than ordinary merit, which we are always pleased to show to lovers of art. When in Hamilton you will enjoy spending some of your time looking over our collection of Bric-a-Brac, Paintings and Antique Furniture.

Robert Junor
62 King St. East, Hamilton, Ont.
The House for Gifts.

Odds and Ends of Silk.

Look through your bag or box containing odds and ends of embroidery silks and let them prove useful in ornamenting guest towels and other things. It is well to have a few little towels on hand, not only for home use, but to be showered on girls whose engagements have been announced. The most attractive towels can be made by embroidering across their ends little French knots made from the various flowers. These can be filled in with corded silks. The result is really very satisfactory.

Minard's Liniment Cures Diphtheria.

Used Like Solder.

A soft alloy, which adheres to metal, glass and porcelain, and can be used in the same manner as soft solder, is prepared from powdered copper (copper dust), which may be obtained by stirring a solution of blue vitriol with granulated tin. The solution becomes considerably heated, and a brown powder is precipitated. Of this copper dust 20 or 36 parts by weight, according to the desired hardness of the solder, are mixed in a cast iron or porcelain mortar with sulphuric of 1.85 specific gravity, to the consistency of paste, and 70 parts of mercury added with constant stirring. When the amalgam is thoroughly mixed it is carefully washed with water to remove all trace of acid, and then cooled. In 10 or 12 hours the mass becomes very hard. When the solder is to be used it should be heated to about 400 degrees Fahrenheit, in which condition it can be kneaded like wax in an iron mortar. In this plastic state it is applied to the broken surfaces, which are then pressed together and when cooled the amalgam adheres very firmly.

Billy—Will you marry me? Milly—No! No. A thousand times no. Billy—Better be careful with that stuff. I might not ask you again.

HELP WANTED.

WANTED—GIRLS TO WORK ON knit underwear—seamers and finished stitchers preferred. We also teach learners, any girl with good knowledge of plain sewing; good wages; ideal factory conditions. Zimmerman Manufacturing Co., Ltd., Aberdeen and Garth streets, Hamilton, Ont.

WANTED — HOUSEMAIDS AND waitresses. Previous experience not necessary. Apply "The Welland", St. Catharines, Ontario.

WANTED—BY THE 3RD OF SEPTEMBER—good competent general servant, no objection to child over 4 years. Apply Mrs. Alex. Murray, 94 Duke St., Hamilton, Ont.

MISCELLANEOUS.

WANTED—GIRLS OF GOOD EDUCATION to train for nurses. Apply Wellandra Hospital, St. Catharines, Ont.

LADIES WANTED.

TO DO PLAIN AND LIGHT SEWING at home, whole or spare time; good pay; work sent any distance; charges paid. Send stamp for particulars. National Manufacturing Company, Montreal.

GIRLS WANTED

Experienced knitters and loopers, also young girls to learn. Clean work and highest wages.

CHIPMAN-HOLTON KNITTING CO., LIMITED,
HAMILTON, ONTARIO.

RABBITS FOR SALE.

RUFUS RED BELGIAN HARES; Grey Flemish Giants. Fully pedigreed. All ages. D. C. Waters, 170 Jackson street west, Hamilton, Ont.

FOR SALE.

FOR SALE—PLANING SAW AND Chop Mill; doing good business; also motor truck, 1 1-4 ton capacity, in No. 1 condition. Apply to John McCormick, Lawrence Station, Ont.

Flower of the Air.

There is a plant in Chile and a similar one in Japan called the "flower of the air." It is so called because it appears to have no root and is never fixed to the earth. It twines around a dry tree or sterile rock. Each shoot produces two or three flowers like a lily—white, transparent and odoriferous. It is capable of being transported 600 to 700 miles and vegetables as it travels suspended on a twig.

Minard's Liniment Co., Limited.

Gentlemen,—Last winter I received great benefit from the use of MINARD'S LINIMENT in a severe attack of LaGrippe, and I have frequently proved it to be very effective in cases of inflammation.

Yours,
W. A. HUTCHINSON.

A Handful of Hints.

Screw eyes placed in the tops of handles of brooms, brushes and mops, so that they may be hung on hooks in a closet, will allow a neater arrangement of the cleaning utensils.

If you wish to turn your pink hydrangea into a blue one, bury an old iron close to the roots. Planting it in a small zinc tub will bring about the same result.

When the screw top of a bottle refuses to turn, try putting the top of the bottle between the door jamb and the kitchen floor. Close the door so that the bottle top is held securely, then twist the bottle and it will usually yield easily.

Chinese gloss starch is made of two tablespoonfuls of raw starch and one tablespoonful of borax dissolved in one and one-half cupfuls of water. Garments are dipped in this, rolled tight and left in a dry cloth for a few hours before ironing.

Any woman who owns a sterling or German silver purse will be glad to know that common baking soda will clean it in a few minutes. It is used by many jewelers for this purpose. Just take plenty of soda and a little water and wash between the hands or with a brush. Rinse dry.

Mystifying Chemical Trick.

A plain blue handkerchief is shown to the audience. When the handkerchief is warmed it turns white and when cooled resumes its former color.

Make a starch paste and add enough water to the paste to thin it. Then add sufficient tincture of iodine to color the liquid blue. A few drops will be enough. Dye a white handkerchief with this blue liquid, and when the handkerchief is dry it is ready for the trick.—Popular Science Monthly.

All the eye specialists in the world wouldn't enable some women to see through their own husbands.

Get the "Peaches" that are coming to you in the peach season—but be sure to eat them on Shredded Wheat Biscuit with cream a combination that ensure good digestion, health and strength for the day's work. Cut out meat and kitchen worry and serve this ready-cooked, whole wheat food with the choicest fruit that grows—a dish for the up-and-coming man who wishes to keep at top-notch efficiency for work or play. Serve it for breakfast or any meal with milk or cream with sliced peaches or other fruits.

Nature Compensating For War's Heavy Toll

(By James J. Walsh, M.D., Ph.D., in New York Herald.)

In spite of some rather pessimistic prophecies as to the very unfortunate effect which this war was to have upon the population of Europe by depleting it of its best young blood, there are some very interesting vital statistics from practically all the warring countries which contradict many of the worst portents. The facts that have been gathered by various government bureaus serve to show how well human nature reacts favorably even against the most serious physical conditions. The recent report of the English registrar general for England and Wales is especially significant in this regard, though it only confirms in detail reports of similar character from other countries at war. It illustrates the moral aspects of nature's many compensations for the physical defects and losses of life.

INCREASE IN THE MARRIAGE RATE.

Probably the most notable feature of this latest registrar general's report is a distinct increase in the marriage rate during the last two years. The marriage rate had been going down for years in England, and the first part of 1914 indicated that that decrease was to be maintained for that year also. Then came the war, with a prompt rise in the rate, which continued to be felt till the end of the year, so that the marriage rate was the highest recorded since 1907. There was actually about one more marriage to every thousand of population than the average marriage rate of the decade from 1901-1910. During 1914, as a consequence of this increase, very nearly sixteen persons out of every thousand of population entered the marriage state.

It might well be thought that this notable increase in the marriage rate in Great Britain commencing just after the outbreak of hostilities, making that year the banner marriage year of the twentieth century in England and Wales up to that time, was only the result of troops leaving, causing the anticipation of many marriages which would otherwise have been delayed so as to fall into the subsequent year's statistics. This would be only robbing Peter to pay Paul then, and the subsequent years statistics might be expected to show a distinct decline even below the constantly decreasing figures of recent years.

Here in the United States as the result of the mobilization of the militia of the various states we have had a similar anticipation of marriages that undoubtedly will add not a little to our marriage rate for this year, though nothing like the same extent as in England and Wales. There the slogan "England expects every able-bodied man to do his duty" gradually led to the enlistment of by far the greater portion of the men between the ages of eighteen and forty-five, which is especially the period of marriage, and brought off many matches that were hanging fire. In England, as here, doubtless many couples whose thoughts had only been vaguely turned in the direction of matrimony found themselves pressed urgently to it by the impending leaving home of young men who might not have married for several years only for the special conditions created by the war.

WAR'S CONTINUING EFFECT.

Mars and Cupid seem to have much more close relationship to each other than merely the enforced rapprochement of the early part of the war, when impending but as yet apparently distant marriages were brought to a head, for the marriage rate of England and Wales had continued high all during the progress of the war. The English registrar-general's formal report for 1916 is not yet available, but he has published the provisional figures which show a further rise of 3.5 per thousand, that is to say, some seven more persons out of every 2,000 of the population got married in 1915 than in 1914, and the total number of marriages was a record for the country.

FEWER UNMARRIED WOMEN

The women in Great Britain, as indeed in all the civilized countries, greatly outnumber the men. As the beginning of the war the registrar estimates that out of a total of almost exactly 37,000,000 of people in England and Wales there were slightly more than 19,000,000 of females and somewhat less than 18,000,000 of males. There was an actual excess of females of a little more than 1,200,000. The improvements in sanitary affairs in recent years has preserved many more females to the child bearing and marrying age than before. In the last four decades this factor has added one in 100 to the marriageable females of England, but the number of them actually married his fallen very nearly two per cent. In the same time, from 49.6 per cent. to 47.7 per cent. There used to be about one husband for one out of every two marriageable women, which seems little enough, but even this ratio was falling, until now the war has given a husband to a little more than one out of every two of the women of child-bearing age.

The increase in the whole number of marriageable women alive, which has been making itself felt for more than a generation now, without a corresponding increase in the number of marriages, so that the number of old maids was constantly growing and more and more women could not find an available husband, is now at last met by the effect produced in the minds of the men and women of the country by the war.

phases of the marriage question as seen in war time illustrate this suggestion very strikingly.

MARRIAGES OF CRIPPLED SOLDIERS.

Probably the most interesting feature of the marriage situation in England, where its decided increase in the percentage of marriages to the whole number of the population, is the very large number of crippled men who have found wives ready and willing to take them. This fact has also been noted in all the countries at war. Not only have men who went away to the war already engaged to be married

PSYCHOLOGY OF THE INCREASE.

There has been no little discussion as to the reason for this greater frequency of marriage in war time, which has been noted before the present conflict. Some have been flippant and have suggested that more men and women were willing to marry provided they do not have to live together. Others have been sentimental, and have suggested that it is the emotional state of mind produced by the war flowing over into other activities that has increased the number of marriages. But generally it is felt that the seriousness of life, as emphasized by the war and its dangers, has reacted to make men and women readier to face the serious side of life and its duties, found that when they returned even sadly crippled for the future struggle for existence their fiancees were almost without an exception ready to marry them, apparently without a thought of their handicap; but a great many crippled soldiers, nursed back to health and strength of body as far as their injuries would permit, have encountered among their volunteer nurses or among those who were trying to be of assistance to the wounded soldiers noble women who were ready to be of help for all their after life.

The women, and above all is this most noteworthy among the younger women, have felt that the sacrifices made for country and the common good by the soldiers deserved corresponding sacrifices on the part of those who really sympathized with the cause for which the soldiers had been so ready to pay the full measure of devotion. Even the helpless, for whom the outlook of taking any active part in life is distant or out of the question, have often found women ready to bind themselves for life to the task of being helpmates. The blind have been particularly fortunate in this regard, and some of those who in addition to the loss of sight have suffered from serious disfiguring wounds of the face, which might have been expected to prove almost surely deterrent and above all preclude all question of matrimony, have sometimes found themselves taken up by affectionate women who hoped to make life easier for them.

The maxim "pity is akin to love" is very old, but it has had abundant exemplification in this latest of wars. The maimed, the halt and the blind and even the sadly disfigured have been consoled by the presence of a pity that they saw grow and deepen into love. The French will have their joke and, daring so nobly and wholeheartedly as they have, it comes with all the better grace from them. Even with regard to their wounded soldiers they have not felt it necessary to preserve an invariably solemn mien. They have spoken of putting legless men on their feet again by teaching them new trades, and they have declared that these half portions of humanity, the cripples, may well prove satisfying marriage dishes for devoted women.

MALE BIRTH PREDOMINATE.

As is well known, at all times, as if to compensate for the higher death rate among males because of the dangers of their occupations and their exposure to fatal accidents of many kinds the male birth rate is always considerably above that of females. War adds to this always, though, as we discussed in a previous article in the Herald, it is not quite clear why it should. The influence of the war in this regard was noted at once in England. The total number of births recorded in England in 1914 was 879,093. Of these 447,181 were of males and only 431,912 were of females.

Though there is considerably in excess of a million more females than males in the country every year, there were of late years some fourteen thousand more males than females born each year, and during the first year of the war this proportion in favor of the males rose to be well above fifteen thousand. While there are nearly twenty females to every eighteen males in the population, more than thirty males are now born to every twenty-nine females.

The birth rate in England has not declined nearly so much from the war as it was feared and prophesied that it would. Birth rates have for years been highest in Wales, and next to that in Lancashire, Cheshire, Yorkshire and the counties north of them, and much the lowest in the south. Births have been by far most frequent in the country districts and the smaller towns near the farming regions, and lowest in the cities and larger towns, especially those of the manufacturing areas of the country. Compared with 1913 there was an actual increase in the birth rates of the rural districts and in the smaller towns of Wales as well as in the country places and the country boroughs of the north. Unfortunately, however, there has been an increase in the death rate among infants under one year of age, owing, doubtless, to the disturbing influence of the war because of high prices and the difficulties of nutrition, which has more than counter balanced this increase. With the increase in the marriage rate this rise in the birth rate in certain favorable parts of the country has been a source of no little encouragement.

The notably increased birth rate of Wales since the war, taken in connection with the significant jump in marriage figures, has made many feel that there are compensations in store for the warring nations that will tend to restore equilibrium in the populations and make up even for all the sad losses of young men in the war much better and sooner than many prophets of evil have ventured to declare.

WAR PIGEONS.

Flying From France to Yorkshire With Messages

The announcement of the War Office that a large number of homing-pigeons are being utilized for naval and military purposes, and that many of these have been shot at and killed or wounded when homing to their lofts by ignorant people, calls attention to the value of the work of these winged messengers.

The pigeons referred to by the War Office are, in the majority of cases, birds offered to the Government by a large number of patriotic pigeon-fanciers. Wireless, aeroplanes, and telephones have supplanted the use of pigeons for various war purposes on the Continent, and the British Admiralty, which up to a few years ago had a pigeon service in a loft in the south of England, discontinued it on account of the introduction of wireless. Lately, however, pigeons have been found rather useful for certain kinds of work, and it is well known in east coast shipping circles that the British fleet in the North Sea found panniers of trained homing-pigeons on board German trawlers at an early period in the war.

These pigeons are able to fly tremendous distances in an incredibly short period of time.

The best record for long-distance flying in Great Britain is held at present by Messrs. Vestor and Scurr, of Spennymoor, in Durham, who possess a pigeon named Prince of Rome which flew from Rome to its loft in 1913, a distance of 1,093 miles, when competing in a test race. A bird, King of Rome, owned by Mr. C. H. Hudson, of Derby, flew in the same race, and won it by flying a distance of 1,001 miles in much less time than the Durham arrival. A hen pigeon, Her Majesty, flew from Bordeaux, in the South of France, to her loft at Aberdeen, a distance of 851 miles, but took several days over the journey.

A very satisfactory feat was performed by a bird owned by Dr. Barker, of Clitheroe, Lancs, which, when liberated at Mirande, in the South of France, flew home to Lancashire and entered its loft the day following the toss.

The first English-bred bird to fly from Spain to England was a dark chequer cock named Alfonso, which in 1907 flew from San Sebastian to the loft of its owner, Mr. T. H. Burton, of Liverpool, a distance of 705 miles, homing on the third day following the toss, and thus winning the first prize in the Manchester Flying Club. Before the war birds frequently flew from Rennes, in France, to Yorkshire lofts, and reached home the same day as the toss or, in bad weather, early the next morning.

Silk jersey sport coats are very modish at present. Among the attractive combinations is this one, green stripes on a white ground.

WHITE OF THE MOON.

What Causes Fair Luna, in Its Color, to Rival Pure Snow?

The moon has no light of its own and shines through being illuminated by the sun. What sort of surface must the moon have to reflect the light so whitely as it does? This question is put forcibly in a letter to Nature from J. Evershed, of Srinagar, Kashmir, who describes the moon as far whiter and more brilliant than the snow clad summits of the Himalayas when these are still lighted by the sun. He writes:

"Why does the moon appear so white if it is composed of rocks similar in reflecting power to those on the earth? The rock surface of the moon should reflect far less light than the cloudy surfaces of Venus and Jupiter, and it would be of interest if those who know would explain the apparent whiteness of the moon as seen in daylight.

"A direct comparison of the moon with terrestrial rock surfaces illuminated by sunlight is possibly to some extent vitiated by the superimposed blue light scattered by the intervening air, which may affect the color of the moon. Yet it is very difficult to believe that this can convert the grays and browns of rock surfaces into an almost pure white.

"On several occasions in this valley I have compared the waning moon, setting behind the Pir Panjal mountains, and, of course, in full sunlight, with extensive snow fields. These snows are perhaps fifty miles distant, and there is a considerable amount of blue scattered light superposed on the snow, although less than on the moon. Also the light absorbed by the atmosphere is approximately and may be exactly the same for each if one considers the whole path of the light from sun to snow and thence to the observer. When the air is transparent enough to see the moon clearly it appears to me to be distinctly whiter than the snows, which seem dull and yellowish in comparison."

Mr. Evershed throws out the suggestion that the moon's surface may be covered with ice.

True Fish Stories.

The Cyclosoma negrofasciatus will fight with the savage tenacity of a bulldog, and will leap high out of the water in pursuit of a tantalizing finger.

The walking perch from India will climb out of the aquarium and take a stroll around the floor looking for another pool unless you put a wire over the top of his home.

The shischigashira has a round fat fewple body, topped with a chubby-cheeked cherub head, with the tiny eyes, small mouth and nose of a human being. Its coloring is marvelous, and it is considered sacred in Japan.

The angel fish is wider than it is long, and has a chameleon like quality of changing its color at will.

The Indian gouramis has arms with which it feels its way about or inspects anything new in the aquarium.

There are tailless fish and scaleless fish and fish without fins, blue fish, pink fish, lavender fish and parti colored red, white and blue fish, but they are all goldfish, especially as to price.

Muggins—I wonder, what has become of the old-fashioned woman who used to cut out scraps of poetry. Buggins—She has probably disappeared along with the old-fashioned woman who used to cut out scraps with her husband.

Chats With the Doctor

BY A PHYSICIAN

HOW MUCH SLEEP?

Many people seem to think that the more sleep a person has the better. This is a great fallacy. For while a certain amount of sleep is absolutely necessary for health and even for life, any sleep beyond what is really necessary tends to enfeeblement of the mind and the general decay of the vitality. Babies who are by every kind of artificial means hypnotized into a state of almost continuous sleep, may grow fat in body, but nearly always sluggish in mind and slack in muscle. It is rare indeed to find a child or youth, or a man or woman, who habitually sleeps twelve or fourteen hours out of the twenty-four who is not mentally below the average and obviously lacking in physical energy and initiative.

Needless to say, there are exceptions to this rule, but they are so few as not to affect its general truth. Of course it would be folly to jump to the conclusion that the less sleep the better. Except in extreme cases, it is as absurd for a healthy person to take elaborate artificial means to keep awake as to take elaborate measures to oversleep. The evil generally begins in the nursery. Mothers and nurses, bored with the baby in their keeping, and anxious to get on with their work or their amusements, adopt all known expedients to keep the baby in a state of profound slumber. Lullabies, cot swinging, rocking, overfeeding, every known means for the destruction of consciousness and the promotion of continued lethargy is tried in turn. At first, that is during the first month or so of its life, a healthy baby will generally need and have about twenty-two hours' sleep out of the twenty-four. But, even then, the two or three hours during which it is normally awake, are of great importance to its development. The proportion of sleep to wakefulness should gradually lessen, until by the time it is a year old it should be awake for six to eight hours out of the twenty-four. Gradually the amount of sleep needed lessens, so that on the average we may say that by three years old a child should sleep about fifteen hours a day, by six years old about thirteen hours, and by nine years old about ten hours. From then up to the age of about eighteen from eight to ten hours are nominally required, and eight hours is about the amount which adults may wisely spend in sleep.

Old people sometimes sleep very little; in other cases excessively. There is naturally a very great variation between individuals in old age. In one type a period almost of second childhood naturally occurs, and such individuals seek and need an increasing amount of sleep. Their mental and physical activities, however, will be found steadily to decline. Others, of a more alert order, sleep almost too little, indeed may suffer from insomnia; in such cases a little artificial inducement to sleep may be desirable. Except in pronounced specimens of these two types we may lay it down that in old age about ten hours' sleep a day is that most compatible with a high state of mental and physical health. In attempting to modify one's practice in the matter of sleeping hours the overwhelming influence of habit should be remembered. We may cultivate the habit of going to sleep at a particular time, of waking at a particular time, or of sleeping or waking under particular conditions or at particular signals.

GASTRIC ULCER.

Ulceration of the stomach is always a very serious condition. It may arise in one of many ways. Thus it may take its origin in chronic gastritis (indigestion) or as a consequence of heart disease or disease of the liver. Curiously enough, it is much more common among women than among men, and is especially common in young women over the age of sixteen. The first symptom is usually pain in the stomach, coming on about half an hour after food, when pain is commonly relieved by vomiting. The vomiting of blood is the symptom which generally places the diagnosis beyond all doubt, though before a volume of pure blood is vomited, dark brown fluid, known as "coffee-ground vomit," may have been brought up. This is due to the mixing of a little blood with the contents of the stomach, and its partial digestion. Under all circumstances where there is the smallest reason to suspect the presence of gastric ulcer a doctor should be seen without any delay, and his advice should be followed. No attempt should be made to treat oneself. The line of treatment takes the form of complete rest in bed and the absolute avoidance of solid food. Even milk may have to be dropped for awhile. It is very important, as in nearly all forms of indigestion, to keep the bowels freely acting.

APPLICATIONS FOR RINGWORM.

Many cases of ringworm are now satisfactorily treated by the Rontgen rays, but this is not always convenient or available, and a large proportion of cases are fairly easily curable by the application of parasiticides. Where it is carefully applied, and the affected area is not large, a single application of pure carbolic acid by means of a small brush or piece of lint is often effective. A forty per cent. solution of formalin applied with a brush and vigorously rubbed in on alternate mornings for four or six days is also good. Or either of the following may be applied night and morning for a week or two: Ammoniated mercury ointment, glycerine of carbolic acid, or a ten per cent. oleate of mercury.

NIETSCHEAN "HARD" STUFF

(Buffalo News).

Recently the kaiser disclaimed responsibility for the present European war.

In a certain sense he is right. The kaiser, no less than the German people, is the victim of wrongful feeding.

They have been fed on a diet of militarism which, to quote the German emperor, "made this war inevitable."

Germany ate strong meat. Her philosophy was that of force; and Friedrich Nietsche, perhaps more than any other man, exercised a profound and guiding influence upon German thought.

Nietsche glorified war, and, above all, wars of conquest. He said: "You say that a good cause will sanctify even war! I tell you that a good war will sanctify any cause!"

Again he wrote: "Man should be educated for war, and woman for the recreation of the warrior. All else is folly." Of peace he said: "You should love peace as a means to a new war, and the short peace more than the long!"

Nietsche had no use for the weakling. "Let them perish—it need be we must help them to do so. This new table, brethren, I put up to you: 'Be hard!'"

His vision of the superman was one who would ruthlessly trample under foot the weak, and the "poor in spirit." He hated the conventionalities and raved against religion, science, ethics and rationalism with equal envenomed brilliance.

Though an anarchist in his opposition to the the state, he was an aristocrat in spirit and had open contempt for the democracy. He was daring in his fancy and his vigorous style caught on with the impressionable minds of the German youth.

He was the prophet of German "kultur" and he stood for "not contentment, but power; not peace, but warfare; not virtue, but efficiency."

Need we probe further to fix responsibility for the war?

A quaint and attractive dance frock is shown in crossbar chiffon with dainty pompadour design, the skirt arranged over a hoop at the hips and the fulness divided by attractive floral clusters.

WHEN GAS COMES OVER.

English Soldier Describes the Approach of the Poison Fumes.

In a length letter home a Somerset, Eng., man serving with the Field Ambulance at the front describes daily life in the trenches. He says:

"During the night we had some strange excitement. We were playing cards when we heard the heavy buzz of a motor going slowly overhead, but we couldn't see anything. We went back wondering what it was. In the morning we found out that it was a Zep, in a raid over our lines. I can tell you it was weird. . . . . At night we got our first taste of the worst thing we have to contend with, viz., gas. You don't know where it is coming from. We were all seated around enjoying a game of cards when we heard the gas gong tinkling. Out went one of our fellows, and back he came with a rush, his gas helmet in his hand, saying, "Gas is coming over." He was followed by the sentry, with his helmet on, telling us to get ours on quick. We did not need telling twice. Out we went, and waited for what we did not know. When every one had their helmets on it was the weirdest sight I've ever experienced. It was exciting waiting there.

"You have to duck and dodge the shrapnel flying about. I was standing at the dug-out entrance talking to some of the fellows, when—ping, ping—a bullet struck the sandbag over my head. I got covered with sand on my neck and face, but Mister Fritz wasn't quite near enough. You can bet I didn't stand there another minute, for they have a nasty habit of getting there again. . . .

"We have the upper hand as regards artillery, and send over three to their one. Yesterday on our right there was a terrific battle on, and the guns going made your head ache with the noise. At night it was a sight. You could see the shells burst, and throw up flames. Lights of every description were going up.

"This is war. . . . We had a chase in the middle of the night—an officer wounded—and we had to carry him all the way down the trench, and across the road. I was carrying in front. We got out of the trench, and Fritz evidently spotted us, for we had a lovely time—ping, ping all across the road every now and again, but we escaped being hit. I can tell you it's not a pleasant experience being a target for a sniper. You can't do a run with a loaded stretcher, but must stick to it, and trust to luck. You have to remember the man on the stretcher. You may be saving his life by getting down to the dressing station quickly."

Shampoo for White Hair.

The very best shampoo for white hair is the white of an egg beaten into a pint of soft, cool water. Rub the hair with the egg, making a soft lather, after wetting the hair with cold water and finish the same as with other shampoo, except in the last rinsing water, which should be cold. A few drops of the best indigo, not ordinary bluing, should be added to tinge the water. This acts exactly as does bluing on white goods, leaving the hair a pure white and not in the least tinged with yellow.

Pale eyebrows and lashes make a face expressionless. They can be coaxed into a better growth by rubbing the eyebrows nightly with vaseline and applying to the roots of both the eyebrows and the eyelashes a tonic made by mixing five grains of sulphate of quinine with one ounce of sweet almond oil. Apply this with a fine sable brush, which comes for the purpose.

Belgium's Answer to Hun Raiders' Charges

"Already justice begins to shine. The penury and the falsity of the German 'proofs' have already struck every fair-minded people. The abundance of the Belgian proofs will finally convince them. They will understand and share the sentiment which in all sincerity, before God and men, the Belgian Government does not hesitate to express in regard to the Imperial Government's conduct toward the Belgian nation; doubly guilty is he who, after violating his neighbor's right, yet attempts, with a singular audacity, to justify himself by imputing to his victim crimes he has never committed."

Such is the concluding paragraph in the reply of the Belgian nation, through its Government, to the charges laid in a White Book issued by Germany against the Belgian civil population. The Belgian reply, countersigned by the Minister of Justice and of Foreign Affairs, constitutes an absolute refutation of the accusations made by Germany.

In her White Book, issued with the intention of turning the tables on Belgium, and justifying Teuton actions as reprisals, Germany charges that the Belgian civil population took part in the hostilities in the early part of the German occupation of Belgium, that Belgians made treacherous attacks against German ambulances and perpetrated horrible cruelties upon wounded German soldiers and prisoners. The Belgian Government is accused of complicity in the "franc-tireurs" sharpshooters' warfare.

By such charges the German Government thought to divert attention from all the dreadful cruelties Germans perpetrated throughout Belgium. The German White Book covered over 300 pages.

THE BELGIAN NOTE.

The Belgian note has been long in preparation, but is even more extensive than the Accusation Record, for it contains over 600 pages of official administrative documents, statistics, evidence, all of which are vouched for by the ministers.

The following are some of the chief extracts bearing on the most important charges, sufficient to show the depth to which the Belgian Government has probed to repudiate the accusations purposely made to sully its honor and undermine its integrity.

"The Belgian Government can in no way be charged with having tolerated or instigated the organization of a sharp-shooting warfare; but, on the contrary, everyone knows what a profusion of administrative precautions, circulars, notices, proclamations, etc., were taken to warn the population against any imprudent act which might lead the invading troops into error and thus expose itself to terrible reprisals.

"But any contrivances are good for the authors of the German plea. They charge the people of Dinant with having used mitrailleuses, when there were in that city no guns discharged except by the French army.

HAD NO GRENADES.

"They affirm that the Belgian 'francs-tireurs' made use of bombs and hand grenades, even when the Belgian army had none at the opening of hostilities and could procure some only in 1915.

"The following is the summary of the 'reprisals' or 'chastisements' inflicted by the invader upon the Belgian population:

"Some 5,000 Belgians, non-combatants (several hundred of whom were women, old men and children) put to death; from 13,000 to 14,000 civils deported to Germany as hostages and civil prisoners (about Oct. 1, 1915, only 3,000 had been sent back to their homes); some 20,000 houses burned down without any military necessity; deeds of violence of all sorts and plundering accomplished throughout the country, under the lenient eyes of officers, if not with their complicity or under their orders.

"In the single Province of Brabant 15,448 houses were plundered; rapes were committed in numerous localities; even nuns were the victims of the soldiers' bestiality; groups of civilians were used as shields by the German troops throughout the whole campaign.

The question is then asked: "Can the German inquiries be of any value? The White Book does not even give any indication of the manner they were conducted.

ONLY ONE SIDE.

"The Belgian reply proves, on the other hand, by the dates of the minutes of proceedings, that the German Military Board's investigation was instituted, not to throw any light, but to procure the appearances of proof needed for intentional self-justification.

"The White Book contains only German depositions and but two direct examinations of Belgian witnesses; a Louvain physician and the servant of a German residing in Brussels. Many Belgian witnesses were heard, but their evidence was embarrassing; it was eliminated from the records and the omission was not even mentioned. Such was the case, for instance, with the capital depositions of Rev. Father Parys and of Mgr. Ladeuze, rector of the Louvain University.

"These witnesses, almost all Germans, are with two exceptions, military men, officers and privates, who belong to the troops that committed the atrocities."

The reply then complains that the German White Book takes good care not to reveal the number of communes in which "reprisals" took place, mentioning the names of only eighty, while there were actually destructions of life and property in 170. The most startling figures of inhabitants killed and houses destroyed by fire, reaching to the millions, are then given with elaborate detail. With regard to the alleged sharp-shooter warfare, the Belgian Commission of Inquiry have no knowledge of a single case of irregular resistance.

KIND TO WOUNDED.

It characterizes the charges of attacks upon German ambulances and wounded prisoners as absolute fiction, for wounded and prisoners were never treated anywhere in Belgium other than with the greatest care and tenderness. Only one case of a wounded German being mutilated by a Belgian woman is mentioned in the White Book and even then the witness does not testify firmly. Practically all the grotesque stories of horrible deeds committed by Belgian civilians, it is pointed out, were afterwards denied by the German press and the German office of Ecclesiastical Defence, denials which were not commented on or even mentioned in the White Book.

That Germany refused on more than one occasion to accept an open investigation, will be seen from the following extract from the conclusion to the Belgian reply:

"It is readily understood how easy it is, by such a line of conduct, to represent the German army as above reproach. There is not, in fact, a single bad side to the behavior of this incomparable army. Major von Klevitz, one of the Louvain incendiaries, in his deposition, has the presumption to declare that the German army's attitude is such as to be offered as a model!

"A consideration has often been expressed, concerning the German accusations; if really Germany had sincerely intended to have the whole truth, why did she not accept one of the numerous proposals for inquiry, made to her from the Belgian side? The Belgian reply contains no less than eight distinct attempts in this direction, made by various Belgian authorities both official and November, 1915, and two Dutch attempts. Well, Germany has abstained from answering almost all of them and has not considered any seriously.

"We are, therefore, justified, in saying that she shrinks before the risk of demanding, or the impossibility of obtaining, at the bar of universal conscience, the rehabilitation of her own 'justice'."—Montreal Star.

WAYS TO USE THE TOMATO

Some Recipes for One of the Best of Vegetables

Which Combines Readily With Others.

The tomato vines still hang heavy with their green and red and yellow fruitage. It is one of the most accommodating of vegetables, easily adjusting itself in hundreds of palatable ways to soups or salads or cooking with meats or fish, eggs, milk, cheese, mushrooms or what not.

And tomatoes are healthful. It is good to stay with the tomato as long as possible. A household contemporary says if you desire, for example, a good salad: Peel and chill four tomatoes. Slice an onion very thin crosswise and shred a green pepper, removing seeds and core and boiling it two minutes. Arrange crisp lettuce in a salad bowl; slice the tomatoes upon the lettuce, and garnish with the onion and pepper.

Serve on this a dressing made from two tablespoonfuls and a half of granulated sugar, a few grains of cayenne, half a teaspoonful of salt, two tablespoonfuls of vinegar. Mix the dry ingredients together. Add the oil gradually, and beat in the vinegar slowly.

Another good salad is made by hollowing out firm tomatoes and filling the centres with young celery hearts. Serve on young lettuce leaves with mayonnaise dressing.

TOMATOES WITH BACON.

One of the simplest ways of preparing tomatoes is with bacon. Remove the skins; sprinkle the tomatoes with salt and pepper, and fill the hollow stem ends with a teaspoonful of granulated sugar. Set them in an aluminum or agateware pan—tin should never be used with tomatoes—pour a little water in the bottom and place a thin slice of bacon on each tomato. Bake about 20 minutes in a hot oven and serve surrounded with cream sauce.

TOMATOES WITH HAM.

Ham also combines well with tomatoes. A substantial dish for supper on a cool night is scalloped tomatoes with ham and onions. The necessary ingredients are three cupfuls of stewed tomatoes, half a teaspoonful of salt, one teaspoonful of sugar, one-eighth of a teaspoonful of pepper, one cupful and a half of cooked onions, one cupful of minced ham, and half a cupful of crumbs mixed with two tablespoonfuls of melted butter. Butter a baking dish, mix seasonings with the tomato, and put a layer in the dish. Add a layer of onions and ham and continue until the dish is filled. Dot with bits of butter between each layer, and put the buttered crumbs on top. Bake in a moderate oven about 40 minutes.

CORN AND TOMATOES.

Corn and tomatoes are frequently used together. To prepare Mexican tomatoes melt two tablespoonfuls of butter or bacon fat, add three tablespoonfuls of chopped green peppers, and cook until softened. Add a pint of stewed tomatoes, a teaspoonful of sugar, three-fourths of a teaspoonful of sugar, three-fourths of a teaspoonful of salt, a dash of cayenne and half a teaspoonful of onion juice. Turn in a pint of corn stewed in the smallest possible amount of water, and let stand to become thoroughly heated. Serve with or without bacon.

VARIOUS COMBINATIONS.

Other vegetable combinations are equally good; stewed tomatoes and string beans, with bacon seasoning; cauliflower in tomato sauce, or scalloped with tomato; stewed lima beans and tomato being excellent vegetable dishes, although they should not act as the main portion of a meal unless reinforced by some other substantial food.

Bazaars in Asia.

Streets in the bazaar districts of Asiatic cities are only eight to ten feet wide. The larger shops are eight by ten and the smaller ones five by six feet, with one side giving directly on the street. In each bazaar is a khan for every ten or twelve shops. These khans are two stories high, with an open court in the centre and rooms on the four sides, all opening into the court. A door leads from the open court into the street. Rooms are let to different storekeepers for storage purposes.

Unable To Sleep Or Do Any Work.

SUFFERED FROM HER NERVES.

Mrs. Thomas Harris, 8 Corrigan St., Kingston, Ont., writes: "I had been a constant sufferer, for many years, with my nerves, and was unable to sleep at night, or do any work through the day. I at last decided to consult a doctor and find out what was really the trouble. The first one told me I would have to go under an operation before I would be well, but I would not consent to this. One day I took a fit of crying, and it seemed that if anyone spoke to me I would have to order them out of the house. I must have been crying two hours when my insurance agent came in. He advised me to try a box of Milburn's Heart and Nerve Pills, and I at once sent to the drug store and got two boxes, and before I had them taken I felt like a different person. I have told others about them, and they have told me they would not be without them. I am very thankful I started to take Milburn's Heart and Nerve Pills."

Milburn's Heart and Nerve Pills are 50 cents per box, or 3 boxes for $1.25, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Bradstreet's Trade Review

TORONTO—The week's conditions indicate a satisfactory autumn trade. Wholesale houses report that jobbers and retailers are giving placing orders in large amounts. Money is reported to be plentiful and interest rates are a little easier. Most dealers estate that collections are better than twelve months ago. Wholesalers state that [illegible] retailers have overstocked in anticipation of higher prices. A scarcity in some lines is delaying deliveries. Woollen industries are very busy. For the leather trades, a fair amount of activity is prevailing. Harness trade is active. Higher prices are being obtained for boots and shoes, according to jobbers, and many manufacturers are at a loss in quoting prices for future delivery. Some concerns are booked up with orders enough to keep them busy for several months. The grocery trade is picking up after the summer quiet. General [illegible] have been reported in all lines of seasonable goods. Hardware business is fair, with the filling of contracts to munition makers still the greatest source of activity. Wholesale houses have filled most of the placing orders for fall goods and they report a moderate volume of business.

MONTREAL.—Wholesalers are quite satisfied with trade conditions. In the drygoods business, merchants state that a brisk trade is being done, with [illegible] commodities being in demand. Higher prices are ruling. Wholesale sugar dealers say that prices may take a drop in the near future, although American fluctuations have not affected local trade to a great extent. Hardware, and paints are fairly active. Collections are reported to be good.

OTTAWA.—Trade conditions in most lines are very satisfactory. Grocery wholesalers report a satisfactory volume of trade is passing, with canned goods, especially salmon, commanding higher prices.

LONDON.—Business conditions in Western Ontario are very satisfactory, and a better trade is being done now than during corresponding periods in 1914 and 1915. Drygoods is reported active and the grocery trade is brisk. Labor is in demand. Money is easier, and collections are good.

HAMILTON.—Business is active, and the iron and steel industry is especially busy. Labor is scarce for steel concerns, and a record quantity of orders are being filled. Drygoods lines are reported active throughout the entire district around Hamilton. Hardware is moving out freely with a good enquiry for seasonable lines. The grocery business is fairly busy.

WINNIPEG.—All lines of mercantile business are in a very healthy condition. Although the farm laborers from the East numbered over [illegible], Western farmers find themselves taxed to the utmost in harvesting their crops. In spite of extensive damage in Southern Manitoba, some sections are harvesting a good crop. All kinds of labor are reported scarce in Winnipeg. The railroads are busier hauling freight than they were at this time last year. Grocery, drygoods and hardware lines are being moved out in quantities that are quite satisfactory to wholesalers and retailers. Bank clearings have shown phenomenal increases. Collections are very good.

CALGARY.—Crop conditions in Alberta are very satisfactory, and prospects are bright for a record yield of wheat. Mercantile trade is reported to be brisk, with the demand for drygoods and groceries very active. Money is being circulated freely.

VANCOUVER.—Business in British Columbia is quite good. All lines of retail trade are reported to be in a satisfactory condition. Collections are good, and conditions in general are much better than in 1915.

QUEBEC.—Local industrial conditions are unchanged, manufacturers as a rule are well employed. Outlook for Fall is encouraging. City and country collections are fairly good.

The Isles of Youth.

Far out on memory's throbbing sea
 Of cherished hope and lost emprise,
Of strangled faith, chained liberty,
 The golden isles of youth arise.
They wear a glory on their crest,
 Their valleys all are vales of peace,
Their flowered fields, that woo to rest,
 The fragrance of the spring release.

Time blots them from the magic page
 That memory holds for me to read;
Time steals away this heritage
 That toil and sorrow supersede;
But, still sometimes I catch a gleam
 Of sun kissed crest, of cloudless skies,
And in my wearied fancy seem
 To see the isles of youth arise.

Oh! happy dream! Oh! radiant land
 Of love and faith and innocence!
The sad years pass and in their hand
 Bring naught your loss can recompense;
Yet times, when memory's kindly art
 Strips custom's badge from my eyes,
I see, with wildly beating heart,
 The golden isles of youth arise.
 —Richmond Times-Despatch.

HAD KIDNEY TROUBLE For SEVERAL MONTHS

DOAN'S KIDNEY PILLS CURED HIM.

Mr. Fred. Stevens, Raymond, Alta., writes: "I am writing to bear my testimony of your wonderful medicine. I had suffered for several months with kidney trouble. I had been under the doctor's care for two months, when I read your advertisement. I at once purchased four boxes of Doan's Kidney Pills, and when I had used two boxes of them I was cured. I have recommended this treatment to several of my friends."

When you ask for Doan's Kidney Pills see that you get "Doan's." The wrapper is grey and our trade mark "The Maple Leaf" appears on every box.

Doan's Kidney Pills are 50 cents per box, or 3 boxes for $1.25; at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

When ordering direct specify "Doan's."

The Fall Coats Show the New Collar, and Full Sleeves

With Wool Velours, Zibeline and other soft, thick weaves, the correct materials and brown, blue and green, the leading colors.

Warm, Wide and Long are the coats presented for our fall and winter wearing. Made of soft wool Velours and deep pile zibelines, they're cut on generous lines, falling full from the neck with sleeves loose at the shoulder and elbow. As for the new collar, it is of the convertible order, rolling back flat or rising up high, turning over and buttoning close to the throat.

Beautiful examples of the mode are now here. A collection of exclusive designs in comfortable designs, suitable for motoring, travelling and general cool weather wear.

You will find them very attractive coats in blue, brown, green, fancy tweed mixtures and black. The cloth is of soft nap or a fleece finished cloth, mostly belted, a good many with cross over belt in front and raglan sleeve. Prices $10.00, $12 50 to $25.00.

NEIGHBORING VILLAGES & COUNTRYSIDE

News of the Week Collected by Staff of Live Correspondents

PINKERTON

The Rev. Mr. Campbell of Toronto preached two excellent sermons here on Sunday in the interests of the Dominion Alliance.

Mr. Russel Burrell of Toronto spent a few days at his home here.

Schools re-opened this week. Mr. Godfrey McKee of Southampton again wielding the rod. Miss Verna Donnelley is teaching near Chepstow and Mr. Melville Reid near Tiverton.

Messrs Thomas and Wesley Birrell, David and Albert Pinkerton motored to Toronto last week and took in the exhibition.

Mr. and Mrs. Ansey Gregg and family have returned from Inverhuron.

Mr. W. J. Wilson left on Saturday for the West.

Miss Lenora Clark of the T. Eaton Co. staff spent a few days at her home here.

Mrs. W. Richardson and son returned to their home in Arthur this week.

Miss Lena Pinkerton visited the County Town on Saturday.

Miss Oatey of Eden Grove is spending a few weeks at Mr. Cecil Garland's.

Mrs. Stewart and daughter are visiting her mother, Mrs. Jas. Murray.

OTTER CREEK

Mr. and Mrs. George Ickmeier were visitors of Mr. David Grass on Labor Day.

Miss Ruth Rayfield left for Toronto Tuesday last after spending her vacation here.

Pte Gordon Hogg is at present visiting his parents, Mr. and Mrs. John Hogg.

Mr. Wilfred Schulthies of Mildmay is a visitor at Mr. John Bell's.

Quite a number of friends gathered at the home of Mr. and Mrs. John Fenner on Monday night prior to the leaving of Mrs. Claude Hughes, who left on Tuesday morning for her home in Lethbridge, Alta.

Miss Lillian Grass of Hanover was a visitor at her home here.

Mr. Eckert Miller was a visitor on the fourteenth on Sunday last.

Mr. and Mrs. Emerson Schumacher were visiting friends on the fourteenth on Sunday last.

Mr. and Mrs. Ezra Schmidd were visitors at Mr. and Mrs. Henry Wolfe's on Sunday.

Misses Mildred Pfohl and Marion Hogg left for Toronto on Thursday.

BORN—To Mr. and William Klein, (nee Miss Maria Grass) on Wednesday, Aug. 27th, a son, to Mildmay.

Mrs. Hypel and daughter May of Clifford are visitors at Henry Dippel's.

Mr. McCool, Pub. School Inspector, preached in the Evangelical Church in Walkerton on Sunday morning. His very plain and practical lessons were much enjoyed by all.

Mr. Charles Blackmoir was a visitor on the fourteenth on Monday last.

MILDMAY

Mrs. John H. Schnurr is visiting friends in Claremont this week.

Mr. Charles Powell is visiting at Mr. Charles Wendt's over Labour Day.

Mr. George Braider of Kincardine Sundayed in town.

The garden party and picnic held in Lint's school grounds was very well attended. The baseball match between Mildmay and Lint's team was the event of the day. Lint's team proved to be good batsmen but their battery was not extra good. The Mildmay team won the game, the score being 20—11. After the ball game supper was served in the school grounds by the ladies of the vicinity. The concert was very good. Rev. John A. Marsh rendered several solos and Miss Lillie Maurer of Clifford assisted in the programme. The wicker rocking chair was drawn by Gordon Dickison.

Rev. Mr. Marsh and Rev. Mr. Buchart of Mildmay made a fishing trip to Lakelet on Thursday of last week.

Rev. Mr. Wright of Toronto spoke in the Presbyterian and Methodist churches last Sunday in the interests of the Dominion Alliance. Rev. Mr. Silcox of Toronto also spoke for the Dominion Alliance in the Evangelical Church.

Misses E. L. and Mr. Mitchell spent Sunday with Chesley friends.

Mrs. Julius Holm is spending a week at the Toronto Exhibition.

Miss Lizzie Holm from Walkerton is spending a week at the home of her brother, Mr. J. Holm.

HANOVER

Active recruiting is to be begun shortly in this County again on a large scale.

All the hotels in South Grey made application for the Standard license.

Mr. George Hellinger, a prominent resident of Hanover since the town's early days, passed away on Aug. 28th, in his 73rd year. For ten years he was a partner with Mr. R. J. Bell in the furniture business. Up to two years ago he enjoyed exceptionally good health. Two months ago he took to his bed. Death was due to a general break-down. He leaves to mourn his loss, two daughters Miss Hollinger and Mrs. S. B. Clark, and one brother, William Hollinger of Pickering Township.

Lieut.-Col. McFarland, commanding officer of the 147th Battalion, estimates that five hundred women, with brief assistance from their husbands and sons, are working in the fields in Grey. On Saturday a woman aged sixty years, who has one son a prisoner in Germany, another in the 147th and a third drowned last Spring, told the commanding officer that with the assistance of her son for two weeks, and her seventy-year old husband, she and her daughter, whose husband is also in the same battalion, handled the crops on their farm.

On Sunday evening about 7 p.m. Messrs Fred Planz, "Teddy" Weppler Eddie Pufahl and "Mike" Koenig started down the Saugeen River in Mr. Fred Planz's motor boat. They had only motored about 200 yards down stream when the boat, which apparently was too heavily ladened in the bow, took a couple of quick turns and over it went, landing the four occupants in the cold water of the Saugeen. Mr. Weppler could not swim so clung to the up-turned boat until it was towed in. The other three started for shore, but when Fred Planz and "Mike" Koenig landed they were startled by the sound of "help" from Eddie Pufahl, who had taken a cramp and sank beneath the surface. Hastily and in a heroic manner "Mike" pasted back after his drowning comrade, whom he caught hold of and struggled for shore. But the task was too much for "Mike" and the Saugeen likely would have claimed two more victims had not Mr. Jake Eberth ran for a rail and towed the boys in.

Mr. J. A. Magee, principal of the Hanover school, during summer vacation took a five-week's course in Toronto and succeeded in obtaining a certificate as a Cadet Instructor.

Mr. Wm. Willoughby met with a mishap in the swamp on the 5th sideroad of Bentinck in the form of a collision with a rig occupied by Ed. Pufahl and "Mike" Koenig. Mr. Willoughby was pitched out of his buggy and injured one arm somewhat. His buggy was damaged to some extent.

Lieutenant Claude Kormann who has been stationed on the Welland Canal has resigned his commission to go overseas with reinforcements for the Princess Pats.

Fraser Miller, son of H. H. Miller writes from the Front:—

I was offered stripe a week ago but declined in favour of a man longer in service. The Acting Sergeant-Major of my Battalion Company said that had I came back to the Battalion after the scrap, instead of going, as I was ordered with the wireless gang, I would have got two stripes.

GLAMIS

Mr. John McLean of Tiverton, formerly a resident on the Boundary, was in the village last week.

Mrs. Woods, Miss Margaret and Mrs Kenneth returned home last week.

Mrs. Parker who was at W. J. Graham's returned home on Friday. Mrs. Graham is improving. Miss McKay of Salem is still nursing her.

Mr. Panabaker, and Masters Deehan and Charles are visiting at Mr. John Deehan's.

Mrs. Tufford and Miss Couse returned to Beamsville.

Miss Mary McLean of Saginaw Mich visited at J.C. McIntyre's last week.

Miss Frarer, after a two month's visit in Western Canada is again settled in her home in Glamis.

Miss Maude McNally underwent an operation in Kincardine hospital this week and is progressing favorably.

Miss Daisy Cronin was in Toronto from Tuesday to Saturday. She was accompanied by Miss Florence Webb.

Miss Blanche Downey, from the 4th of Bruce is working at W. J. Graham's.

Mr. W. Reynolds was in the village last week. Was he advertising the G. T. R.? We want something faster here. It may be alright for Eden Grove!

Misses Martha, Pearl and Alberta Kirktown who have been visiting their sister Mrs. T. Montgomery in Markdale returned on Sunday.

Mrs. John Kitchon is visiting friends South of Glamis.

Mrs. Loney, Mrs. Robertson and Mrs. Nicholson are visiting their sister, Mrs. Graham.

Mrs. Lovey, Mrs. Robertson and Mrs. Nicholson are visiting their sister Mrs. Graham.

School reopened this week. Miss McKinnon teaches in Glamis. Miss McLennan on the 6th Bruce, Mr. McCauley at No 4, Bruce, Miss Mary Webb at Bradley, and Miss Kirktown at Hanover.

Miss Margaret McLennan formerly of Detroit, entered training in that city on Monday and became a nurse. She has the good wishes of her many friends at home.

Rev. D. Allan of Hamilton was in the village on Saturday.

The F. M. Campmeetings have been brought to a close. They have been quite successful.

Mr. and Mrs. Wandless, and Miss Wandless of Ottawa visited at Mr. Allan McKinnon's.

Soldiers from Camp Borden, for the week-end were: Mac McKinnon, John Thompson, J. Sproule, W. McNally and C. McKeeman.

Miss Hendry, sister of Mrs. McKeeman, returned to Weston last week.

Miss Nettie Gunn is engaged to teach school at Norland Ont. Miss Gunn left Monday.

Miss Winnie Wrightson and Mrs. Gilchrist have returned from their holidaying on the 20th of Greenock.

Miss Katharine McDermid of London is spending her vacation with her mother, Mrs. Angus McDermid.

Mr. N. Panabaker of Hespeler is visiting at Mr. J. Deehan's.

Miss Marion McKenzie daughter of Mrs. Mord. McKenzie, returned to Winnipeg this week.

Death of Miss Kohler

Mr. and Mrs. Jacob Kohler of Greenock were sadly bereaved in the death in early womanhood of their daughter, Miss Otilia, which took place on Thursday last after a lingering illness of nearly two years. She was a bright and popular young lady, highly thought of in the community and deep sympathy is felt for the family in their sad loss. Three sisters and one brother survive. They are:—Rachel, trained nurse, at home; Mrs. (Lena) Goodhand of Rochester; Sister Prezedas of Comax, British Columbia, and Joseph of Buffalo.

When "Someone" Comes

You can entertain him with the Edison Diamond Amberola, hearing the greatest singers of the day or dancing to the liveliest and latest popular hits.

And, all the while you can take pride in the fact that it is an Edison, the peer of all phonographs—and not a common, everyday "talking machine" that you would feel like apologizing for.

The "humanness" of the Amberol is startling—hear it

M. GOETZ CALLED AWAY

Clerk of the County Court Died Very Suddenly—A Brilliant Student and Man of Wide Influence in This District.

The announcement on Sunday afternoon that Mr. Matthew Goetz had passed away, came as a shock to his many friends in Walkerton and throughout the County. As late as Thursday last he had attended his duties at the Court House and the great majority of his friends had not even heard of his illness. Death was due to blood-poisoning which developed from a carbuncle at the top of his head.

The late Mr. Goetz was born in New Germany, Waterloo County, of Alsatian descent. In early life he came to Bruce County with his parents, the late Mathew Goetz and wife. After receiving a thorough schooling, he was sent to Normal School, Toronto, where he distinguished himself by graduating at the head of his class. He was a brilliant student, excelling in mathematics and in grammar, two subjects upon which he was many a time consulted as an expert by people in other parts of the Province. To illustrate his mathematical gift: he could add a dozen rows of figures almost instantaneously. He was also a noted authority in Grammar. After graduating from Normal School he taught school for several years at Carrick. Then he settled at Formosa, where was made a Magistrate by the Mowat Government. He also acted as Commissioner and Notary Public. The people of the community depended greatly upon his knowledge of law and his good judgment. They looked to him to straighten out their difficulties and in no end of cases he was named as executor of their estates. For many years he was Formosa's most prominent citizen. He took an active interest in politics at that time, and for a number of years was secretary of the Liberal organization for the Riding. In 1895, he was appointed, on the death of the late Wm. Gunn, to the offices of Clerk of the County Court, Registrar of the Surrogate Court, and Registrar of the High Court. In the face of very strong competition as the office is one of the most remunerative in the County. He held the positions up to the time of his death with credit. Although not a lawyer by training, he acquired a knowledge of practice equalled by few lawyers, and won by his ability the high respect of the members of the Bench.

The late Mr. Goetz was tolerant in his views, respecting the opinions of others. He was a strong adherent of the Roman Catholic Church, contributing liberally in money and time to the work of the church. He was an ardent Britisher and was delighted when he heard that his only surviving son was going to enlist, but he was rejected through physical disability. The death three years ago of his elder son, George, a brilliant young barrister of Vancouver, was a blow from which Mr. Goetz never fully recovered. He had been poorly of late, and when blood-poisoning set in, he lacked vitality to combat it.

Besides his widow, Mr. Goetz leaves to mourn three daughters, Mrs. O'Connell of Regina, Misses Olivia (Leafy) and Nettie at home, and one son, Mr. Leo. Goetz, barrister, of Guelph.

Millinery Opening

Our initial display of Exclusive Millinery models will be ready Wednesday, Sept. 13th, and the following days. Your inspection is cordially invited. Misses Cooke and Selwood.

No Word From Daughter.

Mr. Fred Stedden is very anxious about the safety of his daughter, Mrs. Wm. McCue, who lives in the fireswept region of Northern Ontario. He heard from his daughter shortly before the fire but has had no word since although he has written her twice. Mrs. McCue lives at South Porcupine where her husband is an engineer in the Dome Mine. She has a family of three boys. Mr. Stedden has written the Government at Toronto for information.

BORN

WALKER—In Walkerton on, Sept. 2nd, to Mr. and Mrs. Frank Walker, a daughter (Anna Isabel).

HENDERSON—In Walkerton, on Friday, Sept 1st, to Mr. and Mrs. Guy Henderson, a daughter.

BENNINGER—In Walkerton, on Sept. 12th, to Mr. and Mrs. George Benninger, a daughter.

LYNES—In Hanover, on Sept. 10th, to Mr. and Mrs. Arthur Lynes, formerly of South Line, Brant, a daughter.

SCHLMAN—In Mildmay, on Sept. 5th, to Mr. and Mrs. Albert Schlman, a son.

MILLER—In Mildmay, on Sept. 4th, to Mr. and Mrs. Solomon Miller, a daughter.

DABMS—In Carrick, on Sept. 1st, to Mr. and Mrs. William Dabms, a son.

HOFFELE—In Carrick, on Sept. 5th, to Mr. and Mrs. F. X. Hoffele, a son.

Page 5 for local news.

Mr. Sam Truax had the fleshy part of his left thumb cut very badly by a band saw at Truax's mill last Wednesday.

The regular meeting of the Walkerton Branch I. O. D. E. will be held in the Town Hall on Saturday afternoon at 3.30.

Mrs. Wm. Lake of Durham, a former Walkerton lady, was brought to the Bruce County Hospital on Sunday for treatment.

According to statistics recently compiled by Bradstreets, it is shown that eighty-four per cent. of the failures in mercantile instructions are among non-advertisers. The lesson needs no comment.

Mr. John Gool of the South Line, Brant, was brought to the County Hospital on Saturday suffering from cellulitis of the floor of the mouth. His condition is serious but his recovery is anticipated.

Cheese boardings to date in Ontario this year total 111,191 boxes, as compared with 293,772 last year, according to an estimate made by the Toronto Weekly Sun. Plenty of feed and big prices for the product explains the increase.

Some of the boys and girls who have made a success of life, were at one time country correspondents for newspapers. There are few better ways in which a person can help his or her education, and at the same time their own community by corresponding for a home paper like the Telescope

David Selling Wounded

Mr. William Selling received word from his son, Pte. David Selling, who went to England with the 71st, that he was wounded but is at present doing nicely in the Hospital. This information was enclosed on a post card along with a lengthy letter. It is supposed that he was wounded just after he had written home.

+ + +

Killed In Action

Capt. Dugald B. McLean who is reported killed in action, was a son of the late Dugald McLean of Paisley, and Mrs. McLean of Winnipeg. He was born near Burgoyne, 25 years ago, and graduated in arts and medicine from Toronto University. He was a house surgeon in Winnipeg Hospital when he enlisted in the Royal Medical Corps. Another brother, Professor Neil B. McLean, of Manitoba College is also in active service.

+ + +

Then and Now

From its issue of August 27th, 1890 just 51 years ago, the Acton Free Press reproduces the following paragraph: "Rather than take ten cents per bag for a load of early apples in Walkerton, a Cargill farmer took them and emptied them along the road on his return home, a bagful every mile or so, to people could help themselves." Nobody is spilling apples by the waggon-load along the roadsides in these days.

Gets D. S. O.

Capt. C. E. Kilmer whose brilliant exploit at the front was described in last week's Telescope, has been awarded the distinguished Service Order for bravery. This is a decoration which is awarded only for conspicuous service and is a distinction highly prized. The D.S.O. is a gold cross enamelled white and edged with gold. On the front is the Imperial Crown in gold on a red background, and surrounded by a green enamel laurel wreath. On the reverse a similar wreath encircles the letters G.R.I. on a red ground. The ribbon is red with blue edges.

Epworth League Convention

The District Epworth League Convention at Paisley last week included a very interesting address by E. N. Mauser, returned missionary from China. Officers were elected for the coming year as follows:—President, Rev. W. C. Almack, Cargill; 1st Vice-Pres., Mr. R. Lockhart, Hanover; 2nd Vice-Pres., Alice Thompson, Paisley; 3rd Vice-Pres., Clara Stausal, Eden Grove; 4th Vice-Pres., Mr. Cadwallader, Southampton; 5th Vice-Pres., Mrs. J. Busby, Port Elgin; Sec'y, Miss Williamson, Chesley; Treas., Miss Flossie Cozens, Walkerton; Conference Rep., Jas. Thompson, Paisley.

+ + +

Law Is Strict

The fact that druggists will still be permitted to sell liquor for medicinal purposes, is not going to add very greatly to the moisture in the dry belt if the law is enforced. Druggists can sell liquor only on a prescription from a Medical Doctor, and it can be filled only once, and not filled for refilling. Pure alcohol can only be used by druggists in making up mixtures that cannot be used as a beverage without a prescription. Druggists are required to record every sale of alcohol and liquor in a special book and send a copy to the Government every six months with an affidavit that no other sales were made. The penalties are very severe, including the cancellation of the privelege of carrying on business for a period of two years.

NEWS ABOUT TOWN

News About Town on page 5.

Try the Telescope for tasty job printing.

Mr. T. E. Attwood was in Toronto this week.

Get your auction sale bills printed at the Telescope.

For the best farm shoes go to Ramsey's Shoe Store.

Lieut. Bob Roland of the 160th was home over Sunday.

Miss Reid of New York City is visiting Mrs. L. H. McNamara.

Miss Burton of Buffalo is visiting her aunt Mrs. R. V. Baker.

Mr. Wm. Mielhausen was among the visitors at Toronto Exhibition.

Capt. and Mrs. Shaw and family were visitors in town over Sunday.

Oscar Schwindt left this week to attend Normal School at Stratford.

Bert Cartwright has been promoted at the Front to Sergeant-Shoemaker.

Mens and boys caps that were 60 and 75 cents at 45 and 55 cents at Woodman & Co.

Regal on your shoes means quality in them. Sold at Ramsey's Shoe Store.

Mrs. McPhail left on Tuesday to visit her son, Dr. McPhail at Blandchester, Ohio

At the old price a window full of womens' $3.50 shoes. Ramsey the Shoeman.

Inspector John McCool went to Tobermory on inspectoral duties Monday morning.

Woodman & Co. have a few suits of blues and blacks at the old slaughter prices left yet.

Miss Sheffield returned home last Thursday from a pleasant month's holiday in Toronto.

Miss Ethel Cryderman and Miss Freda Dippel visited Mrs. Moffat (nee Miss Dickson) at Cargill.

Pte. Ernie Cartwright writes to friends here that everything is tremendously dear in England.

Nothing better than a pair of Dr's. Special Shoes for fall and winter wear. Sold at Ramsey's Shoe Store.

Mr. and Mrs. N. A. Walford left on Monday for a two weeks' vacation at Hespeler and other places.

Mr. and Mrs. G. S. Schwindt left on Tuesday in company with a Hanover party on a fishing trip to Stokes Bay.

Mr. P. Bremner is spending the week at Toronto on a buying trip in connection with the syndicate of stores of which he is a member.

Mrs. W. I. Fowler and little son Bob, also Miss Annie Ferguson graduate nurse of Stratford, are home on account of the illness of their mother, Mrs. R. B. Ferguson.

Mr. J. H. Hunter arrived home on Saturday from an enjoyable visit to his old home township of Downie, Perth County, He also spent a day or so with relatives in St. Marys.

Lt.-Col. and Mrs. Knifton, who have been guests at Judge Klein's, left yesterday for their home at Parry Sound. They returned by way of St. Catherines to pay a short visit to their two sons who are in khaki.

Walkerton coal dealers have been selling coal at $7 and $7.25 all summer but last week raised the price half a dollar. They say that coal will be at a premium this coming winter owing to labor conditions at the mines.

Among those who attended the funeral of the late Dr. Grant V. S. at Paisley on Saturday were:—Mr. and Mrs. Frank Rennie, Rev. C. W. Cosens, Messrs. Robt. and Hank Irwin, W. H. McFarlane, Jos. M. White, John Rowland.

Mr. and Mrs. Alex George and family, and Mr. Dave George returned on Thursday last from a two week's motor trip to Toronto. Mr. George speaks of the corn having been badly nipped in the head by frost in the Guelph and Elora district.

A very neat two-storey brick residence has been recently finished by Contractor A. Haas for Mr. Philip Schmidt, at the head of Gibson St. The building is neatly finished, the lower storey in black ash, a very comfortable and up-to-date home.

The Telescope enjoyed a pleasant call last Thursday from an old newspaper friend, Malcolm MacBeth, publisher of the Milverton Sun. Mr. MacBeth is an old Walkerton boy who has made good in the County newspaper business. He fills the dual position of editor and postmaster to the complete satisfaction of the community. His paper covers a large field and easily doubles the average town newspaper in circulation. Mr. MacBeth was on a motor trip through here in company with his brother, Mr. Andrew MacBeth of Regina, who is district manager of the Mutual Life Assurance Co. for Eastern Saskatchewan.

Miss Freda Dippel (nurse) is home for a short time.

El. Wettlaufer motored up from Berlin on Sunday.

Huyler's Chocolates and Salted Almonds at Mrs. Steads.

Mrs. Jos. Bergman is visiting her aunt, Mrs. Robt. Pinkney.

Miss Eva Adair spent a few days with her cousin, Clara Inglis.

Mr. John Engel is spending a few weeks with his daughter, Mrs. D. Craig.

Huyler's Breakfast Cocoa, and Ready to Serve Cocoa, in 25ct. tins at Mrs. Stead's.

Mr. Shaw is building a cement Silo on his farm "Viewfield", east of the town, Mr. Herb McNaughton having the contract.

Mr. and Mrs. Wm. Ernest, Mr. Rapp and Alex Stroeder motored to Tara one day last week. They called on Mr. and Mrs. Foster.

In your next parcel to the trenches enclose a tin of "Huyler's" Sweet Cocoa Ready to Serve—25cts. and a box of Huyler's Dipped Triscuit 10cts. at Mrs. Stead's.

Andrew Himmelspach, a vagrant, who served 30 days in the gaol here, was deported by Chief Ferguson this week to an adjoining county where he came from.

A large contract for book binding at the County registry office has just been completed by Richardson, Bond, and Wright of Owen Sound. Forty large books of record were rebound in full leather and 70 books in canvas.

Will the ladies of the town help the Hospital Aid by sending their parcels to the Rummage Sale room next to Electric Light office, on Thursday afternoon and if those who cannot send their parcels, will phone or notify Mrs. McNamara, the parcels will be called for.

Mrs. Reefer, an aged lady, who lives across the street from the House of refuge, was knocked down by a bicyclist riding on the sidewalk and seriously bruised and shaken up and She was taken to the County Hospital. Chief Ferguson has an idea who the culprit is and expects to lay a charge.

The Postoffice Department at Ottawa announces that any remittances sent to Canadian prisoners in Germany must not be wrapped in linen, calico, canvas or other textiles. The object is to prevent the German authorities making use of the material for war purposes, that class of material being very scarce.

The Royal Hotel which has been conducted by the proprietress, Mrs. Klempp, as a boarding house since the license was taken away two years ago, has applied for a license as a Standard Hotel. The building is at present being renovated and a number of improvements made. The Royal should prove a good, well-kept house under Mrs. Klempp's management.

Mr. Geo. D. McKay arrived home from London last week and will remain here for several weeks before assuming his duties as Chief recruiting officer for No 1 Military District. The big push for recruits will not be started until Fall, when it is anticipated that the work throughout Canada will be organized on a Dominion-wide plan.

Mr. James O'Malley of Chicago, Ill. is visiting his brother, Mr. J. J. O'Malley this week. This is a period of great expansion for Chicago, Mr. O'Malley states, as well as for most U. S. cities Great relief is felt everywhere across the line that the railway tie-up was averted by President Wilson. Mr. O'Malley has conducted a large general merchandise store in Chicago for many years.

Erdman's new ice cream parlour and restaurant was opened to the public on Saturday night. The new stand occupies the entire ground floor of the Block. It has been very handsomely decorated and presents a very bright and inviting appearance. A large new soda fountain with the very latest devices has been installed. Altogether the new parlor is are quite up to the best in Western Ontario.

Hon. Duncan Marshall, Minister of Agriculture, from Alberta, was a visitor in town yesterday at the home of Mr. D. McKechnie. Mr. Marshall is one of the old Bruce Boys who have made good in the West. He is at present buying some thoroughbred stock in the East to ship to his big 800 acre farm at Olds. Mr. Marshall has three young sons, all of whom, he says, are anxious to stick to the farm.

Mr. Andrew O'Neill arrived home Thursday night from spending a week with friends in Toronto. After visiting the city hurriedly from year to year, Mr. O'Neill enjoyed taking a good look at Toronto, and he was amazed to find the development which has taken place in some of the outlying sections. He was especially interested in the construction of the new Don viaduct which will be one of the largest of the kind in existence.

Mr. O. E. Klein has gone to Shelburne on business.

Miss Florence Dickison of Chesley is visiting friends in town.

Mr. Wm. Thacker of Kingarf was operated on, on Monday by Dr Hall.

Mrs. McKinnon Sr. returned to her home at Detroit yesterday morning.

Rev. and Mrs. R. Perdue and family returned last week from holidaying at Toronto.

Mr. John C. Lambertus has sold his farm on Con. 4 Brant to Roy Caslick of Teeswater.

Mrs. Case and daughter, Bessie, of Wiarton are visiting at Coun. Alex. McCarter's.

Mrs. Tovell, Clayton and Vernon, and Miss Halliday motored to Kincardine on Sunday.

Miss Stella Bush returned home on Saturday after spending a month visiting in Detroit.

Mr. and Mrs. Thos. Cunningham had word from their son, Pte. Chester Cunningham yesterday, that he had his first experience in the trenches and was out again.

Miss Olive Dickison, milliner of Gorrie, was operated upon for appendicitis, at the Bruce County Hospital by Dr. Hall on Friday evening. The lady is a daughter of Mr. Chas. Dickison of Carrick.

Chief Ferguson laid charges against two young men for riding their bicycles on the sidewalk. One of them was fined $1 and costs, a total of $1.75 by Magistrate James Tolton. The other case was dismissed for lack of evidence.

Arthur Kerry, a fifteen year old boy, was the victim of a rather serious accident at Knechtel's factory. His arm got caught in a belt and was drawn around a pulley, fracturing his wrist and tearing his thumb away at the joint. The doctor expects that in time he will have the use of his thumb again.

Henry Spitzig jr. of Chepstow, was badly injured in a runaway accident on Sunday morning. While he was driving to church in company with his brother the horse ran away. The young man drew his knee against the dashboard and the animal kicked cutting the leg wide open just below the knee cap. He will be laid up for some time.

The death occurred at the home of Mrs. Lumley Sr., West Ward, on Sunday, Sept. 10th, of Stephen Brooks, in his seventy-sixth year. The deceased had made his home with his sister-in-law, Mrs. Lumley, since last winter, coming from Dunmore, Grey County. Death was caused by hardening of the arteries. The remains were taken to Dunmore for interment on Tuesday.

Word was received here last week that Mrs. James Brown of Cashmere, Wash. had been bereaved of her little son, Teasdale, on August 24th of rheumatic fever. He was a bright little fellow about eleven years old, in whom many hopes were centred. Mrs. Brown, who was formerly Miss Teasdale of Walkerton, has the deepest sympathy of her many old friends here.

+ + +

Cargill Bowlers Here

Four rinks of bowlers came down from Cargill on Monday night for a friendly game on the local green. Walkerton was a few shots up on a well-contested round. The score:—Warden McNab, skip 21, J. T. Chaney, skip, 14; T. Pye, skip, 11, M. L. Ziegler, 11; E. McConnell, 10, R. Loughleen, 21; F. G. Eldt, 27, Frank Smith, 6.

OUR WESTERN LETTER

Written for The Telescope by an Old Brant Boy, now Farming in Northern Alberta. . . .

Aug. 18th, 1916

The weather here is very far from being all that could be desired. On the night of Aug. 10th there was considerable frost. In our immediate neighborhood it did no damage, except to beans, squash and other delicate garden stuff. Further afield we hear of grain (chiefly barley) being frozen.

The frost seems to have run streaks. Our potatoes on one side of the house were slightly nipped while tomatoes on the other side were untouched. One neighbor had his potatoes frozen to the ground and the other had not even the blossoms touched.

We hear that in the valleys of the Blindman and Medicine Rivers, especially the latter, the frost did a lot of damage. It also did a lot of damage around Lacombe. Reports are current that farther north around Edmonton, everything is frozen. First reports are always exaggerated and we hope this is so. On the night of the 12th a heavy electric storm with heavy rain passed over here, south and east of here it developed to hail and miles of grain in that direction are levelled. As far as we know very little hail insurance was carried, so that the loss to the farmers will be heavy.

Since this storm it has rained con-

(Continued on page 8)

THE TOWN COUNCIL

Will Give Full Details in Financial Statement This Year—Town Scavenger Appointed and Coal Contract Let.

The Town Council held its regular monthly meeting in the Council Chamber at 8 p. m. Monday. The members present were:—Mayor Lippert, Couns. Douglas, Lettner, Russel and McCarter.

Tenders for twenty-five tons of furnace coal for the Town Hall were received as follows:—$6.96, Alex. George; $7.20, F. W. Vogan; $6.92½, Alex. Ernest. The tender Alex. Ernest was accepted.

Town Clerk Collins wrote the Council a lengthy letter giving full details of the town debenture account and asking formal permission to sell $5,190 of consolidated debentures to Mr. John Korman at par. Mr. Collins hopes to arrange for the sale of all the debentures to private parties in town, thereby saving the town a neat sum in discounts and brokerage.

A by-law was passed reappointing Mr. N. Crawford tax collector for 1916.

Herbert Trimble was given a rebate on his water rates for period that his house was closed up.

Fire Chief Alex. George reported that the hydrants of the town had been inspected, and he sent in a list of those found defective.

To Give The Details

Coun. Russell made a good suggestion. He suggested that in issuing the financial statement for the year that not only the bare summary of expenditures be given, but that every dollar be itemized. This is now given in the yearly Auditors' Report, but the auditors' report is not published until after election time. Mr. Collins said he was ready to provide such a statement if the printers would undertake to get it out in time at that busy time of year.

Chief Ferguson reported $2.58 Constable's fees for the month, and $12.80 Poundage fees. Tenders for the position of Town Scavenger were received from Wm. Chesney who offered to do the job for $989 per year and from George Detzler who would do the 400 boxes at $1.97 per box per year. Mr. Detzler's tender was accepted.

The Sanitary By-law, having to do with the regulation of closets was given its final reading and passed. Mayor Lippert said he would have circulars issued and circulated throughout the town, giving the public proper instruction as to the requirements of the by-law.

Mr. M. G. Dippel, representing the Methodist Trust Board, suggested the lowering of the sewer on Yonge St. to give the cellar of the church an opportunity to drain.

Mayor Lippert said that sewers were not for that purpose and it would be a mistake for the town to start lowering their sewers for that purpose.

Mr. Dippel recalled the fact that the sewer to the brewery had been lowered at the town's expense.

The Council granted the Methodists permission to connect up with the Jackson St. sewer about three hundred feet distant from the church property.

The Streets Committee brought in a report regarding the sewer on Gibson St., that the sewer be lowered and Mr. Warren be engaged to take the proper levels and make a profile of same, taking his instructions from the Streets Committee.

Rummage Sale

The Ladies of the Hospital Aid are arranging to give a Rummage Sale on Friday and Saturday afternoon, in the Soldiers' Rest Rooms, next to the Electric Light Office.

+ + +

An Interesting Meeting.

A meeting of the Women's Institute was held at the home of Mrs. John Richardson on Sept. 7th and a most interesting and profitable afternoon was spent by a goodly number of women. The meeting was opened with the Maple Leaf and after the usual business routine came a discussion as to whether it would be advisable for the Institute to send parcels of food to prisoners of war in Germany. It was at length moved and seconded that we send a parcel every two weeks to Private Runstadtler, who is the only Walkerton boy who has so far been captured. The sum of fifty dollars was also voted to the Red Cross Fund. In August 1915, the women decided on a thousand dollar campaign. After buying a soup kitchen with the first five hundred, they are spending the remainder in various ways. The programme consisted of two topics, namely, "How can we prepare to meet the problems that shall confront us after the war" and "Canning of Fruits and Vegetables." An excellent essay on the first subject which was given by Mrs. H. J. Waechter, was listened to with much interest, and the second took the form of a discussion in which many valuable hints and recipes were exchanged. The meeting closed with the National Anthem.

CURRENT COMMENT

The allies are on the offensive on all fronts, putting on a good front, as it were.

The Czar has honored the city of Verdun for its pluck by conferring on it the Cross of St. George, and it is not an iron one, either.

The German High Fleet sneaks out of the Kiel Canal occasionally looking for the British Grand Fleet, and when it sees it it scuttles back home again.

With British, French, Serbian, Italian and Russian forces in the Balkans, what chance have the Bulgarians, who are now even fighting with Greek troops?

Five negroes, two of whom were women, have been lynched by a mob at Newberry, Fla. They were accused of aiding the escape of another negro who was wanted for shooting a white man. Why rail at the Kaiser?

Berlin may talk about peace but the allies are preparing to keep the war going. Shells and shell steel were never in greater demand than now. The largest order for motor trucks placed in the States during the war has just been cabled to New York. Delivery will be made at the rate of 60 to 100 trucks a week until late next year.

The story of how the Duke of Devonshire, when Lord Hartington, yawned in the middle of one of his own speeches in the House of Commons, and later commented on the incident, has achieved the position of a classic, says the Christian Science Monitor. Sir Henry Lucy, none the less, in his recent volume of reminiscences, does more than throw doubt on its authenticity: he confesses to being responsible for it, and to have invented the greater part of it. He did actually see Lord Hartington "gallantly attempting to restrain a yawn while speaking"; but he adds that Lord Hartington's famous reply, "Ah, you don't know how dull the speech was!" to the lady who taxed him with it, was a pure invention. And yet the story finds due place in the official biography of the duke, who, indeed, ended by believing it, and accepting it as part of the Hartington tradition. This latter reminds us of King George of saintly memory, will we say, who told the story of his being at the Battle of Waterloo so often that he actually came to believe that he was present at it.

SOME WAR NOTES.

With British, French, Russian, Serbian and Italian troops actively engaged in hostilities with the Bulgarians, along with a few Germans, in the Balkans, there should be a change in the war map there before many weeks elapse. The entrance of the Italians in this zone of war proves troops to spare from the Austrian front and that she is now indifferent as to what Germany will do in the matter. The arrival of Russian forces on the Balkan front also shows that the Czar has an unlimited supply of moujiks and that he is willing to use them on any front. Gen. Sarrail two things. One is that Italy has scarcely needed these new arrivals, but their presence will hasten the end.

Ferdinand may put up a bold front for a while, but when he at last realizes that he can get no help from his allies he will most likely sue for peace. Even the Greeks are turning upon him and should the Roumanians attack him in the rear his collapse would be sudden. Success of the Allies here would mean the cutting of Germany's communications with the East and the isolation of Turkey from her allies.

Frederick Palmer, we presume it is, sends a most graphic word picture of the assault of Sir Douglas Haig's troops on the Thiepval ridge yesterday. He saw the whole performance as clearly as he might see a ball game from the bleachers. It was a fascinating as well as a terrible spectacle. Following the fury of the big gun attack and under the protection of curtain fire, the British soldiers advanced upon the German trenches, digging the enemy out like so many rats. The contemptible little army is now doing wonders.

But the end is not yet. Both Lloyd George and Winston Churchill warn the country that the Germans are yet far from being beaten. Lloyd George clearly sees the end while Churchill asks the country to be prepared for a long drawn-out war. The British people will go the whole way, be it long or short.

The Demon of the Desert.

It is not generally known how a devil rides a camel, but Mr. Hans Vicher acquired the information and imparts it in his volume, "Through the Sahara."

One night a camel suddenly ran amuck. Other camels followed suit, and a general panic ensued.

"The frightened yells of my escort told me that a ghoul, a wicked demon of the desert, had seized the camel. I was told how these evil spirits sometimes took a fancy to mount a camel; the camel would then look to see who was digging it in the ribs, and, perceiving no one, fear would grip its heart, for then it knew that the devil was on its back."

"Why are you asking me for help? Haven't you any close relatives?" "Yes. That's the reason why I'm appealing to you."—Birmingham Age-Herald.

CROSS PURPOSES

The little town remained in her memory as a picture, as places sometimes do, which being seen but once, in one mood and under one aspect, are not blurred and confused by conflicting impressions. The sullen clouds were as much a part of it as the footworn pavement; and a man with an organ, grinding a tune which had been popular a season or two before, was just as important as the vicar who went by with a bundle of little tracts, and bowed to Miss Vivian. The carriage stopped and went on as Tiny directed, the tradesmen started out of their shops as if somebody had pulled a string, and stood bareheaded and smiling at the door while she consulted Mrs. Leicester's list of commissions. At one place she went in, and Mrs Austin was left alone in a little square. The town hall was there, erected MDCCCXLIII.; there was also a drinking-fountain, with an inscription which she could not read. The great clock overhead struck four like a knell, and startled her just as she was thinking that Gilbert South certainly was not a hero, and yet —— And a moment later Tiny came out and said "Home" to the coachman.

They did not talk much as they drove back. When the lodge-keeper swung the gate open at the sound of their approach, it occurred to Mrs. Austin to wonder what Tiny had been thinking about so intently all the time.

That evening, after dinner, South came to her and stood for a few minutes turning over some photographs which lay at her elbow. One of them was of a place which he knew and she did not, and in answer to a question of hers he described it. He pressed his hand on the table as he spoke, and a white scar across one of his fingers stood out more prominently and caught Mrs. Austin's eye.

"That cut of yours left a mark," she said, when he had finished. "How frightened I was! do you remember?"

Gilbert looked first at his hand and then at her, with a strange, startled expression, almost as if he felt a throb of pain in his old wound. "Yes," he said. "I remember." And all at once the color came into his face as if he were a boy again. "I was cutting a stick for your brother Jack," he added, hurriedly, "and the knife slipped. Your mother tied it up for me."

"Yes, we found her in her storeroom. I think Jack thought you were going to die." Mrs. Austin, for a moment, instead of seeing seven or eight country gentlemen, most of them bald, and as many ladies, grouped in the Culverdale drawing-room, saw a sunshiny room, full of shelves and cupboards and boxes, where her mother, with capable hands, was bandaging that finger of Gilbert's, while Jack (poor fellow! he died at school) stood looking on, scared at first, and then, when he found that mother could set it all right, a little aggrieved because after all he hadn't got his stick. Oh, how long ago it all was, and how sadly the old home was broken up! She would have liked to take Gilbert's left hand in hers and hold it, just for the sake of that little scar and the dear people who were dead. And how deeply the memory of that time touched him! Why did he color up so suddenly at her question and turn away? Was there something special about this one incident? All at once it struck her that hitherto it had been Gilbert, and not she, who had said, "Do you remember?" Was he so pleased that she should say it? She recollected, too, that it was while he still had his hand bandaged that he spoke to her one evening by the white roses, and she promised to wait for him until he should come back to the old home. Perhaps that remembrance had called up his blush. Poor Gilbert, could he never forget his boyish inconstancy?

Mrs. Leicester heaved a deep sigh of relief when the guests were gone. "Dear me!" she said, suddenly, to Mrs. Austin; "is to-morrow really your last day with us? What are you all going to do to-morrow?"

There was a pause. "Are not we going to row down the river to some farmhouse?" Mrs. Austin inquired, looking round.

"To old Green's," said Frank.

"Speak for yourself, my dear," said Mrs. Leicester, laughing and nodding. "You don't catch me rowing down rivers. I shall have to die some day, I suppose, but there are plenty of ways of doing it without being drowned."

"Drowned!" Mrs. Austin repeated, with a glance at Frank.

"My mother wouldn't venture in a ditch in a life-boat without making her will and saying good-bye to me," he answered.

"No," Mrs. Leicester replied, in a tone of cheerful assent. "I'm a coward about the water. It's a very good thing everybody isn't like me. I'm sure I should never have found America, or Australia, or any of those places."

"No," said Frank, "nor the Isle of Wight. You might have seen it was there, like the moon."

"I thought you said you must go to the Carletons to-morrow," said Tiny, in a low voice, to Mrs. Leicester.

"Good gracious, so I must! I forgot. And you must go with me, you know."

"I won't drown you, if you'll trust me," said Frank to Mrs. Austin.

"I am not afraid," she smiled. "But you see it seems as if nobody would be able to go."

"You said you should like it," Frank persisted, turning his back to the others and looking fixedly at her.

"It would be very pleasant if it is a fine day," she replied, quietly. "But I don't want you to go entirely for me. I thought we were all going."

"I am going, anyhow," he said, "to-morrow or the next day. I want to speak to Green. Of course you will do what you like best. I thought you said you would like it."

"I am so sorry I must take Tiny," said Mrs. Leicester. "Old Mrs Carleton is her godmother, and she wants to see her, so I really must. What will you do? Will you come with us, or will you go with Frank? I'm sure he is always very careful, and of course there isn't any danger, really."

Mrs. Austin had no desire to make Frank miserable on the last day of her stay. "Oh, I should like the row very much, if it is fine," she said.

"That's settled, then," said Mrs. Leicester, cheerfully. "Mr. South, if there's nothing you want to do to-morrow, I'm sure we shall either of us be very pleased if you'll join us."

Frank scowled. But Gilbert, while he professed his delighted readiness to go anywhere or do anything, had not the slightest intention of proposing to make one of the water party. He was convinced that it would be fraught with peril—for him. "That hot-headed boy would certainly do his best to upset me into the river if I interfered with his arrangements," he said to himself. "If he could contrive to give me a ducking without splashing her, it would fill his soul with pure delight." Gilbert thought he would call on old Mrs. Carleton, who was unlikely to indulge in any such pranks.

Mrs. Leicester was really sorry that she was obliged to break up the party on this last day. She could not see, for her part, why Mildred and Mr. South had not settled matters a week ago, and enjoyed themselves comfortably as an engaged couple, taking their share of privileges and joking remarks. But she supposed it was to be put off till the end of Mildred's visit, and she was anxious to give Gilbert a chance of coming to the point. She had noticed that Frank seemed to prefer Mrs. Austin to Mr. South, and was inclined to bestow the attention which should have been divided between his guests entirely on her. Frank was inconsiderate at times, but she would give him a quiet hint to leave the two to themselves when they came back from their respective expeditions.

Gilbert South, unconscious of her beneficent schemes, woke the next morning to a dreamy certainty that his visit to Culverdale had been a mistake from first to last. For years he had remembered Mildred Fairfax as the truest, the most loving, the most beautiful of womanhood. He had dreamed of seeing her again; their meeting had been the one desirable possibility of his life. At last it had come; and he had found her no longer young, beautiful still in her widowhood, but pale, calm, clear-sighted, self-possessed, putting aside his attempt to utter his repentance with gentle words about friendship. Frank might well worship her in his boyish fashion; he was quite right, he had never seen Mildred Fairfax. But for his own part, Gilbert, had he known her intentions, instead of gratefully blessing good Mrs. Leicester, would rather have been inclined to complain to her, very ungratefully and unjustly, "You have

"Unsettled the pure picture in my mind;
A girl she was so perfect so distinct.
I detest all change,
And most a change in aught I loved long since."

That was the worst of it. He could not even go back to his dream. Call them up as he would with anxious efforts, his memories of his old love had been slowly dying, day by day, ever since he came to Culverdale. The actual recollections remained, cold, dead facts, but nothing more. There were moments when Tiny Vivian, just because of her youth and hopefulness, seemed nearer the true spirit of his former love than Mrs. Austin. It was not unnatural. If we idealize the past, and most of us do, there is an interval after which old books should not be reopened, old haunts should not be revisited, nor old loves sought out, except with a deliberate view to disenchantment. We expect too much. No sympathy is so perfect as that which we imagine. And Gilbert South had been especially fanciful and dreamy in his recollections. He had had, as it were, just a glimpse of Mildred's pure, girlish love, and then he had been drawn away by a woman older than himself who wanted a little amusement. He had been made a fool of, coarsely, by a practised flirt. Afterward he attempted to go back; he wrote a dozen letters of explanation and repentance, and of course sent off the worst. It was a failure, and partly in pique, partly in real disgust at himself, for he had a delicate taste, and his first faithlessness left an unpleasant flavor in his mouth, he swore constancy to Mildred's memory as he supposed, but in reality to himself as he would have had himself. It was that former self, as well as the former love, he had hoped to find again when he met Mrs. Austin.

With her it was different. She had trusted him, and he had failed her; the pain had been keen, but with a touch of scorn in it. And later, when the wound was healed and all bitterness gone, she thought of him, not unkindly, but as one whose nature was light and fickle. When she discovered how constantly he had looked back to that old love which she supposed was utterly forgotten, her memory awoke like the autumn blossoming of spring flowers.

On that last day all the interest seemed to her concentrated on the water expedition, as if it were indeed a voyage of vast importance. Nobody thought about the visit which Tiny meant to pay on old Mrs. Carleton; but one would have said that Frank and Mrs. Austin were going to discover a new island at least, and indeed the young fellow had such an impression concerning it as, if it happens to be verified, we call a presentiment. Mr. South and Tiny came down to the river to see them off, but, owing to some little delay in Frank's arrangements, they were obliged to go back, lest they should keep Mrs. Leicester waiting, and leave Mrs. Austin where she stood, a slim, dark figure at the water's edge. The dull gray surface, with its floating leaves and its grasses drawn by the silent current, was shaded by great groups of trees, whose dusky greenness was flecked here and there by glowing of autumn yellow. Mrs. Austin did not move. No breath of wind stirred the dark masses of foliage overhead; it was like a picture with something of melancholy stateliness about it. When Frank was ready the solitary figure disappeared from the bank, and they went gliding from under the shadow of the trees out into the wide, sunless fields.

Honestly, it was not a very beautiful scene. To Frank, who had known it all his life, the question of its beauty or ugliness did not occur; it was simply the river, and as such it had moulded his conception of all rivers. On its dark waters such childish dreams as he had known had embarked and set sail. As a boy he had fished there, just as four or five urchins were fishing now. They stared, open-mouthed and silent, at young Mr. Leicester and his boat, but took no notice of the lady who looked with a musing smile at the little rustic group as she went by. Presently came a curve in the stream, where a clump of alders grew, and bushes leaned despondently over the water, which was eating the earth away form their roots. The more distant prospect showed a monotonous variety of plowed land and pasture, with lines of trees following the hedges, and here and there a cottage or two and a bit of road. Mrs. Austin and Frank talked as they went. He told her how one bitter winter the river was frozen, and he skated to the farm where they were going now. He pointed out a lonely house, and spoke of the people who lived there. He showed how far the floods had reached in a wet season, a muddy expanse in which little files of cropped willows seemed to wade knee deep, and the water washed through the gates of lost meadows. And he broke off suddenly in the midst of what he was saying to ask, "Where shall you be this time to-morrow?"

"Half way to London, I should think," she answered; "I don't know how long the journey takes."

Frank looked at her, and was silent. He wondered whether he should speak as they came back.

The Greens' house stood by the roadside a little way from the river. The farm buildings and some big stacks had a pleasant, prosperous air; but the house itself was an ugly little plastered box, with a bit of tireless garden in front, blossoming with prim, sulphur-colored dahlias. Frank did not seem to have much to say to old Green, after all. The two exchanged a few words, and then came to the little parlor, where Mrs. Austin sat on a horse-hair sofa, giving the latest news of Mrs. Leicester and Miss Vivian to the farmer's wife. Frank was on very pleasant terms with his tenants, who evidently thought their young landlord a most important personage. Other people were "high," but vaguely "high," and a duke would not have impressed Mrs. Green as much as Mr. Leicester from the Manor House. The Prince of Wales, perhaps, as a young man residing in palaces, and holding a well defined position as the Queen's son, might have eclipsed Frank, but it would have taken a prince to do it. Mrs. Austin perceived, with a single smile, how unimportant she was compared with her companion, but she was not in a mood to be amused by that or anything else that afternoon. She was glad to leave the house, to escape from hospitable offers of cake and home-made wine, and to find herself once more upon the road. Even then, however, the old farmer insisted that Frank should look at a shed which was not satisfactory, and she had to wait while the matter was discussed.

There was a little pond, with neat white railings, just opposite the house, and she strolled across and stood by it with a mysterious sense of loneliness and desolation upon her. Still as the afternoon was, she fancied that there was a mournful little rustling in the boughs of a stunted oak which grew a few yards away. The little pool mirrored a vacant gray sky. It was absurd, and yet she felt as if she would have given anything to see Gilbert South coming toward her; instead of which, it was Frank who had torn himself away from the farmer and darted across the road.

"I've kept you waiting," he said: "I'm so sorry! Oh and you are tired, aren't you?"

"A little," she allowed. "Nothing to matter."

"It's too bad of me! What can I do?" he exclaimed, with anxious solicitude. "Come in again, and let Mrs. Green make you some tea."

"Oh, no, no," she said. "I would rather go back."

Frank was in despair. "What a brute I am!" he reproached himself.

Mrs. Austin fairly laughed at the intensity of his remorse. "What would you do if I were very tired?" she said.

He hardly dared to speak to her as they went back, and perhaps it was owing to that enforced silence that later he recalled with especial vividness the plash of his oars on their quietly winding way, the little ripples lying among the dry autumnal reeds on either bank, and the light from the west, where a pale sun struggled feebly through the clouds, falling coldly on the beautiful face before him. For Mrs. Austin, meanwhile, a soft current of thought flowed with the river, setting ever more strongly toward a final resolution. If it rested with her to make Gilbert South happy, why should she not do it? He was not what she had once imagined him, yet he was truer and better than she had believed him during the years they had been parted. There was no man living whose thoughts and memories, nay, whose little tricks of speech and gesture were bound up with her past life as Gilbert's were; and the recollection of his troubled face haunted her like a reproach. "Why not?" she said to herself over and over again, to the measured sound of Frank's oars; "why not—why not—if it would make him happy?"

"I don't know why it is," she said to young Leicester, when they had landed, and were walking slowly up to the house, "but I have had a feeling all this afternoon as if something were going to happen."

"That's funny," said Frank; "so have I."

"Have you, really? If I had known that, I might have wondered whether you were really going to drown me. But here we are, safely landed, in spite of our forebodings."

He surveyed the sullen sky. "Perhaps there's thunder in the air," he suggested.

"Perhaps. That might account for my feeling tired. I've been a dull companion, I fear."

"No," Frank was beginning to say, when he stoped short. They had just come in sight of the house, and he stared at a farmer's chaise, driven by a laboring man, which was going away from the front door. "That's old Clayton's trap," he said; "what on earth has that come here for? And—why surely that's my mother coming to meet us—they can't possibly have been there and got back by this time!"

"There has been an accident!" said Mrs. Austin, with sudden certainty. "Go and see what has happened. Your mother is safe, but——"

(To be continued.)

PALE, WEAK GIRLS

Grow Into Weak, Despondent Women —How to Overcome the Trouble.

Healthy girlhood is the only path to healthy womanhood. The passing from girlhood to womanhood lays a new tax upon the blood. It is the overtaxing of the blood that makes growing girls suffer from headaches and backaches, from paleness and weakness and weariness, from languor, despondency and constant ill health. Unhealthy girlhood is bound to lead to unhealthy womanhood and a life of misery. Nothing but the blood-building qualities of Dr. Williams' Pink Pills can save a girl when she undertakes the trials and tasks of womanhood. That is the time when nature makes new demands upon the blood supply. Dr. Williams' Pink Pills actually make new, rich blood to meet these new demands. In this simple, scientific way Dr. Williams' Pink Pills give growing girls new health, and makes their dawning womanhood bright and attractive. Miss A. Sternberg, Haileybury road, New Liskeard, Ont., says: "I have much reason to be grateful to Dr. Williams' Pink Pills, as they restored me to health, if, indeed, they did not save my life. In 1911 I began to feel run down, and the doctor who was called in said that mine was a bad case of anaemia. I lost flesh, always felt tired, and I got so nervous that I could scarcely hold a cup to take a drink. My heart would flutter alarmingly. The doctor did not seem to be able to help me at all, and my family and friends all thought that I was in a decline and could not recover. I was in bed for some weeks when my aunt came to see me and urged that I try Dr. Williams' Pink Pills. My father got a supply, and by the time I had taken three boxes there was a noticeable improvement, and from that on I steadily progressed toward recovery. I continued using the pills for some time longer, and they restored me to my old-time health and strength. I shall never cease to praise this medicine and to urge all weak, run-down girls to give it a fair trial, as I have proved in my own case their great merit."

You can get these pills from any dealer in medicine or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

Life's Dictionary of Musical Terms.

Aria—A title given to a part of an opera to indicate that the singer expects the action to be interrupted by applause at the conclusion.

Bravo: The pass-word of the professional claqueur.

Bravura: The pyrotechnic style of those virtuosos who habitually exceed the speed limit.

Cadenza: A capsule of compressed technique inserted by a soloist whenever the composer's music becomes dangerously easy or intelligible.

Conductor: An automaton which, if properly wound up, keeps time to the playing of an orchestra.

Encore: A French abbreviation of the Yiddish phrase, "Once more yet again already," much used by patrons of music who insist on getting their money's worth.

Opera: An expensive form of entertainment provided as a background to a lavish social display.

Oratorio: An old fashioned relic of the days when the Bible was taken seriously and music was innocently believed to be a combination of melody, harmony and rhythm.

Motif: The tag with which Wagner labels his musical ideas. By learning the names of the motifs one can talk intelligently about any of the operas.

Recitative: A barking utterance of unintelligible words, used by operatic composers to save the trouble of writing real melodies.

Minard's Liniment for sale everywhere

Legend of Hapsburg Castle.

According to legend, the ancient castle of Hapsburg, overlooking the Rhine, was founded in 1020 and was without surrounding walls for defensive purposes, a strange omission in those warlike days. A friend coming to stay at the castle so greatly deplored the absence of the usual defences that its lord declared that before sunrise on the following morning his stronghold would be surrounded by impregnable walls. Naturally the visitor smiled and did not believe that this thing could come to pass, but in the early morning he was awakened by the lord of the castle, who bade him look out upon the walls. He had kept his promise, but in an unexpected way. Instead of seeing a surrounding wall made of stone, the visitor saw an unbroken circle of the lord's followers, all in their armor and bearing weapons. And it has since been the boast of the Hapsburgs that the family's devoted subjects were sufficient defence in no matter what emergency.

Minard's Liniment Co., Limited.

Gents,—A customer of ours cured a very bad case of distemper in a valuable horse by the use of MINARD'S LINIMENT.

Yours truly,
VILANDIÉ FRERES.

Modesty.

When every pool in Eden was a mirror
That unto Eve her dainty charms proclaimed,
She went undraped without a single fear or
Thought that she had need to be ashamed.

'Twas only when she'd eaten of the apple
That she became inclined to be a prude,
And found that evermore she'd have to grapple
With the much debated problem of the nude.

Thereafter she devoted her attention
Her time and all her money to her clothes,
And that was the beginning of convention,
And modesty as well, I suppose.

Reaction's come about in fashions recent,
New girls conceal so little from the men,
It would seem, in name of all that's decent,
Some one ought to pass the apples 'round again.
—Chicago Music News.

"A leap year is never a good sheep year.—Old English Saying.

LITTLE, BLACK AND UGLY.

And Very Touchy, Too, is the Devil's Coach Horse Beetle.

My, how very touchy he is! Point your finger at him and see how he turns up his tail and opens his jaws, just as if he were a lion instead of a tiny beetle. He thinks he is going to frighten us away. But we won't hurt him, anyway because he is a very valuable sort of beetle—a tiny garbage man. He's called the devil's coach horse beetle.

He's long, black and ugly. He spends his time hiding under stones or crawling about in gardens. Like a majority of beetles, he's one of nature's scavengers.

Have you ever thought what a dirty old world this would be if it were not for the animals and birds and insects that go around cleaning up? Certain birds and animals devour the bodies of other animals, but they leave it to the beetles to clean up the crumbs.

So he's busy all day devouring the little particles that the big eyes of the buzzard cannot see. He's always celebrating clean-up week. So don't blame him if he turns up the end of his tail and looks at you threateningly when you disturb him. He's too busy to play.

Minard's Liniment Cures Burns, Etc.

Puzzle of the Eagle and the Whale

There are two animals that puzzle naturalists more than any others. They are nature's submarine and aeroplane, the whale and the eagle. It is known that whales occasionally descend as much as 3,000 feet below the surface of the sea. Why they are not injured scientists have yet to discover. It is this pressure which prevents a modern submarine descending even 300 feet, let alone 3,000.

Eagles have been seen through telescopes to fly with apparent ease from 20,000 to 40,000 feet above sea level. At that height no human being can live owing to the rarefaction of the air. How the birds live and fly at far greater heights than man can endure for long is a question still to be answered.—Pearson's Weekly.

A Woman's Message to Women

If you are troubled with weak, tired feelings, headache, backache, bearing down sensations, bladder weakness, constipation, catarrhal conditions, pain in the sides regularly or irregularly, bloating or unnatural enlargements, sense of falling or misplacement of internal organs, nervousness, desire to cry, palpitation, hot flashes, dark rings under the eyes, or a loss of interest in life, I invite you to write and ask for my simple method of home treatment, with ten days' trial entirely free and postpaid, also references to Canadian ladies, who gladly tell how they have regained health, strength and happiness by this method. Write to-day. Address: Mrs. M. Summers, Box 8, Windsor, Ont.

Couldn't Fool Him.

She hailed from a remote country village in England and had traveled by rail on a visit to friends who resided in a distant town. While entering the railway station for the return ourney she found to her dismay that she had lost her handbag, which contained her return ticket and cash.

After a fruitless inquiry and search a lady to whom she had spoken of her loss very kindly offered the suggestion that the old dame should wire to her husband at her expense, and ask him to telegraph a money order, also telling him the circumstances in which she was placed. She assented to this, and the telegram was sent and duly delivered to the old dame's husband. He tore the missive open and read it.

"Any answer?" asked the messenger.

"Na, our brass neither," said he. "They'll find they hobbut got a noodle this time. They'll not hoodwink me; that bain't Mary's writin. I could tell 'ers from hundreds."

Minard's Liniment Relieves Neuralgia.

GILDED LIMES.

A feature of Native Festivals and Feasts of South India.

Instead of changing cards the well-to-do natives of southern India show their esteem on New Year's Day by presenting to their friends limes covered with brass leaf, or in some cases with gold leaf. As the natives have several New Year's days of their own in addition to the special ones of the English, the Mohammedans and the Tamil and Telugu branches of the Hindus, the gilded limes are passed around rather frequently. The custom is a purely local one, and it had its origin so far back that no one remembers when or why it was started.

In addition to the New Year's festivals gilded limes are sometimes presented to the host at the ordinary "tamash" or social gathering. If a native is too poor to afford gilded limes, not to mention gold covered ones, he gives plain, undecorated ones.

It is said that a great quantity of brass leaf is used for decorating limes for these special occasions, and the bazaar trade in this kind of gilt is very large throughout the southern part of India. Brass leaf is sold also for the decoration of gilded caps, or "topi," worn by the Mohammedans in that part of India, as well as for ornamenting the dress of the Mohammedans women.

Iron Bridges.

Introduction of the semielliptical arch in bridge building in England met with complaint on behalf of the Tweed tide people, because the roadway over it being almost level, as one old man said, "You did not know when you were on it and when you were off it." The first iron arch constructed was made in England at Coalbrookdale by one Darby. The bridge consists of one semicircular arch, 100 foot span, each of the ribs being cast in two pieces only. It was opened for traffic in 1779, and a new era in the art of bridge building was thus entered upon. Up to 1800 cast iron was predominant in bridge construction, and although it is believed that wrought iron was introduced before 1800 it does not appear to have been extensively used before.

A TYPOGRAPHICAL UNION.

To print a kiss upon her lips
He thought the time was ripe;
But when he went to press, she said:
"I do not like your type."
—Boston Transcript.

A kiss he printed on her lips
And showed life no contrition,
Because the artful minx inquired:
"Well, where's the next edition?"
—Birmingham Age-Herald.

A kiss he printed on her lips
And she made this oration:
"Please, please, continue doing that
It boosts my circulation!"
—New York Evening Sun.

A kiss he printed on her lips.
She smiled, the artful creature,
And modestly inquired of him:
"Was that a special feature?"
—Moscow (Idaho) Star-Mirror.

He tried to kiss her lips again,
But couldn't quite get at her;
She held a book in such a way
They were "next to reading matter."
—Boston Courier.

To print a kiss, he did insist,
Upon her lips—but listen!
The maid was meek, she turned to cheek—
'Tis more "Preferred Position."
—Montana Daily Record.

He called her collie, lambie, kid,
Until she made petition:
"All barnyard names I now forbid,
Am I a "Stock Edition?"
—William Willetts.

Pale-Cheeked Girls Tired-Out Women Quickly Built Up

WONDERFUL RECORD MADE BY NEW BLOOD-FOOD REMEDY.

Certain Results Guaranteed.

Pale people have pale blood.

In other words, the blood is watery and lacks red corpuscles.

The stomach is wrong.

Assimilation is poor and food is not changed into blood. Naturally the system is robbed of vitality, lacks strength and reconstructive power.

Don't slip from vigor into weakness.

Don't allow the appetite to fail, but instead use Ferrozone.

You're bound to feel rejuvenated and strengthened at once.

Appetite is braced up, digestion is stimulated, vigor imparted to the stomach. Everything you eat is transformed into nutriment that supplies what your thin, weak system needs.

Vital, life-giving blood that makes rosy cheeks and dancing eyes—that's the kind that Ferrozone makes.

The strength and buoyancy that defies depression and tiredness, that's the sort you get with Ferrozone.

Every pale woman can transform her bleached-out appearance with Ferrozone.

Not only will it impart looks and spirits, but by rebuilding all weak, tired organs, Ferrozone establishes a soundness of health that's surprising.

For women and girls who want to feel well, to look well, to be well, and stay well, nothing known in the annals of medicine is so certain as Ferrozone.

Won't you try Ferrozone?

Concentrated cure in tablet form, that's Ferrozone, 50c per box or six for $2.50, at all dealers, or direct by mail from The Catarrhozone Co., Kingston, Ont.

The Kilted Evzone.

The Greek soldier may present to some a highly humorous picture in his ballet skirts and tunic. Despite his peculiarities of dress—which, by the way, are scarcely more peculiar than those of some other nations—he is an excellent fighting man.

The evzone, as he is called, would no more abandon the skirt than would a Scot his kilt. It is a part of his national honor, a part of his personal being. It is a right handed down to him from ancient times. A bas relief of the soldier who fought at Marathon shows him in similar costume. His costume is no ephemeral piece of clothing, for it is worn with the dignity of ages behind it. The evzones are ignorant of fear, and if they look anything but soldierly their appearance is belied by their ability to fight under extraordinary conditions.

A Trick With an Egg.

Place two V-shaped wineglasses of the same size near the edge of a table. In the right hand one put an egg, just fitting the rim in the glass. Hold the bases of the glasses firmly down, the top rims touching each other. Now with a quick, sharp breath blow upon the line where the egg and the glass meet. The egg will jump to the other glass. With a little practice this can be done every time. Be careful to blow in a line with the left hand glass or the egg will jump in the wrong direction and land on the table.

The glad hand is no place for the finger of scorn.

WANTED—BY
ber—good compe
vent; no objection to
Apply, Mrs. Alex. Murra
Hamilton, Ont.

MISCELLANEOUS.

WANTED—GIRLS OF GOOD EDUCATION to train for nurses. Apply, Wellandra Hospital, St. Catharines, Ont.

GIRLS WANTED

Experienced knitters and loopers, also young girls to learn. Clean work and highest wages.

CHIPMAN-HOLTON KNITTING CO., LIMITED.
HAMILTON, ONTARIO.

RABBITS FOR SALE.

RUFUS RED BELGIAN HARES, Grey Flemish Giants. Fully pedigreed. All ages. D. C. Walters, 7 Jackson street west, Hamilton, Ont.

FOR SALE.

FOR SALE—PLANING SAW AND Chop Mill; doing good business; also motor truck, 1 1-4 ton capacity, in No. 1 condition. Apply to John McCormick, Lawrence Station, Ont.

Official Ignorance.

One of the best of the many stories of English official ignorance of the colonies is recalled by P. A. Silburn in "The Governance of Empire." Lord Palmerston was forming a new ministry and in a preliminary council was arranging its composition. He had filled up all the portfolios with the exception of the colonial office. First one name and then another was suggested and thrown aside. At last he said to Sir Arthur Helps: "I suppose I must take the thing myself. Come upstairs with me and show me where these places are on the map."

Minard's Liniment Cures Dandruff.

FORSAKEN ENKHUIZEN.

At One Time One of Holland's Richest and Greatets Cities.

Of all the so called "dead cities" of the Zuider Zee, Enkhuizen has most completely lost her former prosperity. One who wanders about her silent and empty streets can impossibly realize that this shrunken and depopulated city was once one of the wealthiest and most important in Holland.

Enkhuizen dates from the ninth century or even earlier. In the zenith of its greatest, the seventeenth century, it possessed 40,000 inhabitants and a fishing fleet of 400 boats engaged in the herring trade. Enkhuizen sailors were well known for their courage and seafaring ability.

But less than a hundred years later the harbor of Enghuizen was silting up, and her commerce had already declined. Since then whole streets have been pulled down, as the population diminished, for only a few thousand inhabitants remain. But the ancient gate, the Dromedaris, that guards its now empty harbor still stands, a monument of the past greatness of Enkhuizen.

The noble western Kerk is built of the deep red, narrow bricks often used in Netherlands architecture. In its choir are some sixteenth century wood carvings. Its unlovely wooden belfry is detached, but connected with the church by a minute but attractive guard house. The small, old, red tiled houses, each with a different facade, form an irregular line that is singularly charming. The streets of the little town are very quiet and empty. Their stillness is almost unbroken except by some beautiful chimes.—Argonaut.

One of London's Seven Curses.

There are in London thousands of poor folks whose principal meals come from the fried fish shop which, because of its evil smell, has been described as "one of the seven curses of London." Yet to a hungry man the smell of fried fish is a most enticing odor. George Gissing has described how maddening it was to him in his darkest days "to smell the fish he had no money to purchase," and how when affluent to the extent of a few coppers, he "eagerly bought and devoured the crisp golden colored slices of fresh cooked fish—surely the food of the gods."—London Chronicle.

Ruskin says: "He only is advancing in life whose heart is getting softer."

Time for Peaches and Cream! To get full palate-joy with maximum of nutriment for the day's work eat them on shredded wheat biscuit—a complete, perfect meal, easy to prepare, appetizing and satisfying. In Shredded Wheat all the body-building material in the whole wheat grain is retained, including the bran coat, which is so useful in promoting bowel exercise.

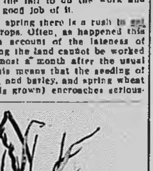
Made in Canada

CULTIVATION IN THE FALL

After Harvest Cultivation Destroys the Weeds—Land Should be Plowed in the Fall Whenever Possible.

Fall cultivation should be carried n not to take the place of spring cultivation, but rather supplement it. If nd is properly cultivated in the fall is safe to say that about three arters of the preparation of the ed bed required in the spring will eliminated. An additional advange is that there is a good deal more ne in the fall to do the work and ke a good job of it.

In the spring there is a rush to get the crops. Often, as happened this ear, on account of the lateness of he spring the land cannot be worked until almost a month after the usual ime. This means that the seeding of he oats, and barley, and spring wheat (if any is grown) encroaches seriously on the time usually allotted for the seeding of the corn, with the result that all the work is rushed and none is done properly.



Twitch Grass.

In the fall, however, there is usually plenty of time between the harvesting of the grain and the harvesting of the corn and roots to plow and ultivate. Often, indeed, the land does ot freeze up until near Christmas ime, so that from the point of view of saving labor and doing efficient work," the fall is the time to plow, cultivate and prepare the land for the crops that are to be sown the following spring.

Quite apart from the fact that fall cultivation saves time in the spring it should be practised, because it is a very cheap and effective way of killing weds.

If one lets the weeds get too firm a hold it may be necessary to allow the land to lie fallow and cultivate it all summer. This means that a year's crop is lost and if the acreage is at all considerable entails a serious financial loss.

Where a proper rotation of crops is followed, however, and a hoed crop sown once every three, four or five years, and the land is cultivated in the fall as soon as possible after the crops are harvested weeds can be kept in check with a minimum of expense.

PLOW SHALLOW FOR WEEDS.

Where after-harvest cultivation is practised to destroy weeds, as soon as the crop is taken off, the land should be plowed. The plowing should not be deep—not more than three or four inches. If the crop just harvested is corn and particularly if the soil is sandy, plowing will not be necessary. It will be sufficient to give the land a good discing, care being taken that the discs are so set that they will go fairly deep into the soil.

After plowing or discing the land should be harrowed and as soon as the weeds begin to sprout a broadshare cultivator should be put on the land, and the soil thoroughly cultivated. Care should be taken that the shares overlap sufficiently so that ll the weeds will be cut or uprooted and none missed. The land should be harrowed again so as to pull up and expose the plants that have been cut.

As soon as more weeds appear the cultivation should be repeated. By thus repeating the cultivation almost until the time of the freeze-up most of the weeds will be killed. Last thing ist before the ground freezes it would be ridged up with a double-mouldboard plow. This will expose a large portion of the surface of the soil to the weather and the few weeds that have not been killed by the cultivation the land has received will be killed by the frost.

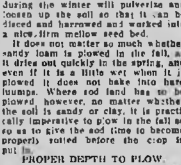
Moreover, by ridging up the land in this way it will dry out earlier in the spring and it will be possible to work it about a week sooner than would otherwise be the case.

Whether or not the chief object of cultivating in the fall is the destruction of weeds it is not always advisable to do as much plowing in the fall as possible. This applies with especial emphasis to clay land. If clay land is plowed in the spring when it is the least bit wet it will bake into hard lumps, and it is practically impossible to work it into a nice fine seed bed. By plowing in the fall it does not matter so much whether the land is a little wet or not. The frost during the winter will pulverize and loosen up the soil so that it can be disced and harrowed and worked into a nice, firm mellow seed bed.

It does not matter so much whether sandy loam is plowed in the fall, as it dries out quickly in the spring, and even if it is a little wet when it is plowed it does not bake into hard luumps. Where sod land has to be plowed, however, no matter whether the soil is sandy or clay, it is practically imperative to plow in the fall so so as to give the sod time to become properly rotted before the crop is put in.

PROPER DEPTH TO PLOW.

The proper depth to plow is a debatable question. It depends on such a variety of factors that no hard and fast rule can be given. Where the land is full of weeds and weed seeds plowing should be shallow. If the plowing is deep the weed seeds and root stalks of the weeds bearing the buds are transferred to a greater depth and it is consequently harder to get them to sprout and to kill them by cultivation.



Canada Thistle.

If land is plowed shallow and after harvest cultivation practised every year a farm can be cleared of weeds in short order, but if the land is plowed deep the weeds will remain in the soil and cause trouble for years, probably.

Where the land is not infested with weeds it is better to plow deep. This applies especially to heavy clay soils. The deep plowing loosens up the soil and by allowing the air to get into it aerates it and helps to liberate some of the locked up fertility of the soil.

If land has been plowed shallow for a number of years it is unwise to commence deep plowing immediately. The under soil is usually less fertile than the top soil because it is not aerated to the same extent. The best plan is to increase the depth of plowing by half an inch or an inch every year until the full limit of plow depth is reached. As a rule it will not pay to plow more than six or seven inches deep, as the increase in crop yield secured does not pay for the extra labor involved.

The depth of plowing also depends on the type of the soil. The sandy soils do not require to be plowed as deeply as clay soils. Thus while it would be sufficient to plow a sandy soil four inches, it may be advisable to plow a particularly heavy soil six inches.

—CANADIAN COUNTRYMAN.

HIS DAY

Wilson's married daughter said of the communication that it was most likely a practical joke. Alternatively she hinted that the firm had but to glance at her grey-haired father and instantly he would be sent home to spend the day as usual in the park if fine, and if wet in the free library.

"But," she added, with candor, "so long as you're away from the house, dad, and out of my sight excepting at meal times, I don't very much care what happens. If they tick you off, mind you're back here by 1 o'clock sharp. Don't bother about kissing the children."

Wilson, generally obedient to commands, insisted upon giving farewells, and the youngest—sometimes his companion on journeys with himself as coachman and the infant toiling in the pushcart—the youngest was persuaded, after some trouble, to say, "Good luck!"

The early tramway car was moving, but he hopped on neatly, and the girl conductor, whose help he had declined, gave a brief lecture on risks endured by the mature who were either careless or daring. The subject of ages was discussed by passengers on the way, and everybody guessed everybody's age; one man, with his own idea of amicable discussion, flatly contradicted each statement made and suggested that that truth and his companions had never been made formally acquainted. "At any rate," he challenged, turning, after he had quarrelled with the rest, to Wilson, "I'll take my oath you won't see your 60th birthday again." The only reply was a non-committal wink.

The girl conductor watched him so narrowly as he prepared to alight in New Kent road that he did not venture to give another exhibition of agility by jumping off before the tramway car came to a stop. A few minutes' walk took him to the gates, once familiar to him, of a cartage contractor's establishment; some lads who had arrived in good time hailed him as Mr. Noah and asked whether he had been caught in the wet recently. Under the leadership of a bright youth they were enjoying sport when senior hands strolled up, with bags and blue tea cans, and these addressed the butt with a respect that put an end to joyous chaff.

"Mr. Wilson, I believe," said one. "Heard they'd called some of the superannuated ones, owing to so many of our men joining, and I had a sort of a kind of idea that you'd be among 'em. You see," argumentatively, "I put it to myself like this: Never having been asked to subscribe threepence towards a wreath, I concluded you must be still alive."

"You weren't far out."

"I seldom am. And what sort of a job do you think they're going to give you?"

"That's what I've been wondering."

"Some odd work about the yard," suggested the man, genially, as the gates were opened by the timekeeper, "that don't require much muscle and makes no demands upon brains."

Wilson, after a brisk two minutes' interview with the foreman, discovered himself to his great content attending to the harnessing of a horse, loading a van, and giving directions to the bright boy who was to be his colleague, and now endeavored to explain that his earlier deportment had been prompted by the other lads. "I've always tried," pleaded the boy, "to keep on friendly terms with my mate, and "it's hard lines on me that I should have made such an unfortunate start at the outset." He was told that bygones might be considered bygones. Other carmen came to give advice concerning the round to be undertaken and to offer hints; discovering that the new hand was on a task which he had carried out for close upon 40 years, they apologized and retired. Wilson had a confidential talk with the horse before stepping up to the driver's seat, and the horse nodded to intimate that he would do his share in the day's work.

It was a proud man who drove out of the gates and it was an anxious man who, a few minutes later, found himself in the stress of traffic in the main road. He drove cautiously, and when tramway cars rang at him and whistled at him he drew off the lines without delay; this to the open disgust of the boy who found himself robbed of one of the pleasures and rights of van lads. The junction at the Elephant presented difficulties earlier days: motor omnibuses at every corner, criss-cross streams of vehicles perplexing to the eye and disturbing to the nerves, pedestrians dashing about; fortunately there were policemen to control and give signals. In Blackfriars road the perils were less.

"Bless my soul!" cried a warehouse man at the first delivery, "if it isn't my aged and highly respected chum Wilson come to life again! You won't believe it, but it was only the day before yesterday I was thinking about you. A clumsy lout of a carman put down a big case here that was intended for a pace on the city side of the river and I says to myself, 'Now the venerabe Wilson'—excuse me calling you so, won't you?"

"That's all right. 'Tisn't the first time I've been referred to by that title."

"'The venerable Wilson,' I says 'would never have committed such a catastrophe like that. In all the long years I knew him,' I goes on to myself, 'I don't say that I ever knowed him make a real and genuine bloomer!' And I wish," continued the warehouse man earnestly, "that I could prove that what I am telling you now is gospel truth, because I am aware there's lots of people who place no faith in coincidences. It happened like this. A clumsy lout of a carman-"

At the end of the repetition Wilson assured the other that the occurrence was in no way incredible and gave particulars of many dreams of the past wherein he received letters from his firm begging him to return and give assistance. The van boy whistled a line of We won't go home till morning, and the friendly chat came to an end in going across the bridge the lad spoke of the attractions of a sailor's life and declared that if he were offered the job of an admiral he would take it like a shot. Wilson approved of some of the details of the project, but suggested it was a mistake to be saying X, Y, Z until you had first learned A, B, C. He could remember the time when he cherished ambitions that had come to nothing.

In the city the van's journey took something of the air of a triumphal progress that required only the music of Pomp and Circumstance. Acquaintances recognized here, alterations identified there, inquiries made and particulars obtained concerning old Barclay and old Richardson and old up that had formerly been patronized for the midday meal now called itself a high-class restaurant, but the boy was in a position to act as guide to another establishment of a less haughty and exclusive type.

"Enjoyed your meal?" asked the waitress, in taking the money.

"Miss," he answered frankly, "I ain't relished anything so much for years."

"Terrible war this that's going on," mentioned the young woman. "Don't you think so?"

"It's not without its compensations."

"What a funny thing to say!" she remarked. "You must be one of them that look at the bright side."

"Whenever I get the chance," remarked Wilson.

His daughter told her neighbor from whom she kept few secrets and no grievances that dad had come home tired, but in excellent temper, had slept well and had gone off again to his work happy as a sandboy.

"The one drawback is," she lamented, "that he seems rather more independent in his manner than what he used to be. I suppose the fact that he can pay now for his board and lodging may have something to do with it. And I foresee the time when as the saying goes, it'll cost half a crown to speak to him!"—Pearson's Weekly.

LIFE OF A SHIP.

Vessels That Were Built Over Century Ago Still Seaworthy.

The war has disinterred aplenty of old hulks that we thought had passed away for good—hulks philosophic, chiefly. Lately come two old sailing ships, the one built in [illegible] and the other in [illegible], patched up and put overboard in Denmark to reap the high carrying rates of a submarine age.

This one sounds like robbing the graveyard, and it is unusually enough in the maritime times. But it is not exactly amazing as ships go, and these hoary old Danish bottoms can undoubtedly give a good account of themselves. It is hard to say just what the record is for long-lived ships. A few years ago the oldest vessel afloat was said to be another Danish vessel, a small sloop named the Constance, laid down in no less distant a year than 1721. Next in point of honor stands the Victory. Laid down in 1759, she was not past middle age when Nelson commanded her at Portsmouth, flying the flag of the commander-in-chief of the British navy, even if the changing science of war has made her unwanted in the North sea. A recent Lloyds Register gave one merchantman built in 1819, two in the '20s and twelve between 1830 and 1840.

According to American records, we are not so fond of our old ships on this side of the Atlantic. The fate that nearly befell the Constitution years ago comes to warships, yachts and merchantmen rather early in life. On the records of the navy department, the oldest ships that appear are the Constellation and the Constitution, both laid down in 1797. Next in line is the Portsmouth, built in 1843. The old America, built in 1851 and still as sweet a craft as ever, can head the list of yachts. On the roster of merchantmen there are plenty of boats from the '60s, a fair showing from the '50s, but almost nothing earlier. The schooner Catherine of Ellsworth, Me., is set down to 1832, and the schooner Joyce Rebecca was built at New London, Ct., in 1837. There may well be older craft off the record, yet still minding the helm as well as ever. For steam vessels, the old Nantasket of Boston bay fame, built in 1857, was only lately doing service on the Hudson under another name.

Of course, these oldtime wooden craft have all been repaired and repaired until it is hard to say to just what year they should be ascribed. Nobody ever thinks of letting a boat go to pieces like the one-hoss shay. It is usually a change of fashion, in model, that eventually lands a sailing craft on the mud bank to await whatever last trump there is for boats that have done their best. These two old Danish coasters of the eighteenth century will look as obsolete as last year's automobile when they put out to sea. They are both old enough to have heard the guns of Nelson—one might even remember the work of John Paul Jones. Let us hope it is not their fate to be catapulted into the hereafter on the nose of a von Tirpitz torpedo.—New York Tribune.

Peculiar Occupations.

The trade of tooth stainer, followed in eastern Asia, is as odd a calling as any. The natives prefer black teeth to the whiter kind, and the tooth stainer, with a little box of brushes and coloring matter, calls on his customers and stains their teeth. The process is not unlike that of blacking a boot, for a fine polish is given to the teeth. The pigment used is quite harmless. In Arabia the trade of "gossiper" has many followers. The "gossiper" collects all the news, tittle-tattle, jokes and stories he can get hold of and then goes from house to house retailing them. If he has a good manner and can adapt his recitals to his audiences he makes a very fair income.

THE POULTRY WORLD

NEW LIGHT ON LATE HATCHING.

It is the general opinion of poultrymen that late-hatched chicks stand but a poor chance of making profitable poultry.

But is this common failure necessary, or can proper care overcome the handicap of extreme heat?

Here is the experience of summer hatching on the Edgecombe, North Carolina, test farm in 1915: The chicks were brooded in the combination sitting and brooding coops. There was not sufficient shade, so burlap sacks were sewed together and supported over the coops by stobs driven in the ground. These chicks were given buttermilk to drink, and the mash mixed with it. The mash consisted of equal parts ground oats and cornmeal. This constituted the simplest kind of food, and one that is easily obtainable on any farm.

The birds consisted of pure-bred White Plymouth Rocks. One lot of the end of eight weeks consisted of 28 chicks, and averaged .63 pound. There were originally 30, making a loss of two by accident. These were hatched July 11, so that the brooding extended through August into the first week of September. Another lot of Buff Plymouth Rocks handled in a like manner showed an average weight at eight weeks of .80 pound. These chicks had an abundance of shade. Shade must be had, and if it is not supplied by trees and shrubbery, it must be provided by tents and burlap. Several other tests showed that the birds do not make such favorable gains in hot weather, but make fairly creditable gains, reaching the squab broiler size at eight weeks of age.

Our experience at this station makes it evident that one reason for lack of success with late-hatched chicks on some farms is neglect. It also became very apparent that it is best to feed milk, as the gains were much greater where milk was given. Sour skim milk or buttermilk was found about equally good.

Lice and mites are a frequent cause of failure in raising hot-weather chicks. It is impossible for a lousy or mite-stricken bird to do well.—B. F. Kaupp.

CHOLERA.

This is a contagious disease caused by bacteria, and is usually brought in by the introduction of infected birds or by water or feed contaminated by the excrement of sick birds. It is also possible for fowls to be infected through wounds or even by the inhalation of germs in the form of dust. The symptoms include great thirst and the voiding of feces of which the part normally white is yellow. This is not a sure indication of the disease, for the same thing may occur as the result of other disorders. Diarrhoea is generally a prominent symptom, the droppings being firm and voided frequently, and in the later stages the yellow portion may change to green; the fowl become depressed, the feathers become ruffled, the comb becomes pale or very dark, and the bird has a poor appetite. Sometimes the disease runs rapidly through a flock, destroying the greater part of the birds in a week, or it may assume a more chronic form, extend slowly, and remain on the premises for several weeks or months. Fowls affected with this disease usually die within thirty-six hours. Many so called cases of cholera are simply diarrhoea. In most cases medical treatment for cholera has proved unsatisfactory. The best method of combatting the disease is to carry out strict sanitary precautions as regards cleanliness and disinfection, and to totally destroy the carcasses of dead birds. Droppings should be burned or thoroughly disinfected by mixing it with a 10 per cent. solution of carbolic acid. Disinfect the building by spraying thoroughly with a 5 per cent. solution of carbolic acid, and then whitewash.—A. P. I.

NOTES

Poor feeding kills many chicks.

Give no feed for two days after hatching.

Leg weakness results from lack of bone-making food.

The first chick feed should be a dry mixture of cracked grains. Cracked corn, wheat, kafir and pinhead oats are all good.

Feed sour milk or beef scraps to help build muscle, feathers and bone. One per cent. of bone meal should also be included in the ration.

Feed three times a day and no more, but add rolled oats to the chick feed twice a day and stale bread crumbs or corn bread will do if there are no rolled oats on hand.

Feed finely cut lettuce, onion tops or other green stuff if the chick cannot be allowed to run on grass, for they must have something of this kind to keep the bowels working properly.

Poor growth and lack of thrift usually indicates something wrong with the feeding. A few grains of sand during the first few days after hatching help to prepare the stomach for food later, though the chick is still living on the yolk drawn into its body just before hatching.

Commercial ground feed may be fed or a coffee grinder may be used in cracking the grains. Never feed wet mixtures until the chicks are at least five weeks old. Use corn meal that has not heated in sack or bin, and place a wire screen over it in the trough to prevent it from being scratched out and wasted.

Curious Apache Belief.

The Apache Indians' religious belief prevents them from committing murder in the dark. If a dozen Apaches should discover a man sleeping by his campfire at night no amount of money would hire them to attack him until the sun came up. They believe that if they kill a man at night their own souls will walk in eternal darkness forever. Knowing this curious superstition, hunters, scouts, trappers and others traveling through the Apache nation in the old days moved about during the night and lay by in some safe retreat during the day.

"Why are you asking me for help? Haven't you any close relatives?" "Yes. That's the reason why I'm appealing to you."—Birmingham Age-Herald.

French beauty aids Canadians under fire. Vicomtess Giselle de Rancougne, a noted French beauty, made a flying trip of sixty miles in her automobile to carry medical supplies to the part of the line held by the Canadians in July. She has been engaged in work of this kind practically since the war started, being under fire almost every day.

Jutland Mystery

As it was evident that certain circumstances in the recent engagement off the coast of Jutland were not accounted for either in Sir John Jellicoe's despatch or in the official reports published in Germany, so in all independent attempts to reconstruct the battle critics are obliged to employ hypotheses in filling up the hiatuses and explaining such incidents as have not hitherto been explained by those who witnessed them. It is significant that in Sir David Beatty's report of the proceedings of the battle-cruiser fleet there is no indication to show when or how the Indefatigable and Queen Mary were sunk, while in the unofficial narratives which have passed under the eye of the censor there is a hint of conscious suppression, as if certain facts concerning the sinking of these as well as the third battle-cruiser were purposely withheld, perhaps for fear of giving useful information to the enemy. Thus Mr. Pollen, while making it clear that both were blown up at a very early stage of the engagement, intimates that he is not at liberty to enter into "the true explanation," adding that "the Admiralty, no doubt, will give this to the public if it is thought wise to do so."

When the first meagre accounts of the battle reached this country a conclusion commonly drawn was that the advanced squadrons had been caught in a trap. It was the obvious explanation of the loss of the battle-cruisers, and it was also put forward by several critics abroad. All of them seem now to have abandoned it in the light of further evidence, but it appears that many naval officers here still cling to it as the most reasonable explanation, and dismiss the explanations offered by Sir John Jellicoe, Sir David Beatty, and all British, French and Japanese seamen as biased, if not, indeed, deliberately invented to excuse a gross tactical blunder. Their belief is simply this: That the Germans led the British battle-cruisers on a course of their own choosing over submarines or mines placed in position for that very purpose. On no other ground, they say, is it possible to account for the loss of two such units in the first half hour of the action. Mr. Pollen's express statement that neither torpedoes nor mines had any part in the matter is apparently accepted as evidence that they had.

What was the tactical blunder that led to this lamentable disaster? According to these censors it was nothing less than a reckless abandonment of one of the first principles of warfare, which is to bring to bear upon the enemy at the point of contact a greater force than he can put in opposition. What Sir David Beatty ought to have done, they hold, was instantly to turn northward toward the main effect. Thus he would have effected concentration, and had the Germans failed to follow they would have been obliged to acknowledge that they declined action, thereby greatly enhancing the prestige of the British navy, to the manifest prejudice of their own morale. The case is so simple that anyone who offers to think otherwise must, they conceive, be utterly ignorant of the very elements of naval tactics.

It is true that the case is simple, so simple that we are surely justified in assuming that Sir David Beatty must have had something else in mind. Let it be remembered that when he first met the Germans they turned south, evidently trying to escape or to lead him into danger. He must have been very well aware of the risk he ran in following, very well aware that it would have been safer to steer to the northward. But had he not followed the Germans, the main fleets, as Sir John Jellicoe had pointed out, would never have been in contact. Is it not safe, then, to assume that his object was to draw the enemy, as he put it himself, into the jaws of the British fleet? He had six battle-cruisers against Hipper's five, and had he done what some tacticians say he ought to have done, is there any reason to believe that he could have accomplished his purpose? Is there any reason why Hipper with his inferior squadron should have followed?

The tactical considerations on which offhand condemnation of Sir David Beatty are based are really a little too elementary to be altogether convincing. There is an abundance of examples in naval history for the subordination of obvious tactical truisms to strategic considerations, and it is by no means clear that in this case Sir David Beatty was excessively hot-headed or that the results did not justify his action. It is inconceivable that if the losses of the Germans come near Sir John Jellicoe's estimate they can possibly regard the result with complacency. But, it may perhaps be urged, the circumstances were such that they were able to claim a victory. True; but they claimed a victory with no less assurance after the disastrous engagement off the Dogger Bank in January, 1915.

In conclusion, censure is undoubtedly justified if we must accept Capt. Sims' opinion that the British had no business to invite a general fleet action or to attempt the destruction of the German fleet, "because they already had as complete control of the sea as would have resulted from the defeat of the enemy fleet." On the opposite side we have the opinion of some English enthusiasts that a British naval commander is obliged to attack incontinently against any odds. That absurd belief in a non-existent tradition may be dismissed as unworthy of serious consideration, but we can dismiss it without accepting Capt. Sims' singular argument, though that argument be amplified by trite tactical maxims.—New York Tribune.

SLUMS AND SOCIETY.

Some Amusing Reminiscences of Rev. James Adderley.

Canon, actor, journalist, author, socialist, labor agitator, slum worker, society mentor, and a man who has distinguished himself in a dozen and one other ways, it is scarcely surprising that the varied experience of the Hon. and Rev. James Adderley, now vicar of St. Gabriel's, Birmingham, and honorary canon of the Midland city, should be vastly entertaining and amusing.

Some of the best stories told by the canon in his reminiscences, "In Slums and Society" (Fisher Unwin), concern famous preachers he has met. Incidentally he confesses that he got to know Dr. King, who became Bishop of Lincoln, very intimately through singing comic songs to him after dinner. "He (Dr. King) forgave me many things in after years because of those songs," the canon frankly confesses.

Very amusing is his story of Dr. Temple, the gruff, outspoken Archbishop of Canterbury. "He had been holding a confirmation and had missed his train home," says the canon. "The vicar, foreseeing that this meant the Bishop's presence at Evensong, asked him to preach. He refused. Then, to be prepared against all criticism, the vicar said:

"'I would like to inform your lordship that I used to preach written sermons, but I have lately registered a vow never to preach except extempore, I find it so much better.' Grunt from the Bishop.

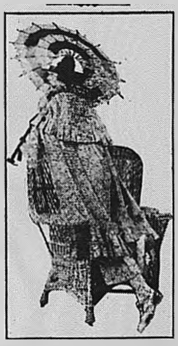
"The sermon came and went. Steps were heard tramping up the aisle to the sacristy. Then the Bishop, before all the choir and sidesmen, raised his hand over the vicar and said, 'I hereby absolve you from your vow!'"

Father Benson, whose weakness was long sermons, also figures in an amusing story. "Once, after he had finished a fifty minutes' oration, he went up to the Holy Table to give the Blessing, when he suddenly remembered that there was a notice he had been asked to give out. He proceeded to do so. 'Bless me if he ain't busted out again!' said the verger."

Local clergy, sextons, and bridegrooms figure in many of Canon Adderley's stories. He relates the story of a bridegroom who, on being asked, "Wilt thou take this woman to be thy wedded wife?" replied, "I renounce them all." "If you go on like that," said the clergyman, "I shall turn you out." "That is my desire," promptly replied the bridegroom.

Then there was the bride who, on being remonstrated with for having brought her young man to the wedding in a state of intoxication, said, "He won't come at all when he's sober"; and to the story of a clergyman who announced that the preachers for Lent would be found "hanging in the porch" might be added that of the announcement from our pulpit that "the collection to-day will be to get rid of the dry rot in the pulpit."

Another parson arriving at a church on a very wet night remarked that he was soaked through. He was encouraged by his friend saying "Never mind, you will be dry enough in the pulpit!"



A beach wrap, with double cape effect having pleatings of self material, is shown. At a distance it looks like soft velvet, but on closer observation one discovers the material to be satinized rubber.

Chats With the Doctor

BY A PHYSICIAN

SLEEP AND INSOMNIA.

A certain amount of sleep is necessary, not only for health, but for the continuance of life itself. I pointed out in a recent article some of the ills that follow excessive sleep, but evils little less, and in many cases much more, follow an insufficient sleep.

Insomnia, or sleeplessness, may be brought about by quite a number of causes. Among the chief of these may be named insufficient exercise, excessive activity of the mind, especially when largely occupied with thoughts of oneself, with worrying, in short—coldness of the surface of the body, overheat of the surface of the body, and ill-ventilation of the room. All causes which unduly stimulate the consciousness such as excitement and pain of all kinds tend to prevent sleep. That is why indigestion is so frequent a cause of insomnia.

Anyone who has the smallest tendency to insomnia should deal with the situation at the earliest moment. He should first attend to his bedroom. This should be kept as simple and as free from unnecessary draperies as possible, and should, of course, be scrupulously clean and free from dust. The windows should be kept well open night and day. The bed should be so placed that, without draught, fresh air constantly passes over the face as one lies in it. The bed should be reasonably comfortable, and the bedclothes should be of just such an amount and weight as to cause neither an obvious sensation of cold nor one of heat. Naturally, there is no universal law as the amount of bedding needed, since idiosyncrasy plays a great part in these matters. Some people have a much greater fund of animal heat and more vigorous circulation, whilst others readily give up their warmth and have little reserve to fall back upon. In cold weather some people with poor circulations may desirably cover their extremities with woollen coverings such as bed-socks, and may even use hot water bottles with advantage. Fresh air, however, should never be sacrificed.

So much for the bedroom. Much also may be done in the regulating of the daily life to check any tendency to sleeplessness. A reasonable amount of active outdoor exercise should be taken every day, wet or fine, and if the mind can be kept actively and pleasantly engaged in the pursuit of work, sport or hobbies, it will be less inclined to brood. A happy condition of mind and body is the ideal.

Any tendency to constipation must be remedied—if necessary by the use of aperients, and the diet should be ample and nourishing, yet light and simple. Such things as cake, pastry, tea and coffee and alcohol are, as a rule, best avoided, though, in some cases, a glass of ale or stout seems to promote digestion, and consequently sound sleep. Many people find it a good plan to take a bowl of bread and milk or a cup of cocoa or of warm milk on getting into bed. It is certainly desirable to cultivate the habit of going to bed at a fixed time, and many people find it a help to take with them to bed a little light literature, to read for ten minutes or so before putting out the light. In some cases a warm bath just before going to bed is a great help. People who have the habit of waking up at three or four in the morning may find it useful to have a glass of cold water by the side of the bed, which, drunk when they wake, often has the effect of sending them off to sleep again at once. Drugs should not be used, except under medical orders, and as a last resource. Many of them are dangerous, and all are apt to create a habit which it is difficult to break.

DIET IN CONSTIPATION.

Before resorting to aperient drugs persons who suffer from constipation should make every effort to remedy their condition by hygienic and dietetic means. I get so many questions bearing on this subject that a few general hints will probably be of some help to many readers.

In the first place, then, anyone with a tendency to constipation should make it a rule to take all the active exercise that circumstances permit each day. And these exercises should be of such kind as to bring into play not only the muscles of the limbs, but the muscles of the whole body, including those of the abdomen. Rowing, riding and digging are such exercises. In the matter of diet, much can be done. Meat should be taken in strict moderation. Vegetables and fruit should form the principal part of the dietary. Oatmeal porridge is good, and brown or wholemeal bread should be substituted for white. Tea is generally found to be rather constipating, although experience is not uniform. It is certainly a good plan to drink plenty of cold water between meals, and especially to take a glass of cold water the first thing in the morning, on rising. Even where all these measures are taken it still will often be found necessary to supplement them at first until a habit has been established by regular small doses of some laxative medicine. Many suitable drugs are at our disposal, and it is generally a good plan to ring the changes on these rather than to adhere too closely to any one of them. Cascara in the form of tabloids or of liquid extract, compound liquorice powder, Epsom salts, and Glauber salts, compound aloin tablets and compound senna mixture—all of these are simple, harmless and efficacious.

FOR BURNS AND SCALDS.

The most generally useful application in case of burns or scalds both when the skin is broken and when it is unbroken, is boracic lint, thickly covered with vaseline. The vaseline should be spread nearly an eighth of an inch thick, so that it will be easy to remove the dressing without further damaging the already injured skin.

How Plants Remain Upright.

If a flowerpot is laid on its side the stalk of the plant growing in it gradually curves upward until it resumes the vertical position. This is called geotropic curvature, and the question is by what means the plant is stimulated to change its direction of growth. One theory avers that movable starch grains in the plant cells fall to the lower side as the position is changed and by their pressure influence the mechanism of growth.

BURDOCK BLOOD BITTERS CURED DYSPEPSIA.

Unless the stomach is kept in good shape your food will not digest properly but will cause a rising and souring of food, a feeling of rawness in the stomach, pains in the stomach or a feeling as if a heavy weight were lying there.

Burdock Blood Bitters cannot be surpassed as a cure for dyspepsia and all its allied troubles.

Mr. James R. Burns, Balmoral, N.S., writes: "About two years ago I was badly troubled with dyspepsia, and could not get any relief. I tried most everything, not even the doctors seeming to do me any good. One day a friend told me to try Burdock Blood Bitters, as he had seen it advertised. I did so, and by the time the first bottle was gone I felt better, and after taking three bottles I was completely cured. I highly recommend it to all sufferers from dyspepsia."

B.B.B. is manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Things You Ought To Know

Miss Botha Purcell, of Carnesville, Ga., was appointed a delegate to the state Democratic convention. She is the first woman delegate to a political convention in Georgia.

Ore that will run $10,000 to the ton is said to lie in a recently rediscovered mine in Colorado, the old Horsefall lode, in which the vein was lost many years ago and never rediscovered until now.

U. S. Department of Agriculture experts have demonstrated the practicability of making good print paper from zacaton, a grass which grows extensively in the southwest and as far south as Argentina.

The total length of the railways in Spain is now 9,377 miles, of which more than three-quarters is of standard gauge. The receipts of the railways decreased 3,000,000 in 1916 from receipts in 1915.

Three Chilese girls who recently arrived at Vancouver, are the first women stowaways to land in Canada.

A mammoth oil-driven harvester that is being tried on Australian wheat fields strips about sixty acres a day.

Military training is compulsory on all male citizens between the aged of 12 and 25 in New Zealand.

According to a consular report from Amsterdam, the national wealth of Holland has increased since the war began by 060 per capita.

It costs Paris nearly $100,000 a year to care for the trees on its streets and boulevards and in its parks, more than 1,000 new ones beinng planted annually.

Glass that will not splinter when broken is being made in France by pressing together under heat two sheets of glass with a sheet of celluloid between them.

French scientists have decided that carrier pigeons are influenced by magnetism, and that, with the growth of wireless telegraphy, much less dependence can be placed on them.

Business Night, inaugurated by the merchants of Vernon Centre, Minn., is proving a great success. Each Thursday night the movie theatre is free to the farmers and other visitors, the bands play and the men's quartette sings. Autos line the streets, and by the increased business in town the merchants are more than repaid for the expense.

IN A DEPARTMENTAL STORE.

I saw a shopgirl bid good-bye
To a boy in a khaki coat;
She smiled at him though her eyes were dim,
And sobs rose up in her throat.
His face was hopeful, and glad and strong,
And eager beyond belief;
But behind her smile I could see a soul
That was shattered and torn with grief.

I saw a shopgirl bid good-bye
To a boy who was off to war;
The love-light gleamed from her eyes and seemed
To sweeten the whole great store.
Folk turned away as she raised her head,
As her hand on his arm was laid;
For behind the light in her tender eyes,
Was a soul that sobbed—and prayed.

I saw a shopgirl bid goodbye
To a boy who had heard the call
Of honor, and land, and deeds that stand
For a nation over all.
His thoughts were out in the open fight . . .
But, oh, as she watched him go,
Her clasped hands fell on the counter there,
And her face was stark with woe.
—Margaret E. Sangster, Jr., in The Christian Herald.

Blobbs—Most ball players are crazy about automobiles. Slobbs—I should think they would make better aviators. Blobbs—Often up in the air, eh? Slobbs—Well, they have a habit of going out on flies.

A Sluggish Liver CAUSES LOTS OF TROUBLE.

Unless the liver is working properly you may look forward to a great many troubles arising, such as constipation, severe headaches, bilious headaches, sick headaches, jaundice, sick stomach, etc.

Mrs. J. Shellsworth, 227 Albemarle St., Halifax, N.S., writes: "I take pleasure in writing you concerning the great value I have received by using your Milburn's Laxa-Liver Pills for a sluggish liver. When my liver got bad I would have severe headaches, but after using a couple of vials of your pills I have not been bothered with the headaches any more."

Milburn's Laxa-Liver Pills are, without a doubt, the best liver regulator on the market to-day. Twenty-five years of a reputation should surely prove this.

Milburn's Laxa-Liver Pills are 25 cents per vial, 5 vials for $1.00; for sale at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

HANDICAPPING THE PREACHER

Under the heading "Handicapping the Preacher" the Presbyterian calls attention very forcibly in a recent issue to an intolerable condition that is prevalent in our church buildings nearly everywhere one goes. The Presbyterian says in part:—

> "The new minister in a large city church in Canada. Sunday before last, was a bit of a disappointment to his expectant congregation—congregations are always expectant at the beginning of a man's ministry—because the day was oppressively sultry and hot and because every window in the church was shut tight and had been shut tight for a week anyway. The people were air-poisoned before the man got to his preaching and the handicap of a vitiated, vile atmosphere brought him to the finish of that service not as much of a success as he and his people had hoped he might be."

What puts folks to sleep of a Sunday morning is not the sermon, but the stuffy air they breathe. The poor preacher doesn't get half a chance. It's a wonder more of them haven't rebelled and insisted on a bit of ventilation. A Chicago newspaper remarked recently in its sensational way, "More people are sent to Heaven by poor ventilation than by the preachers' sermons." There is more than a grain of truth in that statement.

EDITORIAL COMMENT

Your local newspaper is about the cheapest thing in the world.

+ + +

Don't say "Hello!" in answering a telephone call. It will save time and sometimes confusion to give your name or the name of your firm.

+ + +

After paying the highest wage in the industrial world, and after turning out the cheapest car, the Ford Co, made a profit last year of $59,994,118.

+ + +

Owing to the increased cost of getting out a newspaper the Durham Chronicle has been reduced to six pages, and the Mount Forest Representative to four.

+ + +

A University of Chicago teacher says that you can taste music—that the violin, for example, is claret and the flute sugar. Well, there are also the corn-et and pickle-o, the trom-bone and the pie-ano.—Chicago Evening Post.

+ + +

"Among the many comical things in this funny world," the Signal Hill Sage says, "is a man putting a five or ten cent piece on the church collection plate and insisting upon grandiloquently calling it an offering.—Orillia Packet.

+ + +

The Farmer's Advocate: "Work for and boost the fall fair so that the people who are now beginning to see something in agriculture will be obliged to admit that after all there is nothing that can surpass the old farm and what it can produce."

+ + +

The Postoffice Department, it is announced, is to issue a new stamp, brown in color, to take the place of the combined two-cent postage and war tax stamp. Brown, we presume, because of the roasting the stamp now issued has had from the public.

+ + +

Goderich Signal—Don't let yourself "get tired" of subscribing (and paying) to Red Cross and other patriotic funds. Suppose the lads in the trenches should "get tired" and come home without finishing their job. If the work at the battlefront is to be kept up, we must the less difficult and less dangerous work at home.

+ + +

In many lines of business just now, almost any kind of help has to be made do, "hands" are so scarce. But is it so with the farmers too? The following newspaper clipping looks like it: The Farmer—"Ah! there you are! Where have you been all this time and where's the mare I told you to get shod?" The Hand—"Shod! I thought you said shot! I've just been a burying of 'er."

+ + +

Never before in the history of cheese-making in Canada has the Board price of 20 cents and a fraction been reached. That must be more than three times the price which sometimes ruled say thirty years ago. In the cheese-making districts farmers are in luck again this season, though the butter-making sections surely have nothing to complain of either.

The New York Sun has a story about a field of Brussels sprouts near the explosives factory at Rigaud, where, nutured by nitrogenous products, the sprouts attained such a size and succulence that one sold for $10.23 and furnished a treat for scores at a church supper. The Sun's correspondent overlooked, however, the field of peas in the same neighbourhood, which were similarly stimulated to such proportions that the whole population use the pods for canoes.—Montreal Star.

BRUCE RURAL SCHOOLS

What Some of the Country boys and Girls Have Been Doing for the Cause of Empire.

The tangible way in which the pupils of the Country Schools of Bruce have been showing their loyalty to King and Country was well brought out by an article in the Daughters of the Empire edition of the Telescope, by Mrs. McCool. Readers of this paper will no doubt be interested to have particulars of what some of the individual schools of rural Bruce have been doing, and this information we are privileged to give them from figures that were gathered earlier in the year:—

S. S. No. 11, Brant, Edith E. Fortune, teacher, raised $23 for patriotic purposes.

S. S. No. 3, Arran, (Lang's School) Miss K. L. Robb, teacher. The children pieced four quilts for Belgians, collected money for motor ambulance and helped to collect names for autograph quilt by people of School Section.

U. S. S. No. 10, Elderslie and Sullivan, Nettie McLaughlin, teacher. Children contributed $1.25 in money, and 19 quarts of jam.

S. S. No. 5, Arran, Miss E. Greenwood, teacher, raised $5 by a concert.

S. S. No. 12, Bruce, Belle Robertson, teacher. Raised $154.50 by Box Social given by the school and Girls' Sunshine Club, and by sale of potatoes.

S. S. No. 7, Greenock, Elizabeth McCurdy, teacher. Contributed $8.50 by collection.

S. S. No. 6, Culross, B. Farquharson, teacher. Raised three dollars by selling buttons and collection at private concert.

U. S. S. No. 1 Amabel and Arran, Sarah J. Rowe, teacher, $6 was collected and two bed comforts made, as well as mouth cloths sent for hospitals.

S. S. No. 9 Brant, Rachael Stade, teacher, $15 raised by concert and collections.

S. S. No. 2 Brant, Florence Lamb, teacher. Total raised, $72.07, consisting of $16.25 from war plots, Trafalgar Fund, $5.00, garden party $57.62.

S. S. No. 2, Elderslie, Gordon Fiddie, teacher. $9 raised for patriotic purposes by school picnic.

Dunkeld School, Mary Keith, teacher. This school contributed $128, of which $101 was raised by two box socials, $16.50 collected for motor ambulance fund, $8.65 for Belgian Relief Fund, and $3.50 from War Potato Plots.

U. S. S. 5 Amabel and Keppel, Annie Broadfoot, teacher. $6.75 was raised by means of a concert.

S. S. No. 9, Elderslie, Blanche Moore, teacher. $11.00 was raised by a box social, $1 by Children for soldiers' hymn books, and $3.00 by teacher to Motor Ambulance Fund.

S. S. no. 5, Elderslie, (Gillies Hill) Florence M. Diebl, teacher. Contributed $1 by collection.

S. S. no. 2, Albemarle, M. Patterson, teacher. Children contributed $5 by collection.

Hogg's School, Carrick, A. Irene E. Pletsch, teacher. Children sold potatoes and got up concert, making $41.00.

S. S. no. 11, Elderslie, Lila J. Hooey, teacher. $51 was raised by a social and Christmas tree entertainment. Eight pairs of socks knit.

S. S. no 12, Brant, Viola Goodwin, teacher. On Trafalgar Day they had a little patriotic concert at the school and the children brought contributions for Red Cross.

Tara Public School, Agnes R. Tugman, teacher. An Empire Day donation for socks was made, totalling $7.20.

S. S. No. 1, Elderslie, Tena E. Oswald, teacher. The children contributed $13.50 in money and by selling war potatoes.

Otter Creek School, Miss M. B. Hogg teacher. Raised $85.55 by box, social, Trafalgar Day. War Plot potatoes, and School Fair prizes. The children knit 8 pairs of socks.

S. S. No. 2 Brant, Cargill, E. A. Huttle and Miss G. Keeling, teachers. Scholars gave $14.75, teachers $9.75, also helped in Red Cross Work, selling flags on Trafalgar Day.

Chesley Public School, H. S. Sanderson, principal, contributed $10.85 in cash. Girls knitted socks and made bandages, mouth wipes etc. Some clothes and toys were sent to the Belgiums. Boys collected old papers for Red Cross Branch. The money collected was raised by individual subscriptions, some selling flowers to raise the money.

S. S. No. 1, Brant and Elderslie, Miss Mary Kerr, teacher. A Box Social was given and the children had war potato plots, which yielded a total of $76.50. Fifteen hundred mouth wipes and half a dozen face cloths were made.

S. S. No. 13, Elderslie, Mary E. Green, teacher, raised $18.50 by contribution and proceeds of concert.

S. S. No. 11, Amabel, Mrs. L. A. Hoy, teacher. Parents contributed $18. Four pairs of sox were made.

No 2, Albemarle, Miss H. Dinniwell, teacher, $6.20 collected by children on Trafalgar Day.

S. S. No. 9, Huron Tp., Muriel Campbell, teacher, raised $33.10 by collection and by entertainment.

S. S. No. 1, Bruce, C. Breckenridge, teacher, contributed $7 by Box Social.

S. S. No. 2, Huron Tp., Ida M. Stewart, teacher. The children raised $4.11 by free-will offering of pennies. Teacher contributed $3 and 6 pairs of of socks.

Bervie Public School, John Cook, teacher. Contributed 46 cents in cash, sent 157 mouth wipes to Red Cross as well as gum.

S. S. No. 6, Greenock, Melville Reid, teacher, made $125.00 for Patriotic purposes by two box socials.

Paramount School, Isabel McDiarmid, teacher. Contributed $76.50 raised by collection and box social.

S. S. No. 6, Kinloss, H. McMillan teacher. Contributed $3.00 by collection.

S. S. No. 4, Culross, Grace Fowler, teacher. Children gave in collection of $4.10

S. S. No. 1, Greenock, Mabel Kirkton, teacher. Box social, $68.00, sale of tags $8.00.

S. S. No. 2 Kinloss, A. C. Stewart, teacher. Raised $16 for Red Cross by an entertainment.

S. S. No. 8, Huron, Miss A. McLay, teacher. Sent presents to soldiers at Christmas. Contributed $3, helped getting names for Red Cross quilt.

Riversdale School, Jos. Dietrich, teacher. Raised $15.00 by box social and sale of Red Cross flags.

S. S. No. 2, Saugeen, Florence Gray, teacher. Raised $195.00 by Box Socials' proceeds from table at Fall Fair, and Potato War Funds.

Hillsdale, No. 3, Kincardine, Jean McTavish, teacher. Contributed $3.25 and 2 prs. socks. Sixteen pupils gave Patriotic drill at Belgium Relief Concert and at Patriotic Hospital concert. Embroidered a Red Cross quilt.

S. S. No. 7 and 8, Elderslie and Saugeen, D. D. Campbell, teacher. Raised $4 by subscription, $30 from box social, and $3.60 for sale of potatoes.

S. S. No. 5 Greenock, G. G. McKee, teacher. Contributed $1.25 by collection and sale of tags.

S. S. No. 4, Saugeen, Mary Lamont, teacher. Box Social, $56.35, war plot potatoes $17.50, total $73.85.

One teacher sends the rather amusing answer.—We have not done anything but we are loyal to the core!

One of the best reports comes from a rural school near Paisley, Miss Nellie McGillivary, teacher. The scholars raised $30 by a concert, $20 by collection in summer holidays, $7.40 by war potato plots. They knitted 10 wash cloths, and several pairs of sox. Parents, teacher and pupils of the section also organized a live Red Cross Society which collected $120, made some $121 by a Box Social, shipped a hundred pairs of socks, 100 shirts, 18 sheets, 25 pillows and slips, knitted wash cloths etc.

The figures for Dunkeld School, Miss M. Kerr, teacher, one of the most active in patriotic work, have unfortunately been mislaid.

LETTER FROM ALVIN WILTON

Mr. and Mrs. Dan Wilton received the following letter from their son, Alvin, who is with a Trench Mortar Battery in France, under date of Aug. 18th:—

Dear Parents:—

We are billeted in a barn which is very comfortable. We arrived here early this morning. Being very tired we were not long in getting to sleep. Our last few days were very strenuous and not much sleep got by anyone. I think we will be here for a few days so we will get well rested up. We make our own meals, I just finished making a tin of tea. It wasn't as good as I used to get at home but it touched the spot. The crops are very good here but labor seems very scarce. Harvesting is all done by hand, very old fashioned. There is quite a change in the weather, it is quite cool. We are going to have some time learning the French language and money. Girls are all around selling candy etc. Well, dear parents, I must close, hoping to hear from you very soon. Love to all. From your loving son,

Alvin.

A post card from Alvin received a couple of days later stated:—I am going to see Reg McCarter's and Ray Hyslop's graves my first opportunity. It is very wet here, and we have mud up to our boot-tops. I have seen quite a few of the Walkerton boys that have been here for some time.

Pte. A. E. Wilton, No. 127,520.
Trench Mortar Battery,
10th Infantry Brigade,
4th Can. Div. B. E. F.

THE PUT-IT-OFFS

My Friend, have you heard of the town of Yawn
On the Banks of the River Slow,
Where blooms the Wait-a-while flower fair,
Where the Sometime-or-other scents the air,
And the soft Go-easys grow?
It lies in the Valley of What's-the-use
In the Province of Let-'er-slide:
That tired feeling is native there,
It's the home of the listless I don't-care
Where the Put-it-offs abide.
The Put-it-offs smile when asked to work,
And say they will do it to-morrow,
And so they delay, from day unto day,
Till death cycles up and takes them away,
And their families starve, beg or borrow.

Bread Making Contests
At Rural School Fairs

PRIZES—Free Courses at Macdonald Institute, Guelph
Free Poultry Raising Courses at Ontario Agricultural College
Free Cook Books and Magazines

Over 1,500 prizes in all will be offered in bread-making contests which will be held this fall at over 250 rural school fairs taking place in Ontario. It will be a great event at the fairs and will stimulate interest in bread-making among young girls between the ages of 12 and 17 years.

Here is a wonderful opportunity for your daughter to win for herself a Free Course in Domestic Science at the famous Macdonald Institute, Guelph. All she has to do is to bake one double loaf of bread and enter it in the contest at the fair according to the conditions explained below and more fully told in the folder we will send you on request. The loaf must be baked with

Cream of the West Flour

the hard wheat flour guaranteed for bread.

This is a splendid flour which makes the biggest, bulging loaves—whitest, lightest and most wholesome bread you ever baked. Is this not a splendid opportunity to interest your daughters in breadmaking?

Here are the Splendid Prizes offered for the best loaf of bread baked with Cream of the West Flour. The following are offered at each local Fair:

1st Prize—1 paid up subscription to "My Magazine" for 1 year. This magazine is full from cover to cover every month with articles suitable for young people of all ages. It is published in England. Value $2.00 per year.

2nd Prize—6 months paid up subscription to "My Magazine" Value $1.25.

Extra Prizes—When entries exceed ten a 3rd prize will be awarded of 6 mos. paid-up subscription to "My Magazine." When the number of entries exceeds twenty the judges at the fair will award 4th, 5th, and 6th prizes of one year's paid up subscriptions to "The Little Paper." This is a wonderful little publication issued every month in England. Its eight pages are packed with highly engaging information and stories relating to history, nature-study, animals, bird life, etc.

Important—The winners of 1st prizes at the fairs automatically become competitors for the Provincial Prizes. The second half of the double loaf is sent to Ontario Agricultural College, Guelph, by the district representative in special container provided. The judging is done by Miss M. A. Purdy of the Department of Breadmaking and Flour Testing at the College.

Provincial Prizes—The winners of first prize at each local fair compete for following Provincial prizes. The first and second prizes, or third and fourth prizes, will not be awarded in any one county:

1st Prize—Short Course (3 months) in Domestic Science at Macdonald Institute, Guelph. The Macdonald Institute does not accept students under the age of 17 years; if the winner be less than 17 we present her with a certificate entitling her to take the course when she reaches the right age. Value of course $35.00, which pays for fees, room, board and washing. The winner lives at Macdonald Hall while taking course.

2nd Prize—Short Course (3 months) in Domestic Science at Macdonald Institute, Guelph.

3rd Prize—Short Course (4 weeks) in Poultry Raising at Ontario Agricultural College, Guelph. Girls taking this course do not live at the College, but good boarding houses will be secured for them in Guelph. Value of course $35.00, which pays board of student in Guelph. (No fees are charged for course.)

4th Prize—Short Course (4 weeks) in Poultry Raising at the Ontario Agricultural College.

5th to 29th Prizes—The Famous Boston Cooking-school Cook Book by Fannie Merritt Farmer, latest edition (1914). There are 2117 thoroughly tested recipes and 130 photographic reproductions of dishes, etc., besides much special information.

Conditions of the Contest

Every girl may compete at the rural school fair in her district, whether or not she attends school, providing that her 12th birthday occurs before November 1st, 1916, or her 17th birthday does not occur before Nov. 1, 1916. One loaf of bread must be submitted baked in pan about 7 x 5 inches and 3 inches deep, and divided into twin loaves so that they may be separated at the fair. The loaf must be baked with Cream of the West Flour. One half will be judged at the fair. The other half first prize loaf will be sent to Ontario Agricultural College, Guelph, to compete in the Provincial Contest. The local contest at the fair will be conducted under the same rules as all the other regular contests at your fair.

The standard by which bread will be judged will be as follows:

1. Appearance of Loaf		15 marks
(a) Color	5 marks	
(b) Texture of crust	5 marks	
(c) Shape of loaf	5 marks	
2. Texture of Crumb		40 marks
(a) Evenness	15 marks	
(b) Silkiness	20 marks	
(c) Color	5 marks	
3. Flavor of Bread		45 marks
(a) Taste	25 marks	
(b) Odor	20 marks	

Each loaf must be accompanied by the part of the flour bag containing the face of the Old Miller (important) and an entry form must be signed by the girl and parents or guardian stating date of birth, P.O. address, and giving name of dealer from whom Cream of the West Flour was purchased. The form will state that the girl actually baked the loaf entered in the competition. The forms will be provided at the time of the fair. The decision of the judges is final. Not more than one entry may be made by each girl and not more than one prize will be awarded to the same family.

The Results of the contests at the fair will be made known in the usual way as in the case of all the other regular contests. The Provincial results will be announced as soon as possible after the conclusion of the Rural School Fairs in the Province.

Do Not Miss this Great Opportunity: Every girl between 12 and 17 years should compete. What a splendid way to stir up increased interest in breadmaking! Get a supply of Cream of the West Flour at your dealers and practise using it as often as possible to increase the chances of winning. If your dealer cannot sell it to you, write to the Campbell Flour Mills Co., Ltd., Toronto, and they will promptly tell you the nearest place to get it.

No Competitions in Counties Named Below: The competition is open to all parts of the province where Rural School Fairs are held, except the districts of Rainy River, Kenora, Manitoulin and Thunder Bay. These districts are the only parts of the province where school fairs are held by the Department of Agriculture in which this competition will not be a feature. There are no district representatives of the Department of Agriculture in the Counties of Huron, Perth, Wellington, Haliburton, Prescott, Russell or Lincoln, and no rural school fairs are held in these Counties by the Department of Agriculture. We regret, therefore, that the competition cannot include these Counties.

Write for free folder giving full and complete information about every feature of this great contest.

Address **Campbell Flour Mills Co., Limited, (West) Toronto**

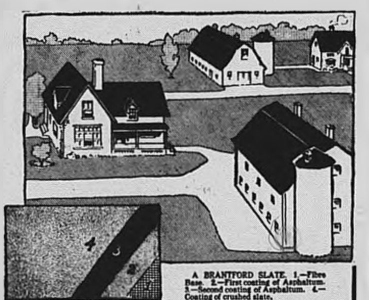
Cream of the West Flour is sold by J. W. South, Walkerton, and by E. Witter & Co., Mildmay and Geo. Lambert, Mildmay.



A BRANTFORD SLATE. 1.—Fibre Base. 2.—First coating of Asphaltum. 3.—Second coating of Asphaltum. 4.—Coating of crushed slate.

Yesterday and To-day

Wooden shingles of twenty or thirty years ago were of splendid quality, and answered the purpose very well. There was nothing better at that time. In fact no other roofing material was on the market. Yet who would think of putting on shingles to-day? When the deterioration of wooden shingles became noticeable, efforts were made to invent a roofing that would not only be an economical and permanent substitute for wooden shingles, but one that would outlast them in service.

Brantford Roofing was the result. It has "made good." The secret of its success is this: First, the base is of pure, long-fibred felt which is thoroughly saturated with asphalt or mineral pitch. The asphalt and crystal roll roofings are then thickly coated with crushed rock particles, which adhere tightly to that base, and the whole forms a permanent fireproof, water-tight roof.

Brantford Asphalt and Rubber Roofing are made in three different weights. Crystal is made in heavy weight only, and in red or green natural colors. All three grades are pliable and well suited to either flat or steep roofs.

Brantford Roofing

comes in rolls with protected ends. The layers do not stick together and the roofing is easily laid. It requires no painting or tarring when put on. It does not crack with the cold nor melt with the summer's heat. It does not curl, split, rust or blow off. It gives permanent weather and fire protection at a reasonably low initial cost.

May we send you our roofing book and samples? They will show you the real value of these roofing materials.

Hehn's Bakery

YIELDING PRACTICALLY 5.35 %

WAR LOAN
[illegible]MINION OF CANADA

As with the previous Loan, we predict a great success for this issue. During this period of stress our Government needs our help and counts upon our patriotism. But a chance is given investors of placing their money in securities of the highest grade, upon terms the liberality of which will, perhaps, not be fully realized until the return of normal times.

If this Loan were issued to yield 4½%, instead of about 5.35 %, the price would be 105.41, instead of 97.50. A 4% yield (the basis on which Dominion Government bonds sold so recently as 1914) would mean a price of 111 for the present issue.

We will forward your application, procure your allotment and render other services free of charge to you.

To ensure allotment application should be made at once

NEWS ABOUT TOWN

Kincardine's tax rate will be 35.8.

Some people go in for daylight saving in another way. They save daylight by staying in bed and using as little as they can.

Peter McKichan, Science Master of Chesley High School, has resigned to accept a similar position at Petrolia, with an increase of $200.

The London Advertiser and Free Press announce an increase in subscription rates due to the increased cost of production after Sept. 10.

Some of our readers are overlooking the fact that "Obituary Poetry" is published at the rate of 10 cents a line. The money must accompany the poetry. Kindly remember this.

A party of autoists going southwards picked up a sleek looking bull terrier they spied on the Elora road north, and were taking him along as a prize. The owners were advised of the sudden departure of their valued canine by a bright young lad who had noticed the "lift," and the party were intercepted at Paisley and relieved of their spoil.

It would take 63 mills to clean up the Town Council's overdraft but the Councillors didn't have nerve enough to strike the higher rate.—Walkerton Telescope. It is easily seen Bror. Eedy has never raised his fellow citizens. A few terms in the council would put a proper fear and respect of the electorate into his anatomy.—Kincardine Reporter.

Scott Laidlaw of Lions Head, has been awarded the Military Medal for conspicuous bravery. He was a member of the 5th Battalion and has been in the trenches nearly a year and a half. His medal was won when he and two others rescued a machine gun cut off by the enemy on June 2nd, making their way regardless of shot and shell to where the men were lying and guiding them to safety.

A Fergus farmer bought a new car and took it home. In the evening he decided to give it a trial in a 65 acre field. He got it started all right, but but after going for a time he endeavored to stop it but couldn't remember what to do. He continued round and round the field all night until the five gallons of gasoline were used up and the car stopped. It was some joy ride all right.

Pinkerton Fair, Friday, Sept. 22.

Order your Auction Sale bills at the Telescope.

Methodist District meeting was held at Paisley Tuesday.

Keep an attentive eye on the Telescope's advertising columns. It pays.

The death of Pte Gordon McKelvie of Chesley, was reported in Saturday's casualty list.

Will some reader kindly favor us with a copy of the Telescope of May 11th?

The suggestion has been made that a tax be levied on silk stockings. No one would think of concealing them.

Mr. John Logie, manager of the Paisley Creamery, was married on Sept. 6th to Miss Jessie Gynne, formerly of Walkerton.

George Lees, proprietor of the Lucknow woollen mill, was found in a bush with his throat cut by a razor, apparently a case of suicide.

Live merchants recognize advertising not as an expenditure, but as an investment. Persistent use of The TELESCOPE will verify this.

Mr. O. W. Cryderman had word from his son Wilbur at Salonika last week that he has almost entirely recovered from the dysentery attack and apparently he expects to be back on duty again shortly.

Capt. O. E Kilmer is reported to be making good progress towards recovery in England. By an odd coincidence it was the old family doctor from Toronto, who attended him at the military Hospital. "The leg will have to come off, Chap" he announced after making the examination. "Alright, go ahead, doctor." was the plucky young soldier's reply.

One of the educative and entertaining things to be seen at Toronto is "The Birth of a Nation" shown at Massey Hall. It was seen by many Walkerton people who visited Toronto last week. The American civil war and the conquering of the south is splendidly shown, but the impressive part of the picture story is when the South seeks to save itself. An orchestra of 25 pieces contributes to the enjoyment of the thousands daily visiting Massey Hall.

RHEUMATISM WAS MOST SEVERE

Dreadful Pains All The Time Until He Took "FRUIT-A-TIVES".

MR. LAMPSON

Verona, Ont., Nov. 11th., 1915.

"I suffered for a number of years with *Rheumatism and severe Pains in Side and Back*, from strains and heavy lifting.

When I had given up hope of ever being well again, a friend recommended "Fruit-a-tives" to me and *after using the first box I felt so much better* that I continued to take them, and now I am enjoying the best of health, thanks to your remedy".

W. M. LAMPSON.

If you—who are reading this—have any Kidney or Bladder Trouble, or suffer with Rheumatism or Pain In The Back or Stomach Trouble—give "Fruit-a-tives" a fair trial. This wonderful fruit medicine will do you a world of good, as it cures when everything else fails.

50c. a box, 6 for $2.50, trial size, 25c. At dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

THE WALKERTON HIGH SCHOOL

WAR LOAN
DOMINION OF CANADA

Issue of $100,000,000 5% Bonds Maturing 1st October, 1931.

PAYABLE AT PAR AT

OTTAWA, HALIFAX, ST. JOHN, CHARLOTTETOWN, MONTREAL, TORONTO, WINNIPEG, REGINA, CALGARY, VICTORIA.

INTEREST PAYABLE HALF-YEARLY, 1st APRIL, 1st OCTOBER.

PRINCIPAL AND INTEREST PAYABLE IN GOLD.

ISSUE PRICE 97½

A FULL HALF-YEAR'S INTEREST WILL BE PAID ON 1st APRIL, 1917.

THE PROCEEDS OF THE LOAN WILL BE USED FOR WAR PURPOSES ONLY.

THE MINISTER OF FINANCE offers herewith, on behalf of the Government, the above named Bonds for subscription at 97½, payable as follows:—

10 per cent on application;
30 " " 16th October, 1916;
30 " " 15th November, 1916;
27½ " " 15th December, 1916.

The total allotment of bonds of this issue will be limited to one hundred million dollars exclusive of the amount (if any) paid for by the surrender of bonds as the equivalent of cash under the terms of the War Loan prospectus of 22nd November, 1915.

The instalments may be paid in full on the 16th day of October, 1916, or on any instalment due date thereafter, under discount at the rate of four per cent per annum. All payments are to be made to a chartered bank for the credit of the Minister of Finance. Failure to pay any instalment when due will render previous payments liable to forfeiture and the allotment to cancellation.

Subscriptions, accompanied by a deposit of ten per cent of the amount subscribed, must be forwarded through the medium of a chartered bank. Any branch in Canada of any chartered bank will receive subscriptions and issue provisional receipts.

This loan is authorized under Act of the Parliament of Canada, and both principal and interest will be a charge upon the Consolidated Revenue Fund.

Forms of application may be obtained from any branch in Canada of any chartered bank and at the office of any Assistant Receiver General in Canada.

Subscriptions must be for even hundreds of dollars.

In case of partial allotments the surplus deposit will be applied towards payment of the amount due on the October instalment.

Scrip certificates, non-negotiable or payable to bearer in accordance with the choice of the applicant for registered or bearer bonds, will be issued, after allotment, in exchange for the provisional receipts.

When the scrip certificates have been paid in full and payment endorsed thereon by the bank receiving the money, they may be exchanged for bonds, when prepared, with coupons attached, payable to bearer or registered as to principal, or for fully registered bonds, when prepared, without coupons, in accordance with the application.

Delivery of scrip certificates and of bonds will be made through the chartered banks.

The issue will be exempt from taxes—including any income tax—imposed in pursuance of legislation enacted by the Parliament of Canada.

The bonds with coupons will be issued in denominations of $100, $500, $1,000. Fully registered bonds without coupons will be issued in denominations of $1,000, $5,000 or any authorized multiple of $5,000.

The bonds will be paid at maturity at par at the office of the Minister of Finance and Receiver General at Ottawa, or at the office of the Assistant Receiver General at Halifax, St. John, Charlottetown, Montreal, Toronto, Winnipeg, Regina, Calgary, or Victoria.

The interest on the fully registered bonds will be paid by cheque, which will be remitted by post. Interest on bonds with coupons will be paid on surrender of coupons. Both cheques and coupons will be payable free of exchange at any branch in Canada of any chartered bank.

Subject to the payment of twenty-five cents for each new bond issued, holders of fully registered bonds without coupons will have the right to convert into bonds of the denomination of $1,000 with coupons, and holders of bonds with coupons will have the right to convert into fully registered bonds of authorized denominations without coupons at any time on application to the Minister of Finance.

The books of the loan will be kept at the Department of Finance, Ottawa.

Application will be made in due course for the listing of the issue on the Montreal and Toronto Stock Exchanges.

Recognized bond and stock brokers will be allowed a commission of one-quarter of one per cent on allotments made in respect of applications bearing their stamp, provided, however, that no commission will be allowed in respect of the amount of any allotment paid for by the surrender of bonds issued under the War Loan prospectus of 22nd November, 1915. No commission will be allowed in respect of applications on forms which have not been printed by the King's Printer.

Subscription Lists will close on or before 23rd September, 1916.

DEPARTMENT OF FINANCE, OTTAWA, September 12th, 1916.

Ford

S. W. VOGAN

AN EVIL HERITAGE

He could scarcely keep from smiling as he said it, and it was hard to believe his eyes, when, instead of hurrying out a second assurance, Mr. Durrant, who, as usual had sat down precisely in the middle of his chair, began nervously to cross and recross his legs.

"None to your position as it is, of course; but what I expect of you is to prove to me that nothing which may happen, can ever oust you from your present place."

"Nothing but an earthquake that swallowed up Thornton. I am afraid I cannot pledge my honor as a gentleman that such a thing won't come to pass."

Mr. Durrant once more shifted his left leg over his right.

"Your mother was your father's second wife was she not?" he inquired in his smoothest tones.

"Yes."

"And his first wife died in the West Indies?"

Bernard stared back in silence. He was beginning to see daylight. Since the passing thought which he had spent upon him in the morning, Mr. Silkworth had faded completely from his mind. Later on, when to-day's urgent mission was fulfilled, the story of his yesterday's adventure would very likely be told as a good joke; the idea of making a secret of it would certainly not have occurred to him.

"Do you mean to say that you have been listening to these nonsensical stories?"

"Listening is scarcely the word, but there is something between that, surely, and forcibly closing up one's ears. There are tales afloat, Mr. Berrincott—mind, I believe them to be no more than empty tales—but which make it my duty to investigate matters further before sanctioning my daughter's engagement."

"I suppose it's from Silkworth you got your information?"

The right leg resumed its place over the left.

"I certainly have had some talk with Mr. Silkworth. You see, when a man comes to you with so startling a story, and especially at so critical a juncture——"

"You consider it your duty not to turn him out—exactly. Well, what were the points of his tale?"

"He says that your father's first wife did not die until the end of June, '59."

Bernard watched the fire for a minute, then looked up straight into Mr. Durrant's face.

"Then what you mean to tell me is that that man's story has made you doubt whether my father was ever legally married to my mother?"

"Not doubt—oh, no, certainly, not doubt—that expression is a great deal too strong for the occasion; but at the same time I must confess that to see all idle reports put to rest once and for all would——"

"Make your mind easier—just so. Well, there is no reason why your mind should not be made easier," and Bernard rose quickly to his feet. "The certificate of burial of my father's first wife is all that will be wanted, I presume. Oh, Mr. Durrant, why didn't you speak out sooner? Do you know that you almost gave me a fright?"

He laughed as he spoke; his tone had regained its former joyous ring.

"Then you think there will be no great difficulty?" asked Mr. Durrant, brightening up, for his hopes and wishes were most sincerely on Bernard's side. "How are you going to set about it?"

"I am going to write to Mr. Parker, or, better still, I shall look in upon him myself. Among the mountains of family papers in his office the certificate we want can't well fail to exist. You see, it isn't as though my father's first marriage had been kept dark. There was no mystery about the Creole wife's existence, so why should there have been any mystery about her death?"

"I am sure I don't know," said Mr. Durrant. "And yet where there is so much smoke there generally is a little fire," he added to himself.

Bernard now somewhat hurriedly took his departure, and Mrs. Durrant, who appeared in the library before he had closed the front door, listened without comment to a report of the proceedings. While Mr. Durrant was speaking, her eye fell on the white camellias on the table.

"What are these?"

"Young Berrincott left them here—for Sybil, of course, poor boy!"

"I wonder if they would keep till the 12th?" said Mrs. Durrant, pensively regarding the flowers.

"But I thought Sybil was not going on the 12th?"

"I thought so too, but that was when I thought that her engagement was an accomplished fact. Sir Norman Vallington is to be there on the 12th, and he has not yet seen Sybil."

"I have every hope that Mr. Parker will be able to clear up this matter with perfect ease," said Mr. Durrant, for him almost hotly.

"So have I; but there never yet has been any harm in having two strings to one's bow. You don't count upon Sybil remaining an old maid, do you, even in the unlikely contingency—and yet it is a contingency—of this cock and bull sounding story turning out not to be cock and bull?"

Mr. Durrant, having no reply to make, had as usual to bow to his wife's superior wisdom.

"Cotton-wool laid over the blossoms is the best way of preserving them," she said, still gazing at the camellias. "They would make a splendid show on Sybil's dress. And yet I almost wish they had been red; these flowers look so painfully clean."

On the following day Bernard was back again at The Monastery. He had not come over from Thornton this time, but had walked straight up from the station, being on his way back from the consultation with Mr. Parker. To-day he was looking a trifle, but only a trifle, more subdued than yesterday. This affair was, after all, going to be a good deal of a bore; not to be shaken off like an unwelcome drop, as he had at first supposed. Mr. Parker could throw no light on the matter. Twenty-five years ago he had not yet been in charge of the family affairs, but he was positive as to no copy of the desired certificate existing within the four walls of his office.

"All this entails the deuce of a delay," explained Bernard. "I shall write to my uncle James, who is at St. Clara now, and ask him to take the matter in hand. I wonder how long it will take. I don't believe they keep their registers over carefully out there; Uncle James will have to dig about a lot—no," he broke off with a change of tone, "I shall not write to Uncle James! I shall go out myself. It will be the quickest way in the end."

"Go out to the West Indies?" asked Mr. Durrant, rather taken aback.

"Certainly. Why on earth should I not?"

And now the plan was taken into immediate consideration. Having once made up his mind to the voyage, Bernard, whose joyous humor of yesterday had now almost returned to him, was in a terrible hurry to carry out his idea. He would go by the very next mail, the one of the middle of the month.

"And shall I wire 'all right,' when I have looked at the registers?"

"Certainly, if it is all right."

"And if I come back with the certificate in my pocket, you will give me your daughter?"

"With all my heart."

Bernard grasped his hand gratefully. At the last moment he turned with his fingers on the door-handle.

"Of course, I shall come over again; and there is one thing more—I may say good-bye to her may I not?"

Mr. Durrant hesitated, but Bernard's eyes were too much for him.

"Very well. But of course you will remember that the engagement is purely conditional."

Mrs. Durrant was not overpleased on hearing of the permission granted. In her opinion Mr. Durrant had been weak.

"However, Sybil shall receive her instructions," she decided, "so I dare-say no harm will be done."

Although Bernard knew that the Royal Mail was not likely to hurry its movements on his account, he started for London only two days after his second interview with Mr. Durrant. He did not see Mr. Silkworth again, although that gentleman was still in the neighborhood, being, in fact, established on the Monastery estate, where he had received some subordinate appointment. Mrs. Durrant had thought it more prudent, for the sake of the dignity of the Durrant name, to keep the West Indian manager's tongue tied by more than merely passing means, on the subject of the events which had followed upon Podkin's first report.

When the moment of final farewell came, Bernard's voice was almost strangled in his throat. Not that he had any doubts as to the result of his voyage—oh, no! But he knew that he would not be back before six weeks at the earliest, and so much can happen in six weeks!

"Say that you will be true to me," he said, very low, and rather huskily.

"But, Mr. Berrincott, how can I say that, since we are not engaged?"

Her voice was not much steadier than his own, and yet she nervously withdrew the hand he had attempted to grasp. It was almost a tete-a-tete, since in the drawing-room adjoining the one in which they stood and divided from it by heavy curtains there was no one but Mrs. Durrant dozing in her chair.

"By Jove! I forgot. No, of course I have no right to ask that; but can not you at least say that you will not forget me?"

"I shall never do that," whispered Sybil; then, with a glance towards the curtains, she added quickly: "I mean that of course one forgets one's friends in such a short time. Six weeks is nothing, you know."

"I doesn't seem to me at all like nothing," said Bernard, surprised and almost a little hurt. "I don't at all know how I am to get through the time. I am afraid—no, I oughtn't to say that—I fancy you will have less difficulty in that way."

He looked at her eagerly, hoping for a denial, but Sybil stood silent, her clasped hands hanging before her, her head with its diadem of hair drooping slightly on her breast, like a queen whose crown has grown too heavy to bear. The realization of her beauty failed, at this moment to soothe Bernard.

"You will arrange your flowers and you will take your walks," he went on, with almost a touch of bitterness in his tone, and speaking on some impulse which surprised himself, "and you will go out driving when I am away, exactly the same as when I am there. I wish I knew whether my going away makes any difference at all to you!"

He broke off, for Sybil for all reply had looked up at him in dumb reproach. He was almost certain that he saw a tear shining upon her magnificent eyelashes, instantly he recognized that he was a heartless monster.

"Sybil—Miss Durrant, I mean—forgive me. I am talking nonsense and behaving like a fool altogether; but a man is apt to feel sore at a moment like this, and even suspicious. By-the-bye," he asked, abruptly, "how about the ball on the 12th?"

"I would much rather not go, but I am afraid I shall have to."

"Have to! Why on earth should you go against your own inclination?"

"Mamma says that my not being there would make people talk."

"Well, why shouldn't they if it amuses them? Would it be so very dreadful if they guessed that we cared for each other?"

"Oh, you must not say that, please! You know that nothing of that—that sort was to be said between us at present. You promised, you know."

"So I did. I am a fool. I had better be going. I am sure to be saying more forbidden things if I stay any longer. I hope you will enjoy your ball."

He had almost turned away, under a fresh impulse of irritation, when once more contrition came over him. He stooped and took her hand.

"Forgive me again. You know all that I would like to say and may not. But I must not stay longer. To talk to you as to any other friends is too hard a task for me. Good-bye."

Without waiting for her answering good-bye, he had turned now definitely and in another moment was gone from the room.

"And high time, too," was Mrs. Durrant's reflection, as she heaved a sigh of relief.

CHAPTER XVII.

Since she had come to Lot 13, Marian had got used to early rising. Her first glimpse of the place had been a disappointment, but the longer she was here—and it was now a full fortnight since their arrival, the more wonders did she discover.

Without these daily—nay, hourly—discoveries her life would have been almost more monotonous than at Laurel Road. They had moved into the big house now, but the only civilized people, except her father, whom she had seen during this fortnight were Mr. Weedon, who occasionally looked in to condole upon things in general—a young and very light-hearted Irish doctor—and the new manager who had come in Mr. Silkworth's place.

It was on the subject of this new manager that Marian was anxiously reflecting one morning early in March, while she took her walk before breakfast. The sunshine, though already brilliant, was not yet oppressive. The road she followed ran between two cane fields; nothing more than a rough cart-track of yellowish earth, sunk between two banks. This had already become a favorite walk of Marian's; not only was she here fairly well protected from both sun and wind, but she had long since discovered that, however monotonous a cane field might look at a distance, there was nothing like it for variety, when seen close. In the first place, though all the canes were alike in consistency the attitude of each was a thing by itself. There were canes that stood as straight as arrows, their blades spread like fans; and there were canes that lay along the ground, borne down by their own weight, and even leaning over the banks like some sort of shining yellow snake that was stretching and crawling to reach the road. And there were curved canes, and twisted canes, and each one that was curved fell into a different arch, and each one was twisted in a different fashion. No, thought Marian, it was not possible to weary of looking. Were there not golden brown canes and pale yellow canes, and even deep red canes, glowing here and there like long thin tongues of crimson flames? And then, was ever any London lodging-house as thickly inhabited, or any London street as alive or busy, as a cane field at this season! Take the lizards alone; hundreds of little creatures of a bright metallic green were sliding in and out between the roots, charging the bank or basking in the cart ruts.

More than once, on coming round a corner, Marian was amused by a regular stampede of lizards, who had apparently been holding a public meeting; and now and then she got a start when things which she had taken for shadows, or sticks, suddenly quivered and scuttled across her toes.

Over the lizard's head the humming birds had it all to themselves: in and out, and out and in between the canes did they shoot, so desperately busy that when a rare rest was taken, on the tip of a blade which scarcely bent under the infliction, the feathered morsel seemed to look guiltily conscious of wasting its time. And yet, though teeming with life, how silent it was! Nothing but the subdued rustle of the wind among the canes—a sound as of gently-running water—and occasionally a sharp, dismal cry uttered for ever in the same note by some unknown blackbird perched upon a guava bush.

All these sights and sounds Marian already knew by heart. To-day she passed them by almost with indifference, for it was not the lizards, but Mr. Ritchie, the new manager, who was in the foreground of her thoughts. He was very active, certainly; but had he not rather too many plans, or, at any rate, more than were good for her father's piece of mind? The Captain had now quite dropped the farce of indifference, and had thrown himself, heart and soul, into the task of turning Lot 13 into a success, and Simon's would be vengeance into a hollow mockery. It had been a special dispensation of Providence which had led the enterprising Mr. Ritchie across his path—so he considered, but this was just what Marian doubted. All this talk about new machinery and "vacuum pans," and a dozen other things, whose meaning was Greek to her, awoke forebodings. Where was the money to come from for all this?

Having reached the end of the cane field, Marian stood still considering. She shrank from venturing out on to the shadeless road, and yet it was rather early for retracing her steps. A little to the right, by the side of the road, there stood a solitary hut, as usual upon four legs, and with one tattered banana waving its green arms above the thatched roof, somewhat like an aged sorcerer making cabalistic signs behind his victim's back and above his head.

The square of shade thrown by the hut looked inviting, and there was besides an overturned tub, which presented a most acceptable seat. Marian accordingly sat down, with the intention of taking a rest before returning home. In the species of shed, that was necessarily formed by the elevated position of the hut, there were more tubs standing about, and a good many calabashes littering the ground. Between these, about half-a-dozen hens nestled in convenient nooks, having taken refuge from the sun.

(To be continued.)

Good Guess.

A musical director tells a story of young women at a reception given Mme. Schumann-Heik. The young woman was an enthusiastic admirer of the songstress, and she had often expressed to the hostess her intense desire to meet the celebrity. When, however, her turn came to be introduced to the famous woman she was so overcome that she lost her self-possession completely.

Blushing deeply and twisting about the rings on her fingers, she managed to emit, "You—er—er—you sing, I believe."—Everybody's.

Malleable Glass of the Egyptians.

Strabo and Josephus both affirm that the Egyptian glass workers were so well skilled in their art that they imitated the amethyst and other precious stones to perfection. Malleable glass was one of the secret arts of the ancients, the formula for making it being now reckoned as lost. Strabo mentions a cup of glass which could be hammered into any desired shapes, the material of which it was composed being as ductile as lead.

SUNDAY SCHOOL LESSON

Lesson XI. September 10, 1916.

The arrest of Paul.—Acts 21. 17-40.

Commentary.—I. Reception at Jerusalem (vs. 17-20). Paul and his company were accompanied by friends from Caesarea on their way to Jerusalem, and upon their arrival met with a cordial reception. They lodged with Mnason, of Cyprus. James, who had charge of the Jerusalem church, and the elders received Paul and his company, and Paul declared the great work of grace the Lord had wrought among the Gentiles. Although James and his associates were at the very centre of Judaistic influence, and they would be liable to be prejudiced in favor of Christians' observing the great features of the law of Moses, yet they rejoiced to know what had been done among the Gentiles.

II. Respect for Jewish Law (vs. 21-26). While James and his associates rejoiced with Paul and trusted him fully, there were great numbers of Jewish Christians who carefully observed the law and who had been informed that Paul was teaching the Jews not to observe the law of Moses. James desired to have this misapprehension removed and suggested that Paul go through the ceremony of purification in company with four men who were completing Nazarite vows. James made reference to the decision of the council at Jerusalem a few years previously, in which it was decided that the only requirement to be laid upon Gentiles as touching the law of Moses was "that they keep themselves from things offered to idols, and from blood, and from strangled, and from fornication." Paul adopted the plan suggested by James in order that he might be set forth in the right light before the church at Jerusalem.

III. A mob aroused (vs. 27-31). 27. When the seven days were almost ended—During the final seven days of the period for which the vow was taken, those taking it were careful not to become ceremonially unclean and, in order to avoid pollution, they often remained in the temple the greater part of the time. Jews....of Asia—This was the feast of Pentecost and many Jews were present from distant places. The Asia here mentioned is the Roman Province in the western part of Asia Minor, of which Ephesus was the chief city. They had seen Paul at Ephesus and recognized him at Jerusalem. They had opposed him at Ephesus and were still opposed to him. Stirred up all the people—The enemies of Paul seized upon this occasion to destroy the influence of Paul by exciting the people to oppose him. Laid hands on him—Seized him. 28. Men of Israel—The Jews were addressed by a dignified title. This is the man—Paul's enemies spoke as they were moved by prejudice rather than by righteous principles. They misrepresented the teachings of the apostle. Brought Greeks also into the temple—Paul had not brought Greeks, or Gentiles, into the temple. Those who were there with him completing their vows were Jews. Paul's accusers were unscrupulous. Polluted this holy place—There was a court of the Gentiles into which those who were not Jews were allowed to enter, but the place in which Paul and his companions were would be profaned if a Gentile should enter it. 29. For they had seen....Trophimus—This verse explains how Paul's accusers had reached the conclusion that he had brought Gentiles into the temple. Because they who seen Paul in company with Trophimus, a Gentile of Ephesus, in Jerusalem, they concluded that it was Trophimus who was with him in the temple. 30. All the city was moved—The temple was the chief place of interest in the world to the Jew, and the report that it had been polluted would stir every Jew who heard of it. Drew him out of the temple—The language indicates that they used violence in removing Paul, and it is clear that the mob intended to put him to death. They did not wish to do this in the temple. The doors were shut—We need not suppose that any of the Levites, the gatekeepers of the temple, were of the same mind with the rioters. Their action in closing the gates was only to prevent any profanation of the building by the uproar which they saw to be beginning.—Cam. Bib. 31. As they went about to kill him—"As they were seeking to kill him."—R. V.

IV. Paul rescued (vs. 32-40). 32. Immediately took soldiers—The captain quickly ordered out his soldiers with their officers to quell the disturbance. they left beating Paul—The officer was none too quick in his movements to rescue the apostle, and he must have reached the scene of the riot with almost incredible swiftness, for he saved him from the raging mob. The Lord had further work for Paul to do. 33 bound with two chains—The chief captain knew nothing of the case, but it was his duty as a Roman officer to see that justice was done to everyone, hence the arrest of Paul and the protection given him that he might have a proper hearing. He was probably bound by chains to a soldier on either side. who he was....what he had done—The captain, being wholly ignorant of the case, desired to know why Paul was thus used. 34. could not know the certainty—No intelligible explanation could be given by the excited mob commanded. The officer purposed to have Paul placed where he would be safe, hence his order was that he be put in the tower of Antonia, and then the case could be disposed of in a lawful manner. 35. borne of the soldiers—The crowd was so great and so violent that the soldiers lifted their prisoner and carried him beyond the reach of the mob. 36. away with him—Paul had come to Jerusalem to worship a certain Jew. He had undertaken to show special regard for the law. Because of his devotion to the gospel of Jesus Christ a mob was trying to take his life and were saying of him as they had said of his Master a few years before in the same place, "Away with this man" (Luke 23:18).

37. as Paul was to be led into the castle—The soldiers had evidently taken their prisoner beyond the reach of the rioters. canst thou speak Greek—"Dost thou know Greek?"—R.V. The chief captain believed Paul was an Egyptian who had caused a disturbance some time before this, and who he knew could not speak Greek. 38. that Egyptian—Such a person as is here described would be likely to cause the chief captain much apprehension, having at his command four thousand desperate characters. 39. I am a Jew (R.V.)—Paul argued his right to speak from the fact that he was a Jew. Inasmuch as the Jews are making this uproar on his account. no mean city—Tarsus was the chief city of Cilicia, of great commercial importance, and a centre of culture. 40. on the stairs—Of the tower of Antonia. Here he was in full view of the crowd. Hebrew—The fact that Paul spoke Hebrew would at once attract the attention of the people.

Questions—With whom did Paul confer at Jerusalem? What had he brought with him for the church? Why did he consent to purify himself in the temple? What charge was brought against Paul? Why did they desire to kill him? Who was the chief captain? How many soldiers did he command? Why did he bind Paul? What did the multitude cry? Who was the Egyptian alluded to?

PRACTICAL SURVEY.

Topic.—The ministry of witnessing.

I. Embraced Paul's report to the church

II. Embraced Paul's example of devotion.

III. Embraced Paul's defense of the gospel.

I. Embraced Paul's report to the church. The historic sketch which Paul presented to the Jerusalem church concerning the early conquests of the gospel, served to demonstrate the amazing force of Christian truth and the zeal with which the apostles undertook their ministry. It was cause for rejoicing to know that through Paul's instrumentality men and women had turned from dumb idols to serve the living God. There was no demand made upon Paul to renounce his advanced position. The council held to their early decision concerning Gentile converts. They resisted the extreme Judaistic party in their acquiescence with Paul. Their brotherly salutation was a victory of Christian love, a triumph of the wonderful ways of God in the spread of his kingdom and the realization of his plan of salvation. The address of Paul contained a faithful report of his own mission to the Gentile world. His single aim and purity of mind and his fidelity to his original call appeared in bright and bold relief in all this.

II. Embraced Paul's example of devotion. When Paul reached Jerusalem he found he had been preceded by the report that he was opposed to allowing Jewish Christians to observe any of the old usages. He was suspected of irregularity because he insisted on adapting his labors to the exigencies of the work he found to do in the fields where he went to preach the gospel. Paul's position had such complex relations that it was difficult to be understood and almost certain to be misrepresented. Undoubtedly he had more really sympathy with Jewish religious ideas than many who condemned him. Paul denounced bigotry and exclusiveness, but never the Jewish race with its distinctions. He preached salvation by Jesus Christ alone as contrasted with the principle of salvation by legal observances. James and the elders perceived that a schismatic spirit was rife and they were anxious to promote concord. If they had simply and firmly given their public testimony to their confidence in Paul and explained the relations in which the Gentile churches and their teachers, stood to the Jewish churches and their teachers, mistakes could have been corrected, opposition prevented and Paul's enemies would have failed to make a party. They tried to master the difficulties by compromise, which only left the old difficulty to find another expression. The conciliatory spirit of Christianity was evidenced in the conduct of Paul. He took his place among the Nazarites, not as a slave of human ordinances, but in the might of evangelical liberty; not as a dissembler before the people, but in the ministry of brotherly love which bears with the infirmities of the weak. His design was entirely honorable and kind. The Jews of Asia judged Paul's teaching by their own narrow standards.

III. Embraced Paul's defence of the gospel. The storm of passion threatened to swallow up the servant of God. Paul was the most helpless man in the crowd, yet he was the most tranquil. He was calm in his conscious apostleship. He was engaged in his Master's work and could not therefore have cause to despair whatever the crisis or obstacle. When the mob had beaten Paul with intent to kill, the tidings speedily reached the Roman officials. The Jews did not count upon God as a factor at work in Paul's behalf by using the Roman captain as a safeguard until his work was done. Paul stood before the chief captain with true dignity despite his chains. He knew how to command his respect. He knew how to avail himself of the resources for safety. Paul measured the deadly purpose of his countrymen far more adequately than the Roman captain could have done, but he faced the throng and heroically tried to gain their attention and esteem. Roman discipline, as before, was called upon to suppress mob violence and thus give freedom to the gospel. Paul showed remarkable tact in addressing a frenzied mob. An immediate result for good was brought about in Paul's opportunity to address the multitude. Paul possessed heroic courage, self-possession and patience. Above all there was the light of divine Guidance.—T. R. A.

DUMBEST OF ALL ANIMALS.

This Creature Sits On Its Mouth During Its Entire Liftime.

What would you think of an animal who sat on his mouth? You would guess he didn't know very much, wouldn't you? Neither he does. You could call him the dumbest of dumb animals. In fact, he's so very dumb that most people don't know he's an animal at all. He's the sponge.

No, not the sponge you are acquainted with—not the bathroom kind. That's just his skeleton. The sponge we're talking about is the one that lives in the bottom of the sea, where he sits all days on his mouth.

In the beginning he's an egg, which splits all up in many cells and then swims around for a day or two. Then there comes a dent in one side—that's his mouth. Soon the sponge stops swimming and sinks to the bottom, mouth downward. There he eats and eats until sometimes he gets to be three feet tall and as thick as he is tall.

He's covered with a jellylike flesh. When sponge fishermen hunt him to sell they go out in boats and pull sponges from the bottom of the sea with long-handled forks. Then they put them on the shore to dry. After days the jellylike flesh drops off and the fishermen tramp the sponges with their feet. Then they are considered clean enough to sell. We really get the bones of the sponge, that's all.—Exchange.

Mother (entering the nursery)—Children, why do you sit about looking so solemn and unhappy? Why not play. We're grown-up ladies making a call.—New York Times.

THE GLORIOUS ROAD TO YPRES

(London Daily Mail.)

There are roads and roads. There is the great Roman road known as Watling street, down which the legions marched in changing station over 1,500 years ago. There is the great way along which Saint Paul came when he went to the City to teach it Christianity. There is the road Moore's unconquerable little army trod when it staggered to Corunna.

But greatest of all is the road from Poperinghe to Ypres, a vein through which the best of Britain's blood goes flowing, and will go on flowing, for some time yet to come. It is the road to the greatest glory of our army, old and young. It is the road to the field of honor—aye, and the valley of death.

It is a broad white road, running as straight as a sword into the city of devastation at the end. It is typical of the highways of Flanders. With a wide strip of cobblestone pavement in the centre, flanked by soft earth on either side, it lies under an avenue of trees. Of all the roads in the country it is perhaps the widest.

The latter fact, coupled with a glance at a map, will show the reader its great strategical importance. In the first place, it is the shortest as well as the best road which leads to Ypres. That it should be alive with the soul of the British expeditionary force is, therefore, not surprising. Since the first khaki column appeared upon it long ago, when the "Contemptible" troops hurried to turn the flank of the retreating Teutons, it has been used by those troops. And it will be used until the next retreat begins and even after.

Along this road from Poperinghe to Ypres the first weary, dirty, but indomitable remnants of French's command came hurrying after the Prussians. When they temporarily reeled under the furious counter stroke of the enemy, the edge of their recoiling tide just lapped the road before they gathered themselves together again to hurl themselves with renewed and wonderful vigor on the Germans.

When the Canadians came to Ypres a few days before they closed the gates to Calais last year, it was on this road they marched. In those days Ypres was not a wreck, and the highway which led to it was not continually under fire as it is now. All the trees were upright then. On that late April afternoon they dappled the white centre of the road with shadows and the sun, filtering through their leaves, flashed in flame on the maple leaf each man wore. Since that afternoon many more Canadians have marched their last march along the road from Poperinghe to Ypres.

A short time after the battle gas cloud had rolled over the French trenches the road was crowded with victims. Mixed throngs of Zouaves, Algerians and Europeans, maddened with agony, reeled and stumbled into the village of Vlamertinghe, which stands west of Ypres on the Poperinghe road. They fell and died by the wayside, the prey of German infamy, and for days afterwards their twisted bodies lay on either side necessarily unheeded by the crowds of British troops hastening into the salient. They have been taken away and buried since. But here and there among the crosses that are scattered along the road nameless graves are there.

At the present time the varied pageant of war still streams along the straight white way. Here a platoon pack and rifle, and wearing the steel swings down, the men, loaded with helmets, which mean a tour of the trenches, singing a cheery song. There is a battery of field guns, grey and clean-cut, with sturdy teams and rumbling wheels.

Then a train of big drab motor-omnibuses comes by, headed westward, which means heavenward to the weary passengers they bear. Once these omnibuses, gay with red and blue, carried crowds of Londoners to town. To-day they are on more serious business. They are taking the infantry back to a short rest in billets after a week in the trenches.

Occasionally a motor-ambulance convoy speeds up or down the road. They are very businesslike, these ambulances. Everything is businesslike in this business of war. Grey and smart, each with its scarlet cross—the sign of sacrifice—painted on its sides, they are vehicles of efficiency. Night and day they ply along this path leading into the broken city. They bring their burdens of the maimed and dying out of hell—and they are very busy.

Such is the traffic that comes and goes upon this road. During the hours of darkness the traffic is not so great. Sometimes the road is deserted. It is then that the mystery and the awfulness of it are most apparent.

Far ahead, as one looks to the east, the light of flares fills the sky with an uncertain glow and dies and comes again all night long. It seems to beckon forward. With every flare a soul rises up to the God who made it. Ypres, like a lonely ghost, stands delicately traced in misty shadows upon the darkness far down the great road. Every night the crackle of the rifle fire comes stealing softly from the valley.

On either side the trees rise up, swaying in the wind which rustles their leaves. They are like the spirits of the dead guarding the road which is sacred to their memory. Now and then a shell, thrown into the entrance of the distant town, fills the air with a blob of flashing light and a shower of screeching shrapnel, followed by a heavy, vicious crash. Shells have been bursting in the town itself and over the road ever since the first projectile dropped into the Grande place.

In spite of the horrors with which it is associated, the road from Poperinghe to Ypres is a splendid road which has looked on mighty men and things, and will be sweet with their memories long after the guns are silent. Our army has made it the most glorious road in history. It is an avenue of pride. It has been followed by those marching to fight the most terrific battles of British history. It has borne upon it the powers of heaven setting out to meet the armies of the devil. It has been the last track trodden by some of our bravest and noblest sons. Along its course came England to keep her plighted word with Belgium. And it has seen the valor of our time pass on to combat, youth shining in its eyes, laughing, singing and unafraid.

Muggins—I had a long talk with Miss Antique last evening. I think she was trying to draw me out. Buggins—Are you sure she wasn't trying to pull you in?

—THE— Quiet Hour
FOR THOUGHTFUL PEOPLE

THE BUTTERFLY.

I hold you at last in my hand,
Exquisite child of the air;
Can I ever understand
How you grew to be so fair?

You came to this linden tree
To taste its delicious sweet,
I sitting here in the shadow and shine
Playing around its feet.

Now I hold you fast in my hand,
You marvelous butterfly,
Till you help me to understand
The eternal mystery.

From that creeping thing in the dust
To this shining bliss in the blue!
God, give me courage to trust
I can break my chrysalis, too!
—Alice Freeman Palmer.

LABOR TO ENTER INTO REST.

Enter ye in at the straight gate; for wide is the gate, and broad is the way, that leadeth to destruction: . . straight is the gate, and narrow is the way which leadeth unto life, and few there be that find it. The kingdom of heaven suffereth violence, and the violent take it by force. Labor not for the meat which perisheth, but for the meat which endureth unto everlasting kingdom of our Lord and Saviour Jesus Christ. So run, that ye may obtain. And every man that striveth for the mastery is temperate in all things. Now they do it to obtain a corruptible crown; but we an incorruptible.

For he that is entered into his rest, he also hath ceased from his own works, as God did from His. The Lord shall be unto thee an everlasting light, and thy God thy glory.

VISION.

Angels fix the telescope, and ah, the vision! They clothe with garments of light; they dazzle with breastplates that glow; they furnish a sword that is self-sharpening, a shield that is never pierced. Their presence and equipment make one invincible, invulnerable; is not my horizon immensity? Do they not minister the bread of the living, the tonic of victory is ever administered, the shoutings are never heard, the songs are full of harmony, the march is ever onward, the sea is obedient, the winds are in control.

The sinners in Zion are afraid, rumor is like ten thousand serpents stinging the adversary, and they run. Doth not victory inspire, doth not leadership command. "How many do you count me for?" said a brave leader.

My lighthouse tower is lofty, it is circular, the four cardinal points of the compass are mine, the horizon is mine, except where the main land intervenes. I do not dream, I see, I watch, I discover, I live in the light, I study life, its meaning, its purpose, its ever broadening reality. The light of day is only a vestibule, leading to a light that never was on sea or land, a light found in the bosom of the devout, whose distinguished privilege it is to see the face of God. It is not our thoughts that extend to Him, but it is His truth which descends from the centre of inaccessible light to add itself to our thoughts. How calm the contemplation, how intense the appreciation, what spiritual lexicons avail to interpret and apply the remedies of the evils of life.

I am not merged in time's enclosing sea,
Nor depth, nor height, nor breadth encompass me,
Nor day, nor night, nor death can bar the gate,
Where suppliant souls lift up their heads and wait.

This searchlight is focused on the Son of Mary, and a thousand facets sparkle with the pose, and smile, and dignity, and frown and far reaching lessons of the ever-increasing Kingdom. And this is not future, but now and here and full of living. This gift is complete in its first reception, offered to us entire and at once, susceptible of being embraced at a single glance, or imbibed at a single inspiration: it is, nevertheless, progressive.

Look at the pilgrim at his tent door; his great need is an approver, and that approver must be not a proposition, but a person! He is free, simple clothed, the visions are secret, sacred and severe. He knows how to be abused, the beauty of humility is his, the riches of poverty adorn him, it is his destiny to serve, and his service knows no Sabbath.

H. T. Miller.

ALASKA'S COAST LINE.

Longer Than the Distance Round the World at the Equator.

Have you any idea of the extent of the Alaska coast line? The shores of the territory are washed by three great oceans. These are the Arctic ocean on the north, Bering Sea on the west and the Pacific ocean on the south. The Aleutian islands, off the Alaska peninsula, are separated from each other and the mainland by a network of rocky straits, and much of the southwestern and southeastern Alaska is made up of mountainous islands that have rocks of all shapes and sizes. The islands are really the tops of mountains half lost in the waters. They rise in spires and cathedrals, some of which are thousands of feet above the water and others hidden beneath it, lying there concealed and ready to rip open the hulls of ships as the iceberg of the Atlantic ripped the Titanic.

The extent of the Alaska coast with its windings surpasses that of the United States proper. It is greater than that of all our states on the Pacific from Puget sound to the boundary of Mexico added to that of our states on the Atlantic, including the gulf. All told, it is more than 26,000 miles long, or longer than the distance around the world at the equator, and in proportion to its length it has perhaps more dangers than any other coast line on earth.

Nevertheless not one half of it has yet been sounded by the coast survey vessels, and more than half of the general coast line is not marked by lights or by any aids to navigation.—Christian Herald.

"What is meant by charging an account to profit and loss?" "The word profit in that phrase," said the head book-keeper, "is sarcasm."—Detroit Free Press.

Near[illegible] D[illegible] She[illegible] D[illegible] Extract [illegible]

Dysentery ma[illegible] degrees of intensi[illegible] cases the attack is [illegible] loss of appetite, and [illegible] diarrhoea, which grad[illegible] severity, and is accompani[illegible] pains in the abdomen. The [illegible] from the bowels succeed each o[illegible] great frequency, and the matter p[illegible] from the bowels, which at first resemble those of ordinary diarrhoea, soon change their character, becoming scanty, mucous or slimy, and subsequently mixed with, or consisting wholly of, blood.

Never neglect what at first appears to be a slight attack of diarrhoea or dysentery may set in. Cure the first symptoms by the use of Dr. Fowler's Extract of Wild Strawberry.

Mrs. John Peterson, Radville, Sask., writes: "I cannot speak too highly for Dr. Fowler's Extract of Wild Strawberry. I nearly lost my little girl, aged three years. I took her to the doctor, and he told me her temperature was 104, and forbid me taking her out to our home, six miles from town, but I was forced to go on account of leaving my small baby home. We managed to get her home, but the fever did not go any lower, and we thought we would lose her sure, as she was so bad with dysentery she even passed blood. A neighbor came in and brought Dr. Fowler's Extract of Wild Strawberry, and told me to give her a few doses. This we did, and the next day she took a change for the better, but it was quite a time before she was on her feet again. I do believe if it had not been for 'Dr. Fowler's,' my little one would have died."

The genuine "Dr. Fowler's" is manufactured only by the T. Milburn Co., Limited, Toronto, Ont. Price, 35 cents.

Bradstreet's Trade Review

Toronto—Seasonable quiet is ruling in most lines and manufacturers and wholesalers are looking forward to an active autumn trade. Summer specialties have been fairly active, and numerous repeat orders have been placed. Wholesale grocers assert that conditions in the trade are fairly good, notwithstanding the usual summer quietude. This dullness has not been nearly as pronounced this year as in 1915. Advices have been received to the effect that the run of salmon is lighter this year and that higher prices will obtain in consequence. The wholesalers report that the market is firmer and that better goods are being imported. Conditions continue to be moderately active in the leather industry, war orders are still occupying a considerable proportion of attention in the leather business. The shoe section of the trade is most active. More business is passing now than a year ago. Orders are still unfilled, and conditions promise quite well for an active trade in autumn lines. In the hardware trade business continues rather quiet, although this inactivity is not as marked as in the two previous years. Indications point to a satisfactory fall trade, and collections are said to be very fair, although conditions are rather quiet in the drygoods trade, wholesalers are quite satisfied with the amount of trade that is passing.

Montreal—A fairly active healthy trade has assumed a more active tone. Excellent conditions in the dairy industry, and good hay crops are tending to produce good conditions in the rural parts of western Ontario. In clothing and grocery lines, conditions are quite active. Wholesalers state that country trade is especially good.

Ottawa—There is an excellent outlook for autumn trade. Mercantil business is fairly good, in spite of seasonable period of quiet. Who salers report that collections are fin

Hamilton—Retail business is picking up for the autumn. In dry goods, clothing and grocery trades, conditions are becoming more active. High prices for farm products, and particularly for fruit have reflected genera prosperity in trade in nearby centre The steel industry is active and lab is scarce.

Winnipeg—As the season progresses, the crop situation is beginning to improve, with the danger of frost as the greatest menace. Labor is reported to be scarce, particularly for agricultural needs. Retail trade is improving, and conditions are generally good.

Calgary—Wholesale and retail merchants find a continuance of healthy conditions.

Vancouver—Mercantile trade is active, and collections are good. In practically every branch of retail trade a fair volume of business is passing, and healthy financial conditions in the Prairie Province are being reflected in British Columbia.

Quebec—Amongst the wholesalers a good volume of business is reported for the season. Dry goods trade especially repeat orders, coming in freely. Groceries and provisions are active. A fairly good trade is reported amongst the retailers, especially dry goods. Reports from country points say rain is badly wanted. Collections on the whole are fair.

St. John—Summer quietness in most retail lines, although staple groceries, etc., continue to advance. Collections fair. No important failures.

Don't depend on others. For instance, the only way to acquire friends is to make them yourself.

Heart Palpitated
Would Have to Sit Up in Bed.
FELT AS IF SMOTHERING.

Mrs. Francis Madore, Alma, P.E.I., writes: "My heart was in such a bad condition I could not stand any excitement, and at times when I would be talking my heart would palpitate so that I would feel like falling. At night, when I would go to bed and be lying down for a while, I would have to sit up for ten or fifteen minutes, as I would feel as though I was smothering. I read in the daily paper of a lady who had been in the same condition as I was, and cured by using Milburn's Heart and Nerve Pills, so I bought a box, and did me so much good, my husband got another, and before I had used half of the second box I was completely cured. I feel as though I can never say enough in favor of your Heart and Nerve Pills."

Milburn's Heart and Nerve Pills are composed of the very best heart nerve tonics and stimulants know medical science, and are for sale dealers, or will be mailed direct by T. Milburn Co., Limited, Toronto,

Price, 50 cents per box, or 3 boxes for $1.25

[illegible] know [illegible] the farm [illegible] values and [illegible] out the most [illegible] bout 70 pounds of [illegible] five pounds of oil to [illegible] pounds.

[illegible] is a great heat producer and fattener in animals, but is not an ideal feed for growing animals, as it does not furnish the protein for muscle and bone growth that is needed. The oil which it contains makes the animals very fond of it. It has often been said that yellow corn was more nutritious than white corn, but there is absolutely no difference in the feeding value. Flint corn has a larger proportion of cob than the dent corn. Old corn contains about 12 per cent. of water, while new corn will contain as much as 36 per cent. Corn in which there is more than 20 per cent. of water will not keep in any great quantities. Shelled corn does not keep well in summer, and corn that has been frosted should be utilized by immediate feeding. Corn and cob meal is the whole ear ground fine.

OTHER USEFUL FEEDS.

Bran makes a very useful feed for once or twice each week, when given to horses as a mash. It may also be fed dry with oats to a very good advantage. Flour wheat middlings are of a higher grade than standard middlings, as they often contain a large percentage of low grade flour. Middlings are very good feed for swine of all ages.

Oats is the safest feed for the horse, as the hulls give it enough bulk so the horse very rarely gorges himself. To mature horses with good teeth they should be fed whole.

The spirited condition found in the horse fed on oats is not obtained with any other feed.

There is no better feed than oats for dairy cows, and it is also a very good feed for breeding swine. The oat hulls are a by product of oatmeal factories and as such are sometimes ground along with corn and sold as ground oats and corn.

In sections where corn and oats do not thrive well barley is used extensively as a feed. Many horses are fed on rolled barley, with wheat or oats, or on barley hay for roughage. Barley should be prepared for feeding by rolling and not by grinding, as ground barley forms a pasty mass in the animal's mouth.

Dried brewers' grains make a very satisfactory feed for dairy cows and horses, but are unsatisfactory for pigs. Malt sprouts should be soaked several hours before feeding to cattle, as they are not very well relished.

Practical experience has taught us that cottonseed meal is not a safe feed in all cases. Dr. G. H. Conn says steers that have been closely confined for a period of 100 days and been heavily fed on cottonseed meal often develop a staggering gait and become blind and die. It is particularly fatal to swine in from five to six weeks. No satisfactory way has been found by which cottonseed meal may be safely fed to swine.

Cottonseed meal which has been exposed to the air, or that has been made from musty or fermented seed, should not be used. It is not as good as linseed meal.

OIL MEAL AND GREEN FOOD.

There are two methods by which the oil is extracted from the flaxseed and they are known as the new and the old process. By the old process the oil is extracted by extremely high pressure, while by the new process the seeds are crushed and then heated and then placed in large percolators, and naphtha poured over them. When percolation is complete, the naphtha is driven off by steam, which passes through the percolator, and the residue is known as new process oil meal. Ninety four per cent. of the old process meal is digestible, while but 84 per cent. of the new process is digestible, which is due no doubt to the heating of the seeds. It should be fed from one-half to one and one-half pounds and sheep from one-fourth to one-third pounds daily. It should be bought in the original cake and then reduced to about the size of a hickory nut just before feeding, as it is more palatable and does away with any chances of adulteration.

The field bean when it is damaged by rain or dampness may be fed to sheep and swine. When fed to swine they should be cooked in salt water and fed with some other grain.

GREEN FORAGE AND FODDER.

Corn under favorable conditions will produce from 30,000 to 60,000 pounds of green forage per acre, which contains from 5,000 to 7,000 pounds of dry digestible matter. When corn is grown close together very little grain forms, but we have a tall, coarse grass which cures into a nice, bright hay. The term corn fodder is applied to the stalks either green or dry from which the ears or nubbins have not been removed. When corn is planted about three inches apart it produces very few good ears, but an abundance of nubbin and large quantities of dry, digestible matter. The largest yield will follow planting it about one foot apart in rows. So if the farmer wants forage, he will plant the corn so close that the ears will only be about half size, otherwise he will plant in rows. For steer feeding it is not necessary that corn be husked, as the cattle make just as large gains and they relish it better if it is not husked.

Timothy or herds grass yields the bulk of the hay and forage for the farmers and also the city feeders.

FARM NEWS AND VIEWS.

Fertilizers are too high and scarce to allow the weeds to steal them from the growing crop. Keep the cultivators going.

This is an age of soil liming. Farmers everywhere are giving more attention to lime as a soil conditioner.

Bowel troubles in calves are sometimes caused by milk that is excessively rich. Milk that is moderate or low in butter fat is usually better for young calves.

Indigestion in older calves is usually due to unclean milk or feed, unclean vessels, close confinement in dark, unsanitary stalls, and irregular or excessive feeding. In some cases it appears to be due mainly to sheer weakness and inability to digest.

The natural thing and frequently the best thing for softening a horse's hoof is cold water. In mild weather saturate a cloth of suitable size with cold water and tie around the crown of the hoof at night, or pack the sole of the foot with clay.

RUNNING NOSE COLDS CURED
SNEEZING STOPPED INSTANTLY

The worst of a cold is how suddenly it comes. No time to hurry to the drug store, croup develops, the lungs are affected with pneumonia or tuberculosis and it's too late. Keep Catarrhozone on hand—it kills colds instantly. Something magical about the way it cures catarrh and bronchitis. Catarrhozone is the best remedy, because it cures in nature's way, it heals, soothes and restores permanently. Carry a Catarrhozone inhaler in your pocket, use it occasionally and you'll never catch cold; that is worth remembering.

Beware of dangerous substitutes meant to deceive you for GENUINE CATARRHOZONE, which is sold everywhere. Large size, containing two months' treatment, costs $1.00; small size, 50c; sample size, 25c.

PLANETS AND GRAVITY.

The Vast Difference in Conditions Upon Mars and Jupiter.

In an article entitled "Is Mars Alive?" in the Popular Science Monthly Waldemar Kaempffert describes the possible appearance of a Martian. In speaking of the different conditions prevailing on the planets Mr. Kaempffert says:

"The bigger the planet on which you live, the harder it is for you to move about. If you were suddenly transported to Jupiter, the largest of the planets, and if you were able to live on its semi-molten surface, you would find it hard to lift your arm. A steam crane would be welcome assistance in moving your body about. This is due entirely to the enormous gravitational attraction which Jupiter would exert upon you. The bigger the planet the harder are you pulled down to its surface; the harder it is to put your foot forward.

"Mars is only one-ninth as massive as the earth. Hence you would weigh much less on Mars than you do on the earth. A Martian porter could easily carry as much as a terrestrial elephant. A Martian baseball player could bat a ball a mile. A very ordinary Martian athlete could leap with ease over a moderately sized house. Because his planet is not able to pull him down with the attractive force that the earth exerts upon us, the typical Martian has conceivably attained a stature that we would regard as gigantic. Three times as large as a human being, this creature has muscles twenty-seven times as effective. His trunk must be fashioned to inclose lungs capable of breathing the excessively attenuated Martian air in sufficiently large quantities to sustain life. As a canal digger—assuming that he had no machinery—he would be a great success, because he would excavate a canal with the speed and efficiency of a small Panama canal steam shovel.

"Beyond that we cannot go. Intelligence is not necessarily a human attribute. It has so happened on this earth that man has become the dominant race not because of his physical powers, but because of his brains. It may well be that the biological conditions of Mars are such that a creature very unhuman in appearance may have gained the ascendency in the struggle for existence on a planet that is fast drying up."

Rheumatism Goes Quickly
Its Virus Forever Destroyed

EVERY CASE IS CURABLE.

Good-bye to Rheumatism!

Your aching joints, your stiff, sore muscles, those sleepless nights and suffering days—good-bye forever—your day is gone.

Sufferer, cheer up, and read the good news below.

"A man met me a months ago, and said, 'Don't stay crippled, quit complaining, limber up.' My answer was, 'I'm rheumatic. I can't do it.' He looked me over in a pitying sort of way and told me to go to the nearest drug store for Nerviline and Ferrozone. The combination had cured him. I was convinced of his sincerity and followed his instructions. I rubbed on Nerviline three times every day—rubbed it right into my aching joints. The pain quickly lessened, and I became more limber and active. To draw the virus of the disease from my blood I took two Ferrozone Tablets with every meal. I am well to-day, not an ache, not a pain and no sign of stiffness at all."

What Nerviline can do in a case like this it can do for you, too. For nearly forty years Nerviline has been recommended for Rheumatism, Lumbago and Sciatica and Lame Back. It is the one remedy that never disappoints.

Effect of Cold On the Senses.

An explorer who took part in an antarctic expedition states that the most remarkable effect of the cold which he noticed was the loss of sense and touch in the fingers. It was almost complete.

"Suppose you wanted to look for a knife in your kit bag. You would put your hand in and feel round for it, and you would actually have it in your hand and not know it was the same with everything we handled. We saw that we picked it up an saw that we held the article; we could not feel that we had it."

He added that it was not possible to shave, because the skin became irritated and sore, while if the beard became too long it became moist and then froze into a block. The only thing to do was to keep the beard and mustache clipped close.

Preaching Monkeys.

The author of "The History of Brazil" tells of a species of monkey called "preachers." Every morning and evening these monkeys assemble in the woods. One takes a higher position than the rest and makes a signal with his forepaw. At this signal the others sit around him and listen. When they are all seated he begins to utter a series of sounds. When he stops these cries he makes another signal with his paw, and the others cry out until he makes a third signal, upon which they become silent again. This author, Mr. Maregrove, asserts that he was a witness to these preachings.

A GOVERNMENT PUBLIC-HOUSE

Interesting Experiment Under Trial in Scotland.

First One, Near Carlisle, a Model Place.

The central control board's new model public-house at Carlisle, which has been named the Gretna Tavern, was opened here this afternoon by Lord Lonsdale.

The Gretna Tavern is a converted postoffice skilfully adapted by Mr. Redfern, the architect to the control board. The character of the building both exterior and interior, in itself constitutes a new type of refreshment house. It is as far removed from a Gothenburg bolag tavern or a German bier halle as from a British public-house of any type. It is neither dingy, like the old style of pothouse, nor garish like the new, nor "quaint" like the still newer fancy imitations of antique architecture, nor gimcrack like most coffee taverns and temperance refreshment rooms. It is a solid stone building of dignified aspect, occupying a commanding position in a dignified street. Inside the two principal rooms are a long open bar formed out of the old selling counter, with very little alteration, and a large hall behind which was the sorting room. The latter serves the new purpose admirably. It is spacious, lofty and well lighted. There is a counter at which various things will be sold, several tables at which meals and minor refreshments will be served, a stand for newspapers, a piano, gramophone, and sundry conveniences.

Adjoining the hall is a well-equipped kitchen where all kinds of meals can be cooked, and a storeroom. There are also some rooms for the attendants and the manageress, but no sleeping accommodation. No one will sleep on the premises. The only alcoholic liquor that will be served is beer. Customers must drink standing at the bar; in the hall beer will be brought to them seated at the tables. The idea is to encourage people to stop for rational recreation by making them comfortable, but not for mere drinking.

The opening of this establishment, which has been converted to its present purpose in three weeks, marks a definite stage in the evolution of a large scheme of liquor traffic control in this district. The occasion for embarking on the scheme was the creation of a colossal munition factory in the neighborhood of Carlisle, begun last autumn. The preparation of the ground, the making of roads and railroads and the erection of hundreds of buildings over an area nine miles in length brought many thousands of workmen to the spot. They flowed over the neighboring villages and the small town of Annan and into Carlisle itself, where some 5,000 are now accommodated in lodgings all about the town.

It was foreseen that the influx of so large a body of men, most of whom are navvies and day laborers, gathered from Scotland, Ireland and all parts of England, would cause difficulties. They have nothing to do in the evenings and nowhere to go but to the public-house; and the local public houses, being for the most part small and quiet places fitted for a rural population, were quite unfitted to cope with the flood of strangers. So the board began to take them over and gradually acquired all the licensed houses surrounding the area. Some 40 have been bought. A few have been closed, the rest are managed for the board. Then the same process was extended to Carlisle, but the transaction is not yet completed there, and the houses have not been actually taken over. In the case of these pre-existing houses the premises are, of course, old ones, although they may undergo some rearrangement. The change lies in the ownership and management.

It will be seen from the foregoing that the Gretna tavern introduces a new element into the experiment. It offers the British workman and workwoman an ideal sort of public-house. The idea is not new and private enterprise has already made some essays in the same direction. But I have never seen anything quite like Gretna tavern and the direct ownership and management by a department of state is a new departure. The board is following it up by building two more model taverns on the same lines, one at each end of the factory area.

It remains to be seen how they will be appreciated by the workmen for whom they are intended. Too much must not be expected at first. British workmen, especially those of this class, are slow to move from their habitual tastes. The model taverns are more likely to be appreciated by the factory workers who will come in due course when the works are completed and the navvies have melted away. In any case, the experiment is highly interesting and it cannot fail to influence the future of the liquor traffic. Some useful lessons will be learned from the experience if care is taken to draw them correctly. Hasty inferences and foregone conclusions, inspired by prejudice or hope, are to be deprecated. It is very difficult in the present abnormal circumstances, when so many new factors have come into play together, to trace the true relations of cause and effect—as an instance, the increase of drunkenness shown by the police returns in this district. It has been cited as evidence of the failure of the experiment here; but it is obviously due to the influx of 12,000 homeless navvies. Six months hence it may be possible to submit the results to a judicial examination and draw some valid conclusions. Meanwhile, the scheme is launched as a complete thing, for the board has taken over breweries as well as public-houses and it embraces both urban and rural populations over a well defined and sufficiently large area.—London Times.

The Appetite of Youth
Quickly Restored

Appetite is useless unless digestion is good. Dr. Hamilton's Pills make tremendous appetite and keep digestion up to the mark as well. The liver, bowels and kidneys are stimulated, the stomach strengthened, and robust health quickly follows. Dr. Hamilton's Pills instill vigor and snap into the system, make folks feel youthful and happy. You'll forget you had a stomach—forget your days of sickness if Dr. Hamilton's Pills are used. Insist on having Dr. Hamilton's Pills, 25c per box, no other medicine so good.

LIKE A TINY SOLAR SYSTEM.

Power and Possibilities That Are Locked in an Atom.

The most generally accepted theory about the structure of the atom—which is no longer regarded as the ultimate indivisible particle of any element, as this of course could have no structure—is that it is positively charged nucleus surrounded by a system of electrons which are kept together by attractive forces from the nucleus. Thus it becomes a sort of infinitesimally small solar system.

In an article in the General Electric Review, Dr. Saul Dushman draws the following conclusions from a discussion of the laws that govern the atoms of the several elements:

"Considering the relationships exhibited by the different radioactive elements, one realizes that the dream of the alchemists may not have been as fatuous as has appeared until recently. The concept of an absolutely stable atom must be discarded once for all, and its place is taken by this miniature solar system, as it were, consisting of a central nucleus and one or more rings of electrons.

"But the nucleus itself is apparently the seat of immense forces, and in spite of its exceedingly infinitesimal dimensions it contains both alpha particles and electrons. Once in awhile the nucleus of one of the atoms will spontaneously disintegrate and expel an alpha or beta particle. A new element has been born. What causes these transformations? Can they be controlled? These are questions which only the future can answer. But if we had it in our power to remove two alpha particles from the atom of bismuth or any of its isotropes, not only would the dream of the alchemists be realized, but man would be in possession of such intensely powerful sources of energy that all our coal mines, water powers and explosives would become insignificant by comparison."

A GOOD SUGGESTION

The tragic frequency of collisions between automobiles and railway trains at railway crossings is being dealt with boldly by the Long Island Railway, which has initiated a striking poster campaign showing the recklessness with which motorists ignore all danger signs, not only at their own risk, but often at the cost of many other lives. "Jail Might Stop Them—We Can't," is one particularly vivid picture, showing a touring auto with brilliant headlights dashing past a signal in front of a passenger train. Automobile associations all over the country are being appealed to in the hope that a concerted effort may be made to stop this reckless practice of speeding over grade crossings. Canadian automobile associations might well take this lesson from the United States, as accidents of a similar nature in this country are by no means rare. A train moves faster than the motorist may calculate. Another poster has the caption, "We Can't Stop the Horses," and shows a driver asleep with his team about to run through the gates.

THE HEIGHT OF MOUNT EVEREST

World's Highest Peak Was Never Ascended.

Is in Wild Country, and Attempts Are Barred.

For many years the East Indian government has prohibited any attempt at the ascent of Mount Everest. As long ago as 1902 six European Alpinists set out for India to view the world from the top of its highest mountain. But the virgin snows of Everest could not have cooled their ardor half so rapidly as did the cold water with which the Indian government soused them. The mountaineers simply met with a block refusal, and the reason of it was perhaps obvious and logical.

The nearest approach to a railroad toward Mount Everest is about 100 miles away. To the north of this railroad terminal is a succession of parallel ranges of the Himalayas separated by deep valleys. It is one of the most difficult countries in the world to traverse, and no white man has ever crossed it.

The surveyors of India have never been nearer than eighty miles from Mount Everest. Some of the valleys are peopled by a few wild tribes who fiercely resent the intrusion of any strangers. The whole country lies in Nepal, which while still an independent state strictly forbade any person to go north among these mountains, and since Nepal came under the suzerainty of India the prohibition has been continued, for obvious reasons, by the Indian government.

When the ascent of Mount Everest is finally made it will probably be on the side of Tibet, whose southern boundary is not far from the mountain, but by her agreement with China the Indian Government is bound to keep explorers from crossing into Tibet from India. Permission was refused to Sven Hedin to cross the border on his last great expedition, when he finally crossed from Ladakh.

Some interesting facts about Mount Everest may not generally be known. Many persons have wondered how the determination of the height of Mount Everest could be so exact that its elevation is fixed at precisely 29,002 feet. It happened in this way: In 1849 and 1850 six trigonometrical determinations of the height of the mountain were obtained by the Indian survey at six different stations, all south of the mountain. The height of 29,002 feet assigned to Mount Everest was the mean of the six different values for the height just obtained.

But the geographical survey of India informed the world in 1908 that Mount Everest is higher than it was computed to be by those six trigonometrical determinations. It reported that between 1881 and 1902 six other determinations of the height of the mountain were made at five stations, all excepting one being nearer to the mountain than the previous surveys. These six new determinations gave a mean value of 29,141 feet after correction for refraction. According, therefore, to our present information, Mount Everest is 139 feet higher than it was earlier computed to be.

Why is it then, that this latest result of the scientific computation of the height of Mount Everest has not yet appeared in books and maps? It is because the Indian survey is not convinced that the final determination has been reached. It says that the height, 29,141 feet, is a more reliable result than 29,002 feet, but the more recent determination is still probably too small. It desires to acquire more thorough knowledge of the problems of refraction and of the effects of deviations of gravity upon trigonometrical work before announcing the final determination of the elevation of the world's highest mountain. Meanwhile it will retain on its maps the first determination of 29,002 feet.

This decision certainly commended itself. It would be more vexatious than useful to change the figures now and then in order to add or subtract a few feet as the latest determination of the mountain's height. It is better to wait until refinement of scientific method yields the closest approximation possible. This is the suggestion of the Indian survey, and all map makers have apparently adopted it.

How Boston Might be Destroyed.

One of the most novel methods yet conceived of destroying a city is described in Popular Science Monthly. The author says:

"An enemy need not bother mustering battleships or waste his time bombarding from afar the intellectual hub of this land of ours. In time of peace let him have his spies build a big pumping station right in the middle of that city, and at the proper time start drawing indiscriminately from the ground below the water saturating the subsoil. You know a large number of Boston's big buildings rest upon floating foundations. Pump out the water in the supporting quicksand, and down those structures would tumble into the yawning cavities so created. It would be far more effective in its demolition than the projectiles of a hostile fleet."

Married His Widow.

Sir Thomas Lipton had this very good Scotch story:

Some time ago he visited Scotland, when he met an old friend whom he had not seen since they were at school together. They go to discussing old times and Sir Thomas suddenly asked: "And how's Geordie?" referring to an old Scotch school friend, known to both of them.

"Oh," was the answer, "he's dead long ago, and I shall never cease to regret him as long as I live."

"I never knew you had so much respect for him as all that," said Sir Thomas, in surprise.

"Na, na, you're wrang there," answered his friend. "It wasn't the respect I had for him, not that; but, you see, I married his widow!"

A Street in Moscow.

One street in Moscow, Miasnitskaya Ulitsa, is devoted almost entirely to stores selling machinery. The windows of these shops are large and of plate glass and display the various wares to good advantage. Many windows are devoted to large exhibits of various mechanisms, and at a certain hour in the afternoon these machines are, so far as possible, set in motion to give practical illustration of their workings.

Fatigue from Poisoned Blood

Sluggish action of the liver, kidneys and bowels leave impurities in the blood which render it poisonous. Poisoned blood is the cause of tired, languid feelings, as well as of headache, backache and bodily pains and aches.

By awakening the action of these filtering and excretory organs, Dr. Chase's Kidney-Liver Pills thoroughly cleanse the system, purify the blood and cure such ailments as indigestion, biliousness, kidney derangements and constipation. 25 cts.

Dr. Chase's
Kidney-Liver Pills

TEXAS RANGER FOOLED THEM

Sent N. Y. Scientists a Horned Rattlesnake,

And They "Swallowed" the Fake Smoothly.

New York—Gone is the glory of the great "bull snake" rattlesnake, the wonderful rhinoceros diamond back, the unparalleled Texas unicorn. Gone also is the pedigreed "goat" of the New York scientists who let a simple Texas ranger fool them with a new species of Crotalus adamanteus from the Mexican border, more wonderful than the sea serpent of Atlantic City bathing places, that wore a horn an inch long on the top of his skull. For Wiser Snake shed his skin the other night and the horn came off.

The mysterious rattler came to Raymond L. Ditmars, curator of reptiles at the Bronx Zoological Park, about three months ago, having been shipped north by W. A. Snake King, as he calls himself, a Texan who lives near Brownsville and who spends a great part of his time bagging reptiles for the Zoo. It was he who sent the huge diamond back that nearly cost the life of Keeper Tooney a few months ago, and the freak snake was an outcropping of this accident.

Curator Ditmars wrote to King in Texas telling him of the affair, and the snake hunter refused to take it seriously. He has been bitten so often by the "varmints" that he could not conceive of anyone, even a New York zoo keeper, being inconvenienced by them. Also it had cost him not a little trouble to get that snake, and perhaps he was peeved that his acquisition was not a desirable citizen.

PROMISED RARE SPECIMEN.

"You see," explained Mr. Ditmars, "when the army went to the border they drove all the snakes away for miles, and it was hard to get specimens. King wrote me that he drove his flivver automobile across the boundary line into the sand desert in search of some for us, and when he was in Mr. Carranza's territory some deliberately unfriendly natives plugged a couple of holes in his gasolene tank with American rifles. He had to go back home and get a couple of horses to tow his machine to where the snakes were. Of course it hurt after that to hear that one of the few he captured on the trip started a campaign of 'schrecklichkeit.' Anyhow, he wrote in answer to my letter, saying 'the next time I send you one it'll have a horn on it.'"

Sure enough, a few weeks later the mysterious snake arrived. It had a beautiful horn, fully an inch long, extending from the skin over the eyes. It was the only reptile the snake experts had seen with such an appendage. The so-called horn rattler of Texas only has two little bumps over the eyes much like the tip on a snail's head.

"King wrote me that he couldn't classify the snake," said Mr. Ditmars. "But he had discovered an entire race of them, and could furnish any number to the zoo. He asked me to examine it thoroughly and have some other scientists look it over and possibly write a treatise on the new species."

The curator did as Mr. Snake King asked. He called on two or three expert biologists. They got out their magnifying glasses and their microscopes and they looked at Senor Snake's horn.

"Wonderful!" exclaimed one, whose name it wouldn't be fair to tell. "Why, one can see the blood vessels in the membranous composition of the protuberance. It is absolutely genuine and unique."

The rest either agreed or admitted that they were stumped. But Raymond L. Ditmars has been handling snakes since he was in short knickerbockers, and at the age of 20 he was lecturing on them for the Board of Education. It is said he wasn't a success as a lecturer, because he insisted on illustrating his discourses with live specimens instead of stereopticon slides. Anyhow, he was canny and wary on the new marvel.

"I'll wait until Monsieur Snake sheds his skin," he allowed.

SKIN AND HORN CAME OFF.

The reptile was put in a glass cage, where the public and more scientists came to marvel at him. He seemed to enjoy the discussion that he caused, for he refused to slough. In the hot weather the average rattler gets a new suit of scales every few weeks, like a new Palm Beach suit, but this one stuck to his old uniform until it was positively shabby about the rattles and had a seedy look where it got the most wear.

At last came signs of the expected change. The reptile's eyes turned bluish in color and the next morning Mr. Ditmars, visiting the cage, saw a strange snake inside. It had a head as bald of horns as the outside of an egg. But on the skin, the old suit which had been discarded, stuck a strange contraption that looked like a bone collar button with the tip sharpened.

Mr. A. W. Snake King, with the assistance of an Indian, had cut an incision in the snake's skin over the eyes, and had inserted the spine of some Mexican bush, the base of which had been flattened to form a foundation. Then the skin had grown over again, the tiny scales had ringed themselves about the orifice, until it seemed perfectly natural. Only when the skin was shed did nature cast off the thing.

Now the skin lies on Curator Ditmars's desk in the reptile house, a warning to natural scientists and a monument to the simple Texas ranger who had the biologists plumb locoed for three months. And little Pancho Snake, no longer a mystery, but an ordinary Crotalus admanteus once more, coils his six and a half feet of new fall fashion union suit up in his cage and sticks out his fangs in full appreciation of the hoax.

Dispositions.

The Dispositions of men are different. A house is managed well by men and women of different dispositions, just as much as a carpenter cannot build a house with big and tall timbers only. Even a man of obstinacy or argumentative is not unnecessary in a family. But there must be a supervision over them all. If there is no one who binds them all the different dispositions bring confusion to the house.—Kyo.

Sore Corns Go! Absolutely Painless

No cutting, no plasters or pads to press the sore spot. Putnam's Extractor makes the corn go without pain. Takes out the sting overnight. Never fails—leaves no scar. Get a 25c bottle of Putnam's Corn Extractor to-day.

THE STROKE OAR

(By Willard Blakeman.)

A number of young men, mostly collegians, were sitting in a group on the forward deck of a North River steamer. They were going up to Poughkeepsie to a boat race of college crews on the Hudson. An elderly man sat near them listening to their talk and enjoying the exuberance of youth which came bubbling out of them. Presently he drew his chair near them and said:

"Your talk takes me back a good many years. I pulled in the race of 186— between Harvard and Yale, a race never to be forgotten by me on account of a curious culmination connected with it."

"What was that, sir?"

The man hesitated. Presently he said: "I'll give it to you, but understand that I don't put any interpretation on it.

"I was at Harvard the year I have mentioned. Yale had beaten us for several years. We had lost several consecutive races, and this year we were especially anxious to break up the run of ill success and get some encouragement into our supporters by winning a race. Those who could go back in college affairs said that there had been no success since Wilkins had been captain of the crew and stroke at the same time. We hadn't the coaches in those days you boys have now and were more dependent upon some single member of the crew.

"I was captain of the crew in 186— and made it up myself. I expected to give the stroke, but a couple of months before the regatta I was taken ill and when the race was about to come off I had not sufficiently recovered to row at all. I had a hard time to find a man to take my place in the crew, and as for getting one who could give the stroke and carry the crew to a possible success—it was impossible.

"The evening before the regatta I was sitting in my room at the ——— House alone and feeling very blue when there came a tap at my door. I said, 'Come in,' and a young man entered who was one of the most striking fellows in appearance I ever saw. He was very thinly dressed, and the muscles stood out all over him. The only thing against him for strength was that he was very pale.

"'Going to get licked to-morrow?' he said.

"'I suppose so. Who are you?'

"'I am a Harvard man. I reckon I'll have to help out. Can you use me?'

"I asked him a lot of questions about what class he was in, what course he was taking, when he had entered, when he would graduate, and could get nothing definite out of him. He said that he was an expert oarsman, and if I could put him on the crew and any one after the race attempted to prove that he had no right to be there it would be time enough to be more explicit. The college needed a victory, and after a victory it would pluck up.

"I fully agreed with him as to the necessity of a victory and arranged with him to be at the boathouse as the boat was about to be put into the water. He was there, all right, and when in rowing togs his frame was a sight to behold. I've never seen better biceps in my life. When the crew entered the boat he took the stroke.

"What a sweep he gave that oar of his! It seemed a feather in his hands. And his stroke was so perfect that, though there was not a man behind him who had ever been in a boat with him before, there was no difficulty in all of them keeping perfect time with him.

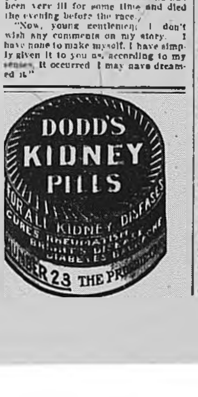
"The boat shot out into the middle of the river, where the faces of the crew were not very plain to those on shore, and I was glad of it, for I had my doubts about my stroke's right to be there. The boats lined up and made a start at the first signal to go.

"There was a noticeable difference between the work of the two crews. Now and again some Yale man would send up the spray, but not a man in the Harvard boat struck a cupful of water on the recover. It was all in the leadership of the stroke.

"Our fellows took the lead from the first and kept it around the stake boat and won the race by a good hundred yards. It was the prettiest won race I ever saw. When I got to the boathouse the men had carried in the boat. I looked around for my stroke, but didn't see him. One of the crew said he had just gone up the bank. I followed but he was nowhere to be seen.

"It would take a lot of time to tell you what was said about the introduction at the last moment of a new and unknown man. There was much adverse criticism and it fell principally on me. One thing I heard startled me. Several persons who had known Wilkins when he was in college declared that my stroke was he. I wondered if he had come back and got into the crew without letting me or any one know that he was doing what he had no right to do. I learned where Wilkins lived and wrote a line to him asking if he would kindly tell me where he was on the day of the regatta. What do you suppose was the reply? His father wrote me that he had been very ill for some time and died the evening before the race.

"Now, young gentlemen, I don't wish any comments on my story. I have none to make myself. I have simply given it to you as, according to my senses, it occurred. I may have dreamed it."



WIT AND HUMOR

SO SUDDEN, TOO.

(London Saturday Journal)

Geraldine—Do you get me?

Gerald—Is that a leap year proposal?

COLD SNATCHERS.

(Christian Register)

Teacher—Johnny, can you tell me the function of the pores of our bodies?

Johnny—They are things we use to catch cold with.

TRUTHFUL ANYHOW.

(Pearson's Weekly, London)

The Debtor—I'm sorry, sir, but I can't pay that bill this month.

The Creditor—But that's what you told me a month ago.

The Debtor—Well, didn't I keep my word?

SUITED.

(New York World)

"By Jove, old chap, Polly is an awfully bright girl. She has brains enough for two."

"Then she's the very girl for you, old man."

QUEER.

(Pearson's Weekly, London)

"It seems funny that living altogether in the ocean they should never get their sea legs on."

"Whom are you talking about?"

"The mermaids."

DIETARY ILLUSIONS.

(Philadelphia Bulletin)

First Landlady—I manage to keep my boarders thinner than you do.

Second Landlady—Oh, I don't know, you keep them so thin that they look longer than they really are.

THE REASON?

(Judge)

Wife—I hope you will forgive this supper to-night dear. We have canned soup, canned fish, canned vegetables and canned dessert.

Husband—Canned cook, I suppose, is

LOST BALLS.

(Judge)

"Fine golf links you have here, old man! About what do you go around in?"

"Oh, in about 18 lost balls."

A MAN OF CLASSES.

(Boise, Idaho Statesman)

"Do you know Flubdub?"

"I know him when he's broke. Flubdub is one of those fellows who runs with one crowd when he's broke and another crowd when he has money to spend."

NOT TO BE TOLD.

(Kansas City Journal)

"See here, you old rascal, why didn't you tell me this horse was lame before I bought him?"

"Well, the feller that sold him to me didn't say nuthin' about it, so I thought it was a secret."

NO DECEPTION.

(Pearson's Weekly, London)

Exasperated Purchaser—Didn't you guarantee that this parrot would repeat every word he heard?

Bird Dealer—Certainly I did.

Purchaser—But he don't repeat a single word.

Dealer—He repeats every word he hears; he never hears any. He is as deaf as a post.

AN EXTRA DAY.

(Boston Transcript)

"This is Leap Year, isn't it?"

"Yes, we'll have one more cook."

WHAT IT WAS WORTH.

(Christian Register)

"Miserly offered the man who saved his life half a dollar."

"Did the man accept it?"

"Yes, but he handed Miserly 20 cents change."

HOW HE DOES IT.

(Siren)

"That fellow Montmorency is doing a great deal to rouse the country."

"He doesn't look very intelligent."

"I know, but he manufacturers alarm clocks."

WILLING TO ARBITRATE.

(Pearson's Weekly, London)

Wrathful Pa—Freddie, didn't you promise me not to play marbles again?

Freddie—Yes, sir.

Wrathful Pa—And didn't I promise to whip you if you did?

Freddie—Yes, sir; but as I forgot to keep my promise I won't hold you to yours.

HANGING PICTURES.

This is a Task That Should Produce Artistic Results.

In going over one's pictures eliminate all but the choicest and best beloved and try to group together the pictures whose subjects are somewhat related or which have a similarity in frames. Indeed, even when subjects are closely related it is not possible always to hang pictures together owing to a too great difference in the kind of frames. As a rule, any room looks better, especially small rooms, where only one color frame is used on all pictures, but if this is not possible then the next best thing is to keep all of te pictures in gilt frames in one part of the room, all of the dark framed pictures on another wall, etc.

Also one can get the best results by separating water colors and prints, and etchings or engravings should, of course, always be hung apart from other pictures. Another point frequently overlooked is the wisdom of putting the darker pictures on the wall that receives the best light from windows and contrariwise the gilt framed pictures of lighter subjects where they may serve to brighten a dark part of the room.

Finally do not crowd the walls. Hang pictures well in line with the eyes of a person of average height, and, of course, choose plain walls, tinted or papered, for backgrounds.

The Way to Float.

This is the advance of an old swimmer to those who cannot swim: "Any human being who will have the presence of mind to clap the hands behind his back and turn the face towards the zenith may float at ease and in perfect safety in tolerably still water. When you first find yourself in deep water you have only to consider yourself an empty pitcher. Let your mouth and nose and not the top of your head be the highest part of you and you are safe. But thrust up one of your bony hands and down you go—turning up the handle tips over the pitcher." There are reasons and logic in this.

A PERSONAL ACCOUNT.

(Toronto Telegram)

Britain may decide to seize hundreds of millions of Hun-owned property to avenge the execution of Captain Fryatt.

But seizure of property has never yet been the British method of securing satisfaction for the murder of a British subject.

Seizure of Hun-owned property may serve as a temporary measure, but the British people will only be fully satisfied when the man primarily responsible for the execution of Captain Fryatt is brought to personal account for his criminal act.

Treading on other people's toes won't always enable you to rise above them.

The Fall Coats Show the New Collar, and Full Sleeves

With Wool Velours, Zibeline and other soft, thick weaves, the correct materials and brown, blue and green, the leading colors.

Warm, Wide and Long are the coats presented for our fall and winter wearing. Made of soft wool Velours and deep pile zibelines, they're cut on generous lines, falling full from the neck with sleeves loose at the shoulder and elbow. As for the new collar, it is of the convertible order, rolling back flat or rising up high, turning over and buttoning close to the throat.

Beautiful examples of the mode are now here. A collection of exclusive designs in comfortable designs, suitable for motoring, travelling and general cool weather wear.

You will find them very attractive coats in blue, brown, green, fancy tweed mixtures and black. The cloth is of soft nap or a fleece finished cloth, mostly belted, a good many with cross over belt in front and raglan sleeve. Prices $10.00, $12 50 to $25.00.

Splendid Showing of Serges

From the famous West of England Cloth Mills. The ever-popular, ever-serviceable Serge.

NEIGHBORING VILLAGES & COUNTRYSIDE

News of the Week Collected by Staff of Live Correspondents

OTTER CREEK

Mr. Charles Schwindt and daughter of the 12th and Mr. George Schwindt of Ayton were visitors of Mr. and Mrs. David Grasson Sunday.

Miss Florence and Helen Piohl of 12th were visitors on the 14th on Sunday.

Mr. and Mrs. Ferdinand Wichle were visitors at Mr. and Mrs. William Kleins of Mildmay Sunday last.

Mrs. Thomas A. Hutton found a hen's egg as large as a goose egg and upon opening it found there was an egg inside with a yellow shell around and the outside shell was white and between the outside shell and inside shell there was the white of an egg. The inside egg was like a natural egg.

MILDMAY

Miss Rose Helwig was a visitor in Walkerton last Friday afternoon.

Miss Elda Gowdy is on the sick list suffering from an attack of appendicitus. Drs. Lucy and Wilson operated on her on Sunday morning. She is getting along as well as can be looked for and good hopes are entertained that she will recover.

Signaller Tyrwhitt Kidd, son of Principal J. T. Kidd, was wounded in France. The information received said he was injured by shell shock.

Mr. El. Diebel who is working in Elora visited in town over Sunday making the trip on his Indian motorcycle.

Edward Ruland of Dreturten has sold a piece of land of about three acres to Mr. Theo. Kopare. Mr. Ruland intends going out of the real estate business.

The following left for the West last week, Gideon Schneider, Joseph L. Meyer and Henry Schneider.

Mr. Jacob Palm's new house on Church St. is about finished and will be ready in a week or two. The location of the house is very good

Miss Irene Uhrich is now one of the pupils of the Walkerton High School.

Mr. Robb of Elgin County is delivering Nature Study Charts to the schools in this locality.

Mr. Robb has purchased an apple-butter making outfit from Hergott Bros. and intends to install it in Elgin County to try and manufacture a food product from the thousands of barrels of apples which annually go to waste there. Mr. Robb has sent samples of apple-butter and pumpkin butter made in Mildmay to the Government to be examined. He has secured an order to supply this product to the Prison Farm, Guelph.

Miss Dora Wendt visited her parents over Sunday.

Mr. Peter Reuber took a carload of Mildmay young ladies to Hanover on Sunday evening.

Mr. Solomon Beese who used to run a general store in the present office of the Township Clerk died at the Enid General Hospital. Mr Besse lived in Waukomis. He had many friends in this locality.

WESTFORD

Miss L. Murray and Miss Maggie Linehan returned to Toronto last week after spending the holidays with friends here.

Those who attended The Toronto fair from here were Mr. W. C. Smyth, Mr. John McGlynn, Mrs. J. Murray and Mrs. A. E. Haldenby.

Mr. Joe Corrigan and daughter of Chepstow visited friends here on Friday.

Master Charles Murray who underwent an operation for appendicitis two weeks ago and is improving as well as can be expected.

Mr. J. H. Murray of Toronto spent a few days at his home here last week.

Mr and Mrs. Ed. Benniger of Riversdale visited at Mr. Thomas Fallon's on Sunday.

EAST BRUCE

Mr. Hector McKinnon spent Sunday, Elora Road North.

Mr. J. D. McGillivary Sundayed with friends on the Eighth.

Mr. Jno. Rose took in the Toronto Fair.

Miss Alice Lamont is visiting her friend, Miss McBeath of Paisley.

Mr. and Mrs. Keith of Owen Sound spent Sunday at Mrs. A. Pace's.

Mr. and Mrs. McGregor motored to Hensel and spent the week-end visiting friends there.

Professor Farrel of Toronto occupied the pulpit of Centre Bruce church on Sunday last and preached an impressive sermon on Missionary work and the need of supporting in the good work.

PINKERTON

Miss Maude and Master Carl McKee return to school in Belleville this week.

Miss Grace Elliott returned from Molesworth last week.

Rev. and Mrs. Gale, Mr. and Mrs. Howard Hetherick and Miss Kathleen Pinkerton motored over to Chesley last Tuesday and attended the Presbytery meeting in that town.

Mr. and Mrs. Will Meyer of Cargill spent Sunday at Miss Russell's.

Mrs. Sheridan of the 16th con., Greenock, is visiting old friends in the village this week.

Miss Lena Pinkerton attended Toronto Exhibition last week.

Senator J. J. Donnelly attended Toronto Exhibition last week. He was accompanied to the city by his sons, Frank and Clare, who will attend school there.

The Pinkerton branch of the Red Cross Society is arranging for the concert on Fair night, Sept. 22nd, and the proceeds will go to the society. It promises to be a particularly good programme and a large attendance is expected.

EDEN GROVE

Sammy says when he found so many Presbyterians and Baptists in one western town he decided it was a steamboat line they needed instead of a railroad.

Messrs. John Seller and Hub Pearson visited Toronto last week taking in the exhibition.

Never mind, kiddies, if the weather keeps cool it will soon be Xmas holidays.

Mr. and Mrs. McKeeman and Mr. Mrs. Rosseau motored to Kincardine Sunday.

It is rumored that a happy event will take place in an eastern village next week when a young gent and lady from our town will take an interesting part.

Mr. Jim Spatling, Cargill, relieved the agent here during his absence last week.

Mr. Gordon Brown left on the Harvesters' excursion for the west.

Wonder who the fellow with the No. 13 shoes is, who walks so heavy when going home from seeing his maiden. Please step lightly and don't disturb our sleep.

Miss Mary Desmond, nurse of Pinkerton, visited her cousin, Mattie, last week.

Now is the time to fill up the shelves in your cellar with pickles, sloe gin, etc., for you wont have a chance to get pickled after the 16th.

Don't miss the Pinkerton Fair on the 22nd. The pumpkins will be bigger than ever.

Misses Mae and Martha Fordyce visited Walkerton friends last week.

The Man in the Moon was full Monday evening for the last time before the 16th and he will be down to his last quarter on the 19th. Hard luck.

Last Wednesday evening Misses Gertrude O'Reilly and Mattie Desmond, graduate nurses, very pleasantly entertained a number of their young friends to a social evening in the Opera House, when a few most delightful hours were greatly enjoyed in dancing, card-playing. The hostess providing a dainty midnight luncheon. The guests included quite a number from Walkerton and Cargill, friends of the young ladies.

Sunny Jim spent a couple of days last week looking up old Waterloo County friends.

Mr. Tony Rosseau has rented the hotel in Clifford and is having a sale on Friday. Mr. and Mrs. Rosseau intend leaving for their new home on Tuesday. During their stay here they made many good friends who will be sorry to hear of their leaving. All wish them everything that's good in their future home. They will always be welcome back to our Burg.

Mr. Zettler, Walkerton, shipped a car of cattle here on Saturday.

If you have any good looking visitors please leave their names and where from, at the Post-Office.

The next question. Who will run the Simcoe House when Tony is gone?

The ladies had a quilting at the home of Mrs. T. Desmond's on Friday, they apparently enjoyed themselves without the gents—funny what women can do sometimes.

Ice cream took a drop Saturday—when the bottom came out of the tub.

Miss Lily Alexander was a week-end visitor with Paisley friends.

Brant Council will meet in Township Hall, Monday 18th at 10 a. m.

Miss Nellie Stansal, graduate nurse Rochester N. Y. is enjoying her vacation at her home here.

Rev. Mr. Almack and John Seller attended the Missionary Convention held in Paisley on Tuesday.

Mr. Johnston, Post Office Inspector, made his usual official visit to our office last week and found everything satisfactory.

CARGILL

Mr. and Mrs. C. Kyle, Mr. and Mrs. I. Chambers, Miss McCoy and Messrs. Ziegler and Saunders attended the Big Fair in Toronto last week.

Lance Corporal E. A. Garland and Signaller N. Pegelo of the 160th Bruce Batt., London, spent the week-end here.

Mr. and Mrs. Fred Pegelo and family spent Sunday with friends in Elmwood.

Miss Edna Pearson who spent the past month with friends here returned to Toronto on Thursday.

Mrs. H. N. Brownscombe spent the week-end in Stratford visiting relatives.

After one week's darkness the electric lights were restored and the coal oil and lamp cleaning is over once more.

The Ladies Patriotic League made a shipment on Saturday.

Mrs. G. L. Saunders is on a two weeks visit with friends in Galt.

Mrs. Powers and children returned on Wednesday after a month's visit in Dorneybook N. D.

Mrs. Robert McConkey and two children of Hall's Prairie, B. C. is home on an extended visit to her parents, Mr. and Mrs. H. Sparling.

Mr. and Mrs. Ziegler and babe motored to Waterloo on Sunday, returning on Monday.

The Simcoe Poultry Co. who have been shipping here every fall made the first shipment of the season on Wednesday.

Mrs. R. Vance of Buffalo is visiting with Mrs. John Clancy.

Quite a number from here attended the Northern Exhibition in Walkerton on Wednesday.

G. T. R. Agent Clancy was in Palmerston on Thursday.

Mr. and Mrs. C. W. Keeling left on Thursday for a few weeks holiday with friends at Cranbrook and Stratford.

Mr. J. J. Dick of Teeswater was in the village on Saturday.

BORN—On Friday Sept. 8th, to Mr. and Mrs. J. E. Hall a daughter.

Miss Eleanor Jordan of Brussels Sundayed with friends here.

Mr. James Hardaker returned home on Saturday after a week's visit with relations in Chatham and Windsor. Mrs. Hardaker and family remained over for another week.

A number from this burg and vicinity are taking in Western Fair, London and visiting the Bruce Boys of the 160th. Batt.

A very pretty wedding was solemnized at the home of Mrs. Agnes Keyes on Tuesday of this week when Estella Mae became the wife of Mr. John C. Thornton of Toronto. The officiating clergyman was Rev. Perdue, rector of St. Thomas church, Walkerton. At High Noon the bride entered the drawing room upon the arm of her brother Mr. John Keyes while Miss Emma E. Loughleen played Mendelssohn's wedding march. The bride, who was unattended, was attired in a dark brown Cheviot travelling suit and pink hat with brown trimming and corsage bouquet of white roses and lilly of the valley. The drawing room and altar were prettily decorated with vines asters and fern. After the ceremony the company adjourned to the dining room where a splendid wedding feast had been spread. The groom's gift to the bride was a beautiful Gerrard Heintzman Player Piano, and to the organist a Gold Brooch set with pearls. The bride was the recipient of many useful and handsome gifts testifying to the high esteem in which she was held in this neighbourhood. The happy couple left on the afternoon train for a short trip to Detroit and other points after which they will reside in Toronto. Our best wishes go with them for a long happy voyage over the matrimonial sea.

SOLWAY

Mr. and Mrs. Fisher from Carlsruhe visited at the home of their daughter, Mrs. Jno. Streeder, here last week.

Mr. Dave Coates and sister Jessie visited friends in Chesley on Sunday.

Miss B. McGarrity has returned to her home here after spending a month with friends in Syracuse and Hamilton.

Mr. and Mrs. Jas. Burtel from Maple Hill visited at Mr. L. Michell's last week.

Mr. and Mrs. Pickle from Wingham motored up and spent Sunday with Mr. Thos. Coates.

Miss L. G. Michell returned to New Liskeard on Monday after holidaying at her home here.

Misses Ethel and Lucinda Michell spent Friday with their uncle, Mr. J A McDonald, Chesley.

OUR WESTERM LETTER

(Continued on page 1)

tinuously for three days and as it is turning cold everyone is dreading that it may end up in a snow or a big freeze. It is simply hades when it snows before harvest. Some six years ago it snowed in the middle of August. Luckily it did not freeze, but the grain had to be cut one way and it kept us hustling to cut four acres a day with a binder. We were six weeks cutting 160 acres of grain and we were on the binder every day Sundays included. The next year it snowed in the middle of harvest and froze hard. It was ten days before it thawed so that harvest could recommence. The grain was hardly cut when it snowed again and that snow stayed all winter. We stacked our grain with a sleigh that year. Since then we have had good years for harvest, only hope this year isn't going going to the snow harvest. Of late years farmers in this locality have been more inclined to grow grain for sale and keep less stock. Farms that a few years ago had large herds will now be found with comparatively few cattle, the greater portion being plowed up and in grain. Not very many years ago the average three year old steer was worth $20 in the Fall When the price for these went to $60, and other cattle in proportion lots of farmers almost denuded themselves of cattle thinking these prices could never stay. Consequently cattle are not nearly so plentiful. The farmer who has stayed with his stock can make something of his crop even if frozen or hailed. The man who has abandoned them for grain growing is right up against it when he meets a crop failure.

We had an illustration some years ago of the attitude taken banks when dealing with those occupied in mixed farming and the exclusive grain grower. A number of us were at the P. O. waiting for the stage to bring our mail. One farmer stated it by saying he believed they made their money more easily in Saskatchewan growing wheat than we did in Alberta with our cattle and hogs. A horse-dealer who had just entered from Saskatchewan after disposing of a couple of car loads of horses shipped in, "If you only knew it, you are better off than they are" he said "This is my second trip there with horses, on the first occasion I sold a man some horses. This time he wanted another team for $500 but hadn't the money. I didn't care to take his note as I did not intend to return to that locality and suggested he should borrow the money from the bank. He had told me he had 320 acres free of debt besides all necessary machinery and horses. He said he couldn't get that much from the bank. So I went to the bank and asked if his statement was true. The manager replied it was. Well, said I, can't you lend him $500 to buy a team? No, said the banker. Why, I replied in Alberta a farmer with only 160 acres would have no difficulty in borrowing that amount. That's all right, replied he, in Alberta you keep stock. A few years ago this man was in the same shape he is in now. We had a crop failure, he had to borrow money to pay his store bill and buy seed grain, we had another crop failure and he had to mortgage his place to pay us and buy more seed grain. If we had had a third crop failure he would have been sold out. With cattle he would have had something to go on with and would have got in that shape. That is why I don't care to risk $500 on his team, So you see if you fellows only knew it you are the best off." concluded the horse dealer.

26th. Aug.

Our dreaded snow storm did not materialize and the weather is again warm. Haying is in progress and will soon be completed. Harvest is now hard on our heels, wheat is being cut not because it is ripe but because it is frozen. A great deal of damage has been done through this providence by both hail and frost. It is hard to estimate the loss, but if all the reports are true about one fourth of the crop must have been destroyed.

The crop of wild duck has been good and there will be plenty for our hunters when the shooting season opens. The deer have not all been scared out of this neighbourhood yet as they have been seen near here off and on all summer.

4th. Sept.

We have just completed another week of rain and it still rains. This is almost the meanest summer we remember. It began cold and wet and has remained mostly wet and some cold all the time. Last week we saw a man who had come down from Edmonton by auto, he said he had not seen a field of wheat or barley between there and Lacombe that was not frozen.

Fall
Clearing Sale of
WALL
PAPER

All of my 1916 Wall Paper must be cleared out in the next 30 days to make room for next season's goods which are now coming in.—There is a large assortment of high grade Wall Paper that will be on sale at very low prices.

MARRIED

GALLINGER—SUBJECT—At the Manse, Walkerton, on Wednesday, September 20th by Rev. Thos. Wilson, Miss Laura Subject of Elmwood to Robert Douglas Gallinger of Eden Grove.

SAW ZEPP BROUGHT DOWN

Graphic Description of the Thrilling Air Fight Over Old London in which British Aviator Won the V. C., Described by Capt. Eric Robertson.

A letter received this week by Mr. Norman Robertson from his son, Capt. C. Eric Robertson, Royal Flying Corps, gives a graphic description of the recent Zeppelin raid over Old London, and the bringing down on English soil of the first German Zepp. by a British aviator.

London Sept. 3rd, 1916.

Early this morning—at about two o'clock—I was awakened by a heavy bombardment, so got up and joined the rest of London in watching the Zepp strafing and being strafed. Several of them came over last night but only one directed its "steps" to London—and it, as known by this time, did not return to Hunland. It was a great sight. The Zepp looked like a tiny golden cigar with the searchlights turned on it, and the "Archies" were thundering away to beat the band. None of the shells seemed to be close however, and in about ten minutes the big fellow sailed out of sight in the clouds and the firing stopped. I was just about to go back to bed again as it seemed as though the show were over for the night, when away to the north there appeared a little spark. It grew and grew until it was a great red blaze, which hovered a moment and then shot down to the earth. Then all those millions of watchers realized that the first Zeppelin had been brought down on English soil, and I wish you could have heard the shout that came up from this big city. Meanwhile two different colored lights appeared right over the spot where the Zepp had been and then I realized that it was our own little R. F. C. which had done the trick, for these last little specks of light were the very lights of an aeroplane signalling for landing flares to be set out to guide us home. We have some new stunts for Zepp fighting and this is the first time they were tried out. The chap in the machine was a pilot named Robinson. He will probably get the V. C.

To-day Capt. Edgar and I motored out to the wreck. It fell in an open field—which is a mercy—well to the north of the city, near Enfield. A company of Grenadier Guards were to keep back the mob, but we managed to find some one we knew and went right in and inspected the wreckage. Naturally after a tumble of 12,000 ft. there was not very much left of the Zepp, and the fire warped and twisted almost every part of it. They were carefully collecting the engines however, so that they could diamantle and examine them. I collected some souvenirs, a few radiator tubes, some bolts and screws and a ball of fused aluminum. There was a horrible smell of burnt flesh around the place, for the corpses had not yet been removed. The sight of them was a bit horrible too.

Since beginning this letter I have seen the report of Lieut. Robinson. It is so interesting that I am sorry it is marked so plainly "Confidential". The story of the means he employed is particularly fascinating. This last sentence is a sample of the matter of fact way in which he tells his little yarn: "Being short of petrol and oil I could not make my own aerodome so landed on Heinault's farm". He had been up there chasing that Zepp from 11.30 till 3. a. m.

Eric.

PRIVATE JIM RUSSEL

Gets a Warm Send-Off—Four Brothers Now at the Front—Those Russels Are Great Stuff!

A pleasing affair took place at the Town Hall on Monday night when a few representative people of the town gathered informally for a few minutes to give a little send-off to Pte. Jim Russell of the 2nd Field Ambulance, A. M. C., who has been home for a few weeks and is now returning to the Front. Mr. John Rowland, acting as spokesman, read a neat address expressing appreciation of what he and other Walkerton boys are doing for the Empire and wishing him godspeed and a safe return. Warden McNab, on behalf of the assembled citizens, presented Jim with a handsome wrist watch. David Robertson K. C., H. M. Lay, Couns. McCarter and Leitner and a number of others had a few words of encouragement for the departing soldier boy. Pte. Russell comes of a family that has surely showed its metal during the present war. He is one of the four sons of Coun. Robt. Russell who are at the Front to day. That is a proud record that is not equalled in Walkerton. All four of the boys have been under fire, three in the present war, and Stan, who is in training at Camp Borden, in the South African War. He was one of the Canadian heroes who survived the battle of Harts River.

Honorable Distinction

Miss Grace Martin B. A. formerly of the Walkerton High School, won the distinction of being the only candidate in Canada passing both parts I and II of the Examination for Associateship of the Actuarial Society of America. Eleven candidates secured pass standing. Miss Martin is a member of the Mutual Life Assurance Co's staff.

+ + +

Death of Mrs. McDermid

The death occurred at Guelph General Hospital on Monday afternoon of Mrs. Annie Nixon McDermid, youngest daughter of Mrs. Hutton sr. of Brant, following an operation for goitre. She was in her fifty-ninth year. Mrs. McDermid was born and raised in Brant. Latterly she lived at Emo, Rainy River District, where the remains were taken for interment alongside her late husband. Two sons and three daughters are left to mourn. Mr. John Hutton of Brant is an only surviving brother.

+ + +

Dick Addley Wounded

Twice in one week sorrow came to the home of Mrs. Chas. Addley, a Walkerton lady. On Saturday, Sept. 9th, her husband was called away following a lengthy illness. Two days later her boy, Dick, who went to England with the 34th, fell, seriously wounded, on the battlefield in France. An official telegram received on Thursday last stated that Dick had been admitted on Sept. 11th to the Queen Alexandria Military Hospital at London, Eng., with gunshot wounds in his face and chest.

+ + +

Will Proceed With the Work.

A special meeting of the Children's Aid Society of the County of Bruce, was held in the Council Chamber on Tuesday of this week. After some deliberation as to the necessity and propriety of procuring a Children's Shelter, on motion of Mrs. D. Robertson and Mrs. Judge Klein, it was unanimously resolved that a Shelter be provided as soon as possible and that a Committee consisting of the Board of Management and D. Robertson K. C. the Society's solicitor, be appointed to take charge of the work.

+ + +

A Novel Exhibit

No exhibit attracted more attention at the Fair last Wednesday than a box of pets shown by a ten year old boy, Morris McCarter, son of Mr. James McCarter of Brant. To make the lion and the lamb lie down together would seem to be a comparatively easy accomplishment compared with what this bright young lad succeeded in doing. All in the one cage, he had a pig, a cat, a rabbit, a goose, a duck, and a chicken, living in entire harmony. Needless to say, the pets required a good deal of training before they would consent to tolerate one another's company at such close quarters.

+ + +

Cable From Red Cross

Last month Mr. C. W. Cryderman had occasion to cable to Salonika for word regarding his son, Wilbur, who had been reported dangerously ill with dysentery. The parents' intense anxiety was somewhat relieved by a reassuring cable in reply a few days later. Mr. and Mrs. Cryderman were greatly pleased on Saturday to receive quite unexpectedly a second cable, this time from the Red Cross Society reporting that their son was doing well. This is a striking instance of the thousand and one ways in which this world-wide organization is rendering noble service to humanity every day.

+ + +

County Court Clerkship.

We understand that the contest for the County Court Clerkship, made vacant by the death of the late Matthew Goetz, has simmered down to two candidates, Mr. Arthur Collins B. A., barrister and town clerk and treasurer of Walkerton, and Mr. C. E. Start, barrister of Tara. It is felt here, that the appointment will likely go to Mr. Collins as it is naturally a South Bruce appointment, the other two Bruce ridings dividing the Shrievalty and the Registrarship. There is no question of Mr. Collins being admirably qualified for the position as well as having strong political claims which are being urged by his friends, and his appointment would be especially popular in this part of the county.

+ + +

A Bad Accident

Mr. Anthony Kritz, a prosperous farmer of Chepstow, was the victim of a serious accident on Sunday night. He was driving home in company with his wife, from a visit to their daughter, Mrs. Lawrence Montag of Formosa and were opposite Mr. Jos. Spitzig's house, within a half-mile of home when, Mr. Kritz states, the hold-ups on the harness broke and the animal began to kick. Making a mad dive off the road, the animal tried to jump the stone fence, about the same time delivering Mr. Kritz a violent kick in the knee. His wife managed to jump from the rig fortunately without injury. Mr. Kritz's knee-cap was split, rendering his leg useless and as he is well up in years it is doubtful whether he will recover the full use of his injured limb.

NEWS ABOUT TOWN

Pinkerton Fair Friday.

Coat and Pant-Maker wanted at Woodman & Co's.

For the best farm shoes, go to Ramsey's Shoe Store.

New fall styles in women's fine shoes at Ramsey's Shoe Store.

Soft felt hats were $2.25 and 2.50, now $1.98 at Woodman & Co.

Corp. Swanston of the 160th has been visiting his parents here.

Hon. George P. Graham predicts a general election within a year.

Major and Mrs. McNally and Sergt. McNally were here over Sunday.

Mr. John Flett left for his home at Vancouver B. C. last Thursday.

Mens and boys caps were 75 and 50c. now 28 and 35c.—Woodman & Co.

Rev. and Mrs. Roy Kaine of Thamesville, are visitors in town this week.

Regal on your shoes meant quality in them. Sold at Ramsey's Shoe Store.

Hugh Etsell returned this morning to Toronto to resume his old position.

Miss Cora Wettlaufer is visiting her brother, Mr. Ed. Wettlaufer at Kitchener.

At the old price a window full of women's $3.50 shoes Ramsey the Shoeman.

Ed. Bauman left on Tuesday for Hespeler where he has secured a position.

S. S. No. 4, Brant, Miss Hamilton, teacher, has contributed $73 to patriotic funds.

Mr. H. M. Lay secured second prize for his Sweet Peas at the Toronto Exhibition.

Mrs. J. D. Huether of Guelph spent a few days last week with her mother, Mrs. A. Todd.

Try a pair of Drs. Special Shoes for fall and winter wear. Sold at Ramsey's Shoe Store.

Mrs. Rev. D. McLennan returned on Monday from a two weeks' visit to friends at Orangeville.

Mr. J. Wagner, relieving agent, is on duty at the Grand Trunk Station during Mr. N. E. Walford's holidays.

The East Bruce Sunday School Association will hold its annual convention at Cargill on Wednesday, October 4th.

Mrs. Guggisberg returned to her home at Regina last week. Her mother, Mrs. Archie Todd, accompanied her for a visit.

Capt. Farquhar Shaw of the 160th spent the week-end here. Mrs. Shaw who has been visiting here returned on Monday to Fergus.

Sweater coats. Now is the time to buy at their slaughter sale. Can't buy again for what we are selling them for now.—Woodman & Co.

Mr. and Mrs. D. H. McDonald and little sons, Evan and Warren, motored up from Toronto and spent the week-end at Mr. S. A. Rife's.

Brian McCool has secured his Lower School Examination on appeal. This is the Department exam. on which so many candidates were plucked this year.

Mr. and Mrs. J. P. Noonan, daughter Miss Patricia, and son William, Mrs. Hinchey, and Mrs. John Fleming of Mt. Forest visited the latter's daughter, Mrs. L. H. McNamara on Friday.

Ptes. A. Plant and A. Denny accompanied by Misses Mabel Crawford, Leafy Mosack and Loretta O'Neil, motored to Southampton and spent Sunday at the former's home, Mr. and Mrs. J. Plant.

Courtney Knepler of the 160th Bugle Band was badly knocked out by an accident at the Y. M. C. A., London, last Wednesday. He was taking a swim in the big pool, when he struck his head forcibly against the cement side. He was unconscious for some time.

Walter Howe, a farmer living near Teeswater, had a horse and buggy stolen from his stable some time between Saturday night and Sunday morning by parties unknown. Chief Ferguson is on the trail of two Indians suspected of having done the job.

YOU CAN HELP!

So many times has the Telescope been asked for the addresses of Walkerton boys at the Front by friends who wish to write the Boys or send them parcels that we have decided to publish a list of addresses of as many as possible of the Soldiers from Walkerton and surrounding district. We invite the co-operation of our readers in doing this little service. Send us without delay any addresses you may have in your possession of Walkerton boys at the Front or in England. We expect to publish the list in a couple of weeks.

News About Town on page 5.

Mr. W. M. Shaw went to Toronto on business Monday.

Mrs. O. B. Schnurr and Miss Tillie, spent Sunday at Orangeville.

Sergt. H. K. Watts of the 160th spent the week-end at his home here.

Pte. Sam Truax of the 160th Bugle Band spent the week-end at his home here.

Sergt. Harry McDougall of the 160th spent the week-end at his home here.

Pte. Stewart Pickney of the 160th was home on week-end leave this week.

Mrs. A. Bauman and little son, left on Monday to visit her parents at Waterloo.

Pte. H. Williams of the 160th Bugle Band spent the week-end at Mr. S. Sherrer's.

Mr. and Mrs. Harvey Oberle, of Detroit are visiting the former's parents, Mr. and Mrs. A. Oberle.

Miss Olive Dickison who was operated upon for appendicitis recently, left the County Hospital on Tuesday.

Mrs. Geo. Carbet returned last Thursday from a two weeks' visit to Toronto, Niagara Falls and Jacksons Point.

Mr. Dick Axworthy, G. T. R. operator at West Toronto, visited his parents, Mr. and Mrs. Frank Axworthy, here last week.

Mr. F. W. Seiveright of Toronto and his nephew, Mr. W. F. MacDonald of the World Staff, are guests of Mr. A. P. Seiveright.

Mr. and Mrs. O. Gammond of Toronto are here this week owing to the serious illness of the latter's father, Mr. Joseph Carbert.

Pte. Clifford Kempton and Lance-Corporal Crowhurst of the 160th Bugle Band spent the week-end at the home of Mr. Henry Williams.

Mrs. John Pletsch who underwent two serious operations three weeks ago, was able to return home from the County Hospital on Monday.

A second Grey County battalion has been authorized to be known as the 248th. Lt. Col. W. N. Chisholm of Owen Sound will be the commanding officer.

Court of Revision of the Voters List was held on Monday evening under the Chairmanship of Coun. Pletsch. Nineteen names were added to the roll.

Farmers in this section are disposing freely of their wheat, which brings $1.25 this week. More wheat is being brought in at present than at any time for several years.

Pte Joe Chesney of the 160th, arrived home from London Camp on Tuesday to find that the stork had called at his place and left him a bouncing young son.

Mr. and Mrs. Adam Seigmiller, their son Mr. Art Seigmiller, and Mr. and Mrs. Kreller of Normandy, took a motor trip to Berlin and adjacent towns last week, calling on a number of old friends.

Mrs. S. Lake complained to Chief Ferguson on Saturday night that a neighbor had stolen her dog. The Chief had a pointed interview with the culprit who quickly restored the dog to its owner.

Father Cox S. J. of Montreal concluded a two weeks Mission, consisting of a series of sermons and devotions; at the R.C. Church here on Sunday. From here he went to Dublin, Ont. to conduct a mission.

Pte. John Rae of the 228th Batt arrived home on sick leave this week with an attack of bronchitis. Pte. Rae is the second son of Mr. Andrew Rae of Malcolm, and a former member of the local Merchants Bank staff.

Pte. Robert S. Hamilton, a brother of Mrs. K. M. Taylor of this town, had his name in Tuesday's casuality list among the wounded. Pte. Hamilton enlisted with the 61st Batt. at Winnipeg and was afterwards transferred to the 2nd Batt. He is well-known in Walkerton, having worked here two or three years ago.

Mr. William Seeling left Tuesday for Alsace, Alta. to assist his nephew, Mr. George Berscht for the next 2 month's Mr. Berscht, who is an old Bruce boy has a 320 acre farm practically all under crop, and also runs a threshing out it. Through an unfortunate injury to his foot he has been unable to attend the harvesting operations.

Something of a sensation was caused in one of our schools recently when two youngsters who had been fighting were given their choice by the teacher of taking a strapping or the fighting it out before the whole class. After some hesitation the two youngsters got up and waded in again before the class and it was no fake exhibition either.

+ + +

Died From Wounds

Mr. Timothy Hanley of Chepstow received word on Tuesday that his son, Lance-Corporal Wm. Hanley had died of wounds.

Choir Leader Wanted.

For the Methodist Church Choir. Duties to commence first of October. Apply to Mrs. J. E. Shelton.

+ + +

Died At Bracebridge

Mrs. Ed. Kelly and Mrs. Dan Murray went to Bracebridge on Friday to attend the funeral of their youngest sister, Mrs. Fitzmaurice of Bracebridge, formerly Miss Bridget Leonard of Chepstow. Particulars have not yet been received of the cause of her death. She was in her 32nd year and besides her husband leaves four small children. Mrs. Lenahan, Mrs. Simpson, Mrs. Janice, all of Windsor, and Mrs. Carr of Detroit, are also sisters; and Patrick Leonard of Gagetown, Mich., and James Leonard of Milford, Mich., are brothers. Her death occurred on Thursday and the funeral was held at Bracebridge on Saturday.

+ + +

Rates are Raised.

All the local hotel-keepers are preparing to make the best of the new conditions brought about by Prohibition and to give as good or better service than in the past. An all-round increase of half-a-dollar a day has been made in the rates. When one considers that few, if any towns in Ontario of the size of Walkerton, have as good hotel service, the public should have no kick coming. Everything the hotelkeeper buys is high and the charges are after all, moderate. A few of the farmers who have had stable and barn, as well as sitting room accommodation, during church on Sundays, are beginning to offer the hotel-keepers something for the service. This is only fair and right, and the hotel keepers will probably feel justified in making a regular charge for this, and other similar services, which cost money but for which no charge has been made under license.

+ + +

Visitor from Florida

Mr. John Connell, a former well known resident of this section, spent several days here last week with Mr. A. E. Sherrington, and while here the two old friends took a number of motor rides through the county, calling on old-time acquaintances. Since disposing of his farm near Mildmay four years ago, Mr. Connell has been making his home in Florida where he has found a climate which he considers nearly ideal. Mr. Connell states that on the higher ground in Florida, climate is exceedingly healthful. Nowhere is the temperature more equable and it has an advantage over California in that the wet season does not come in the winter, which is perfectly dry. Mr. Connell found the growing of grapefruit and oranges an agreeable occupation. A fruit farm which he recently disposed of, produced over three thousand dollars worth of grapefruit and oranges off seven acres. Mr. Connell comes north for a trip every summer but takes great comfort out of the Florida winter and could not be paid to winter here.

+ + +

Succession Duty Case

An interesting case was heard by Judge Klein yesterday regarding a claim for succession duties made by the Provincial Government against the estate of the late Thomas Gormley of Elderslie Tp. Gormley was a well-to-do sheep rancher who made his "pile" in California and came home to Canada in 1912 to spend his declining years among his relatives. He sold out his interests at that time depositing $31,000 in the Bank of Montreal at Toronto. When he died on Sept. 10th of last year, only four thousand dollars was left by his will for his eight nephews and nieces, he having divided the greater part of his estate among them within a month or so of his death. As the Province collects as Succession duty 5 % of everything over $5,000 in the case of persons having no near relatives, the government is claiming succession duty on $26,000 in this case. O. E. Klein appeared for the Ontario Government and Mickle K. C. of Chesley for the Gormley Estate. The case had not been concluded as we go to press.

+ + +

Chief Ferguson Resigns.

Chief Ferguson gave the members of the Town Council a surprise by handing in his formal resignation yesterday morning. The Chief is not anxious to throw his job away but says that living in the top story of the Town Hall is too great an inconvenience and he would be willing to to stay on the job if a different arrangement could be made. As there are sixty-two steps between the living rooms and ground floor of the Municipal building, which have to be coverd a good many times a day by the members of the Chief's family, there appears to be something in this contention. The Chief receives a salary of $450, besides free quarters. No doubt there would be plenty of applicants for the job at this money, but whether it would be wise to take anybody that offers, than pay a little more to a faithful and experienced servant of the town, is the question which the Town Fathers will have to wrestle with. Major Lippert states that a special Council meeting will be held to deal with the matter next week.

HYDRO ENGINEER HERE

Town Council Formally Asks Hydro Commission to Furnish Estimates of Cost of a Power and Light Distributing System for the Town of Walkerton.

Engineer James of the Hydro Electric staff, Toronto, came up on Wednesday last and met Mayor Lippert and the members of the Street Lighting Committee of the Town Council. Mr. James was driven over the town and looked over conditions here. Before leaving, he suggested that the Town Council hold a special meeting and make formal application to the Hydro Electric Commission for the information required by the Council of the probable cost of hydro. When the report asked for is received by the Council, we understand the Council will then take the next step, which is to submit an "enabling by-law" to the people at the January municipal elections. This by-law, if carried by the people, will enable the Council to go ahead and do business with hydro.

The Council met Tuesday night at 7.30 to deal with the matter, all the members present. The following two motions were unanimously carried:—

Moved by Coun. John Douglas, seconded by Coun. Alex. McCarter—That the Hydro Electric Power Commission be requested to furnish the Corporation of Walkerton with an estimate covering the cost of installing a distributing system on the streets of the town, including a street-lighting layout, the system to be completely new in every respect and to be based on serving the entire town, or approximately 800 services and would request Commission to have the estimates submitted at our regular meeting on 11th of October, 1916.

Moved by Coun. John Douglas, seconded by Coun. George Leitner—That the sidewalks now under construction in the town be constructed in the order in which petitions were presented with the exception of the walk on McGivern and Ridout, there being a very heavy fill in the walk and it should be allowed to settle for a reasonable time.

Council adjourned to meet Wednesday, October 11th.

"Britain Prepared," Oct. 10th.

"Britain Prepared," the celebrated moving pictures taken by special help from the Admiralty, War Office, and the Ministry of Munitions under the patronage of the King, in 10 splendid reels, lasting two hours and a half, the official answer to those who say Britain is not doing her part. We have 150 seats in our house of which we have already sold 70 at 50 cents and War tax. Tickets by Subscription Only. E. H. Lesson, Mgr.

County License Inspector

Mr. Joseph M. White received official information a few days ago of his appointment as license inspector for the County of Bruce. He will do the work formerly done by three inspectors and his salary increased from $530 to $1200 per year and expenses. Before Sept. 16, only twenty-four hotels in the County had licenses under the new standard hotel license forty-one hotels in the County including those in local option community are recognized. Mr. White has already begun the inspection of the hotels to see that they conform to the rules for standard hotel license. Under the new act the Inspector has to give his full time to the work and make a written report to the Department for every day in the year.

Funeral of Matthew Goetz.

The funeral of the late Matthew Goetz took place on Wednesday morning of last week at nine o'clock to the R. C. Church, Walkerton, where requiem high mass was sung by the deceased's cousin, Rev. Father Goetz of Tillsonburg. Rev. Father Cummings acted as deacon, Rev. Father Heller as subdeacon, and Rev. Father Cox. S. J. of Montreal as master of cermonies. Among those in the sanctuary were, Rev. Father Zettler of Chepstow, Rev. Father Lenhart of Carlsruhe, and Very Rev. Dean Halm of Mildmay. Interment was made at Formosa cemetery alongside the remains of his son, George, barrister of Vancouver, who died three years ago. The burial service was read by Rev. Father Brohman of Formosa. The pall-bearers were :—R. E. Truax, M. P., Judge Klein, Warden McNab, C. A. Fox, D. Robertson K. C., Andrew Oberle, Sheriff Jermyn, Joseph Lawson. Among those from a distance who attended were the deceased's two brothers Alois of Sault Ste Marie, and Anthony of Gatesville, Mich., A. A. Goetz, of Hamilton, Mr. and Mrs. Gilbert Martin of Buffalo, Mrs. A. Kuntz, and Mrs. N. Von Kaup of St. Clements. Besides a large number of mass cards sent by friends, there were a number of beautiful floral tributes, including:—Casket from the County officials, Mr. and Mrs. R. E. Truax, Mr. and Mrs. David Robertson, Mr. and Mrs. Geo. Walker, Mr. and Mrs. H. M. Lay, and others.

MAGIC BAKING POWDER

Magic Baking Powder costs no more than the ordinary kinds. For economy, buy the one pound tins.

The Decrees of Society

(BY ETHEL M. CHAPMAN)

Violets and white ribbon and a deep long breath of the old happy days! The girl buried her face in the mass of dewy blossoms and breathed deeply the heavy fragrance, because he had sent them; then she held them away from her and gazed into the delicate velvety mass with a misery of hunger in her brown eyes. Dr. Ross had sent her flowers before, but to-night the violets brought back so vividly the old happy days before Jimmy went away, the days when as children they had gathered violets in the hollow on the slope of the pasture land, the days when Jimmy was just her idolized brother, before he went to the West and people began to call him "wild." Then he had ceased writing so suddenly, and they had never heard from him since. People often wondered why she never seemed perfectly happy, but no one knew.

A wonderful tenderness drove away the agony of the dark eyes for a moment as she fastened the exquisite blossoms against her dress, but again as the luxury of their beauty and fragrance smote her senses, she wondered when had Jimmy seen violets. Perhaps, to-night, when the whole world was aclang with the bells of Christmastide, when hearths were bright with blazing logs, and wreathed with holly, perhaps Jimmy was cold and starving, and dear knows where. Reports had come to her of his haunting saloons and gambling dens, and her imagination had been ruthless in its pictures of the rest. A sickening sensation overcame her at the thought of her own unnecessary luxury in its horrible incongruity with the want that might be his. It is true that the flowers did not breathe of elegance more than the white satin gown, but it was a part of the game. If she was to make a living as a professional musician, her dress was as much a matter of necessity as either her voice or violin at society functions. Society had, ever been a little more gracious toward her than circumstances required. She was a stranger and it had taken her in, because, of course, it did not know about Jimmy.

It was Christmas Eve, and she was to play at an at-home. A carriage was sent for her, and as she was driven through the crowded streets, from every house poured forth floods of light and sounds of festivities. When she reached her destination an even more brilliant glare of lights told of the gaiety within. The drawingrooms were dazzling with a confusion of variant soft tints in delicate dresses, and gleaming shoulders and jewelled hair, the air was heavy with the spicy fragrance of cut flowers, from the ball-room came the dreamy strains of the orchestra, and everywhere, the silvery laughter and light chatter told of intoxicating pleasure. It was Christmas Eve, the anniversary of that night, when, in a little stable in Bethlehem, because there was no room in the inn, the Christ that came to redeem the world, was born; and they were celebrating it.

She tuned her violin absently, but with the first sweet, full, chords upon its strings, her whole soul poured itself into the music, and everything else was, for the time, forgotten. The rythmic flow and tender passion of the thrilling strains transfigured the musician's face until it glowed, as with the touch of an artist she drew her bow across the strings in one long pathetic finale. For a moment a breathless hush filled the room; then the applause came with a crash. She was presented with a huge sheaf of crimson beauty roses, and still they applauded.

Just as she was raising her violin to respond to the encore, her eyes were irresistibly drawn to a window. For an instant she stood motionless, with eyes fixed on the spot where a white face had for a minute looked straight into her own, then suddenly withdrawn. The violin dropped to her side, and forgetting everything but the face at the window, she passed quickly from the room. What if he should be gone before she reached him! She ran through the halls and opened the door just in time to catch a tall, dark figure going down the steps.

"Jimmy!"

He stopped in astonishment, and the next instant he felt her bare arms about his neck and her cheek wet against his own.

"Oh Jimmy, I'm so glad!" she cried hysterically. "I've waited so long. Come on inside."

He looked down at her thin dress and bare throat. It was too cold for her out there, and he couldn't leave her like this, so he inquired cautiously:

"Is anyone in the hall?"

"No."

She led him into the cosy reception room, and he turned the key carefully. Then when the light fell full upon his face she could not hide the pain that passed over her own. The eyes that had once been so merry and flashing, were filled with uneasiness and shame; the mouth told of weakness and discouragement; an unusual whiteness and misery covered every feature.

"I had no right to follow you here," he said, in a whisper, "but I wanted to see you before I go west again."

"But you won't go west again?" she pleaded.

"I'm going to-night. Listen! If I go no one will ever suspect it's your brother. To-morrow the papers will be full of it. You see, I've just got out." A dull red mounted slowly to his forehead. "I could kill myself for it, but I've disgraced myself and everyone belonging to me. I might as well tell you. I got in beyond my depth and used the bank's money, and—was sent down for two years. You didn't know, because they didn't have my right name; that's why I didn't write; but I owned up at last, because, well, it would seem queer that I should care, but it didn't seem just square, so I told who I was, and to-morrow the names of those whose time is up, will be published. Still, if I go to-night, no one will ever think of me being any connection of yours."

He raised his eyes for the first time to his sister's face. It was white and drawn, with dilated eyes and parted lips, but instead of scorn or reproach, he found in it only pity and love. With a sudden rush of tears, he threw his arms impulsively about her.

"I've been a brute," he cried, "to bring you all this trouble; but that was the worst. I never did anything worse than I have told you—just drank and gambled and used the bank's money. I meant to pay it back. But I'm going to fight it down. Really, if it would give you any comfort to know it, I could go back to-morrow to the old farm and the old church, and all, and be contented just to start all over again."

"Then we'll go together," she replied, promptly.

"No no. Everyone would know; they would stand aloof from both of us. That's the way of society," he ended, bitterly.

Footsteps sounded in the hall. He pushed her away from him, and sprang towards the door, but she stood against it, a wild terror in her eyes. If he went out again into the night, alone at Christmas time, an outcast from society, and with his disgrace published by the press, what hope was there that he might not again seek the old haunts that were always so hospitable? The footsteps drew nearer, but she still stood with her slight form pressed rigidly against the door, as if to forcibly prevent his escape.

"Good-bye," he said, as he kissed her forehead. "God knows I'd give the world to stay, but it wouldn't do." He took her by the shoulders and moved her away from the door. At the same instant she slipped the key from the lock and threw it straight across the room into the glowing coals. Then she looked up, white and trembling.

"Tell me you don't want to go," she pleaded.

"To-morrow we will go home together. Mother has been breaking her heart for you. We'll get a Christmas tree from the cedar swamp and light the old fireplace and open the piano."

A boyish smile that was half a safeguard against tears, lighted up the wretched face until it was almost happy again. The door opened from the outside, and the hostess entered to see what was detaining her violinist; but she was all forgiveness when the girl, with an unmistakable pride at which he marvelled, introduced her brother; and the smile and wonder had not passed off when he left her and she knew she had won.

It was nearly midnight before Dr. Ross came in, but then he was often late, and no one was surprised. He exercised a most reckless freedom in ignoring the claims of society for the sake of his patients. He made his way through the crowds of jaded dancers to the one woman who was never jaded, a woman with a pair of sweet eyes, who wore his violets against her breast. She had finished her programme and was putting away her music when he found her, and seeing the weariness behind the welcome in her brown eyes, he hesitated for a moment before he asked:

"I wonder if you are too tired to come down to the sanitorium with me? I've been there since six o'clock with a young fellow who can't live till morning, and can get no comfort from anything. I'm afraid it would be pretty hard for you, but if you could come and play just once for him, I believe it would do him more good than anything else."

As they passed down the crowded streets she began to realize more keenly than ever before what this man's friendship meant to her—why it had been such a pillar of security to her in her little difficulties of the new city life. And it was not the broad shoulders or keen intellect, or professional skill that gave this strength to his manhood, so much as his disregard for the conventionality that robs life of its highest things, and the sympathy with weakness, which is, after all, the real element of strength. He was worthy her priceless Christmas gift, a woman's whole-hearted respect for a strong man, and it was with a keen sense of loss that she realized they had come to the dividing of the ways. To-morrow the whole city would read of her brother's disgrace, and her "friends" would whisper it from house to house in holy horror. To think that they had received into their circles the sister of an ex-convict! Of course, if some relative, a wealthy father or uncle, had paid the debt and smoothed things over, that would have been different. Society would have smiled, and said he was "sowing his wild oats," and that it had all come about through a fondness for company. But a "jail bird!" O' course, they must guard their young people from such an associate. It was presumptuous to expect anything else.

Inside the doors of the sanitorium it seemed as though the rejoicing and gaiety of the Christmas season belonged to another world. As they passed the rows of white cots, great, wistful eyes gazed out from white, emaciated faces—eyes that were staring desperately into the future with dread, discouragement, hope or resignation, but when the doctor slipped his arm under hers and held it tight as he led her around a screen that separated one cot from the others, a sudden horror seized her. There on the pillow she saw the face of a young man, a face that had some time been beautiful, but which now, even in its deathly pallor, was drawn in lines of bitterness and discouragement.

At the strong pressure of the doctor's handclasp, a warmth passed over the rigid features, and the wild, hopeless eyes opened. They glanced in annoyed indifference from the girl's satin shoes up the delicate gown and white throat, then stopped at the sweet face as though they had discovered something they had not expected to find.

"I brought Miss Alway to play for you," the doctor explained.

"Did you tell her what you were bringing her to?" the patient inquired quickly. "I see you haven't. Well, I'm face to face with the end now, and I'm not going to stand for the lie any longer." A wild light of delirium filled the glazing eyes as they gazed into her face. "Life is all a lie—but death—there's no lie there. I'll be meeting it any time now, and I'll meet it squarely. I'm about as low down as you find them, a drunkard, and, well, that covers everything. I don't know how it started, but before I knew it, it was too late. But there was a time when I believe I could have quit it. I made up my mind to throw up my job, chuck the old friends and go home, and start in fresh. I had a sister, a beautiful girl, but when I came home she was going to be married to a man a king in the stock exchange and a pillar of society, and of course it wouldn't do to have me around just then. Poor Ann—I don't blame her. I was a disgraceful-looking wreck, but there didn't seem to be any other place for me, so I just drifted back."

"And your sister—does she know? Where is she?"

"Dead. He soon tired of her, and broke her heart—killed her, by degrees of course. It's nothing unusual."

"Then you're looking forward to meeting her in Heaven?"

"Heaven! I never calculated to get to Heaven; never thought about it since I was a little kid, until now—and, oh, God, things look black." He tossed uneasily in a torment of hopelessness, then he cried fiercely, "I've been bad, too bad for decent people to associate with; but I've tried, really tried sometimes, but it was just the same. People didn't expect anything better of me. But, say, this is Christmas eve; they wouldn't take Him in either, would they? It didn't weaken Him, of course; but don't you suppose He would—kind of make allowance?"

The wild eyes brightened for a minute, then sank again in agony of despair. "I'm a fool to think of it," he said, brokenly. "I've wasted my chances, and it's too late now."

There was a tense silence for a minute, then softly, to the farthest corner of the ward, rose the sweet, tender tones of a violin, notes athrill with feeling, and so distinct in the familiar old strains that a spirit voice seemed to pronounce the words:

"There were ninety and nine that safely lay
In the shelter of the fold,
But one was out on the hills away
Far off from the gates of gold,
Away on the mountains wild and bare,
Away from the tender Shepherd's care.

"Lord, Thou hast here thy ninety and nine,
Are they not enough for Thee
But the Shepherd made answer, this of mine
Hath wandered away from Me,
And although the road be rough and steep,
I'll go to the desert to find my sheep.

"And all through the mountains, thunder riven,
And up from the rocky steep,
There arose a cry to the gate of Heaven,
'Rejoice, I have found my sheep,'
And the angels echoed around the throne,
'Rejoice, for the Lord brings back His own.'"

As she finished she raised her tear-blinded eyes to the face on the pillow, where the doctor with his arm about the powerless form, supported it. A smile of mysterious happiness transfigured the dying features.

"It's all right," he whispered. "I'm glad—you told me. 'Brings—back—His—own.' That means—me."

The labored breathing ceased. The doctor laid the limp form back on the bed. A nurse came and drew the screen close, and they went away.

As they passed down the ward, a girl's eyes followed them wistfully. The violinist stopped, and bending over her, asked gently, "What is it?"

"It's yer dress. I had a dress like that once. I was to be maried in it, but—Lemme touch it?" She stroked the silky folds dreamily, then the reminiscence overcame her, and burying her face in the pillow, she sobbed brokenly, "It wasn't my fault. They sent me away from home, but they couldn't understand." The slight frame was shaken in an agony of dry, hollow coughing. She was a mere girl, scarcely a woman, driven from the protection of her father's home, and thrown upon the tender mercies of life in a big city. No wonder the charity hospitals were full! In the compassion of her eternal instinct, the motherhood in the truest sense that is the glory of all beautiful womanhood, Miss Alway gathered the grief-shaken form in her arms, crushing the sunny curls against the fragrant violets. The girl ceased sobbing in amazement. Never in her life—since that happened—had she been treated like this.

"Violets!" she gasped. "Folks used to send me violets once."

The musician took some from the white ribbon and left them with her, and long through the silent night the nurses heard her murmur while she clasped the flowers tightly in her thin fingers.

"An' she touched me. 'Tisn't often the likes o' her touches the likes o' me."

"I'm afraid that was an awful ordeal for you," Dr. Ross said, half apologetically, as they left the sanatorium and turned into a delightful little supper-room, which at this midnight hour was almost deserted. Certainly he might imagine the ordeal had been a very severe one, judging from her white face and brimming eyes. But the eyes looked very bravely into his own now, as she said:

"My brother came home to-night. He robbed the bank, and—has been in prison for two years."

"Yes?" If he was surprised he didn't show it.

"You know the only reason that half of society isn't suffering the penalty of the law is that they haven't been caught."

"But if he had gone back west to-night, what might not have happened to him!"

"But he didn't go back. His life is still before him."

"You are very good," she said, with a faint smile of gratitude, "but society, of course, will not look at it in that light. Don't understand that I am ashamed of Jimmy. I think I care for him more to-night than I ever did, but it would be useless for me to try to go on with my music here now, so we are going home to-morrow, and he can begin again."

"Do you mind giving up your life here very much? I mean the social side of it?"

"No. After what I have seen to-night of the other side of life, I hate it—the frivolity and dress, and show and emptiness. I hate it all."

"So do I, but are you so very glad to leave—everyone?"

"Well—" She was not at all pale now, and he saw beneath the fluttering lids what he had waited for. He leaned across the table as far as was permissable in such a place.

"Then you'll come back soon, won't you? For I want you so much," he said.

A FRIGHTFUL DEATH
SUFFOCATED IN ASTHMA ATTACK

Every sufferer from Asthma knows the terror, the abject fear that overcomes them when struggling for breath. The old fashioned remedy may relieve, but never cure. Best results come from Catarrhozone, which cures Asthma after hope is abandoned. It's because Catarrhozone kills the asthma germ that it cures. Choking spells and labored breathing are relieved, suffocating sensations and loss of breath are cured. Every trace of asthma is driven from the system, and even old chronics experience immediate relief and lasting cure. Equally good for bronchitis, throat trouble and catarrh. The large $1.00 outfit includes the inhaler and lasts two months. Sold by all dealers or from the Catarrhozone Co., Kingston, Canada.

A SOUTH SEA LEGEND.

One of the most picturesque legends connected with the solar beams is that told in the islands of the South Pacific, where sunbeams are known as "the ropes of Maui." It is related that in former times the sun god, Ra, was not so regular in his habits as he is to-day. In fact, he caused the South Sea islanders much annoyance by setting in the morning, or at noon, or at other inopportune times, just when his light was needed for the daily tasks of mankind.

The great hero Maui undertook to cure him of these erratic habits, and the first step was to make the sun god prisoner. This was accomplished by laying a series of six snares, made of strong cocoanut fibre, along the sun's path in the sky. When the deity next rose from Avaiki, or the land of ghosts, the first noose encircled him, but slipped down and only caught his feet; the second slipped, too, but caught the sun god's knees; the third caught around his hips.

Still Ra pressed on, scarcely hampered by these contrivances. The fourth noose tightened around his waist, the fifth under his arms, and finally the sixth and last caught him around the neck and almost strangled him. Then the sun god confessed himself vanquished and, in fear of his life, promised Maui that he would in future adjust his daily journeys more in accordance with the comfort and convenience of mortal men.

Ra was then allowed to proceed on his way, but Maui prudently declined to take off the ropes, which may still be seen hanging from the sun at dawn, and when he descends into the ocean at night. Hence the islanders say, when they behold the beams radiating from the sun, "Tena te Taura a Maui"—See the ropes of Maui.—Philadelphia Enquirer.

Thunder.

Winter thunder is considered throughout Europe to be of very ill omen, but April thunder is considered to be very beneficial. In Devonshire and other cider counties of England there is a saying that "when it thunders in April you must clean up the barrels"—in readiness, that is, for a plentiful crop of apples. The French consider April thunder to be indicative of a good yield from vineyards and cornfields.

THE LIMIT.

(Life)

"He's a terrible failure as a dog, isn't he?"

"The limit. I call him Dardy—that's short for Dardanelles."

REMEDY FOR MIGRAINE.

More Common in Women Than in Men.

Everyone is familiar with this distressing condition. It is frequently hereditary, and it is more common in women than men. It usually develops in early life. Anaemia, gastric disturbances, gout, eye-strain, pelvic disorders, overwork and prolonged excitement predispose to it. The symptoms are easily recognized. The attack is often preceded by malaise, restlessness and perverted vision. A sufferer will frequently say: "Oh, I am blind with a headache!" and she is in reality unable to see clearly. The pain is sharp and stabbing, and is frequently in forehead and temple of side. The patient is very sensitive to light and sound and usually confines herself to a darkened room. In some cases there is nausea and vomiting. The face is pale and the pupil of the eyes large and in other cases the face is flushed and the pupils appear small. The duration of the attacks vary from a few hours to several days. In the intervals, which are often of definite duration, the patient will be quite well.

A perfect cure is rare, but the severity and frequency of the seizures may be considerably lessened by treatment. In the interval the treatment is that of neuralgia, and this should be given by a physician.

During an attack the patient should be kept at rest in a quiet, darkened, well-ventilated room. She should undress and be kept warm in bed by hot water bottles at her feet and at her head. Small hotwater bottles are sold in the shops, which are of a size to easily hold against the forehead. If nausea is not relieved by vomiting, drink six tumblerfuls of water (preferably warm) rapidly one after the other—this procedure will quickly dislodge any offending substance in the stomach and bring it away, and the pain generally subsides instantly, and the patient falls asleep at once. If there is or has been any constipation a bottle of citrate of magnesia should be taken while preparing to get in bed. Tablets to relieve the pain are seldom necessary if one has vomited freely and taken a laxative. The rest in bed with the external applications of warmth and the cleansing of the digestive canal are always a perfectly safe and in nearly all instances a satisfactory remedy for migraine.

Ottawa Girl's Message of Hope

TELLS TIRED WOMEN OF DODD'S KIDNEY PILLS.

Miss Logan Tells How They Relieved Her of Pains and Aches as Many Run-down Women Know.

Ottawa, Ont., Feb., 21.—(Special.)—"I am glad to say I have found Dodd's Kidney Pills have done me a wonderful lot of good." So says Miss Gladys E. M. Logan, of 264 Queen street, this city.

"I suffered from drowsiness and sharp pains across my back. My sleep was broken and unrefreshing. I had headaches and was subject to neuralgia and rheumatism. I was depressed and low-spirited and troubled with palpitation of the heart.

"I was always tired and nervous and very sensitive and there were hollows under my eyes.

"For two years I was in this worn-out condition, often having to lay off for a day or two. I was attended by doctors and wasted money on useless medicines, but I only found relief when I used Dodd's Kidney Pills."

Miss Logan's statement is a message of hope to thousands of women in Canada. They are suffering just as she suffered. She wants them to know they can find relief in Dodd's Kidney Pills.

CHILD TEMPER.

Great Care is Needed in Restraining Stormy Dispositions.

Temper storms seem to be frequent among the nursery folk. One little boy of about two and a half years of age, with his screams and stamping and flinging himself on the ground, drew the attention of a whole street in pity for his mother. She could do nothing with him, so left him and went on with the other children. At a cry from the bystanders she turned, to see the boy, temporarily demented, rush off the pavement into the street. Fortunately, he was rescued in time; but what a life in that home and what a future for that boy!

The incident brought to mind the urgency for a better understanding of the causes and treatment of the young child's furious temper.

It is often forgotten that neither the reasoning powers nor self-control are strong enough to restrain a child's aggressive energy. The habit of restraint over the primitive propensities has not yet been set up. Consequently, injudicious meat diet, nervous excitement, want of fresh air, or the company of irritable, quarrelsome people foster a mental condition liable to be set ablaze by some slight cause. The will, which can be quite strong even in a baby, is roused to exertion, and then—the storm bursts and continues usually until the boy is exhausted.

Apart from the physical aspect of temper and its treatment, there are other methods to be followed. Prevention of an outburst is easier than its stoppage.

The mother or nurse should watch for the immediate cause of these storms and in future should avoid them whenever possible by distracting the attention in time, or so manoeuvring that the conditions are changed. Every outburst avoided is a gain to the child. It is essential in dealing with a passionate child that his whole character and propensities should be understood, so that all that is possible can be done to help him. With control established and energy directed to useful purposes the boy stands a far better chance of developing into a man of strong character than another child of uniformly calm temperament.

THE ACUTE PAIN FROM NEURALGIA

Permanently Cured Through the Use of Dr. Williams' Pink Pills.

A clever medical writer has said that "Neuralgia is a cry from the nerves for better blood." In other words, neuralgia is not a disease—it is only a symptom, but a very painful one. Neuralgia is the surest sign that your blood is weak, watery and impure, and that your nerves are literally starving. Bad blood is the one cause—rich, red blood the only cure. This gives you the real reason why Dr. Williams' Pink Pills cure neuralgia. They are the only medicine that contains in correct proportions the elements needed to make rich, red blood. This new, rich blood reaches the root of the trouble, soothes the jangled nerves, drives away the nagging, stabbing pain, and braces up your health in other ways as well. In proof of these statements, Mrs. A. T. Oulton, Little Shemogue, N. B., says: "A few years ago my mother was an intense sufferer from neuralgia, which was located in her face, head and shoulders. The pain, especially in her head, was intense. She doctored for some time without getting relief, and there seemed to be no ceasing of the pain whatever. Instead it seemed to be extending, and her whole nervous system became affected. Finally she decided to try Dr. Williams' Pink Pills. After taking them for a while the pain in her head became less severe, and of course this was a great relief to her. Under the continued use of the Pills she felt herself growing better and stronger each day, until she was no longer a sufferer, and was completely cured; and as felt no symptoms of the trouble since."

You can get Dr. Williams' Pink Pills from any medicine dealer, or by mail, post paid, at 50 cents a box, or six boxes for $2.50, from The Dr Williams Medicine Co., Brockville, Ont.

THE ARCH IN THE FOOT.

Flat Foot Results From Not Being Supported.

Foot troubles are oftentimes difficult to remedy. This is not so much because the condition itself is serious, but for the reason the patient is unwilling or unable to do as he is instructed to do. The condition known as flat foot is caused by a falling or lowering of the natural arch in the foot. The most effective treatment for this condition is something to hold up or support the arch. Various forms of arch supporters can be bought in the shops where medical and surgical appliances are sold, and supporters are made to order, if desired, to fit the foot of the person requiring it. Slender feet are best treated by supports made of felt or wool, which are inserted into the inside surface of sole of the shoe. Metallic supports seem to be better for persons having large or thick feet. Occasionally there are persons who cannot wear any form of support placed in the shoe, and for these sufferers the only treatment is to wear a shoe with a high heel and a high arch. It is impossible for the central part of the foot to sag down when wearing a high-heeled shoe. Unless flat foot is corrected there will be corns and bunions form on the feet from the pressure used on the toes due to standing and walking with the feet in an abnormal position. The weight of the body is not intended to be carried by the heels in standing or walking. The fore part of the foot is for this purpose. The most comfortable walking or running is a kind of tip-toeing movement; no weight is brought to bear on the heels. The heels on shoes must be kept true and even. A worn down heel makes the tread uneven and allows the foot to be rubbed by the shoe and corns quickly form. Leg pains and aches are never complained of by those who wear shoes with high arches and high heels. The heels, however, must not be stilts nor the toes of the shoes narrow and pointed—the toe portion of the shoes must be wide enough to allow the toes to be freely moved. Shoes are better to be a trifle too long, as this will permit of free movement in walking. The foot slides a little forward in walking, and there should be length enough to permit this. Persons who suffer habitually from backache and leg pains will find relief from their aches by changing the heels of their shoes.

Puffiness Under Eyes.

For removing the puffiness under the eyes make a solution by mixing 20 grains of tannic acid with one ounce of glycerine. Paint the skin beneath the lower lid with this, using a fine camel's hair brush, and gently massage there, the movement of the stroke to be from the nose to the outer corner of the eye.

How to Tell Fresh Eggs.

If an egg is "strictly fresh" it will, when placed in a pan of water, lie on its side on the bottom. If stale it will stand on end, and if very old will rise to the surface. When just a few days old the egg will begin to tilt a trifle, and as it ages more and more the angle at which it tilts will increase.

For Your Egg Beater.

An egg-beater will last longer and give better service if a drop of olive oil is occasionally put on the pivot at the centre of the large wheel. The cogs of the wheels should also be slightly oiled. Do not wash the wheels or the oil will all be removed.

VALID CAUSE FOR COMPLAINT.

(Tit-Bits)

A mother once sent this somewhat satirical note to the teacher of her small son:

"Pardon me for calling your attention to the fact that you have pulled Johnnie's right ear until it is getting longer than the other. Please pull his left ear for awhile, and oblige his mother."

For Iron Rust on Napkins.

Moisten the spots with soft water, rub cream of tartar and then salt on both sides and place in the sun to dry.

A Partnership Proposition

[illegible] enjoyed a profitable monopoly of the hardware trade in a well-to-do town.

Many a matron with a marriageable daughter, cast kindly glances toward the tall, broad-shouldered, likeable chap, apparently wedded to business.

One morning he was mildly interested in signs of activity in a store opposite which had stood vacant for months. He saw a young woman—a stranger—flitting about directing the workmen. "Milliner, probably," he idly speculated.

But when huge packing cases and crates, stenciled with the names of dealers well known to him, were hauled heavily into the place his indifference changed to spluttering indignation.

"Another hardware store, right under my very nose! Some nerve! And a woman, too! She must be a coarse, mannish creature."

Encountering her from time to time he was forced to admit that the slim, blonde little lady with eyes blue as violets, appeared neither coarse nor mannish. Then, too, her name was Ruth—Ruth Maynard—and of all names Ruth is the least masculine.

Nevertheless, her business methods were aggressive to a degree and she camped on her competitor's trail relentlessly. For instance, if Cyrus advertised an "Anniversary Sale of Cutlery," smack in its teeth would come a "Sensational Clearance of Stock" across the way.

Cyrus began to give more attention to his window display, found himself struggling to eclipse his rival's catchy phrasing in the local papers. Do what he would, though, a perceptible share of the business he had formerly considered his inalienable right, drifted steadily into the hands of the newcomer. His pride was sorely touched.

In a desperate attempt to turn the tide he decided to feature some especially desirable article at such a loss as to preclude any come back from Miss Maynard. Accordingly he announced a certain fireless cooker at "less than cost." Contrary to custom, no challenging advertisement appeared in the forthcoming issues of the "Sentinel" and the "Citizen."

"Beat!" chortled Cyrus, reckoning without his host, for even as he laughed a letter from Ruth was on its way to every housewife in town reading thus:

"The proof of the pudding is in the eating. Come in any day this week and try my roast turkey, vegetables, pudding and pies, all done to a turn in the very best fireless cooker on the market. I am not offering this cooker at 'less than cost,' because it will pay for itself. It is a servant that works without wages."

"Looks like a millinery opening," snorted Cyrus, watching the women flock to Miss Maynard's culinary demonstration.

The situation irritated him increasingly. Finally it became so unbearable that he wrote, offering to either buy her out or to sell out to her. "It is evident that two establishments of identical character cannot continue to operate profitably," he stated.

Now the funny part is that instead of rejoicing, and having drawn her enemy's fire Ruth crumpled up into a forlorn heap and whimpered: "I don't want to leave town and I don't want to drive him away." Then she went to the phone and asked Cyrus to call and discuss the matter.

Curiously when Cyrus sat face to face with Miss Maynard in her cozey back office he discovered that his thoughts wandered willfully from prosaic details to blue eyes and fluffy hair. "Miss Maynard," he blurted out impulsively, "I don't see for the life of me how you ever choose such a mannish business. You seem so—so different."

Miss Maynard smiled demurely. "Perhaps it is queer, but I used to be in the office of a large hardware firm and it's the only business I know anything about. It's interesting selling any kind of goods, don't you think? It was very stupid—writing pricelists of stoves and tacks and things," she added pensively.

This led Cyrus to relate some of his early experiences. "But I didn't come over here to tell you the story of my life," reverting briskly to the subject of their conference. "The question is—which one of us is going to sell out to the other?"

Ruth tilted her head reflectively. "I can't quite make up my mind—besides I've thought of another plan—it may not appeal to you at all—but you know when two firms consolidate they can have a finer store, larger stock, expand."

Had anyone told Cyrus Rice that morning that before nightfall he would have considered the possibility of a partner—above all, a woman—he would have scorned the suggestion as insane. Yet he found himself responding enthusiastically "Capital idea! I'll have the lawyer meet us here to-morrow and draw up a partnership proposition subject to our approval."

The following day Cyrus and Ruth were already in deep conversation when the lawyer arrived. Pen in hand he seated himself at the desk ready to make note of the various conditions of the proposed agreement.

"Have you taken an inventory of stock recently, Mr. Rice?" he inquired.

"I do," answered Cyrus with such a rapidly preoccupied air that his questioner hid a chuckle behind his pudgy hand.

Suddenly realizing his significant blunder, Cyrus said something in an impetuous undertone that caused Ruth's cheeks to glow like twin roses.

The lawyer gathered up his papers and stuffed them into his green flannel bag. "Guess, I'll run over to the office and dictate a few letters."

Cyrus and Ruth gazed at each other, blissfully oblivious of his remark.

He halted in the doorway. "I'm going over to the office to dictate some letters," he repeated.

Getting no answer he tiptoed back to the desk and scribbled, "Better get a minister to draw up your partnership proposition. Later on, if you need the services of a lawyer you'll find me doing business at the old stand.—Boston Post.

Roumania Gives the Signal

There has been no "Allied drive" in the Balkans. What there has been is a great game of diplomacy, not yet ended, the inside of which is not yet revealed. The fighting has been almost entirely that of a Bulgarian attack on Greece, hardly opposed at all except by Greeks, coincident with a readjustment of Anglo-French positions which have moved them to the northward; and this also has met with little real opposition. At the proper moment, when the diplomatic game has reached that point, Italy declared war on Germany, Roumania issued her declaration, and the Russian line confronting Bukowina is suddenly lengthened by hundreds of miles without a battle. At the moment the air is full of rumors that Bulgaria is being invited to detach herself from her German alliance, Bulgaria finds herself between two fires. "The nippers are gripping" Bulgaria, and the northern nipper is the Saloniki army, now composed of the forces of England, France, Russia, Italy, and Serbia. An Associated Press despatch from Washington says:

The entry of Roumania was hailed with expressions of satisfaction at the Allied Embassies, where officials made predictions of important developments in the Balkans within the next six weeks, affecting Bulgaria's continuance with the Teutonic Allies.

Let us take a glance backward to see how these things relate themselves to what has been going on since the failure of Germany's last effort, the attack on Verdun. The task the Allies then set themselves, as any one can see now, was the hammering of Austria into the condition in which she now lies. This was preliminary to the great events which began on Sunday. The design was to get Austria into that state described by pugilists as "groggy." the Russians made no real attempt to invade Austria, only to bang and hammer her into weakness. Brusiloff would strike first at one point and then at another; where he seemed, to those who were expecting a great final drive, to have opened a good lead, he would unaccountably drop it and strike somewhere else. His blows were those of a boxer, first here then there, until his opponent was exhausted, blind and reeling.

Meanwhile Germany must be prevented from giving any help to her ally, so the great attack on the line of the Somme began in the west. All along there have come intimations from the western front that even this gigantic battle was not the real western drive, that that was to come later. We can see why, now; the great western advance is to come after the destruction of Austria; the aim of the present one is to hold Germany's hands while Austria is beaten down.

The capture of Gorizia by the Italians was the first sign of the change in the campaign; Austria had been hammered groggy, and now the real movement to crush her was about to begin. Roumania's entry into the war was prepared long before it was formally announced. Now that she has made it, the line confronting the Austrians in Bukowina is lengthened, without a battle, the whole distance of Roumania's border, and it now extends around Transylvania. The Saloniki Army, increased now by the addition of soldiers from five nations instead of three, could join forces with it and extend Brusiloff's line to the sea if Bulgaria did not lie in the way. How long will Bulgaria lie in the way?

This is not Bulgaria's war, anyway, the Allies have whispered to her, and her own people, historically pro-Russian, are not unlikely to say the same thing. What they have been saying to her while she watched Roumania making her arrangements to enter the war we can only guess; all we know is that while Roumania was making those arrangements, while that impressive array of Russians and Italians was coming in to join the many flags at Saloniki, Bulgaria began an advance on Greece, began marching toward the very territory she had always coveted. That advance has met with no such opposition as the great army at Saloniki should be expected to offer. Who in the camp of the Allies cares what becomes of Greece? She has played fast and loose with them, is even a potential enemy. The only way Bulgaria can now get anything out of this war, which never was her war, is to get it at the expense of Greece. The Allies have made little pretense of resisting her in this; what resistance will she make when they move forward into Serbia? What has been going on at Sofia?

The six weeks of which the diplomats in Washington speak may prove to be the great weeks of the war, the decisive weeks, whether Bulgaria's "continuance with the Teutonic Allies" is broken or not. The campaigns, east and west, have been preparatory to these weeks, have been leading up to them, clearing the way for them. Austria is groggy, and the movement to finish her is about to begin. If Bulgaria can begin at any time; if she does not, it cannot be long delayed. The day when Roumania entered the war was one of the great days of history.—New York Times.

A quaint and attractive dance frock is shown in crossbar chiffon with dainty pompadour design, the skirt arranged over a hoop at the hips and the fulness divided by attractive floral clusters.

EXCEPTION TO THE RULE.

(Boston Transcript)

Mr. Budd—You should remember, my son, that there is nothing attained without labor. You need not expect to get something for nothing.

Tommy—Huh! I get lots of lickings for nothing, anyhow.

STRIKING THOUGHT.

(Sacred Heart Review)

"Do you think that the automobile will displace the horse?" asked the conversational young woman.

"It will," answered the nervous young man, "if it ever hits him."

WISE DINAH.

(Puck)

"Dinah, wilt thou take Erastus for thy wedded husband, to have and to hold from this day forward, for better, for worse, for richer, for poorer, in sickness and in health, to love, cherish and obey, till death you do part?" "No, sah, I takes him just as he is. Ef he gits any better he'll go to Heaven. Ef he gits any worse I'll take him to the police station."

VALUABLE METAL.

(Town Topics)

Brother Bob—"She's as good as gold—"
Sister Sue—And as expensive as platinum.

AN EXCEPTION.

(Washington Star)

"That man makes himself very disagreeable."

"Yes," replied Miss Cayenne. "But so many people are permanently unpleasant that I rather admire a person who is only so when he means to be."

THE PROSPECTS.

(Boston Transcript)

Mr. Roxley (coldly)—And what are your prospects, may I ask?

Jack Sooter—Pardon me, sir; I merely love your daughter. I have not been so mercenary as to look you up in Bradstreet's, and therefore I cannot answer your question.

A REPEATER.

(Boston Transcript.)

"I don't see why you call Perkins stupid. He says a clever thing quite often." "Exactly! He doesn't seem to realize that it should be said only once."

CANT' FOOL HER.

(Judge)

"I intend to give my wife $50 for Christmas."

"Go ahead. He gives twice who gives quickly."

"Oh, you can't fool her that way. She won't think it's a hundred."

THE ROMANTIC WEST.

(Birmingham Age-Herald.)

"While out west did you see many cowboys?"

"Troops of them."

"But I thought barbed-wire fences had largely displaced cowboys in the cattle country?"

"I wasn't in the cattle country. I was visiting a motion-picture city."

DEPENDS ON CONDITIONS.

(Baltimore American)

"Is boiling a refining process, pa?"

"That depends, my son, whether it is done in their mills or at the table."

THEN SHE STARTED.

(Boston Transcript.)

"What did you say to your wife when you got home at 12 last night?" "My dear." "Is that all?" "Yes; she began talking then."

HARMONY THERE.

(Christian Advocate.)

Papa (sternly)—Come here, sir! Your mother and I agree that you deserve a good sound whipping.

Small boy (bitterly)—Oh, yes, that's about the only thing that you and mama ever do agree about.

Canada's Traffic on the Great Lakes

Of primary importance to Canada and Canadians is the fact that right in the heart of the North American continent is situated the largest body of fresh water in the world, and that the great navigable outlet of the vast inland seas which makes up this body ies through Canada to the Atlantic cean. We try to imagine what anada would be like if the internaional boundary line lay to the north f the Great Lakes, and we had no are in these waters, and no pride ownership in the world's greatest land marine that finds a home hereon.

But we are doubly fortunate, not only in sharing the Great Lakes with the neighboring Republic on equal terms, but also in having the St. Lawrence running through our own erritory, and giving to Canada the istinction of having the greatest natural artery of traffic of any country in the world.

The area of the Great Lakes exceeds 90,000 square miles. We can get a good perspective idea of them if we imagine them as a series of enormous cups, played one below the other, and each emptying into the one next it. The cup of Lake Superior is held aloft at a height of 600 feet above sea level. That of Lake Michigan and Huron is considerably lower, and that of Lake Erie slightly lower still. Then comes an enormous drop down to the level of Lake Ontario, which is only 250 feet above sea level. It is that great drop which makes Niagara Falls. The depths of the vast cups in which the Great Lakes are contained varies greatly. Lake Superior is the largest of all, and has a depth 1,200 feet. Lake Huron is 1,800 feet deep, Lake Erie 270 feet and Lake Ontario 500 feet.

The international traffic on these Great Lakes is enormous. Its importance in the trade and prosperity of North America may be gauged from the fact that more than half of the vessels registered in the United States are to be found on the waters of these lakes. Its importance to Canada may be gauged from the fact that the arrivals of Canadian vessels trading on rifers and lakes between Canada and the United States (which mostly means the Great Lakes and St. Lawrence system) numbered about 9,000 last year, with a total of over 6,600,000 tons register.

Together, the people of the United States and Canada rave hundreds of millions of dollars per annum through the cheapness of transportation on the great lakes as compared with rail transportation. In fact, transportation on this great highway of nature's own providing is so cheap that much of it has been done at an average cost of 50 cents per ton per one thousand miles, or for about one-half a mill per ton mile! Surely the cheapest transportation in the whole world.

Shipping of every imaginable kind is to be seen on the Great Lakes. There are palatial passenger ships, rivaling in luxury and appointments the finest of ocean liners. There are great frieght boats, many of them constructed especially for carrying oil, or coal or ore, or wheat, and large numbers of them of a design not seen anywhere else. There are railway cars ferries, carrying freight and passenger cars across. Then there are sailing vessels, lovely private yachts, and fishing boats, for the fisheries of the Great Lakes are of vast extent.

The Great Lakes are navigable for vessels having a draught up to 19 feet 4 ins. from Fort William, at the western end of Lake Superior, to Port Colborne, at the foot of Lake Erie. This is a distance of just over 1,000 miles. The Welland Canal provides access from Lake Erie into Lake Ontario, but at present this only allows the passage of vessels of fourteen feet draught. The new Welland Canal being built by the Canadian Government, however, will allow vessels of 24 feet draught to pass, and then the great freighters of what are known as the Upper Lakes will be able to make the journey as far as Kingston, at the foot of Lake Ontario, only 175 miles from Montreal.

Although the Great Lakes are international, the spheres of international territory in them are clearly defined, the Canadian vessels are able to make the journey from one end to the other without passing through foreign territory. Thus at the "Soo,' th Canada and the United States ve separate canals—one in Canan territory and the other in Amern territory. Both are open to pping of either nation, free of all es or tolls, and are used by ships both nations, according to which convenient for passage at the mont of arrival. Lower down, the Clair and Detroit Rivers, giving ge between Lake Huron and Erie, are bounded on one side nited States territory, and on other by Canadian territory, and thus international waterways. e Canadian Government maintains atrol service in one part of the nnel to regulate shipping, and the ited States maintains a patrol sere in another part of it for the ne purpose.

he traffic on the Great Lakes is wing by leaps and bounds every ar. In the Detroit River the tonge has exceeded 60,000,000 tons in season. It was not long ago when ere was a great fuss in the papers bout the total freight tonnage for he year through the Canadian Sault Ste. Marie Canal, which connects Lake Superior with Lake Huron, reaching 25,000,000 tons. But for 1913, when the traffic was the highest on record, it reached a total of 42,699,324 tons.

Canada's share in this traffic was 4,954,734 tons; and that of the United States 37,744,590 tons; a huge disproportion, but not comparatively so, when we remember that the population of the United States is over twelve times the size of the population of Canada. The figures, moreover, are suggestive of what Canada is building up to. The traffic through the American canal at the Soo for the same year was 37,022,201 tons of American and Canadian freight. Thus the total freight tonnage passing through the Soo Canal in the year 1913 was 80,721,525 tons. When this is compared with the 20,033,884 tons ich passed through the Suez Canal same year, some idea of the us magnitude of the Great affic may be gained. ication of the relative im- f the Great Lakes traffic to ies of the country may be the fact that whereas the ultural produce included in the tonnage passing through the Canadian canal was 5,253,665 tons, that of mine products was 36,643,693 tons, forest products 62,958 tons, and animal products 198 tons. This shows that the Great Lakes are of paramount importance in developing the great basic manufacturing industries of the country, to which the cheap carriage of coal and ore are so necessary. When we think of the Great Lakes as a means of bringing out the wheat from the west to ocean ports, let us not forget of their even greater importance for purely inland and more or less local traffic in bulk and package freight. They form a magnificent means of communication between Eastern and Western Canada, which we, as a country ,ought to develop to the utmost.

It is difficult to give any figures as to passenger traffic on the Great Lakes, but close upon 40,000 passengers have passed through the Canadian "Soo" in a year, and over 20,000,000 passengers are estimated to have travelled last year on steamships plying on the Great Lakes. As supplementary to the Great Lakes traffic, it may be stated that over 127,000 passengers passed through the St. Lawrence canals in 1913.

From Canada, fine passenger liners run between local points, notably between Georgian Bay and North Channel ports to Sault Ste. Marie, and between Sarnia, Detroit and the Soo. There are also many fine passenger routes radiating from Toronto and Kingston, on Lake Ontario. On the American side there are passenger lines running between Buffalo and Chicago, Buffalo and Duluth, and on many other shorter routes. Both the Canadian and American vessels are equal in accommodation to the finest trans-Atlantic liners.—By-water Magazine.

MURDER TANGLES.

Peculiar Muddles in Trials in the British Courts.

For the third time, the other day a jury was unable to agree as to the guilt or innocence of Samuel Hermon, indicted at Downpatrick Assizes on the charge of murdering his stepson, W. Quinn.

This sets up a new record in abortive murder trials. Never before has an accused person been tried three times for murder without a decision being arrived at, and only once before has it happened that three trials have been necessary in any one murder case.

In this latter case, however, the prisoner was found guilty on his third trial, and was duly hanged. Curiously enough, too, this series of trials also took place in Ireland, the accused being Sub-Inspector Montgomery of the R.I.C. His victim was a man named Glass, residing at Newton-Stewart.

The murder, an exceptionally brutal one, was committed in June, 1871, and it was not until August, 1873, more than two years later, that Montgomery was finally brought to the scaffold. Before he was executed, the unhappy man acknowledged the justice of the sentence and make a full confession.

Of course, there have been several cases of men having been tried twice for murder without any agreement being reached by the jury. A typical instance is afforded by the notorious Peasenhall case, when a man named Gardiner was indicted for the murder f a girl named Rose Harsent.

At the end of the first trial, which lasted for several days, the jury, after deliberating for five hours, announced that they were unable to agree on a verdict; and the same thing happened at the second trial. Whereupon the Public Prosecutor caused a nolle prosequi to be entered, and Gardiner was free.

The above case occurred in 1903. In the year 1910 a curious new record in murder trials were set up in connection with what came to be known as the Gorse Hall Mystery. A genleman of social posiion and standing in the community was brutally done to death in his own house by an unknown miscreant. For this crime two men were arrested at different times, each was tried separately, and each was pronounced not guilty

This case, as has been intimated, is quite without parallel in the annals of British jurisprudence, for it was not alleged by the police that there was any collusion between the two accused men, who were not, in fact, known to one another.

Yet another remarkable case, also unique of its kind, occurred so far back as the year 1864. A man named Harrington was stabbed to death in a public-house brawl in the Hatton Garden district of London, and an Italian named Pellizioni was arrested for the crime, tried, found guilty, and condemned to death.

Almost on the eve of his execution, however, another Italian, named Mogni, came forward and confessed that he, and he alone, was responsible for the murder.

Mogni was forthwith arrested and tried in his turn, and, a verdict of guilty being returned, he also was sentenced to death, with the strange result that now two men lay at Newgate, both convicted independently, not jointly, of one and the same crime. Was ever justice in such a quandary? Clearly, if Mogni was guilty, than Pellizioni was innocent, and vice versa, for the police admitted that one knife only was used, and it was indisputable that only one fatal blow had been struck.

Eventually Pellizioni was set at liberty. At the same time the capital sentence on Mogni was remitted, and one of five years' penal servitude substituted, in consideration of his having voluntarily come forward and confessed to his crime.

Up to now one man, and one man only, found guilty of murder and condemned to death, has had his sentence quashed by the Court of Criminal Appeal. The lucky individual to achieve this unique record was a youth named Charles Ellsom, who was alleged to have stabbed to death his sweetheart, Rose Render, in a street in Clerkenwell. A jury found him guilty without hesitation, and his execution seemed practically a foregone conclusion when, at the eleventh hour, the conviction was quashed on a technical point of law by the judges of appeal, and Ellsom was set free

The man who wants the earth never stops to consider that there is enough of the world to go round.

HUNGRY ALL THE TIME.

In Other Ways, Too, the Earthworm is a Curious Feature.

Midnight is the favorite play hour for earthworms. To catch a glimpse of them in the daytime you'll have to dig in the earth, which is their home, or watch for them after a heavy rain, when they can be found on top of the ground. But go out any warm night with a lantern, lie close to the ground on a lawn or terrace, and you'll probably see them in abundance.

Probably you've regarded the earthworm merely as a good fish bait and have never taken the trouble to learn his habits. When he's prowling around at night he's usually enjoying a feast on decaying leaves, grasses or animal matter. Before daylight he's back in the ground, burrowing his way in search of more food. His alimentary canal extends from one tip of his body to the other, so it's little wonder he's always hungry.

He has neither ears nor eyes, yet he's sensitive to light, and he knows when night comes just as other creatures with eyes. Another interesting fact is his method of laying eggs. He grows a band around his body like a belt, in which he deposits the eggs. Then he gradually works his way through this belt until he slips it off, when it closes up and forms a capsule to protect the eggs until they are hatched.

Vegetable growers sometimes regard the earthworm as a nuisance. They should be thankful, however, that these of North America are not so large as those in South Africa, where there are earthworms four and five feet long, and as thick as a man's finger.

WHITE OF THE MOON.

What Causes Fair Luna, in Its Color, to Rival Pure Snow?

The moon has no light of its own and shines through being illuminated by the sun. What sort of surface must the moon have to reflect the light so whitely as it does? This question is put forcibly in a letter to Nature from J. Evershed, of Srinagar, Kashmir, who describes the moon as far whiter and more brilliant than the snow-clad summits of the Himalayas when these are still lighted by the sun. He writes:

"Why does the moon appear so white if it is composed of rocks similar in reflecting power to those on the earth? The rock surface of the moon should reflect far less light than the cloudy surfaces of Venus and Jupiter, and it would be of interest if those who know would explain the apparent whiteness of the moon as seen in daylight.

"A direct comparison of the moon with terestrial rock surfaces illuminated by sunlight is possibly to some extent vitiated by the superimposed blue light scattered by the intervening air, which may affect the color of the moon. Yet it is very difficult to believe that this can convert the grays and browns of rock surfaces into an almost pure white.

"On several occasions in this valley I have compared the waning moon, setting behind the Pir Panjal mountains, and, of course, in full sunlight, with extensive snow fields. These snows are perhaps fifty miles distant, and there is a considerable amount of blue scattered light superposed on the snow, although less than on the moon. Also the light absorbed by the atmosphere is approximately and may be exactly the same for each if one considers the whole path of the light from sun to snow and thence to the observer. When the air is transparent enough to see the moon clearly it appears to me to be distinctly whiter than the snows, which seem dull and yellowish in comparison."

Mr. Evershed throws out the suggestion that the moon's surface may be covered with ice.

A KINDLY QUEEN.

How Mother of Wilhelmina Saved Servant From Trouble.

The mother of the present Queen of Holland married King William when the King was pretty well on in years; it was his second matrimonial venture. He was so pleased with it that one day he purchased a tea set of costly porcelain as a gift for his queen. He felt that it was quite an extravagance, and threatened to discharge any servant who was careless enough to break a part of the set.

One day, says Novellen-Schatz, a man who has been in the service of the Royal house for many years had the misfortune to break one of the precious cups. He was heartbroken. Tearfully he went to Queen Emma and told her his story. The sympathetic Queen took the broken pieces and put them together, saying, "I think we can fix that. Just paste it together with cement. The edges are smooth and won't show much. Leave the rest to me. I'll do what I can to save you."

When the Royal family sat down to tea the next time, the injured cup was at Queen Emma's place. The Queen, pretending to be very thirsty, drank all the tea at once; and then, as if struck with a sudden idea, she turned quickly in her chair toward the King, and her arm swept the cut to the floor. As it crashed into a thousand pieces, the Queen affected an expression of deepest regret, and said timidly: "There, your Majesty, see what an awkward servant I am. Now, the only thing you can do is to dismiss me from your service."

But William was in a happy mood; seeing how grieved his wife appeared, he made light of the loss and consoled her affectionately, while the old servant stood trembling by, thanking his good fortune for a mistress whose tact and kindness had saved him his position.

Bazaars in Asia.

Streets in the bazaar districts of Asiatic cities are only eight to ten feet wide. The larger shops are eight by ten and the smaller ones five by six feet, with one side giving directly on the street. In each bazaar is a khan for every ten or twelve shops. These khans are two stories high, with an open court in the centre and rooms on the four sides, all opening into the court. A door leads from the open court into the street. Rooms are let to different storekeepers for storage purposes.

Documents of Old Nineveh

The strong offensive developed recently by Russian forces operating against the desperately resisting Turks northwest of Bagdad has awakened a world-wide interest in this whole region of Mesopotamia and particularly in the ruins of the great city of Nineveh, lying just across the Tigris from Mosul and a probable battlefield during the Muscovite assault upon this moslem key to the upper valley of the historic river. Concerning the ancient capital of Assyria and the manner in which its buried secrets have been brought to light within very recent times, Albert T. Cary, professor of Assyriology and Babylonian literature at Yale University, has sent a communication to the National Geographic Society. Prof. Cary writes: "One of the romances of the last 75 years has been the unearthing of the remains of forgotten empires and the decipherment of their ancient records. A little over a half a century ago what was known concerning the ancient peoples of the nearer East, besides that which is contained in the Old Testament, could be written in a very brief form.

"Israel was then regarded as one of the great nations of antiquity. Abraham belonged to the dawn of civilization. The references to other peoples in the Old Testament had little meaning, for few appreciated the fact that the history of many pre-Israelitish nations had practically faded from the knowledge of man. The pick and spade of the explorer, however, and the patient toil of the decipherer have thrown a flood of light upon the situation: ruin hills of the past have been opened up to the light of day, out of which emerge marvelous revelations in the form of written records and other remains.

"These, although written in languages and scripts the very existence of which was unknown to man for two thousand years or more, are now forced to reveal the religion, politics, science and life of not a few of the ancient and forgotten peoples.

"These researches have resulted in astounding revelations. Israel, instead of being one of the foremost nations of antiquity, is now found to have been a small power which had thrived in the late pre-Christian centuries, and had occupied a comparatively insignificant position among the great nations of the age. Instead of the Patriarch Abraham belonging to the beginning of time, it is now found that he occupied a middle chapter in the history of mankind."

Prof. Cary tells of some remarkable documents found in the ruins of Nineveh's "congressional library," where manuscripts were catalogued and arranged according to subject matter, much as in our libraries of to-day. One clay tablet discloses the fact that "the sweetest story ever told" was told with the same naive fervor 5,000 years ago as it is to-day. It is a lover's plaint, thus expressed: "To Bibea thus says Gmil Marduk. may the gods Shamash and Marduk permit thee to live forever for my sake. I write to inquire concerning thy health. Tell me how thou art. I went by Babylon, but did not see thee. I was greatly disappointed. See the reason for thy leaving, that I may be happy. Do come in the month of Marchesvan. Keep well always for my sake."

Whether Bibea received this missive from her solicitous Gimil is not known, but she should have, for there was an elaborate post system in that day, and it is known that there were regular dispatches between some of the principal cities. Among the large amount of material unearthed have been many shipping tags made of clay. These have upon them the name and address of the party to whom the merchandise was sent.

If all the atrocity charges made against the various belligerents during the present world war were true and were multiplied a hundred fold they would not reach the limits of cruelty attained by the famous King of Nineveh, Ashur-nasirpal III., whose own accounts of his refinement of the art of torture have been unearthed recently beneath the very plain where Turk and Muscovite are now battling for possession of the cradleland of civilization. This king wrote concerning one of his campaigns:

"To the City of Tela I approached. The city was very strong; three fortress walls surrounded it. The inhabitants trusted to their strong walls and their numerous army; they did not come down or embrace my feet. With battle and slaughter I attacked the city and captured it. Three thousand of their fighting men I slew with the sword; their spoil, their goods, their oxen and their sheep I carried away; many captives I burned alive. I captured many of their soldiers alive; I cut off the hands and feet of some; of others I cut off the noses, the ears and the fingers; I put out the eyes of many soldiers. I built up a pyramid of the living and a pyramid of heads. On high I hung up their heads on trees in the neighborhood of city. Their young men and their maidens I burned with fire. The city I overthrew and dug it up, and burned it with fire; I annihilated it."

A correspondent of the Geographic Society adds:

"The imagination is staggered at the very thought of that pyramid of the living, human beings being piled one upon another suffocating, strangling, perishing slowly and miserably before that other pyramid of their more fortunate friends to whom death had come swiftly, and at the thought of that monster who not only did this, but glorified in it, and caused the story of his brutality to be written indelibly upon the walls of his house."

Lordly Disraeli.

Disraeli once told a woman that two possessions which were indispensable to other people he had always done without. "I made," she said, "every kind of conjecture, but without success, and on my asking him to enlighten me he solemnly answered that they were a watch and an umbrella. 'But how do you manage,' I asked, 'if there happens to be no clock in the room and you want to know the time?' 'I ring for a servant,' was the magniloquent reply. 'Well,' I continued, 'and what about the umbrella What do you do, for instance, if you are in the park and are caught in a sudden shower?' 'I take refuge,' he replied, with a smile of excessive gallantry, 'under the umbrella of the first pretty woman I meet.'"

FOR THE HOUSEWIFE.

A Useful Table of Proportions in Cooking.

Proportion bothers the cook to a tremendous extent. She may be very glad, therefore, to have the following useful table:

DOUGH, BATTER, BAKING POWDER.

Batters: One cupful of liquid to one cupful of flour.

Muffin or cake dough: One cupful of liquid to two cupfuls of flour.

Dough to knead: One cupful of liquid to four cupfuls of flour.

Dough to roll out. One cupful of liquid to four cupfuls of flour.

Six tablespoonfuls of baking powder to one quart of flour, if no eggs are used; or one and one-half teaspoonfuls of baking powder to one cupful of flour.

One-half teaspoonful of soda and one teaspoonful of cream of tartar is about equivalent to two teaspoonfuls of baking powder.

VARIOUS YEAST VALUES.

One-half cupful of liquid yeast equals one-half dry yeast cake and one-fourth compressed yeast cake.

One cupful of liquid yeast, one dry yeast cake or one-half compressed yeast cake to one pint of liquid if bread is raised during the day.

One-half cupful of liquid yeast, one-half dry yeast cake or one-fourth compressed yeast cake to one pint of liquid if bread is raised over night.

MILK, PEPPER, CORNSTARCH.

One and one-half teaspoonfuls of soda to one pint of thick sour milk.

One and one-half teaspoonfuls of soda to one pint of molasses.

One teaspoonful of soda to one and one-half cupfuls of thick sour cream.

One-half cupful of cornstarch to one quart of milk for blanc mange.

One teaspoonful of salt to one quart of soup stock, sauces, etc.

One-eighth teaspoonful of pepper to each teaspoonful of salt.

EGGS, FLOUR, SALT.

Two to four egg yolks to one pint of milk for soft custards.

Two or three whole eggs to one pint of milk for cup custards.

One teaspoonful or salt to one quart of water for boiling vegetables, meats, etc.

Two tablespoonfuls of flour to one cupful of liquid for white sauces and gravies.

Three tablespoonfuls of flour to one cupful of liquid for brown sauces.

Whites of eight eggs make one cupful.

Three teaspoonfuls equal one tablespoonful.

Sixteen tablespoonfuls equal one cupful.

Two cups equal one pint.

THE SPARROW

A Philosopher On Its Curious Domestic Habits.

(Contributed).

Sometime ago I sent to you a statement that the vocal abilities of the sparrow could only be enjoyed if one turned philosopher, and having for some time held rather unkindly feelings toward "passer domesticus"—not for the "passer," but refusal to, also its desire to add because of its untidy habits, to the domestic trials of housekeepers—justice compels an admission, that if the sparrow would drop its "pugnacious" tricks, one might begin to change one's attitude towards it somewhat.

This year while occupying every spare moment "clicking the pricks" as a member of the sock brigade, it was possible to "observe nature" at the same time, and as sparrows, like the poor, are always with us, they came in for a considerable share of attention.

While only the results of one afternoon will be referred to, others equally fruitful in results could be given. On this occasion a parent had three restless, persistent youngsters to supply, and it meant much labor to, in any way, satisfy the appetites of the family. I watched with interest the parent chase and catch two cabbage moths, kill these, and feed the sections—including even the shredded wings—to the young. Then, there was an extra noisy time, as this parent had evidently secured a cicada, or something of that nature, judging by the sounds made by the victim, and the efforts of the parent to kill this for the consumption of its hungry young, almost made the knitting stop, as they were so intensely interesting. The young remained, strangely quiet, something they had not done before, as they had been so active in even chasing the parent for fear they might miss a scrap of food before this. The sparrow banged, and pinched, and just when it looked like a finished job, something frightened the birds, the young scurried up into the nearby tree and waited, while the parent with its prey flew out of the garden on to the road some little distance away where a view was not available, although the sounds indicated that the contest was still on. Later the parent came back and forth feeding first one and then another of its flock, so judging from the stopping of the victim's cries, and the rapid return of the sparrow with food, it must have been a successful killing. I had read just before this, and scoffed the statement, that in several places it had been observed that sparrows had reformed and returned to their insect-preying—a habit very largely neglected when becoming city residents—but after the observations of last year and this, I am inclined to accept the statement as correct, and in justice think more kindly in the future of "proser domesticus," though these do undoubtedly need to reform in other lines before any housekeeper can honestly welcome them.

There has been time for observing nature you will agree when I say that pair number 98 will be on the needles to-day, though, lately, to help get some shipments out, buttonholes by the dozen, caused the knitting to be set aside somewhat. You may use the facts relative to the sparrow as they are "authentic" and surely the sparrow has had so much abuse that if anything can be said in its favor it should in justice be said.

Occasionally typographical error adds piquancy to a sentence, as, for example: "He intends to trace the false rumor to its liar."—Boston Transcript.

Wigg—Bjones has a wonderful amount of tact but he is so absent-minded. Wagg—Yes, he always knows just what to do, and then forgets to do it.

THE DAY OF DELIVERANCE

(New York Tribune.)

The present week, which sees the anniversary of the murder of the Archduke, sees also the beginning of what we may justly and reasonably believe to be our deliverance from the German nightmare which for two years by violence in action and for a generation by violence in threat has laid a strangling hand on the throat of civilization.

Looking out upon the battle fronts from where must come our deliverance, our release from the blackest peril that has menaced us since the Spanish Inquisition marched with equal step with the Spanish infantry, it is patent that Europe is at last beginning to shake off the German domination. In the east Russia has struck the first and great blow. In the south Italian armies are advancing. In France Verdun still holds, and the great armies of Britain are preparing to deliver the heavy blow, so long and eagerly awaited.

It is doubtful is any moment in the last century, perhaps in many centuries, has been so critical in human history. It is soon to be settled, let us pray, forever, that violence, brutality, material efficiency, accompanied by spiritual obliquity canot prevail in our twentieth century. It is soon to be demonstrated that no preparation in destruction, no ruthlessness in action, no application of the gospel of terribleness joined to the religion of mechanical perfection can chain the minds of men, can reduce the world to a slavery in which men's bodies grow fat, but their souls languish.

We know now to the very bottom what the German idea and ideal mean. We have seen them applied in Belgium and France. We Americans have stood beside the graves of our own murdered women and children, who escaped Prussian lust but not German terribleness. All mankind beyond the confines of the German Empire and those of the Austrian ally have taken full measure of what German purpose means, and in many tongues and many languages Germany will be an adjective of ignominy for years to come.

The armies of revolutionary France, of Napoleonic France, when they overflowed into Europe carried with them the gospel of liberty, of fraternity, of equality. Wherever they passed, they left behind them a heritage of progress, and when they had vanished, a new and better Europe emerged and has endured. After the French revolution, human slavery in the political sense was doomed in Europe.

But after the German armies have passed what has been left? Only ruins. Was there a thing beautiful, sacred, dear to France or Belgium, dear to the world for its artistic value, dear to the village that owned it, for parochian reasons? It has been ruined, defiled. Wherever German armies have passed there has been a harvest of dishonor for women, shameful death of children and old men, and utter destruction of the inanimate things of beauty.

For forty years Germany dreamed to dominate Europe, and for two years she has striven to realize her dream. Millions of men have died, millions of women and children wander in exile over the face of the world. Human suffering and misery such as the world has not known in centuries have replaced peace, happiness, the orderly life of civilized countries.

To realize her dream Germany has murdered Belgium, laid waste Northern France, crushed Serbia, and sent her army corps from the Dwina to the Marne. All that violence, treachery, deceit, corruption could accomplish have been accomplished All that the gospel of terribleness could avail has been realized over half the European continent.

And yet it has not worked after all, this German thing. Men have not been terrified, nations have not been broken. Out of all their terrible sufferings the spirits of men emerge calm, determined, unsubdued. The conquest of the spirit has not been had and the body, responding to the spirit, has remained indomitable, in Belgium, in Serbia, in France, in Russia, in Britain.

Already those who boasted that the next war would be for "world power or downfall" are whimpering for "victorious peace" in the market places of the world and interrupting their bulletins of victory to utter denunciations of the enemy who, conquered, will not yield, and destroyed, still prepares to advance.

Those who come hereafter will have a better measure of the grandeur and the horror of these two years through which we have lived. They will see clearly what has been hidden in part from us and they will realize as we cannot how much for, mankind has been won by the defeat of the German assault upon all our civilization and all our humanity.

It has not paid, this German doctrine, this Teutonic dream. It has not paid, as the ever increasing casuality lists of German dead reveal. It has not paid, as the clamor of German women and children for food discloses. A day is not far off, perhaps, when what was visited upon Louvain may be visited upon a score of German cities, not the agony of physical violence, but the agony of want and misery, and hunger and weakness.

We have known ever since the Marne that a free Europe would endure. We have known that France gave us and gave civilization on that field a new guarantee of safety. Now we are beginning to see that there is another gain to come. German barbarism was only halted in 1914 on the fields where Attila in his time suffered defeat. It was not enough that the German army should be defeated; it was necessary, of prime importance, that the German idea should be crushed, that there should be a final proof that not by hate, violence, murder shall one race overbear all others on this planet.

It is to prove this fact that this struggle has endured these terrible months, that it now endures. There can be no peace, no permanent peace, on this planet while there exists in the heart and head of any race the belief that it has a right to rule all other races, that it is elected to dominate all other peoples and that to achieve its appointed place in the sun it is warranted to commit any crime however terrible, to do any deed however atrocious—that it is authorized to repeal all the precedents of international law and all the concepts of humanity.

But now, as in 1813, Europe is marching against a tyrant, against a tyranny indescribably baser and more intolerable than that of Napoleon. Those nations which were struck all unprepared two years ago have kept their lines and preserved their existence and are now prepared in their turn to strike, to end the danger of them and of us of German domination.

For most of us only the military operations will have meaning in the coming months. We shall see only armies advancing and retreating, the conquests of captains and generals. But these are idle things that other generations will not even note. What is to come is the day of our deliverance from a spiritual peril. What is to come is a victory of Galilee over Corsica, to reverse the German boast of other days. What we are to behold is the destruction, not of a race, not even of a dynasty, not the conquest or occupation of German lands—these things are unimportant, they may be well undesirable — but the ultimate defeat of a German menace to all we love and care for in this world, we who hold to liberty and believe those articles of faith on which democracy has been founded and all free countries built.

Bradstreet's Trade Review

TORONTO—The week's conditions indicate a satisfactory autumn trade. Wholesale houses report that jobbers and retailers are giving placing orders in large numbers. Money is reported to be plentiful and interest rates are a little easier. Most dealers declare that collections are better than twelve months ago. Wholesalers state that small retailers have overstocked in anticipation of higher prices. A scarcity in some lines is delaying deliveries. Woollen industries are very busy. For the leather trades, a fair amount of activity is prevailing. Harness trade is active. Higher prices are being obtained for boots and shoes, according to jobbers and many manufacturers are at a loss in quoting prices for future delivery. Some concerns are booked up with orders enough to keep them busy for several months. The grocery trade is picking up after the summer quiet. General advances have been reported in all lines of canned goods. Hardware business is fair, with the filling of contracts to munition makers still the greatest source of activity. Wholesale houses have filled most of the placing orders for fall trades and they report a moderate volume of business.

MONTREAL.—Wholesalers are quite satisfied with trade conditions. In the drygoods business, merchants state that a brisk trade is being done, with full commodities being in demand. Higher prices are ruling. Wholesale sugar dealers say that prices may take a drop in the near future, although American fluctuations have not affected local trade to a great extent. Hardware, and paints are fairly active. Collections are reported to be good.

OTTAWA.—Trade conditions in most lines are very satisfactory. Grocery wholesalers report a satisfactory volume of trade is passing, with canned goods, especially salmon, commanding higher prices.

LONDON.—Business conditions in Western Ontario are very satisfactory, and a better trade is being done now than during corresponding periods in 1914 and 1915. Drygoods is reported active and the grocery trade is brisk. Labor is in demand. Money is easier, and collections are good.

HAMILTON.—Business is active, and the iron and steel industry is especially busy. Labor is scarce for steel concerns, and a record quantity of orders are being filled. Drygoods lines are reported active throughout the entire district around Hamilton. Hardware is moving out freely with a good enquiry for seasonable lines. The grocery business is fairly busy.

WINNIPEG.—All lines of mercantile business are in a very healthy condition. Although the farm laborers from the East numbered over 30,000, Western farmers find themselves taxed to the utmost in harvesting their crops. In spite of extensive damage in Southern Manitoba, some sections are harvesting a good crop. All kinds of labor are reputed scarce in Winnipeg. The railroads are busier hauling freight than they were at this time last year. Grocery, drygoods and hardware lines are being moved out in quantities that are quite satisfactory to wholesalers and retailers. Bank clearings have shown phenomenal increases. Collections are very good.

CALGARY.—Crop conditions in Alberta are very satisfactory, and prospects are bright for a record yield of wheat. Mercantile trade is reported to be brisk, with the demand for drygoods and groceries very active. Money is being circulated freely.

VANCOUVER.—Business in British Columbia is quite good. All lines of retail trade are reported to be in a satisfactory condition. Collections are good, and conditions in general are much better than in 1915.

QUEBEC.—Local industrial conditions are unchanged, manufacturers as a rule are well employed. Outlook for Fall is encouraging. City and country collections are fairly good.

LET THE CHILDREN DIG.

Nothing Pleases Small Ones Better Than a Garden Patch.

If you live out of town or spend your summers there, let your children study nature first hand in their own gardens. Nothing will teach them more quickly of trees, flowers, birds and vegetables than the planning and developing of a small garden.

Of course each child can personally manage only a very small garden. This can be in the form of a bed or in the form or certain possessions at various places in the big family garden. For instance, you might give into one child's keeping a climbing rose over a summer house, a dwarf evergreen in the far corner of the shrubbery border, a row of beans (a short one) in the vegetable garden and a little patch of flowers in the flower border. In this way the child has a chance unconsciously to study trees, flowers and vegetables.

If possible, make the child interested in all the details of garden growth. If the child can sketch, let him sketch leaves and flowers and roots, seeds and seed pods and all the other parts of the plants he works with. Let him keep a little notebook for his sketches. Without doubt they will prove so interesting as he collects them that they will form the nucleus of an interesting lot of sketches, which he will refer to even when winter has made gardening impossible.

Buy a bird house or two for the child's garden. By watching the chance inhabitants who wmill occupy it from year to year he will become familiar with birds, for his interest in one pair will lead to an interest in all birds.

Perhaps an interesting book or two will stimulate the child's desire to garden. There are children's bird books and gardening books and simple guides of all sorts. Then there are botany books, fascinating when mastered in the open, but rather dry work to most children indoors.

Let the child have possession of the fruits of his garden—vegetables, flowers or fruits, whatever they are. It is a mistake to give a child anything, even a raspberry bush, unless the gift is free and complete.

Sympathetic people are often uncommunicative about themselves: they give back reflected images which hide their own depths.—Eliot.

Every man to his trade. You can't very well improve your time by tinkering with your watch.

SLANG OF THE YEGGS

Pockets, according to Sing Sing 65363, ranges from "side kicks" to "double insiders" and it is hard to get a "poke" or "leather" from a "double insider," which is an inner waistcoat pocket. A watch is a "super," a "block," a "turnip" or a "kettle," and its chain is "white slang," or "red slang," silver or gold. If we did not read the Star of Hope we should not recognize these distinctions, and 65363 holds a gloomy opinion of the future of thievery.

The "cops," "mugs," "fly mugs," "bulls," "dicks," "C. O. dicks" and "elbows" must put most of the "swell mob" in the "big house." "Guns" no longer "hit the derrick"; no more do "yeggs" come to New York to spend the "white money," "kale," "scratch," "dough" or in the words of the Humble Dutchman, "the bullets," they have extracted from "P. O's." and "jugs" in other settlements. Yet the possessor of a wallet should be wary.

"It behooves Mr. Averageman to examine well into his pockets if he should hear such expressions as 'let him through,' 'hold him back' or 'right breech,' and then the sibilant 'cluck' from some nearby stranger.

"The Big Fellow" was, specifically, Tim Sullivan, but the term denotes "a man higher up in any enterprise." The pickpockets are a proud tribe, practitioners in efficiency; the "wire," the "booster," "the tool" and the "swell instrument" all have their carefully designated tasks. A "lone star" works without aids; a "moll buzzer" aspires to nothing more difficult than robbing women. He does not hope to "lift" a "bug," the expert's name for a diamond pin.

Toledo, Ohio, was once a "right town," a good place to hide out in. It had numerous "scatters," where "hop" or "grease" was smoked over the "peanut oil lamp with a bamboo stem," a Chinese chef cooking the "pills." The "gun" "heeled with a bolt of scratch" headed for Toledo for rest; as long as he spared that town its police did not bother him.

"Nollie Matches" was a famous "gun"; the "fastest" of his day. He won his "monacher" by covering his vocation under the innocent pursuit of a match pedler. He found Toledo too small, and came East, where he worked country fairs, circuses and the "shorts," or street cars. The "Twinkler" fell to the low estate of stool pigeon for the "eye," as the "Pinks" were called. "Foley the Goat" was a "lone star"; he shot Cal Grimm, a Cincinnati detective, and is in "the shade" for twenty years. But he was once a great man:

"In time past it was not strange or unusual for some big politician or police captain to lease out street car lines or ferry stations to 'gun mobs,' and for long 'Foley the Goat' held the Market street concession in San Francisco, where the ferries go over the bay to Oakland. Came the day when an Eastern 'mob' bid a higher price and Foley was 'pinched' and 'settled' in San Quentin, much to his amazement; and when he was searched a folded $10,000 bill and another of smaller denomination; an evidence of forethought and carefully secreted 'fall money.'"

Among the "swell molls" were Minnie May the Duchess, who ranked with "Fainting Bertha," whose collapses caused crowds to collect, and whose partners rifled the pockets of the sympathetic. The "yeggs" talk a language of their own. The "boxman" is a safeblower, and sometimes wears "monachers" such as "peter man," "yeggman," "blaster," "heavy man" and "soup man." The "yeggs" are progressive:

"From the old time 'jimmy' and the sectional jimmy and the 'apron' and the 'graduate wedge,' to open the "goophers,' as safes were designated, the 'soup man' arose with his phial of tremendous possibilities and shattered all the old argot that had served so well to fill the penitentiaries of the old days. 'Soup,' 'nitro' or 'dinny,' all words which are self-explanatory, had conquered, and the usage of these terms became general within the underworld."

"String" is fuse, the detonator is "XX." The daring individual who lights the fuse is the "parlor man"; the watchers are "lighthouses." A "keleter" is a small suitcase, or the inner box in a "goopher." A train is a "rattler," its conductor a "con," and the brakesmen "shacks." A knife is a "shieve," and an automatic pistol a "maggie." Stamps, postal and internal revenues are "stickers," a package is a "bindle," and a timorous looter of clothes lines and hen roosts is a "dynamiter." Stealing the week's wash is "gooseberrying"; a highwayman of Australian training says "Bail up!" when another would cry "Hands up!" Yeggs rejoice in a good meal of "hobo mulligan," which some call "slum gullion." In other circles a bad check is a "scratch," the forger a "scratcher," and the passer a 'layer.' All of them end in prison, where a lifer is "doing it all," while a short termer does a "bit" and a long termer a "stretch"; and "wop" in a few days or weeks to be served before the gate opens and our rival the rascal walks out to freedom.—N. Y. Sun.

FORETELLS WEATHER.

Ten Rules That Have Scientific Foundation and Are Good.

When the temperature falls suddenly there is a storm forming south of you.

When the temperature rises suddenly, there is storm forming north of you.

The wind blows from a region of fair weather toward a region where a storm is forming or in progress.

Cirrus clouds move from a region where a storm is in progress toward a region of fair weather.

Cumulus clouds move from a region where a storm is forming.

When cirrus clouds are moving rapidly from the south or southeast, there probably will be a cold rainstorm on the morrow, if it be in the summer, or a snowstorm if it be in the winter.

The wind blows in a circle round a storm. When it blows from the north, the heaviest rain is east of you; when it blows from the south, the heaviest rain is west of you; when it blows from the east, the heaviest rain is south.

Heavy white frost is evidence that a storm is forming within 100 miles north or northwest of you.

Don't gamble with destiny Many a man loses what reputation he has striving for a bigger one.

WALKERTON, SEPTEMBER 21st '16

THE NEW ERA

The following statement was made by Mr. N. W. Rowell, K. C., M. P. P. Leader of the Opposition in the Ontario Legislature on Sept. 8th before leaving London, England. The Liberal Leader sailed from Liverpool on September the 9th:—

"September 16th marks a new era in the industrial and social life of the Province," said Mr. N. W. Rowell, K. C., Leader of the Liberal Opposition in Ontario in speaking to the Globe today with reference to the coming into operation of the new Ontario Temperance Act. Thousands of our fellow-citizens have given years of unselfish service to secure the coming of this day; others have cheerfully given up for the public good that which they claimed to be their right; and the bill which passed the Legislature without a dissenting voice comes into operation as an expression of deep conviction as well as of the patriotic spirit of the people of the Province. All I have learned from the Russians of the effect of the prohibition of the sale of liquor in Russia, and all I have seen and learned in France and Great Britain, confirm the wisdom and patriotism of the course pursued in closing all drinking places in Ontario during the war.

"When the war is over, and our gallant soldiers who survive the conflict have returned to their homes and normal conditions have been re-established, the people of the Province will have the opportunity of saying whether they wish the law to continue or to revert to former conditions. I am convinced that if the law is well enforced it will be as permanent as our local option laws have proved to be, and the benefits to the whole Province will be as great as or greater than those which have accrued to citizens in local option communities.

"The passing of the law removes from those engaged in the hotel business the civil and social disabilities from which they have hitherto suffered by reason of the bar, and I am persuaded that if the law is well enforced the time will yet come when even those who most strongly oppose the present act will acknowledge that the closing of the drinking places during the war was a wise and patriotic course to pursue."

+ + +

THE NEW STANDARD HOTEL

When the bars closed last Saturday night, all the hotels of Walkerton were still under license, the difference being that they are now licensed as "standard hotels." This license permits the selling of cigars, tobacco, newspapers, and magazines, etc., which would not be otherwise allowed and it is the dividing line between the word "hotel" and "boarding-house." The Government has no intention of merely getting some of the hotel owners' money as the fee is not excessive and the license is very essential. Inspector White has made an examination of the Hartley House, the Central, Queen's, Royal and the Walker House, all of which have applied for a standard license, and they will be granted the license. To each applicant for a license has been delivered a copy of the regulations governing the conduct of lunch houses. Briefly they are:—

A Standard Hotel shall be a place of public accomodation approved and licensed as such by the Board, and containing such number of bedrooms, together with complement of bedding and furniture and public waiting and serving rooms and conveniences, as in the opinion of the Board are suited to the needs of the locality and the travelling public. Each such Standard Hotel shall be a well-appointed eating-house, with appliances requisite for daily serving of meals to guests of the hotel.

The premises shall be kept comfortably heated, properly lighted and ventilated, sanitarily clean at all times, and in good repair; regard being always had to the comfort and satisfaction of guests.

The holder of a Standard Hotel license shall be a person of good character and legal age, or may be a firm or partnership, or an incorporated company.

Every Standard Hotel shall have placed over its main entrance a sign bearing in plainly legible and prominent characters the name of the hotel, and also in smaller characters the sub-sign "Licensed as a Standard Hotel under the Ontario Temperance Act."

Every Standard Hotel shall keep in its office a register, in which at least the name and address of every guest who occupies a room shall be registered, with date and number of room. Every Standard Hotel shall keep a supply of pure cold drinking water conveniently placed for the use of guests.

Every guest's room shall keep a secure bolt on the inner side of every door and in addition thereto the door into the public hall shall have a strong lock with portable key for use of the guests occupying the room.

On the inside of the door of every guest chamber in every Standard Hotel shall be posted a notice stating the rates to be charged for the use of said room, and whether said rates are on the American plan and include meals, or are on the European plan for use of the said room only.

Standard Hotels located where waterworks and sewer services are available shall have adequate modern lavatory and water closet and bath accommodation for both sexes.

Licensees are warned that under the Ontario Temperance Act, liquor cannot be sold or kept upon the premises of a Standard Hotel.

Fire escapes must be provided and so located as to be accessable at all times and not placed in bathrooms bedrooms or other rooms.

EDITORIAL COMMENT

The Ford Motor Co. of Ford, Ont. sells Ford runabouts to its employees at $100.

+ + +

Have you decided how much of the Canadian war loan you can possibly take up. Every little helps.

+ + +

The chief aim of Toronto fair is that there shall be more people there than last year.—Guelph Mercury.

+ + +

The despised hog and the plebeian potato may be considered aristocrats these days. Look at the prices they bring.

+ + +

A convention is to be held in New York shortly to revise the ten commandments. The revision that is most needed is in the way folks keep them.

+ + +

Fifty thousand automobile licenses have been issued in Ontario this year, as against 35.000 in 1915. The great increase is due to the large number purchased by farmers.

+ + +

New York burglars have a new fad of stealing women's hair. It is seldom that any midnight screams are heard, as the operation of lifting it from the dresser is quite painless.

+ + +

A burglar in Westfield, left his finger prints on some sticky fly paper and he is being traced in this way. It's much easier to trace a man who sits down in the sticky stuff.

+ + +

The Expositor and Courier, the two Brantford dailies have announced that on October 1 their subscription rates will be raised from $3 to $4, owing to increased cost of production.

+ + +

A church in Delmar, N. Y. provides ear trumpets for those who cannot hear very well. When an appeal is made for a special collection there's no demand at all for the instruments.

+ + +

The Conservative press in Ontario seems to be worried about the leadership of the Liberal party. But what is really worrying them is the fact that there is an increasingly large party to lead.

+ + +

If some housewives looked as diligently through the advertising columns of their local newspapers as they do through the mail-order catalogue they would find so many merchandising opportunities that buying out of town would be no longer practiced.

+ + +

An extensive list of German publications mostly issued in the States, have been barred from the Canadian mails under the war measures act, and anyone found with a copy of any one of them in Canada will be liable to a fine not exceeding $5,000 or imprisonment for a term not exceeding five years.

+ + +

The amount of business that the mail order houses get from any community depends proportionately upon the aggressiveness of the local merchants. In these times it is a good investment for the home merchant to to follow the mail order houses and spend a little money in inviting patronage and advertising his goods.—Listowel Banner.

+ + +

It's a horrible thing to be in love, in some communities. Here's a chap named Roger, of Ashbury, N. J. He was jilted by his girl, fined $25 for bothering her and got hurt when he fell down stairs coming out of the police court. And it all took place in one day. And to make things worse, when he got home to eat his supper his neighbour put on a gramophone record that rasped out something about it being "The End of a Perfect Day."

+ + +

Henry Ford is suing the owners of the Chicago Tribune for a million dollars. The Tribune called Ford an "anarchist." A paper can safely refer to a man as a fat head, a wind jammer, a grafter and a rubstubber, but apparently Mr. Ford considers that planting him in the zone of anarchy is one too many. Hence the Detroit millionaire sues the millionaire Chicago publisher for a million. Win or lose, all parties can stand the racket, and the pickings for the lawyers should be fat.

+ + +

The secretary of the Walkerton Old Boys' association estimates that in every block in Detroit, there is at least one native of Bruce county, Ontario. The chances are about even that any hustling young man by the name of McGregor or McTavish or McPherson you meet in the Michigan city, came from Ripley, Kincardine or Walkerton. Some of them have not remained in Detroit. They came back to fill the ranks of Bruce's overseas battalion and that is one of the reasons the 160th recruited to full establishment the most quickly of all the county battalions.

OUR OTTAWA LETTER

Secured for The Telescope
By Special Arrangement

What is now happening to the Ontario Government is exactly what has been happening to every Conservative Government in Canada since the war began—it is tottering. When it isn't tottering, it's pottering. It takes it a day about—one day to putter, the next day to totter. It is making good on both jobs.

Nothing has been said about nickel since Hartley Dewart was elected in South West Toronto. Naturally the parcel of village cut-ups in Queen's Park want to forget all about that. It makes them nervous to have the thing mentioned when the boss is around. The Hon. Frank Cochrane is the boss and he is none too pleased with the mess the naughty boys made of it in S W Toronto. By their blundering they have drawn attention to the fact that the Ontario Government is owned body, bones and breeches by the Nickel Trust, operating through the Minister of Railways at Ottawa. This close connection with Ottawa is not a good thing for the parcel of the country lawyers who constitute a Cabinet-afraid-of-losing-its-job in Queen's Park. It gets them into a lot of trouble. It threatens to send them out of major league company. The last thing they want to talk about is nickel. They would rather talk about hydro-radial, unwelcome as the subject is.

A belated announcement is made that the Ontario Government will spend $1,300,000 on hydro. This is another case of pottering. They are prepared to potter that much to keep from tottering any farther. Since the events in South West Toronto, they have seen a new light on hydro-radial. They are going to love it from now on. That is to say they are prepared to go through the motions, hoping that an opportunity will offer, sometime, to give the cause of public ownership a kick in the slats, by way of an order-in-council or something like that. How the $1,300,000 is to be spent nobody knows. It's a safe bet that there's a string on it.

The Hon. William Hanna, who is credited with possessing most of the brains now extant in Queen's Park, doesn't care very much what his colleagues do. He is going to drop out anyway. He can have a better time and make more money following up his profitable connections with the Standard Oil Company. He has already taken a suite of offices in the new Imperial Oil Building on Church St., Toronto, Imperial Oil being John D. Rockefeller's alias in these parts.

Meanwhile the Ontario Government continues its pottering in regard to the fire policy in New Ontario. The salutary regulation which was the outcome of previous fire—namely, that no town should build within a mile and a half of the bush—has not been observed. Lumbermen have been allowed to leave their slash lying about and the settlers to make fires to clear their land without taking the stipulated precautions. While the great fire was in progress, the Provincial Fire Marshal was in Toronto dashing about in an automobile. The fires are still raging and millions of dollars of standing timber are being destroyed. The fire ranging is a joke. It is in the hands of college students on a holiday, or ribbon clerks from the city, who seek to build up their health by an outdoor life. These novices never wander from the right of way for fear of getting lost in the bush, rockets are sent up to light them home, because that is the only way they understand of finding the path out.

H. F. GADSBY.

Funny Addition Sum.

How many apples did Adam and Eve eat? Some say Eve 8 and Adam 2—A total of 10 only. Now we figure the thing out differently, Eve 8 and Adam 8 also, total 16.

We think the above figures are entirely wrong. If Eve 8 and Adam 82 certainly the total will be 90.

Scientific men, however on the strength of the theory that the Antediluvians were a race of giants, reason something like this, Eve 81 and Adam 82—total 163. Wrong again. What could be clearer than if Eve 81 and Adam 812 total was 893.

I believe the following to be the true solution. Eve 814 Adam and Adam 8124 Eve 8938.

Still another calculation is as follows if Eve 814 Adam, Adam 81242 oblige Eve—total 812,056.

+ + +

September Rod And Gun.

In his story "Two Bags of Wild Ducks," in the September number of Rod and Gun, which is now on the news-stands, Bonny Castle Dale, the naturalist writer and contributor to many Canadian as well as American journals, compares shooting with the gun to shooting with the camera. "Duck Days on Pitt Meadows" describes a duck shooting expedition in another Province, that of British Columbia. "A Bit of Selkirk Bush" is a humorous sketch of an expedition through the Selkirks while "With Dad in the Forests of Quebec" tells something about the good hunting and shooting that is to be had in that Province. The magazine for September is replete with stories of interest to the lover of the out-of-doors and the special departments devoted to Guns and Ammunition, Conservation, Fishing Notes, The Kennel etc., are also of particular interest. This representative Canadian sportsman's magazine is published at Woodstock by W. J. Taylor, Limited.

Bread Making Contests
At Rural School Fairs

PRIZES—Free Courses at Macdonald Institute, Guelph
Free Poultry Raising Courses at Ontario Agricultural College
Free Cook Books and Magazines

Over 1,500 prizes in all will be offered in bread-making contests which will be held this fall at over 250 rural school fairs taking place in Ontario. It will be a great event at the fairs and will stimulate interest in bread-making among young girls between the ages of 12 and 17 years.

Here is a wonderful opportunity for your daughter to win for herself a Free Course in Domestic Science at the famous Macdonald Institute, Guelph. All she has to do is to bake one double loaf of bread and enter it in the contest at the fair according to the conditions explained below and more fully told in the folder we will send you on request. The loaf must be baked with

Cream of the West Flour
the hard wheat flour guaranteed for bread.

This is a splendid flour which makes the biggest, bulging loaves—whitest, lightest and most wholesome bread you ever baked. Is this not a splendid opportunity to interest your daughters in breadmaking?

Here are the Splendid Prizes offered for the best loaf of bread baked with Cream of the West Flour. The following are offered at each local Fair:

1st Prize.—A paid up subscription to "My Magazine" for 1 year. This magazine is full from cover to cover every month with articles suitable for young people of all ages. It is published in England. Value $2.50 per year.

2nd Prize.—6 months paid up subscription to "My Magazine" Value $1.25.

Extra Prizes.—When entries exceed ten a 3rd prize will be awarded of 6 mos. paid-up subscription to "My Magazine." When the number of entries exceeds twenty the judges at the fair will award 4th, 5th, and 6th prizes of one year's paid-up subscriptions to "The Little Paper." This is a wonderful little publication issued every month in England. Its eight pages are packed with highly engaging information and stories relating to history, nature-study, animals, bird-life, etc.

Important — The winners of 1st prizes at the fairs automatically become competitors for the Provincial Prizes. The second half of the double loaf is sent to Ontario Agricultural College, Guelph, by the district representative in special container provided. The judging is done by Miss M. A. Purdy of the Department of Breadmaking and Flour Testing at the College.

Provincial Prizes—The winners of first prize at each local fair compete for following Provincial prizes. The first and second prizes, or third and fourth prizes, will not be awarded in any one county:

1st Prize.—Short Course (3 months) in Domestic Science at Macdonald Institute, Guelph. The Macdonald Institute does not accept students under the age of 17 years, if the winner be less than 17 we present her with a certificate entitling her to take the course when she reaches the right age. Value of course $75.00, which pays for fees, room, board and washing. The winner lives at Macdonald Hall while taking course.

2nd Prize.—Short Course (3 months) in Domestic Science at Macdonald Institute, Guelph.

3rd Prize.—Short Course (4 weeks) in Poultry Raising at Ontario Agricultural College, Guelph. Girls taking this course do not live at the College, but good boarding houses will be secured for them in Guelph. Value of course $25.00, which pays board of student in Guelph. (No fees are charged for course.)

4th Prize.—Short Course (4 weeks) in Poultry Raising at the Ontario Agricultural College.

5th to 25th Prizes.—The Famous Boston Cooking-school Cook Book by Fannie Merritt Farmer, latest edition (1914). There are 2117 thoroughly tested recipes and 130 photographic reproductions of dishes, etc., besides much special information.

Conditions of the Contest

Every girl may compete at the rural school fair in her district, whether or not she attends school, providing that her 12th birthday occurs before November 1st, 1916, or her 17th birthday does not occur before Nov. 1, 1916. One loaf of bread must be submitted baked in pan about 7 x 3 inches and 3 inches deep, and divided into two loaves so that they may be separated at the fair. The loaf must be baked with Cream of the West Flour. One half will be judged at the fair. The other half first prize loaf will be sent to Ontario Agricultural College, Guelph, to compete in the Provincial Contest. The local contest at the fair will be conducted under the same rules as all the other regular contests at your fair.

The standard by which bread will be judged will be as follows:

1. Appearance of Loaf		15 marks
(a) Color	5 marks	
(b) Texture of crust	5 marks	
(c) Shape of loaf	5 marks	
2. Texture of Crumb		40 marks
(a) Evenness	15 marks	
(b) Silkiness	20 marks	
(c) Color	5 marks	
3. Flavor of Bread		45 marks
(a) Taste	25 marks	
(b) Odor	20 marks	

Each loaf must be accompanied by the part of the flour bag containing the face of the Old Miller (important) and an entry form must be signed by the girl and parents or guardian stating date of birth, P.O. address, and giving name of dealer from whom Cream of the West Flour was purchased. The form will state that the girl actually baked the loaf entered in the competition. The forms will be provided at the time of the fair. The decision of the judges is final. Not more than one entry may be made by each girl and not more than one prize will be awarded to the same family.

The Results of the contests at the fair will be made known in the usual way as in the case of all the other regular contests. The Provincial results will be announced as soon as possible after the conclusion of the Rural School Fairs in the Province.

Do Not Miss this Great Opportunity: Every girl between 12 and 17 years should compete. What a splendid way to stir up increased interest in breadmaking! Get a supply of Cream of the West Flour at your dealers and practise using it as often as possible to increase the chances of winning. If your dealer cannot sell it to you, write to the Campbell Flour Mills Co., Ltd., Toronto, and they will promptly tell you the nearest place to get it.

No Competitions in Counties Named Below: The competition is open to all parts of the province where Rural School Fairs are held, except the districts of Rainy River, Kenora, Manitoulin and Thunder Bay. These districts are the only parts of the province where school fairs are held by the Department of Agriculture in which this competition will not be a feature. There are no district representatives of the Department of Agriculture in the Counties of Huron, Perth, Wellington, Haliburton, Prescott, Russell or Lincoln, and no rural school fairs are held in these Counties by the Department of Agriculture. We regret, therefore, that the competition cannot include these Counties.

Write for free folder giving full and complete information about every feature of this great contest.

Walkerton - Ontario

Northern Exhibition - List of Prize Winners

WALKERTON FAIR was quite up to previous years in most respects last Wednesday although the attendance was comparatively small, probably not more than 1500. The gate receipts were about $210, this with the government grant of $150 will not be sufficient, we understand, to pay the prizes in full. The entries in most departments were very good, especially in sheep and horses. The weather threatened to spoil everything early in the day, but cleared at noon and the afternoon was ideal. The Fair has a few hard-working directors who have been doing their best in spite of lack of support from the public, and they deserve credit rather than abuse. The Telescope believes, and it voices the opinion of a good many citizens in this matter, that if the people of the town are not ready to take hold and make the Fair a rousing success, it would be much better to close up shop than to drag along from year to year. Either let us have a first class show or none at all.

+ + +

PRIZE WINNERS

CLASS 1 — HEAVY DRAFT HORSES.

Stallion any age, 1st Isaac Eby; Stallions 4 yrs old or over, 1st Isaac Eby; Stallion 2 yrs old, 1st Irwin Bros., 2nd Abram Rowand; Mare with foal at foot, 1st Wm Long & Sons, 2nd John Mielhausen; Filly or Gelding 3 yrs old, 1st Charles Tanner; Filly or Gelding 2 yrs old, 1st Jno Mielhausen; Filly or Gelding 1 yr old, 1st John Witter; Foal of 1915, 1st John Mielhausen, 2nd Wm. Long & Sons, 3rd Charles Tanner; Span of horses, 1st Sam Kingston, 2nd Wm Long & Sons; Colt sired by Levi Good's horses, 1st Jas Rennie, 2nd John Mielhausen, 3rd Lawrence Montag, 4th H J Ernest.

CLASS 2—AGRICULTURAL HORSES.

Mare any ag 1st, John Montgomery; Mare with foal at foot 1st Chas Tanner, 2nd Wm Long & Sons, 3rd Jas Rennie; Filly or gelding 3 yrs old, 1st Jas Farr; Filly or gelding 2 yrs old 1st John Mielhausen, 2nd Andrew Schmidt, 3rd Jas Farr; Filly or gelding 1 yr old, 1st Jas Rennie, 2nd H J Ernest, 3rd H H Pietsch; Foal of 1916, 1st Jas Rennie, 2nd Lawrence Montag, 3rd H J Ernest; Span of horses, 1st John Montgomery, 2nd Wm Long & Sons, 3rd John Mielhausen; Span of general purpose horses, 1st F A Kent, 2nd Sol Schwendt.

CLASS 3— CARRIAGE HORSES 15½ HANDS.

Mare any age, 1st Bernard Goetz; Mare with foal at foot, 1st Bernard Goetz; Filly or gelding 3 yrs old, 1st Geo B Armstrong; Foal of 1916, 1st Bernard Goetz; Single horse in harness, J J Foyfogle, 2nd W Klemmen, 3rd Ed Steffler; Span in harness, 1st McConkey Bros.

CLASS 5 — ROADSTERS UNDER 15½ HANDS.

Stallion any age, 1st Chas Sewer; Stallion 3 yrs or over, 1st & 2nd Chas Sewer; Mare any age, 1st Henry Johann; Mare with foal at foot, 1st Horace Johnston, 2nd and 3rd Chas. Sewer; Filly or Gelding 3 yrs old, Jas B McKay, 2nd H J Ernest; Filly or gelding 2 yrs old, 1st H J Ernest, 2nd Henry Ernest; Filly or gelding 1 yr old, 1st Chas Sewer; Foal of 1916, 1st Horace Johnston, 2nd & 3rd Chas Sewer; Single in harness, 1st Robt McKee, 2nd Irwin Bros, 3rd Levi Lott; Span of horses, 1st Henry Johann.

CLASS 6

Turnout single horse, 1st Irwin Bros, 2nd Levi Lott; Best 3 yr old horse on grounds, Samuel Kingston; Lady driver, 1st Henry Johann, 2nd Irwin Bros.

CLASS 7—CATTLE, SHORT-HORNS.

Bull 3 yrs or over, 1st H H Pietsch; Bull 1 yr old, Henry Hossfeldt; Bull under 1 yr, 1st Henry Hossfeldt, 2nd Herbert H Pietsch; Bull any age, 1st Herbert H Pietsch; Cow 3 yrs old or over, 1st & 2nd Herbert H Pietsch, 3rd Henry Hossfeldt; Heifer 2 yrs old, 1st And Schmidt, 2nd & 3rd Henry Hossfeldt; Heifer 1 yr old, 1st, 2nd and 3rd Herbert H Pietsch; Heifer calf, 1st Herbert H Pietsch, 2nd & 3rd Henry Hossfeldt; 1 bull and 4 females, 1st Herbert H Pietsch, 2nd Henry Hossfeldt; Female any age, 1st Herbert H Pietsch.

CLASS 8—BEEF GRADES

Cow 3 yrs old or over, 1st A Schmidt, 2nd Jos Whitehead, 3rd And Schmidt; Heifer 2 yrs old, 1st And Schmidt, 2nd Henry Hossfeldt, 3rd Aaron Meilhausen; Heifer 1 yr old, 1st Jos Whitehead, 2nd And Schmidt; Heifer calf under 1 yr, 1st, 2nd and 3rd And Schmidt; Herd of four females, 1st And Schmidt

CLASS 9 — FAT CATTLE.

Steer under 1 yr old, 1st A Schmidt.

CLASS 10—HOLSTEINS.

Bull under 1 year, 1st Aaron Mielhausen; Cow 3 yrs old or over, 1st Aaron Meilhausen.

CLASS 11 — DAIRY GRADES

Milch cow, 1st Oliver McConnell.

CLASS 12—LEICESTER SHEEP.

Aged Ram, 1st Geo. B. Armstrong, 2nd John Wright, 3rd R J. Sanderson; Yearling Ram, 1st Geo. B. Armstrong 2nd R. J. Sanderson, 3rd John Wright; Ram Lamb, 1st and 2nd, John Wright, 3rd, R. J. Sanderson; Aged Ewe, 1st and 2nd R. J. Sanderson, 3rd John Wright; Yearling Ewe, 1st R. J. Sanderson, 2nd John Wright, 3rd R. J. Sanderson; Ewe Lamb, 1st R. J. Sanderson, 2nd Geo. B. Armstrong, 3rd John Wright; Pen of Sheep, 1 Ram, 2 Ewes and 1 Ewe Lamb, 1st R. J. Sanderson.

CLASS 33—NATURAL HISTORY

Collection of Woods, 1st Daniel Krampp; pen and ink sketching, 1st Daniel Krampp, 2nd Millie Lambertus, 3rd Vaddie Caldwell.

PRIVATE DAVID SIELING

Mrs. Wm. Sieling received the following letter from her son, David, "Somewhere in Belgium."—

Somewhere in Belgium.

Dear Mother:—

Just a few lines to let you know that I am well hoping you are the same. Well, mother, I am in Belgium now and have been up in the first line of trenches. We were only in for a short time and we never had one man shot or wounded.

I met Bert Cartwright and Norman Huck. I saw where Ray Byslop is buried but I had no time to go and see his grave. I am going to see his grave the next time I get the chance. Fred Jewell is in England now, he got a shell shock. Well the Germans and us are very busy at night but not very busy in the daytime. The German trenches are not far from ours. I was looking through a glass and could see a good stretch of his trenches. We have a fine Y.M.C.A. here and I can write a lot of letters now.

I have a piece of shrapenal that dropped down into our trench that I was in and I have it for a souvenir This shell dropped about ten feet away from me and made an awful noise. Well, mother, I would be very glad if you would send me over some cream candy and send me another birthday cake for the other one was stolen on me at Bramshott. If I could only find the man that stole that box I would certainly make him know it. Even our Officers tell us to plank the fellow that steal from their own comrades and then report it to them and they will soon fix them up right, for it is an awful crime to steal. Well, my address is 44th Batt. 10th Brigade, 4th Division, Belgium. I have the same number and always will. Never forget to put my number on the envelope. Well I must close for this time, so good-bye.

◆

I met Bert Cartwright and Norman Huck just back of the trenches. I know where Ray Hyslop's grave is and I have seen it. I noticed a little grave yard just at the back of the lines and I asked one of the 18th boys where Ray was buried and he told me. He has lots of the 18th boys lying buried around him. I was in the trenches for a short time. I was up in the front line of trenches and it is safer up there than in the reserve trenches. The big guns can't shell our trenches because they are so close to each other. Well I must tell you about going into the trenches. When I saw the lights going up I was scared. I lost my hat-band and I might have lost myself if it wasn't for my lieutenant. He has been in the trenches with the first P. P. C. L. I. I followed him around like a kitten. When we were up a piece the bullets of machine gun were coming pretty thick and I was half crawling along and half walking. The bullets were flying all around us and hitting the sandbags all around us. I never got down so quick in my life as when the lights went up. I was walking in water up to my boot-tops and the mud certainly does hang to a fellow. Well we got up to the front line and they told us that the bad part was over about half an hour after I began to stick my head up and began to fire. Well I fired about two shots in one place and Heiney turned a machine gun on our bag. Well we kept our heads down for a while. We carried that on all night and we never lost a man. The next day the Hun knew when we were getting our breakfast and he began to drop some sand in our tea. There was a whizz-bang dropped not very far from me and I have a piece of it which came in where I was. Mr. Nutting of Walkerton was in the same trench where I was. I went down to his dugout and he wasn't there. George Kingsbury was just behind us and had no chance to see him. Well must close, so good-bye. Love to all.

Love to all.

Your Loving Son,
David

TO PUT UP GOOD JELLY

With sugar constantly increasing in price, one cannot afford many experiments in jelly-making this season. It is better to go about the business of making jelly with some clear ideas that will make success more certain. There is nothing more attractive in appearance nor more satisfying in taste than a dish of home-made jelly which is clear, which keeps its shape while being "quivery." On the other hand, ropy, thick or tough jelly appeals to no one. Neither is it pleasant to set your teeth on edge with crystals in jelly. To get jelly of the right consistency and free from crystals is the problem not only of the young housewife, but also of the mature ones. Two questions often asked of the Domestic Science experts are, "What makes crystals form in my jelly?" and "Why doesn't my jelly harden?" It is almost impossible to answer these questions individually because one does not know just how the jelly in question was made, but there are some general solutions that are worth trying.

CAUSES OF CRYSTALLIZATION.

In reply to the first question, about the crystallization, there are two points to consider. There may be too much sugar in proportion to the juice, or the jelly may have been boiled too hard. Some fruits have more sugar than others, currants for instance have four or five times as much sugar as the peach. Yet to the taste, peaches seem much sweeter than currants. Grapes have the most sugar of any of the fruits and grape jelly is more apt to have crystals form than other fruits. Another factor that comes into jelly-making is the weather. In hot, dry seasons, with plenty of sunshine, the fruits, particularly berries, have more sugar than usual and this should be taken into account when measuring the fruit juice and sugar. The usual rule is pint for pint, or cup for cup. And that rule should be followed this year because we are having a cold, wet season, without a great deal of sunshine. If, on the other hand, we had had little rain, plenty of hot weather, it would be better to use less sugar, i. e., to each pint of juice add a good three-quarters pint of sugar. Sometimes too rapid boiling causes the particles of jelly to be thrown up on the sides of the kettle where crystals are formed and then either pushed down into the kettle or fall down, and these crystals later will start others to form. To avoid crystals measure the sugar carefully and take care to have the jelly boil slowly.

AS TO HARDENING.

Why jelly does not harden requires a different explanation. The fruit may be overripe, it may have been boiled too long, the fruit may not be the right kind or too much may be boiled at a time. There is a substance in all fruits, when ripe or nearly ripe, that is called pectin, which is a carbohydrate something quite similar to starch in its properties, and it is this pectin that enables us to make jelly. Equal quantities of fruit juice and sugar heated to the boiling point for a few minutes brings about a chemical change which causes the pectin in the fruit to gelatine the mixture and jelly is the result. Pectin, pectose, pectase all come from the Greek word, meaning to coagulate or curdle. Through certain changes the pectic acid is made to form a jelly mass instead of curdling things. Pectose and pectase are always in unripe fruit.

Pectose is supposed to form the bulk of vegetable jelly the elemental qualities of which may be equal to the starches. Pectase is a substance present in the juices of plants. As fruits ripen the pectase acts on the pectose which cannot be dissolved and changes it so that it can be dissolved, changing the pectose into pectin. Now the important point for the jelly-maker to remember is that this pectin is always at its best just when the fruit is ripe or a little before. If the fruit is over ripe, if it begins to ferment a bit, if the jelly is cooked too long then the pectin undergoes a change and loses its power to gelatine and the jelly does not harden. Choose fruit that is just ripe or a little green and you will have better success than with the overripe fruit.

WHEN PECTIN IS NEEDED.

The amount of pectin changes in the different fruits just as sugar does. In the strawberry, for instance, the quantity of the jellymaking pectin is so small that it is difficult to make jelly from strawberries. Apples or currants may be added to make a jelly in which some of the flavor of the strawberries may be obtained. Indeed, I have always found that to get good results with peaches it is better to add apples or grapes. The peach is often given in jelly-making lists, but I would advise new jelly-makers to let the peach alone at first or use it with something else that is easy to make jelly from. If you chance to have some currant juice canned add a fourth proportion of that. The best fruits for making jelly are: Currant, crabapple, apple, apple, quince, grape, blackberry and raspberry. If you wish to have success with cherry jelly add currants or apples if you want real jelly. Of course, some of the cherry flavor will be lost.

Many housewives prefer to make jelly from juicy fruits such as currants, raspberries, blackberries and grapes, without adding any water when cooking the fruit to extract the juice. They mash a little of the fruit in the bottom of the kettle first, and then put in the rest of it. The kettle is placed over a low fire and heated gradually, so that the juice will be extracted enough to soak the berries or currants. Other housewives say that they add a little water to start the fruit cooking. I find from experiment that this works very well, particularly with currants, provided the jelly is cooked in a way that I will discuss later. Indeed my experience is that I had more jelly, and with a more delicate flavor.

The proportions were one pint of water to four quarts of currants. The currants were looked over, leaves and imperfect currants removed. The fruit was washed, drained and then placed in an agate kettle with a pint of hot water poured over them. The fruit was cooked rather slowly until it was soft and then it was thoroughly mashed with a potato masher. Then it was poured into a jelly bag made of coarse muslin and allowed to drain over night. The next morning the clear juice was taken and cup for cup of sugar added. When the sugar had dissolved, or almost so, it was put over the fire and heated gradually to the boiling point, where it was allowed to boil gently from 10 to 15 minutes. I tried it by dipping a teaspoon of the mixture on a cold plate and when I found that it rolled up from this plate, that is when it showed that it was jellying I poured it into the jelly glasses and set away to cool.

But I only cooked a little of it at a time. And it is to that fact that I ascribe my success. Indeed, cooking a little at a time is one of the things that I consider essential in making fine jelly. I never put more than three cups on to cook in one kettle. When I am making a good deal of jelly at one time I have found it necessary to keep two or three kettles going at once, which may be done without difficulty, by starting one a few minutes later than the other. Then the skimming off of the scum that rises to the top, and the testing on the plate may be done one kettle after the other. The jelly glasses should be sterilized, dried and kept hot to avoid ferment and mould later.

AS TO CLARITY.

If you have a sunny window in your kitchen, it is a good plan to set the glasses in it for a day, covering them with a pane of glass, or wax paper, and then pouring paraffine over them. The paraffine may be handled easily by putting it in a small coffee pot or teapot, which may be bought at five or ten cents, and melting it in this over a low flame, or heat, and then pouring a thin coating over each glass being careful to entirely cover the jelly.

By using the juice that drains out without squeezing the jelly bag, you will have a clear jelly. If you wish this extra transparent use a flannel bag to drain the juice. After the first juice has been used the jelly bag may be squeezed and that juice used to make jelly that will not clear, but will taste just as good. Or if this is not desirable the fruit in the jelly bag may be turned into a sieve and the pulp rubbed through to be used in making marmalade. But where there are children in the family jelly that is not clear will not receive harsh criticism.

TO AN ENGLISH SPARROW.

Little feathered tuft of gray,
Skipping blithely through the day—
Never resting,
Yet protesting
In your querulous, quick way—
Little sparrow;
You who would the woodland spurn—
Bird-prized haunts of leaf and fern—
Here grace the crowded streets
Seeking man's companionship
With your chippy-chip chip-chip
On your wing or tipping feet—
Ever lightly,
Always sprightly
Comes your note so nearly sweet,
English sparrow.

As you peck with greedy bill
Crevices about my sill—
Hither, yonder,
I would ponder:
Do you never get your fill,
Little Sparrow?
Are they true, my busy bird,
All those stories I have heard—
That there's nothing good in you,
That the stains upon your chest
Match the heart within your breast;
That no chirp you chirp is true?
Should I shoo you
If I knew you—
Are you blackguard through and through,
English sparrow?

Though you make no chirped defense,
Yet the absence of pretense
Casts about you,
As I doubt you,
Something tempting confidence,
Little sparrow.
For you're such an honest lay—
Such a frankly flaunting way;
And though man would fain disclose
All your past incarnadined
With the sins that you have sinned,
Yet mayhap your record shows
No more starkly,
Not more darkly,
Than man's own, as just God knows,
English sparrow!

—Hazel Hall, in Boston Transcript.

CAUSE OF DEATHS

Table Showing What People Die Of.

One of the large life insurance companies of New York, which does a worldwide business, has just completed a list of its death claims for the second quarter of 1916.

Of the 2,510 policyholders who died during this period the causes of death were as follows:

Heart disease	213
Consumption	232
Bright's disease	248
Cancers and tumors	206
Pneumonia	186
Apoplexy	130
Diseases of the arteries	129
Accidents	110
Diseases of digestive organs	98
War	72
Diabetes	61
Appendicitis	56
Liver diseases	53
Paralysis	43
Bronchitis, pleurisy, etc.	42
Blood poisoning, anaemia, etc.	41
Typhoid fever	27
Old age	36
Nervous prostration, congestion of brain, etc.	16
Rheumatism	3
Spinal diseases	5
All other causes	413

Of those who died 183 were under 30 years of age, 402 were between 30 and 40, 653 were between 40 and 50, 664 were between 50 and 60 and 607 were over 60 years old.

That all the money paid out by life insurance companies does not go to beneficiaries of the dead is shown by the fact that this same company during the second quarter of 1916 paid out $8,000,071.85 in death claims and $13,290,950.70 to living policyholders in the form of dividends, cash surrender values and annuities.

The Isles of Youth.

Far out on memory's throbbing sea
Of cherished hope and lost emprize,
Of strangled faith, chained liberty,
The golden isles of youth arise.
They wear a glory on their crest,
Their valleys all are vales of peace,
Their flowered fields, that woo to rest,
The fragrance of the spring release.

Time blots them from the magic page
That memory holds for me to read;
Time steals away this heritage
That toil and sorrow supersede;
But still sometimes I catch a gleam
Of sun kissed crest, of cloudless skies,
And in my wearied fancy seem
To see the isles of youth arise.

Oh! happy dream! Oh! radiant land
Of love and faith and innocence!
The sad years pass and in their hand
Bring naught your loss can recompense;
Yet times, when memory's kindly [illegible]
Strips [illegible]'s badge from my eyes,
I sail, with wildly beating heart,
The golden isles of youth arise.

—Richmond Times-Despatch.

"OFFICER?" said Cissy, looking up from her magazine, "did you say officer? Where?"

The train was sliding into Quebec with the light taut breath of a young runner. The morning air was a shiver of diamonds. The passengers had waked, wondered, breakfasted, and were about to alight.

Cissy was the sort of American who got her hats out of Vogue, her views out of the Smart Set, and her

"Officer," said Cissy "Where".

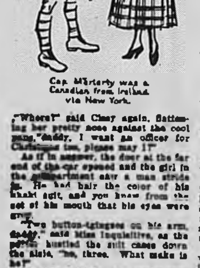
checks out of Dad. The hats were small, the views were broad, but the checks were the loudest plaids you ever saw and still growing.

Cissy had set her heart on a white Christmas, a crinkle-treed, sleigh-belled, buffalo-robed Christmas. Where else were the use of the finest fur coat between here and Madame Polarbear's At Home.

But New York—nice, haughty, sleety-eyed New York—just wouldn't accommodate.

Wherefore Cissy had stamped a thirteen-inch-high-booted foot under the shortest skirt you ever saw, short of the bathing beach, and dad got the light.

He also got the way to the nearest ticket office—or rather the chauffeur did—and the net result was twin tickets for Canada. Dad and Cissy were all there was to it down home, except servants.



Cap. Moriarty was a Canadian from Ireland via New York.

"Where?" said Cissy again, flattening her pretty nose against the cool pane, "daddy, I want an officer for Christmas tea, please may I?"

As if in answer, the door at the far end of the car opened and the girl in the compartment saw a man stride in. He had hair the color of his khaki suit, and you knew from the set of his mouth that his eyes were gray.

"Two button-triangles on his arm, daddy," said Miss Inquisitive, as the porter hustled the suit cases down the aisle, "no, three. What make is he?"

"Captain, I think. You you're neutral, Cis, don't you forget it."

"Neutral?" said his daughter, with her first lungful of true north air, "seems to me this climate is going to be kinda hard on neutrality."

As the red-sledded and be-buffaloed conveyance tinkled off down the street, while dad got busy on the French-named shopfronts, Cissy's head came breathlessly round.

"He didn't go away on the train after all, dad—he just went through it. He's in the sleigh behind."

Captain Moriarty was a Canadian—from Ireland, via New York, for adventure. He had spent five hard-riding years in the Northwest Mounted Police. Now he is going home; because no matter how far a Briton travels, he's Briton still. And when it comes to a scrap, your Irishman is the grittiest Briton of them all.

His battalion was wintering in Montreal, but Moriarty himself had leave for Christmas and he had run down to the Chateau Frontenac for a little of the sport on ski, toboggan, skate and sleigh, that he so loved.

Incidentally and unconsciously, he had packed a little arrow in his bag, a strange, gold-headed steelbarbed bit of viciousness unknown to military authorities, the mate of which had been slid into the wardrobe trunk of the girl from New York. He didn't know it. And she didn't know it. But the little French-eyed cupids of Quebec had wired ahead for just that arrangement.

Dad met the captain in the morning—oh yes, such things do happen—and Cissy met him at lunch. It was thrilling to talk to a real soldier. Most of the men she knew had raised a moustache for the Allies—and that was all.

When he proposed tobogganing Cissy hunted up her furriest, fluffiest, fetchingest coat and complied. Incidentally, the French cupid transferred the arrow from the trunk to her eyes—big, dark eyes they were and disastrously eyelashed.

The streets tingled with life. They flowed with color. Everywhere you heard the lilt of Gallic laughter. There were soldiers too, endless groups of them. And every group encountered, when one was on the magic company of an officer, meant a salute. Cissy had been bowed to, cringed to, kneeled to, but saluted by real active-service soldiers—never before. It was thrilling.

Tobogganing is the king of winter sports, the Coney Island climax of speed-darting, swallow-darting adventure. The most popular slide in Quebec starts from under the shadow of the King's Bastion of the Citadel and ends on Dufferin Terrace at the entrance to the Chateau Frontenac tea room. It starts as "pleased-to-meet-you, glad-you-steer"; it goes a quarter of a mile in something under thirty seconds; and when it has landed you breathless and well-acquainted at the door of the tea room—why, after half an hour of such glorious fellowship, you just naturally drift in.

White hands over a dainty teapot—warm fragrance of the subtle Orient in every sip——

"After all, we're one race," said the captain, smiling, "what do you say to snowshoeing to-morrow?"

The day was a perfect pearl, a sun-drenched ecstasy. The north takes the life out of one. The north pumps it in and uses it up again at top pressure. The long miles melted into memories.

"How can you leave it?" Cissy burst out at last, "this glorious country—how can you go there to the guns and the gas and those awful, awful trenches?"

"How could I stay? The more wonderful it is—child, child, isn't it worth fighting for? But you're neutral. You couldn't understand?"

She touched his arm timidly. He looked so grim.

"Oh, but I do!" she whispered. "My great-great-grandfather fought under Washington. This isn't my country—but if it were, how I would fight!"

The captain was more afraid then than thousands of Germans would have made him. But he charged straight for the guns.

Most of the men she knew had raised a moustache for the allies—and let it go at that.

"Would you take a stake in it if it were offered to you very, very humbly? Just one Canadian heart, dear? We have to move quickly these days. There are no long courtships in war time."

There wasn't a sound in all the white world.

"It isn't true. It couldn't be," said Cissy, awed, "and yet I know I love you."

Out of the end of a feathery, snow-draped bough, the little French cupid laughed. And then he sighed. Far, far away, a bugle at the Citadel had played "fall in."

"And yet I love you."

UNEXPLORED GEORGIA.

Huge Swamp Has Strange Race of Whites, Negroes and Indians.

One would scarcely think there were any blank spots on the map of the United States, but in Georgia there is a vast area, nearly seven hundred square miles of it, which has not been officially explored, or explored by any except perhaps some of the few half breeds who inhabit it.

This is the great swamp fo Okefinokee. On the government map of Okefinokee there are many parts marked "Impenetrable" and "Unexplored." In the depths of this swamp live white people, colored people and a few Indians. Nearly all of the Indians and colored people have so mixed races as to make it almost impossible to locate full-blooded Indians.

Slaves used to hide in this great swamp. Later many deserters from the Confederate army, and men who escaped enlisting, went into the swamp and their descendants are living there to-day. They call the swamp ground "trembling earth." Only the experienced natives can go about in it. The white men living there, about seven people to the square mile, are a sturdy race. They hunt and trap and fish, and also go outside and work with the cypress lumbermen.

Even the braggart has his good points. The people who are always talking about themselves can't be talking about us.

Chats With the Doctor

BY A PHYSICIAN

HEART DISEASE.

Of course, there is no one condition which alone is rightly called heart disease. The morbid affections to which the heart is liable are, unfortunately, very many, and those different diseases give rise to different symptoms, and are produced by different causes. But, most commonly perhaps, when we speak of a person as suffering from heart disease, we mean disease of the valves of the heart.

I wonder how many of my readers have any clear notion of what the work of the heart really is, or how it does that work. Everyone, of course, knows that the heart is one of the essentially important parts of the body, and that when it stops working all the rest of the body stops working and we die. But exactly in what way it is so important probably most people have but the vaguest idea. Consequently it must seem to them by a sort of magic that the doctor, when he is told that a person suffers from giddiness and shortness of breath, and that the feet and legs have begun to swell, at once discovers, or, at any rate, suspects, that he is dealing with a case of heart disease. Yet there is no magic in it at all, but the merest common sense to anyone who understands what is the work of the heart, and how it does it.

The heart is a hollow, muscular organ, divided into four compartments or chambers, and as it rhythmically contracts and relaxes, the blood is forced through these several chambers in a fixed and regular sequence. In ordinary health this contracting and relaxing of the heart muscle takes place about seventy-two times in every minute, and by means of this force the blood, without which no part of the body can live, is circulated throughout the system by means of an elaborate irrigation system. In order to prevent the blood from being forced back, instead of passing in its proper direction, the heart is furnished with a number of valves. When any of these valves become diseased and faulty there is apt to be a certain amount of back-washing, so that each contraction of the heart no longer forces its former full supply of blood into the arteries of the body, and consequently all parts of the body have to go a little short of those materials the carrying on of which constitutes the chief function of the blood. For the blood is the carrier to all parts of the body of both air and digested nourishment. It will thus be seen why it is that in almost all kinds of heart disease shortness of breath is so prominent a symptom. The lungs work harder and harder, causing us to breathe ever more quickly, so that, if possible, more air can be absorbed by the blood to convey to the tissues whose supply is no longer sufficient. The inadequate supply of air and nourishment, and, indeed, of the blood itself, to the brain, situated as it is in the highest part of the body as we stand or walk about, causes these symptoms of giddiness, faintness and headache which are almost as prominent as is shortness of breath.

JAUNDICE

Jaundice is not itself a disease, but a symptom of disease. It is a name given to a yellow discoloration of the skin and other parts of the body through the circulation through the blood of certain coloring matters or "bile pigments" which in health, pass with the bile, manufactured by the liver, to the intestines. In nearly all cases, jaundice is due to the blocking of the bile ducts as a result of catarrh or of definite obstruction by gallstones, or by pressure from an enlarged or diseased liver. Thus the possible cause of jaundice are very many, and according to the causes the outlook varies very much in seriousness. The small bile ducts may be blocked or partially blocked owing to a catarrhal condition corresponding roughly to a nasal or any other kind of catarrh; or the large bile duct may, as I have said, be blocked by a gallstone; or the liver itself may be affected by cirrhosis or by cancer. In infants a form of jaundice is very common, which is of the very slightest seriousness. In these cases it generally passes off in a very few days without any special treatment. Apart from the yellow color of the skin, and of the whites of the eyes, jaundice gives rise to many other symptoms. Thus, in most cases, there are sickness, loss of appetite, great irritation of the skin, and a nasty, often bitter, taste in the mouth. From what has been said above as to the carrying seriousness of the causes of jaundice, it is clear that it is not a symptom which should ever be neglected, or left to home treatment. A doctor should always be seen at once should it appear.

STYES OF THE EYELIDS.

These disfiguring little nuisances should never be allowed to remain untreated. The eyelids should be bathed night and morning with a little warm boracic lotion, and every night a little yellow oxide of mercury ointment should be placed between the lids. This should be continued for a week or two.

FARM GARDEN

THE PLACE OF THE HORSE.

There are few ways in which Canada can be more benefited than by breeding good horses. Every horse bred that is of any value materially enriches both his own and the country. The automobile and the traction engine have not yet produced the horseless age. On the contrary, the more the country is opened up, the busier the country gets, and the greater will be the demand for the horse. In every European country and in the United States artificial power, both for pleasure and for business, had made immense strides before the war, and yet each year saw the number of horses increase. In Canada there was no slump in numbers, although there was in prices. The latter had three causes—first, the approaching financial crisis, and cessation of the real estate boom; second, the reduction in construction works consequent either upon completion or financial stringency; and, third, the superabundance that had been caused by inflated prices in the boom period. Then came the war, and uncertainty increased, while financial matters went temporarily from bad to worse.

Now there are plentiful signs of improvement. Orders are circulating from the West, the trade in pure breds has greatly developed, and the prices realized at recent sales are significant of promise. Meantime, two factions are working for the improvement of the horse himself, as well as for a decrease in numbers. In the first place, the stallion enrolment laws that have been enacted, and the suppression of scrubs, cannot but have a progressive effect on values, and, in the second place, the poor market of the last few years has checked breeding to a considerable extent. There will not be the surplus of 1912, 13 and 14. In addition, there is a spirit of great hopefulness apparent in the United States, as well as in Canada. Every horse-owner and every breeder is agreed that the outlook has materially improved in the last month or two, and that the prospects favor still further advancement. How far the export trade may extend in the near future, considering the difficulties of shipping, it is impossible to say, but of a certainty when hostilities cease there will be a rush for quality in quantity such as the world has never previously seen. And the rush will not be confined to one type. All classes will share to some extent. Undersized ponies, being a luxury for the little children of the rich, may take some time to come to their own, but draught horses and saddle horses will be in demand. Carriage horses will be slow in returning, although they, too, and the ponies as well, will have their market for the show ring and the park. But ring and park will also take time to reach the height of that luxurious existence which characterized them in the late years of the last century and the early years of this.

Looking the situation full in the face, and having regard to the times and signs, it seems impossible not to feel optimistic regarding the future of the horse. The wastage in the war, owing to the system of trench fighting on the one hand, and machine hauling on the other, has not perhaps been quite as great as was at first anticipated, but it increases in volume as the volcanic disturbance goes on, owing to the destruction of automobiles and the scarcity of sundry material used in the component parts. Horses, too, have the advantage in being more easily transported, and in the climbing of mountains, in the threading of forests, and in the crossing of sand, extra soft places, and streams. In open fighting and over widespread areas also they are in demand. Hence, as the war extends, the call for the horse will extend, for the draught horse perhaps more than the saddle horse, and yet for both sufficient to promise great depletion and a huge demand before sufficient years have rolled round to see the maturity of the foals of 1916. Hence, by breeding now, horse-owners will be building up a future for themselves and their country; in other words, helping in production, while by using judgment in their breeding, and utilizing the best they will be practising the best element in thrift.

SPRING REPORT, BEEKEEPING IN ONTARIO.

(Arranged by Morley Pettit, Provincial Apiarist.)

Eight hundred beekeepers reported 27,738 colonies in the fall and 24,953 colonies in the spring, showing a winter loss of 2,785 colonies, or 10 per cent. There are probably fewer beekeepers in this provinces to-day than a few years ago, due largely to the winter loss, diseases, and possibly to the extra farm work and shortage of labor from war demands.

The mild spell in January caused the bees to rear brood and draw heavily on their stores. This, with the high price of sugar last fall causing a start on feeding heavily, resulted in many colonies starving towards the end of the cold weather. A few warm days early in April gave the bees a splendid cleansing flight, and their condition now is reported as very good. The continued cold, wet weather has retarded building up and the gathering of fresh stores, and many colonies may perish if neglected.

The clover prospects are very good throughout the province. The latter part of the season of 1915 being wet, gave the new seeding an excellent start, and the scarcity of farm labor has increased the acreage seeded down. The honey market in Canada seems to be practically bare at present, and dealers are already contracting for 1916 crops at advanced prices. The scarcity of sugar assures a good market for a large crop of honey.

The following gives the report of counties near Hamilton:

Halton—Good prospects; good general condition of bees.

Haldimand—Good prospects; fair general condition of bees.

Lincoln—Good prospects; good general condition of bees.

Welland—Good prospects; good general condition of bees.

Wentworth—Good prospects; good general condition of bees.

APIARY DEMONSTRATIONS, 1916.

To help you "keep better bees and to keep bees better," the Ontario Department of Agriculture is arranging to hold apiary demonstrations in all parts of the Province. The practical nature of the programme is very inviting to all interested in beekeeping, and in almost any district. A specially trained practical beekeeper is sent to take charge of the meeting and handle the bees, and he is generally assisted by local beekeepers. Several hives are opened, and the actual working of the bees explained. Often a queenless colony, or one preparing to swarm, serves as an excellent object lesson. No matter how many or how few colonies you keep, you are sure to learn something at one of these meetings.

Already arrangements are well under way for over fifty of these meetings. The Department of Agriculture attends to all the advertising and supplies the speaker, so that the beekeepers do not incur any expense whatever.

Interested beekeepers desirous of having demonstrations in their apiaries should communicate immediately with Mr. Morley Pettit, Department of Apiculture, Ontario Agricultural College, Guelph, so that arrangements can be made for the meetings.

NOTES.

Oats and bran make a good ration for ewes with lambs at their side.

In growing tomato plants for transplanting it does not require a rich soil, as the transplanting of a tomato plant from a rich soil to the field is apt to stunt it.

Use lots of well-rotted manure in the field. Acid phosphate to reinforce the manure would be a good investment. One grower has good success by applying wood ashes at the last hoeing. He uses a handful of ashes, applied on a paddle, to each plant. He also uses wood ashes in maturing the the melon crop. He advocated level culture on light soil, and would hill up a bit on the heavy soil.

A Scotch farmer says that sheep breeding and root cultivation are the sheet anchors of advanced agriculture. This is true of Scotland, and ought to be true of many of our farms.

People like milk fat better than any other form of fat, and it is a more valuable food than the other fats.

It is a queer fancy with some men that sheep can get enough drink by eating grass when the dew is on it in the early morning. Stop and think how very, very little water a sheep could get that way. Give them a good spring or a trough to drink from.

First-class potatoes, says an expert, should contain no tubers that will go through a hole 1 7-8 inches square. It may be added that over-large potatoes should also be left out. If one is putting up a car of first-class potatoes. The more uniform the potatoes, the better price they will usually bring.

PICTURE OF KITCHENER.

One Observer Writes of Him as Red, Ruthless and Resistless.

The following is taken from The Christian Worker, the parish paper of Calvary Protestant Episcopal Church, Toronto, N. C., which is edited by the Rev. Bertram E. Brown, brother, of the Rev. Dr. Wyatt Brown of Ascension Church, Pittsburgh:

I saw Lord Kitchener quite closely two years ago, and it happened that I saw him at church. He sat in All Saints' Church, Cairo, and went through the service most devoutly. When he went out he passed within a foot of me and cast one lightning glance at me as I leaned over to see him well. He is a great giant of a man, with a sullen brick-red face, little pale, cold blue eyes, and mustache of tawny brindle. O. Henry wrote a short story of a New York shop-girl whose life was kept pure through the influence of a picture of Lord Kitchener, which she kept fastened in her mirror's frame. Had she seen the man himself she would have jumped out of the window. He might be taken as an incarnation of the genius of war, red, ruthless and resistless. Yet his face must be harder than his heart, for I saw him kneeling humbly and penitently in the Church of God.

Good goods come in small packages, and the best resolutions are the most fragile.

Killed Huns Like Grouse

A second lieutenant in a Yorkshire battalion, with a shrapnel wound in his right thigh and a machine gun wound in his left leg, tells a story of a German dugout and its occupants. The dugout was in the first line of trenches taken by the officer's platoon, and six bombs had been thrown down it. The men then went forward to the next trench, and the officer, being hit twice, had to stay behind. The rest of the story may be given in his own words:

"After a bit I wiggled back to that Boche front line into a shallow sap that had been pulverized by our heavies. I was resting there, when I saw a Boche officer come climbing cautiously up out of that big dugout that we'd put the six bombs in. He was a captain. He had a bomb in one hand and a rifle and bayonet in the other, and he was peering first one way and then the other, like a burglar. 'Oh, you beauty!' I thought. And just then he snuggled down against a gap in their parados, near the dugout, and bedded his rifle comfortably for firing at our chaps in the second line. You can bet I was glad I had my rifle and plenty of ammunition. So I got a beautiful head on this chap, and a second later he was—I wonder where dead Boches go! I charged my breech again, and no sooner done than my next target bobs up—a lieutenant. I got him while he was looking at his captain. I aimed for his shoulder-blades, but the old gun kicked a bit, and I got him through the head. Seemed I might as well be a grouse butt, and nothing less than officers for targets, mind you. Well, to cut it short, two more lieutenants came up from that same dugout, making in all three lieutenants and one captain, and I got 'em all.

"And then a private came up with never a weapon of any sort in his hands, and the fear of God in his white face. 'You're a Boche,' I thought; 'probably a batman, and you ought to be shot; but you've got nothing in your silly hands.' It was too much like a sitting bird, you know. Couldn't manage it. 'Here!' I shouted at him. He fell just the same as if I'd shot him. I managed to clamber back to that trench and poke the Boche with the butt of my rifle till he found himself a little, and stood up. I meant to see that blessed dugout for myself. I had to get the Boche's help, but couldn't think how to tell him in German what I wanted. 'Look here, Boshy,' I said, 'Ich wille scne dieses blooming dugout. Got that?' Then I said 'Donner wetter!' and grinned at him, to show there was no ill feeling, and he managed to make connection.

"I kept him in front, you may be sure; but, if I'd been an old blind beggar he wouldn't have had pluck enough to empty my tin can. That dugout was a bit knocked about by our six bombs; had a sort of rough-house look about it. But, at the back of the lowest corner, there was a sharp twist round to the right, and a door with broken glass panels, taken from a farmhouse, by the look of it.

"Through that we went along a passage, turned to the left, down four steps, and into a regular boudoir. Dugout! Why, there was Turkey carpet on the floor and beautiful tapestry curtains to the bunks. Never saw anything like it. But the luxury of it. There were three cases of beer; very good—stuff, too, I had a bottle myself right away. There were about a hundred eggs; two cut hams, pate de foi gras, in little jars, sausages, several boxes of cigars, one case of champagne, a gramophone, and lashins of cakes and chocolate. There was an electric bell fixed, a small typewriter, and in one of the bunks I found a lot of ribbons and things from ladies' dresses and a pair of lady's gloves. It was a regular show, that place. I took a despatch case, and all the loose papers on the table, and got the batman to help me back again to daylight. There wasn't a living soul to be found in the trench; so I got the batman to take me pick-a-back, and carry the despatch case, while I stuck to my rifle.

"'Now, then, Gustave Wilhelm Albrecht von Boche,' I said to him, 'we will ausgang as schnell as we can for our own lines, compree?' He was a little slow in the uptake, as you might say, but tumbled to it after a bit, especially when I donnerwettered him a bit."—London Times.

BURMA'S BUDDHA.

This Statue is Said to be the Largest in the World.

The largest monument of the human form existing in the east to-day, if not in the world, is the great reclining statue of Buddha near Pegu, in Burma, around which the Government erected a building with lattice steel pillars to protect it from the elements. This colossus was brought to light during the construction of the railway that runs northeast from Rangoon to Mandalay.

While the permanent way was being banked up to protect the lines from occasional floods the engineer in charge required for the purpose of this work a harder ballast than the alluvial deposit over which the line was running could give him. Less than a mile away was a tree clad mound, and here, it was thought, suitable material [illegible] were sunk to find the needed stone. Before the diggers had gone down more than a yard they struck an enormous and fairly preserved figure of Gautama.

In actual length the statue is 180 feet and 50 feet high at the shoulders. The figure and its pedestal are of brick, covered with plaster. Since its discovery the plaster has been removed and painted over, the box at the head and the finer nails gilded, and the headdress decorated with glass jewels. The statue is thought to be about 500 years old, but no one knows its history, no reference whatever being made to it in Burmese legends or traditions.—Wide World Magazine.

Cheap Fruit Cake.

Cream one cupful of sugar and one half cupful of butter: then add three tablespoonfuls of molasses and one beaten egg, one small tablespoonful of cinnamon, one teaspoonful of mixed spices, one cup of sour milk, with one teaspoonful of salt to foam; one-half teaspoonful of salt, one cupful of chopped raisins, and you may add citron and chopped figs, which will make it much nicer, two cupfuls of flour, adding alternately with the milk till all is used. Beat thoroughly. Flour the fruit and bake in a moderate oven.

Legend of Mount Saint-Michel

(By Guy de Maupassant.)

I saw it first from Cancale, this fairy castle set in the sea. I saw it vaguely as a gray shadow outlined against a misty sky.

I saw it again from Avranches at sunset. The great stretch of sand was red; red, too, were the horizon and the huge bay. Only the abbey, on its steep rock, towering far above the ground like a fantastic manor, astounding as a dream palace weirdly strange and beautiful, remained almost black amid the reds of the dying day.

I went toward it next day at sunrise across the sands, my eyes fixed on this enormous gem, great as a mountain, cut like a cameo, and airy as muslin. The nearer I got to it, the more I became lost in admiration, for perhaps there is nothing else in the world so amazing and perfect.

And I wandered on, surprised as if I had discovered the dwelling of a god, through these halls supported by light or heavy columns, through these hollowed-out corridors, lifting up wondering eyes to the bell turrets which seemed like rockets shooting towards the sky and to all this bewildering mixture of little towers, gargoyles, graceful and charming ornamentation, fireworks in stone, lace in granite, colossal and delicate masterpiece of architecture.

As I was standing lost in ecstasy a Normandy peasant accosted me, and told me the story of Saint Michel's great quarrel with the devil.

A sceptical genius once said: "God made man in His own image, but man has certainly paid Him back." This saying is eternally true, and it would be very curious to learn in each continent the history of the local divinities, like the stories of the patron saints in each of our provinces. The negro has his ferocious idols, devourers of men; the polygamous Mohammedan peoples his paradise with women; the Greeks, a practical people, have defied all the passions. Every village in France is placed under the protection of a patron saint made in the likeness of the inhabitants.

Now Saint Michel watches over Lower Normandy, Saint Michel the radiant, victorious angel, the sword-bearer, the vanquisher of Satan.

But this is how the Lower Normandy peasant—sly, cautious, cunning and cavilling—understands the struggle between the saint and the devil.

In order to safeguard himself against the evil doings of the demon, his neighbor, Saint Michel, built himself in the open sea this dwelling worthy of an archangel, and certainly only such a saint could create such a residence.

But as he still feared the approach of the evil one, he surrounded his domain with quicksands more perfidious than the sea.

The devil lived in a humble cottage on the shore; but he possessed the meadows washed by the salt water, beautiful, rich lands that bore heavy crops, as well as all the fertile valleys and slopes in the district; while the saint had nothing but sand. So that Satan was rich and Saint Michel poor as a beggar.

After several years of poverty the saint got tired of this state of things, and thought he would come to some agreement with the devil; but it was not easy, Satan sticking obstinately to his harvests.

He thought for six months; then one morning he started for the land. The demon was supping his soup at his door, when he saw the saint; at once he hurried to meet him, kissed the hem of his sleeve and made him come inside, offering him some refreshment.

After drinking a bowl of milk, Saint Michael said:

The devil, frank and trustful, replied:

"That's good."

"Look here, you will give me all your lands."

Satan interrupted uneasily.

"Oh, but—"

The saint went on:

"Listen first. You will hand over to me all your lands. I shall undertake the maintenance, the work, the tillage, sowing, manuring, in short everything, and we shall share the harvest. Will that do?"

The devil, being naturally lazy, accepted.

He only asked further for some of the delicious grey mullet that are caught round the lonely mount. Saint Michel promised him the fish.

Then they shook hands and spat on the ground to show that the business was settled, and the saint went on:

"Stay, I want to be quite fair with you. Choose which you prefer, the part of the harvest that will be above the ground or that part which will be below it?"

Satan exclaimed:

"I'll take what will be above the ground."

"All right," said the saint.

And he went away.

Now six months after, throughout the devil's immense property, were to be seen only carrots, turnips, onions, salsify, all the plants whose big roots are good to eat and whose useless leaves serve at the best as fodder for cattle.

Satan got nothing and wished to break the contract, treating Saint Michel as a rogue.

But the saint had developed a liking for agriculture; he went again to see the devil.

"I assure you that I never thought of doing such a thing intentionally; it just happened by chance; it is not my fault. And for compensation I agree to give you this year all that will remain under the ground."

"All right," said Satan.

The following spring the whole surface of the lands of the Evil One was covered with thick crops—oats with heads as big as bells, flax, magnificent colewort, clover, peas, cabbages, artichokes, every possible kind of grain or fruit.

Satan got nothing again, and was very angry.

He took back his meadows, worked them himself, and remained deaf to all fresh overtures from his neighbor.

A whole year slipped away. High up in his lonely manor Saint Michel looked down on the rich land in the distance and watched the devil directing the work, gathering in the crops and threshing the corn. And he fumed with rage, exasperated at his own impotence. Not being able to dupe Satan, he decided to have his revenge, and he went and invited him to dinner on the following Monday.

"We have not been very happy in our business dealings, I know, but I do not wish to keep up any ill-feeling, and I hope you will come and dine with me. I shall give you a good dinner."

Satan, as greedy as he was lazy, readily accepted. On the appointed day he put on his best clothes and made his way to the mount. Saint Michel made him sit down to a magnificent repast. There was pastry filled with cocks' combs and kidneys, then two big grey mullet with cream sauce, a turkey stuffed with chestnuts soaked in wine, tender mutton from sea-washed meadows, vegetables that melted in your mouth, and good butter cakes smoking hot.

They drank sweet sparkling cider and a heady red wine, and between each course they made room for the next with a little old brandy. The devil ate and drank so much that he made himself quite ill. Then Saint Michel, rising, cried in a voice of thunder, "Begone, vile wretch."

Satan bewildered, fled, and the saint, seizing a stick, followed him.

Through the big halls they ran round pillars, up the spiral stairs, tearing along the cornices, leaping from gargoyle to gargoyle. The poor demon, all the time feeling very ill, eventually reached the highest terrace, right at the top of the abbey, whence can be seen the immense bay with its distant towns, sands and pasture lands. He could not escape, and the saint, giving him a furious kick in the back, sent him like a ball into space.

He shot through the air like a dart, finally falling heavily beside the town of Mortain. The horns of his head and the claws on his feet sank deeply into the rocks which keep forever the mark of Satan's fall.

He picked himself up, lame and disabled to all eternity, and, looking from a distance at the fatal mount sharply outlined against the setting sun, he realized that he would always get the worst of it in this unequal struggle, and so went away, dragging his legs to distant lands, abandoning to his enemy his fields and meadows, his hills and valleys.

WAR PIGEONS.

Flying From France to Yorkshire With Messages

The announcement of the War Office that a large number of homing-pigeons are being utilised for naval and military purposes, and that many of those have been shot at and killed or wounded when homing to their lofts by ignorant people, calls attention to the value of the work of these winged messengers.

The pigeons referred to by the War Office are, in the majority of cases, birds offered to the Government by a large number of patriotic pigeon-fanciers. Wireless, aeroplanes, and telephones have supplanted the use of pigeons for various war purposes on the Continent, and the British Admiralty, which up to a few years ago had a pigeon service to a loft in the south of England, discontinued it on account of the introduction of wireless. Lately, however, pigeons have been found rather useful for certain kinds of work, and it is well known in east coast shipping circles that the British fleet in the North Sea found panniers of trained homing-pigeons on board German trawlers at an early period in the war.

These pigeons are able to fly tremendous distances in an incredibly short period of time.

The best record for long-distance flying in Great Britain is held at present by Messrs. Vester and Scurr, of Spennymoor, in Durham, who possess a pigeon named Prince of Rome which flew from Rome to its loft in 1912, a distance of 1,013 miles, when competing in a test race. A bird, King of Rome, owned by Mr. C. H. Hudson, of Derby, flew in the same race, and won it by flying a distance of 1,001 miles in much less time than the Durham arrival. A hen pigeon, Her Majesty, flew from Bordeaux, in the South of France, to her loft at Aberdeen, a distance of 154 miles, but took several days over the journey.

A very satisfactory feat was performed by a bird owned by Dr. Barker, of Clitheroe, Lancs, which, when liberated at Mirande, in the South of France, flew home to Lancashire and entered its loft the day following the toss.

The first English-bred bird to fly from Spain to England was a dark chequer cock named Alfonso, which in 1907 flew from San Sebastian to the loft of its owner, Mr. T. H. Burton, of Liverpool, a distance of 705 miles, homing on the third day following the toss, and thus winning the first prize in the Manchester Flying Club. Before the war birds frequently flew from Rennes, in France, to Yorkshire lofts, and reached home the same day as the toss or, in bad weather, early the next morning.

THE PILOT SNAKE.

He is a Bold Burglar, and Birds Are His Chief Victims.

Maybe you've been in the woods some day and heard a squawking and fluttering in a tree over your head. You look and see a pair of frightened birds darting this way and that about their nest on a limb. You look closer, and you see a long, black snake creeping along the limb to the nest. In a minute he will have devoured the young birds or eggs in the nest and then stretch out on the limb for his afternoon nap. The name of this robber is the pilot snake.

He's one of the boldest burglars among our snakes, and birds are his principal victims. He can climb trees, clamber over bushes and race over the ground with equal speed. He grows to be from four to six feet long, and in the woods he looks terrible, but he isn't.

He's entirely nonvenomous, and he doesn't "charm" birds, as many people believe. It may be that a bird will become so frightened at seeing one of these reptiles attacking her nest that she will become virtually helpless. But as for charm, that's all a myth. The pilot snake doesn't need to charm his prey. He's too good a climber.

Often the pilot snake is mistaken for the blacksnake. The latter has a white throat and is bluish rather than black. The young pilot snake has white spots. In addition to birds and eggs, it eats insects and even small animals. It will climb a tree and crawl into a squirrel's nest to devour the young squirrels.—Our Dumb Animals.

The dark brown stains which cigarettes make on copper or brass ash trays can quickly and easily be removed with a little denatured alcohol applied with a brush.

WHERE THE HORSE JUDGE BEGINS---AT THE FEET

What is a Good Foot, and How to Know It---Types and Ideals Demanded in the Show-ring and Why

(BY J. W. SANGSTER, FROM THE CANADIAN COUNTRYMAN).

Old as the science of horsemanship, common as the smell of leather, pithy and to the point as was the nature of the men whose words were few, could make it, is that old maxim that says "no foot, no horse." Every horseman and every farmer's son has heard it often enough. Each one has probably grasped something of the lesson which it is intended to teach, but it is also probable that each one has made for himself his own interpretation. Of the importance of good underpinning, in or on or under a horse, everyone places his own valuation. Each year hundreds come to our big shows and exhibitions, watching the horses as they are led out and lined up in the show rings, and are examined and finally awarded their place. But to get at the real estimations of the judges—just how they arrived at their decisions, just how much this or that consideration counted—is rather hard.

It is true that there are scores of horsemen standing about the rings, each one more or less competent to judge the horses himself, and many of them quite willing to express their opinions. Their opinions have some value, too, for every one of them has studied horseflesh carefully and long, and the opinions thus to be gathered are possibly as unbiased as are the decisions of the judge who officiates. But it is also true that they are at the same time very often contradictory, and the hearer who is a stranger has little means of distinguishing the able from the unskilled, the prejudiced from the unprejudiced. About the best that can be said of it all is that this free discussion is very apt to point out to the beginner both the weak and strong points of any horse under discussion.

Hardest of all for the onlooker to learn anything about, from the ring side gossip, are the feet of the exhibits. Yet they come in for a far harder criticism than horses get when the question is that of mere market value. For the horses in the breeders' classes are the horses that are to be used for breeding purposes, and the quality of their underpinning means a lot more than would be the case where the horse's individual work as a horse was concerned. Like begets like, or it is very apt to do so. It is a serious thing for a horse that is otherwise very attractive and of a high standard to come into any neighborhood and bequeath to the horseflesh of future generations inferior feet. Hence it is that breeders and judges of breeding horses apply that old maxim more stringently than it is applied anywhere else. As the varying qualities of the feet of the horses as they appear in the show ring is hard to discern from the ring side, the work of the judge in this direction is all the harder, the more apt to be unpopular when sometimes he must do his duty and place a very superior looking horse a good way down the line from the top.

Once upon a time the writer saw an old horseman standing by a ring-side, with a pair of opera glasses in his hand. He was talking to a young man, and from time to time handing him the glasses with which to view the horses, as if at very close range. The lessons which the young man was receiving have since borne fruit for he has become not only an importer, but one of the most successful of breeders. Every visitor cannot have a pair of glasses with him, but it is a good plan to take the first opportunity to study closely the feet of the winning horses at our big shows. Very few of them, indeed, but will make good object lessons.

In the draft horses, the feet will be found to be very large. Not only this, but they will be grown out, to carry as big a shoe as possible. Perhaps if the foot were cut down a lot, the foot would be none the worse for it. To put him to work with his feet grown out as widely as they are, might mean that they would be something of a handicap to him. But there is value in the principle for all that. Feet that can be grown out so big are sound, healthy feet, the quality of the horn must be of the best and it must be thick and strong as well. So every exhibitor of a draft horse, who knows the game as it is played, will have the feet grown out as well as he can.

Sometimes this is prevented by the foot breaking or meeting with an accident. Under many judges this is apt to go against the horse. But a judge who really knows feet will give them a very close examination. He will learn in other ways just what those feet are, and will make allowance to the extent that he can. But, all other things being equal—which of course they never are—the horse that is brought into the show ring looking the best will get first place. Accidents may be given some allowance, but, after all, they are largely the owner's risk.

To grow out a thin walled foot to cover much ground is rather hard to do. It is a kind of foot that is apt to fail to appeal to the judge. He recognises easily just how thick the walls are, and the art of the most skilled exhibitor will fail to get by him. If there are better feet to be seen in the line-up. That it can be done now and again is true, but it is a business that few besides the masters know, and they are successful only once in a while—not often. But the fact that any man can impart the best appearance to a foot that the foot is capable of, shows that he has studied the matter long and well.

THE TYPE OF FOOT THAT WEARS

For wearing purposes, for durability, the quality of the horn of the hoof is of great importance. It should be dense, and hard, and tough. Open, soft, porous horn and walls is a serious matter, in feet. Showmen well know how to smooth and polish the horn of the foot, until it might be hard to detect this lack of quality. But the skilled horseman is hard to deceive. If he had to decide upon such a matter, his final reference would be to the hair above the foot. If it is fine and silky, then there is every probability that the foot has a texture of a similar kind, for it will be of fine texture, and fine texture implies toughness and hardness and wearing quality. If the feather is coarse and wiry and rough, the texture of the horn of the foot is apt to be inferior. If the hair is long and coarse and shaggy, the texture of the foot is apt to be coarse and inferior, but of fair wearing quality, and of quick growth. If the hair is short and kinky and coarse, then the texture of the foot is apt to be still worse, for it will probably be brittle to boot. The hair of the legs and the horn of the foot are of very similar composition and structure, as a little bit of study will show, and the character of growth of both being a constitutional matter, they are apt to be very much alike in quality.

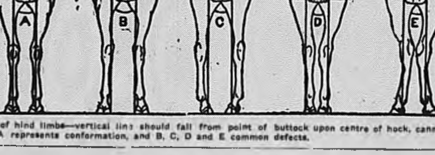
About the character of the hoof head or the coronet, horsemen are fastidious to a degree. Granted a big broad foot of good texture or horn and thickness of wall, anything like a narrow hoofhead is still a serious fault. It must be big and wide and prominent. It must stand out well from the bones of the pastern, for this means trimness, quality in the bone, and at the same time affords room for the ankle to "play." Width and room here affords opportunity for blood to nourish the foot and restore it after hard labor, and keep the foot up to high-duty performance and efficiency throughout a long lifetime.

Just how broad and open the hoof head should be is a matter upon which opinions vary. Some authorities do not like to see it too wide and open, for this means that it is possible for other horses to step upon it, for wagon tongues to fall upon it, and that it is generally exposed to injury. This is why so many of our horses are deficient in this respect and makes the possession of even extreme breadth of foot a valuable characteristic in a breeding horse; it affords opportunity the sooner and more effectively to bring about improvement.

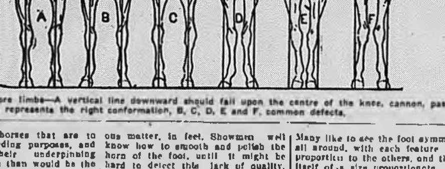
SIZE OF THE FOOT.

A proportionate size of foot, thickness of wall and size of hoof head will lend to the whole foot a characteristic form and shape. The walls will slope, but not too much. Flat feet are objectionable. So are feet that are too "steep" in their sides. Just what is the right thing in this respect is a matter over which there are many opinions. What Clydesdales and Shire fanciers consider to be just the right thing, many Percheron breeders and fanciers would regard as too flat. On the other hand, no Clydesdale breeder would tolerate the "mule foot" shape which was once favored by the fanciers of the Percheron. As a matter of fact, Clydesdale ideals are fast gaining popularity with the Percheron breeders, and many of their horses can now be found planted on feet and ankles such as Clydesdale breeders admire. With development of underpinning along this line has come improved action as well, due to the elimination of the tendency to narrowness of heel, and other causes of inferior action. The horse with a broad open heel, a wide hoof head, and a thick wall of tough horn, will step away with boldness and set his foot down in a manner that is firm and free.

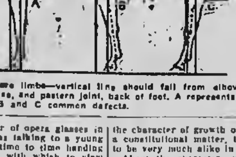
In the matter of depth of heel, also many different horsemen have ideals that differ. Some favor a heel that is of fair depth, and this irrespective of the size of the foot, but relative to the size and weight of the horse. Many like to see the foot symmetrical all around, with each feature in due proportion to the others, and the foot itself of a size proportionate to the size of the horse. There are others still, able horsemen, too, who are not willing to express any preference for depth of heel. They argue that, no matter what science may say about it, the heel should not be too deep. If walls are thick enough, the foot broad and big enough, the horn dense enough, the coronet wide and open, and the heel broad enough, the heel that is as low as the possession of these other qualities will admit of, will not be a bad heel, and the foot will be a good foot. Arguments indicating the possibility of coffin-joint lameness in such a foot, they do not endorse. They claim that there are more horses going lame whose heels are deep and high than where the feet are of the other conformation. On the whole, it is not an unwarranted assumption, to take it for granted that a foot with a thick tough wall will not possess a weak heel.



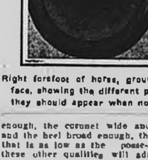
Rear view of hind limbs—vertical line should fall from point of buttock upon centre of hock, cannon, pastern and foot. A represents conformation, and B, C, D and E common defects.



Front view of fore limbs—A vertical line downward should fall upon the centre of the knee, cannon, pastern and foot. A represents the right conformation, B, C, D, E and F, common defects.



Side view of fore limbs—vertical line should fall from elbow joint to centre of knee, and pastern joint, back of foot. A represents right conformation, B and C common defects.



Right forefoot of horse, ground surface, showing the different parts as they should appear when normal.

A Warning.

"Watch out how you holler er de worl' ter look up at you when you gits ter de mountain top," said Brother Williams. "Of all time dat's de one time ter lay low, fer de worl' will find you when it gits good an' ready. An' de other thing is what you got to consider: De minute you hollers old man Trouble locates you an' sets his traps ter trip you an' send you rollin' down ter de bottom, whar you come from!"

THIS WASP HATES SPIDERS.

He Kills and Buries Them and Lays an Egg in Each Grave.

Just to show that he's sanitary, also that he's looking out for the future generation, the South African wasp always buries his prey after he kills it. He stabs a spider with his poisonous dart, digs a hole in the sand and buries the dead spider with an egg.

When the egg hatches the young wasp has a dead spider to nibble at until he gets big enough to hunt food for himself. Thus the wasp looks out for his children before they're hatched. He's a member of the family which scientists have named the pompilus.

Spiders are his favorite victims. He will pursue the spiders which live on ground and paralyze them with his poisonous sting. Even the spiders which build webs are not safe from his attack. He will fight his way through the web until he reaches the centre, where he will grab the spider and hurry away to bury it.

The pompilus is so dreaded and feared that the spider has learned to distinguish him by the hum of his wings. If it's a fly buzzing around the spider waits in his web until he has caught his prey. But if he hears the hum of the wasp's wings the spider will drop from his web and scoot away to any hiding place he can find.

A ROYAL SUMMER VISITOR.

Lightly poised on a beech leaf, or floating aimlessly among the sun bathed branches, another monarch dallies in his fading realm. With brown, black-ribbed wings aspread, the very artistry of easy motion, he drifts along on the autumn breezes with the capricious abandon of a summer's work wound up. At times he stirs into quickened action, and, in short, legato flights breasts the breezy stream, breaks into sweeping undulations, momentarily pauses inanimate, then, with slender planes extended and taut, shoots off in sheer ecstacy of graceful security atop the fragrant August wind. Grieg and Macdowell, among others, have visualized in "Le Papillon" this monarch in his late summer moods, and following his flight one can in fancy fit the music to the changing rhythms of his movement.

He came in the late spring, when the blue bird's welcome had grown cold, and when the milk weed, his staff of life, was pushing forth a vigorous plant. While males of other species paraded their particular charms in the mating season, the tiny scented sacs dotted on either wing soon attracted a companion of his own order. Nature was served again, and in the early summer the brilliant green larva with his yellow and black stripes appeared on the leaves and stock of the milk weed. The color of the plant itself, he passed unnoticed except to the wayside rambler. To some he might have been a mere ugly worm, a species of the detested caterpillar family. Came the stage of his existence when he had reached maturity, full grown and fat from the nourishing substance of the wayside weed. Then he wandered off to a nearby fence or stone, wrapped himself in his pupal silk and passed into his chrysalis sleep.

The milk-weed nodded on in its own course and paid little heed to the lusty young Monarch butterfly, the very image of his parent, who had come up from the south in spring, that alighted one day upon the flower cluster. How could the weed recognize in this brown beauty, with wings black fringed and ribbed, the metamorphosed larva? But there it was, the green, black, and yellow striped caterpillar, a full grown butterfly, so wonderfully colored that it has been named the Monarch. It is a frequent visitor in our streets, but he is found in clouds on the edges of the woods. Restless he may be, but his parent idly lingers among the branches of the beech or floats with the breeze that plays through the open spaces and out across the sunlit fields.—Peterboro' Examiner.

Laundry Counsel.

A bag made of ordinary white mosquito netting will be found a great help in drying small articles such as collars and doilies. Tie the bag with a piece of white tape and pin on the line. This is better for the purpose than a pillowcase, as it allows the wind to pass through more readily.

When linen pieces or small articles are spread on the grass to whiten, much trouble may be prevented by spreading a strip of cheesecloth over them and fastening this to the ground with wire hairpins. This, while it does not prevent bleaching, keeps off insects and prevents the articles from being blown away if there is wind.

Add a teaspoonful of glycerine and a half teaspoonful of soda to the starch in which summer dresses are to be dipped. The glycerine gives a pretty gloss and the soda prevents the starch from souring if the garments are not ironed as soon as brought from the line.

When laundering pongee, do not let it dry and then sprinkle it or it will spot. Iron it while it is damp all over if you wish it to look nice.

To wash white silk gloves, waists, men's shirts and other white silk articles so that they will not turn yellow, use ammoniated water—a tablespoonful of ammonia in two quarts of water is sufficient. Use no soap, and dry in a shady place whether outdoors or in the house. White silk will yellow if exposed to the sunlight while wet. Iron while slightly damp and the articles will be soft and white.

Names of Samos.

Travellers visiting Samos are puzzled at first by the fact that many boys bear feminine names, while girls as frequently have masculine names. The visitors learns after awhile, however, that this confusing of names instead of being due to ignorance is in reality the result of a native custom which is highly poetic. Thus if a girl is born soon after the death of a brother, the latter's name is given to her in the belief that his spirit and all his good qualities have been transferred to her. On the other hand, if a boy is born after the death of a sister he takes the latter's name and, as the Samoans believe, all her lovable traits become his.—London Mail.

The bride never ceases to wonder how a girl can love and honor if she also has to obey.

"KEEP THE HEAD UP."

Good Advice for All On More Ways Than One.

"He is running with his head down. It's a pity," said the man who sat in front of me. We were on one of the swift moving trains that carries city workers to seashore homes in the summer. His remark concerned a handsome, tawnie collie that, separated from its master, who was walking on the edge of the high bank of the railroad cut, had chosen to follow the railroad track. Everyone who watched knew the dog's doom. From the opposite direction came a warning whistle. Around the curve came a huge engine, snorting, powerful, inescapable — unless the dog should raise his head, unless his eyes should be the channel to the brain of the warning of the imminence of the engine and his own approaching fate.

But he did not look up. He ran straight ahead with his head down, his eyes unseeing. The next second women turned from the windows with muffled cries. Men set their jaws a little firmer than they had been set to meet the onslaughts, the disappointments and exasperations of the day's business. The dog uttered no cry. Or if he did the rumble of the train drowned it. The few who had the hardihood to look back, whose nerves were of a steadiness to withstand the sight, saw a crushed heap of yellow and white, a plumed tail outstretched upon the track and a fast spreading stain of crimson. Down the shelving bank of the railroad came two men toward the yellow and white heap. They were the dog's master and a friend who were taking this Saturday afternoon stroll that ended in the petty tragedy.

There's a moral in this tale though it be but the story of a dog. The man who sat in the seat in front of me was right. "It was a pity he didn't look up." It is a pity that so many of us do not look up. A fine old book has said "I will look unto the hills whence cometh my help." The fine old book did not mean literal hills. At least I prefer to think it did not. I like to think that it meant that whatever our environment, whatever our task, that while we are doing our work, we shall look unto the hills of inspiration, "whence cometh our help."

Workers have need to remember that the law of gravitation is a hard master. Always it draws us toward the earth. Always it combats our desire to rise physically or in spirit. Yet one of the chief differences between individuals and peoples is in their buoyancy, their habit of looking above and beyond the sordidness of to-day into the beauty of to-morrow. When I see man of bent head and brooding brow going sullenly about his task I think of the dog that would not lift his head.

True Fish Stories.

The Cyclosoma negrofasciatus will fight with the savage tenacity of a bulldog, and will leap high out of the water in pursuit of a tantalizing finger.

The walking perch from India will climb out of the aquarium and take a stroll around the floor looking for another pool unless you put a wire over the top of his home.

The shischigashira has a round fat fewple body, topped with a chubby-cheeked cherub head, with the tiny eyes, small mouth and nose of a human being. Its coloring is marvelous, and it is considered sacred in Japan.

The angel fish is wider than it is long, and has a chameleon-like quality of changing its color at will.

The Indian gouramis has arms with which it feels its way about or inspects anything new in the aquarium.

There are tailless fish and scaleless fish and fish without fins, blue fish, pink fish, lavender fish and parti-colored red, white and blue fish, but they are all goldfish, especially as to price.

Shampoo for White Hair.

The very best shampoo for white hair is the white of an egg beaten into a pint of soft, cool water. Rub the hair with the egg, making a soft lather, after wetting the hair with cold water and finish the same as with other shampoo, except in the last rinsing water, which should be cold. A few drops of the best indigo, not ordinary bluing, should be added to tinge the water. This acts exactly as does bluing on white goods, leaving the hair a pure white and not in the least tinged with yellow.

Pale eyebrows and lashes make a face expressionless. They can be coaxed into a better growth by rubbing the eyebrows nightly with vaseline and applying to the roots of both the eyebrows and the eyelashes a tonic made by mixing five grains of sulphate of quinine with one ounce of sweet almond oil. Apply this with a fine sable brush, which comes for the purpose.

THE ONLY ONE.

(Houston Post)

"Mr. Softop is different from any other man I have ever met." "You don't mean to tell me he has proposed to you!"

A MUSICIAN.

(Washington Star)

"How's your daughter getting on with her music?"

"Fine!" replied Mr. Cumrox.

"She sounds like a professional musician; 'specially a piano tuner."

A HEAVY MEAL.

(Boston Transcript)

"Last Friday I lunched on one of our battleships." "Didn't you find it rather hard to digest?"

NOT TO BLAME.

(Puck)

The Barber—Your hair is thinning, sir. Ever try our hair preparations?

The Patron—No, I can't blame it on that.

HIS GAME.

(Washington Star)

"You shouldn't lose your temper and say harsh things in debate."

"I'm not losing my temper," replied Senator Sorghum. "A man who loses his temper is at a disadvantage. I'm saying the harsh things so as to persuade the other fellow to lose his."

"It's bound to come." "What is?" "The time when the beautiful actress, instead of telling the jury her life story, will have it shown to slow music as a film."—Louisville Courier-Journal.

"Here's an attractive advertisement for summer boarders." "What does it say?" "'Act as if you owned the earth at our place and we'll act as if we were going to give it to you.'"—Birmingham Age-Herald.

The theory that the last shall be first is very comforting to the people who never get ahead.

Seed Potatoes

The man who grows good potatoes when potatoes are needed is a public benefactor.

According to present production and consumption in Ontario, from twenty-five to thirty people, or from five to six families, are supplied with potatoes for one year from each average acre of land which the farmer plants with this crop. An increase of fifty per cent. in yield would mean an increase in the amount of potatoes produced on each average acre of land sufficient to supply about one dozen people for twelve months. In most years Ontario imports potatoes from the Maritime Provinces, and at the present time a part of our supply is coming from the Provinces of Alberta and of British Columbia. Ontario is well adapted to the production of potatoes of excellent quality, and should supply at least her own demands.

The potato crop of Ontario could be decidedly and economically improved by a more general use of pure, well-bred seed of a few of the best varieties, by the adoption of better methods of culture, and by a more complete control of insects and diseases. It should be the aim of every grower to produce large yields of uniform potatoes free from disease and of high table quality. Varieties of potatoes differ greatly, not only in yield per acre, but also in freedom from rot and in cooking qualities. For instance, in the trying season of 1915, the varieties of potatoes grown under conditions that were uniform at the Ontario Agricultural College varied in yield per acre from 13 to 346 bushels, in amount of rot from less than one to over seventy per cent., and in table quality from 35 to 83 out of a maximum of 100 points. Some kinds are found to be very susceptible to rot, and others to be almost immune. The table quality of potatoes varies far more than many people realize when mealiness, flavor and appearance of different varieties are taken into consideration and are carefully determined.

In each of four years an experiment has been conducted at the Agricultural College in testing under similar conditions potatoes obtained from different sources. For instance, eighteen lots of Empire State potatoes were secured from eight different sources, five in the Province of New Brunswick and three in Ontario. Seed potatoes grown about one hundred and forty miles north of Guelph in Muskoka district, near the Muskoka lakes, have given a higher yield per acre than those obtained from any other source in each of the four years of this experiment. Seed potatoes grown in a cool, moist climate which prevents maturity are often superior to those which have ripened in a hot, dry climate. Immature seed potatoes are usually inferior for table use, but furnish excellent seed. Potatoes grown in Ontario in a comparatively cold, wet season like that of 1915 are likely to be of good quality for planting, providing they are free from disease. Tubers showing discoloration or signs of rot on the outer surface or when cut should not be used for planting.

There are far too many varieties of potatoes grown on the farms of Ontario. This is one of the greatest weaknesses in the potato industry of the Province. It is a defect that should be remedied as soon as possible. If Ontario would confine herself to a few of the best varieties of potatoes the annual crop would be increased in yield, in quality and in commercial value.

There are over one thousand named varieties of potatoes in North America, and fully four hundred have been grown under experiment at the Ontario Agricultural College. Many of these are quite inferior, even though they have been extravagantly advertised; some are old varieties under new names, and comparatively few are worthy of general cultivation by the farmers of Ontario. If these few were grown, to the exclusion of fully eighty per cent. of the kinds now under cultivation, better results would be obtained, whether the potatoes were produced for home use or for commercial purposes.

Some of the varieties of potatoes which have been prominent in the experiments at the Ontario Agricultural College and in the co-operative experiments throughout Ontario are the Empire State, the Davies' Warrior, the Rural New Yorker No 2, the Green Mountain and the Carman No. 1, of the late, and the Extra Early Eureka, the Early Ohio, and the Stray Beauty or Bliss Triumph of the early varieties. In appearance there is a similarity between the Green Mountain and the Delaware varieties, and also between the Extra Early Eureka and the Irish Cobbler varieties. In the experiments at Guelph, however, the Green Mountain and Extra Early Eureka gave the best results in yield per acre, in table quality and in freedom from rot. The three varieties of potatoes which have made particularly good records in the co-operative experiments throughout Ontario in productiveness, table quality, and popularity with the experimenters are the Davies' Warrior and the Empire State of the late, and the Extra Early Eureka of the early varieties.

In the average results of all the varieties grown in the years 1906, 1909, 1910 and 1915, in which there was more or less rot in the potato crops at the college, the Davies' Warrior, the Extra Early Eureka and the Stray Beauty produced the smallest, and the Early Rose, the Beauty of Hebron and the Early Ohio the largest percentages of rotten potatoes of all the varieties grown under uniform conditions.

It has been found to be good practice to use smooth, well shaped, sound tubers of good size and of the best varieties. These can be cut by hand into sets from one to two ounces in weight, each set containing two, three, or, even better, four eyes. It is an advantage to throw the freshly-cut potato sets into finely ground land plaster, and to plant them immediately after being cut. Good results have been obtained by dropping the pieces separately from twelve to fifteen inches apart in the rows, and by having the rows twenty-eight or thirty inches apart. The potato sets can be planted from three to five inches deep, depending upon the character and the condition of the soil. Level cultivation frequently gives the best results on a light soil, and ridged cultivation on soil of a heavier nature.

It is often an advantage to expose whole seed potatoes in a subdued light in a warm room about three weeks before planting. Especially is this true if the potatoes are to be grown for early use. The production of short, thick, green sprouts before planting helps to hasten the growth and to increase the yield.

The New Dress Goods

A CASE OF THE New Dress Goods this week direct from Great Britain contains some of the very latest and most fashionable fabrics for fall.

Fine English Botany Serges in navy and black, Chene Satins, Satin Armures, Bengallines and Fancy Tweeds.

We want to emphasize Serges. They are the most popular of the season's fabrics and you will find the very best that can be had in our stock. They were bought in good time and are very much better values than to-days prices

Per yard 75c. $1.00, $1.25 and $1.50

Men's Tweed and Worsted Suits

Well worthy of a second look

We were fortunate to be able to secure these suits when we did—today we couldn't buy them at dollars more for each suit.

The materials are worsteds and some dressy tweeds. There's good variety in browns, greys and blue mixtures in the neat check and stripe and the important thing of all is that they are of splendid wool cloth. These suits are worth to-day $18.00 and $20.00

..........................Special at $14.50 and $16.50

STEPHAN BROS.

NEIGHBORING VILLAGES & COUNTRYSIDE

News of the Week Collected by Staff of Live Correspondents

GREENOCK

A very pretty wedding took place at Formosa R.C. Church on Sept. 18th, when Mr. Fred Kraemer of Greenock was married to Miss Rachel Steffler of Ambleside. The marriage ceremony was performed by the Rev. Father Brohman. The bride was prettily attired in a dress of blue silk with hat to match. She was assisted by her sister Miss Thusa who wore a dress of green silk, while Mr. Alex Kraemer a brother of the groom acted as best man. After a sumptuous dinner at the home of the bride the happy couple left on an extended trip to Hornell, N. Y. and other points. We wish to extend our hearty congratulations to the happy couple.

Mr. Joe Lawrence of Clifford is building a silo for Mr. Linus Bruder this week.

A few from the burg took in the party at Mr. Charlie Waechter's Friday night and report a large time.

Mr. Jake Kraemer had a very successful stone bee on Thursday.

Mrs. Harry Goodband returned to her home in Rochester N. Y. last Tuesday after spending a couple of weeks with her parents here.

OTTER CREEK

Mr. Wilfred Miller of Clifford was a visitor on the 11th on Sunday.

Mr. Wesley Stoesler of the 4th con. was a visitor on the 14th on Sunday.

Quite a number from here attended the Hanover show last Friday. There was a great crowd there.

The lice parasite has again appeared on the turnips and will likely mean a failure of the turnip crop.

Mr. Jacob Holzmann of Walkerton was a visitor at Mr. John Bell's on Sunday.

Mr. Emerson Schumacher of the 2nd con. of Carrick took a business trip to Mr. and Mrs. John Fenner's on Saturday.

Mr. J. W. South is busy at work repairing his mill at the present time.

PINKERTON

Miss Curry and niece, Miss Curry of Collingwood, are visiting at Mr. A. Pinkerton's.

Miss Alma Reid returned to Toronto on Friday after spending some months at her home here.

Miss Mary Desmond returned to Toronto on Monday.

Pte. Gordon Garland of the 160th, London, spent the week-end at his home here.

Mr. A. Gregg is painting and papering the Anglican Church here.

Messrs Harvey and Cecil Garland attended the London Fair last week.

Miss Marie Pinkerton is attending Walkerton High School.

The W. M. S. held a very successful Thankoffering meeting on Tuesday evening when they were addressed by Miss Cass of Chesley, missionary elect to Korea.

A number from here attended Mr. Rosseau's sale on Friday.

Miss Sadie Colwell spent Sunday at her home in Kincardine.

GLAMIS

While motoring to London last week, Mr. James Thompson had the misfortune to damage his Overland car considerably. On some new gravel, the car skided off the side of the track and jumped into the ditch, turning upside down on the occupants of the car. Mr. Thompson was the most seriously hurt escaping with a sore wrist. It is very fortunate that the other passengers were not hurt although they received a severe shock. The party consisted of Mr. and Mrs. Thompson, Murdoch Thompson, Cecil Garland and his cousin, Wilfid Johnston. The accident was near Belgrave.

Mrs. P. Gilchrist and Miss Gilchrist visited on the second of Bruce last week.

Clyde McKeeman spent the week end at home, returning to London on Monday. Clyde is now on motor cycle work and has left the Bruce Battalion.

Miss Susan and Mr. Thomas Thompson returned from Toronto last Monday.

Miss Sara McIntyre is at Inverhuron Beach.

Mrs. Thomas Percy has returned from Kinlough.

Rev. Donald McIntyre has returned to his home in Toronto.

Miss Lily McKinnon, tenth of Kincardine, is home from Brantford on account of her father's serious illness.

Miss Lila Cunningham is back at her duties in the Post Office again after holidaying in Hamilton and Milton.

Prohibition laws should not hurt a man who can bank three thousand dollars a year for a number of years in a hotel in a rural community. He should be able to live on the interest of his money.

Mr. T. A. Pickard of Toronto who has been visiting relations in the village, is now visiting her son, Mr. Roy Pickard in Paisley.

Mr. and Mrs. Earl Avery of Armow and Mr. and Mrs Dave Robertson visited in London, Chatham and Detroit last week, having travelled by motor.

Miss Katharine McDermid has returned to London.

Mr. Kelly of "The Telescope," and Messrs Shorrington and Connel, called in the village last Friday, proceeding to Tiverton.

Mrs. John Barrie of Lovat, accompanied by her daughter Mrs. Wilson of Davidson, Sask. renewed old acquaintances in Glamis last Monday.

Mr. Jack McKeeman motored to London last Saturday.

Miss Emma Kirktown left this week to train for a nurse in Toledo, Ohio.

Mr. McCauley visited at his home last Saturday.

Miss Annie Currie, of the 2nd of Bruce is visiting Miss C. Purdy.

We are sorry to report the illness of Mr. Allan McKinnon, tenth concession. Mr. McKinnon underwent an operation at his home on Thursday morning. While his condition is still very serious, lastest reports are that he is gaining strength. We hope to hear of his speedy recovery.

Miss McKay, graduate nurse at W. J. Graham's left on Thursday. Mrs. Graham has improved so much that she is able to take a walk in the yard these fine days.

Miss Ena McKenzie, Princess St., Kincardine, is the guest of Miss Margaret Currie, second of Bruce.

Intended for Last Week

Corporal Kitchen spent the week-end at home. Mrs. Kitchen returned home after visiting her aunt on Thursday.

Mrs. McDonald moved into her new home last week, formerly occupied by Mr DeMille and family. Mr DeMille is now living in Mr. Dan. Finalyson's house.

Prohibition comes into force on the 16th. Mr. J. Gunn is closing up.

Mr. J. Cunningham returned from Toronto on Thursday.

Miss McIntyre who has been at Inverhuron for some time came home last week.

Mrs. T. H. McFarlane is spending her vacation at Mr. N. C. McFarlane's.

Mr. and Mrs Keith have been in Toronto but are back again at their home.

Miss Lizzie Cunningham of Milton is visiting her brother, Mr. J. Cunningham.

Miss Jane Stanley is home from New York.

Mr. A. Pickard of Wiarton was in the village last week.

One of the saddest bereavements known in this vicinity was the death of Maude McNally, at Kincardine Hospital last Thursday morning, Sept. 7th. Miss McNally underwent an operation the previous Monday in Kincardine and was reported to have been progressing favorably until the family received news of her serious illness and death on Thursday morning. Before they reached Kincardine she had passed away. Deceased was the second daughter of Mr. and Mrs. W. H. McNally, boundary West, aged 23 years and 21 days. She was well known in the vicinity as a quiet kindly Christian girl and as an active member of the Presbyterian Church and Young People's Society, her removal willl be greatly felt in the activities of those Societies. Deep sympathy is extended by all her friends towards the family. The deceased leaves besides father and mother, sister Nora, and brothers Hector and John at home, twin sister, Mrs. Dan. McLeod, Tiverton, sister, Miss Minnie of Lapier, Mich., and Private Wilbert, a brother in Borden Camp. 160th Batt. Relatives who attended the funeral from a distance were:—Mr. and Mrs. J. E. McNally of Sarnia, Mr. and Mrs. McNally of Chesley, Mr. Robt. McNally of Mossley Ont. and Mrs. Angus McDonald of Detroit.

CARGILL

Contractor Wm. Wittman is building a new cement culvert on the Town Line north of the village.

Messrs. W. D. Cargill M. P. P. and John Clancy attended the funeral of the late Mathew Goetz in Walkerton on Wednesday of last week.

Mrs. and Miss Fowlie returned to Orillia on Wednesday after a pleasant visit with Mr. and Mrs. R. A. Fowlie.

Mr. Geo. Sirrs spent a few days in Owen Sound last week in the capacity of Judge of horses at their fair

Lance Corp. Anderson and Clancy Pte. Brounscombe, Bugler Grainger of 160th, Bruce Batt. London spent the weekend here.

Dr. and Mrs. H. H. Sinclair of Walkerton were in the village on Sunday.

Major Tidy of the Buffs Camp Borden spent Sunday at Hylhurst.

Messrs Cargill and Saunders made a business trip to Owen Sound last Thursday.

Miss Nellie Clancy of London is spending a few days at home this week.

Mrs. Donnelly of Chepstow is visiting with her daughter Mrs. Joseph Clancy.

There died at the family residence here on Saturday, Sept. 16th, Flora M. A. Hamilton, beloved wife of D. E. Crawford, at the age of [illegible] years, 11 months. The deceased, who was born on the farm now owned by Wesley Napper, had been ailing for some months and although every attention was given her, she passed peacefully away on Saturday forenoon. Besides a sorrowing husband she leaves a family of four girls and one boy, all at home; also one sister, Mrs. Alex. MacDonald of Edmonton, and two brothers, Whit of Bankhead, Alta., and John in France. The funeral which was held on Monday to the Douglas Hill Cemetery, was largely attended, the services being conducted by Rev. W.C. Almack of the Methodist church of which the deceased was a member. The sympathy of the entire community goes to Mr. Crawford and family in this their sad hour of affliction.

Mrs. G. F. Saunders returned on Saturday after two weeks visit in Galt.

Miss Mamie Mahoney of Walkerton spent Sunday with her parents here.

Mr. and Mrs. R. M. Spalling of Goderich spent the week end with the former's parents.

We regret to report that Mr. Jos. Clancy was removed on Monday to the Bruce County Hospital at Walkerton and underwent an operation for abcess by Drs. Sinclair, Bricker and Porter and at time of writing is progressing very favorably.

The dry wave struck the burg on Saturday evening as per schedule and now all will be goody goody for the next two years.

Some rumor of increasing the membership of the Peek-a-boo club but it is to be hoped there will be no occasion.

Wedding Bells are ringing in the air.

Don't forget boys to get your hair cuts this week in case the barber goes on a vacation.

Mr. and Mrs. J. H. Vogt. and Mr. and Mrs. Jno. Arscott of Walkerton Sundayed with Mrs. Baillie.

Mr. Elias Baillie of Paisley was a caller in our burg on Sunday.

Pte. Golden of the 160th Bruce Batt. London spent the week-end with his sister, Mrs. Almack, at the parsonage.

The annual meeting of the Women's Patriotic League of Cargill will be held in the Red Cross Hall, on Thursday next, Sept. 28th. at 3 p.m. The report of the years work will be given, officers will be elected and refreshments will be served at the close of the meeting.

HANOVER

Austin Schoenhals of Hanover while playing, fell down the steps at his home fracturing his left arm just above the elbow.

A fire at the plant of the Hanover Portland Cement Co. on Sunday last at noon caused a loss of from four to five thousand dollars, covered by insurance. It is supposed to have been caused by combustion.

The roof and floor of the slurry building were burned, also the greater part of the rotary building. Considerable belting and ropes were put out of business, and quite a lot of damage was done to the machinery.

A serious accident happened to Berthold Gateman on September 6th, while threshing on the farm of Mr. Spielmacher in Bentinck township. In attempting to remove the large belt while the engine was running, he was caught and thrown about the large wheel, badly injuring his face and his right arm between the elbow and wrist. It will be several weeks before he is able to work.

An old settler of the township of Brant passed away on Sept. 13th. at 6.30 o'clock as the result of cancer of the stomach with which he had been afflicted for several months. Deceased was 71 years and 8 months old. He leaves a wife and seven children as follows; Mrs. William Barton and John of Hanover, Mrs. August Lohn of Bentick, Fred of Berlin, Philip of Preston, Christian and Lizzie at home. Deceased was born in Mecklenburg, Germany, and emigrated to Canada when 25 years of age.

An old resident of Hanover moved to Buffalo this week in the person of Mr. James Lockie who accompanied his son Mr. J. A. Lockie to that city on Tuesday, and will make his home there. Mr. James Lockie was a familiar figure on the streets of Hanover for 10 years. He was a well-known auctioneer. He is a strong Liberal in politics and is a member of St. Andrew's Presbyterian church.

Wm. Stade of Brant township while assisting with the threshing at Henry Frook's, fell from the scaffold over the barn floor, badly fracturing his left arm, between the elbow and wrist.

The friends and clients of the late Mr. H. H. Miller will be glad to learn that his son Mr. M. A. Miller, is to take charge of and continue his business in Hanover. Mr. M. A. Miller obtained his B. A. degree from the University of Toronto in the year 1908 and in the year 1912 obtained his L. L. B. degree from the same University and also in that year graduated in law from Osgoode Hall, Toronto. He subsequently qualified as a Barrister and Solicitor in the Province of Saskatchewan and has for the past number of years been practicing law in the City of Weyburn in that Providence as a member of the firm of Morphy & Miller.

SOLWAY

Mr. W. G. McCallum has purchased a new Ford Car.

A few from here attended the Hanover Fair on Friday.

Mr. and Mrs. John Streeder spent Sunday with friends in Formosa.

Mr. and Mrs. Lambertus from Teeswater and Miss Lollie Lambertus spent Sunday at Messrs Wm. and Jno. Lambertus' here.

A few from here attended the party given by Mr. Frank Hanmore at his home near Pinkerton on Tuesday night.

Mrs. John Whitehead spent Sunday at Mr. B. Michell's.

Mr. Jno. Lambertus has disposed of his 150 acre farm.

Rev. and Mrs. Rock called on a few of their friends in this vicinity on Tuesday.

FORMOSA

Mr. and Mrs. Alphonse Zettel, Mr. and Mrs. Ambrose Zettel and Jacob Dentinger motored to Detroit on Thursday and spent the week end with friends there.

On Monday morning at Formosa Church, Rachael Steffler, daughter of Mrs. John Steffler of Culross was united in marriage to Mr. Fred Kraemer son of Mr. Jacob Kraemer of Greenock by Rev. Father Brohman. The happy couple will make their home in Greenock.

The marriage was solemnized on Tuesday at Formosa Church by Rev. Father Brohman, of Miss Rachel Bildstein, daughter of Mr. Edward Bildstein of Formosa, to Mr. Alphonse Vogt, of Otter Creek. The bride was assisted by Miss Polly Vogt, sister of the groom, Mr. Joseph Bildstein brother of the bride, acting as best man. A sumptuous repast was afterwards served at the home of the bride's parents at which a large company was present. The groom has a position as miller at the Saugeen Mills and the happy couple will make their home at Otter Creek.

Penslar- White Pine and Spruce Balsam

This is one of the most efficient Cough Remedies we have ever sold. We hear more good things about it—have more calls for "another bottle" because it stopped my cough last time.

The label tells you the exact formula—white pine bark, red spruce gum, tamarac, wild cherry sassafras, etc.

Loosens and breaks up coughs, relieves difficult breathing and tightness across the chest.

CHIEF FERGUSON

Will Probably Be Retained By Council—Committee Named To Meet Him.

The Town Council will endeavor to come to an arrangement with Chief Ferguson whereby his services may be retained. This was decided at a special meeting of the Town Council on Tuesday night called to deal with the Chief's resignation. All the members were present.

Chief Ferguson stated to the members of the Board that his reason for resigning was that his wife could not stand climbing up and down stairs from the top of the Town Hall building.

The Mayor referred the matter to the Property and Salaries committees, adjourning the Council for a few minutes to allow the committees to deal with the matter. Only three members of these two committees were present at that stage. They brought in a report recommending that the Council accept the Chief's resignation and advertise for a successor. The report was signed by Couns. McCarter and Arscott. Reeve McNab would not sign. He said that Ferguson had given every satisfaction. He didn't know where they could improve themselves. If the Council accepted the resignation they might have a good bit of trouble. A better way would be to meet the Chief and talk it over and see if some arrangement could be arrived at to retain him.

The committee's report to accept the resignation was defeated on the following division:—

Yea—McCarter, Arscott, Russell—3.
Nay—Douglas, Lettner, Pletsch, Warden McNab, Mayor Lippert—5.

An amendent by Warden McNab and Coun. Lettner, that the Mayor and Chairmen of the Finance and Property Committees (McNab and Arscott) meet the Chief and report at a special meeting of the Town Council Friday night at 7.15.

Mayor Lippert thought an arrangement might be made to fit up the Market Hall for a residence.

Coun. Russel was opposed to giving up the Market Hall, which would be needed for Christmas Fair and at other times.

Coun. McCarter did not favor fitting up quarters in the Hall.

Mayor Lippert said he had a communication from the Red Cross Society making an appeal for help. Walkerton did well last year on Trafalgar Day but the need this year is greater and he would like to see the town give more this year. He favoured having a special canvas on October 19th, Trafalgar Day and said he would call a public meeting of the citizens next week to deal with the matter.

Town Clerk Collins said he had an acknowledgment of his letter to the Hydro Electric Commission asking for estimates, stating that the matter had been handed to the Engineering Department.

Wanted

Good general servant. Good wages to competent girl. Mrs. H. M. Lay.

✦ ✦ ✦

Watch Lost.

Lady's gold watch and fob lost Saturday on Durham or Jackson Sts. Suitable reward on leaving at Fox's jewelry.

160TH WILL GO OVERSEAS

In Ten Days To Two Weeks—160th Bruce Battalion Has Orders To Get Ready—Last Leave This Week.

The 160th Batt'n has been ordered to prepare to move. Capt. Allan Todd, Quartermaster of the Bruce Battalion, who was in town yesterday, stated that Lt.-Col. Weir received definite orders at 3.30 p. m. Tuesday to that effect. It means that the Battalion will start Overseas in from ten to two weeks' time. The boys are in fine shape, and are eager to move forward.

The whole Battalion is naturally proud of the result of the inspection by General Lessard last Thursday. The General gave the 160th Batt. 69 per cent for efficiency and stated that the Machine Gun Section, in charge of Lieut. Cameron, is the finest in Canada beyond all question. This is possibly the highest praise that any Canadian Battalion has yet received and both officers and men were "tickled pink."

It is expected that all ranks will be home for last leave sometime before the end of the present week.

HE DIED OF WOUNDS

Heroic Young Chepstow Soldier, Corp. Will Hanley, Made The Supreme Sacrifice On Sept. 4th, 1916.

There will be deep regret felt among his many friends and former school mates in Bruce for the death at the Front, of Willie Hanley. His name appeared in the casualty list of Sept. 18th in both the Montreal and Toronto papers as having died of wounds. The nature of his wounds has not yet been learned, but they must have been severe for it would appear that he succumbed to them soon after having been wounded.

A letter from the nurse in attendance at the hospital states that Willie passed away at 8 p. m. on Sept. 4th. Dr. Thos. O'Hagan received from his nephew three field cards dated Aug. 31st, Sept. 2nd and Sept. 3rd. The latter, which was written the day before he was wounded, stated that he was well. Wounded in May, 1915, Willie passed three months in the hospital in England and then joining the 13th Battalion Royal Highlanders, he returned to to the trenches in Sept. 1915.

His was a brave and loyal heart true to duty both spiritual and temporal. His relatives have heard nothing as yet from the Catholic chaplain as to the passing away of his strong soul but they know that Willie was a young man of splendid faith and character, loyal to God, loyal to his friends, loyal to his King and Country. His was truly a daily preparation for death.

Dr. Thomas O'Hagan writes the Telescope:—

"Since my nephew went to the front I have been in constant touch with him. His three field cards written to me on the eve of his death read to me as a very premonition of the supreme sacrifice he was to make. Before me are two of his last letters written in July and August in which he speaks with confidence of ultimate success of the Allies."

He died for a great cause, his soul purified by his faith and the little grave in which his body rests in a distant land links with its sacred dust, the memories of his beloved land and the sad hearts of those who sorrow for his early going with the cause which all hope to see triumph at the end.

Strayed

From the property of the undersigned, a red heifer with white face, large sized horns, almost due to calve. Suitable reward. Andrew Oberle.

✦ ✦ ✦

Auction Sale

An Auction Sale of household furniture will be held at Miss Weir's, Jackson St. opposite the Methodist Church, on Saturday at 10 a. m. Wes. Abell, auct.

✦ ✦ ✦

Lost Clothes In Fire

Mrs. Dan Wilton had a letter from her son, Pte. Alvin Wilton, at the Front. Alvin states that he is well but had an exciting experience recently when his platoon was burned out in their billet, losing practically all their clothes.

✦ ✦ ✦

Raised $110

The Rummage Sale given by the ladies of the Hospital Aid on Friday and Saturday was a splendid success, the proceeds amounting to over $110. The women were highly pleased with the result and gratified by the support which they received from the women of the town.

✦ ✦ ✦

Musical Treat Free

Free public recitals will be given at Movie land Theatre on Tuesday afternoon next and the following afternoons for a week on the New Edison Phonograph. An expert from the Edison Laboratories will be here to conduct the recitals. For particulars enquire at R. L. Gibson's Jewelery Store.

Moving To Toronto

The news that Miss Weir is leaving town shortly to make her home at Toronto will be received with regret by her many warm friends throughout the town and country. Miss Weir has rented her home to Messrs O'Neill. She leaves for the city next week.

✦ ✦ ✦

Four Presentations

At a Social gathering of the ladies of the Women's Missionary Society Knox Church, on Tuesday evening, the president, Mrs. (Rev.) Thos. Wilson, presented to Mrs. Frank Rennie, on behalf of one of the ladies, a life membership certificate in the W. M. S. Handsome copies of the Book of Praise were also presented to three valued members who are leaving town: Mrs. P. Todd, Mrs. Robt. Smith, and Mrs. James Coulter.

✦ ✦ ✦

Removing Next Week.

In Mrs. Peter Todd's removal to Toronto, the town is losing the last member of a family, which has been well known and highly thought of in Walkerton these many years. Mrs. Todd has been an active member of Knox Church no less than forty-four years, and not only in church circles but by her many friends throughout the town, her removal will be regretted. Mrs. Todd will make her home with her daughter Miss Jean in Toronto. She will leave for the city next week.

✦ ✦ ✦

A Warm Contest

The job of Clerk of the County Court of Bruce, made vacant by the death of Mr. Matthew Goetz, appears to be drawing envious longings from all directions. Dr. Clapp, who, it was generally understood, did not want the job, now has his hat in the ring, and is out to land the "plum." Dr. Fowlie, of Teeswater is another very strenuous contender for the good job. Arthur Collins B. A. is still looked upon here as the likely man. It is understood that the Local Member has been so beset on all sides of late that he is throwing the responsibility of recommending a man for the job over on the Conservative Executive of the Riding.

✦ ✦ ✦

Inglis—Little.

A quiet wedding was solemnized at the home of Mr. John D. Little, Brant on Wednesday Sept. 27th. when his second daughter, Margaret Adelaide, was united in marriage by Rev. Thos. Wilson, pastor of Knox Church, Walkerton to Mr. Roger Attwood Inglis, a prosperous young farmer of the same township. Only the immediate relatives were present. Miss Little is a graduate of Walkerton High School, and taught school in North Bruce up to midsummer. The Telescope unites with their many friends in extending best wishes. Mr. and Mrs. Inglis are having a wedding trip to Toronto, Peterborough and other points.

WELCOMED PTE. WESLEY

Citizens Present Address And Wrist Watch To Walkerton Boy Back From The Front.

A hurriedly got together company of citizens assembled at the Town Hall last Thursday night to welcome Pte William Wesley, who had arrived home the previous day from the Front. Mr. John Rowland who acted as Chairman explained that as Private Wesley was leaving the following day to report at London, and might not be back as he was anxious to return to the Front, no time was given for notifying a large number of citizens. Mayor Lippert, he stated, was out of town. Mr. Roland read an address of welcome to Private Wesley, Warden McNab at the same presenting him with a handsome wrist watch. Pte. Wesley reponded modestly giving a short account of his experiences with the artillery at the Front. Facing this audience, he said, was a good deal harder for him than going into the front line trenches. Others who had a part in welcoming this plucky young soldier were:—H. M. Lay, Rev. R. Perdue, Rev. Thos. Wilson, Pte. Morgan, Coun. Pletsch, R. Russell, D. McKechnie, A. McCartney, G. S. Schwindt, W. M. Shaw, C. Petteplace, John Vogt, E. H. Sheffield, W. J. McNally, L. A. Eedy and others.

Coun. Russell told humorously how he had every confidence that Pte. Wesley would come back safe and sound, relating some amusing incidents of the young soldier's youth which would indicate that he has as many lives as a cat.

Rev. R. Perdue raised the point that there should be a standing reception committee of the town to welcome returned soldiers. Warden McNab stated that a public meeting had been called recently to organize a Walkerton branch of the Bruce Preparedness League which would look after such matters, but only four citizens had turned up to the meeting. It was decided then and there on the Warden's suggestion for the present meeting to adjourn and meet again the coming Thursday evening at the Town Hall at 8 o'clock to form a local branch of the Bruce Preparedness League.

NEWS ABOUT TOWN

DIED A SOLDIER'S DEATH

Corporal Will Hanley
Son of Mr. Timothy Hanley, Chepstow
Died of Wounds, Sept. 4th.

Our report of the School Fair is unavoidably held over to our next issue.

Mr. and Mrs. S. D. Croft of Stratford are the guests of Mr. and Mrs. H. C Hunter.

The Lieutenant-Governor has issued a proclamation urging all municipalities to join a canvas for Red Cross Funds, on Oct. 19th, Trafalgar Day.

Mr. Joseph G. Carter has sold 100 acres of the 150 which he purchased last year from Mr. Chas. Petteplace to Mr. Tony Kieswetter of Greenock. Mr. Carter still has 150 acres.

Rev. C. W. Almack of Cargill, preached inspiring sermons at the Methodist Church on Sunday, and spoke to the Sunday School in the afternoon. Rev. C. W. Cosens preached Anniversary sermons at Cargill.

The Hotel-keepers of Ontario are taking common ground with the temperance people for the first time in the history of the province in deploring the joker that has been found in the Ontario Temperance Act. Prohibition will not have a fair show until the "leak" discovered is closed.

Corp. Ralph Glave was home this week for a few days after completing a special course in signalling at Barriefield Camp, near Kingston. Ralph has gone from the 160th Battalion to the Divisional Signalling Corps where his time will be entirely given up to signalling.

Mr. Tom Howe, who has been ledger keeper at the Canadian Bank of Commerce, left on Saturday for his home in Nova Scotia. He has given up his position in the bank and will enter King's College with a view to preparing for the Anglican Ministry. Though in Walkerton but a short time, Mr. Howe made some good friends and was well thought of.

Mr. James Whitehead has been laid up for several days with bronchial asthma.

Try a pair of Drs. special shoes for fall and winter wear. Sold at Ramsey's Shoe Store.

Miss Barbara Fortune, trained nurse has been visiting her brother, Mr. William Fortune, at Vesta.

Miss Donalda McKechnie, teacher of Shelburne, spent Sunday with her parents, Mr. and Mrs. D. McKechnie.

Mrs. Guest and her daughter, Miss Vivian, of Irvington, New Jersey, are visiting Mrs. Guest's sister, Mrs. L. C. Benton.

Mr. and Mrs. George Walker and little son, have gone on a two weeks' trip to Washington, D. C., and other Eastern points.

Mr. Weir Elliott and Miss Annie Elliott of Wingham spent the week-end at Mr. Frank Rennie's in Brant. Mr. Elliott rendered a much appreciated solo in Knox Church on Sunday morning.

Mrs. J. E. Watts of Toronto, youngest daughter of Mr. and Mrs. H. Watts, was operated on in the Bruce County Hospital by Dr. Stalker, on Friday for internal trouble and is progressing favourably.

The Sacrament of the Lord's Supper will be observed in Knox Church next Sabbath morning. Preparatory services will be conducted on Friday evening at 8 o'clock by Rev. Mr. Whaley of Durham.

Messrs. Robt. and Hank Irwin left on Tuesday on a business trip to the West. They have been shipping horses extensively to the Western Provinces the past year and have gone out to wind up the season's business.

Mr. Joe Reutz's handsome new house on Bilkey's Hill is nearing completion.

Mrs. Wm. Thornton of Toronto is spending a few weeks visiting her mother here.

Mrs. Amos Leech left this morning on a month's visit to friends in Baden, Conestoga and Kitchener.

East Bruce Sunday School Association will hold its Annual Convention at Cargill on Thursday, Oct. 5th.

Sergt. George Wanless of the Stretcher Bearer's Dept. 160th Batt. was a week-end visitor in town.

Mrs. Herbert H. Sinclair will receive on Monday, October 2nd and the following first Monday of every month.

Miss Edna Wilton has returned from a two month's visit to her sisters, Mrs. Chas. Annis and Miss Gertrude Wilton at Toronto.

Arthur Cryderman, who was transferred to the West recently in the Bank of Commerce service, is now located at Lochead, Sask.

Mr. James Wells, has resigned his position at the Rattan factory. His place as foreman of the Reed Room is being taken by Mr. Fred Godwin.

Sergt. Bandmaster G. J. Wright and his sons, Ernest and Herbert, of the 160th Batt. Brass Band, London, spent the week-end at their home here.

The Baptist Sunday School enjoyed a lunch and games indoors on Saturday afternoon. This took the place of the usual picnic which was declared off owing to bad weather.

The regular meeting of the Woman's Institute will be held at Mrs. W. J. McNally's on Thursday, Oct. 5th. It is expected that Mrs. Phillips of Lucknow, District president, will be present.

The Ontario Federation of Liberal Clubs will give a monster banquet at London on Oct. 11. The chief speakers are to be:—Rt. Hon. Sir Wilfred Laurier, Hon. T. Norris, Premier of Manitoba, and Mr. N. W. Rowell, K. C., M. P. P.

Mr. and Mrs. Bert Holderness and Harry of Detroit, Mich., who are here on their vacation, motored to Kincardine Saturday to spend the day accompanied by their sister and Mrs. John W. Freiburger and Miss Minnie Baechler of town.

Mr. and Mrs. Mullins of Hamilton, their neice, Mrs. Kelly of New York, and three Hamilton friends motored here this week in their Six Cylinder Reo on a short visit to Mrs. Mullins' brother, Rev. Father Cummings, who returned to Hamilton with the party.

Those who heard Miss Gladys Thompson, the blind singer of Toronto, at the Baptist Church on Friday evening, enjoyed a perfect treat. She is a young lady of exceptional talent. Miss Thompson also sang at the Sunday School Rally. She is spending a few days in town this week, the guest of Mrs. (Rev.) G. C. Rock.

Mr. Anthony Kritz of Chepstow who had his knee badly smashed by a kick received in a runaway accident was brought to the County Hospital and operated upon last Wednesday. It was found that the knee bone was broken into four pieces and the knee cap torn, and otherwise in bad shape. As Mr. Kritz is well up in years, his condition is causing some concern.

Major (Dr.) Fraser states in a letter to Mr. Arthur Collins that he recently had quarters in a German dugout 80ft. below the ground, perfectly dry, and with all conveniences. He has moved again and is now in an old building. He has become so used to the pounding of the guns that he cannot sleep unless the building is shaking. The Major says that folks at home can have no conception of the masses of men and material that are being used at the present moment.

Mr. John Rowland, who was at Carling Heights on Tuesday, when word came to get ready to move, said it was a matter of great pride to him as a citizen of Bruce to hear the many compliments that were passed regarding the smart appearance of the Bruce boys. One of the inspecting officers informed him that it was the finest battalion he had ever seen in review. Mr. Rowland gives great praise to the senior officers for the system by which the daily routine of the Battalion is managed.

Major John Henderson and daughter Miss Grace arrived home last week from an enjoyable five weeks' trip to Eastern points. They first took the Hudson River trip to New York City, spending eight days at the Metropolis, where they saw most of Manhattan by motor. Later they visited the Major's old home at Huntingdon, Que. where the Major enjoyed seeing many of the old friends of his boyhood days. Major Henderson states that all the American cities he visited were experiencing the industrial boom. The Americans are making big money out of the Allies but apparently take very little interest in the war. One thing that impresses a visitor in New York is the precaution that is being taken against the spread of infantile paralysis. In travelling from one municipality to another, all persons in the neighborhood of sixteen years, have to show a certificate that they are over that age.

PINKERTON FALL FAIR

Drew A Fair Crowd And Good Line Of Exhibits In Spite Of Unfavorable Season This Year—Crowded House For Concert.

One of the best small Fairs in this part of the country year in and year out, is the Pinkerton Fall Show. Though not always strong on quantity, it is never lacking in quality. The exhibits this year were fairly good. The stock exhibits of horses, cattle and sheep were good so far as they went. The Hall was not lacking in ladies' work, a really fine display, and the dairy products and fruit. Apples and roots were especially good, considering the poor season this year. A noticeable feature was the almost entire absence of young men on the grounds. This is a section that has responded nobly to the Country's call for men. The result is that help is mighty scarce on the farm and the farmers are loathe to spend much time getting ready to show stock at the Fairs. This is a condition which has proven detrimental to Fall shows throughout the province to a greater or lesser extent. Pinkerton Fair has been fortunate for many years in having officials that are workers and who have the entire confidence of the community. President John Clancy and Secretary Albert Pinkerton are a team that would be hard to beat and they have a strong board of directors consisting, amongst others, of:—President, John Clancy, Vice-pres., D. Pinkerton, 2nd Vice-pres., W. T. Stewart, Sec.-treas., Albert Pinkerton, Directors, Robt. Perdue, Wm. H. Moffatt, John Stewart, R. M. Gale, John Cruickshank, Alex. Carr, Alf. Garland, James A. Gregg, James Garland, Beeton Wells, Stanley Garland. Board of Management:—Horses W. T. Stewart, Cattle Wm. T. Hepper, Grain Alex. Carr, Roots J. Cruickshank, Poultry Beeton Wells, Dairy & Fruit Wm. H. Moffatt, Robt. Perdue, Ladies' Work, S. S. Garland, Samuel Garland, R. M. Gale, School Work, Jas. A. Gregg.

Notes of the Fair.

Mr. J. A. Gregg had the children's dept. and the races. "Amos" knows just how to handle the kiddies.

The young ladies of Pinkerton had a refreshment booth on the grounds, the proceeds going to the Red Cross.

Inspector John McCool was right at home helping to direct the Children's races and Mrs. McCool acted as judge in the Women's Department.

The Children of Pinkerton school, S. S. McKee teacher, and Bradley school Miss McCurdy teacher, turned out in best bib and tucker and made a fine procession.

The Show put on by the Tiverton Amateurs at night was immense. The Hall was crowded to the doors at popular prices. Sixty-three dollars was taken in, the Fair directors dividing receipts with the local Red Cross Branch.

It was quite like old times to see J. B. Campbell, now of Chesley, shaking hands with his old friends. J. B.'s name was closely indentified with the Fairs a good many years. He was secretary-treasurer and a mighty good one for twenty years.

Mr. Andrew Schmidt, the live President of the Mildmay Fall Show is showing grain and stock at most of the fairs in this district. At the big show at Ottawa for Field Crop Competitions recently he took the first prize in the Province for oats. Andrew is a progressive farmer and a "live wire."

Wanted.

Butter, Eggs, and Onions for cash—C. Patrick.

Will Teach Art

We are losing one of our best public school teachers this week in the person of Miss Madge Sinclair, who goes to Clinton to take a much more lucrative position as teacher of Art and English in the High school. Miss Sinclair has the very highest qualifications for the position and the Clinton Board may congratulate themselves on securing her services. Miss Halliday will take Miss Sinclair's place on the Public School staff.

✦ ✦ ✦

Pinkerton Boy Wounded.

Mr. James A. Gregg of Pinkerton had a wire from Ottawa last Thursday stating that his son, Pte Elmer Gregg, had received a gunshot wound in the shoulder and had been admitted to War Hospital, No. 15, Newcastle England. Pte Gregg enlisted with the 71st. Batt. about a year ago and after arriving in England he was transferred to the famous, Royal Highlanders of Canada, Montreal, "Bath". He is a fine specimen of young Canadian manhood, 19 years of age.

CURRENT COMMENT

Peace, perfect peace, what a thing it has been in Greece.

Russia, besides having an immense reserve of grain, from the last two years' crops, will have a yield of 750,000,000 bushels this year, which is considerably above the average of the past ten years. No danger of a food famine there.

SCIENCE AND THE WAR.

There is a note of supreme confidence tucked away in the morning war despatches, and not featured by red or black headlines. It is a quiet assertion, made especially about the French, but applicable with equal force to the British, the Russians and the Italians. This despatch says that "Behind the French armies there are methods of science, greater science and greater method than in all the much advertised clockwork attacks on Verdun. The Germans are trying to fight the war on lines already laid tary circumstances and every French- have adapted themselves and their tactics to suit each change in military circumstances and every Frenchman knows that he is not 'cannon fodder,' but a unit carefully selected to accomplish a particular piece of work."

Earlier in the war the civilized world was horrified at the murderous uses to which the Germans prostituted their scientific discoveries. It seems reasonable to infer that they expected to win the war in short order by their undersea campaign against unarmed merchant vessels; their murder of women and babies from the air; their fire bombs dropped from Zeppelins, their suffocating and poisonous gases, and their disease infections. These things struck momentary terror into the hearts of their honorable enemies, but science soon overcame the deadly power of the German devilishness and the great victories which the Kaiser's learned men had predicted never came. The recently reported successes of the Russians and of the French and Germans are not altogether due, nor are they chiefly due, to great leaders in the field and great armies of noble men, but to science at home, and the brainy men who have devoted their lives to the study and application of great principles to everyday fighting. All honor to the leaders on land and sea and to the men who have shed their blood without thought of self, but when the story of the war is told the part that the men in the studio and laboratory have done will loom up large. Moreover, the Hun will live to regret the part he took in the degradation of science.

FOR THE FARMER BOY.

How to keep the boy on the farm? The white lights of the city are always big attractions for the boy brought up on the farm, and his school education still further draws him city ward. Still there are many things occurring which are helping the farmer to make it easier for him to keep the boy at home. The electric roads, the rural route, the daily newspaper, the automobile and other agencies at work are bringing the country nearer the city, and making life on the farm in some ways preferable to city life. The question arises, does the farmer sufficiently encourage the boy to stay at home? Are the prospects held out to him bright enough to keep him on the farm?

One of the U. S. agricultural journals, the Farm and Fireside, tells a story that is worth repeating and for the farmer to take to heart:

Last spring, a year ago, a 10-year-old neighbor boy was given 10 cents by his grandmother. He purchased a packet of good cucumber seed with his money and grew a nice patch of cucumbers for the local village market. His crop of cucumbers brought him a little more than $5 in money, all of which his mother allowed him to keep and spend as he pleased. With $1 of his money the boy purchased a few little things for himself, and with the other $4 he purchased a ewe lamb. By this spring his ewe lamb had grown into a mature mother sheep, and she gave birth to two lambs. So now the boy has three sheep from his investment. The mother sheep is now worth $10, and the lambs are worth $5 each, making a total value of $20 he has earned with his 10 cents in a year and a half. Besides he sold the wool this spring from the mother sheep for $2.45, which he has placed in the savings bank as the beginning of a bank account of his own.

This ten cents was a small matter. But its results may shape the whole course of the boy's life. It is not unusual, we are told, for a farmer to give his son a pig or a calf or a sheep and perhaps a colt, but the boy has a rude awakening when he comes from school one day to make the discovery that his property is missing. Father has sold it in his absence and pocketed the proceeds as a matter of course. We suspect, says an authority, that there are many boys now with heads sprinkled with gray who can recall experiences of this kind. It is no wonder that so many youngsters have become discouraged just at a time when they stood at the forks of the highway of life.

Attempt the end and never stand to doubt.—Herrick.

"What do you think of the Don't Worry Club?" "S all right. Only I wish some one would start a Don't Worry Other People's Club."—Boston Transcript.

HER HUMBLE LOVER

CHAPTER I.

"Dear me, oh, dear me! This is very unfortunate—very. Just like Jack—poor Jack!" and the rector of Northwell heaves a sigh and shakes his sleek head complainingly at the ceiling.

The scene is the drawing-room of Northwell Rectory, a comfortable room, looking out toward the sea and the estuary of the Stor. The speaker is a middle-aged man, marked with the usual clerical hall mark—sleek, not to say fat, rather bald-headed, and with a soft, hesitating, nervous manner which is apt to strike one uncomfortably at first sight, and to provoke a smile on better acquaintance. The person addressed is Mrs. Podswell, the rector's wife, a thin, insipid personage, with faint blue eyes, and hair of that color which a humorist has likened to a garden gravel path. The lady is reclining full length on a sofa, her favorite position, and she, too, heaves a sigh as if the enormities of the said "Jack" were indeed hard to be borne.

"What else does the letter say?" she asks, in a thin, querulous voice. "Really, I think it rather inconsiderate of Mr.—Mr.——"

"Mr. Brown, the executor," says the rector, glancing at a letter, which he has been reading in his fat hands. "Nothing else, my dear, excepting that the girl is coming on here at once. It appears that he has duly proved poor Jack's will, in which he directs that she shall be sent to us. He incloses a copy of the will and——"

"Did he die well off?" asks Mrs. Podswell, with a sudden interest.

The rector shakes his head at the ceiling again, and coughs behind his hand with an air of gentle reproach.

"I am afraid not, my dear, I am afraid not. From what I can make out there is just a pittance for the girl, a poor hundred a year or so."

Mrs. Podswell sighs.

"That is better than nothing," suggests the rector, mildly; but Mrs. Podswell shakes her head doubtfully.

"Well, of course, better than nothing in one way, certainly; but—it makes it all the more awkward in another."

"I scarcely understand," murmurs the rector, rubbing his shining chin, and blinking inquiringly at the sharp face on the sofa cushion. In the matter of brains the Podswell gray mare is the better horse. "I scarcely understand, Amelia; surely it is better than if she were left penniless and a burden—I use the word in no uncharitable sense, I trust—a burden to her friends."

"She needn't have been a burden," says Mrs. Podswell, sharply. "Penniless girls are not expected to hang about and live on their relatives. They go out as governesses or companions or something of that kind; and, of course, this girl could have done that. But if she has got a hundred a year, she will be too high for that, and we shall have to keep her at home, I suppose."

The rector nods.

"I see, my dear; I see. No; I suppose she wouldn't care to go out. Being—so to speak—independent; and of course she couldn't live alone. I'm afraid, Amelia, she will have to reside with us."

Mrs. Podswell groans softly.

"One knows nothing about her," she says, querulously. "How long is it since you saw your brother?"

"My half-brother, my dear," corrects Mr. Podswell. "How long?"—and he rubs his chin reflectively—"how long? Dear me! I forget. You see, he disappeared, so to speak, after that unfortunate marriage of his; and—if I may say so—became, as it were, a kind of outcast. Poor Jack!"

Mrs. Podswell frowns.

"The woman he married was an actress, was she not?" she asks, with bated breath.

The rector colors, and shakes his head with mild horror.

"Something of that sort, my dear. But—ahem! as she has been dead so long, it will be better perhaps if we forget her antecedents."

"I can never forget them," remarks Mrs. Podswell, severely. "I shall never look at the girl without remembering that her mother was scarcely a respectable woman."

"I think," suggests the rector, mildly, "that is rather too sweeping a term, Amelia; but we will not argue it. I have little doubt that Jack carefully concealed her mother's history from the child."

"It is to be hoped so," assents Mrs. Podswell. "It is also to be hoped that she has not inherited any of her mother's tastes and manners; though that, perhaps, is too much to be expected. The daughter of a tight-rope dancer——"

"Not, I think, so bad as that," murmurs the rector, very deprecatingly. "I think an actress, my dear, an actress."

"That's as bad," retorts the amiable lady, sharply. "I can draw no distinction. How your brother could have committed such a social crime I cannot understand."

"Jack was always rather strange and eccentric; strongwilled and wild as a boy. He took after his father, so I am told; while I take after mine;" and the rector beams on his boots with pious self-gratulation.

There is silence for a moment and the rector coughs timidly.

"I suppose you have made all preparations for her reception, my dear?" he asks, meekly.

"I have done all that is necessary," answers Mrs. Podswell. "I trust I know my duty; much as I could wish to have been spared this trial, I humbly hope that I shall not shrink from it, Joseph."

"No, no, certainly not," assents the rector, hurriedly. "Certainly not, my dear. I am quite sure that you will nerve yourself to do your duty. After all, she is my brother's child, and though I could have wished that the trust had not been placed with me, I will endeavor to carry it out to the best of my poor ability. This is a vale of tears—"

"If you are going to send to meet the train you had better do so at once," remarked Mrs. Podswell, cutting the threatened sermon short.

"I've sent, my dear," he says, glancing at the clock. "It is almost time they were here."

"Ring the bell, and tell Mary to bring in a cup of tea," murmurs Mrs. Podswell.

The rector obeys, and the summons is answered by a demure domestic, who walks with slow, noiseless steps, and speaks in a muffled voice; and the rector, having given the order, fidgets about the room, rubbing his fat hands, and purring softly like a cat, while Mrs. Podswell resumes her former attitude and stares with half-closed eyes at vacancy.

It is scarcely necessary to set down in plain language that Northwell Rectory is not a lively place. Dull, grim respectability is the presiding genius in the house of the Podswells; everything is done by rule, life is made to measure with the dry accuracy of a two-foot rule; laughter is banished and proscribed as if it were a crime; the very voices of the inmates are hushed, their very footsteps muffled. No, certainly not a lively place, but respectable—very.

The maidservant brings in the tea, and Mrs. Podswell makes an effort and sits up to take it. As she does so the door opens, and a boy comes in.

He is a pale-faced little fellow of nine, with large brown eyes that, as he stands in the doorway, survey the room with a grave, precocious air of speculation.

"Is that you, Archie?" says his father, with an unctuous smile. "Come in. What do you want?"

The child comes in slowly, but, instead of replying, walks to the table, takes up a book, and, carrying it to the window seat, bends over it with an air that almost instantly grows absorbed.

"Archibald, do not crush the curtains!" says the thin voice from the sofa, presently.

The child looks up slowly, puts the book down with an absent, bored expression, and slowly leaves the room.

"Mary, put that book in its place," says her mistress. "Tiresome boy! He makes a litter wherever he goes."

The maid replaces the book on the table in the exact position it occupied before, sweeps a speck of imaginary dust from the cover, and returns to her mistress' side to take the empty cup, just as if she were a machine wound up to execute a set task.

The clock strikes the hour, there is the sound of carriage wheels, and the rector, with a little preliminary cough, remarks: "There she is, my dear."

Mrs. Podswell moans faintly.

"I do hope she will not make a scene. I cannot bear a scene. My nerves are all unstrung as it is. What did you say her name was, Joseph?" sharply.

"Signa, my dear."

"What?" ejaculates Mrs. Podswell. "How do you spell it?"

"S-i-g-n-a," replies the rector.

"What a fearfully heathenish name," says the querulous voice. "I never heard of it before."

"I believe," murmurs the rector, apologetically, "that it was her mother's name."

Mrs. Podswell groans, and the groan is scarcely off her lips when the door opens and a young girl enters.

For a moment she stands with her hands clasped loosely before her, her face veiled, her slim, graceful figure upright as a dart, in perfect repose, waiting to be received; and so smitten by surprise are the amiable pair that she is kept there while the clock ticks a minute. For, veiled as she is, there is something so full of maidenly dignity, of indefinable grace and power in the dark-clad figure, that, to put it vulgarly, the Reverend Joseph and his wife are taken aback. What they had expected they could scarcely have said so in so many set words, but it was certainly not this tall, graceful, distinguished-looking lady that their meagre imaginations had pictured.

The rector is the first to recover himself; with a little cough and the suave smile which men of his class find so useful he comes forward with fat hand extended.

"So you have come, my dear?" he says.

This is so self evident that it scarcely admits of a reply, but the young girl says, "Yes," and puts her long, slim, gloved hand in the short, fat one.

"Yes, you have come," repeats the rector, rather feebly, "and—er—I am sure we are very glad to see you. This, my dear, is your—ahem—Aunt Amelia. Your aunt, I am sorry to say, is not so strong as we could wish; she is——"

The thin figure raises itself upright on the sofa, and extends a claw-like hand.

"I am a martyr to nerves," says the querulous voice. "Have you had a pleasant journey? Won't you sit down?"

"Won't you sit down?" This, then, is all the welcome which the orphan girl is to receive. She is asked to "sit down" after a journey of some hundreds of miles, as if she had but come to pay an afternoon call.

Signa sits down and takes her veil, and the two pairs of eyes watching her, each after their kind, blink with fresh surprise, for just as the curtain screens Ruben's grand picture in the Antwerp Cathedral, so has the thick veil hidden a picture of even greater loveliness; the loveliness of a young girl, fresh, unstained, and refined by a deep sorrow.

The rector, being a slow man, stares at the pale face, with its clear-cut features, its dark gray, weary eyes, and soft, dark, brown hair, in speechless amazement approaching awe; but his wife forces her admiration back.

"I dare say you would like to go up to your room at once," she says, in a business-like way. "Will you have a cup of tea?"

"Or a glass of wine?" puts in the rector, weakly.

The girl shakes her head.

"No, thank you—I am only tired. I will wait—"

"We dine in half an hour," said Mrs. Podswell.

The girl bows and rises, and a lean hand is stretched out to ring the bell.

"Show Miss Grenville her room," says the thin voice, and the martyr to nerves sinks back as if she had done her duty, and a little over.

"Ahem!" coughs the rector, as the door closes. "A—I think I may say a remarkable girl, my dear."

"Remarkable! In what way?" is the irritable retort. "Perhaps you mean extraordinary?"

"Well, yes," he admits, feebly; "that is as good a word. Extraordinary, yes. Dear me! I had no idea she was so beautiful."

"Beautiful!" echoes Mrs. Podswell, with a little snort. "Pray, Joseph, do not let us commence with an absurdity. I did not perceive her beauty. I don't like gray eyes. I may be wrong—I trust I am—but I have always been taught to connect gray eyes with a deceitful temperament. I trust it is not so in this case. But beautiful—oh, dear, no!"

"Well, perhaps not," assents the rector, rubbing his chin timidly. "Not actly beautiful, perhaps, but ex-extraordinary."

"Exactly: that is what I said. I sincerely hope that it was merely fancy on my part, but it seemed to me that there was something cold and unnatural about her manner. If there is anything I dislike about a girl," adds the martyr, in the tone of an icicle, "it is lack of warmth and impulse. Some persons may admire this new-fashioned self-possession as it is called—I do not."

"She seemed very self-possessed," murmurs the rector, shaking his head at the ceiling. "A perfect lady, evidently."

The martyr snorts with a contemptuous air of long suffering.

"Pray don't express such a decided opinion, Joseph. You really cannot know anything about it in five minutes; and if you are going to dress, you had better go; there is turbot to-day, and I don't want it spoiled."

"No, no, certainly not," assents the rector.

And with a last shake of the head, and a deep sigh, as of the most profound resignation under a heavy trial, he glides out of the room.

Meanwhile, Signa has followed the maidservant through a long, winding passage lined with time-stained oak—a passage that in the hands of an artist might easily be transformed into a glorious, picturesque hall, but which at present is in settled harmony with the prevailing gloom—and into a bedroom.

"There is your luggage, miss," says the maid, pointing to an old and battered portmanteau seared with much traveling, and still bearing fragments of many-colored labels, English and foreign. "The dinner-bell will ring in half an hour. Is there anything I can do for you?"

The question is not unlikely put, for the girl has all a true woman's admiration for beauty, even in those of her own sex, and there is something in the lovely face, perhaps its pallor, or the subtle light that shines in the dark grey eyes, that touches her.

"Nothing, thanks," says Signa, sinking on to the bed, and taking off her hat with a little weary gesture, and the maid, after lingering a moment, goes away, and straight down to the kitchen, where she delivers her criticism upon the new comer.

"A perfect lady, and as beautiful as a picture. Poor young thing!"

Signa sits for a few moments on the side of the bed, her eyes fixed on the window with a gaze that assuredly sees nothing of the exquisite view of sea and river, meadows and hills, that the lattice window frames.

Then with a sigh and a smile—it is difficult to say which is the sadder of the two—she recalls her wandering thoughts, that have been skimming backward, and begins her toilet.

"Half an hour the girl said," she murmurs. "It will not do to be late. If I am not mistaken, unpunctuality is accounted one of the cardinal sins in this place. What a place it is!" and she shudders. "He used to describe it as like this; but I never pictured it." "He" was the father gone to rest. "How can it be possible, in God's good world, for people to live in a house like this, to endure the gloom and darkness? But they don't endure it, they enjoy it! Oh, my poor darling, if you could see me now," and she closes here yes, not with tears, but with the same strange smile. "You, whose one aim and endeavor was to make life bright and sweet!" She rubs here eyes with the towel for a longer time than is necessary to dry them, then she looks up suddenly and seizes the hair brushes, and lets down a flood of beautiful hair that has been, and will again be, hidden in the thick coils that nestle so closely on the shapely head. "But I promised him I would not fret and mourn, and I will not! No! Even this dreary place and these poor, miserable people, shall not make me break this promise! Perhaps they are not so bad as they look. Some people, he used to say, are always cold and uncomfortable when they are embarrassed, and I fancy my uncle and aunt—I suppose they are my uncle and aunt—were embarrassed and nervous. They will improve on acquaintance, no doubt, but," with a faint little smile that gives a strange and subtle charm to the beautiful face, "I wish he wouldn't rub his chin, and I wish she hadn't any nerves to speak of."

Clang, clang, as with a long toll like a knell, the dinner-bell sounds, and with a finishing sweep of the brush and that last touch to her neck, which every woman—Heaven knows why—bestows as she leaves the glass, Signa goes downstairs.

As she enters the drawing-room, the rector comes forward to meet her, as if she had kept them waiting for at least a quarter of an hour.

"Your aunt," he says, blushing and rubbing his chin, "has gone in. She always goes in five minutes before the bell rings. Will you take my arm, my dear?"

"Five minutes before," says Signa. "I will remember."

The rector coughs apologetically as the thought flashes or rather dawns upon him that the girl has a beautiful—no, extraordinary—voice.

"I didn't mean to insinuate that you should do so," he says. "But your aunt is—is singular in her habits, and—" they reach the door as he speaks, and he allows the sentence to remain unfinished.

It is not a bad dinner—Signa has often fared worse—but, like everything else in the place, it wants light and life and laughter to make it enjoyable. The rector eats his fish—an excellent turbot, by the way—as if he were trying to look as if he didn't enjoy it; carves the fowl with an apologetic air, and sighs deeply as he inquires if he shall send her the wing or the leg. The maid hands her the vegetables as an undertaker hands the box of gloves round at a funeral, and asks: "Sherry, miss?" in a voice of muffled solemnity.

(To be continued.)

Shredded chocolate cocoanut, which bought already prepared, makes a tasty addition to different kinds of salad.

Indignant Customer—Barber, why did you drop that steaming towel on my face? Barber—Because it was too hot to hold, sir.—Boston Globe.

DAYLIGHT SAVING AND GAS CONSUMPT.

For some time past the officials of the Glasgow Gas Department have been engaged on an estimate as to the effect of the Daylight Saving Act on the amount of gas consumed for domestic and public lighting. After allowing for various factors which bear on the situation, the figure works out at a saving of about 2½ per cent. on what would have been consumed under normal conditions. On the other hand, it is pointed out that this saving is easily counterbalanced by the quantity of gas used in the day time by munition factories for power purposes, while the aggregate used in these establishments is mainly responsible for the huge output for the year just closed.

THE ROAD TO HEALTH

Lies Through Rich Blood and Strong Nerves.

Debility is a word that fairly expresses many ailments under one name. Poor blood, weak nerves, impaired digestion, loss of flesh, no energy, no ambition, listless and indifferent. This condition is perhaps the penalty of overwork or the result of neglected health. You must regain your health or succumb entirely. There is just one absolutely sure way to new health—take Dr. Williams' Pink Pills. These pills will bring you new life, fill every vein with new, rich blood, restore elasticity to your step, the glow of health to wan cheeks. They will supply you with new energy and supply the vital forces of mind and body.

There is not a corner in Canada where Dr. Williams' Pink Pills have not brought health and hope and happiness to some weak debilitated person. If you have not used this medicine yourself ask your neighbors and they will tell you of some sufferer who has been restored to health and strength through using Dr. Williams' Pink Pills. One who has always a good word to say for Dr. Williams' Pink Pills is Mrs. Luther Smith, of West Hill, Ont., who writes: "I feel it a duty as well as a pleasure to tell you what Dr. Williams' Pink Pills have done for me. I had an operation for tumors. The operation in itself was quite successful, but I was so badly run down and anaemic that I did not gain strength, and the incision did not heal and kept discharging for nearly a year, until I weighed only eighty six pounds and could scarcely walk across the floor. I had got so sick of doctors' medicine that I would vomit when I tried to take it. A good friend urged me to try Dr. Williams' Pink Pills, so I bought a box. Before they were gone I thought I could feel a difference, and I got a further supply. By the time I had taken five boxes the wound ceased discharging and commenced to heal. I took in all thirteen boxes and am to-day enjoying the best health of my life and weigh 140 pounds. I sincerely hope anyone suffering as I did will give Dr. Williams' Pink Pills a fair trial, and I feel sure they will not be disappointed."

You can get these pills from any medicine dealer or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Baffled.

The word baffled now has a meaning entirely different from that applied to it 300 years ago. It is now understood to mean thwarted, foiled or disappointed, but then it was applied to the process of degradation by which a knight was disgraced. A baffled knight was one who had been pronounced guilty of conduct unbecoming one of his order and had accordingly been shorn of his plumes, his sword was broken before his eyes, his knightly robe torn away, his spurs cut off with a cleaver, and after being publicly chastised he was declared to be baffled. The word is used in this sense by Shakespeare and other writers of that time.

Those who have insured their remembrance by their deserts.—Virgil.

Vagabonds.

In Japan I bought six vases, all alike, of cloisonne.
For I thought me of the weddings back at home in U. S. A.
And the weary hunt for gifts to give away.

When I landed, old Tom Taylor was about to wed his Grace;
So I packed me up two cloisonne and sent them on apace,
In the hope that they would fill some empty place.

And when Jimmy married Helen I reduced the lot by four,
To be startled, at the function, when I reached the gift-room door;
For I found that some one else had sent two more.

Six months later George and Vera got the last two of my stock;
And I ambled to that wedding and another painful shock
When I saw six odd-shaped vases in a flock.

Time has passed, and Beth has trusted me enough to be my wife;
And the honeymoon is over, and we settle down to life
In a snug apartment decked with presents rife.

In our den we have six vases, all alike of cloisonne—
Sort of pals—they seem to know me and I want to see them stay,
But—my Beth received two wedding cards to-day.

—Charles Elkin, Jun., in Life.

No More Corns Cure Guaranteed

Never known to fail; acts without pain in 24 hours. Is soothing, healing, takes the sting right out. No remedy so quick, safe and sure as Putnam's Painless Corn Extractor. Sold everywhere—25c per bottle.

"HEATHER-BELL."

(For a bit of early heather from Whistlefield.)

I've got a bit of heather in my breast,
It's come to me from Scotland, o'er the sea;
It brings a touch of quietness and rest
From many who are very dear to me.
I'll wear it in the fight,
In battle for the right,
And serve with all my might,
"Heather-Bell."

You have got the crimson hue,
"Heather Bell,"
You remind me how to live, for my land;
I shall ever strive to do, and to tell
Of comrades true, how they fought, gallant band,
I'll wear you in the night
And morning's shining light;
Inspire me to do right,
"Heather-Bell."

—R. W. Dobbie.

Minard's Liniment Cures Diphtheria.

STAINS OF THE SEASON.

To remove pickling stains, wash the hands and dry slightly; then strike a sulphur match and hold the hands over and around it to catch the fumes.

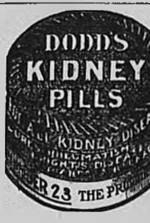
Fruit stains may be removed from white fabrics by moistening them with a solution of bleaching powder or javelle water, followed by a solution of one part muriatic acid to five of water.

Mildew stains should be steeped in a solution of washing soda, then apply a solution of bleaching powder or javelle water, and then a solution of one part of muriatic acid to five of water.

To remove stains from paring, rub the hands with the inside of apple or pear parings before using soap.

A general recipe for removing fruit, wine, ink or mildew stains is first to wet the stained place with clean cold water; then apply a lotion made of one tablespoonful of lemon juice, one tablespoonful of the purest cream of tartar and one teaspoonful of oxalic acid; put all into a pint of distilled water (or rainwater), shake it before using, and apply with a soft cloth till the spot is saturated with the lotion, then sponge it off again in clean cold water. If the stain does not altogether disappear, repeat the process till it does.

Tommy—Pop, would you call a letter stationery? Tommy's Pop—Yes, my son. Tommy—Even after you put a stamp on it, and mail it?



CONVALESCENT CHILDREN.

How to Amuse a Child Doomed to the Bed Awhile.

A child recovering from an illness is apt to be fretful and peevish, demanding any amount of patience on the part of a mother or an attendant.

If the child is a boy modelling in clay will be found entertaining, and by helping him form different animals and houses many an irksome hour will be whiled away. If a girl, try paper flowers or paper dolls. Children also enjoy making scrapbooks. Cut attractive pictures from old colored magazines, for it should always be remembered children like bright colors. Young children can cut if they are not competent to paste.

Never let a child who is recovering from an illness sew, for it will prove tiring, the work being too intent, whereas paper clothes for dolly are sure to be enjoyed without fatigue.

A pair of toy scales and supplies, in the shape of rice, sugar, raisins and salt, to keep shop, will please a small child, and mother, of course, will do the buying.

Expensive toys are not necessary to make a child happy, for nine out of ten will prefer some simple homemade affair or an amusement they create for themselves.

Minard's Liniment Co, Limited.

Gentlemen,—In July, 1915, I was thrown from a road machine, injuring my hip and back badly and was obliged to use a crutch for 14 months. In September, 1906, Mr. Wm. Outridge, of Lachute, urged me to try MINARD'S LINIMENT, which I did with the most satisfactory results and to-day I am as well as ever in my life.

Yours sincerely,
his
MATTHEW x BAINES.
mark.

Turtles and Tortoise.

Turtle is a treat.

Green turtle is delicious.

Turtles thrive in warm regions.

The best turtles come from the West Indies.

The usual way to prepare turtle is by boiling it in the shell.

In Brazil the cook roasts steaks from the breast and lean parts.

Turtle sausage is made from the stomach and other interior portions provide soup stock.

In Europe tortoise is frequently eaten, being fattened on bread and lettuce for table use.

The French like the mud tortoise, as also do the Italians and Greeks, who cook its flesh and eggs.

Green turtle does not get its name from the dark olive color of its shell, but from that of the fat, so much prized by epicures.

Minard's Liniment Cures Distemper.

Try These Short Cuts.

There are all sorts of short cuts for sewing on the market. The endless task of working buttonholes may be eliminated by using the worked buttonholes, which may be purchased by suitable for the little folks' underwear. They come worked in fine lawn for shirt waists and the little girl's dresses. The trying task of sewing on hooks and eyes is not now necessary, when they can be bought by the yard ready to be stitched into place. In making a fitted lining it is well to sew on these fastenings before it is fitted in order to secure a good fit. If the spacings between the hooks is too wide in some places where there is a strain it does not take long to sew a few on at these points. If, however, you do sew on hooks and eyes you will find it much less difficult to keep the thread from showing through on the right side if you will slip a piece of whalebone into the hem. If the hem is too wide for a whalebone cut a heavy piece of cardboard the proper width and slip that in.

SELECT MEDICINE CAREFULLY

Purgatives are dangerous. They gripe, causing burning pains and make the constipated condition worse. Physicians say the most ideal laxative is Dr. Hamilton's Pills of Mandrake and Butternut; they are exceedingly mild, composed only of health-giving vegetable extracts. Dr. Hamilton's Pills restore activity to the bowels; strengthen the stomach and purify the blood. For constipation, sick headache, biliousness and disordered digestion no medicine on earth makes such remarkable cures as Dr. Hamilton's Pills. Try a 25c box yourself.

AN INGENIOUS SNARE.

Uncanny Insect Trap With Which the Pitcher Plant is Armed.

No trapper ever invented a snare for his prey more ingenious or a trap that ever had a higher percentage of "catches" than the pitcher plant, for few insects ever escape from the clutches of this horticultural meat eater. He catches them; holds them, drowns them, and finally eats them.

And while he's doing it he smiles so innocently and prettily that you would imagine him one of the quietest and most peaceable flowers of the woods.

His leaves are his insect traps. They are a greenish purple and hold together like a cornucopia, with a half closed lid covering the top. The inner walls of this "pitcher" are lined with hairs, which point downward and are covered with a sweet, sticky fluid.

This fluid is regular "candy" for the bees and flies. The insect enters the half closed door of the pitcher, tastes the honey and begins to explor the interior. As he crawls forward the hairs bend with him and give him free passage. But when he tries to return he finds that these hairs are veritable barbed wire entanglements to keep him a prisoner.

The insect tries to fly out, and the curve at the top of the pitcher bars his way. He dodges this way and that, bewildered, until he tumbles in a little well at the bottom of the pitcher, where he drowns.—Exchange.

You must make a lover angry if you wish him to love.—Syrus.

ISSUE NO. 8

HELP WANTE

WANTED—GIRLS TO knit underwear— ished stitchers preferred. learners, any girl with good of plain sewing; good wages; id tory conditions. Zimmerman M turing Co., Ltd., Aberdeen and streets, Hamilton, Ont.

WANTED — HOUSEMAIDS AN waitresses. Previous experience not necessary. Apply, "The Welland", St. Catharines, Ontario.

MISCELLANEOUS.

WANTED—GIRLS OF GOOD EDUCAtion to train for nurses. Apply Wellandra Hospital, St. Catharines, Ont.

LADIES WANTED.

TO DO PLAIN AND LIGHT SEWing at home, whole or spare time; good pay; work sent any distance; charges paid. Send stamp for particulars. National Manufacturing Company, Montreal.

GIRLS WANTED

Experienced knitters and loopers, also young girls to learn. Clean work and highest wages.

CHIPMAN-HOLTON KNITTING CO., LIMITED,
HAMILTON, ONTARIO.

"IRON RATIONS" AT THE FRONT

A New Zealand soldier, writing a lady in Glasgow, says: "It is impossible for you to know the satisfaction it gives us men to know th the people at home are now giving tons of munitions, thousands shells, more guns, more stores, a better rations. It makes one feel comfortable inside when Fritz is bombarding to know that we can give him as many "iron rations" as he gives us; and we give it to him, too. It would make your heart glad to hear our guns rumbling and roaring sometimes, making up to Fritz what we owed him long ago.

BETTER THAN SPANKING

Spanking does not cure children of bed-wetting. There is a constitutional cause for this trouble. Mrs. M. Summers, Box W 8, Windsor, Ont., will send free to any mother her successful home treatment, with full instructions. Send no money, but write her to-day if your children trouble you in this way. Don't blame the child. The chances are it can't help it. This treatment also cures adults and aged people troubled with urine difficulties by day or night.

ORIGIN OF THE PENNY.

The "maiden name" of the penny was "denarius," and the English penny is a survival of the Roman rule in the British Isles. Like the coin which preceded it in Rome, it has been debased in value until its name has lost its original meaning. The first denarius was minted in Rome about 268 B. C. and was the principal silver coin of both the republic and the empire. It at first weighed seventy-two grains troy and was as nearly pure silver as durability would permit. It bore on one side the helmeted head of Roma and the mark X and on the other side the images of Castor and Pollux. Later these twin gods were replaced by the head of the Roman emperors. By 218 A. D. the coin had deteriorated in value until it was fully 40 per cent. silver. The X, which signified the value of ten asses, had wholly lost its meaning. Diocletian finished the degradation of the denarius by applying the name to a small silver coin. In England, the largest silver coin was called denarius at a time when the English florin was called a gold penny.

Minard's Liniment Cures Colds, Etc.

That Untidy Top Drawer.

Much is gained if, instead of making linings or pads for the bureau drawers, the drawers themselves are made dainty and ready for the receptacles of articles.

First give the inside as many coats of white paint as are necessary to give a clear white tone, and then a coat of white enamel. This gives a perfectly smooth surface, which is fresher than any other lining could be.

The drawers look neat and attractive, and when cleaning is desired a simple wiping with a damp cloth produces perfect cleanliness.

The same idea could be carried out with all shelves, cupboards and drawers in the house, whether for linen, china or kitchen utensils. They are more easily cared for than when arranged with other covers. This process makes a good substitute for the highly recommended glass shelves.

HARMONY THERE.

(Christian Advocate.)

Papa (sternly)—Come here, sir! Your mother and I agree that you deserve a good sound whipping.

Small boy (bitterly)—Oh, yes, that's about the only thing that you and mama ever do agree about.

Off to the Front!, Put yourself in top-notch condition by eating **Shredded Wheat Biscuit**, a food that supplies the greatest amount of body-building material with the least tax upon the digestion. You cannot get to "the front" in any business with a poorly nourished body. Delicious for breakfast with sliced peaches and cream.

Made in Canada

s and Spying As Shown by War

Repeatedly since the outbreak of the war has the thoroughness of the German Secret Service system been demonstrated, but as a matter of fact the extraordinary extent of German espionage at the front and elsewhere has never been properly realized; its subtle ramifications are more astounding and far-reaching than anyone has ever given them credit for. All our alien restrictions in this country have been far too flabby and feeble for such an army of accomplished schemers, and it is quite impossible to estimate the grievous amount of harm that has been caused on account of this strange ineptitude.

Happily, the authorities are now dealing much more firmly with the spy peril in our midst, and twelve of those dangerous adventurers have paid the extreme penalty in the Tower of ondon—most of them within the last few months. How necessary it still is to be ever on the qui vive for the cunning emissaries of the unscrupulous Hun was strikingly evidenced a ort time ago by an incident at one he London railway terminals.

HIS SPEECH BETRAYED HIM.

lot of men in khaki were moving t, including one who was wear a staff officer's uniform. He was ing apparently with unconcern ng the crowd when a man, rush past him to catch a train, trod ily on his foot. A lady standing distinctly heard a muttered German imprecation. She said nothing but ly strolled away and lodged her mation with the stationmaster. official seems to have taken mpt measures, for a few days af the lady who had shown such dy presence of mind received a substantial check from the War Office in ecognition of her services to the State.

IN FRANCE.

In France probably an even more extraordinary state of affairs exist. Previous to the war and at the present moment there is a most complex system of German military espionage, modelled on the lines laid down by Stieber, "the sleuth-hound of the Prussians," who played so vital a part in securing secret information prior to the Franco-German War of 1870.

Astounding as it may appear, it is nevertheless stated as an actual fact that when the present conflict started the German Secret Service comprised no less than 30,000 individuals of both sexes distributed throughout France, in its garrison towns, at railway junctions, and in localities in the neighborhood of strategic points and places of concentration of troops. They had spied out the land from end to end, and German secret code signs were distributed everywhere.

A characteristic example of this Teutonic espionage is told by Miss Phyllis Campbell in her book, "Back of the Front"—a volume which teems with some of the most vivid pen pictures yet presented of the horrors of the great war.

STREET FAKIR SELLING NUTS.

She relates how, in the early days of the war, while waiting at a Paris railway station for a newspaper, they saw a very familiar figure standing by the pavement— a man with a tray of nuts suspended round his neck.

He was a tall, soldierly figure of a man—distinguished in appearance, but shabby and soiled to a degree. Gossip said he was an English officer who had been ruined by a famous Paris actress. For seven years he had stood between the church and the chateau selling nuts —never looking one in the face, never speaking.

"As we watched him, suddenly from the soldiers came a typical Paris gamin—ragged, hatless, impudent, and barefooted—evidently drunk. He reeled on the edge of the pavement and cannoned against the seller of nuts, whose wares were flung broadcast by the contact. Instead of apologizing, he thrust his hand through his hair and said something in argot—and there was a roar from the soldiers.

The seller of nuts looked wizened with rage—and his retort, when it came was bitingly satirical. The gamin wheeled around and spat in his face—and, like a flash, the seller of nuts became a soldier—an officer—a gentleman—a spy. The soldiers closed around him—that volley of horrible cursings was in pure high German. The gamin was a famous French detective, and the seller of nuts a Prussian nobleman, an officer of high rank."

At the front—on the actual field of battle—the same extraordinary enterprise has been shown on countless occasions, and many German spies have been caught in such diverse disguises as Belgian officers' uniforms and priests' and nuns' robes, as well as in the simple attire of stolid and unimaginative countrymen—field workers and others.

THE OLD FARMER.

The daring and ingenious fashion in which the position of certain French artillery batteries was communicated to the enemy may be cited as a case in point. Under cover of a wood the guns were so skilfully placed that even the French infantry were unaware of their exact position. In front of the position was an expansive plateau, and beyond that were the German lines.

Presently an old farm hand emerged from a lane, guiding a horse-drawn plough. There were two horses in the team. One was white and the other roan. Quite freely the gunners commented upon the acute contrast. He was a typical French peasant, and the soldiers were lost in their admiration of the coolness—or carelessness—which could permit the old husbandman to start ploughing even whilst a battle raged around him. Soon, however, they were induced to regard the situation in rather a different light, for scarcely had the old fellow addressed himself to the first furrow than shells began to rain upon the French batteries.

The supposed ploughman was a spy, who, by means of his conspicuous team, had given away the gun position. They never saw him again, but it was not for want of trying.

A clever ruse of German spies is to so mark buildings they have deserted that later an aeroplane can fly over and drop bombs on to the shelter when it is captured by the Allied troops.

THE WHITE GOAT.

Near Antwerp during the early months of the war, a large country house was abandoned by the Germans—unwillingly, we may correctly assume. The Marines captured it, and found a white goat staked on to the lawn. They thought the animal must be a deserted regimental mascot, so left it to its own devices.

A few hours later an aeroplane hove in sight and circled over the house, dropping a number of bombs, which killed several Marines sitting under the trees. The white goat was a guide to the aviator as to the exact position of the house.

Spies are indisputably an indispensable and integral part of every army in the field, and it is not overstating their value to say that many a battle indeed has been won simply by "information brought in." The services of these men are frequently simply priceless, and their reward is often ample.

It may well be asked—Who are the daring spirits undertaking this perilous work—for dangerous in the extreme it undoubtedly is. If caught, there is no formal trial, full of legal technicalities, no counsel for the defence, no chance of appeal. A little trench is dug, a squad of soldiers faces the prisoner, and he falls dead into the ready-made grave.

The men who face this fate are frequently local residents who have a good knowledge of the enemy and the country. Maybe they have friends amongst the foe: and until they feel they are becoming suspected, they come and go, gleaning all the information they can.

BORN, NOT MADE.

Others, again, are men who—and there are many of them—are born spies. Wily, intelligent adventurers they may be, often masters of a number of languages, and endowed with a natural gift for wriggling out of tight corners. Wherever war threatens there they flock. By day they mix with the enemy, helping eagerly, perhaps, with his preparations. When night falls, disguised, they sneak out from the lines and make their way to the adversary's camp to whisper the secrets they have learned.

There are various ways, of course, of imparting information thus acquired. Take, for instance, that case of the audacious German informer in the British lines on the Aisne River, who contrived to carry an ordinary field telephone about with him. He was a man with a wooden leg, and round this leg he wound the long stretch of wire by which he communicated with German headquarters, far away over the distant wooded ridge to the north. He had a small special kind of instrument hidden beneath his coat, and by attaching this to the wire carried round his leg he sent messages about the positions and movements of the British troops.

His dodge was to dress up as a French cripple and wander round our trenches begging for food. Then he would hobble away to a quiet, lonely spot to make his meal. But one day he was found busy at one of these meals—the wire uncoiled and the instrument working—and a squad of our men put him against a cottage wall.

WOMEN SPIES.

An extraordinary story of how women spies betrayed the position of French gunners is told by a French artilleryman named Paul Betty — a story of French women who for the sake of German gold betrayed their own countrymen to the enemy.

It occurred in the early months of the war, and when Betty's battery had been fighting incessantly for more than a month in the Marne Valley. In one place where the German fire had been more than usually accurate, it was discovered that there were in the neighboring village women spies in the pay of the Germans—there are individuals of this sort, who are innocent of the slightest germ of patriotism and sell their services to the highest bidder. They furnished the enemy with reliable information as to the movements of the French troops and the position of the French guns.

At nightfall three of the women were in the habit of going to the enemy's trenches, crossing the battlefield and stopping occasionally on their way to plunder the dead soldiers of both armies. By means of dark lanterns they announced their approach to the Germans, who in consequence were careful not to fire upon them.

On the eve of the departure of the French troops from the district, one of the delectable band went to the local Mairie (or Mayor) to negotiate for the purchase of a piece of land on the outskirts of the village, where, she declared, she wished to instal a hospital for French wounded. The Mayor, becoming suspicious, questioned her closely and under examination she broke down and confessed the truth. She was searched, and in her handbag were found six purses, a quantity of jewelry, and a number of letters in German. The captured spy denounced her two accomplices, and the three were tried and found guilty, and next day, according to Betty's narrative, all three were shot behind the cemetery wall. Over the graves was placed a wooden tablet with the following inscription: "Eternal shame upon treacherous women, who robbed the brave dead fallen on the battlefield in defence of their country; eternal shame upon the women enemies of the Motherland."

TRIAL BY FIRE.

Women have been associated with some of the most subtle schemes known in the secret service. Quite recently, indeed, a clever female spy was captured at the French frontier seeking to enter Switzerland, and presumably intending to return to Germany or Austria. Certain of her actions drew upon her the special attention of the authorities. The usual examination, however, revealed nothing.

One of the cleverest officers of the French secret service was, nevertheless, detailed to further test her. But so well did she enact her part that even he for a time was baffled. As a matter of fact, it was not until seating her in an undraped condition tied to a chair, with her back exposed to a warm fire, that he at last discovered—what do you think?—nothing less than the plan of a most important French fortress traced on her back! Everything of importance about the fortress, including the number of guns, their sizes and positions, were clearly indicated. Since the war started this particular stronghold has been practically reconstructed with extensive alterations and additions, hence the anxiety of the Huns to acquire particulars of these.

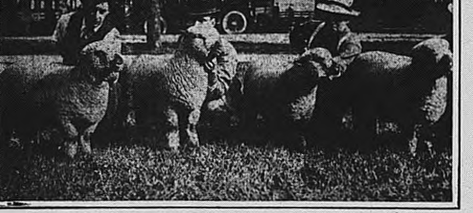
A German military spy in France desired knowledge, but to get home to the Fatherland with it was another matter. It was then that he turned to the female spy accomplice as an innocent-looking agent.

As is well known, there are various forms of writing on the skin which only become visible under certain conditions. In this case the master spy chose sulphate of copper as the medium for tracing the plans of the fortress upon the back of his confederate. Under normal conditions such a tracing leaves no mark, and it is only when exposed to a strong heat that it shows up dark blue.

Only one expert "spy trapper," of course, would have thought of putting the fair spy to such a rigorous test, which once more shows the wisdom of setting a spy to catch a spy!

Preparing Sheep and Hogs for Exhibition

A Veteran of The Show-ring Tel's Beginners How to Connect With the Prize List.



Not always the animal of superior individuality wins—much depends upon the exhibitor in fitting and showing his sheep. Mr. Harding tells what to do and how to do it.

As we are again face to face with the exhibitions where so many of us go to make history, it is all important that we put our right foot forward, as it were, so as to be in the best possible shape for winning our share of the honors, not so much for the direct cash benefit that is offered in prizes as for the future trade that naturally comes through winning. It is now too late to do any fitting with feed. He is an expert indeed who can carry his stock through the exhibitions without them losing flesh especially if they are sheep and hogs, largely because they are difficult stock to exercise. About all that we can hope to do now is to put on the finishing touches, which, by the way, have not very much effect with the judges, but they please the eyes of the onlookers, who are the future customers.

HOGS THAT WIN THE RIBBONS.

With hogs, as practically all the older exhibitors of what we might term the professionals know, a good start goes a long way toward a successful finish. When I say a good start I mean having the right type to start with, so that when the finish is put on just to the desired point, everything is there to please the judge. Now, then, having those two qualifications when leaving home, all that is left to do in so far as the hog is concerned, is to clean him up, trim his toes, if this has not already been done, exercise him sufficient to keep him supple, feed lighter foods than he was used to at home, so as to ward off sluggishness, and last, but not least, show him well. While the whip is an excellent article for use in showing hogs, I have often watched men constantly tapping a pig across the nose, while the judge is looking him over, thereby swinging him back upon his pasterns and humping his back up, when the very opposite was necessary just at that moment. I admire the man who shows his animal to the very best advantage. If your pig is a graceful walker, keep him walking; if not, keep him as quiet as possible. Always keep at least one eye on the pig; too many keep both eyes on the judge. Good exhibition counts a whole lot more than the beginner usually imagines.

The finishing touches at the last minute are very much more important with sheep than with the hogs, and require more expert knowledge as they have to do with putting the fleeces into the finest possible shape and keeping them so. But, as I have said before, this has not got so much weight with the judges as it has with sightseers. A good judge knows the good sheep before it is trimmed. The trimming, carding, brushing and clipping should be done a couple of times before the sheep leave home, to work the ringlets apart and make a dense or solid appearing surface. This of course applies chiefly to the medium wooled breeds. While the exhibitors of long wooled sheep use the shears much more now than formerly their work with the fleece is largely to divide the large ringlets into smaller ones and to pick out straws and chaff.

HANDLING SHEEP IN THE RING.

As in the case of hogs, feed sheep less heavily on fattening grain than they were used to at home and give them all the exercise possible. If their feet have not been trimmed before they left home be sure to do it before they enter the prize ring. Many a good sheep has failed to win simply because its toes had grown out of shape, giving it the appearance of having weak pasterns. As you are about to enter the ring remember you are on exhibition as well as the sheep, and that the sheep may fail to win simply because you didn't do your part. See that your sheep has all four legs placed squarely under it, else it will show weakness somewhere under the judge's hand. Study the methods of the best showmen—they never let their sheep get out of position even after the judge has passed along; they realize from years of experience, perhaps, that the judge is frequently glancing over the ring making comparisons, and it is possible that he may decide in favor of yours even while in the act of handling another.

If I might say a word to exhibitors in general I should say to all, play the game honestly and fairly and take the medicine as handed out by the judges without a murmur. You may not get just what you expected, and at the same time may be getting more than your opposition would agree that you are entitled to, and still be getting the judge's honest judgment. Judges, like exhibitors, are only human and are liable to make mistakes, and while possibly at times there are wilfully dishonest decisions made, I believe that for the most part live stock judges go into the ring determined to place the ribbons where they rightfully belong. But as long as time will last our judgments will differ, and even if at times the job may be too big for the judge, if he is honest you will get a fair share of the prizes even though they may not be placed as you think they should be. It usually pays to take what you are offered, with a smile.

BEGINNER SHOULDN'T BE DISCOURAGED.

Sometimes new exhibitors who have never shown before at the large exhibitions are so wrapped up in their own stock that they fall flat, as it were, when they fail to win a large share of the premiums. To such an one let me say, that unless you have had an experienced herdsman or shepherd to select your stock and fit it for you, you should not expect to win much the first year against men who have not only exhibited for many years but who have spent a good part of their lifetime selecting and breeding with a fixed ideal in their minds. Anyone can fatten an animal, but it requires an expert to develop an animal and finish it, keeping it active and sprightly, straight on its pins and in showyard bloom at the right time. Such men are few and far between, so to the new exhibitor let me say, don't expect to reach the pinnacle of success at your first show that it has taken others years and years to reach. The experience of the first year or two will be valuable to you later on.

Some say the stock show is the same old thing year after year, but I think the average exhibitor realizes that to meet the changes in types demanded they require to be a little better year by year and that the same old thing will not suffice. Some things that may look small to the new beginner (such as black wool, crooked legs, wiry or open fleeces, etc.), have been difficult obstacles to overcome, and it is naturally to be expected that the veteran has accomplished more along those lines than the amateur, and is likely to win more on that account.

But I often think that we sometimes allow flesh or fat to win when it shouldn't. I don't mean to say that fleshing evenly distributed isn't very important in the show ring, but I do think that breed, type, or what some call character, should be given more preference than many are inclined to give it. In other words, I don't think that (in a breeding class) a pig or a sheep, off in type and on broken-down pasterns, although loaded with flesh should win over ones of the desired type, up straight on its pasterns, even though the latter is not carrying sufficient flesh. Just give him sufficient time and the good feeder can make any animal fat; but years of careful selection and mating has been required by the expert to combine the fine points which go to make up what we might call breed type.

—CANADIAN COUNTRYMAN.

A V-neck round cut collar promises to be fashionable this fall. This model was selected as standard for the coming season.

WAS KITCHENER'S JOB.

(Tit-Bits)

At a military church service during the South African war some recruits were listening to the chaplain in church saying, "Let them slay the Boers as Joshua smote the Egyptian," when a recruit whispered to a companion: "Say, Bill, the old bloke is a bit off, isn't he? Known it was Kitchener who walloped the Egyptians?"

"I never hear you discussing the weather." "What's the use?" the melancholy man asked. "Every time it rains somebody steals my umbrella, and every time the sun comes out I get ink spots on my Palm Beach suit and have to send it to the cleaner."

Birmingham Age-Herald.

ZEPPELINS

From "Zeppelins and Super-Zeppelins," by R. P. Hearne.

When in war trim the latest sea-going Zeppelin has a range of action of about 500 miles, that is 250 miles out and 250 miles back. By having replenishing stations near the coast, or in Belgium, a ship can extend the voyage, however. Germany has built up Zeppelin stations in many parts of the country, and also in Belgium, and thus the ships have a wide range of action, and a considerable choice of harbors or places of refuge or replenishment. In the raids upon England one of the North sea air ports such as Heligoland, Kiel or Emden is generally employed. From Emden the 250-mile radius brings the raid zone over an arc of England ranging from Brighton via London and the Midlands to Hartlepool.

If the Zeppelin, when attacking England elected to retire to Belgium instead of to Emden, the return trip would be so much shorter than England could be [illegible] still farther, and on this basis it cannot be said that any part of England is outside the range of the ships. But London is the great objective of the raiders.

Practically every capital in Europe is within the Zeppelin range, but when we come to consider the limitations of the ships it will be obvious that the Zeppelin is not yet developed to a point in which it could make anything more than political demonstrations, and the local damage done would hardly justify the attempt. But the case of England, and especially of London, is peculiar. Any blow against England feeds German vindictiveness, for undoubtedly Germany did not reckon on the prompt participation of England in the war, and she knows that British intervention has spoiled her chance of [illegible].

The German is a bad loser, and he has an hysterical strain which incites him to blind rage and fiendish revenge. German hatred of England is so intense, especially as the war drags on, that any crime against England pleases the baser element of the German race. Murder raids on England have given extraordinary satisfaction in Germany; and in addition to the gratification of revenge and murder lust and the appeasing of national vanity, there has been a shrewd estimation of the effects upon neutrals. The Zeppelin raids on London during the autumn of 1915 were cunningly designed to influence the Balkans, and Germany, with her wonderful news organization, was able to tell grim stories of London in ruins, and of a panic-stricken people helpless under the German bombardment.

The echoes of the bombs dropped on London were, so to speak, heard in the Balkans, and the many unfortunate affairs which followed the raids show how dearly we paid for our helplessness. In those critical weeks if we had possessed a fleet of airships which could have raided Germany, the whole situation might have been different. In themselves the raids were minor incidents, but they furnish a fresh proof to wavering neutrals of Germany's power and superiority. For the allies this was a most unfortunate circumstance.

You never can tell. It isn't necessarily the man of many parts who goes to pieces.

Resembling the folded white squares of the Puritans is this dainty white collar. It is one of the popular ones shown at a competitive exhibit of standard styles for the coming season.

TIRELESS INSECTS.

Built for the Strenuous Life, They Are Never Weary.

In "Insects, Their Life Histories and Habits," Harold Bastin, the entomologist, says that, contrary to popular belief, spiders are not insects. Insects have six legs, neither more nor less, and another peculiarity of the insect is that it has wings, sometimes two, more often four. Spiders have eight legs and no wings; therefore spiders are not insects.

Insects have no backbones and no skeletons, says Mr. Bastin, but skins with a hard, durable surface called chitin, which makes up a light shell of armor that forms the outside of the body, to the inside of which the muscles are attached.

Insects do not breathe through their mouths, but through holes in their bodies, called spiracles. Insects have neither veins nor arteries. The blood is pumped directly from the chambered heart into the body cavity, where it bathes and nourishes the organs. Insects have wonderful and enviable digestive organs and feed upon and digest almost any substance from which nourishment may be extracted.

Because of the way they are built insects are particularly fitted for the strenuous life, and a tired insect is a thing unknown. They are always busy traveling, buzzing, biting or seeking some work to do.

Lasting Monument Of Germany's Shame

The French Yellow Book dealing with the conduct of the German authorities towards the inhabitants of the French departments in enemy occupation is a lasting monument of German shame. The evidence contained therein is summarized in the note which the French Government has despatched to neutral powers. In this document it is set forth:

"On various occasions the Government of the republic has had to draw the attention of neutral powers to the proceedings employed contrary to treaty by the German military authorities in dealing with the inhabitants of the French territory which they temporarily occupy.

"The Government of the republic is to-day obliged to place under the notice of foreign governments the documents which furnish proof that our enemies have decreed fresh measures of even greater inhumanity.

"On the order of Gen. von Graevenitz, and with the aid of the 64th Infantry Regiment detached by the German general headquarters, about 25,000 French subjects, young girls of between 16 and 20 years of age, young women and men up to the age of 55, without distinction of social condition, have been torn from their homes at Roubaix, Tourcoing and Lille, separated without pity from their families, and forced to work in the fields in the departments of the Aisne and the Ardennes.

"Better illustration of this fresh crime of the Imperial German Government than could be furnished by any comment is to be found in the placards of the German authorities, the sorrowing protests of the mayor and the bishop of Lille, which are annexed to this note."

STRIPPING OF TERRITORY.

The note then gives a statement of the facts drawn up by the French Minister of War, and examines the contention of the German military authorities that the massed exodus decreed at Lille and Roubaix is justified as the necessary consequence of the increasing difficulties caused by England in the feeding of the population. It is remarked that the seizure of contraband and the stoppage of the enemy's commerce are acts of war; the deportation without military necessity is not. Further, it is pointed out that before the complete stoppage of enemy's trade Germany had stripped the occupied territories of all products which would have ensured the subsistence of the inhabitants and organized the exploitation of the labor of French civilians for her own profit. After a short examination of the evidence, M. Briand continues in his note:

"The whole of the declarations which follow show clearly that without immediate necessity or excitement of battle to extenuate the violations of international law, committed with considered will and with methodical preparation in advance, the German authorities have reduced the unhappy inhabitants of the invaded country to a condition which can only be compared with that of slavery."

The evidence conveyed to the neutral powers deals not only with the astounding slave raids in the north of France, but gives in addition a black picture of the long martyrdom imposed upon the inhabitants of the rest of the occupied regions. It is impossible to reproduce all the letters dealing with the slave raids, but the details of the following account are drawn from the official German placards and from the evidence of the sufferers:

"At the beginning of April the German authorities issued an appeal for agricultural labor. As last year, when the crops were got in they were all despatched to Germany, and the laborers were robbed of the fruit of their toil, the response to this appeal was meagre. An order for wholesale deportation followed on these terms:

"'All the inhabitants of the house with the exception of children below 14 years of age and their mothers, and old men, must be ready to be transported within an hour and a half. An officer will finally decide who is going to be taken to the concentration camp. The inhabitants of the house therefore must gather in front of their domicile. In case of bad weather they will be allowed to remain in the lobby. The door of the house must remain open. All appeals will be useless. No inhabitant, even those who will not be deported, will be allowed to leave his home before 8 in the morning, German time. Every one will have a right to 13 kilogrammes (about 27 lbs.) of luggage. If there is any excess weight everything belonging to that person will be refused without ceremony. The baggage must be separate for each person, and must have a label clearly written and firmly fixed. The address will give surname and Christian name, and the number of the identity card. It is absolutely necessary in your own interest to take utensils for eating and drinking, as well as a blanket, good shoes and linen. Every one must have his identity card. Anyone trying to escape deportation will be mercilessly punished.—Etappen Kommandatur.'"

A WEEK OF SHAME.

The 64th infantry regiment was removed from its more heroic duties at Verdun, and sent on an order from general headquarters to see to the carrying out of this inhuman proclamation which should make of the Holy Week of 1916 a week of shame for every German. In the town, where the blackest misery has long prevailed, rumor as to what was about to befall had filled the hearts of every one with apprehension. During the three weeks which preceded the posting of the placard there had been isolated raids. A tramcar would be stopped by a detachment of troops, and three or four men or girls ordered out of it, and taken off there and then for unknown destinations. The protests of the bishop and the French civil authorities against these inhuman proceedings were unheeded. The only reply of the general to the bishop's personal remonstrances was, 'You bishop, be quiet, and get out.'

"A meeting of protest was arranged, and while the meeting was actually in progress the placards appeared upon the walls of Lille. The town was full of troops, and a new general arrived to direct operations. The placards appeared on the 13th. Never had Holy Week seen the churches in Lille crowded with congregations so fervent in their prayers. Never were the words of pity and consolation uttered by the clergy listened to with more hope.

"At 3 o'clock on Saturday morning at Tourcoing, Roubaix and Lille the soldiers of Germany marched down to occupy positions for this victory. By 4 o'clock in the morning they had surrounded the Fives Quarters which was the first district attacked. At cross roads, and at the end of each street, they installed machine gun sections, and then patrols of 10 or 15 men with fixed bayonets battered on the doors of the houses ordering the inhabitants out into the street. Outside each house there hung a list of all the inhabitants, and there was no means of escape. An officer, accompanied by a non-commissioned officer, selected their slaves, who were given from ten minutes to an hour and a half in which to prepare themselves for their departure and bid farewell to their families.

A DELUSIVE TRUCE.

"On Easter Sunday there was a truce, and the rumor went round among the French that the vehement protests of the bishop had moved the German general's heart, that the neutral powers had intervened; but when the work was resumed again in the early hours of Monday morning, the dismay of disappointment added to the whole horror. For a whole week this infamy continued. The Germans imposed upon themselves only two merciful restrictions. They left children below the age of 14 and their mothers, and in taking girls below the age of 20 they took some older members of their family with them.

"Selection among the rest of the population was governed by general considerations. Girls whose hands showed signs of work were taken in preference to the others; servant girls were taken nearly everywhere, and in many cases their mistresses, declining to be separated from them, went with them to share the unknown future. The proportion of women taken was between 20 and 30 per cent. Two hundred schoolgirls of 15 were taken away, but on the whole it was the laboring classes who suffered, and in some instances young girls of good family who had been removed have been sent back.

VICTIMS' DEFIANT SPIRIT.

"Against all this black horror stands out the splendid spirit of its victims. On leaving their homes they were collected in the churches and schools of their district, numbered and labelled, and carried off in cattle wagons to the station, harlots and young girls, ragamuffins and merchants, all joined in the common misery. Yet as the first of these slave-gangs drove to the railway station, these wretched folk were defiantly shouting 'Vive la France,' and for the first time since the Germans entered Lille rang out the song of freedom and revolt, the "Marseillaise." Those left behind had an attitude no less noble.

"'I saw those herds of people go,' wrote a man of Roubaix. 'It breaks one's heart. The women as they passed tried to throw little parcels to their husbands, brothers or sons; the young fellows on the whole held themselves sturdily: some of them were singing. What moved us most was the departure of the women and young girls who had been taken. You can imagine the state of parents who saw young girls of between 16 and 20 years of age going off in the midst of young chaps of all sorts and conditions. And whither? That no one knows. The wind of sorrow is blowing round us, but for all that we keep our courage and are confident.'

25,000 DEPORTED.

"Some 25,000 persons have been deported from the towns of Lille, Roubaix and Tourcoing alone. Detailed evidence as to where they have all been sent is not forthcoming, but the majority of them would appear to hav been scattered between Seclin and Templeuve down to the Ardennes. There they are employed in various labors; some on the soil, others road-mending; some in the manufacture of munitions and in the digging of trenches. But the fact which is the most appalling to those who have studied the question of German atrocities is that the women are employed in cooking for the German officers.

"The inhabitants have been forced by threats, by violence, by executions, imprisonment and deportation, to make bridges, roads and railways; to work in factories and mines; to make sandbags for use in the trenches. They have been forced to work during inhuman hours for no pay, in conditions of the utmost misery, without food, liable to flogging, and to other odious punishment at the hands of the slave-drivers. They have been deported and carried off to work in the mines and factories of the Rhineland and Westphalia. But perhaps the most serious revelation contained in the latter part of the report is that large numbers of civilians who were in Germany at the outbreak of war, and were interned, have been brought back to work immediately behind the German lines in France.

CONVALESCENT CHILDREN.

How to Amuse a Child Doomed to the Bed Awhile.

A child recovering from an illness is apt to be fretful and peevish, demanding any amount of patience on the part of a mother or an attendant.

If the child is a boy modelling in clay will be found entertaining, and by helping him form different animals and houses many an irksome hour will be whiled away. If a girl, try paper flowers or paper dolls. Children also enjoy making scrapbooks. Cut attractive pictures from old colored magazines, for it should always be remembered children like bright colors. Young children can cut if they are not competent to paste.

Never let a child who is recovering from an illness sew, for it will prove tiring, the work being too intent, whereas paper clothes for dolly are sure to be enjoyed without fatigue.

A pair of toy scales and supplies, in the shape of rice, sugar, raisins and salt, to keep shop, will please a small child, and mother, of course, will do the buying.

Expensive toys are not necessary to make a child happy, for nine out of ten will prefer some simple homemade affair or an amusement they create for themselves.

MILBURN'S
HEART and NERVE PILLS
CURED
Salvation Army Captain.

Capt. Wm. E. Sanford (Salvation Army), 38 Earlscourt Ave., Toronto, Ont., writes: "A short time ago I suffered from heart trouble, which seemed to come on me very suddenly. I was so bad, that at times it seemed as if it was all I could do to breathe. I noticed an announcement of Milburn's Heart and Nerve Pills, and decided to give them a trial. After taking two or three days' treatment I felt fine, and my heart has not bothered me since. If this testimony would be of any service to others you are at liberty to use it."

To all who suffer from any form of heart trouble Milburn's Heart and Nerve Pills will give prompt and permanent relief. They strengthen and invigorate the action of the heart, and tone up the whole system.

Milburn's Heart and Nerve Pills are 50 cents per box, or 3 boxes for $1.25. For sale at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Bradstreet's Trade Review.

Toronto.—Exhibition orders were rather disappointing, although there has been no chance yet to estimate the returns of the last days of the Fair. Orders in dry goods, shoes and leather were not up to last year's mark, according to the estimates made by wholesalers in the respective lines. Heavy stocks laid in by retailers is said to be the reason for the falling-off. After the period of recent summer quiet, business is picking up, and with large Exhibition crowds and good prices for farm produce of all kinds, a brisk country trade is looked for. Industries are busy, and scarcity of goods are reported as due to lack of raw materials and shortage of labor. Prices are materially advanced in all lines of dry goods, and manufacturers and jobbers hesitate about quoting prices for future delivery. Scarcity in some lines is delaying deliveries. Leather dealers declare that although this is between seasons, there is considerable activity in the trade. Shoes are fairly active, and prices are continually advancing. The harness trade is picking up. Grocery brokers report a sensational decline in sugars amounting to 40 cents a hundred. Conditions in the grocery trade are fairly active, and most dealers are confident of an active autumn and winter trade. Wholesale hardware dealers assert that there is a fair degree of activity in seasonable lines.

Montreal.—Satisfactory conditions prevail in practically every branch of mercantile business. Dry goods wholesalers state that business conditions are good and that a fair volume of fall orders are being received. Conditions in the hardware trade are reported as very fair. Collections are generally declared to be better than at this time in 1915.

Ottawa.—The autumn trade is shaping up very well, and prospects are good for the remainder of the year. Grocery trade conditions are very satisfactory after the summer quiet. Country trade is reported to be good, and collections are generally fair.

London.—Business conditions are active in most lines, and there is greater prosperity than twelve months ago. Hardware business is more active, and a larger volume of trade is passing in dry goods.

Hamilton.—Business is assuming a more active tone, and prospects are bright for a healthy autumn trade in practically every line. Labor is scarce, especially in the steel industries. Grocery dealers report that there is greater activity after the quiet period in August. Hardware lines are moving out freely. The dry goods trade is healthy, with increased prices for practically all commodities.

Winnipeg.—Manitoba wheat has gone higher than at any time in the last twenty years, with No. 1 northern at $1.73, track bay ports, and the market is very strong. Export demands are likely to carry prices still higher. Crop reports are more favorable, especially from Alberta. Saskatchewan reports are also good. Mercantile business is active, and confidence is general for a brisk autumn trade. Practically all lines of commodities are finding a ready sale, and wholesalers express themselves as satisfied with conditions, in the expectation that crop reports will continue good. Money is quite plentiful.

Calgary.—Conditions in Alberta are exceptionally good, and unless very bad weather hinders harvesting, the crops will be better than ever. Mercantile trade is brisk.

Vancouver.—Retail trade is good, and business generally is satisfactory. A general tone of confidence prevails in business circles. Collections continue to be good.

Quebec.—Business conditions as a rule are satisfactory and show up better than this time a year ago. Wholesale houses report orders to hand satisfactory. Groceries and provisions are moving well. Building trades are fairly active. Local factories continue to be well employed, and outlook continues encouraging. Collections are fairly good. In shipping circles business is normal.

When a man is tied to his wife's apron strings he seldom gets the reputation of being fast.

Was Troubled With
Stomach and Liver
FOR SEVEN YEARS.
MILBURN'S LAXA-LIVER PILLS
CURED HER.

Mrs. Thomas Sargent, Berkeley, Ont. writes: "I have been troubled with my stomach and liver for the past seven years; also have had constipation, causing headaches, backaches and dizzy spells, and at times I would almost fall down. I tried all kinds of medicine, without obtaining any relief. I commenced using Milburn's Laxa-Liver Pills, and they have cured me. I have recommended them to many of my friends, and they are all very much pleased with the results they have obtained from their use."

Milburn's Laxa-Liver Pills have been on the market for the past twenty-five years, and can be procured from all dealers.

The price is 25 cents per vial, or five vials for $1.00.

If your dealer does not keep them, they will be mailed direct on receipt of price, by The T. Milburn Co., Limited, Toronto, Ont.

EDITORIAL COMMENT

Owing to the increased cost of getting-out a newspaper the Durham Chronicle has been reduced to six pages and the Mount Forest Representative to four.

+ + +

"A vote for Bourassa is a vote for Laurier." shouts The Toronto News. Will The News please tell us who put Bourassa's fellow-Nationalists into the Borden Cabinet? Was it Laurier?

+ + +

A Toronto newspaperman went with an aviator on a trip to Camp Borden. As he circled over the city before starting, he could see that there was no room there for six daily papers.—Guelph Mercury.

+ + +

Two of Ottawa's daily newspapers are chaffing the third one because a reporter in interviewing a citizen by telephone tells of the citizen smiling smiling in response to a certain question put. The matter has since provoked not only smiles but laughter.

+ + +

Sir Rodmond Roblin and his two pals, Howden and Coldwell, who were on trial for their official misdeeds, have been set at liberty because the jury failed to agree. It is understood that nine of the jury were for conviction, three for acquittal. There may be Tory Champions, journalistic and others, who will claim this as an exoneration and a vindication, but the great majority of the people will not view it in that light.

+ + +

A new and heightened spirit is manifesting itself among all social ranks. Perils by land and sea are begetting a quiet heroism which puts to shame the moral cowardice that has been the fruit of a lax and pleasure-loving civilization. In the furnace of pain and bereavement inward strength to endure has appeared. A new envy stirs the heart of many, not of wealth or ease or sensuous enjoyment, but of noble daring, splendid chivalry, the chance of winning the higher good and glory by the sacrifice of self.—Catholic Record.

Soldiers' Letters

HIT BY "RUM JAR"

Private David Sieling tells how he got wounded in an interesting letter to his mother, Mrs. David Sieling.

Somewhere in France
Sept. 2nd, 1916.

Dear Mother:—

I suppose you have heard that I have been slightly wounded by this time. I was shot in the head and in the arm, by a high explosive rum jar somewhere in Belgium. Well this rum-jar fell beside me when I was filling sand bags. I was up in the first line trenches and Sieling very hard the night before, and the next day I got mine. My sergeant got hit about five minutes after me and I was only standing about five yards away from him. Well I'll tell you I never rolled so much in all my life. When the sergeant came out we couldn't hardly keep from laughing at each other, the way we rolled in the dirt and mud. Well mother I suppose you are worrying a lot about me. Dont worry, or I am going back soon and if I dont get that Hun that got me, I'll sure get another. The Germans are great men to stick their heads up, but they never see any of our heads. Well, mother news is scarce around here so I must close. Good-bye, love to all.

Your Loving Son,
David

DIED A SOLDIER'S DEATH

Mrs. Frank Latchford received the following comforting letter containing the particulars regarding the death of her brother, Private Joseph Best, who was killed in action in Flanders, written by his Company Commander, Captain Goodall, of the 10th Batt., The Canadian Scottish, B. E. F.

Dear Mrs. Latchford:—

I received your letter of Aug 8th, and regret that I have to write of your brother's death. I knew him well. He was in my company at the time of his death and was my own personal servant for a week before he was killed. He was killed instantly by a piece of shell which hit him in the back of the neck. He had no suffering I am glad to say and could hardly tell what happened to him. I was very sorry indeed that I was not near him when it happened but I saw him shortly afterwards. He was not mutilated in any way except for the wound at the back of the head. He was buried reverently and properly in the little cemetery near Hill No 60 and a wooden cross put over his grave with his name and number on it. You may in your sorrow be well proud of him for he died a soldier's death and died as he lived a brave and honorable man. My sympathy is with you. Yours very truly.

S. H. Goodall,
Captain.

POETS' CORNER

THE BATTERY "O PIP"

The following poem, descriptive of the Signaller's life at the Front, was received by Mr. M. G. Dippel, from his son, Signaller Louis Dippel, "Somewhere in France".

"Observation post (always referred to as "O Pip) of the field artillery is usually placed as close to the Hun as possible."

Cramped in a crumbling dug-out
Adjoining "No Man's Land
And chilled to the bone I squat at a phone,
That sits on a sand-bag stand.
My ticker points to midnight—
I've two more hours to do
And keeping awake would wrest the cake
From the torture Tantalus knew.
'Tis here the "eyes" of the battery
Detect the Hun at work
And targets fair we phone to where
Our eighteen-pounders lurk
Then shells of high explosive
Frustrate the plans of Fritz
Who runs to ground as we promptly pound
His parapet to bits.
When Tommy in the trenches
Is suffering special "Hell"
From "whizz bang mine" and five point nine
"Turnip" and tear-shell
He calls for retaliation
And our waiting gunners know
When we pass that through the devils due
Is more than a quid pro quo.
It's up to us—the peeping
At Fritz through a periscope:
Likewise to go a-creeping
And out in the darkness grope
For the "break" where a bursting Johnson
Has cut the telephone wire
Whilst the peeved O.C. of the infantry
Bawls for our battery fire.
Cramped in a crumbling dug-out
Too near to "No Man's Land"
To be without a lingering doubt
As to how your "home'. would stand
A "coal-box" split upon it
Or a "liquid fire" rain
Hello! Hello!! Gee whiz!! Hello!!!
The line is "out" again.

News About Town

J Akiwenzie, leader of the Cape Croker Band, has five sons with the 160th Battalion.

Plums are such an abundant crop that local buyers are paying only one cent a lb. for them.

A child died from infantile paralysis at Drayton and the schools of the village and neighbourhood have been closed to prevent contagion.

The Dominion Government has issued a special order-in-council, making it a serious offence for any person to interrupt or disturb a recruiting meeting. For the first offence the penalty is a heavy fine or imprisonment and for a second offence imprisonment with the option of a fine.

The Staff of the Teeswater school rose in rebellion one day last week and dismissed the school until such time as the Board provides proper heating facilities. The Teeswater News says the heating system has been a disgrace to the village and pats the teachers on the back for showing some spunk.

Kincardine Fair was the best in years Port Elgin's the same day was not up to the average. The 160th Band and Machine Gun section proved a great drawing crowd at the former town. Port Elgin, Kincardine, and Tinkerton Fairs all suffered from a clash of dates which should not be repeated.

A load of Toronto departmental store catalogues arrived by mail a short time ago for customers around Lionshead. One of these days Simpson's and Eaton's will wake up and find that they can save all that expense by copying some of the peninsular merchants and never advertise—Lionhead News.

Orillia Packet:—As pork goes up in price, it is possible the regulation fragment, about the size of two peas will be withdrawn from the canned "pork and beans." But there is no danger of the accidental feather being withheld from each tin of young veal which finds its way to the consumer as canned chicken. There is always something left to be thankful for.

W. A. McLean, Deputy Minister for Ontario, states the fifty thousand automobiles licenses have been issued by the Province this year, as compared with 35,000 in 1915. "The great increase in the number of automobiles in use," declared Mr. McLean, "is due to the increased number of lighter cars, purchased by farmers. The auto is fast becoming an essential part of the farm equipment in Ontario."

Under Father Cadot's excellent spirit of patriotism every able bodied Indian on the Cape has enlisted. Lieut. Patterson trained the men all winter and they proved themselves to be excellent under the drill practice. They are a fine looking body of men in khaki, and will equal any body of white soldiers. They have made great sacrifices, one man for instance leaving a wife and nine children to show his loyalty. By their unswerving loyalty to the crown they have given up more and answered better on a whole than the white boys. Father Cabot once said in reply to one of the Indians questioning him why an eligible white boy was in civilian clothes, made this both humorous and true answer "He is not intelligent enough."—Wiarton Echo.

Port Elgin tax rate is 22 mills, same as last year.

Visited Camp Borden

Mr. James A. Lamb of Brant paid a visit to his son, Major Walter Lamb of the 201st Batt. at Camp Borden recently. He spent several days there and was able to get a good look at the Camp and the way things are done there. Mr. Lamb says he was very agreeably surprised with the situation and lay-out of the Camp and the system upon which everything is run. Both officers and men he states are happy and well pleased with Camp Borden.

+ + +

Returned Officer Here.

Mr. Joseph M. White had a short visit on Monday from his nephew, Major George Nelson, of the 18th Batt. who was returning on leave to his home near Southampton. A wounded hand has given him some trouble but he hopes shortly to return to the Front. In the meantime he has been given an appointment at Camp Borden. Major Nelson is well-known here, having been an officer of the old 32nd Regiment for some years. He commanded the Southampton Company with the rank of Captain.

May Fight A. O. U.

By united effort it is hoped by many holders of A. O. U. W. policies to secure an investigation of conditions which render necessary the declaration that their policies are null and void. Many of the members have been informed that by paying their lodge dues of thirty-three cents per month continuously they will be entitled to benefits if there are any to be paid, but if they discontinue these payments they forfeit all hope of getting anything, no matter what may arise. This forms the last hope to which many of the old policy holders, who have paid into the order for the last 30 or 40 years, are tenaciously clinging, and they feel that even this is throwing good money after bad. There is talk of many old members uniting and bringing action in the courts to test the legality in the order's action and a big legal battle is promised.

BRANT TP. COUNCIL

Brant Township council met on the 18th day of Sept. 1916. Members all present. Minutes of last meeting of council read and declared correct.

Rowand—Weir—That the Reeve and the Mover be a committee and examine Traynor's Bridge and if thought advisable to have the same painted.—Carried.

Weir—Rowand—That the application of Joseph Monk for the position of collector of rates for the current year be accepted and that the clerk prepare a by-law confirming this resolution.—Carried.

Johnston—Gregg—That by-laws No. 87 and 88 A. D. 1916 be now read the usual number of times and finally passed.—Carried.

Gregg—Rowand—That the Reeve and clerk issue orders on the Treasurer for all accounts passed at this meeting of the council.—Carried.

Bread Making Contests
At Rural School Fairs
PRIZES—Free Courses at Macdonald Institute, Guelph
Free Poultry Raising Courses at Ontario Agricultural College
Free Cook Books and Magazines

Over 1,500 prizes in all will be offered in bread-making contests which will be held this fall at over 250 rural school fairs taking place in Ontario. It will be a great event at the fairs and will stimulate interest in bread-making among young girls between the ages of 12 and 17 years.

Here is a wonderful opportunity for your daughter to win for herself a Free Course in Domestic Science at the famous Macdonald Institute, Guelph. All she has to do is to bake one double loaf of bread and enter it in the contest at the fair according to the conditions explained below and more fully told in the folder we will send you on request. The loaf must be baked with

Cream of the West Flour
the hard wheat flour guaranteed for bread.

This is a splendid flour which makes the biggest, bulging loaves—whitest, lightest and most wholesome bread you ever baked. Is this not a splendid opportunity to interest your daughters in breadmaking?

Here are the Splendid Prizes offered for the best loaf of bread baked with Cream of the West Flour. The following are offered at each local Fair:
1st Prize—1 paid up subscription to "My Magazine" for 1 year. This magazine is full from cover to cover every month with articles suitable for young people of all ages. It is published in England. Value $1.50 per year.
2nd Prize—6 months paid-up subscription to "My Magazine" Value [illegible]
Extra Prizes—When entries exceed ten a 3rd prize will be awarded of 6 months paid-up subscription to "My Magazine." When the number of entries exceeds twenty the judges at the fair will award 4th, 5th, and 6th prizes of one year's paid up subscriptions to "The Little Paper." This is a wonderful little publication issued every month in England. Its eight pages are packed with highly engaging information and stories relating to history, nature study, animals, bird life, etc.
Important—The winners of 1st prizes at the fairs automatically become competitors for the Provincial Prizes. The second half of the double loaf is sent to Ontario Agricultural College, Guelph, by the district representative in special container provided. The judging is done by Miss M. A. Purdy of the Department of Breadmaking and Flour Testing at the College.

Provincial Prizes—The winners of first prize at each local fair compete for following Provincial prizes. The first and second prizes, or third and fourth prizes, will not be awarded in any one county:
1st Prize—Short Course (3 months) in Domestic Science at Macdonald Institute, Guelph. The Macdonald Institute does not accept students under the age of 17 years; if the winner be less than 17 we present her with a certificate entitling her to take the course when she reaches the right age. Value of course $75.00, which pays for fees, room, board and washing. The winner lives at Macdonald Hall while taking course.
2nd Prize—Short Course (3 months) in Domestic Science at Macdonald Institute, Guelph.
3rd Prize—Short Course (4 weeks) in Poultry Raising at Ontario Agricultural College, Guelph. Girls taking this course do not live at the College, but good boarding houses will be secured for them in Guelph. Value of course $35.00, which pays board of student in Guelph. (No fees are charged for course.)
4th Prize—Short Course (4 weeks) in Poultry Raising at the Ontario Agricultural College.
5th to 29th Prizes—The Famous Boston Cooking-school Cook Book by Fannie Merritt Farmer, latest edition (1914). There are 2117 thoroughly tested recipes and 120 photographic reproductions of dishes, etc., besides much special information.

Conditions of the Contest

Every girl may compete at the rural school fair in her district, whether or not she attends school, providing that her 12th birthday occurs before November 1st, 1916, or her 17th birthday does not occur before Nov. 1, 1916. One loaf of bread must be submitted baked in pan about 7 x 5 inches and 3 inches deep, and divided into twin loaves so that they may be separated at the fair. The loaf must be baked with Cream of the West Flour. One half will be judged at the fair. The other half first prize loaf will be sent to Ontario Agricultural College, Guelph, to compete in the Provincial Contest. The local contest at the fair will be conducted under the same rules as all the other regular contests at your fair.

The standard by which bread will be judged will be as follows:

1. Appearance of Loaf ... 15 marks
   (a) Color ... 5 marks
   (b) Texture of crust ... 5 marks
   (c) Shape of loaf ... 5 marks
2. Texture of Crumb ... 40 marks
   (a) Evenness ... 15 marks
   (b) Silkiness ... 20 marks
   (c) Color ... 5 marks
3. Flavor of Bread ... 45 marks
   (a) Taste ... 25 marks
   (b) Odor ... 20 marks

Each loaf must be accompanied by the part of the flour bag containing the face of the Old Miller (important) and an entry form must be signed by the girl and parents or guardian stating date of birth, P.O. address, and giving name of dealer from whom Cream of the West Flour was purchased. The form will state that the girl actually baked the loaf entered in the competition. The forms will be provided at the time of the fair. The decision of the judges is final. Not more than one entry may be made by each girl and not more than one prize will be awarded to the same family.

The Results of the contests at the fair will be made known in the usual way and the same as all the other regular contests. The Provincial results will be announced as soon as possible after the conclusion of the Rural School Fairs in the Province.

Do Not Miss this Great Opportunity: Every girl between 12 and 17 years should compete. What a splendid way to stir up increased interest in breadmaking! Get a supply of Cream of the West Flour at your dealers and practise using it as often as possible to increase the chances of winning. If your dealer cannot sell it to you, write to the Campbell Flour Mills Co., Ltd., Toronto, and they will promptly tell you the nearest place to get it.

No Competitions in Counties Named Below: The competition is open to all parts of the province where Rural School Fairs are held, except the districts of Rainy River, Kenora, Manitoulin and Thunder Bay. These districts are the only parts of the province where school fairs are held by the Department of Agriculture in which this competition will not be a feature. There are no district representatives of the Department of Agriculture in the Counties of Huron, Perth, Wellington, Haliburton, Prescott, Russell or Lincoln, and no rural school fairs are held in these Counties by the Department of Agriculture. We regret, therefore, that the competition cannot include these Counties.

Write for free folder giving full and complete information about every feature of this great contest.

Address Campbell Flour Mills Co., Limited, (West) Toronto
119

☛ Cream of the West Flour is sold by J.W.South, Walkerton, E. Witter & Co., Mildmay and Geo. Lambert, Mildmay; W. G. Brown, Paisley; Jacob Hahn, Hanover; C. Eby & Sons, Elmwood; Geo. R. Smith, Neustadt; R. C. McCallum, Teeswater.

The foundation is not the most important thing

True, you can't have a good barn without a good foundation but don't forget either that the roof has to stand most of the punishment. Upon it falls the burden of resisting the destructive influences of weather and changing seasons.

Now, the question is "Where am I going to find a roof which will meet these conditions?" Certainly not in wooden shingles which have rapidly deteriorated during the past few years. Not in anything so perishable as wood, nor yet iron, which lets in driving rain, but rather in a permanent mineral composition such as Brantford Roofing.

Now, let us look at a section of Brantford Roofing. First, you notice it has a pure, long-fibred felt base. This is thoroughly saturated with a filler coat of asphalt or mineral pitch. Then it is given another coat. Finally, the surface is thickly covered with crushed slate. You can imagine what a job rain, snow, fire or heat would have penetrating a roof like that. As for comparing

Brantford
Nature's Water-proofing
Roofing

with shingles on the score of permanency, or protection, or appearance, or even economy, there is no comparison. You put a Brantford Roof on once, and it will last as long as the building; it will always look well and it will never need repairing.

Why not let us send you samples, also a copy of our booklet which explains how Brantford Roofing is "always on the job." Or, if you will give us the dimensions of your barn or house roof we will gladly submit estimates without charge or obligation.

SSING OF
LTHY BODY

An Hour's Sickness Since
"FRUIT-A-TIVES".

MR. MARRIOTT
73 Lees Ave., Ottawa, Ont.,
August 9th, 1915.

"I think it my duty to tell you what "Fruit-a-tives" has done for me. Three years ago, I began to feel rundown and tired, and suffered very much from *Liver and Kidney Trouble.* Having read of "Fruit-a-tives", I thought I would try them. The result was surprising. During the 2½ years past, I have taken them regularly and would not change for anything. *I have not had an hour's sickness* since I commenced using "Fruit-a-tives", and I know now what I haven't known for a good many years—that is, the blessing of a healthy body and clear thinking brain".

WALTER J. MARRIOTT.

50c. a box, 6 for $2.50, trial size, 25c. At dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

CARGILL:- Bruce County's "Niftiest" Village

A GREAT DEAL IS BEING said about "town-planning." The idea, so far as this country is concerned, is altogether new. Most of our towns and cities were not "planned" but like Topsy in Uncle Tom's Cabin, they simply "grew." There is at any rate in this county a village which, though not laid out on a single comprehensive plan, is in some ways, a model. It was built to conform to the ideas of one man and represents that man's ideas of a model village. If one were looking for the little town with the most substantial buildings, the handsomest residences, and the best sidewalks in this district, one would not need to pass by Cargill, the thriving village to the north of us, which is a monument to the enterprise of its founder, the late Henry Cargill.

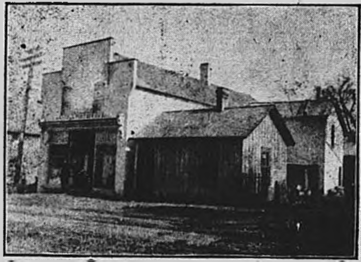
+ + +

Cargill is prettily situated on the Teeswater, a small stream which furnishes power for the village's numerous industries, and in former days provided the necessary waterway for floating logs down from the Greenock Swamp, Cargill's source of wealth. The village dates back to the opening of the Greenock Swamp of 15,000 acres, which were sold by the government in 1871 to various parties, but soon was acquired by Mr. Cargill. Mr. Norman Robertson tells in his History of Bruce County how Mr. Cargill began the development of the wealth that lay in the swamps. Canals parallel to the concessions and sideroads were dug by which to float the logs that had been cut, to the Teeswater, and thence to the mill. These canals also drained the swamp, turning miles of it into good dry farm land. To the original sawmill, Mr. Cargill added a large steam sawmill, a planing mill and grist mill and later a factory for the manufacture of wind mills and pumps. Water power has since been turned into electric power and furnishes power for most of the mills, street lighting and lighting for the stores and private houses.

Anglican Church, Cargill

+ + +

The people of Cargill are every bit as progressive as their village looks. When they take hold of anything it usually goes. The latest movement to their credit is the way they took hold of recruiting. Cargillers are true Britishers and there is nothing sluggish about their blood. The way they backed up the 160th Bruce Batt. is a matter in which the village can take justifiable pride. This small hamlet with a population of 300 has 39 men or thirteen per cent of the population in khaki. That is a record that will stand some beating!



C. W. Keeling's Post Office

Cargill used to be a great baseball town. At present she specializes in bowling. Everybody belongs to the live Bowling Club of which C. W. Keeling is president, and J. T. Clancy, is secretary. Of course, with so many of the men enlisted, the Club's membership has been seriously depleted, but are always enough men on hand for three or four rinks when as a tournament looms in sight. The village library is another institution worth mentioning. It has 3,000 volumes and is located in the old school. For three nights a week it is open under the direction of the librarian, Miss F. Neuman. Mr. John Clancy the president is well-posted in library affairs, and is an active member of the Ontario Library Association. The success of the library is due in a large measure to the interest Mr. Clancy has taken in it. Cargill boasts of a Fire Brigade, although its services fortunately have not been required for a long time. It was some four years ago that the equipment was bought. Fire had broken out in the local shoe store, then conducted by Mr. Fegelo. It furnished an object lesson of the village's helplessness in case of conflagration, and the next day Mr. John Clancy had no difficulty in raising $300 by subscription to buy fire-fighting equipment. The village has a large stand pipe and five hydrants.

+ + +

The industries of the village are controlled by the firm, Cargill Ltd., W. D. Cargill, pres., Chas. Kyle, sec. Owing largely to shortage of help the mills are partly shut down at present. The busiest spot is the stave dep't where a large staff of men are busy turning out barrels, nailkegs, heading etc. Mr. Geo. Schrumm is in charge of this department. The grist mill is directed by Mr. M. L. Ziegler. Mr. F. L. Martin is in charge of the local power plant. One of the oldest employees of the Cargill firm, although by no means old in years, is Mr. W. J. Loughleen. Mr. Loughleen is well thought of by all. Last year he was honoured by the Freemasons of north Huron District by the appointment of D. D. G. M., a position which he filled with credit. The Dom. Well Supply Co., another Cargill Ltd. industry, is managed by Mr. G. F. Saunders. In the early days, the logs from the swamps were floated down to the sawmill through canals to the river. The timber is now brought in by rail, a road eight miles long having been constructed through the swamp a few years ago, and operated by gasoline. Mr. Pat Murray, an old and faithful employee of the company, has been in charge of the company's interests at the swamp for years. The Cargill farm of 600 acres is managed by Mr. John Clancy, one of the best known agriculturists in the county. Years ago the farm was used largely for grazing and a large herd of thoroughbred cattle was kept. To-day the farm is mostly under cultivation, and the large red barns which can be seen all over the countryside, are well-filled with the products of the soil.

+ + +

Cargill excells in lovely residences. The home of Mr. W. D. Cargill M. L. A. on a well-chosen site overlooking the river, is palatial, the large, well-kept grounds adding not a little to the appearance. Other fine homes include those of ex-Warden Geo. Sirrs, Dr. Bricker, Wm. Matthews, Methodist Parsonage. The appearance of the residental properties is enhanced by ornamental shade trees and well-kept lawns.

+ + +

The village boasts three fine churches, all of which were erected in the year 1902. Rev. R. M. Gale is pastor of the Presbyterian Church, Rev. W. C. Almack pastor of the Methodist Church, and Rev. J. Lionel Homer rector of the English Church. Since the spring of 1915 the Roman Catholics who formerly had to drive to Chepstow four and a half miles away, worship in the Public Library Building. Service is here administered by Rev. F. A. Zettler, parish priest of Chepstow. A fine public school is under the direction of Mr. E. A. Ruttle, principal and Miss G. Keeling.

Two Fraternal Societies at least flourish in Cargill. The Masonic Lodge is a live organization, with Wor. Bro. James Alexander in the chair. The C. O. F. is a thriving lodge, owning a handsome hall of its own. Mr. R. Loughleen is the present Chief Ranger.

+ + +

Surrounded by one of the best agricultural sections in the county, Cargill has a large country trade and is an important shipping point both in factory and agricultural products. The interests of the shippers receive the best attention from the popular G. T. R. Agent, Mr. J. T. Clancy, whose genial good qualities and unfailing courtesy are much appreciated by the public. Hogs and cattle are shipped every week from Cargill by Mr. Joseph Clancy.

A bank, two good general stores and a number of other stores cater to the business wants of the community. Mr. C. W. Keeling, a leader in everything that makes for the best interests of Cargill, has besides a large general store business, the telephone, which serves practically all the farmers of the countryside, also the post office and express business. Mr. Harvey Grice, a popular young man, has been associated with him as head clerk for a number of years. The other general store is kept by Mr. W. M. Cameron, a successful business man from New Liskeard who bought Mr. Geo. Detwiler's large business two years ago. The town has a live young hardware dealer in Mr. P. F. Balsden, who enjoys a good trade. J. D. Schuett, the village furniture dealer and undertaker has a good trade. "Joe" has an eye to business. He deals also in cream separators and plows, and will even make a dicker in horses. The village ice cream parlor and confectionery is well kept by Mrs. M. Bell. Cargill people get good banking accommodation from the Royal Bank under the managership of Mr. A. R. Fowlie. Harness and shoes are combined in a double establishment by Mr. J. W. Reaburn who keeps an up-to-date store. The bus and livery business is looked after by A. J. Hanmore. He also has an auto livery and an up-to-date jitney service to all trains. Mr. Martin Bester, who looks after the tonsorial requirements of the community, is a young man brought up in the immediate neighbourhood who is making good. Thos. P. Hood, the proprietor of the butcher shop, does a thriving trade.

Dr. Bricker, a graduate of the University of Toronto, is the doctor for the village and a large section of the surrounding Country. Cargill also has a Vet, Dr. Hanmore, V. S. who is at present on active service in France.

Since the Power House was erected in [illegible], Cargill enjoys hotel accomodation equal to that furnished in the larger centres of population. The Hotel is a handsome white brick structure comfortably fitted throughout. The best of meals are provided by the hostess, Mrs. Powers. Her late husband, who kept the hotel up to the time of his death, was a famous old ball-player, and a member of the Guelph Maple Leaf Baseball team at the time they were champions of Canada. The Power House has secured a standard Hotel License.

The only way to properly appreciate the good points of Cargill is to visit it. Do so and you will see one of the nicest, neatest, thriftiest small towns on the map.

BOWLING TOURNAMENT

The Patriotic Tournament held on the bowling green on Thursday, was a pronounced success although the weather in forenoon was anything but promising, the afternoon turned out grand and the crowd gathered, and play commenced in earnest, about 1 p. m. The following were winners in the trophy: Wm. Cliff, David Willowby, Jno. Montgomery and A. Loughleen, skip. the runners-up being:—Schorbach, S. Cargill, F. Smith and John Clancy, skip. In the Consolation, T. P. Hood Rev. Almack, I. Chambers and C. W. Keeling, skip, were first, the runners up being: F. Hopb, Geo. Welsford, Jno. Loughleen, sr. and G. F. Saunders, skip.

There were about 40 who never bowled on the green before and at times the excitement ran high. About $80 was realized which will swell the fund for 160th Bruce Batt. boys who enlisted from here. The ladies had charge of the refreshments and they are certainly to be congratulated on the manner in which they attended to their duties and helped in no little degree to make the tournament such a success.

+ + +

KITTY TOUCHERS

The tournament was patronized by every profession: farmers, millmen, millers, bankers, M. P. P. and doctors.

+

David Willoughby, Geo. Lamont and Arch. Weir, all old Council men of Brant, made their first debut at the game but Dave, was the only one to land in the money.

+

Secty. Clancy had brand new recruits but promises to make a better showing next year.

+

Did you see the way Tom Hood was playing for a beginner. Right near the kitty every time.

+

Only one protest was entered during the series. It was settled by playing over again. No one unseated or disqualified.

Bob had the smile that won't wear off. He got a new knife for making shavings.

+

Zieg had a good strong rink but didn't make the grade—no doubt due for the want of a "Grit" in the bunch.

+

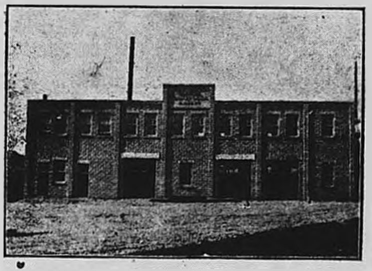
The oldest player on the green was Jno. Loughleen sr. and he played until the last and reached the prize list.

Messrs W. D. Cargill and Kyle attended Chesley Fair on Wed. of last week.

Dr. A. G. Fortune of Walkerton, was here on Friday.

Miss Lillie Helling of Mildmay has resumed her duties as milliner at W. M. Cameron's.

Miss Myrtle Elder was in the County Town on Friday.



Cargill's Planing Mill, Cargill

Everybody was pleased to see Jim Garland back at the game after his accident on Aug. 1st and he played well.

+

The farmers turned out in good numbers and all seemed to enjoy themselves.

+

A light shower in the evening didn't chase the bowlers. Every one was out to see the finish.

+

Kyle and Lamont were on same rink and hear them talk of days gone by.

Molasses took a big drop on Friday, the bottom falling out of the barrel, and two of our young men were nearly drowned.

Mrs. R. E. Elder of Goderich arrived on Saturday, for a visit with friends.

Messrs Eedy and Dippel of Walkerton passed through the village on Friday.

A number from here attended the Pinkerton Fair on Friday and also the concert which they pronounce was A1.

Presbyterian Church, Cargill

Next year we hope the "Dam" will be full, then the lights will not be out too early.

+

There was no scarcity of bowls. Paisley generously loaned 24 pair and we hope we can return the favour soon.

+

There should be lots of new members for the coming year.

+

"Larger and better Tournament" is the slogan for 1917.

We are pleased to report that Mr. Joe Clancy who underwent an operation in Bruce County Hospital last week is progressing and hope he will soon return home.

Miss Nellie Stoesel of New York and formerly Hello Girl in Keeling's store is spending a week or so with her sister, Mrs. Geo. Welsford.

Ptes Hanson, Hamilton and Thompson of 160th. Bruce Batt, London spent the week-end here with their parents and relations.

W. M. Cameron's Store, Cargill

Leave it to the ladies. No fear of any want of refreshments.

+ + +

CARGILL NEWS

Mrs. Dan Greenway left last week for a 2½ month's visit at Success, Sask.

License Inspector White, of Walkerton paid an official visit to our village on Friday.

Wm. Alexander of Eden Grove cemented the new barn of Mrs. Elders last week.

Read the advertisements in the Telescope. It pays.

The price of Bibles is likely to advance, which is a good thing, says an exchange, since if the Good Book gets expensive it may yet become fashionable to have one in the home.

The Smiths Falls Record, in a report of a funeral, says "Fiends were asked to omit flowers." Peradventure it is fiends who bring flowers to a man once he's dead, and friends who have boquets for him while he is still in the flesh.

AN EVIL HERITAGE

"But you needn't tell me about it," said Marian, almost frightened.

"Do you mean that you have guessed already?"

"Oh, no—that is to say it doesn't matter what I have guessed. But please don't think that I expect you to tell me anything."

"I know you don't, but I have no one to talk to, you see, for your mother has no time to listen to me; and I can't tell you how unhappy I have been all these weeks, knowing that he, too, had the fever. It was that that made me feel quite certain that I was fond of him. Do you think it can be wrong to be fond of a man before you are quite certain that he is fond of you?"

"No," said Marian, thoughtfully, "I don't think that can be wrong exactly."

"Oh, thank you. Then may I talk to you?"

Again the black eyes hung on Marian's face, and again the white cheeks had turned pink. From the moment she had heard from Miss McCrie that the unknown Jess was "fond" of somebody, Marian's heart had for some mysterious reason warmed towards her. It was no want of sympathy which had made her attempt to avert the impending confidences, rather it was an excess of sympathy. She could not help fancying that Jess was speaking on a mere impulse, and that by to-morrow, perhaps, she might regret what she had said. She knew how painful such a feeling would be to herself. And yet she could not resist the black eyes.

"Of course," she said hesitatingly, "you may talk to me if you like."

And then Jess began to talk, pouring out the whole of her poor, overtaxed little heart, which had obviously been filled to bursting with the image of Mr. Philippe; but doing it with so pure and childlike a simplicity that this unlooked-for general confession, instead of being either offensive or ridiculous, turned out to be the most natural thing in the world. Even Marian understood this, and very soon had given up all attempt to stem the flood of confidences. While she stood by, silent and embarrassed, wishing to express the sympathy which she most truly felt, and not knowing how, the thought even crossed her mind whether it were not better to be made like Jess, rather than like herself; whether it was not honester and more natural to show one's feelings openly—"unless, of course, one had wicked ones," as Jess said—instead of instinctively concealing them; and whether, too, it must not be an unspeakable relief to be rid of a secret that has been dragging at one's heart-strings for months and months past.

Fortunately, Jess did not expect many words; Marian's face seemed to suffice to her.

"There is something in it which gave me confidence from the first moment," she exclaimed. "I felt sure you would understand me. Perhaps," she added, as though struck by an idea, "you have gone through the same thing yourself?"

"I? Oh, no, never!" said Marian hurriedly, and turning scarlet as she spoke.

"Are you sure?"

"Of course, quite sure! What can have made you think of such a thing? And—and, if you please, I think I should like to go back into the house."

Jess said nothing, but she scarcely looked convinced as she led the way back.

Marian followed her, holding up her riding-skirt and breathing rather quick. She did not feel satisfied with herself. Certainly there could be no doubt that she was not made like Jess.

CHAPTER XIX.

"It is sure to hold out till to-night," said Mr. Rudd, decisively.

"I am glad you think so," replied Mr. Weedon, with his heart-rending smile. "I don't care twopence whether it does or not. In my opinion there isn't much to choose between being roasted or boiled."

The last speaker was Mr. Brooke, who, not having been able to get clear of St. Clare as soon as he had hoped, had consented, though with a very bad grace, to take part in the picnic.

"But only under condition that you don't point things out to me," had been the stipulation he made. "I warn you that I'll keep my eyes tight shut all the time; for as to looking at so-called wonders, I've simply struck work."

And now the day had come, and the larger half of the party was wending its way through the cane-fields to the place of rendezvous. Marian had scarcely slept all night, out of sheer terror lest it might rain. Jess' little romance was the very first in which she had been called upon to play a part, even though only the passive part of a gooseberry, and the idea that Miss McCrie's charitable plans might yet be crossed was not to be borne with any calmness. The matter had looked very critical for a moment. There had been one heavy shower already, but so short and followed by so brilliant a sunshine, that it was hard to believe in its not having been a dream. Then, at the last moment, there had been another contretemps. Her father, who had been persuaded to join the party, and who was already in the saddle, had all but dismounted again because of a clamoring coolie, who had chosen this moment for coming and demanding justice for some supposed injury. It was an intricate tale, which even in plain English might have been hard to follow, but which in Coolie English was all but unintelligible. A mule with a bad leg—another Coolie over at White Village—something that this other Coolie had done to the mule—such were the chief headings of the story, the upshot of which was that the master was earnestly called upon to ride over to White Village and punish the criminal.

"I must inquire into this matter," the captain had declared, and already he had had one foot out of the stirrup, when the united remonstrances of the three gentlemen had succeeded in dissuading him from his purpose.

"Well, well, it can stand over until to-morrow," he decided. "All right, Ladal, I'll ride over the White Village to-morrow, and see about that mule."

"I should advise you not to go alone if you are going in the character of avenging angel," said Mr. Brooke, discontentedly; "avenging angels are apt to have a deuce of a time of it in this beastly country."

The captain laughed quite heartily. "Thank you, Mr. Brooke; but I fancy I have faced more formidable foes in my day than these impassable Indians."

"Wait until you have seen these impassable Indians in a rage," said Mr. Weedon. "Mr. Brooke is right. You had better take a couple of good stout blacks with you, or else you may have the devil to pay—and I don't think the mule with the bad leg is worth that."

Mr. Rudd said nothing, but after they had fairly started he brought his horse alongside of Marian's mule.

"Has your father got a revolver, Miss Berrincott?" he inquired. "For, if not, I could lend him one."

"Do you think he will want it?" she asked, a little startled.

"Well, I think he ought certainly to take it with him on this expedition to-morrow. White Village is really no village at all, but a big Coolie settlement, and it lies somewhat isolated, so that if he should get into anything of a dispute with the people he would certainly be at a great disadvantage."

This warning had been given at the beginning of the ride, and though it had sunk deep into Marian's mind, was, for the present, soon forgotten in the more pressing excitement of the moment.

In front of the windmill which served as a place of rendezvous—another deserted windmill, as Mr. Weedon took the opportunity of pointing out—the rest of the party were assembled and waiting. There was Miss McCrie upon the Mosquito yellow back: there was Jess upon that steady animal, of whom Marian had already heard so much, and looking rather shy and very happy, while listening to the words of a young man, in a white sun-helmet and with a fair moustache, who had blue shadows under his eyes which exactly matched those under Jess' own eyes, and who, therefore, could be no other than the second convalescent, Mr. Philippe. Then there was the light-hearted young Irish doctor whom Marian knew already, and whom Miss McCrie had evidently let into the plot. Another doctor who had been neither young, nor Irish, nor light-hearted, might very likely have put a stern veto upon this day's excursion; but fortunately Doctor O'Lynn knew what it was to have a susceptible heart, so he stretched a point—or rather two—and both convalescents had been allowed to go, nothing but wraps and umbrellas being stipulated for.

There was a fourth person waiting in front of the windmill whom Marian did not immediately know how to account for—a long, lean figure, mounted on much too small a horse, seeing that his legs almost touched the ground. Marian's first impulse was to laugh, and in the same moment she recognized Mr. Hibbert.

"Quite an unlooked-for addition to our party," Miss McCrie explained; "I had no idea Mr. Hibbert was ever here on business. And he tells me, too, that you are acquainted."

"Were acquainted," corrected Mr. Hibbert, bringing his pony up close to Marian.

"But I have been told that travelling acquaintances count only for the time being."

"Not with me," said Marian, holding out her hand a little shyly; "I am very glad to see you, Mr. Hibbert."

"Then are you quite sure you don't object to my being of the party?" The question was put in a somewhat lower voice.

She looked up at him in surprise. "I don't understand. What could make me object?"

"Various reasons could. I will tell you one of them later on, if you like, when we have a moment's quiet. In the meantime I think we are off."

And so they were, with Miss McCrie at the head, and the rest of the party following in a straggling line along the rough road. The Mosquito's legs being long and his pace a brisk one, most of the other quadrupeds were forced to break into a canter in order to keep up with him; and as, in spite of the steadiness of her mule it soon appeared that cantering was apt to give Jess a stitch in the side, the natural result was that she lagged behind, and as of course she couldn't be left to herself, Mr. Philippe likewise took to lagging. Marian was glad and provoked, all at once; glad that matters were taking the right turn, and provoked because she would have liked so dreadfully to see what a man looked like when he was talking to a girl whom he was fond of, and what sort of a face he made while listening.

But soon she began to forget her disappointment in the growing interest of the surroundings. Their way led at first by the side of a river, which, seen from a distance, looked like a band of vivid green winding through the parched land. All the bushes and grass that grew far and wide seemed to have crowded to the water's edge, as though thirsty for the precious moisture. Here and there the crimson spike of the flower-cane made a bold splash of color in the midst of the fifty shades of green. Islands covered with tall, waving reeds, sometimes with a prickly gru gru palm as their centre, stood out boldly in the middle of the current, overgrown with a thick growth of wild grape and bordered with huge drooping leaves that flapped over the edge and trailed in the water.

But it was not until she had seen a palmiste towering eighty feet high, and a patch of ground enamelled with begonia, and a hillside covered with bamboo, and a hundred other wonderful things, that Marian began to understand that as yet she knew nothing of the tropics. She had had dreams and visions of what she was going to see, but not in any one of them had anything figured that was quite as beautiful as this bamboo. From a distance she had not immediately understood what it was; it had required Mr. Hibbert to enlighten her. Indeed, how could any outsider guess at the real substance and correct designation of these huge waves of green froth, so airily tossed by the wind? As she drew a little nearer the froth seemed to turn into plumes which grew alive at each puff of air, and this again, as she drew nearer yet, into a flutter as of millions of tiny green wings, which quickened and slackened, but never entirely ceased. It was not until she was close by the bamboo grove, that she would distinguish the highly polished stems, as of smooth, green ivory.

At the foot of the mountains a halt was made. Here the steeds were to be consigned to the black attendants and a convenient spot for picnicking to be sought on foot, for by this time all trace of a path had ceased, and the footing was none too sure, even for a mule.

And now Marian discovered that she had made a mistake when she had fancied that there could be nothing more beautiful in the world than bamboo. She had forgotten that the world also contained such things as tree-ferns. More beautiful? Well, it was hard to say, being entirely a matter of taste, or rather a question as to whether one prefers plumes or lace.

It was under this very roof of green lace that the shawls were spread, the baskets unpacked and shady hats laid aside. To venture further would have meant not only a steep climb, but would have required the services of ever so many cutlasses, was explained to Marian. Marian made no objection. There was a pleasing and restful sameness about this tree-fern glade to which she yielded herself with gladness—green arches, green curtains, glimpses of green galleries winding way out of sight, supported by golden-brown pillars and echoing to the music of water that was still fresh from the hills.

Meanwhile, plates and tongues were rattling cheerily around her. Both convalescents being still on strict diet, it had been found more convenient to make them sit side by side—it simplified matters about helping, as Miss McCrie explained. By this time this kind-hearted lady's plot had become an open secret. Not only did every single member of the party know that he was acting the part of a gooseberry, but also it must be confessed that the greater part of the gooseberries behaved in a manner that was well-nigh outrageous; Mr. Brooke, although painfully heated by his ride, recovering himself sufficiently to vie with Dr. O'Lynn in the making of wretched jokes in which such things as spoons and fever patients and hot and cold fits largely figured; and even Mr. Weedon and the Captain waking up sufficiently to the point of the situation, the former to smile, the latter to chuckle whenever one of these inferior arrows hit the mark.

And certainly it required no doctor to discern the symptoms of fever here, though even a doctor might have found it hard to give the malady its right name. The burning flush that came and went so quickly, the heavy languor of the glance—did they belong to the old fever that was but barely shaken off, or to a new fever which was only waxing towards the crisis?

The patients themselves cared nothing, just as little as they cared for the puns that flew around them, having reached that stage—happy mortals!—in which a desert place really has no advantages over a crowded spot, seeing that other people have ceased counting.

Mr. Rudd, however, had other things to think of besides playing gooseberry, as was shown by the "Williamstown Trumpet," which presently emerged from out of his pocket. But there were no listeners to be had. Dr. O'Lynn was talking to Miss McCrie; Mr. Brooke was struggling to put into shape a joke about a medicine spoon, tantalizing visions of which floated before his mind's eye; and Mr. Weedon had suddenly remembered that he had left something in his saddle pocket. It was a way which Mr. Rudd's friends had, that of suddenly remembering things whenever the "Williamstown Trumpet" made its appearance.

"No, thanks, Rudd," said Mr. Brooke, waking from his reverie, and having given up the joke about the medicine-spoon as a bad job; "no more of that for me. No, thanks, Miss McCrie, no dessert either for me—have had enough of that, too. Give me a good honest English apple and I'll tell another tale, but as for your fruit, all the difference I can discover between them is that some of them taste like pomade flavored with soap and others like soap flavored with pomade."

A chorus of laughing protestations arose, and by the time these had subsided Mr. Rudd had succeeded in securing the captain as a listener.

Marian looked furtively around her: everybody's attention seemed occupied—Mr. Hibbert was helping Miss McCrie to a slice of pineapple; Mr. Brooke was talking to Dr. O'Lynn; the fever-patients were of course quite absorbed. Surely this was the moment that she had been looking for? Now that she was rested from the first fatigues of the day, she felt certain that she could not be satisfied with what she had seen. The longer she sat and gazed the more surely and the more stealthily did the fever of seeing more take possession of her.

Just now it is not likely that her absence would be noticed. With another furtive glance around her Marian rose swiftly from her seat on the ground and gathering her riding-skirt about her slunk away with the stealthy step of a criminal over the thick tangled grasses and towards the inner depths of the forest.

(To Be Continued).

English Golf Courses.

A glance over the plans of the seven championship golf courses of Great Britain reveals the fact that not one possesses a single hole which measures 550 yards, the longest being the seventeenth at Westward Ho, which is 542 yards. St. Andrews possesses two holes of over 400 yards, the fifth of 511 yards and the fourteenth of 516 yards. The twelfth at Prestwick measures 508 yards and the sixteenth at Hoylake 510 yards. There is not a single hole at either Muirfield or Deal which measures 500 yards.

HOW THINGS TURN OUT.

(Exchange)

In the absence of her husband the fascinating young married woman went boating with an old admirer.

"Ah," sighed the old admirer, "if only you had married me instead of Wilkinson."

"Then I should have been with Mr. Wilkinson at this moment instead of you," said the fascinating woman. "How strangely things turn out!"

You must make a lover angry if you wish him to love.—Byron.

SUNDAY SCHOOL LESSON

LESSON XIII.

September 24, 1916.

The Things Which Are Not Seen—Review. 2 Corinthians, 4, 1-5, 4.

Summary.—Lesson I. Topic: Prophecy revealed. Places: Thessalonica, Berea; Athens. Paul and Silas went from Philippi to Thessalonica and preached in the synagogue of the Jews. There were some who received the gospel. The Jews raised an uproar against the apostles who went to Berea and were successful in their ministry.

II. Topic: Living Epistles. Place: The epistle was written from Corinth. The earliest of Paul's epistles was the first one to the Thessalonians. He wrote it for their instruction and comfort. They were not fully established in the doctrine of the resurrection and Paul gave them instruction in that regard.

III. Topic: Distinctive Christianity. Place: Athens. Paul had not been in Athens long before he was stirred up to speak to the people about the true God, for he saw everywhere evidences of idolatry. He was invited to address the people on Mars Hill and he spoke most kindly, but showed the superiority of the religion of Jesus.

IV. Topic: A battle for truth. Places—Corinth; Ephesus; Jerusalem; Antioch in Syria. Paul went from Athens to Corinth where he preached the gospel for a while to the Jews. When they rejected it, he turned to the Gentiles. He continued his labors here for one and a half years. He supported himself by working.

V. Topic: Church unity. Place: Written from Ephesus. Paul addressed the First Epistle to the Corinthians to correct some evils he heard existed in the church there. He emphasized the excellence of the cross of Christ. It was foolishness to the Greeks and a stumbling-block to the Jews, but it was the power of God to believers.

VI. Topic: The pre-eminence of love. Place: Written from Ephesus. Love is the great essential in religion. There are many gifts mentioned, but none of them are of real value apart from love. Love is kind, unprovoked, patient and enduring. Faith, hope and love are the enduring graces, but the greatest of these is love.

VII. Topic: Christian beneficence. Place: Written probably from Philippi. Paul was making an effort to raise money for the poor saints at Jerusalem, and he suggested to the Corinthians that they be ready with their offering at his arrival there.

VIII. Topic: Religious pretense. Place: Ephesus. The preaching of Paul and his associates at and around Ephesus was effectual. So many gave up their idolatry and became Christians that the profits to the manufacturers of images fell off greatly. Demetrius incited a riot and undertook to do harm to the Christians.

IX. Topic: A missionary's farewell. Place: Miletus. On his way to Jerusalem Paul stopped at Miletus and sent to Ephesus for the elders of the church to come to him. They came and the apostle addressed them, calling their attention to his life among them, warning them of the dangers that were before them and exhorting them to steadfastness.

X. Topic: A life-career. Place: Written probably from Philippi. Paul's apostleship was denied by certain teachers who went to Corinth. He showed in this epistle that he had been called to his work. He was a Hebrew and had been abundant in labors and sufferings for the cause of Christ.

XI. Topic: The ministry of witnessing. Place: Jerusalem. On the way from Miletus to Jerusalem, Paul was twice warned of the danger to him in going to Jerusalem, and was urged not to go. He was determined, believing it was his duty. He was cordially received by the church and tried to conciliate the Jewish Christians who had been misinformed about him.

XII. Topic: Paul's life review. Place: Jerusalem. Paul obtained permission to address the mob and made his defence as he stood on the stairs of the tower of Antonia. He urged his Jewish ancestry and training, and told of his work as a persecutor of Christians. He related the story of his conversion. When he spoke of his call to preach to the Gentiles the mob became enraged.

PRACTICAL SURVEY.

Topic.—Paul's care of the churches.
I. Through his personal ministry.
II. Through his doctrinal epistles.
III. Through his defense of the gospel.

I. Through his personal ministry. The lessons of this quarter have brought us into close acquaintance with the life and labors of Paul. His personal piety, his devotion to Christ, his clear conception of the gospel, his love for humanity, his zeal for the Redeemer's kingdom and his faith for its ultimate triumph made him the man for his task. His entire being was devoted to the one calling of preaching Christ and Him crucified. Wherever he was directed to go, he applied himself to the one purpose of unfolding the plan of redemption to all men. He presented the atonement as the fulfillment of all Jewish expectation in religion. To make that nation see that Christ was the Messiah of their scriptures and the fulfillment of types and prophecies and the Redeemer of all men, Paul devoted his every power regardless of what it involved. His unmistakable call to the Gentile world disentangled him from Judaism as far as it affected his reception of Gentile converts into full fellowship in the Christian Church. His personal minis- church council, which granted freedom from the mother church at Jerusalem according to the decision of the first church council, which granted freedom to all Gentiles, touching the law of circumcision. In the various cities where Paul established churches there were converts peculiarly distinguished for their adherence to the principles of Christianity, so that the gospel gained a wide extension through their influence and example. Regardless of the antagonism of the unbelieving Jews, Christian churches were built up. By frequent divine revelations Paul was directed how to conduct his personal ministry in the various circumstances which developed. Thus the same truth was made comprehensive to the different classes of people. Everywhere with Paul it was the "word

II. Through his doctrinal epistles. The lack of personal touch had its effect in the various churches which Paul was obliged to put under the care of others. Matters of doctrine frequently troubled some of them. Various would-be teachers spread confusion. Party spirit crept in. Opposition to Paul as their spiritual instructor arose. Immorality crept in among the weaker members. Christian generosity became irregular. While many continued strong, some weakened under the tests. On the one hand pressure from without tended to produce worldliness. Fanaticism from within tended to introduce standards that were opposed to Christian simplicity. Paul's soul was grieved at every decline. His fatherly forbearance and his regard for their true happiness enabled him to set before them in various epistles such wholesome rebukes and timely advice and withal such tender guidance that they were not left without rules to govern them in Christian life and practice. Recognition of their virtues as well as admonition to nobler conduct appeared in all these epistles.

III. Through his defence of the gospel. Various phases of persecution came to the early Christians. Various hindrances impeded their progress. Paul was skillful in directing matters of that nature. When it came to the issue of Judaism against Christianity, Paul was the only one who could meet the situation. He was the man charged with having turned the world upside down. He was accused of blasphemies and sacrilege. He was singled out and beaten and stoned and imprisoned. He was pursued with false charges of unfaithfulness to the religion of Jehovah. He was despised for granting the Gentiles admission into the Christian church without observing Jewish law. Twice the Roman power saved him from death at the hands of a frenzied Jewish mob. In his defence of the gospel Paul was unmoved by any suffering which was directed upon him, but he determined that the Jews should not be ignorant concerning the mission of the gospel and the hopelessness of Judaism in its ceremonialism as a means of salvation from sin. Christianity was destined to extend its saving power when Judaism was forgotten.

T. R. A.

Busy Days In British Navy

"The men who do not fail us," is Mr. Hughes' apt description of the personnel of the grand fleet. And the country's opinion of its navy could not have been embodied in a happier phrase.

Like all others who have seen them "on their job," Mr. Hughes was impressed by the pink-of-condition, ready-for-anything appearance of Admiral Jellicoe's men. Well may their country be proud of them, for a long period of never slackening training has made them into the most efficient ships' companies that ever manned a fleet. This is no bombast, only a simple, all-important truth.

Some may think the waiting game an easy one to play. But the grand fleet knows differently. They find no easy features in it. Aboard all ships the day's work begins early. "Hands" are roused at 5.30 a. m. by the ship's corporals, who go along the mess decks calling the men to "rise and shine." Out tumble the sailors, who, after stowing away their hammocks, have cocoa served out to them, and then scrubbing down begins.

There are people who believe that a bluejacket spends a lot of his time cleaning "bright work." As a matter of fact spit and polish no longer holds sway in the navy. Scrupulous cleanliness will always remain a tradition of the service, but His Majesty's ships are now gray, grim and businesslike from truck to keelson. One finds in them no gleaming brass or polished gun muzzles to catch the light and thus help an enemy's spotters.

Until breakfast time, 8 o'clock, the sailors are kept busy cleaning up various parts of the ship, and, of course, there are officers looking after them. When the sentry on the halfdeck strikes seven bells in the morning watch, 7.30 o'clock, the midshipmen and other junior officers go to drill. This may be small-arm exercise under the instructional gunnery officer or gymnastic training under the direction of the physical training instructor—otherwise "the india-rubber man. When 8 o'clock arrives the colors are hoisted with what seem quite a pretty little ceremony to a landsman, although to naval men it is only a part of the day's routine. As the ensign is run up on the jackstaff the band plays the National Anthem, while every officer and man turns aft and salutes the colors.

For breakfast three-quarters of an hour is allowed. Mess-decks, flats and the like are then cleared up, and at 9 o'clock the ship's company goes to divisions. Here they are inspected by the officers in charge of the various divisions. After these officers have made their reports to the captain the ship's company musters on the quarterdeck for prayers. "On caps," says the commander, when prayers are over, whereupon the men replace their caps and face forward. The band strikes up a lively tune, and, to the accompaniment of this, officers and men double briskly round the decks, usually with the commander at their head. Double is navy for run, and, as a modern warship may be anything up to 200 yards in length, the crew cover quite a respectable distance during their trot round her decks.

On the quarterdeck they come to a halt again and are then told off to various duties. Some go to gunnery instruction, others to torpedo drill, and so on, while the boys go to school, or, rather, half of them do; the other half are at naval training. In the afternoon there is a change round, so that the boys have both book learning and sea lore drilled in to them in the course of the day.

"The modern bluejacket must be a well educated man, particularly if he wants to obtain promotion, and in the course of his service life he may have to acquire something more than a nodding acquaintance with certain sciences. In order that he may have educational opportunities the admiralty has lately arranged for all first-class ships to be equipped with schoolmasters. Where no schoolmaster is borne a qualified chief petty officer acts in this capacity. In the navy the boy becomes a man at eighteen and is rated ordinary seaman. A few "special" books reach official manhood at seventeen and a half.

Bluejackets have to keep their hand in at many things, and the day's routine must be varied so as to give practice in all these. Instead of gunnery and other armament drill, the forenoon may be devoted to "exercising stations. Naval organization has become a fine art. Only those familiar with the complexity of warship life know how skillfully matters are arranged and what a number of intricate little items of mechanism must be devised to make the machine work smoothly. Every possible contingency is provided against, and there are "stations" for each one. By means of these each officer and man gets taught his place and his job whatever emergency may arise, and as soon as the necessity comes along he goes straight to his post. This explains why it is that our bluejackets show such admirable self-control and coolness when disaster overtakes their ship.

Aboard a warship there are action stations, fire stations, collision stations, and stations for abandoning ship, (which means taking to the boats when the ship is sinking). Practising these comes in the day's work. Being innately conservative, despite its progressiveness in matters that are essential, the navy adheres to old customs where they do not militate against efficiency. Thus everyone in a ship salutes the quarterdeck as he steps on it, a custom which originated centuries ago in sailors crossing themselves before the crucifix that used to stand in that part of a ship. Similarly, although masts and yards have long been abolished, a warship's crew is still told off into foretop men, maintop men, and the like, as in the old wind jamming days.

Dinner is served at 12 o'clock. Our bluejackets are fed now far better than they used to be. All modern ships have a bakery, and a staff of trained cooks prepares Jack's meals instead of this task being left in the unskilled hands of the cook of the mess. But the men still choose their own menu, each mess deciding this matter for itself. And they apply to the various dishes such quaint names as schooner on a rock, a straight rush, or Zeppelins in a cloud (sausages in gravy). If a man does not appreciate the fare provided he describes it as a march past. With dinner the grog station is issued. Petty officers and men receive three-water grog, but the higher ratings receive their rum neat. Out pipes trills the bo'sun's mate at 1 o'clock. Upon hearing this call the men cease smoking and fall in for the afternoon's work. Usually this means a change about from the morning. Those who were at, say, seamanship in the forenoon, changing occupation with those who were engaged upon something else. In this way the whole get an all-round training.

There are in a warship's complement various special ratings who do their own work only, but these may be considered as apart from the general run of the crew. At 4 o'clock comes physical drill, which ends in another double round the decks, and when this is over tea time has arrived.

Should there not be much to do after tea, the watch is called; in other words, the watch on duty remains at work, but the remainder of the crew stand easy. If the ship be at sea there will probably be evening evolutions ordered by the admiral and the nature of which he will decide. Night duty varies. When the ship is in harbor the majority of the crew can turn in, but if she is at sea there is not much rest for anybody, as unceasing vigilance is necessary. The customary time for piping down (going to bed) is 9.30 o'clock, half an hour after the commander has been the rounds, but upon special occasions turning in time will be postponed by half an hour.

During their time off in the evening sailors have plenty of amusement. For the studiously inclined there are night schools, and every ship has its library. Very often, too, officers give lectures upon some service subject.—London Daily Mail.

THE POULTRY WORLD

CLOSE CULLING NECESSARY.

With the price of poultry feeds at high water mark, the close culling of all flocks that do not come up to the highest mark of usefulness should be the object of the poultryman, and the fowls sold on the open market. In fact, this close culling of the flock should be practiced even during the time of lower feed prices. But especially now, with feed at such a high price, the poultry keeper must cull closely to make any profit from his flock. The price of poultry feeds has forced many to dispose of all but their best specimens, and it has been a good thing for the future.

For years the commercial poultry keepers have increased their flocks without increasing the producing powers. In almost every flock good producers were found, but the poultry quarters must be filled with stock each fall, and many pullets each year were placed in the laying houses that were fit only for the market. With the present price of poultry feeds the poultryman must have a producing flock, one in which a majority of the pullets or hens are good producers—fowls that will average the 12-dozen mark during the year. Any flock with a lower average will put the balance on the wrong side of the ledger. By not culling out the late hatches, which, due to some conditions in growing or faults of the parent stock, are not up to the mark in size and vigor, a loss will result.

To winter over these culls which cannot lay until well along in the spring, when eggs are lowering in price, means a loss, and overbalances the good pullets that were properly grown or hatched at the proper time to become winter egg producers. It takes nerve to send to the market pullets that are not easy to obtain, but it is the only correct business method that will mean success to any poultry keeper; and with the latter once realizes this, and culls with an idea that only matured pullets will be retained, that are full of vigor, and are up to standard weight, rejecting all that have not grown in size with the regular flock, then, and only then will the best profits be realized.

No matter how near perfection the breeding stock may be, there will always be each year a percentage of fowls that are not up to the mark, even when grown in the most approved manner. Again, the different hatches may have conditions that differ, and one hatch may have more chicks to cull from than others. No matter how many advocate late hatches, the fact remains that under even good care more culls will be found from a utility standpoint than in the earlier hatches, and closer culling must be resorted to.

The successful poultry keeper of the future will be the one who makes a close study of poultry conditions. When poultry feeds were low in price, lumber lower, poultry equipment at half the present price, the haphazard breeder or poultry keeper had a chance to make a profit. But now the poultryman cannot make many errors before the flock will be on a non-paying basis, and a failure will be chalked up. A well kept flock, properly cared for, will prove a money-maker, but the flock containing half quality fowls and half culls will be running close to the danger mark. "Cull the flock" should be the watchword of every man that hopes to make the most out of poultry.

NOTES.

Keep the fowl well supplied with clean water.

Separate the best pullets from the main flock and feed them for early egg production.

Head or body lice will stunt the growth of the chicks. A few drops of oil rubbed on the heads and under the wings of the chicks will rid them of these parasites.

The first symptoms of black head in turkey are drooping wings and a dull appearance, with the head more or less drawn into the shoulders. This disease is difficult to combat. A means of prevention is: never feed chicks or turkeys on disease infected ground. Isolate infected birds from the flock.

Hens cannot be expected to lay if they are housed in a mite-infested pen. These pests usually give trouble in the hot weather, unless the pens, roosts and nests are sprayed thoroughly once a month with kerosene which has 5 per cent. of carbolic acid in it.

Ducks are usually fullfeathered at ten or eleven weeks of age, and should be in condition for market. If allowed to commence moulting, the food consumed goes to produce feathers instead of into meat production. In a few weeks they will eat up nearly all the profits made up to this age.

A CHANGE OF HEART

"How a girl with your upbringing ever came to take on with a good-for-nothing fellow like that, fair beats me," protested Peter Perkins, his noisy, bald head and scantily whiskered jowl the picture of self-satisfied obstinacy.

"This would never have happened if your poor mother had been alive," he continued, heavily. "Why, he's nothing more than a common soldier."

The last remark, which Mr. Perkins intended as a final clinching of a one-sided argument, had an unexpected effect on his daughter, Molly. She abandoned her attitude of tearful supplication, and, fired with an angry determination, new to her astonished parent, she replied fiercely:

"Common soldier, indeed! And what are you but a common pig killer? I don't care what you say, my Jack's a fine lad, and I'm going to marry him."

Peter Perkins looked rather helplessly in the face of the tornado he had raised. As the insult gradually impressed itself on his slow-working brain, he stiffened grimly and suggested, warningly:

"Be careful, Molly, my girl. Don't forget which side your bread is buttered on."

Molly spluttered in an endeavor to express the contempt displayed by her pretty, round face.

Mistaken in the cause of her silence, Mr. Perkins proceeded:

"Now be a sensible girl, and send this rapscallion about his business, and I'll try to forgive you for what you've said to me this day."

"I don't want your dirty bread," gasped Molly, finding words at last. "And I won't listen to any more against my sweetheart; I'm going to marry him, I say."

"You'll never enter this house again, if you do," threatened Mr. Perkins.

"I never shall," replied Molly, promptly, with a meaning that was lost on her angry father.

The sharp ting of a bell called Mr. Perkins from his back parlor into the shop to dispense pork chops to an over-critical bricklayer's wife. When he returned he found the parlor deserted. Looking through the window he saw, jerking defiantly at him along the top of the wall of the back yard, the scarlet feather of his daughter's best hat.

Molly had put into practical form her resolve for independent action.

A bright-faced little woman labored blithely in a tiny room in Paradise alley.

It was a cosy room. Metal fender, plain wooden furniture, a noisy round tin clock on the mantelpiece, all shone again, telling of the attentions of a vigorous arm.

The baby slumbering in the converted orange-box cradle appeared likewise to have shared in the general burnishing—an unusual commodity in Paradise alley was a clean-faced infant.

Mrs. Molly Dyson sang as she stitched, looking up proudly from time to time at a photograph in a showy gilt frame, hanging over the mantelpiece. It was the picture of a soldier—Molly's husband, Private John Dyson, a typical, good-humored, careless, contemptible British soldier.

The song ceased, and the plain sewing which Mrs. Dyson took in to eke out the princely allowance granted by a grateful nation, was laid aside while the happy wife drew out a much soiled letter written on ragged paper.

"Had a bit of luck, old girl," ran the message. "Was out on the night patrol and spotted some Germans creeping round to the rear of the boys bivouac. I got a move on quick and collected a little party and rounded up the whole lot. My captain says I saved the whole battalion, but I don't know. They've made me sergeant and reported me. So that will be a bit more for the money-box."

And then some intimate messages into which it would be impertinent to pry.

* * * *

Again Molly glanced happily at the cherished photograph. Feeling the need of a confidant, she addressed the sleeping infant.

"Isn't your daddy just the wonderfullest daddy? Him a sergeant. Ha, ha!"—a little hysterically—"and when I think of that silly old buffer and his common soldier!"

A hesitating knock at the street door interrupted the rhapsody. Stealing to the window, Molly peeped out, then jumped back in confusion, murmuring, "Talk of the devil—"

The knock was repeated, more imperiously.

Hastily glancing round to see that all was tidy, Molly opened the door, and in walked the old buffer himself.

Mr. Peter Perkins was embarrassed. His disowned daughter received him coolly, and the old man was a a loss for a word.

He looked about him with curious interest, detecting signs of poverty, bravely concealed.

"How long will it take you to clear out of this?" was his unexpected opening of the conversation.

"I'm not thinking of moving thanks," replied Molly, in surprise. "I'm quite happy here," she added, warmly; "and you can't turn me out of my own home."

"What I mean to say is," explained her father, unfolding a copy of the morning paper containing a long list of "mentioned in despatches," "Who's this 3,711 Private J. Dyson, of the Royal West Hampshires?"

"My Jack," replied Molly, proudly.

"General French seems to think a lot of him," commented Mr. Perkins.

"That's more than you did. After all, he's only a common soldier," was the disconcerting reply.

Peter Perkins winced. He seemed about to abandon his errand. Making an effort he continued:

"Don't make it to hard for me, lass. I know I'm only a silly old dad"—Molly started guiltily—"but what I mean to say is what's good enough for General French is good enough for me. And how long will it take you to pack?"

Molly still looked her doubts.

"Straight, I mean it," pleaded her father. "The wife of a brave lad fighting for his country has no business living in a back alley. There's the old shop at home for your man when he comes back, and comfort for his wife and child, and—dang it all, girl, how long will it take you to pack?"

Molly capitulated. She hung out moist emblems of surrender.

"Ain't you got a kiss for the silly She had.—Manchester Chronicle.

MYSTERIES IN HOLES.

What Becomes of the Earth Rodents Dig From Their Dens?

I have found two weasels' dens on the margin of a muck swamp in the woods that present the same insoluble problem as the chipmunk's hole—what has become of the bushel or more of earth that must have been brought to the surface? Both the weasel and the chipmunk have several galleries and one or more large chambers or dining halls, and how each manages to hide or obliterate all the loose soil that must have been removed is a question which has long puzzled me.

If we had an American Fabre or a man who would give himself up to the study of the life histories of our rodents with the same patience and enthusiasm that the wonderful Frenchman has shown concerning the life histories of the insects he would doubtless soon solve the mystery.

I used to think that the chipmunk carried away the soil in his cheek pockets, and I have so declared in one of my books, but I am now very certain that he does not—only his food stores are thus carried.—John Burroughs.

Wigwag—What do you find the best tonic to sharpen the appetite? Harduppe—Not having the price of a meal.

A MIRACULO

CHOLERA

By DR. FOW

EXTRACT of WILD STRA

Cholera Infantum is one of the common summer complaints of and many die who could be properly looked after on the first the trouble.

It begins with a profuse diarr very often accompanied by vomi and the matter ejected from the sto has a bilious appearance. The chi rapidly loses flesh and becomes weak and languid.

On the first sign of cholera infantum Dr. Fowler's Extract of Wild Strawberry should be administered, and thus check the diarrhoea before it becomes serious.

"Dr. Fowler's" has been on the market for the past seventy years, so you are not experimenting with some new and untried remedy when you use it, but be sure and get "Dr. Fowler's" when you ask for it.

Mrs. B. A. Clewell, Rossway, N.S., writes: "I can recommend Dr. Fowler's Extract of Wild Strawberry most highly. A friend of mine had a little daughter who was ill with cholera infantum, and was given up by the doctors. The little one's mother asked me to come in and see the child. I told her I had a bottle of "Dr. Fowler's," and asked her if she would try it. When the bottle was half used the child was well. This cure was a miraculous one, for I thought the child was dying at the time."

The genuine Dr. Fowler's Extract of Wild Strawberry is manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Price, 35 cents.

Had Pimples and Festering Sores

ON HER FACE.

When the blood gets bad, boils, pimples and festering sores are sure to break out on the face and body. To get rid of them the blood should be cleansed by Burdock Blood Bitters.

Mrs. Charles Jewell, Orrville, Ont., writes: "I feel it my duty to write and tell you about what Burdock Blood Bitters has done for me. I was so pal I had no color at all. I also had pimp and festering sores on my face, and had ached nearly all the time. I h been reading in the paper, and saw the Burdock Blood Bitters was good f such troubles so I tried a bottle and befo it was half done I felt fine, and when th bottle was finished I felt like a new wo man. I tell all my friends about it, an advise everyone suffering from an trouble to use B.B.B."

There is only one B.B.B. That is the genuine manufactured by The T. Milburn Co., Limited, Toronto, Ont.

FARM AND GARDEN

ADVICE TO PRUNERS.

Begin pruning when the leaves are all off the trees and at any time when the weather is not actually freezing. Use the brush for fuel, and so get the orchard all cleaned up before spring. The most useful tool for the work of pruning is a fine-tooth saw about two feet long. Of course, special pruning saws are made, but an ordinary hand saw of the size you desire. Probably the hardware merchant from whom you buy keeps a short-handled pruning shears for one hand, and those with long handles for both hands. You will find both really useful, though while the pruning shears will not be used as much as the saw for pruning trees, they are excellent for pruning cane, vine and bush fruits.

The healthy tree in good form and condition for bearing, should not be pruned very much in one year, for the larger the leaf surface, the greater the growth. About 90 per cent. of the food is absorbed from the atmosphere through the leaves, and every leaf-bearing branch that is cut out reduces the feeding capacity of the tree. We should prune not to diminish the size of the tree, unnecessarily, but (1) to let in the sunshine and thin the fruit so that all left will ripen properly and be also of larger size, and (2) to cut out diseased wood. Any more pruning is injurious to the tree. Just try to keep the centre of the tree open, cutting off branches that will grow too close together, but after all mostly letting the tree have its own way. Young trees that have been planted only a few years will need some attention now. Clip off the sprouts growing in the centre, using the small pruning shears, and have them sharp. This is important in any pruning work; [illegible] the wood, but make a clean close cut that will quickly heal.

When pruning the large bearing tree, cut out all the dead or dying branches. These are usually the result of "fire blight," a bacterial disease, for which the only known remedy is to cut off the diseased wood, and doing it some little way back beyond where it is healthy. disinfect both the wound and saw with corrosive sublimate (one part to 1,000 parts of water) and cover the wound with gas tar. Next, notice where the branches are thickening up, so as to exclude the sunshine and thin judiciously. The tree should be pruned so that the sun will shine some time during the day on every twig that will bear fruit. This will also thin the fruit and it also facilitates spraying, for pruning should always precede spraying.

THE KEEPING OF BEES.

The saying, "The resources of Canada are inexhaustible," is true of no food products more than of honey. An abundance of honey-yielding flowers, with a high average of favorable weather for the production and ingathering of the honey, makes Canada a good country for the bee-keeper. Moreover, the bulk of Canadian honey is of unsurpassed quality, and honey has become, as it deserves to be, a staple article of food in many places, selling readily at satisfactory prices when properly distributed." So states the Dominion apiarist, Mr. F. W. L. Sladen, in Bulletin No. 26, second series, just issued by the Department of Agriculture, Ottawa, that can be had free on application to the Publications Branch of the department. Mr. Sladen furnishes the further information that in Ontario and Quebec, and in regions in the other provinces of he Dominion, there are an increasing umber of people who make bee-keep ng their principal business, some of he specialists in Ontario reaping an ncome in excess of $2,500 per year, hile there are thousands who find it profitable and healthful auxiliary to ir annual revenue. In Ontario one it is estimated that there are 000 bee-keepers. Mr. Sladen, after aling with the advantages of bee- eeping, and extending instructions d advice to beginners, proceeds to al with the different elements involved in bee-keeping and honey pro- uctions. In a plain, concise way he lls of the location the apiary should e given, the most desirable races, the evelopment and handling of the bees, the diseases and enemies to which they are subject and the attention they need at different seasons of the year. He also gives a list, with descriptive illustrations, of the principal honey producing plants with their approximate yielding periods. In fact, it would seem that pretty well everything worth knowing about the cultivation and management of the honey-bee is detailed in this handy sixty-page official bulletin or pamphlet published for gratuitous circulation.

NOTES.

Painting the house, barns and other frame buildings is an investment. It is practical economy. It adds many dollars to the sale value of the farm. It increases the attractiveness of the landscape. It gives the neighborhood a better standing. Unpainted buildings give the impression of failure. They are evidences of the poverty of the soil, the shiftlessness of the farmer, a lack of fruitful harvests. No one who has any ambition wants to locate in a community of unpainted houses. Fresh paint is a profit-winning advertisement for the farm. It is a mark of thrift, a promoter of progress, a signboard to success. Show us a thrifty neighborhood and we'll show you farm buildings neatly painted and fields well tilled, in a community of intelligent, progressive, prosperous farmers.

What would it mean to individual farmers and the country if every home had as many cows as it requires to supply the stable with milk and butter? Perhaps none of us realized what it would mean. It would certainly give more cash from the animals and crops raised, and be the means of greater profits. Doubtless it would mean more than this. It would give more wholesome, nutritious foods and enable parents to rear healthier, stronger, more efficient children. Isn't this worth striving for?

We need more teams and better teams, so that we may do better farming and do it cheaper. The use of improved implements is necessary for profitable farming these days. And the most satisfactory way to get better teams is to get a few work mares and raise colts. The mare should raise a colt as well as do the regular work on the farm.

Heart Fluttering Easily Corrected

GOOD ADVICE TO FOLKS BOTHERED WITH PALPITATION, WEAKNESS, ETC.

If your heart flutters, be careful.

An attack is liable to come on at any time. Excitement, over exertion or emotion may cause it.

If blood rushes to the head, if palpitation and short breath are noticeable, there's cause for alarm.

If you want a good, honest remedy, try Ferrozone. We recommend Ferrozone because we know it's just right for heart trouble. It cured A. F. Beattie, who lives at Allen Hotel, Bay City, Mich. See if your symptoms resemble these:

Some Symptoms of Weak Heart:
Nervousness, Palpitation,
Trembling, Dizziness,
Sinking Feeling, Heart Faint,
Short Breath, Weakness.

Mr. Beattie says:

"I was weak and miserable.

"I was subject to heart palpitation and dizziness.

"As I grew worse I began to have trembling and sinking sensations.

"Ferrozone strengthened my heart, gave vigor to my nerves, soon made me well. It's a great rebuilder."

By strengthening the muscles of the heart, giving proper circulation and causing a general rebuilding of the whole system, Ferrozone is bound to do grand work in heart trouble: try it. 50c. per box, or six for $2.50, at all dealers, or direct by mail from The Catarrhozone Co., Kingston, Ont.

SOUR CREAM RECIPES.

There are almost indefinite uses for good sour cream. When it is but slightly soured, with a scant teaspoonful of soda as a corrective for each pint of cream, it makes delicious ice cream. Here follow some good sour cream recipes:

Chocolate cake—One cupful of sugar, one-quarter cupful of sour cream, one and one-half cupfuls of flour, one tablespoonful of butter, one egg, one-half teaspoonful of soda, one teaspoonful of vanilla, one square of chocolate melted in one-half cupful of boiling water, one teaspoonful of baking powder.

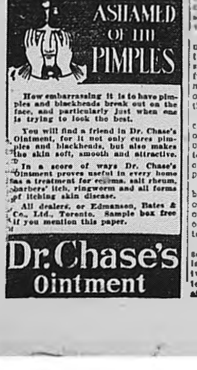
Sour Cream Cookies—One-half cupful of butter, two cupfuls of sugar, one and one-half cupfuls of sour cream, one rounding teaspoonful of soda, two eggs, one teaspoonful of vanilla, flour to roll soft.

Steamed Pudding—One cupful of molasses, one cupful of sour cream, two cupfuls of Graham flour, one teaspoonful of soda (rounding), one cupful of raisins, one teaspoonful of cinnamon, one-half teaspoonful of cloves, one-half teaspoonful of salt. Steam three hours.

Raisin Puffs—Two eggs, one quarter cupful of butter, two cupfuls of flour, one cupful of sour cream, one cupful of raisins, seeded and chopped, one teaspoonful of soda. Steam in cups one hour and serve with any good pudding sauce.

Johnny Cake—One tablespoonful of butter, two tablespoonfuls of sugar, one-half teaspoonful of salt, one egg, one cupful of sour cream, one cupful of cornmeal, one cupful of flour, one teaspoonful of soda.

Graham Muffins—One cupful of sour cream, one-half cupful of molasses, two cupfuls of graham flour, two eggs, well beaten, one-quarter teaspoonful of salt, one teaspoonful of soda. Bake in quick oven.



ASHAMED OF THE PIMPLES

How embarrassing it is to have pimples and blackheads break out on the face, and particularly just when one is trying to look the best.

You will find a friend in Dr. Chase's Ointment, for it not only cures pimples and blackheads, but also makes the skin soft, smooth and attractive.

In a score of ways Dr. Chase's Ointment proves useful in every home as a treatment for eczema, salt rheum, barbers' itch, ringworm and all forms of itching skin disease.

All dealers, or Edmanson, Bates & Co., Ltd., Toronto. Sample box free if you mention this paper.

Dr. Chase's Ointment

England and France

(New York Tribune).

War fills so much of the horizon while it is going forward that there is always a temptation to set down as permanent things which are transitory and dependent upon the conditions and emotions growing out of conflict. This is particularly true of the hatreds that grow out of strife; it is only less true of alliances, and there is sound reason for refraining from attaching too much importance to alliances which are made during the war.

And yet, having said this, it remains true that no more surprising, no more interesting, and certainly no more hopeful sign can be found in the whole history of the present conflict than the slow, steady but ever growing friendship between France and Britain, conditioned upon a growing understanding between two peoples who over centuries have either misunderstood each other or too well understood the less attractive sides of their neighbor.

Now more than all else the progress of the war has taught Britain the true France—the France that always existed. Nothing is more preposterous than the notion that the France of today is different from the France of yesterday. But what millions of Englishmen have seen is the true France that escapes the mere traveler and for the mass of the people of England as of America, France was just a geographical expression.

And no one can read the British press, the letters of the soldiers in the trenches, the comments of military critics and the simplest of civilians without feeling that there has come home to the whole British people a newer and truer appreciation of a great people long their enemies and only recently their allies.

Over and over again, sometimes a little naively, sometimes crudely, but with unmistakable sincerity and conviction, there is spread out in the testimony of British soldiers an unmeasured admiration for the men and women of France, for the courage, the devotion, the steadfastness of the French living in the midst of their ruins, in the presence of their dead, on the very edge of that abyss which yawns beyond the firing line.

Conversely the understanding of the British by the French has marched forward a little more slowly. The awful doubt of the days when Britain seemed irresolute, when the war had come, this remained in the French mind for months. Small wonder, too, that for days, weeks and months France waited anxiously, a little despairingly, for Britain to be ready.

Yet, with it all, with the doubts, the disappointments, the delays, no one who knows France can fail to recognize that appreciation of British purpose, British loyalty, above all, British good faith, has increased with every succeeding month of the war. No one can mistake the fact that today, when Britain is at last beginning to lift a portion of the terrible burden of the war off French soldiers, there is a final and a just appraisal of Britain from the Pyrenees to the German firing line.

In nothing has German intrigue been less successful than in the effort to foment trouble between the two allies. The attack upon Verdun was beyond all else an attempt to convince France that Britain was not ready to help her and never would be, that France must surrender or die.

French military authorities measured this threat and they appraised French spirit accurately. There is nothing in the whole war finer than the French and British course in the Verdun crisis. Actually the British were still unready, but Sir Douglas Haig promptly offered to begin. Joffre declined to let him. He chose to have France "carry on," terrible as was the cost, until the British were ready.

Always, too, in the later months of the war the British have frankly and without question conformed to the will of the French military commanders. Britain has sent hundreds of thousands of men to France and in effect turned them over to the orders of Joffre. His will has prevailed. Even in the matter of Saloniki Kitchener bowed to Joffre and British troops followed the French to the Balkans.

After all, the amazing thing about the Anglo-French alliance is not that it has not always worked perfectly, but that it has worked at all, that it has worked with ever increasing efficiency and that out of the fusion of these people, so different in their race history and in their traditions, there has grown a mutual confidence and respect which it is not too much to say will remain a potent influence in European history for many decades at least.

The growth of Anglo-French confidence has quite baffled the German. From the outset his higher policy has been directed at estranging two enemies that he might destroy them separately. To-day he still warns Frenchmen that the British mean to hold Calais permanently, and in the same breath he whispers to the British that they have only to sacrifice France and the peace that they desire is within their grasp.

And to such appeals Frenchmen and Britons remain equally deaf. It is something more than a marriage of convenience, this Anglo-French alliance, and it is steadily taking on a better and more enduring character. The British soldier was the first to know the real France. He became at one time a missionary at home and a true representative in France. Against the common enemy—and the enemy of the things that France and Britain loved and served in common—the alliance took definite form.

It is a fact of more than passing importance that the two great democratic nations of Europe, nations with widely different ideals of democracy, but with a wide area of common ground, should thus be united by bonds which will endure beyond the war and influence human history for long years to come. In this alliance there exists a real and a sufficient counterpoise to that German peril which has threatened all democracy, ours as well as European.

As we enter the third year of the Great War there are grounds for confidence and for hope that did not exist one year ago, could not be dreamed of two years ago. Already the worst dangers are passed. It is no longer a question of how much of all we love and hold to Germany can destroy—the German horde is no longer on the advance. The problem remains to rescue from the hold of the beast that which he seized in his first mad foray. It is no longer a question of saving France; what remains is the task of rescuing Belgium, of restoring Serbia; above all, of having done with the German effort to destroy all else in this world to the greater glory of Teutonic Kultur.

And the weight of this task in Western Europe must fall upon the British. The French share has been more than performed. Still, in proportion to her resources, France is going forward; but a willing Britain must bear the brunt of the battle which will establish the victory already half won and insure the safety of our civilization and our democracy.

It is easy to perceive that with the performance of this task, with the making of this sacrifice, a final basis of regard and respect will be reached between the two great liberal powers, and the alliance between France and Britain will be cemented by the blood of their sons, shed in a common cause.

There is no greater fact in the opening days of the third year of the conflict than this Anglo-French relation, now firmly established beyond even the reach of German intrigue. It is alike the assurance of coming victory and the guarantee of the endurance of the things which many of us care most for in life.

MOTHERS

REMEMBER! The ointment you put on your child's skin gets into the system just as surely as food the child eats. Don't let impure fats and mineral coloring matter (such as many of the cheap ointments contain) get into your child's blood! Zam-Buk is purely herbal. No poisonous coloring. Use it always. *50c. Box at All Druggists and Stores.*

ZAM-BUK

LIQUID CATARRH REMEDIES USELESS ONLY RELIEVE---NEVER CURE

They go direct to the stomach, have very little effect on the linings of the nose and throat, and entirely fail to cure. Only by cleansing the air passages by relieving the inflammation and killing the germs is cure possible. No combination of antiseptics is so successful as Catarrhozone. In breathing it, you send the richest pine balsams right to the seat of the disease. Irritating phlegm is cleared out, hoarseness, coughing and hacking are cured. For a permanent cure for Catarrh, nothing equals Catarrhozone. Get it to-day, but beware of dangerous substitutes meant to deceive you for genuine Catarrhozone. All dealers sell Catarrhozone, large size, containing two months' treatment, costs $1; small size, 50 cents; sample size, 25 cents.

POLITENESS IN CHINA.

It Takes a Peculiar Form at Times, Particularly at Dinner.

A Chinese prides himself on his politeness more than on anything else. So when he meets you he shakes his own hand. When he goes to leave you he folds his hands across his breast and makes three bows.

Some places in China it is considered polite, when you are invited to a friend's house, to throw the chicken bones on the floor. As you are having dinner and chatting about the rice crop it is proper form, when you get through with a drumstick, to toss it on the floor and go on with the conversation.

The host takes this as a compliment, for it shows that you know that he has servants enough to clean the things off the floor. If you put the bones on the plate it reflects on the number of servants that he can afford to keep.

If you leave a dollar on your dressing table your room boy wouldn't steal it for anything: he would lose face if he did, but when your back is turned he will exchange it for a counterfeit. He can do this and still keep his face. If you miss something about your room and know positively that your boy stole it and accuse him he will deny it as long as he has breath. Under a slow fire and salt he would still deny that he had taken it; to admit that he had stolen your knife would be to lose face.

But after accusing him, if you will let it go for a day or two the knife will mysteriously return; or you will find it under a handkerchief on your dresser. You know that he has returned it, and he knows that you know, but his face has been saved, and as a result he is light hearted and happy.—Homer Croy in Leslie's.

HOMEMADE BREAD.

How to Make the Staff of Life Quickly and Well.

Break two cakes of yeast into a cupful of water at blood temperature. Put a tablespoonful of sugar on the yeast to stimulate its quick growth. While this soaks, warm two cupfuls of milk with a cupful of water. This, with the water over the yeast, makes a quart of wetting sufficient for four loaves.

In a large mixing bowl put several sieves of flour and make a depression in the middle of the flour, in which put a level tablespoonful of salt and a heaping tablespoonful of lard. Pour the liquid and the yeast upon the flour and mix with the hands, working the flour from the outside into the liquid in the middle of the mass. Make a stiff dough and lift the ball out, putting away any remaining flour for future use. If the flour is granular let the dough lie on the board for ten minutes, covered with a warm bowl, that the flour may properly absorb the moisture. If the flour is not granular this wait is not necessary.

Now shape the dough without kneading, lay the ball in a buttered bowl and butter the surface of the dough to keep it soft. Cover and let it double in a warm place, an hour to an hour and a half. If you wish still further to hurry it let the bowl in warm water and place a smaller bowl of warm water on the lid of the large bowl containing the dough.

When doubled shape quickly into ten baking pans for the second rising and bake when again light. This recipe is excellent for use when one must have bread in a hurry. Half of the dough may be made into crusty rolls.

Every Stiff Joint Limbered, Rheumatism Cured!

That Old Family Remedy, "Nerviline" is Guaranteed for the Worst Cases.

CURES NEURALGIA, BACKACHE, LUMBAGO.

Rheumatism to-day is unnecessary. It is so well understood and so readily curable that every day we have reports of old chronics being freed of their tormenter.

"I can speak confidently of the Nerviline treatment, for the simple reason that it cured me," writes Albert B. Cornelius, from Kingston. "You can't imagine how stiff and lame and sore I was. Nights at a time I couldn't sleep well. I followed the Nerviline directions carefully—had it rubbed into the sore regions four or five times every day. Every rubbing helped to reduce the pain. The swelling went down. I got a fair measure of relief in a week. I also took two Ferrozone Tablets with my meals. They increased my appetite and spirits, purified my blood and toned up my system generally.

"I am as well to-day as a man could be—in perfect good health. I give Nerviline all the credit."

A large family size bottle of Nerviline costs only 50c., or the trial size 25c., and is useful in a hundred ills in the family. Whether it's toothache, earache, headache, neuralgia, lame back or a cold, Nerviline will cure just as readily as it will cure rheumatism. For family use nothing equals Nerviline.

MOLASSES GOODIES

As Made Successfully by Our Forebears.

The following recipes for molasses breads and cakes are well tried, and come down from the time of the grandmothers with certificates of character:

Boston Brown Bread—To one cup molasses, add one teaspoonful of soda, one of salt, two and one-half cups of milk, one cup of flour, one cup of rye flour and two cups of Indian meal. Steam three hours. This makes a moist and delicious bread.

English Brown Bread—Dissolve half a cake of yeast in two cups of water, and make a sponge with two cups of graham flour. Add one tablespoonful of molasses, one of lard, and one teaspoonful of salt. Stir in two cups of rye flour, and knead slightly. Bake in small loaves in a moderate oven for an hour.

Rye Bread—Dissolve one-half cake of yeast in a cup of milk, which has been scalded and cooled. To one cupful of hot water add two tablespoonfuls of lard, two of molasses and one of sugar, two teaspoonfuls of salt, one cup of flour. Pour in the yeast, beat well, and let rise until light. Add rye meal until stiff enough to knead. After kneading well form into loaves and let rise again and bake in a moderate oven.

Soft Molasses Cake—To one pint of molasses, add one teaspoonful of soda and two of cream of tartar, with one well beaten egg, a half cup of milk, one tablespoonful of ginger, one teaspoonful of cinnamon, one tablespoonful of butter, and two and one half generous cup of flour. Beat well and bake for one half hour.

Soft molasses cake, baked in two layers, with a filling of whipped cream, makes a delicious dessert.

Gingerbread—Cream together one cup of sugar and one half cup of butter with a pinch of salt. Dissolve three-quarters of a teaspoonful of soda in two tablespoonfuls of molasses, and add to sugar with a half cup of milk and a scant teaspoonful of ginger. Mix well with two cups of flour, and bake in a greased tin a moderate oven.

Ginger Snaps—Boil two cups of molasses and add one tablespoonful of soda, one cup of lard, one tablespoonful of ginger, one teaspoonful each of cinnamon and cloves. When cool stir in enough flour to make a stiff batter. Roll out very thin and bake in a hot oven.

Ginger Drops—One large teaspoonful of soda dissolved in two-thirds of a cup of molasses. Add one beaten egg, one cup of brown sugar, one tablespoonful of ginger, pinch of salt, and one-half cup of cold water. Mix with flour to a stiff batter, and drop by teaspoonfuls on greased pan. Bake in moderate oven.

Cheap Fruit Cake—This may be made in a loaf or in small cakes. One cup of butter, one cup of sugar, one cup of molasses, one cup of milk, one cup of raisins, one cup of currants, one well beaten egg, three teaspoonfuls of spices, and four cups of flour with a teaspoonful of salt. Dissolve the soda in the molasses and sift the fruit in the flour. One-half of this recipe will answer for a small family.

How many hairs has a Bear?

We doubt if there is many person in Canada who is not interested in Furs, and who does not admire their beauty, softness and warmth; but how many have ever thought of the great number of hairs required to cover a skin to produce this warmth and softness?

The actual number of hairs on any given skin can be actually determined by mathematics and an abundance of patience.

We have cut a piece out of a black bear skin, one inch square in size—have sealed and deposited it with the bank and are giving

$300.00 IN PRIZES

to the 64 persons who are nearest correct in their estimate of the actual number of hairs on that one square inch of black bear skin.

This contest is entirely free to every one who complies with the conditions, and we might frankly state that the sole object of this contest is to familiarize as many people in Canada as possible with the wonderful bargains they can secure in stylish guaranteed Furs and Fur garments, through Hallam's system of dealing direct "From Trapper to Wearer."

Just send today for a copy of the 1916-17 Edition of

HALLAM'S FUR STYLE BOOK

on the back cover of which are full particulars of this Zoological contest.

This 1916-17 edition is a handsomely printed 32 page book—fully illustrates the latest styles and models of Fur Coats and Sets and will show you how you can save many dollars on furs. It will pay you to send it. Don't fail to send for it to-day and have a free chance of sharing this $300.00. Be sure to address as follows:

RAW FURS
We are the Largest Cash Buyers of Raw Furs direct from Trappers in Canada—Our Raw Fur Quotations sent Free.

GUNS
Traps—Animal Bait, Fish Nets, Tackle, and complete line of sportsmen's supplies, at very low prices. 32 Page catalog free.

TRIAL OF A DEAD MAN.

Charles de Bourbon, high constable of France, died in conquering Rome, which his leaderless soldiers straightway sacked. For this crime it was necessary to find a scapegoat, so "on July 26, 1527, in the presence of King Francis I., on his seat of justice, assisted by the peers of France and the assembled chambers, Jean de Surie, first usher of the court, called Charles de Bourbon three times—at the bar of the parliament, at the marble table and at the marble steps—and then reported that the said De Bourbon had not appeared. The sentence was drawn up, then solemnly read. The connetable de France, dead, was condemned, his goods returned to the crown, and the door of his palace by the Louvre was painted yellow.'"

"Dost Thou Love Pictures"?
--Taming of the Shrew

In addition to our large stock of Antique Furniture, China and Glassware, we have a very choice collection of paintings of more than ordinary merit, which we are always pleased to show to lovers of art. The House for Gifts.

DUELS OVER TRIFLES.

At One Time Almost Any Incident Was an Excuse for a Meeting.

Duels at one time were fought for the merest trifles. Colonel Montgomery was shot in a duel about a dog. Colonel Ramsay in one about a servant, Mr. Featherstone in one about a recruit. Sterne's father in one about a goose, and another gentleman in one about a bottle of anchovies. One officer was challenged for merely asking his opponent to pass him a goblet. Another was compelled to fight about a pinch of snuff. General Barry was challenged by a Captain Smith for declining wine at a dinner on a steamboat, although the general pleaded as an excuse that wine invariably made him sick, and Lieutenant Cowther lost his life in a duel because he was refused admittance to a club of pigeon shooters.

In 1777 a duel occurred in New York between Lieutenant Featherstonhaugh, of the Seventy-fifth, and Captain McPherson, of the Forty-second British regiment, in regard to the manner of eating an ear of corn, one contending that the eating was from the cob and the other contending that the grain should be cut off from the cob before eating. Lieutenant Featherstonhaugh lost his right arm, the ball from his antagonist's pistol shattering the limb fearfully, so much so that it had to be amputated. Major Noah lost his life in 1827 at the dueling ground at Hoboken in a simple dispute about what was trumps in a game of cards.—London Chronicle.

I can tell where my own shoe pinches me.—Cervantes.

FRESH CURTAINS.

How to Make Home Laundrying Really Effective.

"Many women," says an expert, "think that the proper way to mount a curtain on a stretcher is to first fasten down each of the four corners and then to stretch the edges into shape by pulling from the corners.

"This is entirely a mistake, and curtains mounted in this way are almost sure to have the mesh broken or torn in several places, even if the pattern and the scalloped edges dry to look straight and even.

"In mounting a lace curtain over a stretcher, one should always begin at the middle point of the long border edge. Slip this over the pin at the centre on the top edge of the frame; then, working from the centre, first to the right and then to the left, slip the successive scallops over pins until the entire long border edge is attached to the pins on the upper bar of the frame.

"The curtain is now hanging with its unpatterned edge falling loosely downward. The next step is to attach the bottom end of the curtain to the frame pins. This usually has the same border as the long, patterned edge. In fastening it to the stretcher work downward from one of the top corners until you have all the patterned edge attached to the pins.

"Now notice how many inches on the top bar of the frame are covered by the long border edge and how many inches at the side and then adjust the remaining two sides of the frame to correspond exactly in the number of inches. Fasten the other short edge of the curtain, which will be the top edge when hung, and lastly fasten the other long edge to the frame pins.

"The last edge may have to be puckered a little to make it fit over the pins, but the puckering will not show when the curtains are dry, and, what is more to the point, the edge will not pull down after it is dry.

"One other thing that should be emphasized is that the long border or patterned edge of lace curtains should always be dried at the top of the frame. Removing the curtains from the stretcher after they are dry requires some care. One should not try to take the edges from the pins until the frame has been sufficiently loosened, so that there will be no strain on the delicate mesh; otherwise threads are almost sure to be strained and broken.

"A curtain stretcher to be entirely satisfactory should have movable pins and should be made of well seasoned wood. Stretchers having stationary pins may or may not have the pins placed at intervals which will match the scallops in the particular curtains one wishes to clean, and unless they happen to match exactly the size of the scallops it is not possible to dry the scallops in good shape. Stretchers which have movable pins can be perfectly adjusted to either large or small scallops."

SHIELD FOR SOLDIERS.

Quite an arsenal of ancient weapons has been revived in the great war; and, by-the-bye, British soldiers may be provided with shields fashioned like those of the Romans of old. Sir A. Conan Doyle, who has given special attention to the subject—as indeed he has done to everything connected with the struggle—long has advocated this course. Seven-sixteenth of steel will stop a point-blank bullet; and, though a shield of two feet by three feet would weigh thirty pounds, this protection would require to be carried only by the first attacking detachment.

Do not hem a heavy silence cloth, as the hem is apt to make a ridge under the tablecloth. Buttonhole the cloth edges with white darning cotton.

WIT AND HUMOR

A BLUFF.

(Detroit Free Press)

"Pa, what is a bluff?"

"A bluff, my boy, is a wail the average traveling man makes about the money he loses every week on his expense account."

DID HIS BEST.

(Boston Transcript)

She (during the spat)—You should have married some stupid, credulous girl.

He—Well, my dear, I did the best I could.

BOBBY KNEW.

(Boston Transcript)

Fiance—And, will Bobby be sorry when I marry his sister?

Bobby—Yes, I will, 'cause I like you.

AMATEUR GARDENING.

(Washington Star)

"How did your garden turn out?"

"It helped. The work I did in it gave me a great appetite for the vegetables I had to buy."

A GREAT HUNTER.

(Baltimore American)

"Did your brother have much success in his last season of shooting?"

"Bagged every guide he took out till he couldn't hire any more."

A PHILOSOPHER.

(Detroit Free Press)

"He's a philosopher." "So?" "Yes, he bears other people's troubles with a smile."

DIFFERENT.

(Life)

Mrs. English—Is your husband a representative American? Mrs. U. S. A.—No, indeed! He's a senator!

THE AMATEUR FARMER.

(Judge)

Mrs. Suburb—Potatoes cost $5 a bushel in Germany. Mrs. Suburbs—They must raise their own, like us.

EIGHT HOURS TOO MUCH.

(Washington Star)

"Are you in favor of an eight-hour working day?"

"I don't go so strong as that," replied Farmer Corntossel. "If my boy Josh was to work three hours a day two days in succession, I'd think he was doin' purty good."

EXCEPTION TO THE RULE.

(Boston Transcript)

Mr. Hodd—You should remember, my son, that there is nothing attained without labor. You need not expect to get something for nothing.

Tommy—Huh! I get lots of lickings for nothing, anyhow.

STRIKING THOUGHT.

(Sacred Heart Review)

"Do you think that the automobile will displace the horse?" asked the conversational young woman.

"It will," answered the nervous young man, "if it ever hits him."

WISE DINAH.

(Puck)

"Dinah, wilt thou take Erastus for thy wedded husband, to have and to hold from this day forward, for better, for worse, for richer, for poorer, in sickness and in health, to love, cherish and obey, till death you do part?" "No, sah. I takes him just as he is. Ef he gets any better he'll go to Heaven. Ef he gets any worse I'll take him to the police station."

VALUABLE METAL.

(Town Topics)

Brother Bob—"She's as good as gold!" Sister Sue—And as expensive as platinum.

AN EXCEPTION.

(Washington Star)

"That man makes himself very disagreeable."

"Yes," replied Miss Cayenne. "But so many people are permanently unpleasant that I rather admire a person who is only so when he means to be."

THE PROSPECTS.

(Boston Transcript)

Mr. Roxley (coldly)—And what are your prospects, may I ask?

Jack Sooter—Pardon me, sir; I merely love your daughter. I have not been so mercenary as to look you up in Bradstreet's, and therefore I cannot answer your question.

A REPEATER.

(Boston Transcript.)

"I don't see why you call Perkins stupid. He says a clever thing quite often." "Exactly! He doesn't seem to realize that it should be said only once."

CAN'T FOOL HER.

(Judge)

"I intend to give my wife $50 for Christmas."

"Go ahead. He gives twice who gives quickly."

"Oh, you can't fool her that way. She won't think it's a hundred."

THE ROMANTIC WEST.

(Birmingham Age-Herald.)

"While out west did you see many cowboys?"

"Troops of them."

"But I thought barbed-wire fences had largely displaced cowboys in the cattle country?"

"I wasn't in the cattle country. I was visiting a motion-picture city."

DEPENDS ON CONDITIONS.

(Baltimore American)

"Is boiling a refining process, pa?"

"That depends, my son, whether it is done in flour mills or at the table."

THEN SHE STARTED.

(Boston Transcript.)

"What did you say to your wife when you got home at 12 last night?" "My dear." "Is that all?" "Yes; she began talking then."

CHOLLY'S ALIBI.

(Judge)

Gwendolyn—"I don't believe Cholly's ever done anything to be ashamed of."

Gladys—"How could he? He's never done anything at all!"

ARBITRATION ALWAYS.

(Louisville Courier-Journal)

"What would happen if an irresistible force should meet an immovable body?"

"It is not necessary for anything to happen. I maintain that arbitration is always feasible."

A MYSTERY.

(Boston Transcript)

"Who was that lady I saw yer talkin' to at the ball game, Jimmy?"

"That was our school teacher. I was just tryin' to make her understand how the game is played, but I wasn't any use. Gee! I don't see how she ever got to be a school teacher!"

A CALCULATING GIRL.

(Louisville Courier-Journal)

"I wish I could be certain that Algernon really loves me."

"Why?"

"Then I could be sure he would remain hitched while I look for a better catch."

SETTLED.

(New York World)

"My boy is always taking things apart to see how they are made, but he is never able to put them together again. I don't know what to make of him."

"That's easy. He has just the right temperament for a critic."

"The Clarks are in easy circumstances, I believe," remarked Cobb. "Yes," assented Boyd, "they can owe people money and feel easier about it than any others with whom I have ever had anything to do."—Chicago Herald.

The New Dress Goods

A CASE OF THE New Dress Goods this week direct from Great Britain contains some of the very latest and most fashionable fabrics for fall.

Fine English Botany Serges in navy and black, Chine Satins, Satin Armures, Bengalines and Fancy Tweeds.

We want to emphasize Serges. They are the most popular of the season's fabrics and you will find the very best that can be had in our stock. They were bought in good time and are very much better values than to-days prices

Per yard 75c. $1.00, $1.25 and $1.50

Men's Tweed and Worsted Suits

Well worthy of a second look

We were fortunate to be able to secure these suits when we did—today we couldn't buy them at dollars more for each suit.

The materials are worsteds and some dressy tweeds. There's good variety in browns, greys and blue mixtures in the neat check and stripe and the important thing of all is that they are of splendid wool cloth. These suits are worth to-day $18.00 and $20.00

..........................Special at $14.50 and $16.50

STEPHAN BROS.

NEIGHBORING VILLAGES & COUNTRYSIDE

News of the Week Collected by Staff of Live Correspondents

HANOVER

Hanover rate-payers have been getting their tax notices this past week, and some have been taken back at the amount to be "coughed up." Our rate this year was 23 mills. Last year the rate is 23.8. The reason given for the increased rate this year is the expensive road work of last year which was not paid for, the provincial war tax and other items. The council considered that the ratepayers would be better able to pay the increased rate this year with factories running full time than they were last year.

Mr. Peter Fischer, aged 21 years, son of Mr. Valentine Fischer of the Neustadt Road, had a very narrow escape from death. He was leading bull into the stable after watering it when it took a vicious streak. It knocked him down in the stall and gored him considerably about the hips and legs, when he was fortunate enough to crawl away out of reach. He reached the barn yard in safety and called for help. Dr. Stalker was called who found upon examination that the young man was not seriously injured. Had the bull struck him in the stomach at the outset and knocked the wind out of him, no doubt he would never have got out of the stable alive.

A very pretty wedding took place in the Holy Family church on Tuesday morning Sept. 19 at nine o'clock when Dorothy Charlotte, oldest daughter of Mr. and Mrs. Andrew Zisterer was united in the holy bonds of matrimony to Leander Beninger, son of Mr. and Mrs. Anthony Beninger. The bride was assisted by her cousin Miss Ludwina Kunkel and Mr. Herb Beninger acted as groomsman.

The Hanover Show was quite on a par with other years. The showing of horses was really splendid, in fact the general live stock display was creditable. The roots and vegetables were fair considering the year. In the Farmers' Horse race Jasper of Mildmay took first, Thompson of Chesley second, the Girodat of Hanover third. In the 2.50 class, Bessie H., owned by Beattie of Chesley got first money; Sydney H., owned by J. Hunter of Durham, took second, and "John," owned by Ernst of Walkerton got third.

Mr. H. S. Livingston, who has for some time been relieving the Manager of the Royal Bank of Canada at Elmwood, has been transferred to the King & Spadina, Toronto, branch.

At a meeting of the ratepayers of the Hanover Public and Continuation school held on Saturday, Sept. 16th, Mr. Herman Grustner was elected as trustee to fill the vacancy caused by the death of the late Mr. George Hellinger.

CARGILL

Sunday was Anniversary for the Methodist Church and Rev. Cosens of Walkerton, delivered two very able sermons to large Congregations. Rev. Mr. Almack occupying the pulpit in Walkerton.

Rev. Perdue of Walkerton conducted the services in the Anglican Church on Sunday afternoon, as Rev. Homer is not expected to resume his duties until Sunday Oct. 8th.

Mr. and Mrs. J. J. Cassidy of Riverdale were in the village on Sunday.

Mr. W. T. Clancy of Toronto called on friends here on Sunday.

Mrs. R. and Mrs. C. Elder visited in Walkerton on Monday.

A very pretty wedding took place in the R. C. Church Lucan on Tuesday, Sept. 26th. Rev. J. Hogan officiating, when Miss Jennie McKinnon became the wife of Martin Bester, our popular tonsorial artist. After a short honeymoon they will take up their abode in the house lately occupied by Wes Brownscombe. We welcome Mr. and Mrs. Bester to our village and wish them a long and happy voyage over the matrimonial sea.

Mrs. Thos Mahoney spent the week-end in Southampton.

Miss Lilly Selling Sundayed in Mildmay.

Mr. and Mrs. J. B. Campbell of Chesley passed through our burg on Friday en route to the Pinkerton Fair.

Mr. W. L. Keeling who spent the holidays here left on Monday for Toronto, where he resumes his studies at the University of Toronto.

Mr. W. D. Cargill M. P. P. spent a few days in the Queen City last week.

Mrs. G. Detwiler, will receive on Tuesday afternoon, Sept. 26th from 4 to 6 o'clock and after on the 4th Tuesday of each month.—Palmerston Spectator.

A rink of bowlers composed of G. F. Saunders, W. D. Cargill, C. W. Keeling and R. A. Fowlie, visited Teeswater on Monday and had a friendly game and on tallying, the finish was Teeswater 2 up.

Chauffer Haumore was in Lucan the first of the week attending the Bester—McKinnon nuptials. Soon be your turn now Andy seeing that the correspondents are so backward in taking the move.

A big Patriotic ball is the bill-of-fare for Friday night, Sept. 29th in the C. O. F. Hall, under the auspices of the Women's Patriotic League.

The Concert held in the C. O. F. hall on Monday night was very well attended and a good programme was rendered. The Orchestra and Miss Stanesel were applauded on each occasion.

While turning the corner at the planing mill on Monday afternoon, Cameron's "Darky Hal" shyed, throwing Geo. Welsford to the ground, stunning him for some time but we are pleased to hear he is gaining rapidly.

Read the Cargill write-up on page 5. Additional Cargill news on page 5.

GLAMIS

Miss Kate McKinnon, of Chicago, Ill. is home on a visit to her mother, Mrs. Catharine McKinnon.

Mrs. Murd. McKay has returned from visiting friends in Toronto.

Miss Nora McNally left on Monday morning to attend Faculty in Toronto.

Mr. and Mrs. Allan McKinnon of Centre Bruce, and Mrs. (Rev.) McCormick of Kenilworth were Sunday visitors at Misses Howson.

Rev. E. A. DeMille visited friends in Hamilton last week.

Quite a number from here attended Kincardine and Pinkerton Fairs on Friday.

Pte. Ernie H. Cunningham of 209th Batt. Camp Hughes, Man. arrived at his home here on Monday to spend three days with his parents and sister here. His Batt. purposes leaving for overseas shortly. All were pleased to see him and hope he may soon return again.

Miss McDonald of Toronto has been a guest of Rev. and Mrs. Reith, for the past week.

Miss Pearl Hush, Boundary West, is under the Drs. care with Typhoid Fever and all hope to hear of her speedy recovery.

Mrs. Madden returned to her home in Hamilton on Friday after a month's visit with Mrs. Groves.

Mr. Chas. F. McKinnon returned from the West last week owing to the very critical condition of his father, Mr. Allan McKinnon.

Wedding Bells are ringing on the Boundary West.

Miss Jennie McKinnon returned on Monday night, to their home from visiting friends in London and Toronto.

Nellie McBride of Paisley has been visiting her friend, Alberta Kirktown

On Friday last Mrs. Catherine McKinnon received official word from Ottawa that her son, 117,089 Pte. John Alexander McKinnon, France, had been wounded in the right arm and was admitted to the Middlesex War Office Hospital, Napsbury, on Sept. 17. On Sunday Mrs. McKinnon received another telegram saying her son 117088 Corporal Finnie George McKinnon, France, had been wounded in the right arm, and admitted to Military Hospital Chatham, Eng. on Sept. 19th. No further particulars have been received up till time of writing. Nurse McKinnon, sister of the wounded soldiers, sent a cable to her mother, saying "she had seen John and all is well." This cable was sent after he had been wounded, and was received here before the official word from Ottawa. Pte. John A. has been wounded the second time. All hope the boys are not serious and will soon be restored to health and strength again.

EDEN GROVE

Miss Mattie Desmond, graduate nurse, returned to Toronto Tuesday after enjoying a month's vacation at her home here.

Mr. and Mrs. Campbell, Brantford, spent a few day of their honeymoon trip at the home of Mr. and Mrs. H. Pearson "Quality Hill" last week.

Mr. Oliver Seller carried off the first and second prizes for fowl at the Pinkerton Fair.

Mr. Thomas Desmond, grain merchant, has moved into the Eden Grove hotel and will serve the public on the temperance plan. We wish him success.

Mrs Gregg and daughter and Mrs. Walker of Paisley called on friends in the Grove last week.

The cool weather made the young parkers get a move on. Mr. O'Reilly shipped quite a bunch Tuesday.

Mr. and Mrs. Rosseau left last Tuesday for their new home in Clifford with the best wishes of their friends.

Mr. and Mrs. James Wilson were the guests of Mr. and Mrs. McKeeman on Sunday.

Mrs. J. Seiler captured the first prize for butter at the Pinkerton Fair. Mrs. Lennart also secured ten prizes for different articles. We might not have the quantity in the Grove but we certainly have the quality.

Mr. Leslie Garland, Paisley, was a week-end visitor in town.

Mr. Clarke shipped a car of rock elm logs to Belfast, Ireland, this week for the home rulers.

The Misses Scanlon of Walkerton were the guests of Miss Desmond on Sunday.

Mrs. Todd spent a week with Walkerton friends.

The Methodist Sunday School Rally will take place next Sunday morning. A fine programme has been prepared. Come out and encourage the kiddies and officers.

Mr. and Mrs R. D. Gallinger were week-end visitors at the home of Mr. and Mrs. Alex. Gallinger.

Mrs. Fair is visiting Palmerston friends.

Quite a number took in the Fair and enjoyed the Entertainment at Pinkerton Friday.

Private Charlie Reid of the 160th. spent the week-end at his home here.

The Women folks are busy putting down fruit at present, the men will put it down later.

Mr. Isaac Bailey of Guelph was a visitor to the Grove last week.

Garland Bros. purchased a fine Irish Canary at the London Exhibition, it's quite a songster.

Mr. and Mrs. Pearson and son spent Sunday with Cargill friends.

Mr. R. J. Perdue attended the funeral of his Aunt at Clifford Tuesday.

Miss Jennie Stoddy Walkerton is spending a few months at the home of Mrs. A. McKeeman, King St.,

Mr. Fred Fair, Palmerston, spent Sunday at his home here.

SOLWAY

Mr. and Mrs. Frank Haumore from Pinkerton spent Sunday at Mr. John Stroeder's.

Miss P. Little is visiting at Mr. A Weit's.

Mr. and Mrs. Albert Marshall from Walkerton spent Sunday at Mr. John Polman's.

Mr. and Mrs. J. Holm took in the Paisley fair on Wednesday.

Miss B. McGarrity is visiting friends in Walkerton this week.

Reeve R. S. Nesbitt and Messrs. Kalewetter and Schlorff have installed the Bell Telephone.

Mr. and Mrs. Jos. Lambertus from Cargill and Mr. and Mrs. Alex. Stroeder from the South Line spent Sunday at Mr. Jno. Stroeder.

Mr. and Mrs. Russel Weir visited at Mr. A. Weirs on Friday last.

MILDMAY

Mr. and Mrs. James Shera of Gorrie were in town visiting on Monday eve.

Principal J. T. Kidd and Mr. Wm. F. Wendt were in Walkerton on business on Saturday morning.

Rev. John A. Marsh preached his farewell sermon in the Mildmay Presbyterian church on Sunday morning. The church was well filled and everybody was pleased with the service but was sad because this was Mr. Marsh's last appearance. On Friday evening last the Presbyterian congregation met together in the church for a social evening. After tea they presented Mr. Marsh with a well filled purse and a nicely worded address, as a token of appreciation of his work among them.

A meeting of the Carrick Branch of the Bruce Preparedness League was held in Deemerton on Monday night.

The Mildmay Park and Rink Company are putting men at work upon the bowling green, south west of the rink. It is to be hoped it will be seeded down soon so that the grass will be in good shape next spring. The weeds have been growing very luxuriantly here this summer.

Mr. Chas. Powell agent for the Imperial Publishing Co., Toronto left on Tuesday morning for Brussels.

We have observed lately that it would be in the best interests of the township if the council would enforce more strictly the laws regarding the cutting of roadside weeds. It is an aid to production and thrift.

Mr. Wm. F. Wendt and Mr. Elmo Schnurr motored to Gorrie and Wroxeter on Sunday.

The observation tower erected by the orders of the Minister of the Interior on Kemp's farm on the Town Line to the south of Carrick, is about 100 feet or more in height. Mildmay can be seen and also the water tower of Hanover, if one has a field glass and looks from the top.

Mr. Peter Reuber took Miss Rose Helwig, Miss Pearl Fink, Miss Dora Wendt and Mrs. Reba Schwalm to London on Sunday. They visited friends in the 160th camp.

Ptes. Clifford Scott and Stephen Hickling of the 160th were home over Sunday on week-end leave. They returned on Monday morning.

Quite a number of people of this vicinity attended the Neustadt Show last Friday.

Pte. Clifford Hesch of Mildmay was killed in the fighting in Northern France some time last week. A letter found on his body was addressed to Mrs. Jack Devlin, Mildmay. It appears he was killed instantly.

PINKERTON

Pte. Gordon Pinkerton of the 160th spent the week-end at his home here.

Mr. Walter Birrell of Toronto is visiting at his home here.

Miss Alma Reid returned home from Toronto on Monday.

Mrs. Povey from the West is visiting her nephews, Albert and David Pinkerton.

The annual exhibition which was held here on Friday, was not as well attended as other years, nor were the exhibits in some of the departments up to other years' standards. The concert at night which was put on by the Tiverton Dramatic Club, in the form of a play "The Village Lawyer," was all that could be desired, each member acting his part to the satisfaction of all. The hall was packed to the door by a most appreciative audience.

Mr. Jos. Gale of Bethany is spending a few days at the Manse prior to going to University.

Mr. Robert Gale of Alma spent Sunday at the Manse.

Mr. Amsey Gregg received a message stating that his son Elmer had been wounded and was in an English hospital. All hope that his wounds will not prove fatal and that he may soon be restored to health again.

Mr. and Mrs. Adam Reid received the sad news on Saturday that their son, Lieut. Ernest Reid, has been missing since Sept. 17th and at time of writing no further word has been received by the sorrowing and anxious family. All hope and trust that definite word will soon be received by which the anxious parents and family will be relieved and that Lieut. Reid may yet return safe and sound.

Lieut. Reid and Ptes. Elmer Gregg and Samuel Meahurn all enlisted with the 71st Battalion last September and three have been reported in the casualties during the past few weeks.

FORMOSA

The death occurred at his home on Sunday of Mr. J. B. Goetz, one of the old pioneers of Formosa. He had been suffering only two or three days with peritonitis, had been in poor health for many years. Mr. Goetz was born and raised in Waterloo County but came to Formosa forty-seven years ago where he conducted a shoemaker's shop. Mr. Goetz took an active part in politics for many years and up to the time of his death occupied the position of County Constable. Besides his sorrowing widow, a family of four sons and five daughters survives. They are:— Henry, Alfred and William of Buffalo, John of Chicago, Mrs. John Seitz of Toronto, Mrs. Rudolph of Tara Mrs. Scott of Medicine Hat and Miss Tena of Preston Funeral will be held at Formosa church on Thursday morning.

+ + +

Keen To Fight

Private William Wesley, who arrived home from the Front last week reported at London on Friday and received his honorable discharge from the Artillery on account of physical disability. He then tried to enlist in the infantry to return to the Front but was not accepted. Private Wesley is keen to return to the Front but it appears that he has been so badly shaken up by a year's constant service in the artillery that there is little hope of him passing the physical examination for the infantry.

When "Someone" Comes

You can entertain him with the Edison Diamond Amberola, bearing the greatest singers of the day or dancing to the liveliest and latest popular hits.

And, all the while you can take pride in the fact that it is an Edison, the peer of all phonographs—and not a common, everyday "talking machine" that you would feel like apologizing for.

The "humanness" of the Amberol is startling —hear it

enslar- White Pine and Spruce Balsam

This is one of the most efficient Cough Remedies we have ever sold. We hear more good things about it—have more calls for "another bottle" because it stopped my cough last time.

The label tells you the exact formula—white pine bark, red spruce gum, tamarac, wild cherry sassafras, etc.

Loosens and breaks up coughs, relieves difficult breathing and tightness across the chest.

Open For Business

Mrs. John Klempp, proprietress of the Royal Hotel, has taken out a Standard Hotel license and is now open for business. A full stock of cigars, soft drinks etc is on hand. Boarders wanted.

+ + +

Great Plum Crop

Plums are a tremendous crop in this section but the most abundant growth we have yet seen was on a small branch brought to this office by Mr. John Frame. The branch, less than two feet long, bore no less than forty large luscious Lombards.

Cargill Boy Wounded

Word came on Tuesday that two Cargill boys were wounded. Pte. Walter Cowley, a brother of Mrs. Horatio Parker, who enlisted with the 71st, and Pte. Jack Yorke, a young Englishman who was employed by Cargill Ltd. and joined the 34th.

+ + +

Pte. Small Wounded

Mrs. D. Small received a telegram on Saturday, stating that her son, Simon Small, had been admitted Casualty Clearing Station no. 36, suffering from shell shock. Pte. Small is one of the many Walkerton boys who went over with the 34th to "do their bit."

+ + +

No Further Word

The parents of Lieut. A. E. Reid, the young officer from Pinkerton who was reported missing in last week's casualty lists, are anxiously awaiting further word. Lieut. Reid was formerly school teacher at Pinkerton and one of the finest young fellows in that part of the County. Everybody is hoping that reassuring news will be received soon.

+ + +

Removing to Montreal

After four years spent in Walkerton as accountant of the Bank of Commerce, Mr. R. J. Hepburn got word on Tuesday of his transfer to the Montreal office of the bank. Montreal is the home city of both Mr. and Mrs. Hepburn, and nothing could suit better. Their many friends here, while sorry to see them go, are glad that Mr. Hepburn has secured such a good move.

+ + +

Met Walkerton Boys

Pte. Charlie Sutton writes his mother, Mrs. R. K. Sutton, under date of Sept. 15th, that he had met quite a number of Walkerton boys at the Front, including Bert Cartright, Norman Huck, A. Tolton, Walter Pitt, Jim McConnell and Simon Small. The last three were on their way to the trenches. Charlie afterwards heard that Simon Small's batt'n was badly cut up in the fighting.

+ + +

Death of Will Thompson

The death occurred yesterday morning at the home of Mr. and Mrs. Thompson, Walkerton, of their son, William, a young man of 21 years. He had been in poor health for some time but death came quite unexpectedly. Besides the parents, there are three sisters, Rebecca, Flora and Hazel, all at home. The family removed here recently from Lion's head. Mrs. Thompson was formerly Miss Alexander of Brant Tp.

Patriotic Gathering At Mildmay.

The Carrick Branch of the Bruce Preparedness League will have a Patriotic meeting and social tea at Town Hall, Mildmay on the evening of Thanksgiving day. Mr. C. M. Bowman M. P. P. has agreed to attend and address the meeting. He is a member of "The Organization and Resources Committee" incorporated by an act passed at last session of Ontario Parliament. The objects of the Committee are to maintain and stimulate agricultural and necessary industrial production, securing sufficient supply of labor for agriculture and industrial operations assisting in the work of recruiting men for "Canadian Expeditionary Forces" with the least possible disturbance to agriculture or industry, and promoting thrift and economy among the people. He is also a member of the executive Committee of the Bruce Preparedness League. Mr. Bowman is billed to speak at a big meeting in Montreal on Saturday night.

HOME ON LAST LEAVE

Walkerton Boys of the 160th Given A Great Reception at Station Tuesday Night—Mayor Declares Thursday Afternoon A Half Holiday.

The Walkerton boys of the 160th are home on last leave. They came up Tuesday night and were given a welcome the like of which has seldom if ever been seen here. Practically the whole town was at the Station when the evening train from London pulled in. The boys were escorted to the Town Hall by a torch-light procession, headed by the 160th Band, and hundreds of citizens in autos. Speaking from the steps of the Town Hall, Mayor Lippert gave the boys a welcome and proclaimed Thursday afternoon a half holiday to entertain the boys for the last time.

There will be a pretty busy time for everybody during the four days' leave. On Thursday afternoon there will be a big program of sports on the Fair grounds. In the evening there will be a public farewell to the boys in the Town Hall at which no admission fee will be charged. It is expected that each of the Walkerton boys will be presented with a five dollar gold piece as a small token of the town's appreciation. At 9.30 there will be a farewell dance at the skating rink, Manager Cloe Clark having donated the use of the building.

The management of the reception to the boys Tuesday night meant lightning work on the part of the resourceful chairman of the Preparedness League for Walkerton, Mr. John Rowland. Mr. Rowland got word in the middle of the afternoon that the boys were coming home. He immediately got in touch with Battalion headquarters by phone and secured permission to hold the bandsmen here who had been home on last leave. The afternoon trains, south, were nearly due but telephoning Hanover, and Palmerston, he got a number of bandsmen stopped. He then phoned London and arranged to have most of the instruments down at the station in time to catch the afternoon train. It was good work.

The boys will entrain for London on Saturday morning and leave for Overseas, it is expected, on Saturday, Oct, 14th.

PREPAREDNESS LEAGUE

Live Local Branch For Walkerton Organized Last Thursday Night.

In spite of the pouring rain, quite a few citizens turned out on Thursday night to the meeting to organize a Walkerton branch of the Bruce Preparedness League. Mr. John A. Rowland was named as chairman of the local branch, Rev. R. Perdue as sec'y-treas. and the following as committee:—Messrs. H. M. Lay, Major John Henderson, Alex George, Warden McNab, Mayor Lippert, Coun. R. Russel, D. Robertson, C. W. Cryderman, W. M. Shaw, G. Schwindt, N. A. Walford, D. Taggart, and Mrs. Skelton, Mrs. A. B. Klein, Miss Mary White, Mrs. Rowland, Mrs. Robertson, Mrs. L. C. Benton, Mrs. G. S. Schwindt, Mrs. James Whitehead.

Mr. Rowland pointed out that no public recognition had been taken by the town of the deaths of Walkerton boys at the Front. He thought the torn flag should at least be half masted on such occasions, letters of condolence sent to the parents, and some public recognition made of the brave boys. It was agreed that the matter be taken up with the Council. Mr. Rowland was also delegated to see the Council about giving the 160th, Batt. a suitable send-off.

At a further of the League held on Saturday night it was proposed that a $5 gold piece be presented to each of the Walkerton boys who are leaving for the front.

Brant Public Meeting

Reeve Nesbitt has called a public meeting of the people of Brant Tp. to be held in the Township Hall next Monday night, Oct. 9th at 8 o'clock for the purpose of organizing a local branch of the Bruce Preparedness League, and to discuss plans for contributing to the British Red Cross.

+ + +

Killed In Action.

Word came indirectly to friends in town during the past week that Lieut. George E. Clarke, formerly ledgerkeeper of the Bank of Commerce here had fallen in battle. Clarke was a fine young fellow and had many friends here. He was a member of Knox Church Choir and at preparatory service on Friday night, Rev Thomas Wilson spoke appreciatively of the sacrifice which this splendid young man had made. It was in October 17th of last year that Clarke left Walkerton to take an officer's training course at Montreal. He went to England as a private but was afterwards given a Commission in the Royal Warwickshire Regiment. The report said that he was killed in action on July 23rd. His relatives live in Kent, England.

DIED ON BATTLEFIELD

Letter From Art Farrer States That His Chum, Signaller Albert Ballantyne of Walkerton, Fell in Action—Parents Have Received No Official Word.

Another Walkerton boy, Signaller Albert Ballantyne, son of Mr. Robert Ballantyne, charge-man at the C. P. R. roundhouse, has died a hero's death. Word came to Walkerton through a letter written by his chum, Signaller Art. Farrer. By some strange oversight, the name has not yet appeared in the casualty lists, nor have the parents received any official word regarding their son. "Art" and "Al" were chums before they left Walkerton together with the 34th. In England they stayed together and were afterwards transferred to the famous Scottish battalion, The Black Watch. "Art" was transferred first and his chum got special permission from the Col. to go along too so that they might remain together. They were the only Walkerton boys in the Battalion. On Sept. 2nd, Art went to the Hospital with the grippe. On getting out again on the 13th he found his companion gone and reported missing. The other men in the Signalling Co. said he had been blown to bits. Arthur wrote home briefly to his parents regarding the matter on the 13th, expecting that they would know all about it. He referred again to his chum's death on a card written on Sept. 17th.

Al was a fine young fellow, of good habits, and was well thought of here.

Gabe Haas Wounded

Mr. Alex Haas has received official word that his son, Pte. "Gabe" Haas, was wounded in the right thigh and abdomen on September 19th and is now in No 13 General Hospital at Boulogne. Gabe went over with the 34th Batt. last year and has been several months in the trenches.

+ + +

Wilfred Lake Wounded.

A Walkerton boy, Wilfred Laurier Lake, the 19 year old son of Mr. and Mrs. Wm. Lake, now of Durham, was in last week's casualties on the Somme Front. Mr. Lake received a telegram from Ottawa on Saturday stating that his son was in the Hospital with a gunshot wound in the knee. Wilfred enlisted with the 71st. at Stratford last year, after having been previously rejected for being under age. Another brother, William, is with the 110th. The Lake family is well known here. Mr. Lake being a native of Brant and having worked for a number of years at Truax's mill. This family has had a large share of misfortune lately. Mrs. Lake is at present a patient at the Bruce County Hospital while two other members of the family at home are at present on the sick list.

+ + +

The County Court Clerkship

Who is going to going to get the appointment to the vacant County Court Clerkship? A half-dozen men in the Riding know who will be recommended for this high salaried job, but they are mum as so many oysters. A meeting of the Conservative Executive for East Bruce was held at the Hartley House here last Friday night to make a choice. They finally agreed on one of the aspirants and he will be recommended by the Local Member for the position. Who the lucky candidate is, remains a state secret. It is a good guess that it is either Mr. Collins of Walkerton or Dr. Clapp of Mildmay. But which of the two the committee has apparently sworn not to divulge until the recommendation goes through. Although the appointment really belongs to the South Riding, it is understood that the two defeated Tory Candidates who control the patronage in North and Centre Bruce, have joined forces in an attempt to land the office for Mr. C. E. Start of Tara.

+ + +

Cutting Up The Markethouse

Chief Ferguson is going to have the Markethouse of the Town Hall for a kitchen and dining room. The rest of his house will be in the attic. The Council has decided to spend $200 to turn the Markethouse, or at least the biggest part of it, into suitable quarters. The Chief, who threatened to quit his job because he objected to the number of steps, sixty-two of them, up to his third storey quarters, now professes to be satisfied with the arrangement of living in the basement and attic at the same time. The question is, will the Chief be satisfied with such a make-shift arrangement after he has tried it? Will his successor be willing to put with such an up-and-down arrangement, in case the Chief should resign? Will the people be satisfied to have the Markethouse cut up for this purpose? Wouldn't the Chief, and town too, be better off if a portion of that money were handed him to help provide himself with residential quarters outside the Hall? And the Council would not need to start messing up the Town Hall, and the Markethouse would still be available for the Christmas Fair or any other occasion when it may be needed.

NEWS ABOUT TOWN

Mrs. Hodgson of Welland, is spending a week with her father, Mr. Ed. Pengelly.

Mr. John Frame jr. has taken a position as Car Checker with the C. N. R. north of Port Arthur.

Mr. and Mrs. John McCool and family motored to Vesta to attend the School Fair there on Saturday.

Mr James Whitehead is able to be out again although not fully recovered from the severe attack of tonsilitis.

Harvey Miller left on Monday for Stratford where he purposes taking a course in Central Business College.

A meeting of the Brant Farmer's Club will be held at the home of Mr. Abram Rowand on Tuesday evening, Oct. 10th.

Mr. and Mrs. John Vogt and Florence, Mrs. J. H. Appel and Mildred, motored over to Teeswater for the Fair yesterday.

Manager Cloe Clarke has offered to give use of the Roller Rink free for a farewell dance to the 160th Boys on Friday night.

Dr. Kahn, foot Specialist, will be at our Store Friday Oct. 6th. People having foot trouble should see him, consultation free.—Ramsey the shoeman.

Sergt. Wilfred McFarlane, son of Registrar W. H McFarlane, is home on last leave before going Overseas with the 142nd, London's Own Batt'n.

The Salvation Army is giving a great public welcome Meeting at Palmerston, next Tuesday evening for Com. Richards, leader of the Salvation Army in Canada.

Sergt. George Wright, Bandmaster of the 160th Batt'n, who was discharged owing to physical disability, expects to remove from Walkerton shortly. Mr. Wright is a piano finisher by trade and will probably locate at Toronto.

Movieland closed down for the night on Monday to give everybody an opportunity to attend the send-off to the Boys at the Town Hall. Manager Leeson also got busy and got together a chorus which was one of the best features on the program.

The members of the Hospital Aid are busy preparing for the Bazaar to be held on the 19th. They are counting on the active personal help of every woman in the Town to make this worthy affair a big success. Parcels may be left at Mrs. McNamara's.

A raspberry bush in Mrs. Griff Jones' garden which has already produced one very good crop of berries this year by a strange phenomenon blossomed out a second time. The second crop was ready for picking this week but some wide-awake neighbor was first on the ground and enjoyed a treat at Mrs. Jones' expense.

Mrs. John McCool enjoyed a visit this week from her brother. Mr. Wm. McKirdy of Nipigon. Mr. McKirdy states that sportsmen from all parts of the world are coming to the trout fisherman's Paradise, the Nipigon River. The speckled beauties abound there and are of a size which fairly takes one's breath away. Mr. McKirdy has photographs of trout, caught in the Nipigon, weighing all the way up to fourteen lbs.

The persistent rumor that Sergt. Bert Cartwright was killed at the Front, is in all probability, untrue. Mr. M. J. Ramsey had a letter from his brother, Ernie Cartwright, written on Sept. 19th stating that he had seen his brother, Bert. Bert's parents live in England but in case of a casualty, it is probable that some of his Walkerton chums in the same Batt'n would immediately let the Walkerton people know.

+ + +

Good News From Gabe

"Gabe" Haas wrote his sister, Mrs. Bolland of Montreal under date of Sept. 16th, stating that he had been operated upon to have the shrapnel splinters removed and was doing fine.

+ + +

160th Appointments

Congratulations are due Sergeant F. T. James and Private Harry Harcourt of the 160th Batt'n who have been recommended for appointments as Lieutenants. Lieut. James will command the Pioneer Section.

+ + +

NOT OBSERVING THE LAW

Editor Telescope,
Walkerton.

Dear Sir:—

Can you tell us if there is any person to look after the auto drivers who are breaking the law? I am informed that some take out a license to drive a certain car, giving the name of car and number before the license is granted and are driving all kinds of cars. Some are driving without a license and charging the same as a livery. A man at or near Formosa is making a living out of his car and has no license. Some drivers in Walkerton run without lights and a good deal faster than the law allows. Please let us know the name of the proper person to report to.

Yours,
One who has a License.

News About Town on page 5.

Get your Auction Sale bills at the Telescope.

Miss Ida Brabler spent the week-end in Cargill.

Thanksgiving rates C. P. R. tickets at Hunter's.

Mrs. Attwood returned on Tuesday from Toronto.

Miss Crawford returned home on Monday from Toronto.

Mr. Ray Rogers returned to Port Arthur on Saturday.

Mr. Wm. Fennell's new barn was raised on Tuesday of last week.

Mr. Arthur Childs of Brant spent a few days last week at Stratford.

Miss Tilda Cain left on Thursday last to take a position in London.

Mrs. Ambrose Zettel of Formosa, spent Sunday with friends in town.

Mr. Hermie Runstadtler has taken a position as Clerk at the Royal Hotel.

County Constable Briggs was in Kincardine on Sheriff's work last week.

Mrs. Latchford and Miss Emma attended the Teeswater Fair yesterday.

Mrs. Cavell of Paisley was a visitor at Mr. Thos. Cunningham's this week.

Mrs. Truax and Miss Truax went to Pittsburg last week for a month's visit.

Pte. Sam Truax of the 160th Bugle Band, spent the week-end at his home here.

Mrs. L. Blue of Dryden, New Ontario, has been visiting her friend, Miss Minnie Kerney.

Pte. Charlie Thomas of the 160th Batt spent the week-end at the home of Mr. and Mrs. J. Becker.

Mr. and Mrs. C. W. Norcker and family of Drayton spent Sunday with Mr. and Mrs. M. G. Dippel.

Miss Gertie Case, daughter of Reeve Case of Elderslie, left last week for the Korean Mission field.

Bandsman Ernest Wright of the 160th Batt. Brass Band London, spent the week end at his home here.

Misses Margaret and Norma Smith of Hanover were week-end guests of Miss Florence Cunningham.

Miss L. Flett and Miss Findlay of Brant, left Saturday morning on a two weeks' visit to Toronto.

Mr. T. E. Attwood is having the rooms formerly occupied by the Business College converted into a flat.

Mr. Andy Glynn, an old Walkerton boy, now of Seattle, Wash., has been visiting his father, Mr. Barclay Glynn.

Mrs. (Dr) Rose, wife of a former pastor of the Methodist Church, was the guest of Mrs. L. C. Benton this week.

The Telescope is making a list of addresses of Walkerton boys at the Front which we will publish shortly. Send in any addresses you may have.

Mrs. Ann Pilts has sold her brick cottage on Cayley St, to Mr. Wm. George for $1400. The deal was put through by Mr. J. J. Schumacher.

Miss Marion Ernest, book-keeper at Mr. T. E. Attwood's, returned on Saturday from visiting friends at Hanover, Chesley and Owen Sound.

Mrs. S. F. Ellinghausen and Miss Rose, left on Monday for Buffalo, to attend the wedding of Miss Cecelia Ellinghausen, to Mr. Gilbert Lauer.

The Ladies are requested not to forget the refreshments, (either cake or sandwiches,) for the Dance this (Thursday) evening. They should be left at the rink between 4 and 6 p. m.

A farmer named McKenzie, of Kincardine Tp. was brought down on Tuesday to be examined for his sanity. After he had been examined by two doctors he was committed to the Asylum.

Mr. J. Hodgkinson of Greenock, had word last week from his son, Pte. Stanley Hodgkinson who signed up with the 195th Batt. at Kerrobert, Sask. that his Battalion is leaving for Overseas.

Pupils of the High Schools contributed $15 for the proposed Edith Cavell Memorial Statute and the P. S. pupils $7. The collection was taken on Tuesday, the first Anniversary of Nurse Cavell's death.

Mr. L. H. McNamara, customs Officer, is taking holidays at present and has gone on a visit to his mother and brother at North Bay. Mr. Ross Bennett, Relieving Officer will be in charge at the Customs the next three weeks.

In the multitude of rumors which have been afloat the past week, was a story that George Kingsbury had been killed in action. It probably originated from the fact that another member of Knox Choir, George Clarke, was reported killed in action. Mr. R. E. Truax M. P. who hears frequently from Kingsbury has received no word of his being among the casualities.

+ + +

BORN

LONG—In Brant, on Sun. Oct. 1st, to Mr. and Mrs. Leonard Long, a son, (William Walsford Cavelle.)

MAJOR MOFFAT GOING

Nothing In The Rumor That The Popular Second In Command Had Been Turned Down By Medical Examiners, Says Col. Weir.

A rumor which was circulated around town last week that Major Moffat had failed to pass the final medical examination and would not be permitted to go to the Front, is characterized by Lt.-Col. Weir, commanding officer of the 160th, as "ridiculous." The only officers who will not likely go are Lieut. Oliver, whose health has been very bad, and Lieut. Harold Patterson. Lieut. Patterson is regarded as one of the best, as well as one of the most popular young officers in the Battalion. He is very keen to go to the Front and is hoping against hope that he may yet be allowed to go to the Front.

FIVE DOLLAR PIECES

Presented To The Walkerton Boys Of The 160th Bruce Battalion.

The first group of Walkerton boys in the 160th Batt, to come home on last leave were given a good send-off at the Town Hall on Monday night. The affair was held under the auspices of the newly-organized Walkerton branch of the Bruce Preparedness League. Mr. John Rowland, the local president, who claims he has never held an office before in his life, occupied the chair, and he certainly kept things moving. The programme, although got together hurriedly, was excellent, the most important number being the presentation to each of 26 Walkerton boys present of a five dollar gold piece. The presentation was made by Warden McNab, and it is planned to give a similar present to the rest of the 60 or 70 Walkerton boys who are going Overseas shortly. Chairman Rowland reiterated the often heard assertion that 160th Batt. is the best in Canada and brought up a few facts to prove it. He emphasized the importance of the men at home doing their share. Any business man who has not made money the last two years is no business man, and the farmer who is not prospering is not a good farmer. These men are not prevented by lack of means in doing their part at home. The boys who came forward and received the present were:—

J. E. Ferguson, S. Reinhart, Sam Truax, W. Ellinghausen, W. B. Thompson, Sergt. F. T. James, Sergt. F. G. James, Young, John Clarke, Louis Seigfild, Jos. Ammon, J. Etherington, W. Brislan, C. Knepflar, Jos. Chesney, David Disch, Young, L. Harrington.

Afterwards each of the boys was given a pair of good home-knitted socks by the Daughters of the Empire. Judge Klein, President of the Bruce Preparedness League urged a greater waking-up to the situation by the people of the town. The Hall, he said, should have been packed. The Town had made big money out of training the 160th Batt. here. Why weren't the money makers present to-night to show a bit of gratitude? The Judge outlined the work of the Bruce Preparedness League, the most important aims of which are:—1. To help to enlist more men. 2. To help the men who return from the Front to find employment. 3. To help the men who return disabled. The Judge roasted the Town Council for not getting busier with the Town Flag and paid his respects to those who were not ready to do their duty in this war. Any person, he said, who lived in this Country and was not heart and soul with the Allies, should be either in the penetentiary or in the asylum. He hoped the ladies of Walkerton would take hold of their end of the Preparedness League work.

A real good program consisted, besides the two above speeches, of an appropriate and beautifully rendered patriotic solo by Miss Pryne; a stirring recitation, "We were born in Canada" by Miss Hazel Irwin; "The Recessional" by chorus, arranged by Mr. Leeson; a beautiful piano solo by Miss Guest of New York, niece of Mrs. L. C. Benton; and a solo "Three Witches" by Mr. K. M. Taylor, which made a great hit. One of the best things was a corking recruiting speech by the very young son of Lieut. F. C. James, who promised to be an orator of the Lloyd-George class. $65 was taken in at the door to defray the expenses of the presentations. The Council will be asked to make a grant to cover the remaining expense.

Bandsman Ammond, whose "Monkey stunt" last winter is well remembered gave some very clever variations of "Nearer my God to Thee" on the mouth organ. If Ammond was not in more important work just now, he would make good with any circus.

Suffering From Shell-Shock

Mrs. H. H. Miller of Hanover received a telegram on Tuesday stating that her son, Lance-Corp. Fraser Miller was in the hospital with shell-shock.

TO CUT UP MARKETHOUSE

Council Decides To Make Additional Living Rooms On Ground Floor For Chief Ferguson—Two Councillors Raise Strenuous Objection in Vain.

Chief Ferguson is going to stay on the job. At a special meeting of the Town Council held on Friday night, it was decided that a portion of the Market house be turned into two living rooms, suitable for a kitchen and dining room. This means that instead of living in the top storey above, the Chief will have his residential quarters divided between the top storey and the market house.

The Committee, composed of Mayor Lippert, Reeve McNab, and Coun. Arscott, who had been appointed to take up the matter of Chief Ferguson's resignation, reported to the Council, recommending that the action referred to above be taken. They submitted a diagram showing the proposed alterations in the market house. The two rooms would occupy a strip 18 ft. wide, and would still leave a space 25 ft. by 38 ft.

Coun. Russell said he was not in favor of interfering with the market house. He would wait until the New Year and then arrange for the erection of a new building on the property. The market house was needed, and at Christmas Fair time it would make the Town Hall too small to accommodate the Fair. The market house was put there for a market house by a vote of the people and he did not believe the Council had legal authority to use it for any other purpose.

Coun. Lettner said there would still be enough room in the market house. He suggested too, that an additional phone connection be put in on the ground floor also. This could be done without extra expense to the town.

Coun. McCarter believed the Committee's report meant just spoiling the Town Hall. Supposing the Chief should resign his position at New Years, no body else would want to put up with living in rooms which the Committee proposed.

The Committee's report, moved by Reeve McNab, seconded by Coun. Pletsch, was carried, on the following division:—

Yea—Couns. Douglas, Lettner, Arscott, Pletsch, Reeve McNab, Mayor Lippert.—6;

Nay—Coun. Russell, McCarter.—2.

Will Banquet the Boys.

Mr. J. Rowland, who is always springing something, came before the Council with the suggestion that the Town banquet the Walkerton boys of the 160th, when they come home on their last leave within a few days. The idea took like wild fire with the Town Fathers, and they granted $100 to the Walkerton branch of the Bruce Preparedness League of which Mr. Roland is local president for this and other purposes.

Will Return Tents

Mr. Rowland reminded the Council that the two big tents bought by the 24th. of May Committee and presented to the 160th. Batt. became the property of the town as soon as the Battalion leaves for Overseas. He had arranged with Lt. Col. Weir to ship the tents here to the order of the Mayor of Walkerton.

Excursion Idea Dropped.

The proposed excursion to take all Bruce County down to see the boys off at London, had to be abandoned. Mr. Rowland stated, as he had learned from Lt. Col. Weir that the only days that the boys would all be together in camp would be the day before their departure, and he was not in a position to say definitely what day that would be. The scheme therefore had to be dropped as that would not be sufficient opportunity to advertise it.

Recognize Our Heroes

While he was on his feet, Mr. Rowland made another good suggestion. Nothing had been done, he said, by the town to recognize the brave boys who had fallen in action. Four already from the town had met death on the battlefield. He suggested that at least letters of condolence be forwarded to the bereaved parents. If good photographs of the boys could be procured, he would like to see pictures of Walkerton's heroes hung in the Public Library, to be admired by future generations.

Court of Revision

Court of Revision for hearing appeals from the sidewalk assessment met immediately after Council adjourned, Coun. Pletsch in the chair. No appeals were made, but Town Clerk Collins stated that there had been one complaint. One man had complained strenuously that the sidewalks had not been laid three or four years ago.

Coun. Lettner asked why the yearly amount be paid, did not appear on the assessment notice. Mr. Collins said he had merely followed the statutory form.

The new walks will cost 67 cents a foot, distributed over 20 years.

The Board passed a formal resolution confirming the Assessment.

CURRENT COMMENT

As a result of the war the Chicago Tribune expects that the United States will get little comfort from the allies when they form their tariff. But it expects that this will result in a large addition to the American industrial concerns now operating in this country. Commissioner Marsh might take the hint here and get busy with some of those concerns.

Is there an exodus of Canadians to the States? Figures seem to say that there is. From April to June, 1916, there came into Canada for settlement 4,317, not American citizens, and 24,000 went to the United States of the same class during the same period. There was a balance against us of 21,583. In the corresponding period of 1915 the figures against us were 16,336. We are getting back to the Tory days of exodus.

A man 63 years of age has just made the supreme sacrifice at the front. Lieut. Webber, who was known in pre-war days as a man who kept himself physically fit, offered his services at the very outbreak of hostilities, but was turned down because of his age. He persisted and made himself so much of a nuisance that he was finally allowed to go to the front, where he rendered splendid service. He was one of the most prominent brokers on the London Stock Exchange. Our young men might make a note of this.

ANOTHER BRITISH VICTORY.

Kitchener's army, under Sir Douglas Haig, is beginning to make its power felt in the great struggle now going on in France. "The contemptible little army" is now a huge host. It is not a uniformed mob—as it was sarcastically characterized by Hindenburg at the beginning of the war—but a highly trained fighting machine that has already worsted in the field some of the Kaiser's best and most seasoned soldiers.

Yesterday the British force struck another serious blow at the Germans on the Somme front, capturing the greater part of the Bouleaux Wood and the whole three villages of Martinpuich, Courcelette and Flers. The advance was on a six-mile front and carried them to beyond the Pozieres-Bapaume road, north of Combles. Sir Douglas reports that over two thousand prisoners were captured, including six battalion commanders. Much credit is given the British aviators for their courageous service, and for having directed the fire of the men on the ground. The new armored cars, which were put into action for the first time, proved to be a great acquisition, enabling the troops to advance rapidly and with comparative safety.

The capture of Combles and Cambrai can't now be long delayed. When that is accomplished, the Germans may find it necessary to quit France altogether; prepared positions cannot be made in a day. Some day the British and French cavalry will be let loose among them, and help to carry the salt.

It is learned that the Canadians took part in yesterday's attack on the enemy, behaving with their usual gallantry.

The Serbians have captured two towns and many guns from the Bulgarians, who are said to be falling back in disorder upon Monastir, pursued by the Serbians. In the Dobrudja the Kaiser telegraphs his wife that Von Mackensen has won a decisive victory over the Russo-Roumanian army. But if Mackensen hoped to stem the invasion of Transylvania by the Roumanians he has failed in his purpose.

The deportation of 25,000 Greek troops to Germany should result in the forcible removal of Constantine from the Greek throne.

EAT THE CRUMBS.

German Army Order Counsels Care of Foods.

Paris, Sept. 13.—The Journal says the following is extracted from a circular intended for distribution among the German troops and found in the possession of a Captain taken prisoner on the Somme:

"England and France are making unpleasant efforts to stop our [illegible] from overseas countries and to starve us out. The duty of every military man, officer or soldier, is consequently to economize and husband the food and forage. Thus we [illegible] the enemy's efforts.

"Satisfy your hunger, but no more than the natural needs. Eat up all the [illegible] it is possible to use. You have a right to a generous portion of [illegible], but you are not obliged to eat it all. Therefore, claim all that you are entitled to, and if you receive other food from home use it to vary your meals. But do not eat for the sake of eating.

"Remember that your country is deprived of a large quantity of raw material, and it is your urgent duty to gather and hand in all leavings and apparently useless articles, such as tins, leaden tubes, old cloth, wornout boots, old clothes, and old pieces of leather, rubber, and metal of all sorts."

GREEK MINISTER UNSUITABLE

New York, Sept 13.—A News Agency despatch from Athens to-day says:

Foreign Minister Carapanos has received the congratulatory visits of all the diplomats in Athens, except those of the allies.

This is the first despatch to pass the Anglo-French censorship at Athens, showing that the allies are not pleased with the new Greek Foreign Minister.

"I quarreled with my wife yesterday and we haven't spoken since." "Why don't you make up?" "I'm going to. All I'm worried about now is the indemnity."—Boston Transcript.

Meeker—Didn't I always give you my salary cheque the first of every month? Mrs. Meeker—Yes, but you never told me that you get paid on the 1st and 15th, you embezzler! —Judge.

HER HUMBLE LOVER

The conversation is to match. Signa's affairs, past, present and future, are avoided with nervous particularity, and beyond remarking that the trains are faster now than they used to be, and asking if she liked coming express, the rector and his wife treat her as if they had been accustomed to sitting at dinner with her for months.

Signa is a strange girl; the laughter and the tears are never very far apart in her, and at times, as she listens to the mournful twaddle which these two people talk, and reflects that they are her uncle and aunt, and that she will probably spend the remainder of her life with them, a sense of the grotesque and the ridiculous take possession of her, and she feels a wild desire to look up from her plate and laugh aloud, a reckless laugh of despair.

But she does not; she sits, that wonderful look of calm self-possession which Mrs. Podswell "doesn't like" on her lovely face, and replies as best she can to the various questions which her aunt puts to her now and again, always in the thin, querulous voice of mournful resignation.

The dinner drags its weary length to a close, and Mrs. Podswell rises, slowly and solemnly.

"You will not be long, Joseph?" she remarks, gravely.

"No—no, my dear," assents the rector, nervously. "I will join you in a minute," and he drinks his one solitary glass of port with more than his usual timidity, and glides in after them almost before the drawing-room door has closed.

The "martyr" goes to the sofa as a matter of course, and Signa, as the tea comes in, says, in her quiet, musical voice:

"Shall I pour out the tea for you—auntie?"

She pauses a little before the term of relationship rather doubtfully; but Mrs. Podswell inclines her head graciously, and Signa seats herself at the gypsy table.

The old rector takes up his cup and goes to the fireplace, fronting the rest as if he were in the pulpit, then he clears his throat, and says, in his clerical voice:

"You may go, Mary."

Signa looks up; she feels instinctively that her melancholy uncle is about to address her, and waits patiently.

The rector clears his throat, and assumes the blandly severe expression which is always so effective in the pulpit, and begins.

"I have chosen the earliest opportunity which presents itself, my dear Signa, to address a few remarks to you," he says.

The martyr sighs heavily.

"Ahem, I need scarcely say that both your aunt and myself are sincerely glad to see you, and to welcome under our humble roof the daughter of ——" a faint moan from the sofa pulls him up in time, and with a little cough he changes it to "our niece."

The dark grey eyes raise themselves to his face with a patient yet calm attention, which slightly embarrasses him.

"You are very kind," she says, quietly.

"No, my dear, no," he responds, waving his hand. "It is our duty simply, and I trust that we do not shrink—I mean, that we shall discharge it cheerfully."

A pause for a moment, then the low, clear voice says:

"That is what my—father said."

"He was quite right — quite," assents the rector, a little touched, perhaps, by the sudden clouding of the dark eyes at the mention of the dearly loved name. "Quite right! Indeed, where should you go but here? But though we are sincerely glad to have you, I feel that it is right we should —er—er—come to some understanding. I will ask you, my dear, if you have —er—any views respecting your future?"

"Any views?" doubtfully, with a faint knitting of the darkly-pencilled brows.

"You have none, I see. It is scarcely to be expected that you would have—you are too young. By the way, how old are you, my dear Signa?"

CHAPTER. II.

"I am twenty-one," she replies.

"Twenty-one!" echoes the thin voice of the martyr; "I thought you were much older."

Signa shakes her head.

"Well, if not too young at any rate, your loss is so recent that you can scarcely have made any plans. It is my duty to tell you, my dear Signa, that you are your own mistress."

A faint smile crosses the pale face. Her own mistress, and alone in the world!

"You can choose your own path in life; you are—er—not altogether dependent; in fact, if I am rightly informed, you have a small but not altogether insufficient income."

He pauses, as if expecting a reply, and Signa looks up.

"Have I?" she says. "I did not know. Mr. Brown and the lawyer told me something about it, but I did not pay much attention. I—I was thinking of—of something else."

The rector nods sympathetically.

"Just so; when the heart is overwhelmed with sorrow, the head is not capable of comprehending business. Ahem, where was I?—Firstly—I mean, to continue—" he corrects himself. "I merely remind you of your independent position, so that you may understand that you are free to accept or refuse the home which your aunt and I most cheerfully offer you, my dear," and he sighs heavily, by way of emphasizing his cheerfulness.

"I don't know whether you would care to remain with us?" says the voice from the sofa, solemnly.

The rector nods and smiles blandly.

"Do you think you would like to share our home, my dear?"

For a moment Signa is silent. Truth, welling up in her heart, touches her lips, and nearly forces its way out, exclaiming, "I certainly should not!" but she stops Truth in time, and says instead, "You are very kind and I am very grateful. I will stay if you will have me. My father wished that I should come to you. He said"—a pause for a moment, but though the dark eyes fill, the heart struggles bravely, and the voice falters a very little only—"he said that though you and he had not met for years, you were great friends as boys, and that there was no one closer to him, and that you would take care of me for—for his sake."

The rector, hen-pecked and thin-souled, had some heart left, and his head droops a little as the words, "poor Jack," form on his lips inaudibly.

"He was quite right, my dear, quite right," he says, rather falteringly. "We will look after you. I am glad you have made your choice. You will find us very quiet people——"

"Very quiet," echoes the voice from behind, solemnly.

"Quiet, but I trust not unhappy or discontented."

"A useful life is never an unhappy or a discontented one," remarks the solemn voice of Aunt Podswell, who never does a stroke of work of any kind whatever.

"I am sure I shall be very happy, and I shall be very glad to be useful." "My father," —even now she cannot speak the word without wincing—"used to say that I was useful to him but—but that was his goodness."

"What did you do for him, my dear?" asked the rector, for the sake of saying something.

It is an unlucky question. Signa summons up all her fortitude as she looks back upon days that are no more; the happy days when she and he wandered, hand in hand, as it were, through the valley of life, both loving hearts attuned in harmony, with a kindred spirit beating in each bosom; all in all to each other, father and daughter, brother and sister, almost lover and mistress.

"What did I do?" she asks tremulously; "ah, it was very little, now I think of it! very little! I tuned his violin: do you remember his famous violin, uncle?" The tears well up, and the dimly-lit room fades and vanishes as the vision rises of that beloved head bent over the rare instrument, of the thin, white hand calling up the divine melodies which even now ring in her ears. "I tuned his violin, and dusted his books, and cleaned his palette sometimes."

Aunt Podswell groans. Tuning fiddles and cleaning palettes! and this is the sort of child's play that the girl has been used to.

The rector coughs apologetically.

"I am afraid our ideas of usefulness are rather different, my dear. But do not be discouraged. I am sure that you will find pleasant occupation in tending the sick, and—er—assisting your aunt looking after the parish."

Assuredly if Signa's work is limited to assisting her aunt in everything, she will not be overworked: Mrs. Podswell's superintendence of the parish consisting chiefly of riding through it once a week, if the weather be fine, in a basket chaise, and stopping to scold some bedridden old woman for absence from church.

"I will do anything you like," says Signa, cheerfully, "only let me do something."

"That's right," says the rector, rubbing his chin; "the spirit is willing, evidently, my dear. We will talk about it to-morrow."

Signa rises; she looks pale and worn; strangely beautiful in the faint light of the few wax candles.

"I think I will go to bed if I may," she says. "I am rather tired, I think," and she goes across to her aunt, and bending over her, touches the forehead with her lips. The rector shakes her hand with nervous effusion that is really meant to be kindly, and she goes out.

Wearily she drags her way up the broad stairs, and to her own room, and with a sense of relief sinks down on to the bed and feels that she is alone.

Does the reader, I wonder, consider me too severe, or charge me in his mind with untruthful exaggeration? If I have erred at all in describing Northwell's Rectory and its master and mistress, it is an error on the side of moderation. Believe me, the place is ten-fold more grim and dreary than I have painted it, for I have spared the reader from a feeling of sympathy and mercy.

Realize for a moment how it struck upon the heart of the young girl, as she sat in her silent room thinking of all she had lost and reflecting that her future was cast in this abode of boredom.

She sat thinking it over, wondering how on earth people managed to exist under such conditions as those that ruled the lives of her uncle and aunt, and with a shudder she prepared for rest, devoutly hoping that she should not dream of the rector's sombre countenance or the martyr's gloomy voice.

"Perhaps in time," she murmured, viewing her face in the glass, wreathed in the silken hair that flowed over her shoulders—"perhaps in time I, too, shall talk like that. Who knows? The dropping of water will wear away a stone, and—ah, dear me! I am not a stone. I know, now, why he sighed when he said, 'Poor Signa!' But there is no one else—no one else; and as there is not, I am doomed to Northwell Rectory, and must make the best of it."

The best of it seemed so poor that she laughed faintly, with a sense of the grotesque; but suddenly the laugh fell short on her lips, as she heard a soft tapping at the door. Thinking it might be the servant—possibly coming to tell her the breakfast hour—she went to the door, and opening it a little, asked the usual question.

For answer the door was pushed softly open, and, to her amazement, a diminutive figure in a night shirt came through the opening, and stood staring up at her with solemn, childish eyes.

The apparition was so sudden, and so unexpected, that Signa stands, with the door in her hand, staring down at the solemn eyes, with eyes almost as grave. Then she recovers herself, and closing the door, bursts into a low, musical laugh.

"What are you?" she says; "an angel—or what?" and she puts her thin white hand under his chin, and turns up the face for examination. A pretty face, for all its paleness and precocious gravity, and with something in the large, dark eyes that goes straight to Signa's tender heart, for the laughter changes to a heavenly smile of girlish sympathy; and, drawing him to her, she asks again:

"Who are you, dear? Where did you come from? What do you want?"

"I want to see you," he answers, with steady gaze.

Signa laughs and sweeps him a courtesy in her long dressing-gown.

"I am much flattered, my dear; that's as pretty a speech as I have heard for—oh, for a long time. But you haven't told me where you come from."

"I sleep at the end of the passage, by myself," he says.

The pity springs up in Signa's bosom, and she bends her head and kisses him.

"You are a brave little fellow to sleep by yourself."

"Am I?" he says. "I don't like it; but mamma says I must. She says that I am a coward. Does a coward always dream big dreams?"

"No; little ones generally," says Signa, caressing the fair hair pitifully. "But never mind, a time will come when you won't mind dreaming—oh, not at all."

"I don't believe that," he says, calmly.

"Oh, yes, it will. But you haven't told me your name yet, you know."

"Archie," he says. "What is yours?"

"Archie," says Signa, "And you are the little boy of the lady I saw downstairs?"

"You mean mamma—yes. You haven't told me your name yet, you know."

Signa laughs softly.

"My name is not such a pretty one as yours," she says. "It is Signa."

"Signa, it is a funny one, but I think it is a prettier one than mine. Signa. Yes, I like it. If I have a puppy," with a sigh, "but I shan't have. Mamma doesn't like animals."

"I can believe that—I mean," says Signa, hastily, go on. If you had a puppy?"

"I should call it Signa."

"That's another pretty speech," laughs Signa, "And pray what made you come to my room? How did you know I was here?"

"I saw you through the banisters," replies the child. "I often creep out quietly, and sit on the stairs while they are at dinner; no one finds me. You won't tell mamma?"

"No, oh, no; I never tell tales, Archie."

"I saw you come in, or I shouldn't have known you had come. Nobody tells me anything."

Signa draws him nearer to her, too full of pity for speech.

"What have you come for?" he demands, fingering her dressing-gown with a quaint thoughtfulness.

Signa laughs again.

"I—I really don't know. Yes"—with sudden gravity—"because I was told."

"Told! Who told you? It must have been a very foolish person," with awful gravity.

"You mustn't say that, dear," says Signa, gently, "because I loved that person, oh, so dearly."

"Why didn't he come with you?" he asks, his dark eyes fixed on her face.

"Because——"

"Never mind," he says, "don't tell me if you don't like; and you don't like, I know. Are you going to cry?"

"No," she says, bravely, and with a little laugh even—"no, I am not, because little boys don't like to see people cry."

Silence for a moment, then he looks up.

"How long are you going to stay here, Signa?"

"Oh a long time; forever and a day," she answers, as lightly as she can.

He stares at her, then his eyes drop.

"I am sorry for you," he says, with slow emphasis, "but I am glad for myself."

"Why are you sorry?" she asks, getting absorbed in the elfish ways of the child.

"Because you will be sure to be unhappy. Everybody is. I don't know why. Are you going to learn lessons? I suppose not. You are grown up, aren't you? I say!"

"Well?" inquires Signa, smiling at the sudden exclamation, made with the air of one about to communicate a most important scientific fact. "Well?"

"You are very pretty—you are beautiful!"

Signa laughs and leans against the back of the bed to enjoy this strange child at her ease.

"Thank you again, Archie, but though I accept the compliment, allow me to remark——"

"Now you are talking like papa," he breaks in, thoughtfully, and laughing for the first time at her laughter.

"Am I? Then I won't. It must be catching, I suppose. I must be very careful. But, Archie, you must not get into the habit of expressing your opinion of a person's looks to their faces; behind their backs is another thing."

He is puzzled for a moment, then his face clears.

"I see. I beg your pardon. I'm glad you told me, because I was going to say, if you hadn't told me, what lovely hair this is," and with the deepest gravity he takes up a thick lock in his tiny hand and eyes it admiringly.

"Well, we will suppose that you haven't said it, Archie," says Signa, keeping her countenance. "And now, hadn't you better go back to bed?"

He puts the sheaf of hair carefully on the white coverlet, and looks up with a sigh.

"I suppose I had. Though nobody will know. You are not angry with me for coming, are you?"

"No, no, dear," she answers, kissing him. "I am seldom, very seldom, angry."

"You will be if you live here, though," he says, with an air of conviction. "Everybody is."

"Then I will be the exception, Archie," she says. "And now, will you go back to bed? You are not afraid, are you? I will hold the light until you are at the end of the passage."

"I am not afraid," he says; "not now. For now I shall dream of princesses, if I dream any big dreams. Oh, I wanted to tell you! When I saw you through the banisters, I thought you were a princess!"

"Yes?" says Signa. "What do you know about princesses, Archie?"

"I read about them," he answers, nodding, his eyes fixed dreamily on the open window through which the moonlight is pouring. "I read about them in a book in the library. There are lots of books there; not many good ones, though; mostly sermons and that sort of thing. Do you know any good stories about knights in armor, and ladies shut up in castles, and fights with dragons? I know there are no dragons now, but that doesn't matter."

"Not in the least," says Signa. "Yes, I'll try and remember some stories by to-morrow."

"And I'll come here and hear you tell them," he says. "I often come here. Do you know why?"

(To be continued.)

No Prohibition on the purest and most refreshing beverage of all—

"SALADA"

TEA

The gently stimulating effects of good Tea are of great benefit to all. The price of comfort and satisfaction is extraordinarily small when you can get genuine "SALADA" at less than one-fifth of a cent a cup.

AT ALL GROCERY STORES

"Like a Royal Procession."

"You would think it was a royal procession," writes an English correspondent to the Military Hospitals Commission in Ottawa, describing the arrival of wounded men from France. "For nearly an hour before a Red Cross train is expected in London," the writer says, "the yard of Charing Cross station is lined with people waiting to throw flowers into the ambulances as the men come out."

Whether we throw flowers into their ambulances or not, we Canadians are full of grateful sympathy for the men who have suffered in defending our cause, and we show our feelings in practical ways.

At least, some of the way are practical. The treatment of the soldiers in the convalescent hospitals and the sanatoria of the Military Hospitals Commission is extremely practical.

The classes and exercises and occupations provided during convalescence are intended, first of all, to help the man's recovery; but they are carefully chosen so as to have another effect also, to fit him better for the battle of life when he is well enough to be discharged.

Already there are men who have left these hospitals so much improved in education and technical skill that they hold better positions and earn higher pay than they ever did before they went to the war.

That is the sort of "royal procession" we want to see—a steady stream of our brave men coming back to the ranks of independent manhood; not unscathed, it is true, but undaunted, and resolved to act a man's part with all the strength that has been restored to them.

SLEEPLESS NIGHTS OVERCOME BY SAFE METHOD

SUGGESTIONS GIVEN WHEREBY INSOMNIA CAN BE SAFELY AND QUICKLY CURED.

Worry, overwork, overstudy and indigestion cause insomnia.

Healthy, natural sleep can't be produced by drugs.

First, the blood circulation must be improved.

Congestion of blood in the head must be removed.

Irritation in the brain must be relieved.

It's because Ferrozone equalizes circulation, because it soothes the irritation, because it removes congestion that it does cure insomnia.

For building blood and nerve, for instilling force and life into overworked organs, for establishing strength and vitality, where can you find anything so efficient as Ferrozone?

Remember, sleep is just as important as food.

You must sleep, or break down, but if you'll use Ferrozone and thereby remove the conditions which now keep you from sleep, you'll get well quickly.

Ferrozone is not a narcotic, not a dope; it is a health-giving tonic that any child or delicate woman can use.

Absolutely safe is Ferrozone.

Take it for a month—take it for a year—no harm, but incalculable good will result.

To sleep well, look well, feel well; to be free from depression, nervousness or blues—use Ferrozone. It's a food tonic, a healer to the weak and wretched, a boon to the helpless—sold in 50c. boxes, six for $2.50, at all dealers, or direct from The Catarrhozone Co., Kingston, Ont.

MOLASSES GOODIES

As Made Successfully by Our Forebears.

The following recipes for molasses breads and cakes are well tried, and come down from the time of the grandmothers with certificates of character:

Boston Brown Bread—To one cup molasses, add one teaspoonful of soda, one of salt, two and one-half cups of milk, one cup of flour, one cup of rye flour and two cups of Indian meal. Steam three hours. This makes a moist and delicious bread.

English Brown Bread—Dissolve half a cake of yeast in two cups of water, and make a sponge with two cups of graham flour. Add one tablespoonful of molasses, one of lard, and one teaspoonful of salt. Stir in two cups of rye flour, and knead slightly. Bake in small loaves in a moderate oven for an hour.

Rye Bread—Dissolve one-half cake of yeast in a cup of milk, which has been scalded and cooled. To one cupful of hot water add two tablespoonfuls of lard, two of molasses and one of sugar, two teaspoonfuls of salt, one cup of flour. Pour in the yeast, beat well, and let rise until light. Add rye meal until stiff enough to knead. After kneading well form into loaves and let rise again and bake in a moderate oven.

Soft Molasses Cake—To one pint of molasses, add one teaspoonful of soda and two of cream of tartar, with one well beaten egg, a half cup of milk, one tablespoonful of ginger, one teaspoonful of cinnamon, one tablespoonful of butter, and two and one-half generous cup of flour. Beat well and bake for one half hour.

Soft molasses cake, baked in two layers, with a filling of whipped cream, makes a delicious dessert.

Gingerbread— Cream together one cup of sugar and one-half cup of butter with a pinch of salt. Dissolve three-quarters of a teaspoonful of soda in two tablespoonfuls of molasses, and add to sugar with a half cup of milk and a scant teaspoonful of ginger. Mix well with two cups of flour, and bake in a greased tin a moderate oven.

Ginger Snaps—Boil two cups of molasses and add one tablespoonful of soda, one cup of lard, one tablespoonful of ginger, one teaspoonful each of cinnamon and cloves. When cool stir in enough flour to make a stiff batter. Roll out very thin and bake in a hot oven.

Ginger Drops—One large teaspoonful of soda dissolved in two-thirds of a cup of molasses. Add one beaten egg, one cup of brown sugar, one tablespoonful of ginger, pinch of salt, and one-half cup of cold water. Mix with flour to a stiff batter, and drop by teaspoonfuls on greased pan. Bake in moderate oven.

Cheap Fruit Cake—This may be made in a loaf or in small cakes. One cup of butter, one cup of sugar, one cup of molasses, one cup of milk, one cup of raisins, one cup of currants, one well-beaten egg, three teaspoonfuls of spices, and four cups of flour with a teaspoonful of salt. Dissolve the soda in the molasses and sift the fruit in the flour. One half of this recipe will answer for a small family.

Corns Cured Quick

Applied in 5 Seconds

Sore, blistering feet from corn-pinched toes can be cured by Putnam's Extractor in 24 hours. "Putnam's" soothes away that drawing pain, eases instantly, makes the feet feel good at once. Get a 25c bottle of "Putnam's" to-day.

Hindenburg

Military men the world over will not share the popular emotion excited by the promotion of Field Marshall Hindenburg to replace Falkenhayn as chief of the great general staff of Germany. The truth is that Hindenburg is one of the familiar but thoroughly dangerous men about whom there grows up a legend. In fact, he fulfils M. Clemenceau's definition of a symbol, "a man about whom the people still believe what was never true."

No one will deny the greatness of Hindenburg's first victory, and only in Germany has the value of Tannenburg been accurately appraised. Had Hindenburg failed where he succeeded, Germany in the second week of September, 1914, would have been faced with a wholly desperate situation. The defeat of the Marne, the rout of the Austrians at Lemberg, followed by the temporary collapse of the military establishment; the brilliant victory of the Serbs at the Jedar, together with a lost battle at Tannenberg, would have presented a problem that would have taxed a Napoleon.

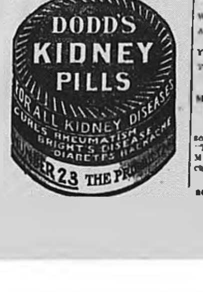
It was the victory of Tannenberg that enabled the Germans to continue their campaign in the west, to make their second great bid for a decision at Ypres and Yser and, defeated in this, to dig in and hold the lines that they have held ever since. Had Hindenburg failed, the German retreat from the Marne would not have stopped at the Aisne or the Meuse, and it would have been necessary at once to send many corps to the east to save the Prussian frontier.

But, despite his second success at the Masurian Lakes, Hindenburg never realized the promise that his first successes held out. His attempts to take Warsaw were dismal failures, costing enormous losses, and ending in complete deadlock on the Bzura-Rawka lines. Nor was his effort to penetrate the Bobr-Narew-Niemen line north of Warsaw more successful. At Lodz, his third great victory, he came within an ace of a terrible disaster, and was saved by the supreme courage, devotion and discipline of German troops rather than by any skill of a commander-in-chief.

The real military reputation of the eastern front is that of Mackensen. His was the first and successful thrust in the opening phase of Lodz. He won the battle of Dunajec, and it was his first operation that finally turned the Russians out of Warsaw more than ten months after Hindenburg had begun his campaigns for the Polish capital. But there is no Mackensen legend, and Hindenburg, the savior of East Prussia, as he actually was, became in the eyes of the German people a soldier not less successful than Napoleon the Great, and not less gifted as a staff director than the elder Moltke.

The retirement of the younger and lesser Moltke, who was chief of the great general staff when the war opened, was inevitable when the decision of the Marne had been made absolute by the battles of Flanders and the whole original conception of a quick, terrible, decisive thrust at France had been parried. He had failed, he had failed in the greatest crisis of the whole war, and his failure had resulted in the collapse of the main strategy by which Germany had for forty years expected to win her next war against France.

We shall probably find hereafter that Falkenhayn's retirement was the direct result of the failure at Verdun. This was the second and only less ambitious effort to abolish the decision of the Marne and put France out of the war. But it seems certain that history will do full credit to the very great achievements of the man who now gives way to the victor of Tannenberg. When he took the reins the German situation, without being desperate, was certainly unpromising. In less than six months he had organized forces and prepared plans that led to the amazing cycle of victories which carried German lines from the East Prussian frontier and the Austrian provinces of the east to the Dwina, the Beresina, the Styr and to Constantinople.



Minard's Liniment Co., Limited.

Gentlemen,—I have used MINARD'S LINIMENT on my vessel and in my family for years, and for the every day ills and accidents of life, I consider it has no equal.

I would not start on a voyage without it, if it cost a dollar a bottle.

CAPT. F. R. DESJARDIN,
Schr. "Storke," St. Andre, Kamouraska.

About 100,000 persons are engaged in the meat-packing industry of the United States.

GUARD BABY'S HEALTH IN THE SUMMER

The summer months are the most dangerous to children. The complaints of that season, which are cholera infantum, colic, diarrhoea and dysentry, come on so quickly that often a little one is beyond aid before the mother realizes he is ill. The mother must be on her guard to prevent these troubles, or if they do come on suddenly to cure them. No other medicine is of such aid to mothers during hot weather as is Baby's Own Tablets. They regulate the stomach and bowels and are absolutely safe. Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

When Will the Empire Fall?

When the last Scot has locked his last
On Scotia's heathered hills;
When the last tar on England's ships
Unto his death-call thrills;

When the last Celt in Erin's isle
Lies prone on Erin's sod;
And Cambria's last brave hillman hails
The summons of his God;

When Canada's last stalwart son
Lies stark amid her snows;
When India's proud Sikh has hurled
Defiance at her foes;

When the great Southern isles have given
Their eager, last recruit,
And Boer and Briton from the Veldt
Lie rigid, mangled, mute;

Yes, when Columbia's flag unfurls
No more at Freedom's call
Then, not till then, know foe, or friend,
Shall Britain's Empire fall!
—Sunshine.

Minard's Liniment Cures Garget in Cows.

"Success generally depends on personal magnetism," said the Wise Guy. "That's right," agreed the Simple Mug. "A man can't even be a successful photographer or a dog catcher."

Stupidity has no friends, and wants none.—Horace Greeley.

ISSUE NO. 39. 1916

HELP WANTED.

WANTED—GIRLS TO WORK ON knit underwear—seamers and finished stitchers preferred. We also teach learners, any girl with good knowledge of plain sewing; good wages; ideal factory conditions. Zimmerman Manufacturing Co., Ltd., Aberdeen & Garth Streets, Hamilton, Ont.

WANTED — HOUSEMAIDS AND waitresses. Previous experience not necessary. Apply, "The Welland", St. Catharines, Ontario.

MISCELLANEOUS.

WANTED—GIRLS OF GOOD EDUC[illegible] tion to train for nurses. Wellandra Hospital [illegible]

LADIES WANTED.

TO DO PLAIN AND LIGHT [illegible] ing at home, whole or spare [illegible] good pay; work sent any distance; charges paid. Send stamp for particulars. National Manufacturing Company, Montreal.

GIRLS WANTED

Experienced knitters and loopers, also young girls to learn. Clean work and highest wages.

CHIPMAN-HOLTON KNITTING CO., LIMITED,
HAMILTON, ONTARIO.

CONVALESCENT CHILDREN.

How to Amuse a Child Doomed to the Bed Awhile.

A child recovering from an illness is apt to be fretful and peevish, demanding any amount of patience on the part of a mother or an attendant.

If the child is a boy modelling in clay will be found entertaining, and by helping him form different animals and houses many an irksome hour will be whiled away. If a girl, try paper flowers or paper dolls. Children also enjoy making scrapbooks. Cut attractive pictures from old colored magazines, for it should always be remembered children like bright colors. Young children can cut if they are not competent to paste.

Never let a child who is recovering from an illness sew, for it will prove tiring, the work being too intent, whereas paper clothes for dolls are sure to be enjoyed without fatigue.

A pair of toy scales and supplies, in the shape of rice, sugar, raisins and salt, to keep shop, will please a small child, and mother, of course, will do the buying.

Expensive toys are not necessary to make a child happy, for nine out of ten will prefer some simple homemade affair or an amusement they create for themselves.

A WOMAN'S MESSAGE

If you are troubled with weak, tired feelings, headache, backache, bearing-down sensations, bladder weakness, constipation, catarrhal conditions, pain in the sides regularly or irregularly, bloating or unnatural enlargements, sense of falling or misplacement of internal organs, nervousness, desire to cry, palpitation, hot flashes, dark rings under the eyes, or a loss of interest in life, I invite you to write and ask for my simple method of home treatment with ten days' trial entirely free and postpaid also references to Canadian ladies who gladly tell how they have regained health, strength and happiness by this method. Write to-day. Address, Mrs. M. Summers, Box 8, Windsor, Ontario.

THE REASON.

(Houston Post)

"Three times now my wife has sent for the money to come home from her summer trip on." "Three times! And she hasn't come home yet? Changes her mind and spends the money, I presume?" "Oh, no, she wouldn't do that." "Then why hasn't she come home?" "I haven't sent it to her yet."

Minard's Liniment Cures Distemper.

COSTLY LEARNING.

(Washington Star)

"Has your boy Josh learned much at school?" "I should say so," replied Farmer Corntossel. "He knows so much about runnin' the farm that me an' the hired men git so interested listenin' that nobody does any work."

Minard's Liniment Cures Diphtheria.

JUDGING BY EXPERIENCE.

(To-day)

Lady Visitor—Well, Mrs. Johnson, what do you think of your husband getting the D. C. M.?

"It's the first I've heard of it, ma'am, but I ain't a bit surprised. Suppose it's his nasty temper that's been the cause of it."

Minard's Liniment Cures Colds, Etc.

LUCKY.

(New York World)

"My cousin is to be married on the thirteenth of next month."

"On the thirteenth? I should think she would be afraid of such an unlucky date."

"Evidently you have never seen my cousin. Any date would be a lucky day for her to get married."

"How much does it cost you to run this yacht, old chap?" "If I knew, I wouldn't do it."—Life.

"Meat Prices Will Not Come Down" is the cheerful news from the Department of Agriculture. Meat prices will not worry the man or woman who knows that a **Shredded Wheat Biscuit** will supply more real body-building nutriment than beefsteak or eggs and at much less cost. Shredded Wheat remains the same price, the same high quality, supplying all the nutriment a man needs for a half-day's work. Two shredded wheat biscuits with peaches and cream or other fruits make a complete, nourishing meal at a cost of not over five cents.

Made in Canada

Work of the Surgeon

From Somewhere in France, Dr. E. H. O'Reilly, of this city, sends the Times a marked copy of the London Morning Express containing the following interesting description of the [illegible]ork of the military hospitals in England:

Lord Kitchener is unhappily no [illegible] with us, but the stupendous [illegible] which that master mind [illegible] and set going, and which [illegible] an almost incredibly short [illegible] of time put England in the very [illegible] rank of European military [illegible]wers, continues to revolve silently [illegible] day and night. Our enemies themselves, whom Englishmen are apt—far too apt—to describe as the arch organizers, have confessedly been staggered at the result. We can all talk glibly of an army of five million men now that it is an accomplished fact, but few of us probably realize the difficulties that have had to be surmounted, and from this point of view the growth of the Army Medical Service is particularly instructive. One of the first obligations of the state was to see that the gallant fellows who risk life and limb for the honor and security of their native land should be well cared for when they happen to be brought back wounded from the front. Just how was this to be done? Obviously the Army Medical Service that sufficed to deal with the comparatively small number of troops on the establishment in pre-war days was wholly insufficient for the purpose, and, on the other hand, the training of a surgeon is a work of time. Fortunately, although this, of course, detracts but little from the merit of what has been achieved, the medical profession responded nobly to their country's call. Men who, when war broke out, enjoyed a private practice running in some cases to as much as five figures in pounds sterling, are now wearing His Majesty's uniform and receiving pay which hardly covers the rent, rates and taxes of their professional residences. Public bodies, moreover, and well-to-do persons have freely given up their buildings and private residences for the treatment of the wounded. The result is that military hospitals have sprung up like mushrooms in the night. This is particularly the case in London, where there are no fewer at the present moment than one hundred and eighty-six. Thirty-nine and these by far the larger ones, are army hospitals properly speaking, and the rest consist of private buildings and local institutions, although all, of course, are under the control of the War Office, and the patients are subject to a mild and beneficent military discipline. London, in fact, gets a very considerable proportion of the cases, the reason being that the men are able more or less to choose the place where they shall receive treatment, and that they and their relatives incline very much to the opinion that it is in the capital of England that the best medical or surgical treatment is to be obtained.

A TOUR OF INSPECTION.

During the present week a party of British journalists were privileged, through the courtesy of Sir Alfred Keogh, Director-General of the Army Medical Service, to visit some of the larger hospitals, and also the Royal Army Medical College at Millbank, which may be termed the brain of the organization. The trip, which was personally conducted by Col. Woodwork, Assistant Deputy Director of Medical Services for the London district, had been arranged with a view to giving the general public an idea of the manner in which that organization works. Necessarily little is known of the subject by outsiders. Military hospitals are busy places, and there is no room in them for mere idlers, while even relatives of wounded men who go to see them on visiting days can really know but little of what is going on within their walls. A visit to any one of them, it may be said at once, is eminently calculated to impress on one the marvellous progress that has been made in recent times in surgical science.

The big hospitals vary widely in character, even though certain features are common to them. Thus some of them are devoted to special cases of injury, as, for instance, fractures of the jaw, which are treated mostly at Norbury. Slight cases are sent on to convalescent camps, and cases which are likely to occupy a long time—say nine to twelve weeks—to what are called command depots. In all the hospitals what the medical staff set above all is conservative surgery, that is to say the saving of limbs in order that the patients may remain useful members of the community. Thus at the Herbert Hospital at Shooter's Hill there have been since the war from three to four thousand operations, and Col. Simpson, the officer in charge, declared that he did not believe there had been in all more than twenty-five primary amputations. Amputations, in fact, are only resorted to in these enlightened days when all other known methods of treatment have failed or gangrene has set in. Let us see, then, in what this conservative surgery consists.

SOME TYPICAL OPERATIONS.

A few illustrations among many which might be given will make it clear. Not long ago a wounded Guardsman was brought into the Queen Alexandra Hospital at Millbank suffering from a shrapnel wound. Examination under the X-rays showed that a piece of metal as large as a halfpenny and much thicker had entered the breast and lodged in the region of the heart. It was, in fact, actually touching the heart and impeding its action. An operation was decided on, and the surgeon thrust his hand right into the opening and pulled out the piece of metal, which is preserved as a souvenir. There was a danger that during anaesthesia the lungs might collapse, and therefore ether was pumped into them to keep them distended. That gallant Guardsman is now out and about, and it is declared that he will not feel the slightest ill effects from his strange experience. The surgeon who performed the operation is an Australian, Major Scott Skirving. But still more wonderful in a way are the operations in cases of bone, muscle, or nerve fracture. The surgeons of days gone by had no idea of the extent to which the human body is self-recuperative. Modern military practitioners do not hesitate to steal a piece of bone from one part of a patient's anatomy and utilize it in the repair of another that has been blown away by shot or shell or removed on account of irremediable injury. The bone from which the piece has been taken proceeds to grow just as, to cite an example with which most people are familiar, a crab grows a new claw in the place of one that has been lost. In the hospital that has just been mentioned there is at the present moment a Serbian officer who was wounded in his own country and was brought to England for treatment. It was a case of severe injury to the jaw. Lieut. Sir Francis Farmer removed a piece of bone about two and a half inches long from the tibia of the patient and, having carefully prepared a bed in which to place it, fixed it in the jaw. Already the patient's leg has healed up wonderfully well. The healing of the jaw is a rather longer process, but he can now eat much better than he could, and it is hoped that a perfect cure will result. The Serbian officer is now to all appearances well and in good spirits.

HOW FRACTURED BONES ARE MENDED.

In a very large number of cases a broken bone is carefully joined by means of a steel splint, which is screwed to the bone just as a carpenter screws two pieces of wood together. The steel plate, which is sometimes about an inch wide and four or five inches long, remains permanently in the wound, together with the steel screws, and the patient suffers no inconvenience in consequence. It is the opinion of Colonel Pilcer, who has performed many of these operations that in time the steel would become, as it were, dissipated in the system and disappear altogether. As iron is one of the constituents of the blood, the splint does not constitute a source of danger. Some notable cases of the kind have also occurred at the Herbert Hospital at Shooter's Hill. Here also cases of injury to nerves causing paralysis have been successfully treated by bringing the ends of the nerves together and joining them. In one case, at the Hammersmith General Hospital, Wormwood Scrubs, six useless muscles were taken from one side of the wrist of a patient and transferred to the other with the consequence that the man, who was previously paralyzed in the hand, can now raise his wrist and extend his fingers. In one of the military hospitals a little while ago there was a patient who had had part of his arm shot away, so that the nerve was missing over four inches. In these circumstances to pick up the ends of the nerves and unite them was impossible. The surgeon who had the case in hand made inquiries at other hospitals in London, and he found that at one of them a man was to have a leg amputated at half past three the same afternoon. Orders were issued so that the moment the limb was severed it was put in a saline bath taken to the military hospital in a taxi-cab. The patient at the military hospital being under anaesthesia, his damaged arm was opened and a piece of healthy nerve from the other patient's amputated leg was substituted for the injured portion. The operation was completely successful, the patient recovering the use of his hand, which had been paralyzed. The operations to which reference has been made would doubtless be described as severe even by medical practitioners, nevertheless modern science has robbed them of most of their terror. The improvements in anaesthetics have been such that it is no uncommon thing for an operation to last two hours and for the patient to feel no ill-effects from the drug a quarter of an hour after he recovers consciousness. Some, indeed, will be smoking a cigarette within that space of time. The secret lies in the administration of oxygen with the anaesthetic.

SHELL, FIRE AND JAW INJURIES.

A visit to the hospital at Norbury is of special interest, because it is here that injuries to the jaw have to be treated, and owing to the immense expenditure of shells in this war and the use of high explosives surgeons are confronted with problems of which previously they had had little or no experience. What they call civilian injuries, such as a fracture of the jaw from the kick of a horse, are comparatively rare. Most of the cases are more serious, although naturally they vary very much in degree. If a bullet or a piece of shell hits the jaw direct it takes a piece clean out, but if it strikes it at an angle, it will smash it in all directions. Injuries of this character should be dealt with at any early stage if the best results are to be obtained, but it is astonishing to find what can be done even in cases where expert treatment has not been immediately available. Various ingenious contrivances are used for bringing the jaw into a proper position before the bones are allowed to unite permanently. Even the disfigurement that necessarily results more or less in these cases is reduced to a minimum by cutting the scars and then dilating them. The hospital was opened last June, and is believed to be the only one in the country. Captain H. M. Holt is in charge of it, and he has a valuable coadjutor in Mr. J. F. Colyer, formerly of the Dental Hospital in Soho-square. Mr. H. F. Colam, K.C., the Recorder of Croydon, has also rendered invaluable service in designing and making many of the splints that are in use.

In all the hospitals there is a large room where patients on their arrival undergo a preliminary examination. Here their clothing is taken from them and this is thoroughly disinfected before being washed. They are then assigned to a particular ward, where their special needs are attended to. Such is the perfection of the system that there is not one of the numerous wounded heroes who are seen being conveyed in ambulance wagons through the London streets almost every day for whom it is not possible to find suitable accommodation at once. In fact, there is hardly one of the hospitals in which at any given moment there are not quite a number of empty beds. As regards the general arrangements there is a likeness among the hospitals respecting certain general matters. Scrupulous cleanliness, it is hardly necessary to say, is everywhere preserved, and the wards are made cheerful with beautiful flowers. Beds are so fitted that they can be moved smoothly and noiselessly about, and thus patients can be transferred from one ward to another, or from the ward to the operating room without being disturbed.

USE OF X-RAYS.

Empress Eugenie, once Empress of France, is a wonderful lady of ninety years. She lives in one of the largest residences in England, Farnborough, Hampshire, and minutely follows the course of the war by means of large maps.

The X-ray department is always an important feature, and here the work, which involves no slight risk, by the way, to the devoted men who undertake it, is of a severely painstaking kind. Thus at the Herbert Hospital at Shooter's Hill they have in stock 20,000 negatives illustrative of cases, and so carefully are they classified that any of these can be got out for reference in less than five minutes. Wherever possible the system of open-air treatment is adopted, and this is particularly the case at the Wandsworth Hospital, which, being located in an open situation in proximity to two extensive commons, is peculiarly adapted for the purpose. At the same time, the very latest appliances in use anywhere for the relief of suffering are brought into requisition. Electrical baths and massage are in constant use to stimulate recovery, while septic wounds are treated with a constant flow of oxygen to the affected parts. These septic wounds are caused in many cases by ricochet shots, which, after striking the earth, enter the body. Earth, particularly earth in which vegetation is growing, is apt to contain dangerous bacilli, which cause what is called gas gangrene. A course of the oxygen spray reduces the bacilli to impotence. Many of our wounded men have a firm conviction that they have been wounded with explosive bullets, but no absolute confirmation of this can be obtained. There is no doubt, however, in the opinion of the medical officers, that many of the injuries have been caused by soft-nosed or expanding bullets. At Hammersmith Hospital, formerly the Hammersmith Infirmary, special attention is paid to cases of what is called frostbite, although a more appropriate designation is trench foot. Constant immersion of the feet in cold water leads to a curvature of the instep, which make walking impossible. In many cases a complete cure has been effected. In this same establishment, too, an interesting experiment is being made with small foot-baths, in which the water is kept constantly flowing by means of a revolving wheel. This is said to have had excellent results in Paris as regards its stimulating effects on muscles and stiff joints.

DOCTORS, NURSES AND PATIENTS.

Of the work of the medical staff in the hospitals it would be almost impossible to speak too highly, and the same remark applies to the nurses, the great majority of whom, it need hardly be said, are women. Here, indeed, is a field in which women are incomparably superior to men. If anyone doubts it, let him ask any one of these army medical officers. The women are tender and tactful and untiring in their attentions to their charges, veritable ministering angels, in fact. And the patients? It may be asked. Well, they, too, are splendid. Not a murmur does one hear from any one of them. The British soldier is a stoic, and more or less perhaps a fatalist. There is not the least affectation about this. What he hates above all is a "grouser." And if he cannot muster up a smile he must be feeling bad indeed.

STAINS OF THE SEASON.

To remove pickling stains, wash the hands and dry slightly; then strike a sulphur match and hold the hands over and around it to catch the fumes.

Fruit stains may be removed from white fabrics by moistening them with a solution of bleaching powder or javelle water, followed by a solution of one part muriatic acid to five of water.

Mildew stains should be steeped in a solution of washing soda, then apply a solution of bleaching powder or javelle water, and then a solution of one part of muriatic acid to five of water.

To remove stains from paring, rub the hands with the inside of apple or pear parings before using soap.

A general recipe for removing fruit, wine, ink or mildew stains is first to wet the stained place with clean cold water; then apply a lotion made of one tablespoonful of lemon juice, one tablespoonful of the purest cream of tartar and one teaspoonful of oxalic acid; put all into a pint of distilled water (or rainwater), shake it before using, and apply with a soft cloth till the spot is saturated with the lotion, then sponge it off again in clean cold water. If the stain does not altogether disappear, repeat the process till it does.

◆

Children's clothing may be made fireproof by adding to the rinsing water two ounces of alum to every gallon of water.

ROUMANIA REDIVIVUS

The preliminary work of aircraft on active service was, as had been anticipated, strategical scouting. They had, that is to say, to pass over hostile territory, locating the concentrations and massings of the enemy and noting the routes by which he was advancing and also the rate of progress, from day to day, of this advance. And here, during this period, the air services gave their headquarters all the news they could possibly have been expected to give, having regard to their lack of numbers, which restricted frequently their use.

It would have been almost impossible, for instance, owing to the employment of aircraft, for one of the antagonists to have planned, and carried out without detection for the air, any such large movements of troops—relying for its success upon surprise—as would have had a determining influence on the campaign. It was a fact, though, all the same, that occasionally, favored, say, by wooded country or by a temporary lack of aircraft at some given point, individual troop movements were possible without detection—but not on any grand or decisive scale.

An aeroplane observer, if he is well trained and a man suited personally for his work, is not easy to deceive, granted that weather conditions are reasonably favorable. Even when no troop movements are actually visible, he can draw many useful inferences from what he sees below. Some unusual gathering of rolling stock, for instance, noted at a railway junction behind the enemy's lines, will suggest a good deal to him; while, should enemy troops march only by night and rest by day, there may be signs of billeting in villages which will attract his attention. Even if troops take cover instantly, when the sound of an aeroplane engine is heard, there are often tell-tale signs about a road, something left in sight that should have been removed, which will put an observer on the qui vive.

In strategical scouting, by way of summary, one may say this: that honors were divided evenly between the rival services. Our pilots flew admirably on reconnaissance; so did the Germans. We gained news by air which was of extreme importance, and so did they; though the Germans had the advantage, in more than one instance, of a larger number of machines available immediately.

It was not until the armies met and were in conflict west and east that any question arose of the superiority of one air service over the other. And this superiority, when it was observable and began to incline perceptibly in the direction of the Allies, revealed itself in aerial fighting.

Combats in the air were precipitated, not so much by the drawing together of the armies, as by the persistence of the German airmen in directing from above the fire of their artillery. Here indeed, by the aid they gave their guns, these aviators were able to increase materially — and very greatly to our detriment — the accuracy of the shell fire against our trenches. And what made the position more unsatisfactory for us, at any rate for a time, was the fact that we had not perfected, before the war, as had the Germans, any system of cooperation between aircraft and artillery. This was not because we had ignored the possibility of any such cooperation, but because there had not been sufficient pilots in Britain or machines to permit of experiments being made on more than a tentative scale.

At first, mainly by means of land fire, we tried to deal with the hostile airmen, who, dropping smoke bombs to indicate our positions, rendered so damaging the German shrapnel fire. But the land guns proved ineffective; and it may be stated, indeed, here, that the land fire against aeroplanes, though it has harassed aviators, undoubtedly, and has made them fly high—rendering their observations so much the more difficult—has never impaired at all critically the value of their work; though it is on record that aeroplanes have been hit recently and destroyed, when flying at latitudes as great as 15,000 feet.

Unable to cope, from the ground, with these persistent observers aloft, we sent up our airmen to fight them in their own element and to attempt in either to destroy them or to drive them away. Piloting, whenever possible, light, single seated machines—which were faster in flight than the two-seated scouts employed usually by the enemy—our airmen waged, either with rifles or revolvers, a guerrilla form of warfare which depended almost entirely for its success on their skill as pilots and on their daring and judgment in manoeuvering during a combat. The duels, indeed, which they won, killing or wounding hostile pilots or damaging craft by direct hits in their mechanism, were due primarily to their quickness in handling their machines and to their intrepidity when at close quarters. This was the sort of warfare, in fact, making as it did the largest possible demand on the individual, in which Britons have shown themselves, throughout our history and on either land or sea, to be always completely at home; and, here and now, in this new element, it was the same. Our pilots took to the air and to aerial fighting, like ducks to water.

A point in our favor, of course, in these early combats, was that our machines, and those of the French, although they had not been built specially for fighting, any more than had those of the enemy—and were, indeed, scouting machines pure and simple—proved, to a matter of actual fact, owing to their speed and quickness in manoeuvering, more suitable for duelling than the inherently stable monoplane or biplanes which were flown by the Germans. The latter learned, indeed, and this in the first few weeks of the war, to be sorry they had placed so many of their eggs in one basket. German pilots would have been only too glad to have had a little less stability, and a little more speed.

But, setting aside any question of machines, the Germans were outfought by our aviators, and also by those of the French. The German pilots were well trained, reaching indeed a high level of general competence. They lacked nothing, either, in courage. But—and here, of course, one must generalize—they had not that temperamental, daring, that mental elasticity, that inimitable mingling both of impetuosity, and of judgment, which characterized our flying and also that of the French. The German is rarely, one may mention, a fine horseman; and in expert flying, as in riding, it is largely a question of hands, of delicacy in manipulation, of suppleness and strength. The hard and fast rules, regulations and discipline of the German military training, prejudice, to no small extent, the turning out of an efficient aviator. Aerial warfare demands, at a critical moment, an instant decision and a spontaneous action—qualities which are conspicuous by their absence in the average German soldier.

Blue and green checked plaid is cleverly manipulated in this smart top coat. The fullness is attractively confined by the narrow belt with its cartridge trimming.

The war by land settled quickly into a war of mechanism, of organization, and of slow, ponderous blows. But aerial fighting remained essentially a question of individual enterprise—of one man pitted against another, in a duel high above the earth, each handling an apparatus which demanded an exceptional skill, and with victory going to the man who had the quickest hand, the clearest head, the finest instinctive judgment of speed and distance.

And so the first and most important lesson of the war by air, apart from machines or of numbers, was this: that the British and French aviators, and the Russians too—when they could obtain suitable machines—were individually superior, as aerial duelists, to their German adversaries. And this without disparagement of the enemy in his scouting. Here, indeed, the work of the German airmen, when they could do it without being attacked or harassed by hostile craft, was consistently good. But as aerial fighting grew more and more frequent, and began to exercise an influence that was dominating on the campaign by air, so our superiority revealed itself the more strongly.

The Germans, though they strove industriously to profit by lessons of the war, and were helped very greatly by their pre-war organization, could not alter the characteristics or temperaments of their aviators, seeing that these were national—typical of the German nation as a whole. With their early preponderance in machines, aided by their organization, the Germans should have been able in the first stage of the war, and before their opponents equipped themselves adequately, to have almost swept clear the air of allied craft. That they failed to do so was owing to the fact that, as human units and not as cogs in the machine, they were unequal to the task.—Claude Grahame White and Harry Harper in the London Chronicle.

Vagabonds.

In Japan I bought six vases, all alike, of cloisonne,
For I thought me of the weddings back at home in U. S. A.
And the weary hunt for gifts to give away.

When I landed, old Tom Taylor was about to wed his Grace;
So I packed me up two cloisonne and sent them on space,
In the hope that they would fill some empty place.

And when Jimmy married Helen I reduced the lot by four,
To be startled, at the function, when I reached the gift-room door;
For I found that some one else had sent two more.

Six months later George and Vera got the last two of my stock;
And I ambled to that wedding and another painful shock
When I saw six odd-shaped vases in a flock.

Time has passed, and Beth has trusted me enough to be my wife;
And the honeymoon is over, and we settle down to life
In a snug apartment decked with presents rife.

In our den we have six vases, all alike of cloisonne—
Sort of pals—they seem to know me and I want to see them stay,
But—my Beth received two wedding-cards to-day.

—Charles Elkin, jun., in Life.

THAT'S ALL.

(New York World)

"You say this residence property is carefully restricted?"

"Yes."

"What are the restrictions?"

"No one can buy property here unless he has the price."

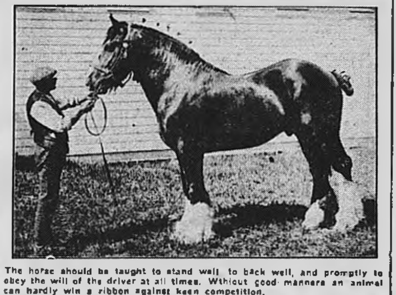
A painting hint. Take a dustpan without sides, or a cardboard, and when painting the mopboards lay tin or cardboard on the floor, and you will not get spots from the brush on the floor; or when varnishing your the mopboard, moving it as you go floors put cardboard or tin close to along.

On Exhibition--Both Horse and Horseman

What the Judge Looks for—How the Man Can Assist His Animal in Winning—Value of Proper Classification, Suitable Action and Good Manners.

BY A VETERAN JUDGE.

The success of horses in the show ring often depends as much upon their fitting and the manner in which they are handled in the ring, as upon their individuality. It is not unusual to see a horse of high-class individuality, that is neither well fitted nor well shown, beaten by an animal of poorer individuality and general characteristics, but that is well fitted and properly shown. In each case the judge is often blamed, but the exhibitor must remember that in order for his horse to win in reasonably good company, it is necessary that he be, at least, in fair show condition and that he performs well before the judge in the manner demanded of horses of his class. As in all classes of horses, action is very important. It is not enough that the general conformation of the horse indicates that he should perform well; he must show the judge that he can do so, hence, if from want of training or from other causes, he fails to show the desirable qualities when in action, he should be beaten by his inferior competitor that has been educated to go and act well.



The horse should be taught to stand well, to back well, and promptly to obey the will of the driver at all times. Without good manners an animal can hardly win a ribbon against keen competition.

The fact that a horse is fat and has a good coat and is of good conformation and good size, is not sufficient; he must show good manners and the characteristic action of his class in a reasonably well marked degree.

JUDGE SHOULDN'T CLASSIFY ENTRIES.

We shall take it for granted that the prospective exhibitor has decided the class to which his horse or horses belong. Here again mistakes are often made by the exhibitor. He enters and exhibits a high-class animal in the wrong class, and is beaten by horses worth much less money, but properly belonging to the class. Here again the judge is often subjected to severe criticism, many claiming that the most valuable animal should win. This argument, of course, has force when the entries are all properly classified, but where some of them are not in their proper class it does not apply. Some claim that the judge, especially of small exhibitions, should classify the horses. We think that this would be a mistake. The judge has also enough to answer for as it is; there would be no end of trouble if he commenced to tell the exhibitors which class to show in. Each exhibitor would expect his entry to win in the class he was told to show in, and as all cannot win the judge would be blamed for telling an exhibitor to exhibit in a certain class and then not giving him first place.

Many will say, "It is easy to tell which class a horse belongs to." But it is not always as easy as some think. In the very heavy classes, the difference between a draft horse and an agricultural horse is simply that of weight. In the latter classes the action of a horse, especially one of mixed breeding, is often the determining factor for classification. He may be a carriage horse, a roadster, a runabout, a saddler or a combination horse, according to his style of action and speed. Of course in pure bred, or nearly pure bred animals, that are reasonable representatives of the breed there should be no trouble in classification; but in horses of composite breeding, the blood of one breed may predominate in one animal and that of the other breed in another of exactly the same breeding, probably full brothers or sisters, hence they properly belong to different classes, although when standing they may be a well mated team.

MUST UNDERSTAND TYPICAL ACTION.

Having decided the class to which a horse or a pair belongs, the prospective exhibitor should commence to fit them. With the heavy classes, we may say that it is seldom that a horse is too fat for show purposes, so long as he is not carrying enough flesh to make him dull and clumsy. With the lighter class it is different. A light horse of any class may easily be overburdened with flesh. This, of course, applies especially to the roadster and saddle classes. The amount of flesh and the coat of a horse depends upon the food consumed, in proportion to the labor performed, and to grooming.

During the process the horses must have regular exercise, and each time they are exercised care should be taken to intensify the type of action demanded in the class. In many cases shoes of special weights and conformation enable the animal to act in a more typical manner. The trainer in order to be a successful exhibitor, should, in the first place, have a thorough idea of what constitutes typical action, and then study out the manner in which his horse should be shod, harnessed and driven in order that he may show the best that is in him when called upon. The horse that is being prepared for show should not be driven or ridden sufficiently to tire him at any time, but he should at all times be made to go in the desired way, to as marked a degree as possible. He should not be allowed to loaf at any time; else he will probably want to do so in the ring. He should be exercised on the halter, in harness or saddle, as the case may be, every day, and when being exercised should be kept up to the mark (attend strictly to business) all the time. He should be taught to stand well, back well and promptly to obey the will of his driver or rider at all times.

Manners count for a great deal in the show ring. This applies to all classes, but especially to the lighter classes. The judge is often placed in a very unenviable position by lack of manners in the horses he is judging. An ill-mannered horse or team is probably, in other respects, the best in the ring, but he, or they, are acting so badly that it is not right to place the entry above those that show good manners. Here again the judge often gets into trouble. Those interested will claim that the entry is the best in the ring, hence should win. They forget that manners is a very important point of a horse, and has great influence in establishing its value, and that a horse whose manners make him unsafe is not valuable in any class. Want of manners is usually more marked in the halter classes than in others. Colts of different ages are frequently brought into the ring with practically no training. When asked to show action, either at a walk or a trot, they go sideways, or backwards, rear or kick, and perform other "stunts" not desired, but absolutely refuse to perform properly. Under such circumstances the best animal as regards size, conformation and general characteristics, except for action and manners, often goes away without a ribbon, and, of course, the judge is adversely criticised. The exhibitor should remember that the judge is justified in expecting that he will have taken pains to teach his entry to perform reasonably well before taking him into the show ring, and to train him to exhibit in a reasonable degree the characteristic action looked for.

Green exhibitors with green colts often spoil matters by carrying and using a whip. The colt is watching the whip all the time instead of attending to business. The boy showing the colt expects the animal to lead him instead of him leading the colt. It is not uncommon in such cases to see the boy get angry because he has not won, and lead the colt away in a hurry, the colt following the boy and showing such action as would have secured a better place if he had done as well when being exhibited. We may be justified in saying that a man or boy who has not spent sufficient time with his colt to teach it to go reasonably well but who evidently is showing simply because he thinks he can get a little "easy money" is not entitled to much consideration.

OWNER ALSO ON EXHIBITION.

In many cases bad manners in the ring is not confined to the colt or horse. The exhibitor is often very ill-mannered. The judge is supposed to be both competent and honest. In our opinion it is very seldom that he is dishonest. He may make a mistake. We do not think there are any judges who have not made mistakes. In judging horses, the same remarks apply as to a man in any line of business. If he has never made a mistake he has never done much business. The exhibitor who, in the show ring, refuses a second or third prize ribbon because he thinks he should have had first, shows worse manners than it is possible for his entry to do. Some exhibitors think it necessary, in such cases, to tell the judge (often in language not fit for publication) what he thinks of him. The action of an exhibitor, when he thinks he has not got justice, indicates what kind of a sport he is. It is easy for any man to be a good winner, but it requires a "sport" to be a good loser. A sport will play the game, play to win, but play honestly, and not cry when he is beaten. An exhibitor at all times should remember that he, as well as his entry, is upon exhibition. He should also remember that he can see more good points in his own horse than others can, and also that the judge is in a better position to compare the respective merits of the entries than he is. Even though, as is sometimes the case, he has not been given his just dues, he should take what is given without remark or evident displeasure, and hope for better results next time before another judge. The fewer remarks or voluntary information an exhibitor makes to the judge respecting the cause of some blemish or unsoundness, the cause of his entry not looking so well, the record of his entry in the show ring, and, in fact, in anything regarding his entry, except he be asked a question by the judge, the better. As stated, a judge is supposed to be competent and honest, and even though his performance may have indicated that he fails in either respect, it is unwise for an exhibitor to tell him so in the ring, or by his actions indicate that he considers him either incompetent or dishonest. If an exhibitor thinks that he is not getting justice, he is justified in refusing to exhibit before the judge again, but the use of foul or obscene language or any well-marked symptoms of anger is unpardonable.

—CANADIAN COUNTRYMAN.

Had Weak Back and Kidneys.

COULD HARDLY MOVE IN BED.

When the back becomes weak and starts to ache and pain it is a sure sign that the kidneys are not performing their functions properly.

On the first sign of backache Doan's Kidney Pills should be taken and serious kidney troubles prevented.

Mr. Francis McInnes, Woodbine, N.S., writes: "I deem it my duty to let you know the wonderful results I have received from the use of Doan's Kidney Pills. For a long time I had been suffering from weak back and kidneys. I used to suffer the most at night, and sometimes could hardly move in bed with the pain. I could do no hard labor on account of my back. A friend advised me to give Doan's Kidney Pills a trial, and I am glad I did for the pain in my kidneys is gone; my back is strong, and I can perform any hard labor and get my good night's sleep. I only used three boxes of the pills."

Doan's Kidney Pills are 50 cents per box, or 3 boxes for $1.25; at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont. When ordering direct specify "Doan's."

Bradstreet's Trade Review.

Toronto—Some manufacturers and wholesalers stated orders were behind those of last year, but the majority declared there was an increase of approximately ten per cent. over 1915. This showing was regarded as rather disappointing, as an increase of at least 25 per cent. was looked for. Both wholesalers and retailers feel confident about the fall and winter trade. Satisfactory conditions exist in most lines, presaging an active trade during the autumn. Drygoods wholesalers state greater attention is being given to American markets for both woollens and cottons. Practically all lines of woollens are scarce, jobbers state, with scarcity of raw materials and shortage of labor as the joint causes. Collections are very fair, but wholesalers are looking forward to the middle of next month as the crucial time for determining whether payments are good or otherwise. Grocery lines are active, wholesalers and brokers report. Retailers say that seasonable articles are selling well. Few repeat orders have been placed yet for autumn goods, but general trade conditions are very fair, and are substantially ahead of 1915. Clothing and cap manufacturers and dealers report that a fair volume of trade is passing. The leather industry is fairly active. Shoe wholesalers are filling some repeat orders for autumn trade. Some grades of leather are hard to get, and labor shortage is having its effect on postponing deliveries. The harness trade is recovering to some extent from its recent quiet. A good volume of trade is passing in every line, and collections are found to be good.

Montreal—Drygoods, hardware and groceries, as well as other staple lines show pronounced activity, which is far in excess of the same period of 1915. Retailers are doing a good business in seasonable articles. All available labor is actively employed. Confidence is expressed that an exceptionally active fall and winter trade will be experienced.

Ottawa—Crop yields are better than was anticipated. Mercantile business is active in all staple lines, and wholesalers report that the volume of trade passing in rural districts is very satisfactory.

London—Wholesalers are experiencing an active fall trade. Placing orders have been received in considerable volume. All industrial concerns are busy, and scarcity of labor is being experienced. Country trade in the district around London is reported as exceptionally good. Grocery lines are active as well as dry goods, millinery, shoes and hardware. Money is fairly plentiful, and collections are good.

Hamilton—All lines of mercantile business are enjoying a fair state of activity. Dry goods wholesalers are unable to fill orders promptly in some lines because of postponements of shipments by manufacturers. Woollens are higher and hard to get. Grocery lines are active in Hamilton and district. Country trade is especially good, and confidence exists that this state of affairs will prevail throughout the rest of the fall and winter. Hardware is quite active, especially in the country. All industrial concerns are busy, especially steel manufacturing plants and labor is badly needed by some firms. Good crops in the Hamilton district augur the continuance of an active trade.

Winnipeg—Interest still centres in the grain market, and a better crop is being harvested than was anticipated a month ago. The wheat market is strong in tone. Mercantile business continues to be brisk. With good harvesting weather during the next two weeks, an active winter trade in groceries, clothing, dry goods, harness and hardware lines is assured. Money is quite plentiful and collections are reported to be good. A dearth of labor is experienced in practically every line of industry.

Vancouver—Business conditions in the far west are good. General prosperity is evident throughout British Columbia, and liberal orders are reaching wholesalers. Confidence is general among business men, and a god fall trade seems assured.

KEEP THE BOWELS REGULAR

AND AVOID

CONSTIPATION.

When the bowels are not kept regular they become clogged up with waste and poisonous matter, causing constipation, biliousness, sick headaches, piles, and all kinds of liver troubles.

Milburn's Laxa-Liver Pills will regulate the bowels so that you may have a free and easy motion every day. One pill every night for thirty days will cure the worst cases of constipation.

Mr. John J. Smith, Elginburg, Ont., writes: "I had been troubled for a great while with constipation, and tried many different remedies which did me no good. I happened to try Milburn's Laxa-Liver Pills, and I have found them most beneficial."

Milburn's Laxa-Liver Pills are 25 cents per vial, or five vials for $1.00; for sale at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

WALKERTON, OCTOBER 5th '16

BUYING IN THE HOME TOWN

Geo. H. Hudson, formerly of the Telescope, has something to say in this n-wsy paper, The Cayuga Advocate, which might be read with profit by some of the people around Walkerton:—

Coming out on the train from Toronto Exhibition the other day we got talking with a farmer living between Jarvis and Simcoe. He lived only two or three miles from the smaller place. Conversation turned to the centre of trade, and before we knew his nearness to the smaller place, we made the remark that he probably did his trading in Simcoe. He replied, "No, we do most of our trading through the mail order houses. Some times we go to Simcoe for suits for the boys and such like things that one needs to see, but we get most of our goods by mail."

We don't know, but we'll guarantee that man kicked about the roads leading into those two places—his money had gone to help pay taxes in Toronto, to give that city paved streets, to improve Toronto stores.

He hadn't realized that as a farmer he had any responsibility in keeping up the home town. The money spent in the home town helps not only to improve it and make it a better place to trade, but it makes the agricultural land around that town more valuable. By dealing with the mail order house he is selling the fertilizer that would put value into his own farm.

Few farmers realize the value of the small town as an aid to themselves—as a value getter for themselves. They use the merchant as an accommodation and send the cash away.

It isn't a fair deal to themselves.

PRICE OF NEWSPAPERS

The newspaper business is one that the war has not boosted. It has had the reverse effect. Some newspapers have been compelled to reduce their size, others have raised the price and others have gone under altogether. For some time back the London newspapers have been selling at two cents a copy, and now Brantford follows their example. In making the increase in the price of The Expositor, the Editor says;

"It is not a pleasant thing for the newspaper publishers of Brantford in common with many other newspaper publishers both in the United States and Canada, to feel obliged to add to the "cost of living" seeing that life without a newspaper would not be worth living, more particularly in war times, but self preservation has no alternative. The one comforting feature of the proposed increase is that it does not tax the reader of a daily newspaper more heavily than an additional one dollar per year, or ten cents per month. Considering that for a quarter of a century or more the rates of subscriptions or of street sales have been left unchanged, while the cost of everything which enters into the composition of a newspaper—labor, news print, metal etc., has in most instances doubled in price—it will be seen that some most unusual restraining infuence must have been at work to prevent newspapers keeping step with almost every other commodity, and going up in price. The explanation is to be found in the keen competiton among newspaper publishers to secure subscribers, and in the development of newspaper advertising. But for these two things the practice of selling newspapers, in most instances for less than the cost of white paper on which they are printed, could not have survived so long. Even with the increased rates newspapers will remain about the cheapest thing that can be bought when the cost of production is taken into account.

WHAT THE MEN WANT

Apropos of the scheme to have our soldiers vote in the trenches this letter from a British officer, on the firing line in France, himself a keen politician, may be illuminating:

"It seems so ludicrous to me—out here in this nightmare country—to read in the papers of all this agitation and fuss about the new register and a general election, and 'One Gun, One Vote,' and so on. If the people at home really think that our men are worrying about being temporarily disfranchised they have got the whole show in the wrong perspective.

"My men are worrying about rats and mosquitoes and pip-squeaks and woolly bears and things like that (and certainly in that order of worry,) and if you took a referendum out here you would get about two replies out of a hundred—and they would probably be spoilt votes, because the lads express themselves crudely at times.

"The things they want are home and wives and children and sweethearts and clean clothes and a bath and some English beer—quite simple things like that. Not votes at all. They are quite content to leave all that to the people who are carrying on at home. When you are serving a gun day and night in a place like this it seems Edmund-Lear-like to think of a Tommy worrying himself about voting. He's too busy sending—and dodging—Death."

OPEN BAR GONE FOREVER

The Simcoe Reformer, of which Hal Donly, is editor, has been one of the most outspoken opponents of prohibition, local option and in fact anything in the way of temperance reform. Last week the Reformer said editorially:—On Saturday night the bar as a dispensary of 'hard stuff' goes out of business—unwept, unhonored, unsung. Circumstances, partly of its own making, partly of the work of its enemies, have built up a mass of antagonistic feeling towards it, even among men who are far from being teetotallers, and who make occasional use of it. But to make the sale of liquor illegal in Ontario is a tremendous way from a complete solution of the liquor problem. Are the men responsible for the Hearst law going to stand behind it, and see it enforced? We hope so; for there will be powerful forces working the other way. Personally, The Reformer will give its influence whatever that is worth, to the enforcement of the law. We are genuinely inquisitive as to how much of its brilliant promises prohibition can fulfil. If it can banish sickness, poverty, and crime, as it advocates, no one will ever vote for its repeal. On the other hand, if the law is bad, its enforcement will the sooner compel its abandonment for something better. By all means give the Hearst prohibition measure a fair chance to prove itself. Meanwhile it may be opportune to forecast that the open bar, as it has existed in the past, is assuredly gone forever.

RAISING THE PRICE

(Hanover Post)

On November 1st next the subscription price of The Hanover Post will be increased to $1.50 per year. We make this announcement with reluctance. Although the weekly papers in many of the neighboring towns increased the rate from 1.00 to 1.50 some months ago, The Post was loathe to part with the old rate, and we have been putting off from week to week the decision to increase the rate. Recent advances, however, in the cost of materials entering into the production of newspapers have made conditions such that it is impossible to put the matter off any longer.

EDITORIAL COMMENT

The owner of the Stratford skating rink refused to lease it for armoury purposes as there is more money in hockey. "Business as usual."

+ + +

The Toronto Daily Star and News have increased their subscription rates 50 cents per year to take effect December 1st. It will cost the Star $75,000 more for newspaper this year owing to the increased price at the mills.

+ + +

Port Rowan News:—A generation ago girls were knocking at the doors of public schools for employment as teachers, but the doors opened very reluctantly. Now there is not a male teacher in Port Rowan or South Walsingham.

If in doubt as to whether you have a mushroom or a toadstool, eat the thing. If it's not, friends will send flowers and the preacher is certain to say that you were a half decent sort of chap during your sojourn on this earth.—Guelph Mercury.

+ + +

Indians assert that the coming winter will be one of the mildest in recent years. They base their assertions on the following signs: The oak trees have no acorns; squirrels are seldom seen; muskrats have not started to build; fur-bearing animals have thin coats; bark on poplar trees is loose.

+ + +

Premier Bowser of British Columbia is said to have expressed a wish for a stronger Opposition in the next Legislature. When the weeding out is done it is probable the Conservative Opposition in the coming Legislature will be stronger than the Liberal was in the last, but that was not exactly the way Mr. Bowser wished it.

+ + +

A Toronto mother instructed her husband to proceed down the cellar, and bring up a pail of coal for the stove. It was the commencement of the season for stove fires. After half an hour's absence she went to the cellar door, and asked: "How long are you going to be with the coal?" "It's all right" came the reply in a muffled voice "I'm half-way to the coal bin now; I'll soon move the rest of the bottles."

+ + +

Those who think it a snap to be an editor can take it from us they are wrong. In support of our contention we quote a contributor to the Guelph Herald, who writes but two or three columns each week. He says: In the first place it isn't the easiest thing in the world to collect subject matter to write about and its nearly as difficult to collect your thoughts sufficiently long enough to express what you intend to say."

+ + +

Said Mr. N. W. Rowell the other day: "When I asked our men at the front what we could do for them in Canada their thought was not for themselves, but for the cause. They said: 'Send us more men, men completely trained and properly equipped. We are prepared to give our lives, but that alone is not sufficient. We must have reinforcements to keep our ranks full.' What is the answer our young men are prepared to make to that request? Are the boys at the front to fight, to suffer, to bleed, to die, without help from those at home?

OUR WESTERN LETTER

Written for the Telescope
By an Old Bruce Boy.

Since our last letter we have had another week of rain and now we are enjoying what looks like Indian Summer and is very acceptable as it is the first touch of summer we have had this Season. It is to be hoped Squaw Winter will not follow too soon. The land is simply saturated with water. Great difficulty is being experienced in cutting the grain especially on fields the least flat. I cut a field last week for a neighbour and when the job was done it looked as if the field had been cut up into lots to be put to sale at auction with handy lanes through it to enable inspection. One man here has put his binder on skids, runs the mechanism with a small gasoline engine and hauls the whole outfit round his fields with eight horses. Last week a severe hail storm passed north and east of here, destroying a lot of crops that had so far escaped frost or hail. As far as we can ascertain this and two neighbouring farms are the only ones within a radius of miles on which the grain is entirely untouched by either frost or hail. We see in eastern papers some Calgary expert reports the Alberta crop will be over the average. Probably he hasn't been outside Calgary this summer except to visit some summer resort. Still more probable he wouldn't know the difference between Rye or Wheat. The crop would have been good but such large tracts have been hailed or frozen that the crop must be short.

This season has been much like the spring and summer of 1907 that started cold and backward, and stayed so all summer and ended with the grain in almost all the N. W. being frozen. This has been an ideal year for the land sucker to visit Alberta, he would surely see it at its worst. Even a pessimist can't growl at one bad year in nine. The prairie wolf or coyotte is becoming altogether too frequent and are getting very bold, not satisfied with rabbits and poultry, they are giving some attention to hogs and even an occasional meal of veal is reported. A bounty should be offered for their destruction. They seem to have got the rabbits pretty well skinned out of this section of country. Where hundreds were to be seen last year there are not dozens now. When the rabbit was plentiful many farmers turned up their nose at them as inferior food. Now they are scarce they will be looked on as a luxury. The grouse or prairie chicken seem to have entirely left this part of the country. Until two years ago they were very numerous, very few were in evidence last year and I haven't seen one this year. The partridge have also become very scarce, the sight of one is something of even more importance than the crops as a subject of conversation on Sunday before service.

CARRICK COUNCIL

Town Hall, Sept. 11, 1916.

Carrick Council met this date pursuant to adjournment. All the members present. The Reeve in the chair. The minutes of last meeting were read and adopted.

(Finance Report)

The following accounts were referred to the Finance Committee and disposed of as follows:

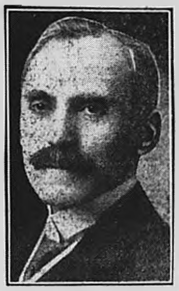
C. Waechter, repairing sidewalk at Formosa	5 05
C. Weiler & Son, 72 ft rock elm	1 44
Mun. World, collectors roll	4 50
H. Stroeder, gravel account, 3 12 inch tile	7 11
Fred Harper, 113 yards gravel	7 91
R. Moran, gravel account	3 00
E. Stroeder, rep. bridge, con. 6, 30 yds gravel	3 60
H. Wolfe, 30 yds gravel	2 10
A. Schnurr, rep. culvert, con. B	3 00
J. Darling, 24 yds gravel	1 65
Formosa Light Co., street lights to July 31st	28 78
J. Polfuss, 165 yds gravel	11 55
Dentinger & Beingessner, cement account	40 38
J. Kreuger, 197 yds gravel	18 70
F. Klages, rep. washout con. 10	1 50
Philip Oehm, 1173 feet cedar bridge covering	17 60
J. S. Wagner, hauling covering to Hohnstein's bridge	4 00
H. Kauffman, ½ share grading Normanby townline; ½ share 23 yds gravel Normanby T. L.	19 38
A. M. Schnurr, gravel account	6 75
G. Siegner, 174 yds gravel	8 68
S. Kaechele, hauling stones off Elora Road	2 00
T. Godfrey, putting new tongue on grader	2 75
A. J. Darling, rep. bridge, con. 8	3 50
M. Filsinger, 1 mtg. 2 dys R & B	7 50
L. Doering, 1 mtg 1½ days R & B	6 25
J. Montag, 1 mtg, 1 day R & B	5 00
A. Lewis, 1 mtg, 1½ dys R & B	6 25
C. Wagner, 1 mtg	2 50
(Statute Labour)	
D. W. Clubine, 104 hrs work	33 95
N. Kreitz, 90 hrs work	2 25
G. Schnurr, 127 hrs work	19 05
P. Kreitz, 30 hrs work	4 50
John Weller, 10 hrs with team	5 70
J. Weber, 32 hrs with team	9 00
H. Schmidt, 22½ hrs team, etc.	5 12
J. Lobsinger teaming	1 00

Doering—Wagner:—That Messers. Filsinger and Lewis be authorized to deal with the matter of gravelling the sideroad between Lots 20 and 21, Con B—Carried.

Lewis—Montag:—That this Council do now adjourn to meet again on Monday, the 6th, day of November next for the transaction of general business.—Carried.

LIBERALS AT LONDON, OCT. 11

Sir Wilfrid Laurier



Mr. N. W. Rowell, K.C., M.P.P.

THE first appearance of Sir Wilfrid Laurier in Ontario in nearly two years will mark the annual meeting of the Liberal Club Federation which will be held at London, Ont., on October 11th.

Mr. N. W. Rowell, K.C., M.P.P., will also be present, and the gathering of Liberals from all parts of Ontario will probably be the most representative in the history of Ontario.

Hon. T. C. Norris, Premier of Manitoba, is among the long list of the best speakers of the Dominion who will discuss the vital questions of the day.

There will be two sessions, one in the afternoon and the other, a monster banquet, in the evening. Both meetings are open to the Liberals of Ontario, and the banquet tickets may be had from Mr. C. C. Ferguson, London Liberal Club, London, Ontario, price one dollar, which must be remitted with the request.

Delegations will be present from all parts of the Province, and the requests for reservations are so numerous that those desiring tickets must apply at once.

Ribbing Up The Liberal Party

H. F. GADSBY, brilliant Canadian journalist, continues in the October number of MACLEAN'S MAGAZINE his notable series of Canadian political studies. In the September issue he dealt with "The Duff of Boom." In this October issue he tells in a non partisan way of forces at work at the present time in the Liberal Party of Canada. In the November issue he will have an article on the Conservative Party in Canada. This series is unique and of lively interest, partly due to Gadsby's racy style, and partly to the fact that he possesses "inside" information of a piquant sort.

Is Permanent Peace Possible?
Stephen Leacock What do you think? Let Stephen Leacock give you fresh thought and material in his stimulating and well-informed article in the October MACLEAN'S.

American Elections And The War
Agnes C. Laut Startles you in this article of hers in the October MACLEAN'S. How will the German American vote go—to Hughes or Wilson? Miss Laut says Wilson will get it! Her vigorous mind, her "inside" information, and the robustness of her style make this contribution of hers refreshing reading.

The Man from Athabasca
Robert W. Service has another of his gripping at-the-front ballads in the October MACLEAN'S—The story of a Grizzled Western Trapper who went overseas.

Janey Canuck (Mrs. Arthur Murphy)—the first Woman Magistrate in Canada. A study of this forceful woman, and of the significant Woman Movement in Western Canada.

London Stage Favorites and Canadian Soldiers
Tells of the entertainment of our Canadian soldiers in camps, hospitals and convalescent homes, by eminent British players. The article abounds in portraits.

Stories by Arthur Stringer, Arthur E. McFarlane, Hopkins Moorehouse, and Mary E. Lowery—all Canadian born.

Review of Reviews Department
The best things in the best magazines condensed for busy readers: always a fine and comprehensive presentation of the thought-making and informative articles appearing in current periodicals.

ALWAYS read MACLEAN'S MAGAZINE—entertaining, informing, stimulating, Canadian. A national magazine in spirit and purpose. A clean magazine fit for all ages and all homes. You will find the magazine of your heart and mind in

TWO LONG YEARS HE SUFFERED

"Fruit-a-tives" Made Him Feel As If Walking On Air

ORILLIA, ONT., Nov. 28th. 1914.

"For over two years, I was troubled with *Constipation, Drowsiness, Lack of Appetite and Headaches*. One day I saw your sign which read "Fruit-a-tives make you feel like walking on air." This appealed to me, so I decided to try a box. In a very short time, I began to feel better, and *now I feel fine*. I have a good appetite, relish everything I eat, and the Headaches are gone entirely. I recommend this *pleasant fruit medicine* to all my friends".

DAN McLEAN.

50c. a box, 6 for $2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

Get the Best. It Pays.

POETS' CORNER

FARMERS

Sing a song of farmers,
  Up at early morn,
With four and twenty chores to do
  Before the breakfast horn.
When the breakfast's over,
  There's little to be done,
Except to plow the fodder
  And let the harrow run,
And mow the sheep and prune the
    beets
  And curry up the swine.
And shear the hens and big the hay
  and shoe the gentle hine,
And saw the wheat and rake the rye,
  And wash and dress the land,
And things like that which city folks
  Can never understand.

—Life.

News About Town

Jones (advertising his car for sale)—Jane, I wish I'd written this ad. before I became converted!

Mrs. (Dr.) Stalker of Walkerton was the guest of her son, Dr. G. D. Stalker, this week.—Hanover Post.

Kincardine High School will teach elementary agriculture, the expense to be defrayed by the Dominion Government.

The Chesley Enterprise believes that Premier Hearst, who is a personal friend of C. E. Stark of Tara, will give him the job of County Court Clerk of Bruce.

It is currently reported that Moore A. Miller, son of the late H. H. Miller of Hanover will receive the liberal nomination in place of his late father.

$30.3) was collected by the children on Fair day by selling Tags and having a booth. This money will go to the School Children's Patriotic War Fund.

Mr. K. Cameron of Lucknow has an apple orchard of less than ten acres bearing a crop this year that is estimated to be worth close on $3,000 on the trees.

The Methodist Sunday School had a rousing Rally Day service on Sunday. About two hundred people were present and a collection of $12.11 was taken for the General Sunday School Fund.

Paisley provided its village constable with a stop-watch recently. The local sleuth has been using it with such good effect in getting after speeding autoists that the watch has already paid for itself.

The Teeswater News states that William James Smyth of the 12th con. Culross, recently sold $3513.00 worth of cattle, horses and hogs off his 250 acre farm and during the past year has netted $1,800 from hogs alone.

Lieut. Arthur Robertson, who has been visiting his parents, Mr. and Mrs. David Robertson here, was ordered last week to report at Petawawa Camp. This was good news for Arthur, who had been unattached since his Battery went overseas while he was in the hospital for an operation.

A convention to select a candidate as standard bearer for the Liberals of North Bruce to take the place of the late Jno. Tolmie ex—M. P. will be held this fall. There is no scarcity of material for the position and one of the six whose names are mentioned below will be selected; Jas. Malcom, the big furniture man of Kincardine, the son of the late Andrew Malcom ex—M. P. P., ex—Warden McWhinney of Bruce, ex—Warden McCannel of Saugeen, J. E. Campbell of Hepworth, Gideon Kaster and Jack McAuley of Wiarton.

An Exciting Experience

Pte. Chester Cunningham writes to his parents, Mr. and Mrs. Thomas Cunningham, that he has just returned from a second spell in the trenches. He had a very close call from shell fire and a closer call when the shack which he and several companions were occupying, burned down in the middle of the night. The first notice they took of the fire was when the roof fell on them as they slept. Some of the boys lost most of their clothes but all escaped injury.

McIntyre—Scott

A very quiet but pretty wedding was solemnized on Tuesday Sept. 19th. at 4 o'clock in the afternoon, at "Poplar Grove Farm," Durban, Man. the home of Mr. and Mrs. R. S. Goldsmith, when Miss Mary, only daughter of Robert Scott Esq. of Teeswater Ont. was united in marriage to William Baird McIntyre, formerly of the 9th. Con. Brant Tp. The ceremony was performed in the presence of the immediate relatives by Rev. J. Bowman of Durban. The bride looked charming in a dainty dress of shadow lace over white silk and was given away by Mr. Goldsmith. Miss May Goldsmith, who was bridesmaid looked sweet in a dress of embroidered voile with touches of Copenhagen blue. Mr. John Johnston ably supported the groom. After the ceremony a dainty wedding supper was served. In the evening a reception was given by Mr. and Mrs. Goldsmith and a large number of the young people gathered and a most enjoyable evening was spent. The wedding gifts were beautiful and testified to some extent the esteem in which the couple were held. After some speeches and singing of "For he's a jolly good fellow." Mr. and Mrs. McIntyre left in a motor car for their home in Benito, Man, amidst showers of rice. The groom holds the position of "buyer" for the British American Elevator Co., Benito.

THE RURAL SCHOOL FAIR

Is Proving A Big Educational Factor In Instructing The Children Along Agricultural Lines—Successful Show Here Last Week.

An affair that yearly increases in interest, The Rural School Fair, was held on the local Fall Show grounds on Sept. 26th inst. In spite of the backward season this year, the South Bruce and North Carrick School Fair was well up to the average in every respect, a very encouraging showing. The exhibits were in every way creditable, and were prepared for exhibition in a way that would credit to grown-ups. In fact the youngsters can give pointers to their elders in a good many things along agricultural lines nowadays. That is one of the things the school fair has already accomplished in a few short years.

The Rural School Fair movement in Ontario was inaugurated in 1912. Its growth and development has been most rapid ever since. With a modest beginning in 1912 with 25 Rural School Fairs in 12 Counties it has now extended in 1916 all over the province, totalling 298 Fairs, including 2560 schools. There is an ever growing interest in the work and before long it will be extended to every school in the Province.

At the School Fair is to be found exhibits of grain, roots, vegetables, which must be produced from seed supplies and grown under the directions of the District Representative; also poultry supplied by the Department of Agriculture; insects and weed collections; exhibits in manual training, fancy work, cooking and sewing exhibit and essays. The children are also encouraged to exhibit calves and colts.

An interesting feature and one of great value to those taking part is the public speaking contest where many a child will receive his first initiating of facing an audience and hearing the sound of his own voice for the first time. Who knows but this is only the beginning where the orators of the day to come will receive their training. Some of the young folks excelled themselves here last week. Unfortunately we are not yet able to announce the winners.

Hitherto the great bulk of the work in education and agricultural work has been done with the adult farmer. The Rural School fair is the children's movement. It reaches out to interest the child in things agricultural. It is under the direction of the District Representative but has the generous support of the parents, rate payers, trustees and all other officials engaged in educational work together with the generous support of the citizens of the County. On all sides it is recognized as one of our worthiest institutions.

The Scholars of S. S. No 1 Brant, Johnston's Corners, had the proud distinction of winning both the shield for the greatest number of prize winners in garden plots, donated by Mr. Wm. A. Rowand, and also the first prize for making the best showing in the parade.

The prize list follows:—

The Hunting Season

The following seasons for game are set forth in the statutes passed last session by the Ontario Legislature, on the recommendation of the fish and Game Commission: Woodcock, open season from Oct. 15th to Nov. 15th; partridge, closed season until Oct. 15th, 1918; duck, snipe and plover, open season Sept. 15th to Dec. 31st; hares may be taken by any means between Oct. 15th and Nov. 15th, and between Dec. 23rd and Jan. 22nd, and may be taken by other means than shooting at any time; cotton tails may be taken, killed or destroyed in any manner by the owner, occupant, or lessee of any lands upon which they cause damage; black and gray squirrels, closed season for three years.

+ + +

The Farmer's Defence

Recently a merchant of Natchez happened to see a farmer receive at box at the depot and noticed that it was from the mail order house. He also noticed that the goods were right in his line and the same as he had carried for years. He immediately approached the farmer and said:

"I could have sold you the goods you have here for less money than the Toronto house and saved you the freight."

"Then why don't you do so?" said the farmer. "I have taken the local paper for a year, and have not seen a line about you selling these or any other goods. This mail order house sends advertising matter to me for my trade and they get it. If you have any bargains why don't you put them in the paper, so we can see what they are.

Fiddis, Schnurr; squash; any other kind, Nancy Tennant; celery, Schnurr; cucumbers, Mrs. J. Pierson, W. E. Taylor.

SPECIAL.—Best collection of field and garden roots, And Schmidt.

WOLLEN GOODS AND OTHER ARTICLES

Blankets, I. H. Pinkerton; full cloth, I. H. Pinkerton; stocking yarn, I. H. Pinkerton, Mrs. Pierson; double harness, E. Rennie; single harness, J. W. Reaburn; pr. fine boots, Reaburn; pr. coarse boots, J. W. Reaburn; brick and tile—H. Brownscombe.

SPECIAL School Prizes.

Penmanship by public school pupil Jessie Houston, Hazel Cruickshank, Stanley Purdy; map of Canada, Ethel Donnelly, Gladys Gale, Willie Campbell; composition on Ontario, Cleo Kenney; best map of Co. of Bruce by pupil in 2nd or 3rd book, Hilda Kenny Grace Elliot, Nellie Letagus; penmanship by pupil in 2nd or 3rd book, Hilda Kenny, Chris Houston, Nellie Letagus; collection of weeds, wild plants and flowers, Pinkerton school.

Lively interest was taken in the children's races. The prize-winners were as follows:—Boys under 14—Martin Taylor, H. Desmond, John Clancy; boys under 10—Art Donnelly, Roy Taylor, Wm. Warren; boys under 8—Jos. Kenny, F. Hanson, Chas. Andrews; girls under 10—Grace Elliott, Hilda Kenny, Alberta Pinkerton; girls under 8 yrs—Marie Donnelly, G. Richardson, H. Trumbley; girls, any age—Cleo Kenney, Ethel Donnelly, Martha Fordyce.

THE BOX FROM HOME

This original little poem was written by a chum of Norman Freeman, nephew of Mrs. Geo. Carbert of our town. It was on the occasion of a welcome box from home coming to Norman that his chum sat down and scratched off the following lines:—

The box came to the M. L. kid,
  He cut the cord and raised the lid,
He sniffed and turned the packing
    back.
  Yes! he was right—for through the
    crack
He saw a piece of home-made cake—
  A piece of real Canadian make.
The farther down to his delight
  A pair of sox appeared in sight.
"From Broadway Methodist," said he
  "Its nice to think they thought of
    me."
And coffee too, and cocoa rich,
  He really couldn't just pick which
Of all the various things they sent
  Had made his heart the most con-
    tent.
He liked each one and all the more
  For they were from his native shore.
And showed, though he was far away,
  His old time friends were friends to-
    day.

S. W. VOGAN

AN EVIL HERITAGE

CHATER XX.

For the first few minutes after she had effected her escape, Marian had no time to look about her, partly because it took all her breath, and almost all her strength, to struggle up the steep hill-side.

What Miss McCrie had said about the necessity of a cutlass soon proved itself to be a bitter truth. Marian required her eyes not to see what was around her, but simply to look where she was stepping, lest she should put her foot into some black hole, or run her forehead against a low-hanging branch, or catch her riding-skirt upon a prickly green arm, or be entangled bodily in a network of green threads.

After climbing some minutes she reached a comparatively flat and comparatively open spot, and, thinking herself safe from pursuit, stood still at last with heated cheeks and hair all ruffled, battling for breath. Her first impression was more of fear than of admiration. Everything around her look so big so hugely and unfamiliarly large, that, with something of the awe of a child that has ventured into a strange room by itself, she almost regretted having come here alone.

Surely she must have shrunk to half her size, she told herself while gazing up the glossy stem of the pillar beside her. At her feet there lay the single leaf of some, to her, unknown plant, which would have been large enough to wrap her up from top to toe, and close beside her there dangled a green pod that would have served splendidly as a cap. Of nothing so much did the magnificent tangle around her remind Marian as of a hot-house escaped and run wild—a giant's hot-house, of course. So dense was the crowd and eager the life among these rioting rebels, that the space they had at their disposal was obviously far too little for their wants. So savagely did they struggle for room that each tree seemed to be holding its neighbor by the throat, and to be held by it. Not a morsel of sky was visible from here, for whatever loopholes there might otherwise have been were closed with curtains of creepers.

Down there by the edge of the wood there had still been breeze enough to flutter the corners of the napkins and to make the little curls dance oil over Jess' black head; but here it was absolutely still, although not quite silent. Now that she had no longer her own labored breath in her ears Marian became aware of sounds that were quite distinct from the hum of the insects— mysterious sounds of groaning and hammering and striking, which, heard in the depth of this green gloom, scarcely sounded quite earthly.

Again she wished that she had not come here alone. It took her some minutes to realize that nothing more ghostly than the trees were responsible for these noises. Standing so closely packed and with their heads at the mercy of the never-ceasing wind, they had no choice but to grind out this melancholy music upon each other's stems and boughs and twigs.

It was a comfort to have the point settled, and yet Marian did not know whether she was to be glad or sorry, provoked or relieved, when by certain other—and this time distinctly human—sounds she became aware that her escape had, after all, not been quite so perfect as she had supposed, and that she was being followed. A great deal depended, of course, upon who was following her: Mr. Weedon would be a distinct bore, and so would Doctor O'Lynn, because of his eternal jokes. Mr. Rudd would not be so very objectionable. Ah! no; it was none of these, as she now perceived; it was Mr. Hibbert. Well, he would, on the whole, do better than any, because he talked so little and would not expect her to talk. Accordingly Marian stepped forward, pushing aside the curtain of creepers which half concealed her.

"It is me you are looking for, is it not?" she called out, for Mr. Hibbert had made a halt and was peering about him with anxious eyes.

"It is you; and you can thank your stars, Miss Berrincott, that I noticed your absence early enough to get on to your track. A night spent in the forest is not a thing to be recommended."

"I don't think I should have lost my way; and, even if I had, what could have happened to me? There are no wild beasts here."

"All sorts of things could have happened to you; even if you had not been knocked over by a falling palm —and these trees have got so little room for their roots that there are a good many falls—you would most undoubtedly have got the fever."

"Well, to tell the truth, I am glad you have come. But must we go back immediately?" she added, looking about her for the fiftieth time.

This might easily have been the trick of a finished coquette. Mr. Hibbert, who was standing beside Marian, brushing morsels of leaves and twigs from his elbows and knees, gave her a look of astonished inquiry, in which something of gladness shone. But the candor of the gaze which met his was not to be mistaken.

"There is no hurry about going back unless you wish it," he said quietly. "No one was even thinking of packing the baskets when I came away."

"Then please let us stay a little longer; I have not quite done staring about me."

"Very well, but I think we had better stay where we are; to go further would scarcely be prudent. Here is a log that makes a decent seat."

They sat down upon the fallen trunk and for several minutes all was perfect silence, except for the creaking and hammering of the tree branches far overhead. Marian was enjoying herself immensely when her day-dream was broken in upon by Mr. Hibbert's voice.

"Miss Berrincott!"

"Yes?" she said, with something of a start.

"Do you remember my telling you this morning that there were very various reasons which might make you object to my being of the party?"

"Yes, you said something of the sort."

"I said that if we had a quiet moment I would tell you what one of those reasons was. Well, it strikes me that this is a quiet moment."

"He is going to confide in me," said Marian to herself. "I wish, oh, how I wish he wouldn't! I wonder why people always confide in me when I never do in them!"

"Well, to come to the point at once, the objection which I thought you might have, was that of being conspicuous"

"Why should your being of the party make me conspicuous?"

"Because I am myself conspicuous, wretchedly and hopelessly conspicuous; and because naturally anyone in whose company I am shares to some extent in that gift of catching the eye, with which I am so largely blest."

Marian sat still in embarrassed silence, racking her brain for some remark that would be both civil and truthful. At last she thought she had found what she wanted.

"It certainly must be a great nuisance to be always stared at."

To her astonishment, this harmless remark roused the usually so quiet Mr. Hibbert in a quite unexpected manner.

"A nuisance? Good gracious, child, you don't know what you are talking about! It isn't a nuisance, it's a misfortune as great a misfortune as being hunchbacked or blind, or——"

"But, Mr. Hibbert."

"Yes, yes, I know what you would say. I have got all my limbs straight and strong, and should thank God for it. You think within yourself: 'This man has got all his five senses perfect, of what does he complain?' But does it ever occur to you to think what it means not to be able to move without having all the eyes around upon you, nor to cross a street without people stopping to stare as at a show nor to enter a picture gallery or a concert-room without guessing at half-suppressed smiles around you, and seeing the women nudging their husbands or their sisters, and asking who that funny-looking creature is? And all this, mind, for a man who is of 'a shy and retiring disposition,' as the three-volume novels have it. It is no use; no one can understand what I mean who has not himself been haunted all his life by the spectre of conspicuousness."

"But, Mr. Hibbert," ventured Marian, a good deal startled, "surely you are making things out worse than they are."

"I don't think I am; not worse than they are to me. Of course, I know that I am not the only lanky and lantern-jawed fellow in the world, but as a general rule Providence improves matters by putting a more sturdy spirit into those unfortunate shapes. In my case there has been some blunder; the sensitiveness of a mimosa within the form of a broomstick can surely not be the right combination. I tell you that the hunchback and the blind have got a far better time of it. Their sufferings are patent to everybody; wherever they go, they meet with sympathy and pity, whereas nobody thinks of spending upon the man who is a walking caricature more than a smile of amusement, unless it is found worth while to make a joke. Nobody is sorry for the wretch."

"I am sorry for you," said Marian on some impulse.

He looked at her eagerly, but the same instant his expression changed.

"I don't want your pity," he said, shortly, then, without another word, stood up and walked some paces off to where the withered branch of a palm dangled downwards, caught among the creepers. This he began to tear into strips, keeping his back turned to Marian, while he diligently worked away.

Marian had been wondering for some minutes what was going to happen next, when somewhere higher up on the mountain slope there was a sharp sound, or rather, a series of sharp sounds, as of several shots going off in rapid succession, followed by a few seconds of silence and then a crash almost close at hand.

"What was that?" she asked, starting to her feet.

"Only another palm down. Don't be alarmed; what you took for musketry was nothing but the snapping of the roots, and the crash was only the poor, doomed creature, landing headlong among its fellows. There it will stick till Doomsday, fast locked in their arms. Well, anyway, it's another pole for the creepers."

Mr. Hibbert was again standing beside Marian.

"Miss Berrincott," he said, with a change of tone, "I want you to forgive me; I did not mean to be rude, but I am rather in a bad way to-day. There is something else that I want to ask you. I know that my way of talking must often strike you as peculiar, and I should not like you to misunderstand me completely. I think that if you knew the history of one episode in my life, various things would become clear to you. I have never been able to make up my mind as to whether I am the hero of a tragedy or a comedy. Perhaps you can help me to decide the point. May I tell you the history of that episode?"

It was almost the same question that Jess had put to her last week. But Marian answered it differently this time; for she was already deeply repenting having been so cruel as to wish that this poor man should not confide in her.

"Of course you may tell it to me, Mr. Hibbert."

"Thanks for your charity. Shall we sit down again? You can go on staring about you as I talk, you know, and I shall put it into the smallest nutshell I can. Let me first premise that my parents both died before I was six years old, and that I was brought up by a not particularly loving aunt, among a nurseryful of little cousins, who happened to be the very ideals of round little dumplings, so that by contrast with their plumpness the peculiarities with the 'bony Johnnie,' as they called me—not the 'bonnie Johnnie,' mind, that would be another article altogether—were set off to the greatest possible advantage. After the trials of the nursery came the trials of the school—worse trials, of course, since the more there was of me, the more laughable did I become—until at last at the age of twenty I was turned loose upon the world, and the social trials began, which were the worst of all.

"I was twenty-four when the episode took place of which I want to tell you. Returning from India after four years' absence, I was indulging in a Highland trip, when one day as I strode along the street of a little seaside town I had the misfortune to attract the attention of some young gentlemen in the gutter. The next minute I had a train of followers at my heels, and amidst shouts of laughter and cries of 'Hoot! the telegraph post's got awa'!—The man from the show's takin' an airin'!' I was pursued down the street. It so happened that several of my cousins—whom I had not seen since my return—were likewise taking a Highland trip, and were likewise in the place that day. When my cousin Phil heard the shouts he stuck his head out of the window of the inn where they were lunching, and said, 'That can be nobody else but the "bony Johnnie."' And sure enough it was the 'bony Johnnie.' I was captured and brought back, and at the inn I found not only Phil and Harry, but also my cousin Daisy, who had grown up since I had gone out to India. Daisy had been almost the roundest of all the little dumplings in the nursery, and she had always been the kindest to me. When the others teased me, she used to pat my cheek with her little dimpled hand, and whisper, 'Never mind, bony Johnnie; when we are both big, I'll marry you.' We were both big now, there could be no mistake about that, and Daisy's heart had remained as tender as it had been in the nursery. All the others found the street-boy episode to have been vastly amusing; she alone was indignant, because she alone seemed to guess what I must feel. In no other eyes but hers did I read true sympathy for my troubles. Whether it was my gratitude for this sympathy which alone worked the mischief, or whether other causes were also at fault, I cannot say. For, besides a tender heart, Daisy had also very blue eyes, and exquisitely flaxen hair. She had, in fact, developed into a remarkably pretty girl, with nothing to recall the little dumpling of the nursery except the roundness of her cheeks and the dimples on her hands. Whatever the cause may have been, it is quite certain that when I went home that night I was not heart-whole.

"And now events followed very rapidly on each other. I lost no opportunity of meeting Daisy, and very soon we were almost back again on the old nursery footing. During the whole of our intercourse Daisy maintained the same attitude she had adopted that first day in the inn. She seemed determined to stand by me, and to make me understand that to her there was nothing ridiculous in my appearance. This gave me courage; and a fortnight after we had met again, I asked her whether she remembered saying she would marry the 'bony Johnnie,' when we were both big? Daisy remembered, and on the very next day our engagement was proclaimed to our friends.

"And now it was that Jim appeared on the scene. Probably you are thinking to yourself that Jim was my rival? Not a bit of it; Jim had a Daisy of his own, and Daisy herself—I am convinced of it—cared at that time for nobody more than she did for me. Jim was a cheery, noisy fellow, who as bad or good luck would have it, possessed a remarkably ready pencil and a singular aptitude for turning out caricatures. He had lived for some years abroad and had been engaged on the staff of the Fliegende Blatter. It was therefore not to be wondered at if instinctively he was for ever on the look-out for 'subjects.' Towards the end of my leave both Daisy and I were staying on a long visit with friends in the country. The house was full, and Jim was one of the guests. It was that ready pencil of his that did the harm, but not in malice—oh, dear, no —rather it was with the frankest of smiles on his lips, and the most good-natured laugh in the world that he made an end of my happiness. Naturally I was too good a subject to be passed over, and Jim himself would bring me the drawings for approval, and I laughed over them, sometimes almost heartily, for they were inimitable productions, and my sense of humor was keen. Besides, I knew enough already to know that to show annoyance would only increase the absurdity of my position tenfold. I don't remember the details very distinctly, but I know that in one drawing I figured as a broomstick and in another as an hour-glass. If I don't mistake, I fancy, too, that I was a particularly brilliant success as a maypole. Daisy, though she didn't even pretend to be amused at the caricatures, still held on stoutly, and seemed determined to brave out her position as the bride of a universal laughing-stock. Before others she was almost ostentatiously affectionate in her manner towards me, but when we were alone it would sometimes strike me that she was more reserved than necessary and at moments absolutely thoughtful. But I would not acknowledge this to myself, just as little as I would admit that I saw her wince when the broomstick or the maypole were being passed from hand to hand amidst the most harmless laughter.

"The crisis did not come till one day when we all paid a visit to a travelling menagerie that had made a halt in the neighborhood. We were a merry party, being mostly composed of young people. All the ladies were in the best of spirits as well as in their best clothes. I particularly remember the hat that Daisy wore. It was one that she had got from London only the day before, of a round and rather deep shade which I believe used to be called a 'mushroom hat,' and trimmed with field flowers. I had heard a good deal about this hat beforehand, for Daisy had been anxiously inspecting it. There could be no doubt that her little round face looked ravishing under the deep straw brim, and Daisy herself seemed to be aware of this, for she too was in the best of spirits during the whole time that we were inspecting the lion and the tiger and the elephant, and lingering around the giraffe, which was the pride of the establishment.

(To Be Continued).

WISDOM FOR EXPERIENCE.

(Brooklyn Citizen)

"Tears," remarked the sentimental youth, "are woman's favorite weapons."

"Oh, I don't know," sighed the man with the missing hair. "My experience leads me to believe that rolling pins and flat irons are just as popular and more effective."

"Girls and women at the beaches wear less and less every year. I do not know to what we are coming," says a critical observer. Well, ma'am, we are coming—rest your soul—to the point at which there will not be less for them to wear.—Louisville Courier-Journal.

SUNDAY SCHOOL LESSON

Oct. 1. 1916. Lesson 1.

A Plot That Failed.—Acts 23: 1-35.

Commentary.—I. Paul before the council (vs. 1-10). The chief captain had brought Paul before the Sanhedrin that that body might examine him regarding the matters in question, inasmuch as he had come to know that the accusations pertained to the rites and ceremonies of religion. Paul looked earnestly upon the council and began his defence by declaring that he had "lived in all good conscience before God" until that day. He had carefully observed the law and had been devoted to his Master. When the high priest ordered that the apostle be humiliated by being smitten on the mouth, he uttered the prophecy that the high priest would be smitten by the Lord. He addressed the high priest as a "whited wall," this term being an expression for hypocrisy. Paul did not know it was the high priest who gave the command to smite him or he would not have spoken in that way, for he would not speak against one who occupied that high position in the Jewish ecclesiastical system. Paul observed that the Sanhedrin was composed in part of Pharisees and in part of Sadducees, and took advantage of the situation to declare his adherence to the doctrines of the Pharisees, he himself being a son of a Pharisee. He was called in question because he had preached the resurrection of Jesus, but he declared before the council his faith in that doctrine. Paul's statement stirred up the antagonism of the Pharisees and Sadducees toward each other, and the former party declared that they found no evil in the prisoner. So great became the strife between the parties that the chief captain ordered Paul to be taken from the council and returned to the castle.

II. Paul's vision (v. 11). From a natural point of view Paul's condition after being brought from the Jewish council to the castle of Antonia was not pleasant nor were his prospects flattering. To be sure nothing had been proved against him, but there was a strong tide of opposition setting in. The outcome of his appearance before the Sanhedrin was in a sense a triumph for the apostle, yet he was virtually a prisoner and there seemed to be no indications of his release. There was abundant occasion for Satan to assault him. "He had entered the temple and undertaken the Nazarite vow with a view of conciliating the Jews, and he had only been saved from being torn to pieces of them through the interference of the Roman commander." He could not see in what way he might go forward in the fulfilment of his mission to the Gentiles, and there would naturally come to him the temptation to be discouraged. Whether there did or did not, the Lord came to him and stood by him that night, speaking words of encouragement to him. Paul has testified for him in Jerusalem and he gave him the assurance that he would testify also in Rome. He had expressed a desire to go to Rome (Rom. 1: 11-13), and now the way was being opened.

III. A plot against Paul (vs. 12-22.) 12, 13. The Jews were in a highly excited state of mind over Paul and were anxious to put him out of the way. More than forty of them, probably the most fanatical in Jerusalem, conspired to accomplish his death. They not only agreed together to kill Paul, but they called a curse to come upon them if they should not do it, and that before they would eat or drink. 14. Came to the chief priests and elders, and said—The plotters and the leaders of the Sanhedrin must have been in full accord or the former would not have dared to disclose their conspiracy to the chief priest and elders. 15. Ye with the council signify —The council was invited to join in the plot. The conspirators asked that body officially to request the chief captain to bring Paul before it, and to do it under false pretenses; for the excuse was made that the members of the council wished to make further inquiries of him. Ready to kill him—The Jews had no longer the right to pronounce and execute the death sentence and they did not expect the Roman government would judge Paul to be worthy of death, hence they purposed to take the matter into their own hands. 16. Paul's sister's son heard—This is the only reference we have to Paul's relatives. It is possible that this sister lived in Jerusalem, but it is more probable that her son had been sent to Jerusalem to be trained in the Jewish schools there. There were so many persons engaged in the conspiracy that it is not surprising that Paul's nephew heard of it. Told Paul—Paul was a prisoner for his own protection and was allowed to receive visitors. This young man was friendly to his uncle and put him on his guard.

17. One of the centurions—A centurion was a Roman officer in charge of a hundred soldiers. Unto the chief captain—That officer was favorable toward Paul, and Paul felt free to have his nephew taken before him to give the information regarding the plot. 18. Hath something to say unto thee—It was a remarkable providence that was working to defeat the enemies of Christ and his servant Paul. The friendly attitude of the chief captain, the presence of Paul's nephew in Jerusalem, his becoming acquainted with the plot and his regard for his uncle conspired to rescue the apostle. 19. Took him by the hand—The captain welcomed the young man as a messenger from Paul and encouraged him to deliver the message. 20. That thou wouldst bring—The chief captain had full jurisdiction over Paul and the Jews must ask him for the privilege of having the apostle brought before them. 21. Do not thou yield unto them—The young man did not dictate to the captain, but gave him the information that would explain the reason for the request. Now are they ready—Paul's nephew had the interview with Lysias none too soon, but soon enough to thwart the plans of the would-be assassins. 22. Tell no man—Paul's safety required that the plans of the captain should not be made known to the oath-bound conspirators.

IV. Paul rescued (vs. 23-35). 23. Called unto him two centurions —There was no time for delay. The plotters had fixed upon the next morning to fulfil their oath, and Lysias would have the object of their hatred well out of reach before that time. These were troublous times in Jerusalem and a large garrison of Roman soldiers was maintained there. The guard provided was large, but the captain wished to be prepared for any emergency. There were two hundred ordinary foot-soldiers, seventy horsemen and two hundred light-armed soldiers. Caesarea—A city on the east coast of the Mediterranean Sea seventy miles from Jerusalem. It was the residence of the Roman governor. Third hour of the night —Nine o'clock in the evening. 24. Provide them beasts—Horses, mules or camels would come under the term translated beasts, which means an animal used for riding. Paul was provided for so that he did not need to walk. Unto Felix—He was the governor, or procurator of Judea and Lysias was responsible to him. 23-35. Lysias, the chief captain, sent a letter to the procurator setting forth the facts of Paul's rescue from the mob and the plot that was made to take his life. The accusations against the prisoner were with regard to the Jewish law, and should be presented to Felix by the accusers. The company reached Antipatris, about forty miles from Jerusalem, and the footmen returned while the horsemen accompanied the apostle to Caesarea.

QUESTIONS.—How did Paul come to be a prisoner in Jerusalem? Give an outline of Paul's defence before the Sanhedrin. How was Paul benefited by being a Roman citizen? Why did the Lord appear to Paul? What did he tell Paul? What plot was made against Paul? Who made this plot? Who gave information concerning it? What did the chief captain do? Where was Caesarea? Why was Paul sent there?

PRACTICAL SURVEY.

Topic—Defeated conspiracy.

I. Enabled Paul to witness for Christ.

II. Enabled Paul to advance toward Rome.

I. Enabled Paul to witness for Christ. Paul was in the hands of Roman authorities. The chief captain referred his case to the Jewish Sanhedrin to ascertain the cause of the riot. In reality the council had no jurisdiction over the case. There being no regular high priest at this time, Ananias undertook the office. It is evident that Paul estimated quickly and skilfully the character of the judges before whom he was brought. He saw that their passions and prejudices were inflamed against him, and that his own integrity was no security against an unjust sentence. As he stood before the council, Paul's look was one of conscious innocence and of searching observation. He did not seem to be disconcerted. He rose to the occasion and began his defence. He spoke out of honest conviction. His words enraged Ananias. By Paul's claim to a good conscience Ananias was reminded of his own evil career. There was no assumption of self-conceit in Paul's quiet assertion. His statement was simply the truth. Though pursuing a mistaken course before his conversion, he had done so honestly, according to his convictions. When the revelation of the Messiahship of Jesus came to his understanding and heart, conscience smote him and he felt the exceeding shame of his past conduct. Thenceforward he had pursued the path in which God had directed him. There is no reason to think that Paul said what exceeded facts. Ananias was guilty of brutal outrage. His act revealed the extreme corruption and degradation of Jewish society. Instead of cowering before the insult, Paul rose to noble defiance. He could respect the office of priesthood, but not its guilty occupant. Paul's remonstrance was worded so as to exhibit the insult done to righteousness and not to himself. Paul expressed no wish for the punishment of Ananias, but firmly declared the likelihood of retribution from God. His language was not a bitter retort, invective or imprecation. Though in form a denunciation, it was a merciful call to repentance. Christ had denounced the Pharisees as whited sepulchers. Paul stood for truth. He had no wish for anything but legitimate methods of defense. If Paul was to stand his ground for a moment in such an assembly, it must be by an immediate appeal to anything friendly to be found there. According to his unifrom policy he made use of the things in which he and his hearers agreed. He saw that though his judges were incited by their common hatred toward him, there were strong lements of discord among them. It was an act of sagacity and policy to take advantage of this circumstance to divide his opponents to save himself.

II. Enabled Paul to advance toward Rome. There was a contrast between the confusion and tumult of the day and the quiet of the succeeding night. At that time when Paul was cut off from fellowship with the disciples, the Master Himself drew near with the cheering assurance of distinguished, future service for him. Paul for the future. New service was the reward for past fidelity. A new battle was the honor to be conferred for past victories. With such assurance nothing in Paul's outward condition had power to obliterate his sense of God's nearness and His infinite grace. Human agencies, directed and controlled by Providence, delivered Paul out of the hands of his enemies. Paul estimated the malice of the Jewish party and knew that nothing short of his death would satisfy those forty zealots. Party prejudice and unreasoning hatred called for heroic measures. Lysias was an unconscious agent. He was only bent on extricating himself from perplexing difficulties. Alarmed by the violence of the Jews and disturbed by his own grave mistake in threatening Paul with scourging, he promptly took steps to show his respect for him as a Roman citizen by sending him to Caesarea, considering this a safe way of relieving himself from responsibility. By so doing he avoided a mob in Jerusalem and effected God's purpose to bring Paul on his way to Rome where he should again witness for Christ.

T. R. A.

MY LOVELY MAY.

Composed in a compliment to a young lady friend.

My dear May—my lovely May,
My modest, gentle-hearted May,
In my thoughts you ever dwell,
I dream of you all night and day,
The beauty of the blushing rose
May charm my fancy, fair and free,
But ah! the sweetest flower that blows
Seems not so fair as you to me.

My dear May, my lovely May,
You have a sweet and winning way,
And you possess a charm unknown
To other maidens fair and gay,
You're free from worldly wanton wiles
And pure as winter's driven snow,
Your sparkling eyes, and sunny smiles
Shed o'er my path a rosy glow.

My dear May, my lovely May,
You are the sweetest maid I've known
And since we met, my pretty pet,
I sighed for you, and you alone;
You are the empress of my heart,
My love for you will ne'er decay,
Till from this life, I will depart,
My sweet and gentle, lovely May.

—J. C. MacCallum, 77 Jackson street west, Hamilton.

—THE— Quiet Hour

FOR THOUGHTFUL PEOPLE

WHAT COUNTS.

It isn't the bad that you did down here,
When your time of life is through
That will hurt so much in that other sphere,
As the good that you didn't do.
Oh, the times you slipped and the — times you fell,
Won't show when your race is run;
But it's going to hurt when you're forced to tell
The good that you could have done.
—Detroit Free Press.

ABIDE IN HIM.

He that —wavereth is like a wave of the sea driven with the wind and tossed. Let not that man think that he shall receive any thing of the —Lord. A double minded man is unstable in all his ways.

I marvel that ye are so soon removed from him that called you into the grace of Christ unto another gospel; which is not another. Though we, or an angel from heaven, preach any other gospel unto you than that which we have preached unto you, let him be accursed.

Christ is become of no effect unto you, whosoever of you are justified by the law; ye are fallen from grace. Ye did run well; who did hinder you?

As the branch cannot bear fruit of itself, except it abide in the vine; no more can ye, except ye abide in me. If ye abide in me, and my words abide in you, ye shall ask what ye will, and it shall be done unto you. For all the promises of God in him are yea, and in him, Amen, unto the glory of God by us.

"NO LONGER I."

The Book is a humbling book, and the cross is a humbling instrument. In the world "I" stands first; in the "kingdom" man takes a tumble, a low place, a second place ;and yet it takes but little patient thought to discern that before honor is humility. "I have been crucified with Christ; yet I live, and yet no longer I." The usurper is un unthroned and thrust forth to its extinction. Long time it was a yoke which is not easy, and a burden which is not light. Hence the reproach of the voice divine.

"If thou couldst empty all thyself of self,
Like to a shell dishabited,
Then would He find thee on the ocean shelf,
And say, 'This is not dead,'
And fill thee with Himself instead."

"Personality is a burden to itself until the "I" is gone. You shall see even a good man not yet delivered from this weight; he expects the tribute of recognition and praise, he is sore if tongues are silent about him. Can the "I" pass out of sight, be lost in a tomb, where there is no resurrection? Yes, it is no longer I that live. Christ died in such a manner on the cross that I, every I, can be crucified with Him. It is no longer I that live, but Christ which liveth in me. There is but one cause which has been equal to this effect. Other causes have repressed or hidden the I—self-discipline, astuteness, ritual, priestly arrogance; other causes have worn down and destroyed personality, as ceticism, madness, death; but only one cause can dispossess this busy I.

"The individual is moved from the centre, where he illuminates nothing, directs nothing, does nothing, towards the circumference. The cross unites all extremes, reconciles all contradictions, mental, moral and social. It first binds men to God, and then binds men to one another. God gives Himself first of all, for man and to man. The instant, therefore, man believes, he is forgiven and saved. He is fully justified and put in possession of eternal life. All that he has to do is to consecrate himself to God and to duty. By losing himself, he finds God, and in finding God, once more finds himself, say, finds everything. "All is yours." This devotion, or sacrifice is our highest interest and felicity.

Christ for the world we sing,
To Christ the world we bring.

Missionaries cannot act upon communities except by the superiority of the truth; this superiority of truth is also a superiority of power, and confers superiority of attraction. The message of the cross alone is vital, active, aggressive. It is the only one which makes any progress at the expense of the others. The other two (Brahma and Mohammed) once active and powerful, have exhausted their energy. They are stationary, make no progress, gain no converts, achieve no conquests. They form no colonies. They are losing every day. They exist by sufferance, a few powerful strokes from a stronger civilization would dash them to pieces. They gain nothing upon savage nations. All these are falling under the power of the cross. The superiority of power, mental, moral, social, scientific, and physical, belongs to Christianity. From rags to radiance, from dust to divinity from shadow to sunshine, from rebellion to royalty, from emptiness to pardon, purity to holiness.

H. T. Milles.

CAPTURE OF THE MINE-LAYING SUB.

The first complete story of the capture by the British of the German mine laying submarine UC-5 is published in The Naval and Army Record of London in its issue of July 21. A complete description of the submarine, said to be the first of the kind ever constructed, is also given.

"In April," says The Naval and Army Record, "a torpedo destroyer, cruising off the east coast, captured a German submarine in novel circumstances. When first sighted, the enemy was in difficulties. From the deck of the destroyer, then some distance away, a flag could be seen at the masthead of the submarine, and in the mist it was at first taken to be the Union Jack. Closer inspection proved it to be the German naval ensign, and then it was noticed that the whole of the crew of the submarine appeared to be on deck.

"The comic side of the situation was not lost on the men of the destroyer, and, once apprised of the enemy character of the distressed vessel, they set to work to make her a prize. The commander hailed the crew with a brusque invitation to surrender. The submarine men saw the guns trained on them, and they hauled down their flag and put their hands above their heads in the approved "Kamerad" style. At a word from the commander they jumped into the water and swam for dear life away from the submarine. Internal explosions followed, and at the last and heaviest a carcase of hammocks and other debris was shot out at the open conning tower to a height of forty feet. That there was a vent for the explosive forces probably saved the ship, but, as it was, the bottom of the vessel was punctured in two places and rivets were started, so that the craft made water quickly.

"An attempt to investigate the damage was frustrated by the presence of thick black gases and about two feet of water, but later expert examination showed that, although the submarine had laid no mines, two had been released by the force of the explosions and were foul of the bottom of the vessel. Contract between the horns, which jutted out all around the mines, and the plates of the vessel would have exploded enough to sink a battleship, and it was an act of heroism on the part of a young officer that rendered the submarine capable of being brought in as a prize. The officer went down in a diving suit and made the mines safe by detaching the detonators, afterward securing them in such a position that the salvers could work in comparative safety. After seventeen days she was brought into an east coast port and put on public view off the Temple Pier, Thames Embarkment. She turned out to be the UC-5, a vessel of the minelayer class, quite small, but capable and virulent, and the officers and men of the destroyer who made the capture are to heartily congratulated on their achievement.

"As a memento of her capture the destroyer now displays her prize's ensign in the officers' mess. UC-5, as she appeared in custody at a naval dockyard this week, was smartly painted her without perspective intervening too largely, she was not really a pretty boat, even for a submarine. Her bulging, tubular sides gave her a smart appearance, which was increased rather than diminished by the clumsiness of her superstructure—high, raised platform running the whole length of the ship, and widening at the forward and to display through gratings the six huge tubes through which the mines were launched.

"The captured submarine appeared to have been one of those transported in sections from Germany and put together on the Belgian coast. Her four sections are plainly marked, the hull being divided into three and the conning tower constituting the fourth part. The seams are rather roughly finished, and point to rapid assembling or none too skillful workmanship. A mere minnow in size compared with the "big fish" possessed by both the enemy and ourselves, the UC-5 was fitted only for mind-laying, and apparently carried no armament. The whole of the forward section is occupied by the steel launching tubes and they were worked either automatically from the conning tower or by a hand lever situated between the wall of each tube and the side plates of the ship. She was fitted with a sixteen-horse-power Diesel engine, driving a single screw, and was capable of not much more than eleven knots at the best. Despite her limitations, she is believed to have made a score of trips to British waters and probably dropped 240 mines.

"A visit to the interior of the submarine was a rather disappointing experience, for her late occupants had wrecked her pretty effectively before giving themselves up. The periscope lenses and compasses had apparently been smashed with a hatchet, while revolvers had been fired into the mechanism at various other points. Rust and muddy sediment had coated everthing that survived, and gave the impression of an underground cave rather than the compact mechanical model which every submarine has to be. At no point was it possible for a man of average height to stand erect, and as a habitation for five officers and seventeen men it must have been most comfortless. The Germans carry in their submarines no fewer than five officers, as against our two, but the balance of efficiency seems indubitably to rest with the highly skilled young officers of our own submarine flotillas. The commander of the German submarine appears to be a figurehead, and knows nothing of the scientific working of his craft. Each of the four junior officers are expert in one or other of the technical branches, while a proportion of the crew is duplicated for purposes of training.

"There are one or two clever minor characteristics in the design of the UC-5, which have been noted by our own experts. One of them consists in the fact that every projection on deck is capable of fitting into a socket flush with the plates, so that when the ships dives her sides are smooth and offer no untoward resistance to the water."

For Hunters and Fishers

Owing to the fact that a good deal of misapprehension exists in reference to the Fish and Game Laws now governing such forms of recreation, the Brockville Recorder has published a synopsis of the same as published by the Ontario Department this year. A number of changes were made recently, and a brief resume of the leading features is as follows:

GAME—DEER.

No person shall hunt, take or destroy any deer except from the 1st day of November to the 15th day of November, both days inclusive.

And moose, reindeer or cariLou lying south of the main line of the C. P. R. from 1st day of November to 15th of November, both days inclusive.

PARTRIDGE, ETC.

Any grouse, pheasants, prairie fowl or partridge, except from Oct. 15 to Nov. 15, both days inclusive; but no persons shall take more than 18 partridges in any one day, and no grouse, prairie fowl or partridge shall be hunted or killed before Oct. 15, 1918.

WOODCOCK.

Any woodcock shall not be taken except from Oct. 15 to Nov. 15, both days inclusive.

QUAIL, SQUIRRELS, ETC.

Any quail, wild turkey, black or grey squirrel shall not be taken except from 1st day of November to the 15th November, both days inclusive, and no person shall take or kill more than six quail in any one day or 25 for the season.

GEESE.

Any swan or goose, except from Sept. 15 to to the 30th day of April in the following year, both days inclusive.

DUCKS, WATER FOWL, ETC.

Duck of any kind or any other water fowl, snipe, rail, plover or any other bird known as a short bird or wader shall not be taken except from the 1st day of September to the 31st of December, both days inclusive.

HARES

Hares may be taken and by any means at any time between the 15th of October and the 15th of November, and between the 23rd of December and the 2nd of January in the following year, and may be taken at any other times by any other means than shooting.

MUSKRAT.

No muskrat shall be taken, hunted or killed in that part of the province lying south of the French and Mattawa Rivers, except from the first day of March and April 21st. No muskrat shall be shot or speared or muskrat house damaged.

MINK.

No mink shall be hunted, taken or killed between 1st of May and 1st of November following.

LICENSES.

No person shall hunt, take or kill any deer, moose, reindeer or caribou except under the authority of a license and the animals shall not be under the age of one year.

NUMBER OF DEER.

No person shall during one year or season kill or take more than one deer, one bull moose, or one bull reindeer. Two or more persons hunting together cannot kill an aggregate of not more than one deer for each member of the party. Dogs are not permitted to run at large during the close season in any locality where deer are usually found.

WATER FOWL.

No person shall hunt water fowl such as ducks, goose, etc., from a sail-boat, steam or other power boat. No blinds or decoys shall be placed at a greater distance than 200 yards from the shore or natural bed thick enough to conceal a boat or from a water line bounding private property. All decoys shall be removed from the water during the hours in which shooting is prohibited, and no person shall set out more than one flock of decoys. No person shall kill more than 200 wild ducks in one year. It is unlawful to discharge in hunting any gun between sunset and sunrise.

ANGLING.

In angling no on person shall use more than one fishing line, and it shall not be provided with more than three hooks.

BASS.

No one shall fish for, catch or kill any large or small-mouthed bass from 1st of January to June 15th, both days inclusive. But eight bass are allowed to be caught in one day by one person.

MASKINONGE.

No person shall fish for or catch any maskinonge from 1st of January to the 15th of June in each year, both days inclusive. Any person is allowed to catch four maskinonge in one day.

PICKEREL.

No person shall fish for or catch pickerel (dore) from 15th of April to the 15th of June, both days inclusive. Not more than 12 pickerel may be taken by one person in one day.

SALMON TROUT.

No one shall fish for or catch salmon trout in either Big or Little Rideau Lake in one day by angling more than three salmon trout.

SPECKLED TROUT.

No person shall fish for or catch any speckled trout or brown trout from 15th of September until April 30th in the following year.

TROLLING.

In trolling no one shall use more than one line and not more than two lines shall be fished from one boat, and no one shall troll from a boat which is being towed by another boat.

ORIGIN OF THE PENNY.

The "maiden name" of the penny was "denarius," and the English penny is a survival of the Roman rule in the British isles. Like the coin which preceded it in Rome, it has been debased in value until its name has lost its original meaning. The first denarius was minted in Rome about 268 B. C. and was the principal silver coin of both the republic and the empire. It at first weighed seventy-two grains troy and was as nearly pure silver as durability would permit. It bore on one side the helmeted head of Roma and the mark X and on the other side the images of Castor and Pollux. Later these twin gods were replaced by the head of the Roman emperors. By [illegible] A. D. the coin had deteriorated in value until it was fully 40 per cent. silver. The X, which signified the value of ten asses, had wholly lost its meaning. Diocletian finished the degradation of the denarius by applying the name to a small silver coin. In England the largest silver coin was called denarius at a time when the English florin was called a gold penny.

DIARRHOEA

Was Caused By Change of Diet, Etc.

Diarrhoea arises from many causes such as, change of diet, change of water, change of climate, catching cold, the eating of unripe fruits, or anything that will cause or induce an excess of bile.

On the first sign of any looseness of the bowels it should not be neglected, but should be looked after immediately, for if not diarrhoea, dysentery or some other serious bowel complaint may ensue.

Mr. Geo. Smith, Victoria, B.C., writes: "It is five years ago since I first tried Dr. Fowler's Extract of Wild Strawberry. I was then on a timber survey, and suffered greatly from diarrhoea, caused by change of diet, etc. A friend in the party gave me a few doses which gave me great relief. Since then I have been in survey work, and would as soon think of starting out on a trip without my compass and blankets as without my supply of Dr. Fowler's Extract of Wild Strawberry, which I consider the woodsman's best friend."

Dr. Fowler's Extract of Wild Strawberry has been on the market for the past seventy years, and is universally known as a positive cure for all complaints arising from any looseness of the bowels.

When you ask for "Dr. Fowler's" be sure you receive what you ask for as there are many rank imitations of this sterling remedy placed on the market to try and fool the unsuspecting public.

The genuine is manufactured by The T. Milburn Co., Limited, Toronto, Ont.

Price, 35 cents.

COULD NOT SLEEP

Nerves Were So Bad.

To the thousands of people who are tossing on sleepless beds night after night, and to whom sleep will not come, Milburn's Heart and Nerve Pills offer the blessing of sound, refreshing slumber, because they restore the equilibrium of the deranged nerve centres, thus restoring strength and vitality to the whole system.

Mr. Arthur McCutcheon, Mt. Pisgah, N.B., writes: "I have been much troubled with my nerves, and could not sleep for hours after I would go to bed. I would toss and turn from one side to the other before I could go to sleep. I would then wake up in the night, and lie awake a long time before I would get to sleep again. I thought I would try Milburn's Heart and Nerve Pills, as they were recommended so highly. I now get to sleep without any trouble; my nerves seem quieted, and when I lie down I go to sleep quickly. Anyone who is bothered with their nerves should keep a box on hand."

Milburn's Heart and Nerve Pills are 50 cents per box, 3 boxes for $1.25; at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

FARM AND GARDEN

SELECTING A DAIRY COW.

About the safest way to select a dairy cow is to see her milked. We know then what she is capable of giving. One can also tell pretty correctly by outward appearance, but this calls for more or less experience. The biggest risk is to take the owner's word. He has her for sale, and don't want to lose a customer—and—well, you know what human nature is!

When the aforesaid owner comes to realise that his 11-quart pail had a flaring top, and a margin of two two inches more, he finds his pail three quarts less than "full."

At night the cow gives several quarts less than in the morning.

If the milk is accurately weighed night and morning for a week or two, the owner may find that she gives an average of four gallons a day when fresh; at the end of two months she is apt to come to three gallons per day, in six months to one gallon, and in nine months she is dry. In the year it may be found that she has given 6,000 pounds of 3 per cent. milk, or an average of less than two gallons per day.

It is possible to come close to the cow's capacity by judging from appearances. As a rule, the wedge-shape, the prominent and tortuous milk veins, the deep chest and expensive barrel, the well-sprung ribs, the large and prominent eyes, the loose, smooth skin and fine hair, the angularity and mildness of disposition, all show strong possibilities of capacity for converting feed into milk with economy. Unless a cow has a large, well-balanced uder, no one would expect her to be a good milker.

There is just as much right in following facts as given above to select the desirable milch cow, as there is to look for blockiness in the animal upon which to base good beef quality. An expert can usually pick out the best cows in a herd by following the dairy form.

But even the expert can judge only in a superficial way. It is impossible for him to tell positively what a cow will do. Two cows with equal good "points" will not yield the same. Form does not indicate whether the cow is a persistent milker or not. A cow giving an average of two gallons of milk a day for 65 days, will outclass one giving three gallons a day for eight months.

The only trustworthy standard of measure is weight; bulk measures are uncertain. A gallon of ordinary milk weighs 8.6 pounds. The Babcock test tells the butter-fat content, and a six-inch test tube reveals the depth and color of the cream. In this way it is possible to calculate with reasonable accuracy what a cow will probably accomplish, and the prospective buyer will be in a position to know if the price asked for the animal is exorbitant or not.

The large yielders are the most economical, for, while feed cost increases with the yield it does not do so in proportion to the value of the milk.

The best and safest method is to raise the heifers on the dairy farm. A cow does far better when she remains for life on the farm where she was bred and born.

It is not a good plan to buy old cows. Dairymen do not sell their cows at a reasonable price if they are profitable.

FARM NEWS AND VIEWS.

Sheep raising is apt to be given more attention than it now receives because it seems that farmers are beginning to realize their worth as farm animals. Wool continues to bring fair prices, and mutton will increase in demand as people learn to use more of it.

Sheep are able to consume considerable roughage, such as clover, straw, hay and silage. For this reason they are able to convert coarse farm products into mutton and wool. With pasture and roughage, not much grain is required to fatten the animals.

The droppings of sheep are known to be very rich in fertility constituents, consequently the manure from a small flock of sheep is worth something to the farm. This is of far more benefit than is generally believed.

As an aid to rapid growth and early development, pigs should eat while they are with their mothers. If the sows are fed brain, slops, skimmed milk, shorts, tankage, bran, etc., the pigs will soon learn to eat. They will begin to taste the feed almost before you realise that they are old enough to eat. They will soon eat enough to help their nutrition, and it will then be an easy matter to wean them.

The temptation is strong to push the horses too hard when weather is right to do farm work after weeks of wet weather, when everything went behind. It isn't a wise thing to do, because valuable animals are apt to be sunstruck and perhaps lost. And the loss of a good horse or two makes serious inroads on the season's profits—perhaps wipes out the profits altogether.

If a horse is overcome by the heat get the animal in to the shade immediately. Dash cold water over it, particularly over its head, until the animal's temperature is about normal. Give some stimulant, like whiskey, well diluted with water. Prompt action may save the animal, but, as with most other things, prevention is a whole lot better than cure.

During July and August bot flies lay their eggs chiefly on the long hairs on the horse's legs. These eggs get into the horse's mouth, hatch and the insects attach themselves to the walls of the stomach. It is good practice to clip off these leg hairs at intervals during late summer.

Two-thirds of the feeding value of the alfalfa plant is in the leaves. If the leaves are lost in curing only one-third of the feeding value remains. This makes it important that alfalfa hay be cured so as to save the leaves. This means that the alfalfa must be raked into windrows before the leaves dry or they will fall off. The alfalfa should be raked into windrows an hour or two after being cut. This not only saves the leaves, but also keeps its green and more of the flavor is retained.

The size of the silo should be determined not by present requirements, but by future needs. Better build it 50 per cent. bigger than is now needed. Once you get using silage you will probably get more of it. Are you building a silo this year? There is nothing that will enable a man to save his feed so that his cattle will utilize everything there is in it like a good silo.

"Dost Thou Love Pictures"?

—Taming of the Shrew

In addition to our large stock of Antique Furniture, China and Glassware, we have a very choice collection of paintings of more than ordinary merit, which we are always pleased to show to lovers of art. When in Hamilton you will enjoy spending some of your time looking over our collection of Bric-a-Brac, Paintings and Antique Furniture.

MY LOVELY MAY.

Composed in a compliment to a young lady friend.

My dear May—my lovely May,
My modest, gentle-hearted May,
In my thoughts you ever dwell,
I dream of you all night and day.
The beauty of the blushing rose
May charm my fancy, fair and free,
But ah! the sweetest flower that blows
Seems not so fair as you to me.

My dear May, my lovely May,
You have a sweet and winning way,
And you possess a charm unknown
To other maidens fair and gay.
You're free from worldly wanton wiles
And pure as winter's driven snow,
Your sparkling eyes and sunny smiles
Shed o'er my path a rosy glow.

My dear May, my lovely May,
You are the sweetest maid I've known
And since we met, my pretty pet,
I sighed for you, and you alone;
You are the empress of my heart,
My love for you will ne'er decay,
Till from this life I will depart,
My sweet and gentle, lovely May.

—J. C. MacCallum, 7 Jackson street west, Hamilton.

"I hope your constituents appreciate the value of your patriotic services," said the prominent citizen. "I don't know that I care to make it a question of actual value," replied Senator Sorghum. "The market for patriotic services is terribly fluctuating."—Washington Star.

2 IN 1 SHOE POLISHES

Contain no acid and thus keep the leather soft, protecting it against cracking. They combine liquid and paste in a paste form and require only half the effort for a brilliant lasting shine. Easy to use for all the family—children and adults. Shine your shoes at home and keep them neat.

THE TIME HAS COME

when people cannot afford to accept anything but the very best for their money. Zam-Buk has been proved by thousands to be the best ointment obtainable for skin ailments and injuries, because it cures when other treatments fail, and because its cures are permanent. You take no chances when you buy Zam-Buk.

Only the really good things are imitated! Proof of Zam-Buk's superiority is provided by the great number of imitations and substitutes which have been put on the market. Don't be deceived, however, by anything represented as "just as good." There is nothing "just as good" as Zam-Buk. All druggists, 50c. box, 3 for $1.25, or direct from Zam-Buk Co., Toronto.

Send 1c. stamp for postage on free trial box.

ZAM-BUK

HOW THEY MADE SOME GOOD FIRES.

The Fire Marshal of Wisconsin has issued a bulletin which he terms a "Comedy of Errors."

He looked for a gas leak with a match, and found it.

He lighted a match to see if his gasoline tank was empty. It was not.

He smoked while filling his auto tank, but will do so no more.

He smoked in the hay mow, but will not do so again.

He smoked in bed, so did the bed clothes.

He threw the matches into the waste paper basket. He is wiser now.

He threw a cigarette stub into some rubbish.

He used a wooden box filled with sawdust for a cuspidor.

He saved his oily waste and oily rags and they burned his shop.

He washed his hands in gasoline near the stove. The doctor washed them now.

He allowed dangerous conditions to remain because "he never had a fire." He does not longer boast of that record.

He did not worry about fire as he had "plenty of insurance," and forgot the safety of his wife and children upstairs.

He used a torch to thaw out frozen water pipes, and set the house on fire.

He stuffed up the chimney holes with paper and rags.

She cleaned her gloves with gasoline and saved fifteen cents but paid the doctor and druggist fifteen dollars.

She poured kerosene into the lamp while the wick was burning.

She put gasoline into the wash boiler on the stove to make washing easier.

She dried clothes too near the stove.

She used the wrong oil can.

She used gasoline to exterminate bedbugs. They are all cremated.

She burned sulphur all over the house to fumigate.

She used the woodbox back of the range as a waste paper receptacle.

She gave matches to her children to go out to burn leaves in the yard. The cotton dresses burned easier than the leaves.

She looked for a dress in the clothes closet with a candle.

She was "coming right back," so left the electric current on in her iron.

She swung the gas bracket too close to the curtains.

She fixed up a fine tissue paper shade for the lamp.

She filled the tank of her gasoline stove while one burner was on.

The comedies have turned to tragedies; many of the scenes of action are in ashes and too many of the actors are maimed or asleep; others will follow, no doubt, as they are prone to ignore the advice and experience of others instead of profiting by the errors and sufferings.

SUFFER NO LONGER FROM CONSTIPATION!

You can immediately relieve and permanently cure yourself with Dr. Hamilton's Pills. One thousand dollars will be paid for any case that isn't corrected within three days. Dr. Hamilton's Pills contain no injurious drugs; they are composed entirely of soothing vegetable extracts that strengthen the stomach and bowels at once. It is absolutely impossible for Dr. Hamilton's Pills to fail curing biliousness, sour stomach, indigestion, headache or constipation. Even one box has brought vigor and renewed health to chronic sufferers, so you owe it to yourself to try Dr. Hamilton's Pills at once; 25c per box at all dealers.

Perseverance.

A swallow in the spring
Came to our granary, and 'neath the eves
Essayed to make a nest and there did bring
Wet earth and straw and leaves.

Day after day she toiled
With patient art, but ere her work was crowned
Some sad mishap the tiny fabric spoiled
And dashed it to the ground.

She found in ruin wrought
But, not cast down, forth from the place she flew,
And with her mate fresh earth and grasses brought
And built her nest anew.

But scarcely had she placed
The last soft feather on its ample floor,
When wicked hand, or chance, again laid waste
And wrought the ruin o'er.

But still her heart she kept,
And toiled again—and last night, hearing calls,
I looked—and lo! three swallows slept
Within the earth-made walls.

What truth is here, O man!
Hath hope been smitten in its early dawn?
Have clouds o'ercast thy purpose, trust or plan?
Have faith, and struggle on!

—R. S. S. Andros in Philadelphia Inquirer.

LOST BY LACK OF NERVE.

Louis Philippe Was Wanting When the Crisis Came.

Baroness Bonde wrote in her diary the following account of the abdication of Louis Philippe of France on the day of that remarkable occurrence:

"An aide-de-camp of the Minister of War who was in the King's Cabinet when he abdicated gave me a detailed account of this most signal piece of cowardice. He had reviewed the troops in the Carrousel on horseback, highly rouged, when a cry was raised, 'Voici des faubourgs!' No one had any orders; no one gave any. The mob rushed forward, shouting, 'Vive la garde nationale—vivent les troupes!' and shook hands with the outposts.

"The King retreated precipitately with his sons and a sub-lieutenant of the national guard rushed into the palace asking to see him. He was admitted, and in the greatest agitation said:

"'Your majesty must abdicate.'

"'Very well,' says the King. 'In favor of my grandson.'

"'No, unconditionally,' says the young and self-elected mouthpiece of public opinion.

"Would you believe it? Of all who were congregated around the royal person, Piscatory alone said: 'Go down and head your troops. Fight for your crown and your dynasty.' He was overruled, and they all marched out of the palace except the Duchesse d'Orleans, her children and the Duc de Nemours."

TRAPPERS! Send your RAW FURS to JOHN HALLAM

and receive highest cash prices. We send money the same day the furs are received. Charge no commission—and pay all charges. We have paid out millions of dollars to thousands of trappers in Canada who send their furs to us because they know they get a square deal, and receive more money for their furs. You will also. We buy more furs from trappers for cash than any other five firms in Canada.

Marvels of New Limbs

The cheeriest place in England is the Queen Mary Convalescent Hospital at Roehampton, says a writer in the London Daily Mail, where limbless soldiers and sailors are being fitted with artificial arms and legs, hands and feet. I expected to find there a depressing spectacle of helpless men, dejected and despondent. To my surprise I was met with a bright and busy scene, everyone active, happy, hopeful; and happiest and most hopeful of all were the limbless heroes themselves, some of them radiant with delight at being able to get about once more.

"Look at that man," said my guide, pointing to a soldier who was briskly walking up and down between a length of parallel bars. "How long do you think he has been an artificial legs?" "A month," I hazarded. "Five minutes," said the hospital official. Exercising between the parallel bars, the patient learns balance and the control of his new legs; next he moves about with the help of two sticks; then, discarding those aids, he walks with nearly all the ease and confidence of people on their natural legs. Here are men at every stage of this progress from helplessness to activity, some beginning, some ready to leave the institution.

WALKING IN A WEEK.

"Show us how you can march," said my guide to a fine young fellow who looked anything but a wounded and crippled soldier. Down the room he strides at a rattling pace, turns quickly and easily, comes back, and stands at ease. Both legs are artificial; he has been on them only a week or ten days, but he walks so well and looks so healthy that it will not be surprising if, when he goes out into the world someone asks him why he is not at the war.

Perhaps to the eye of an expert surgeon there may have appeared a little stiffness and awkwardness, but what surprised me was the length and freedom of the mended soldier's stride. "It comes easier to take a long step," he explained, and the matron added that in a little time he would walk still better. It takes about nine months to become really comfortable in artificial limbs.

A soldier standing beside me seemed so well and sound that I wondered why he was not at the front. It turned out that he had been badly wounded, and had lost a leg, but was now so active on his artificial limb that he had become an orderly at Roehampton House.

But the most marvellous case is that of a man who had a leg completely removed from the body. No stump being left, it would, up to quite recently, have been impracticable to fit an artificial limb. But in this case, and another of the same kind, an ingenious limb-maker moulded a mass of leather to the lower part of the body, and formed an artificial stump to take the artificial leg. The patient, who would formerly have been doomed to lifelong helplessness, now walks with the best of his comrades: without the least apparent difficulty he sat on a chair and stood up again with the alertness of a man on his natural legs.

A dozen men marched round the room, and with the most critical inspection I could not tell which was the artificial leg, or whether both were artificial.

FALSE ARMS FOR WORK.

Even more wonderful than the legs are the artificial arms, for whereas the leg movement is automatic and comparatively simple, the movements of an arm are voluntary and complex. Very great improvements have been made in arms and hands at the workshops in Roehampton House, and men supplied with them are here to be seen hammering, filing, sawing and doing a great variety of work. Of course, the efficiency of a hand or arm depends very much on the amount of the natural limb that has been lost, but every arm is more or less useful, and a great advance on the old iron hook, with which soldiers in former wars had to be satisfied.

I have not space for describing their structure, but the chief point is that the arm can be bent at the elbow by the action of the shoulder muscles, and it can be locked at any desired angle by ingenious mechanism, so that a worker may use it for hours without suffering fatigue of the shoulder muscles. A gloved hand is screwed into the lower end, and as the hand is jointed it can be bent so as to pick up objects and hold them. Thus a man may carry a stick or an clamp for holding a cricket bat, a screwed into the arm, and also a umbrella, or hold a book, etc.

A great variety of instruments are to be seen, any of which can be screwed up into the arm, and also a clamp for holding a cricket bat, a billiard cue, a hammer, axe, chopper, etc. Knives and forks can be quite expertly used, and there is one man at the hospital who can write a very legible hand. An artificially armed officer, by the way, is the best billiards player in the neighboring building, Dover House, where officers undergo the same repairs as the men at Roehampton House.

THE UPHILL BICYCLIST.

The mended soldiers and sailors do not remain here longer than is necessary to become usefully expert in the use of their limbs. The average stay is about three or four weeks. In that period the limb is specially constructed for each particular case, fitted on, altered if necessary under the supervision of a surgeon, and the man learns to become familiar with its use.

Owing to their short stay the soldiers do not reach that stage where they can ride bicycles, run and jump. But that they may one day be equal to these feats was shown by "demonstrators" at the hospital workshops, men who had lost limbs themselves and are wearing artificial ones.

One of these did a sprint of fifty yards in a way that would do credit to an athlete. Another rode a bicycle with all the skill of a rider sound in limb. He says he can beat all comers going up a hill and it was curious to see him alight on the artificial leg. "No danger of hurting my toes," he said. A man with an artificial arm which he has worn for some years removed a match and lighted a cigarette, picked up a stone and threw it with precision, and shook hands all round in the most natural way.

Chest Colds and Hoarseness Quickly Rubbed Away

"Nerviline" Gives Speedy Relief and Cures Overnight.

Get a cold?

Is your voice raspy—is your chest congested or sore?

If so, you are the very person that Nerviline will cure in a jiffy.

Nerviline is strong and penetrating. It sinks right into the tissues, takes out inflammation and soreness, destroys colds in a truly wonderful way. Rub Nerviline over the chest—rub on lots of it, and watch that tightness disappear. Nerviline won't blister it sinks in too fast—doesn't simply stay on the surface like a thick, oily liniment would. If the throat is raspy and sore, rub it well outside with Nerviline, and use Nerviline as a gargle diluted with warm water. Just one or two treatments like this and your voice and throat will be quite normal again.

Just think of it—for forty years the largest used family medicine in this country—Nerviline must be good, must quickly relieve and cure a hundred ills that befall every family. Try it for earache, toothache, coughs, colds, sore chest, hoarseness and muscular pains in every part of the body. Large family size bottle 50c; trial size 25c at all dealers.

The Long Roads of Ireland.

On the long white roads of Ireland I wish I were to-day,
With the mid-May sun above me, though it shed a piercing ray,
And although in all the landscape there was not a single tree
Or a hedge or clump of briers to throw a shadow o'er me
I'm wishing for the long, white roads of Ireland.

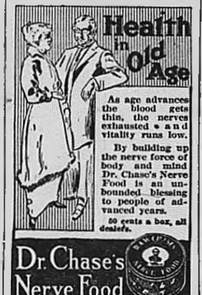
I'm not troubled much for beauty in this land o'er the sea,
And the lovely spots they tell about have ne'er a charm for me.
But to-day my heart is aching for the things so long gone by,
The mountains and the meadows, but most of all I sigh
For the long, white, winding roads of Ireland.

Sure, you've never seen the May sun climbing up the deep-blue sky,
With the soft clouds' banners streaming as they gayly flitted by.
When the fairy winds went dancing o'er the valley and the hill—
Oh, if ever you have been there 'tis your heart, like mine, would fill,
Thinking of the long, white, silent roads of Ireland.

Here the green fields march on with you, and the low stone walls all day,
Where the roving donkey nibbles and the goslings always stray,
And the red dog from the village pauses with a watchful eye,
His heart is troubled sorely and he surely wonders why
You're alone upon the long, white roads of Ireland.

Still 'tis lonesome and a weary way that brings the farthest turn,
And for the journey's end maybap I yet may sadly yearn,
But something now keeps calling me and whisp'ring in my heart
That there's pleasure there awaiting me and so I'll gladly start
For the long, white, dusty roads of Ireland.

—Patrick McHugh in Seattle Post Intelligencer.



Health in Old Age

As age advances the blood gets thin, the nerves exhausted and vitality runs low.

By building up the nerve force of body and mind Dr. Chase's Nerve Food is an unbounded blessing to people of advanced years.

50 cents a box, all dealers.

Dr. Chase's Nerve Food

A TRUE LADY.

A Kindly Frenchwoman's Courtesy to a German Frau.

In the hour of need we may turn to the anecdote which supplies the concrete illustration of the essential fact. And it would not be easy to find an anecdote more significant than one which has been told in New York in the course of this terrible war. A Frenchwoman, engaged as a teacher in an important school of the city, was so ardent an advocate of the cause of her country, that when she heard a casual acquaintance make a slighting remark about France, she up and boxed his ears. This, you may say, was all the evidence needed to prove that she was not a lady, in any exact use of the word. But even if under temptation she fell from grace on this one occasion, none the less did she possess the indisputable instinct which is the vital factor.

Riding in a subway car in the uncrowded noon hours, this Frenchwoman could not help seeing that a woman seated opposite to her was in distress. Finally, when this woman began to sob, the French lady crossed over and sat down beside her, and said: "You seem to be in trouble. Can I do anything for you?"

With a strong German accent, the weeping woman replied: "Nobody can do anything for me. This letter has come to-day; and my oldest son has just been killed in the trenches. This makes three in the past month, and I have no more."

The Frenchwoman put out her hand. "Nobody can help you," she answered—"except by sympathizing with you. And perhaps you will be willing to accept my sympathy when I tell you that my only son is now in the trenches. I have not heard from him in six weeks, and at any moment a letter may come to me, as it has just come to you, telling me that I have no longer a son."

The German woman dried her eyes and took the hand held out to her. She looked into the face of the unknown comforter, and said: "So you are a German, too?"

And the Frenchwoman unhesitatingly replied: "Yes."

It took a woman to make that noble answer, and perhaps it could have been made only by a woman of France, a country where the social instinct is cultivated from the cradle.—From "The Point of View," in the September Scribner.

KNEW HER HUBBY.

(Boston Transcript)

First Woman—I got a letter from you yesterday and it was dated a whole week ahead. Second Woman—Did you really? My husband must have posted it the very day I gave it to him.

IF SUBJECT TO COLDS HERE IS GOOD ADVICE

Don't load your stomach with cough syrups. Send healing mediation through the nostrils—send it into the passages that are subject to colds and catarrh. Easy to do this with Catarrhozone, which cures a cold in ten minutes. Even to the lungs goes the healing vapor of Catarrhozone—all through the bronchial tubes, nostrils and air passages—everywhere a trace of disease remains with Catarrhozone follow. You'll not have colds, nor will you suffer from sniffles, bronchitis, or throat trouble if Catarrhozone is used. Get it to-day, but beware of dangerous substitutes meant to deceive you for genuine Catarrhozone, large size, two months' treatment, costs you $1; small size 50c; sample size 25c.

BITS OF WIT.

"Do you expect a landslide next fall?" "No," replied Senator Sorghum. "Out our way I'm afraid the only movement in political real estate will be a little mud slinging."—Washington Star.

"Don't you sometimes envy the idle rich?" "No," replied Farmer Corntossel, "I know men that haven't a dollar who can be just as idle a anybody."—Washington Star.

To shrink cotton before making up, fold it and place in a tub; pour over cold water to cover and allow it to stand half an hour; then turn off water and cover with boiling water, allowing goods to remain till water is cold. Hang on the line in the open, without wringing. Press before quite dry.

Husband—I wonder why all the misers we read about are old bachelors? Wife—Oh, married misers are so common they are not worth mentioning—Indianapolis Star.

"How often you hear men say: 'If I had $1,000,000 I would be satisfied.'" "Yes; and it's surprising the amount of mental concentration fellows of that sort can bring to bear on borrowing a quarter."—Birmingham Age-Herald.

In order to make both ends meet, there are times when it seems almost necessary for a man to be a contortionist.

TIRELESS INSECTS.

Built for the Strenuous Life, They Are Never Weary.

In "Insects, Their Life Histories and Habits," Harold Bastin, the entomologist, says that, contrary to popular belief, spiders are not insects. Insects have six legs, neither more nor less, and another peculiarity of the insect is that it has wings, sometimes two, more often four. Spiders have eight legs and no wings; therefore spiders are not insects.

Insects have no backbones and no skeletons, says Mr. Bastin, but skins with a hard, durable surface called chitin, which makes on a light shell of armor that forms the outside of the body, to the inside of which the muscles are attached.

Insects do not breathe through their mouths, but through holes in their bodies, called spiracles. Insects have neither veins nor arteries. The blood is pumped directly from the chambered heart into the body cavity, where it bathes and nourishes the organs. Insects have wonderful and enviable digestive organs and feed upon and digest almost any substance from which nourishment may be extracted.

Because of the way they are built insects are particularly fitted for the strenuous life, and a tired insect is a thing unknown. They are always busy traveling, buzzing, biting or seeking some work to do.

WIT AND HUMOR

THE LADY AGENT.

(Louisville Courier-Journal)

"So that pretty canvasser sold you a book, eh?"

"No, she sold me a couple of smiles and threw the book in."

WISE JOHNNY.

(Boston Transcript)

Teacher—A nomad is a person who moves about a great deal—never remains long in one place. Johnny, name some tribe of nomads.

Johnny—Cooks.

NURSIE'S MISTAKE.

(American Boy)

It was bathing time and from the bedroom of twin boys came the sound of hearty laughter and loud crying. Their father went up to find out the cause. "What's the matter up here?" he inquired.

The laughing twin pointed to his weeping brother. "Nothing," he giggled, "only nurse has given Alexander two baths and hasn't given me any at all."

MISUNDERSTOOD.

(Boston American)

"I hope," said the advocate of moral uplift, "that you do not castigate your children as a means of development."

"No, ma'am," said the practical mother, "I'm a-bringin' up of 'em by hand."

ANOTHER CASE.

(Washington Star)

"I am in favor of peace at any price." "Yes," replied the pessimist, "but suppose you wake up some morning and find you haven't got the price?"

THE SALARY SAFE.

(Judge)

Friend—Will your salary be paid just the same, Rastus, now that you are going to war? Rastus—Well, my wife'll keep right on workin', if dat's what yo' mean.

SHE KNEW.

(Houston Post)

"And you know, if your husband never returns from the war the government will pay you a pension." "I'll need the pension a dinged sight worse if he does return."

HENRIETTA WILL DECIDE.

(Washington Star)

"Does your wife desire to vote?" "I don't know whether she does or not," replied Mr. Meekton. "But Henrietta isn't the woman to let anybody tell her she can't if she wants to."

ALSO NUMEROUS ENCORES

(Boston Transcript)

"This is an act of affection," he said, kissing her.

"It takes more than one act to fill out an evening's entertainment," she returned, glancing at him coyly.

HOW IT WAS.

(Judge)

Friend—Will your salary be paid just the same, Rastus, now that you are going to war?

Rastus—Well, my wife'll keep right on workin', if dat's what yu' mean.

IN NO DANGER.

(Washington Star)

"You know a little learning is a dangerous thing."

"I ain't worried," replied Farmer Corntossel. "The professor says Josh isn't even getting that much."

A GOOD APPROVAL.

(Judge)

Belle—They say that Jimmy makes better approaches than any man in the club.

Jack—I should say he does! The first time I met him I lent him $5!"

FOXY CLERK.

(Life)

Country Hotel Clerk (to bell hop)—"Look in the poker room and see if Colonel Slocum is ahead. If he is, page him, and say he is wanted at the desk; He owes me $7!"

VEHEMENT.

(New York World)

"Freddie, you've been fighting again."

"No, I haven't, mother. I've just been arguing with Jimmie Brown."

"Nonsense! How could you get a black eye from merely arguing?"

"Wel, you see, Jimmie gesticulates an awful lot when he argues."

PLAYING BOTH ENDS.

(Boston Transcript)

"This would be a good time for me to take a vacation," remarked the secretary and treasurer of a city concern.

"But you returned from one only a week ago," said the president.

"Oh, that was my vacation as secretary; I wish to go now as treasurer."

THE TOUCH PRE-EMINENT.

(Pittsburgh Dispatch)

"A cozy picture, eh? A man lolling in an easy chair and his beautiful wife leaning over him to light his cigar."

"You haven't seen the companion picture to it, have you?"

"Why, no."

"It's the same man savagely chewing the end of his cigar and writing a cheque."

HATED TO SEE IT.

(Liverpool Post)

Every seat in the car was occupied when a group of women got in. Going through the car to collect fares, the conductor noticed a man who he thought was asleep.

"Wake up!" shouted the conductor.

"I wasn't asleep," said the passenger.

"Then what did you have your eyes closed for?"

"It was because of the crowded condition of the car," explained the passenger. "I hate to see women standing."

TWO CONFESSED.

Blackmailers in Chicago Implicate Sixty.

Chicago, Sept. [illegible].—Confession has been made by two members of the alleged syndicate of blackmailers, eight of whom are under arrest here, that operations of the swindlers netted them $1,000,000 during the last year, Federal officials announced to-day.

The confessions, it was said, disclosed that the alleged band numbers sixty persons, a third of them women. A dispute over the division of spoils, it was said, led to the confessions. Arrest of a score or more members of the syndicate is expected within a week.

The men who confessed are "Dick" Barrett and Edward J. Thompson, according to Hinton G. Clabaugh, head of the Chicago Bureau of the Federal Department of Justice. Both are at liberty, and will become witnesses for the Government.

HEAVY LOSSES.

Officer Casualties of British 1,000 a Week.

London, Sept. [illegible].—Officers' casualty lists for the last fortnight of August contain the names of [illegible] officers killed, [illegible] wounded and [illegible] missing, a total of [illegible]. This brings the losses of officers in the British army since the commencement of hostilities to [illegible], of which [illegible] have been killed or died of wounds, [illegible] wounded, and [illegible] missing.

During the fortnight Brigadier-General Potter was wounded, Brig.-Gen. Buckle killed and five lieutenant-colonels killed.

Love sometimes dies of starvation because of a theory that two can live as cheaply as one.

Stephans' for Good Style and Good Service at Moderate Prices

This is the general consensus of opinion and never was it more truly justified than in regard to our immense stocks already assembled for Fall and Winter. We have never been better prepared to serve you promptly, efficiently, satisfactorily. We are more than ever convinced that this store offers distinct advantages to shoppers. Come in and see what we have provided in the way of new Fall Clothes and things for the home.

Ladies' New Fall Coats

Wise buyers are choosing from present stocks of Women's, Misses and Children's coats. Repeats are practically impossible owing to scarcity of materials.

We are showing a most beautiful range of the season's newest garments in checks, plaids, tweed effects and plush coats.

Plush Coats at $15, $22, $25 & $30.

Coats of this rich fur-fabric are very popular this season and are well represented in our stock of coats. Pressed plush, fancy figured plush and the sealette plush of extra fine quality and jet black. The styles of these coats are of the new full models with extra wide sweep at the foot and finished with deep choker collar.

Special at $15.00, $22.00, $25.00, and $30.00

New This Week

We have received big shipments of knitted goods direct from the factories and the values in every case are extraordinary considering the cost of raw materials.

Sweater Coats				Men's Underwear
Men's	$2.75	to	$5.00	Fleece Lined 50c & 75c.
Boys'	$1.25	to	$2.50	Heavy Wool 75c to $1.25

STEPHAN BROS.

THE PEOPLE'S STORE

ADVANCE SHOWING For Autumn Weather

Is here and with it comes the need for Heavier Clothing. Perhaps you need underwear or a sweater coat. We are ready to supply you with these.

NEIGHBORING VILLAGES & COUNTRYSIDE

News of the Week Collected by Staff of Live Correspondents

CARGILL

The "Ball" given last Friday evening was well attended and a nice sum was realized for the Patriotic Aid. Hetzler Bros. supplied the music in their usual capable manner.

Pte. Bert Mawhinney, 160th Bruce Battalion, spent a day with his brother Frank last week.

Quite a number from here attended the Paisley Fair on Wednesday.

Mr. A. A. Black of Guelph spent a few days in the village in the interests of Imperial Life.

Mrs. W. M. Cameron has returned after an extended visit to Cobden and other points.

Miss Mary O'Connell spent Wednesday of last week in the County Town.

Mrs. S. Welsford of Guelph visited with friends here for a few days last week.

Mr. Wm. Mathews has had his shop shingled.

Though defeated on Tuesday by one shot, our bowlers journeyed to Walkerton on Thursday and had another trial and came out winners.

Cargill	Walkerton
O. W. Keeling	A. Hoover
C. Kyle	C. H. Rogers
J. T. Clancy	H. G. Hunter
R. A. Fowlie sk, 18	H. M. Lay sk. 8

Mrs. E. A. Hardaker, who visited for some months in Flint, Mich., returned on a visit to her daughter, Mrs. Geo. Schrumm.

Mrs. John Clancy was in the County Town on Saturday.

Mayor Lippert of Walkerton was in our burg on Monday.

Mr. and Mrs. A. Frain of Sarnia are here on a visit to the latter's sister, Mrs. Alex. Thompson.

Mrs. W. D. Cargill and the Misses Juanita and Phylis are visiting in Toronto this week.

Rev. and Mrs. Almack spent the week-end with the latter's parents at Tobermory, her two brothers of the 160th being home on their last leave.

Sgt. Connell of the 160th Batt., formerly G. T. R. agent at Pinkerton, was in the village on Tuesday bidding farewell to his friends.

Corp. E. A. Garland, Signallers H. Young and N. Pegelo, and Ptes. W. Grainger, Jack Hamilton, Wm. Brownscombe and Hunt of the 160th Bruce Batt. London, spent the week-end here, it being their final leave. On Monday evening the citizens of the village and community gave a banquet in the C. O. F. Hall and after justice had been to the inner man, the chairman, Mr. W. D. Cargill M. P. P., introduced the following speakers: Senator Donnelly, Rev. R. M. Gale, C. W. Keeling, Wm. Matthews, W. J. Loughleen, John Clancy sr., R. A. Fowlie and Geo. Sirrs, the Pinkerton orchestra supplying the musical part of the programme which was much appreciated. Each of the boys in khaki was presented with $5 in gold and a pair of socks from the Red Cross Society. A large crowd was at the station on Tuesday afternoon to give the boys 'Good-bye', safe journey and hope a safe return. It was regretted that all the boys could not be present but a similar banquet and presentation will be given the remaining ones who arrived yesterday before they return to London.

Messrs. Sirrs, Saunders, Leask and Needham were in Tara on Tuesday.

Mrs. R. McConkey and family are on a visit with friends in Walkerton.

Mr. I. Shoemaker and family of Paisley were in the village on Sunday. If it had not been Sunday we certainly would have had the down on the bowling green for a game.

Mrs. D. Donnelly and Mrs. M. J. Kenny of Denver, Col. are visiting with the latter's sister, Mrs. Joseph Clancy.

Miss Ward of Walkerton is visiting with her aunt, Mrs. M. Boeter.

GLAMIS

Mr. and Mrs. R. J. Nesbitt, and Mr. and Mrs. Dan A. McLean, motored to Owen Sound on Saturday and spent Sunday with Mr. and Mrs. Roulston.

Miss McGregor, nurse who nursed the late Allan McKinnon, returned to Kincardine this week.

On Friday night, a special train from London brought home a number of the 160th. Bruce Batt. Boys. Those who arrived at their homes here were—Privates—Edgar McAfee, John Thompson, Albert Groves, Archie Matheson, James Thompson, Neil McDermid, Torrance McLennan, James Aymon, Joseph Sproule, Archie McLeod, Lorne Reid, Hugh Sproule, Will Patterson, Will Stanley, and John Kitchen.

On Monday evening the boys were entertained by a community gathering in the Basement of St. Pauls Church, where a very enjoyable evening was spent in music, games and refreshments followed by a good programme. All joined in good wishes for the boys' safe return among us again. The boys return to London on Wednesday of this week.

Miss Tessie Patterson has been renewing acquaintances in Paisley for the past week.

Miss Reta McKinnon spent the week end with her friend Miss Storrar Elmwood.

Miss Daisy Cronin Sundayed with her brother Lieut. Cronin of Kincardine.

Miss Ada Cunningham is spending some time with Mrs. Dan Cameron, 5th. Con. Kincardine.

Rev. and Mrs. De Mille have been visiting friends in and around Hamilton.

A number from here attended Paisley and Ripley fairs last week.

Mrs. Alex McKennitt entertained "The Epworth League" of Purdys' Church on Friday evening.

Mrs. George Reynolds and family of Toronto are visiting relatives and friends in the Tenth of Kincardine.

Miss Dora Oliver of Winnipeg who has been here for a couple of months left on Friday. She will spend a few days in Toronto.

Mr. and Mrs. Norman McLeod (Nee Miss Mable Downey) of Niagara Falls are spending a few days with their parents on 2nd Con. Bruce.

Mrs. (Rev.) D. McIntyre and family returned to their home in Toronto on Friday.

Mrs. McDonald of Detroit Mich. is a guest of Mrs. Thos. Spear.

A gloom was cast over this community on Saturday night when it was learned that Mr. Allan McKinnon had passed away at his home Lot 29 Con. 11 Kincardine Township that evening at the age of 72 years.

Mr. McKinnon underwent a very critical operation about three weeks ago and no hopes were held out for his recovery, when lingering so long, all were in hopes he would rally. All that medical help could do was done for him.

The deceased has lived on 10th. Con. Kincardine for a great number of years and has always been found a true christian man and a very kind neighbor, and friend always ready and willing to help anyone. He will be greatly missed the home and neighborhood and also in the Baptist Church here, where he was a faithful member, and helper for many years. Besides a sorrowing wife, he leaves to mourn his loss one son Charles, and two daughters, Misses May and Lily, who reside at home. Two brothers John of 10th. Con. Kincardine, and Hugh of Minto Man. The funeral which was held on Monday afternoon to Tiverton cemetery was largely attended showing the high esteem in which the deceased was held. To all who mourn his loss, deepest, heartfelt sympathy is extended.

PINKERTON

Miss Currie and her niece Miss Isabel Currie returned to Collingwood after visiting Mrs. A. Pinkerton and Mrs. McKee.

Miss Mertie Donnelly went to Toronto on Monday to attend University.

Pte. Gordon Garland spent last Wednesday at his home and attended Paisley Fair.

Mr. James Gale returned to Toronto on Monday to resume his studies at Knox College.

Mr Howard Birrell of Toronto visited his father and mother here the first of the week.

WESTFORD

Mr. and Mrs. J. Cassidy of Greenock visited at Mr. T. Fallon's on Tuesday.

Mrs. Wm. James of the 10th con. spent last week with her daughter Mrs. Joe Hall.

Nurse McDermott who has been attending Charley Murray, returned to her home near Lucknow on Monday.

Mr. and Mrs. P. Linahan visited Mr. George Kraemer's on Sunday.

Mr. and Mrs. Wm. Wall and Mr. J. Hanna motored to Kincardine on Friday.

Mrs. Dan Murray has returned home after attending the funeral of her sister Mrs. Fitzmaurice of Bracebridge.

We are pleased to report that R. J. Lloyd and Charlie Murray who have been sick are getting quite well again.

FORMOSA

Mr. and Mrs. Ed. Massel returned after spending a two week's holiday at points in Michigan.

Mr. and Mrs. Hugh O'Neil of Kitchener are visiting with the latter's mother Mrs. Ambrose Zettel.

Alf Knoll and Frank of Toronto are in town owing to the illness of their father Mr. Julius Knoll.

Mr. and Mrs. Fedy and family and Mrs. J. Fedy motored to Walkerton on Saturday.

Mrs. Fedy sr. who has been very poorly, is reported to have almost fully recovered. Mrs. Fedy shows remarkable activity for a lady who has passed the ninety mark. In spite of her years she sometimes walks up the big hill as often as three times a day.

Two approaching marriages were announced from the pulpit here on Sunday morning, Miss Georgina Meyer eldest daughter of Aloysius Meyer of Formosa, to Mr. Herb Beninger of Formosa, and Miss Lavina Meyer, youngest daughter of Mr. Martin Meyer of Mildmay to Mr. Henry Fedy of Formosa.

HANOVER

Wm. Meuser of Brant had 160 colonies this spring and 208 before the summer was over. They made 23,000 lbs. or 11½ tons of honey for him. At the present price of 12½c per lb., it means receipts of $2,875 with an expenditure of about $600 leaving the net receipts $2,275 which is a splendid showing for the busy bees.

Mr. Henry Cross of Louise has bought Mr. Ross Young's interest in the hardware firm of Young & Cross here, and the new firm will be known as H. Cross & Sons. Mr. Cross has sold his 200 acre farm at Louise to Mr. Tom Brigham of Allan Park.

The casuality list last week announced that Pte. "Teddy" Harrison of Hanover was wounded. He was attached to the artillery. Harrison, who was an old country man, was employed at the cement works while he was in Hanover. He was about 35 years of age, and a bachelor.

M. C. Beckett, license inspector of Grey County, was in Hanover this week on his initial visit to the local hotels. He told the proprietors that he wasn't here this time to "see" anything but just to get acquainted. He said that he would come again, perhaps late at night, perhaps early in the morning, perhaps in broad daylight, and he cautioned the local hotel keepers to run their houses according to Hoyle. He said he intended to enforce the law to the letter. The local hotel keepers rather liked his open and above board introduction.

Mr. John Metcalfe of Bentick Township, who has been seriously ill for the past three months, was operated on on Monday, Sept. 25th by Dr. Groves of Fergus and Dr. Taylor of Hanover. The anaesthetic was given by Dr. Jamieson jr., of Durham. Mr. Metcalfe is now resting quietly and it is hoped that the operation will relieve the trouble.

Mr. R. M. Macpherson, accountant at the Merchants bank here for a year and a half, has been appointed manager of the branch at Chatsworth rendered vacant by the death of Mr. Jas. McDonald.

A pretty wedding took place at St. Mathew's Lutheran church here on Sept. 20th, the principals being Miss Marie E. Weitendorf, daughter of Mr. and Mrs. Fred Weitendorf, and Mr. David Plantz, son of Mr. and Mrs. John Plantz, both of Hanover. Rev. Mr. Denef performed the ceremony.

A Hanover young man named Bill Berry performed a hair-raising stunt that for sheer nerve was without parallel in the history of the town. Berry who has had some experience with high trestle-work, made a wager with Dave Schwark that he could stand on his head on top of the nob of the stand pipe which is about 175 feet from terra firma. And while a couple of hundred excited Hanoverians looked on, some in the vicinity of the stand pipe and some down street, Berry won his wager, pulling off his astounding and foolhardy feat by standing on his head and then some. An American tourist passing in his car at the time, stopped and took Berry's name and address, and told him that anyone who had sufficient nerve to perform stunts like that was wasting his time in Hanover.

PUBLIC SCHOOL REPORT

Honour Roll Of Pupils At The Walkerton Public School For The Month Of September.

GRADE VII

Senior IV—Honours—G. McCarter, G. Miller, E. Cryderman.

Pass—W. George, H. Paull, A. Bolden, V. Bush, A. McCartney, V. Kimble.

Nyals' Blood Purifier

"Purifies the Blood"

"Nyals' Blood Purifier" means pure blood. Try it and you will be convinced. Boils, sores, pimples, skin diseases and rough skin indicate impure, thin blood.

"Nyals' Blood Purifier" purifies and enriches the blood, driving out the poisonous materials that produce such disagreeable symptoms.

Got a bottle at our store; we recommend it because we know what is in it—and every Nyal remedy is good.

Mr. Thomas Pepper, a farmer of the 2nd con. of Elderslie died on Friday last from typhoid fever. The deceased who was about 40 years of age, was a nephew of Mr. Alex Rae of Brant.

Movieland had a full house Tuesday for the great war pictures "Britain Prepared." The films were brought here at great expense by the management and were well worth the extra admission fee charged.

Mrs. John C. King returned this week from Denver where she had been visiting her son, Dr. King, and is now staying with her daughter, Mrs. H. M. Lay. Her son, Hon. W. L. McKenzie King, accompanied her on the journey, returning home to Ottawa on Tuesday.

Ladies in town and country will help the committee by contributing—Home made baking—candy—fancy work—vegetables—fruit and cream. The committee will be at the Town Hall on Wednesday afternoon Oct. 18th. to receive contributions.

At Mr. John Rowland's suggestion the 160th Band paid a visit to the House of Refuge on Friday morning and gave the old people a few selections. Speeches were made by Mr. Rowland and Mr. Frank Rennie. The inmates appreciated very much the kindness shown. Some of the old folks began to dance to the music one old gentleman was moved to start singing "Auld Lang Syne" which the band promptly took up.

BORN

O'HAGAN—At Chepstow on Friday, October 6th. to Mr. and Mrs. Thos. O'Hagan, a son.

PLETSCH—In Walkerton, on Wednesday, October 11th, to Mr. and Mrs. Henry Pletsch, a son.

LEAVE LONDON SATURDAY

160th Bruce Battalion Receives The Word To Move Overseas—Boys Given A Warm Send-off While Home On Last Leave The Past Week.

The past week marked an important epoch in the life of Bruce County. It was the last leave-taking of the Battalion, which goes to represent our County on the battlefields of Europe. Few families have been untouched by the sacrifice of the County's best youth and spirit represented in the formation of the County's own battalion which goes forth gladly to battle for a righteous cause. Not only in the homes, but here and there in every community, public gatherings were held to give the boys a fitting farewell. In Walkerton, and in some other places, gold pieces were presented to the boys as tokens of public appreciation, and every effort was made to show the boys the pride and appreciation which everybody feels.

On Thursday afternoon which was proclaimed a half holiday by the mayor; a program of sports was given at the exhibition grounds. There was a fairly good attendance, the gate receipts, charging an admission of 10c to adults, only, amounting to over $65.00. The baseball match between the Batt. and the town team resulted in a victory for the latter. After the match, Major McNally put the soldiers present through several movements and to say the least the boys have improved greatly since leaving Walkerton and their marching and drilling were fully up to the expectations of the crowd, and it was easily seen why they were declared 99% perfect. This was followed by races, the program being concluded about 5.30.

The town hall was packed to the doors on Thursday evening of last week, when the people of the town met, to bid farewell to our soldier' boys, and to witness the presentation to each on behalf of the town of a five dollar gold piece. Long before the hour set for the commencement of the program, both the gallery and the floor of the hall were crowded and scores of people were turned away. The collection which was taken at the door amounted to $51.50.

The first number of the program was the opening chorus, of the minstrel show which was put on in the hall last winter, with Mr. E. H. Leeson as conductor, and although a great many of those who took part at that time have since left town, it was well rendered and appreciated by the audience.

The Chairmaner, Mr. John Rowland, who is Chairman of the local Bruce Preparedness League then addressed the meeting. Mr. Rowland said he was greatly pleased with the attendance and was glad that so many had turned out to bid farewell, perhaps for the last time, to the boys who were making such great sacrifices to go and fight for King, Empire, home and loved ones. After heaping much praise on the boys, congratulating them on their excellent showing as a battalion etc., he concluded his remarks by urging them not to forget their wives, mothers and sweethearts and to write

(Continued on page 8)

James McCallum Wounded

Mr. George McCallum of Brant had word on Saturday that his brother, Pte. James McCallum, had been admitted to the General Hospital at Hardelot, England, seriously wounded. Pte. McCallum enlisted at Prince George, B. C. Later he was transferred to the 15th Batt'n (48th Highlanders). He had been in the trenches since April.

+ + +

Killed In Action

Tuesday's casualty lists reported another Walkerton boy fallen in battle. Sergt. Harry C. Wade enlisted at Calgary going to England with the first Canadian Contingent. Although he had been in the trenches almost since the beginning of the war he had previously escaped unwounded. Harry was a fine big strapping fellow about 35 years of age. He was a South African veteran and was on the Toronto police force force for some time. His next of kin is a brother, Judge Frank Wade of Cleveland, Ohio.

+ + +

Off Again, On Again.

The war bulletin service was discontinued last week, Mr. McNamara not receiving sufficient support to justify its continuance. To date he is some forty odd dollars out of pocket, to say nothing of the time and trouble he has taken every day merely to oblige the public. On Monday Mr. John Rowland stepped forward and offered to be the "next victim" in order to have the war news again. Mr. Rowland has guaranteed $10 a month from now on to cover the expense of the service, and also to pay his share of the back deficit. All who wish to share the expense, may do so by leaving thirty cents a month or more at the Telegraph Office. Thirty cents is the average price of a despatch. The forty dollar deficit should also receive attention from those who have enjoyed the service without sharing the expense.

SIXTY YEARS WEDDED

Walkerton Couple Pass The Diamond Jubilee Anniversary Of Their Marriage Which Took Place On Oct. 3rd, 1856—Have Lived In Walkerton Half A Century.

Sixty years ago in the village of Embro, Oxford County, Ontario, Rev. Donald McKenzie united in the holy bonds of wedlock, a young Scotch couple, Mary McDonald and George Ross. On Tuesday of last week the aged bride and groom, Mr. and Mrs. George Ross of Walkerton, observed the sixtieth anniversary of that happy event. Great changes have been wrought since that time but the couple are still spared to each other with a remarkable degree of good health considering their years. Their four daughters gathered here for the occasion, but as the day was also the first anniversary of the first break in the family circle, there was no celebration of the event.

Both Mr. and Mrs. Ross were born in the same county, Sutherlandshire, Scotland, of that sturdy Highland stock whose rugged character has made its impress on Canadian citizenship. Both came with their parents in childhood to this country, settling in the township of West Zorra where so many of the early Scotch settlers hewed out for themselves a new home in the wilderness. George became apprenticed to a blacksmith at Beachville in early youth and later worked at his trade near the old home in the village of Embro. Ten years after their marriage, Mr. and Mrs. Ross came up to Walkerton. That was in '67, the year that the County buildings were being built. Walkerton was according to Mr. Ross' recollection a sorry place and not much of a town. There were two store keepers here and the farmers drew all their grain away to Seaforth, Guelph, Kincardine and other points. Mr. Ross started a blacksmith and wagon making shop near Silver Creek at the Western end of the town and there he conducted business for many years. In the life of the Community he has had a quiet part, making his influence felt at all times for good citizenship. He has been a life-long member of the Presbyterian Church and became a reader of the Globe with its first issue.

Of the family of six children who grew up around them into manhood and womanhood, five remain:—D. D. Ross of North Dakota, Mrs. Tyndall of Woodstock, Mrs. McNeil of Oakville. Miss Janet Ross of the Registry Office and Miss Mary Ross of the Public School Staff. The first death in the family circle occurred on Mr. and Mrs. Ross' wedding anniversary last year in the death of their daughter, Bessie, Mrs. J. O. McFarlane of Edmonton.

Mrs. Ross is still bright and active. Her husband enjoys the use of all his faculties with the exception of sight which has failed with advancing years. That they may live to enjoy good health and to celebrate further happy returns of their wedding day is the wish of all who have enjoyed the acquaintance of this estimable couple.

Little Girl Hurt

As the crowd was returning from the military games at the Fairgrounds last Thursday afternoon, a little three year old girl, daughter of Mr. Sylvester Reinhardt, was knocked down and run over by an auto, her leg being fractured. The accident happened at the crossing in front of the post office and the autoist, who is well-known, did not stop the car but kept right on going. He may find himself in serious trouble over the affair.

+ + +

Pte. Lynch Wounded

Mr. Otto Klein had a telegram from Ottawa on Saturday stating that a young man named John Lynch, who made his home with Mr. Klein before the War, had been wounded in the right leg. The telegram stated that he had been admitted to No. 4 Northern General Hospital, Lincoln, England, on Sept 29th. Pte. Lynch enlisted with the 71st Batt'n but was transferred to the Mounted Rifles after arriving in England.

+ + +

New Act Gets 'Em

In spite of its one important shortcoming, the new Ontario Temperance Act is already winning respect as a bit of effective legislation. At Port Elgin last Saturday four citizens who figured that they had made a monkey of the new Act, received a surprise that took their breath away. The four were charged by License Inspector White with being drunk. Each swore that he had seen a bottle of liquor in the rear of a store and had taken a drink without any invitation. They denied point blank that they were intoxicated and then sat back expecting the case to fall through. On the advice of the prosecuting attorney, Mr. O. E. Klein, Mr. White laid a second charge under section 47 of the Act, which prohibits drinking any place except in one's own private residence. Three of the defendants were found guilty under this clause and paid $50 and costs each.

NEWS ABOUT TOWN

Mr. E. I. Pengelly spent a few days at London last week.

Miss Ethel Cyderman returned to Toronto on Tuesday.

Mr. Jack Wells of Toronto spent the holiday with relatives here.

Mrs. Pentecost of Toronto, visited her mother, Mrs. Winter this week.

Mr. Lamont, Mathematics Master of the High School, and his bride, arrived in town on Monday evening, and are taking up residence in Mr. Attwood's house on Colborne Str.

Mr. Alex. McDonald, plumber with Patterson Bros., who was married recently to a Chesley young lady, Miss Annie Clark, has taken the flat formerly occupied by Mrs. Erdman on Jackson St.

Naaman Wright, a former employee at Mr. E. J. Skelton's Marble works, visited Mr. Skelton one day last week. Wright was a member of a Canadian Pioneer Batt. and was recently invalided home.

Mr. and Mrs. John Brewster and Miss Jessie Brewster of Carrick Township, and Mr. and Mrs. Ben Kerwin of Clifford motored up to Walkerton last Thursday to call on old friends and see the soldier boys.

Mr. Morrison, direct from the Edison Laboratory will furnish vocal and instrumental music during the afternoon also the music for the dance in the evening. The new Edison produces music with all the warmth and beauty of the original. A real musical treat awaits those attending. Gentleman 50 Ladies, 25 cents for the dance. Dancing to follow Hospital bazaar to begin at 9.30, music furnished by the New Edison.

Shooting season opens Monday.

Country Correspondence on pages 3 and 8.

Mike La France was home from Guelph over Sunday.

Fred Kenny of London spent Sunday at his old home here.

There will be many attractive booths at the Hospital bazaar.

Vic Obrecht was home from Toronto for Thanksgiving Day.

The ring booth is a novel attraction at the Hospital bazaar.

Mr. Armand Whitehead was home from Toronto for the week-end.

Miss Alornia Beechie of Toronto, is the guest of Miss Collette Jarvis.

Master Guy Ramsey had his face badly bitten by a dog on Saturday.

Mr. George Clark and Miss Roland of Toronto were Sunday visitors here.

Mr. C. B. Schnurr spent Thanksgiving Day with his son, Ed. in Orangeville.

Miss Isabelle McCallum of Toronto spent Thanksgiving at her old home in Brant.

Do not miss the cabbage and pumpkin booths at the Hospital bazaar—Thurs. Oct. 19th.

Miss Tourek, matron of the County Hospital, has been visiting her old home at Toronto.

Mr. and Mrs. Hepburn left on the afternoon train yesterday for their new home at Montreal.

Miss C. M. Churchill, who has been visiting Mrs. John McCool, returned to her home in Windsor this week.

Mrs. Wm Lake who was operated upon at the County Hospital, returned to her home at Durham this week.

Two Lucknow soldiers, Ptes. Andrew Habick and Clarence Donald, were reported yesterday Killed in Action.

Mr. and Mrs. T. E. Attwood have moved into their new Flat in the premises formerly occupied by the Business College.

Mr. and Mrs. Doughty and children of Guelph were Thanksgiving Day visitors with Mrs. Martin Kerney, West Ward.

Mr. N. Crawford had word on Tuesday that his daughter, Mrs. Geo. H. Kilmer of Toronto, had arrived safely home from England.

Miss Nellie Blue, who has been a domestic at the County Hospital the past eleven years, was removed to the House of Refuge this week.

Mrs. Hayden and children of Wingham visited her mother, Mrs. Forbes Clark, this week. Mrs. Clark returned with her daughter to Wingham.

The insane person who was brought down from Kincardine Tp. last week was removed from the County gaol to the London Asylum yesterday morning.

Miss Myrtle McCallum who has spent the past two weeks at the home of Mr. W. G. McCallum in Brant returned to her home in Chicago on Tuesday.

Mr. James Whitehead was summoned to Guelph last week to see his brother, Mr. George Whitehead, was seized suddenly with apoplexy, but is now recovering.

Mr. Tony Kritz, who has been at the County Hospital with a broken knee cap for some time returned to his home at Chepstow on Saturday. He is reported to be improving.

James Dalton, an aged inmate of the House of Refuge was taken ill with obstruction of the bowels on Saturday. He was operated upon at the County Hospital on Wednesday morning and is reported to be doing well.

Mr. W. J. F. Ross of Forest motored up on Saturday bringing along with him Dr. and Mrs. Huffman who spent the week-end with Mr. and Mrs. E. H. Leeson, and Miss Kate McCahill, who visited her uncle Mr. Geo. Ross. Mrs. W. J. F. Ross is still visiting her parents, Mr. and Mrs. R. H. McKay.

OUR LIST IS GROWING

Instead of decreasing, the Telescope's subscription list has been apreciably growing since it was necessary to increase the rate and during the past few weeks we had the pleasure of receiving, besides renewals, quite a number of new subscriptions at the $1.50 rate and several to the United States at the $2 rate, and not the slightest objection was made in any case. It is our experience that an intelligent public appreciates a bright, newsy, local paper, and is willing to pay a fair price for it. The Telescope at $1.50 is good value and at that price there is less profit in it for the publisher than at $1.00 a few years ago.

$1500 FOR RED CROSS

Public Meeting Of Brant Township Citizens Unanimously Requests Township Council To Vote That Amount—Local Branch Of The Bruce Preparedness League Organized.

The people of Brant held an enthusiastic meeting at the Township Hall on Monday night. It was called by Reeve R. S. Nesbitt to organize a local branch of the Bruce Preparedness League, and to consider ways and means of contributing to the British Red Cross Society. A crowd which was thoroughly representative of the Township responded to the Reeve's call.

Reeve Nesbitt occupied the Chair and first called upon Mr. John Rowland of Walkerton, a vice president, to explain the aims and object of the League which he did very thoroughly. Others who followed included:—Messrs Frank Rennie, John Clancy, M. L. Ziegler, D. Willoughby, W. Tulloch, G. McCallum, Deputy Reeve Archie Weir, Coun Johnston, Coun. Greig, Jas. A. Lamb, Coun. W. A. Rowand and others.

The meeting approved heartily of the idea of forming a local branch of the League and elected the following officers:—Chairman for Brant and vice president of the Bruce Preparedness League, Mr. Frank Rennie, Sec.-treas. Mr. James A. Lamb. Committee:—Sub. div. No 1—Ed. Tolton, Alex McLennan, Wm. Abell, Mrs. R. Waechter. No 2—W. T. Ellis, Wm. Kirstine W. J. McNally, Mrs. Bessie Rowand. No 3—Albert Cook, James Mawhinney Henry Tanner, Mrs. Jas. Mawhinney. No 4—John Clancy, Jas. Garland Mr. Ziegler, Harry Young, Mrs. James Alexander. No 5—J. M. Hopper, R. Purdue, Thos. Desmond, Mrs. John Seller. No 6—Johnston McCartney, George Fiddis, George McCallum, Mrs. Johnston McCartney. No 8—John Wright, Andrew Milne, Wm. Birwith Mrs. J. Schwindt. No 8—James Garner, D. Willoughby, Wm. Ginnis, Wm. Chesney, Mrs. M. C. Chesney. No 9—Ed Threndyle, Arch. Weir, Pat. McGarity, Mrs. Pat. McGarity.

A motion was put to the meeting and carried unanimously that the Township Council be asked to subscribe $1500 to the British Red Cross. This was done in response to Reeve Nesbitt's request for an expression from the public meeting regarding what the township should do towards Red Cross

Mr. John Clancy said he would like to take up a subscription the same as last year in the Cargill neighbourhood for the work carried on by the Cargill Ladies' Red Cross Branch. The meeting agreed to this being done.

Lecture To Teachers.

In his lecture on Libraries for the Blind and returned blind soldiers, to the Teachers' convention at Chesley, on October 19th and 20th, Mr. Swift will be accompanied by Corporal Veitz, a returned soldier who was made blind by a German bomb.

Walkerton Student Wins

We understand that the prize given by Mr. M. H. Halliday of Chesley for the pupil of Bruce County writing the best Entrance papers is to be awarded to Master Norman Shaw, son of Mr. and Mrs. W. M. Shaw, who headed the list in East Bruce. As he and a candidate from West Bruce were very close, arrangement was made to have the two papers re-marked by an outside School Inspector, with the result the clever young Walkerton Student wins.

+ + +

Soldier Wins Bride.

A Bruce Batt. romance ended in happy wedlock at the Methodist Parsonage on Wednesday October 4th. when Miss Matilda May, only daughter of Mr. and Mrs. S. Childs of Eden Grove was united in the holy bonds of matrimony by Rev. C. W. Cosens to Pte Alfred Edward Stewart of the 160th. Battalion, formerly of Port Elgin. The bride was daintily attired in white while the groom wore his full military uniform. The happy couple left on the evening train for Eden Grove where the bride will reside with her parents during her husband's absence at the war. All join in wishing the groom a safe return and the young couple a happy voyage over the matrimonial sea.

Death of Mrs. Donald Ross

Mrs. Donald Ross, an old and respected resident of Walkerton, passed away on Thursday evening last in her 80th year. She had been crippled with rheumatism for many years and latterly made her home with Mr. and Mrs. J. E. McGregor, from whom she received every kindness. Mrs. Ross was a native of Scotland, coming to this country in her eighteenth year. She had no family. Her husband predeceased her many years ago. After his death she left the farm in Greenock and resided in Hamilton. Twenty-five years ago she came to make her home in Walkerton. The funeral was held on Saturday afternoon, the remains being interred in Greenock Cemetery.

GREATEST GALLANTRY

Displayed by Pinkerton Boy, Lieutenant Reid, who Went Out to Rescue Wounded Comrades and has Since been Missing — His Name Submitted for Recognition.

Mr. Adam Reid of Pinkerton had the following letter from Lieut.-Col. Kimball, commanding officer of the 51th Batt. regarding his son, Lieut. A. E. Reid, who was reported missing since September 17th.

Flanders, Sept. 18th.

"I regret to inform you that Lieut Reid has been reported missing after a raid on a German Crater. He was seen in our trenches after the return of the raiding party. One reports having seen him go back over our parapet and it is presumed that he had heard that some men were left behind wounded and went in search of them. These men were brought in by another party but nothing was seen of your son. As soon as it was known that Lieut Reid was missing I had the space between our trenches and the Germans, as well as the open ground and unused trenches in rear of our own thoroughly searched, in case he might be lying wounded in some shell hole or depression. This has been done as far as possible by day and on the successive nights. Lieut. Reid behaved with the greatest gallantry during the raid for which his name has been submitted for recognition. I can assure you that we have done all we can possibly think of to find him. I personally felt greatly distressed at the failure to find him, if wounded, but still hope that he may be heard of. He was a most gallant officer and a man of sterling character.

OUR HIGH SCHOOL AND PATRIOTIC WORK

Editor Telescope,
Walkerton.

Dear Sir:—

On Monday evening of last week, at a public meeting in the Town Hall, one of the speakers gave expression to the opinion that our schools were not doing their duty as regards patriotic work, and teaching the history of the war. With your permission, I wish to make a brief statement of what the High School has done in this connection.

From the outbreak of the war, it has been our endeavour to have our pupils do what they could to help on the good work, consistently of course, with a due regard to their studies. Within the last year, one of our ablest lecturers was secured to deliver a lecture—to which the soldiers were admitted free—and the net proceeds, $78.00, was given to Canadian Red Cross Funds. The scholars contributed liberally to the British Red Cross on Trafalgar Day, and last week to the Edith Cavell Memorial Statue Fund.

The Cadet Corps has responded to numerous calls—distributing the literature for last Trafalgar Day; selling tickets for patriotic entertainments; taking a leading part at various entertainments; and appearing in many processions in honour of our soldiers.

The girls have aided in the work of knitting socks for the soldiers; in selling tickets for several entertainments; and selling flags on Tag Day of last year.

The history of the War has formed an important part of the history teaching, being taught in all classes.

Hoping that the above statement may, remove any misconception on these matters,

I am,
Yours sincerely,
J. Morgan.

Walkerton, Oct. 10, 1916.

Public Meeting

A public meeting of Citizens will be held at the Town Hall next Tuesday evening, Oct 17th at 8 p. m. to organize for the Red Cross Campaign. Capt. (Rev) J. R. Patterson will speak and there will be a short program. All Citizens are urged to come.

Something Stirring

It's a bit early to predict who will be up for municipal honors in Walkerton the coming year, and yet things are beginning to shape themselves. Mayor Lippert, going on the principle that "enough is quite sufficient" has more than once signified his determination to withdraw and give the other fellow a chance. Reeve McNab, who has now sat five years in the Council, will probably be a candidate for the Mayoralty, and will be opposed by Andy F. Johnston, who was only a few votes short of landing in the Mayor's chair last New Years. For the Reeveship, the veteran Councillor, John Douglas, will be in the field, and will probably have Coun. George Lettner as opposition. The "green hands," Couns. Russell and McCarter, will be up for re-election. These men will do better work after the experience of one year at the Board. Both have shown themselves determined to stand on their "own bottoms" and be nobody's fool—a quality which the people appreciate.

AN EVIL HERITAGE

"That evening, as I was on my way down to dinner I was met by Daisy coming up the staircase, already dressed in her white evening dress. Her face was almost as white as her dress, and without saying a word she held towards me a piece of paper. I took it from her and beheld a half-finished sketch of a horribly lean giraffe in knickerbockers (I had been in knickerbockers that afternoon) politely escorting a delightfully plump partridge that clung lovingly to its arm. 'Fragment of a modern menu,' was scribbled below in Jim's handwriting. And further: 'Entrees: Perdrix aux Champignons. Rots: Giraffe a la Knickerbockere.' Unfinished though the sketch was I immediately recognized my own features in those of the giraffe, and the partridge—was it possible? In spite of myself, I had almost begun to laugh, when, looking up, I read the answer on Daisy's face. As soon as she was able to speak, she said, just above her breath: 'This is your fault. It could never have happened to me except for you. This is the end of everything between us. I cannot go through life chained to a scare-crow. And my hat too—it's too bad!' She snatched the paper from my hand, tore it in two, and, without another word, left me standing alone on the staircase.

"It appeared afterwards that Jim, though rendered bold by his successes, had not been quite bold enough to show Daisy her portrait. He had dropped his portfolio on the way downstairs, and she had helped him to pick up the contents. It was thus that it had come about.

"Next morning Daisy left the house, and two days later I got a long and penitent letter from her. Not that she regretted her decision, but only the words in which it had been clothed. In this letter she begged my pardon for the mistake she had made. 'I thought I could do it,' she wrote, 'but I find I cannot. I was fond of you, Johnnie,' she further wrote, 'I am fond of you still, but I simply cannot stand being made ridiculous; and beside you I should always be ridiculous. You have every quality I should want in a husband; you are good, you are brave, you are high-minded, but you are—what shall I call it?—too baroque ever to be taken quite seriously.'

"At the expiration of my leave I returned to India. It was only by degrees, as I calmed down, that I began to understand how it had all come about. Daisy was not heartless; she was, on the contrary, a good little girl, with some fibre of pity in her nature which pushed her instinctively to take the part of the oppressed. Our meeting in the Scotch inn had fired her enthusiasm; but enthusiasm cannot last for ever, and the defiant attitude she had adopted towards the world in general could not fail to lose its charm. Of course the fragment of the modern menu had been the last drop in the bucket. It is possible, though barely possible, that she might have forgiven the insult to herself, but I do not think she ever could have forgiven the insult to her hat. I am not sure that I know of any woman who would have done so. And really it was too bad to have turned that beautiful, brand-new hat into the semblance of a stewed mushroom.

"It was dating from this chapter in my history that I began to shun my fellow-creatures. Now and again I believe I might have made a real friend, but I have grown suspicious and always missed the chance. I could not forget Daisy having said that it was impossible to take me seriously. It was this feeling that brought me to where I now am. To be District Magistrate at Cassacon is almost as good as being a hermit. I believe that Daisy consoled herself by throwing herself heart and soul into the cause of the African niggers. I suppose she found what she wanted, for she has been married to a missionary these twelve years past."

Mr. Hibbert was silent for a minute before turning to Marian.

"And now, Miss Berrincott," he asked, with a quaint smile upon his lips, "perhaps you can help me to settle the point between the tragedy and the screaming farce?"

Marian did not immediately answer. She had long ago given up looking about her and had been listening with all her might. Her hands were folded in her lap and her lips parted in breathless attention. Interest, indignation, and pity all struggled for the upper-hand. When Mr. Hibbert turned towards her, her first instinct was to repress them all. But immediately upon this feeling there followed the question: "How would Jess behave in my place? I don't think she could feel more sorry for him than I do, but she would let him see that she was sorry, and that would do him good." And after all, she further told herself, if ever she was to become a little more like Jess she must begin some time or other; and was not this the best possible opportunity for an experiment, seeing that Mr. Hibbert was a sedate, elderly person, and not a foolish young man, for instance?

"Mr. Hibbert," she said, a little awkwardly, and drawing a deep breath, "I —I should like to tell you how sorry I am, but, somehow I can't." She looked straight into his face, and to his astonishment he saw that there were tears in her eyes.

"Miss Berrincott! I didn't mean to distress you; you have told me already more than I need to know."

"No, no! I have not told you enough yet, I must tell you more. I want to tell you that I think everybody has been very cruel to you. And oh, Mr. Hibbert," went on Marian, gaining courage as she proceeded, for, after all, the thing was not nearly so difficult as it looked; "as for Daisy, I am simply furious with her; I think she was just a—a wretch."

"That is too hard upon her, Miss Berrincott."

"No, no, it isn't; it is no use your defending her. I know that if ever I cared for anybody in that way I should stick to him through thick and thin, and of course the more he had to bear the more he would need me. The idea of not being able to hold out against a sketch! Why, don't you see that it simply means that Daisy cared for herself and for her ridiculous hat more than for you! If I had been Daisy——"

Marian broke off in some slight alarm at herself. Were not her feelings of true sympathy, so newly let loose, carrying her a little too far? Most likely it would require almost as much practice to learn how to express one's sentiments as how to repress them.

Mr. Hibbert looked at her with questioning, incredulous eyes. Well would it have been for him if one of the beetles that hummed past his ear had whispered into it, that these words were not to be taken for more than they were worth. But his own narration had excited him, and Marian, with her ruffled brown hair and blue eyes on fire, was looking very lovely, and the magic of the forest worked its part, no doubt, so that between all these causes it came about that hope was at this hour born in John Hibbert's heart. A very faint and very doubtful hope, and yet as different from the despair that had accompanied him till now as daylight is from darkness or life from death.

"Is there not some new noise among the branches?" asked Marian as Mr. Hibbert did not speak.

They both lent ear for a moment; and, sure enough, up there among the leaves, there was something like a soft pattering, and now that they came to look about them with more attention, they realized that it had grown much darker than it need have been at this hour.

"It is raining," said Mr. Hibbert, rising quickly; "there is not a moment to lose."

As they hurried down the steep incline as fast as creepers and tree-trunks would allow them, shouts greeted them from below. They had been missed and were being searched for.

"Here are both the babes in the wood," called out the doctor, who was at the end of the scouring party.

"And together," said Miss McCrie to herself. "We have sent on the fever-patients," she explained to Marian, "so as to get them under shelter as quickly as possible."

The two hours that followed were always remembered by Marian as two of the most hurried and moistest hours of her life; and when at length in the falling darkness, Lot 13 was reached, she was wet through, in spite of shawls and waterproofs.

A day of this sort seldom closes without various backward glances being thrown on its events, and various reflections, more or less interesting, being made on their results. Although this day was no exception to the rule, yet the reflections of some of the members of the party are not worth recording. Those that seemed to call for preservation have been noted here below.

Miss McCrie's reflection as she cantered homeward was:

"I wonder whether I am going to have a second couple on my hands? That little excursion into the forest looks most delightfully promising."

Mr. Hibbert said to himself:

"I certainly have never seen her so much moved as she was today by my story; and, at any rate, it is quite evident that I am not ridiculous in her eyes. Can it mean more than this? Nonsense, I have made one mistake in my life, and I am too old and too wise to make a second. And yet those signs of emotion in a nature as reserved as hers——"

Meanwhile Marian, while exchanging her wet clothes for dry ones, was reflecting:

"Of course it requires to be learnt, just as much as anything else; but I think I can say on the whole that my experiment has been a success."

Mr. Brook's reflection, while rolling up his linen coat into a damp ball and furiously hurling it into a corner of the room, was:

"I'm not sure, after all, whether I'd not rather be roasted than boiled!"

Jess' reflection was nothing but: "How happy, oh, how happy I am!"

CHAPTER XXI.

Marian's dreams on the night after the picnic were the reverse of soothing. Sometimes Daisy, mounted on a peculiarly steady mule would gallop past her mind's eye, and sometimes Jess, riding a giraffe, and with a mushroom hat on her head, followed closely on her heels. Now and then she would start wide awake, convinced that a palm had crashed down close beside her, and whenever she struck a match she was quite astonished to see how much of the night there still remained to get through. It was not until close to dawn that she fell at last into a heavy, dreamless sleep.

When she opened her eyes again it was broad daylight. "My morning walk!" was her first thought, as she sat up hastily in bed: "it will be too hot for my morning walk!"

But, strangely enough, the moment that she put her foot to the floor she became aware that she was not at all inclined for a morning walk. The mere idea of toiling up a hillside somehow made her shiver and sit down on the nearest chair.

"I wonder what can make my feet so heavy?" she reflected. "I haven't been swallowing any lead that I know of."

When she had slowly dressed, she dragged herself out on to the empty verandah where the wind was making the rocking-chairs swing with a sound as of ever so many babies being put to sleep. The remains of breakfast still stood about on the table there, but not a soul was visible.

"So father is gone already. I suppose he is not farther off than the sugar-works." But then she remembered that they were not boiling this week. Perhaps he had ridden somewhere with Mr. Ritchie, but Mr. Ritchie had spoken of going into town to-day on some business of his own, so that would not do either as an explanation. When Catharine, the black housemaid, appeared Marian put a question. Yes, the "Buccra" had gone off on horse-back quite two hours ago.

"And not with Mr. Ritchie?"

"No, ma'am; he quite by himself entirely."

"And you don't know whereto?"

"I can't say rightly at all, ma'am; praps Solomon be know."

But Solomon, in spite of his name, was not a bit wiser than anybody else, and knew only that the "Buccra" had breakfasted in a hurry and had called him some bad names because of his boots not being brushed, and had then ridden away without having said whither he was bound.

"He will be back for luncheon, no doubt," said Marian. "Bring me my tea."

But while she was languidly mixing tinned milk with her tea, a new idea came into her mind. Until this moment she had completely forgotten the incident of the Creole who had so very nearly persuaded her father to give up the picnic by taking a mule with a bad leg. Now she remembered it all again, and Mr. Rudd's grave words of warning came back to her mind. Coming from the sanguine Mr. Rudd the warning had a special weight.

Although she had not entirely grasped the history of that mule's leg, yet it was clear to her that if her father had gone to White Village he certainly had gone in the character of an avenging angel; and Mr. Brooke had talked of avenging angels having a bad time of it here.

Marian had given up mixing the tinned milk in her cup and was desperately asking herself what to do. Why, he had not even got a revolver, she was quite sure of that. Something must be done, but what? Send Solomon after him? But would Solomon go? Was it not more likely that he would gallop till out of sight and then lie down and bask in the sun? And supposing he went, would one single nigger with nothing more formidable than a stick in his hand be enough reinforcement against a mob of howling Indians? Oh, if only she had someone to advise her, some civilized Christian with a white skin! Even Mr. Ritchie would at this moment have been worth his weight in gold.

But nothing of all this appeared on her face while Solomon stood by, waiting for orders, and it was without any trace of excitement in her manner that, after a minute's silence, she turned to the black and told him to saddle a mule for her and another for himself.

"And tell Albert that he is to go, too," she added.

She had come to the conclusion that the only way of controlling the movements of the rescuers was to accompany them. As she went back into her room and looked out her riding skirt, all traces of languor had disappeared from her movements. If her feet were heavy she did not notice it now.

The riding-skirt was adjusted long before the mules were ready, but it was not destined to be required that day. Returning to the gallery with the intention—suggested by prudence—of swallowing the remainder of her tea before starting on the expedition, Marian was much surprised to find someone there.

"Mr. Hibbert!"

"I know this is not a correct visiting hour," he began, with a touch of constraint; "but as I am going back to Cassacon this afternoon, I thought I would look in upon your father, and at the same time inquire whether you are none the worse for your wetting, because, after all, you know——"

"Oh, Mr. Hibbert, oh thank heaven that you have come!" interrupted Marian, her face all aglow.

At the sight of him a tremendous weight had fallen from her heart. Since yesterday she felt towards him as towards an old and trusted friend, and, besides, did he not know the country and the people? If the choice had been given her, she could have selected no better counsellor in this hour of need than Mr. Hibbert.

Mr. Hibbert was so astounded that he made no reply.

"I am in such a difficulty, and perhaps you can help me—Mr. Hibbert felt sobered—"I am sure you can help me. It is about father"; and in breathless haste Marian proceeded to explain the cause of her anxiety. He let her speak without interruption. She was still speaking when he began to look about him for his riding-cane, which he had laid down on entering. When she drew breath he still said nothing, but made one step towards the entrance. Then he turned; every shade of constraint was gone from his manner now.

"And you say he is gone alone?"

"Quite alone."

"And has no revolver by him?"

"He doesn't possess a revolver that I know of."

"Then I had better lose no time: as for your going, that is mere folly."

By this time Mr. Hibbert had untethered his pony from the bread-fruit tree in front of the house and was in the saddle.

"Oh, Mr. Hibbert, and have you got a revolver?"

"Yes."

"And do you know the way to White Village?"

"Of course I do. You can send the black fellows after me, if they turn up in time; but, as for me, I'm off."

And Marian found herself standing alone on the steps, gazing after the emaciated figure of the rescuing knight, as it disappeared among the cane fields. At that moment she found nothing the least ridiculous about his appearance.

Captain Berrincott, meanwhile, was thoroughly enjoying his morning ride, entirely unaware of the alarm he had awakened and of the measures that were being adopted on his behalf.

It was a comparatively fresh morning, owing to last night's rain. Though bright sunshine lay over the cane fields, the mountains were still smothered in mist, and streams that had been mere threads yesterday were turned into angry and turbid mountain torrents. Fortunately for himself, as it afterwards appeared, the Captain lost a good deal of time in looking for convenient crossings to these miniature rivers, as well as in asking his way, so that the forenoon was far advanced before his destination was reached.

(To Be Continued).

Maybe It Happened.

A shabby-looking man and a thin little shaver of a boy were standing with their backs against a wall along the public way. The man had a shade over his eyes and a card hung in front of him, bearing the legend, "Blind and Deaf."

The boy had a smile on his face as he listened to the street organ over the way playing "Everybody's Doing It," and then started involuntarily to whistle the chorus.

The man turned savagely to him and hissed:

"Shut that warble off and slide that grin off your face, yer little monkey! D'yer want people ter think we're happy?"

SUNDAY SCHOOL LESSON

October 8, 1916. Lesson II.

Paul Before Felix.—Acts 24: 1-27.

Commentary.—I. The charges against Paul (vs. 1-9). There was no great delay on the part of the Jewish ecclesiastical system in bringing charges against Paul, who had been taken from the hands of his enemies in Jerusalem. Only five days elapsed from Paul's arrival at Caesarea before Ananias, the high priest, and others in authority came from Jerusalem to secure the condemnation of the apostle. They brought with them a professional orator, or pleader, to present the case before Felix, the governor. Tertullus began his speech by making remarks full of compliments to Felix, that he might win his favor for the cause he was pleading. He did not confine himself to the truth in his flattery, for history tells us that Felix was far from being the excellent character that Tertullus painted him. The charges against Paul, as the orator presented them, were threefold. 1. He was guilty of treason. 2. He was an enemy of the Jews and their religion everywhere. 3. He had defiled the temple at Jerusalem. One needs only to know the facts in the case to see how far Tertullus came from the truth in these charges. The Jews had no authority to execute Paul, and their only hope now, since their plot against him had failed, was to prejudice the Roman Government against him to the extent that it would judge him worthy of death. Tertullus declared that the Jews had undertaken to judge Paul, but Lysias, the chief captain, had violently taken him out of their hands. Those who had come from Jerusalem to appear against Paul sanctioned the statements of their speaker. It is probable that the writer has given us a mere outline of what was said by Tertullus and by Paul.

II. Paul's answer (vs. 10-21). 10. Then Paul ......answered—The prosecutor had finished his argument against Paul, and the Jews had given their endorsement to his plea. The tide would seem to have turned against the prisoner, but Felix was not carried away with the Jews' presentation of the case. The governor gave the sign to Paul to reply to the charges made against him. The apostle needed no attorney to plead his cause, for he was fully able to make his own defence. Many years a judge—Felix had occupied his present position six or seven years. Paul used no flattery in making the complimentary remarks in the beginning of his defence. I do the more cheerfully answer—He was pleased to present his case before a judge who had had years of experience in that office, and who had an understanding of Jewish affairs. 11. Because that thou mayest understand—"Seeing that thou canst take knowledge."—R. V. It would be easy to secure evidence to cover all that had taken place in the short time that Paul had been in Jerusalem. To worship—Paul's object in going up to Jerusalem was to worship the Lord, and this fact would be evidence that he was not guilty of the charges made against him. 12. They neither found me in the temple disputing—This was a direct denial of the charge that he was a "mover of sedition." Neither raising up the people—Paul had carefully refrained from doing anything to prejudice the Jews against him, and had entertained no thought of arousing the people against any measure or against any individual. The crowd in the temple area had been stirred up by the Jews themselves. 13. Neither can they prove the things—So certain was Paul of his ground that he challenged his accusers to substantiate their charges by credible testimony.

14 After the way which they call heresy—The first charge, that of sedition, was fully refuted, and the apostle proceeded to prove that he was not an enemy of the Jews nor of their religion. He was not guilty of heresy, for he worshipped the same God that they did, and he believed the law and the prophecies which they accepted as divinely given. Paul's interpretation of the scriptures was not the same as that of the Jews who rejected Jesus as the Messiah, and his belief differed further from that of the Sadducees, who denied the resurrection; yet he was loyal to the God of his fathers. 15. Which they themselves also allow—Paul is referring to the hope of the resurrection which he holds. Those of the Jews who held the same view were the Pharisees, the orthodox body of the Jewish people. Both of the just and unjust—The doctrine of the resurrection of the righteous alone can not be reconciled with this express declaration of the resurrection of the unjust.—Whedon. Speaking in the presence of Felix the apostle seems to have chosen words to touch the conscience of the procurator.—Cam. Bib. They shall be raised, "some to everlasting life, and some to shame and everlasting contempt" (Dan. 12: 2.) 16. Herein do I exercise myself—Paul referred to the worship and doctrines of the Jews. He made it the business of his life to worship the Lord and do his will. He set about it with diligence and would allow no other interests to interfere with his duty toward God and toward man. A conscience void of offence—He would not violate his conscience. Paul's argument was that one who would thus carefully live before God and man would not be likely to raise a sedition or to oppose the religion which he professed to observe. 17. I came to bring alms to my nation—For four years Paul had been engaged in collecting offerings for the poor in Jerusalem, and he came to bring the money and to attend the feast of Pentecost. 18. Certain Jews from Asia—Jews were at Jerusalem from remote places and some were there from the Roman province of Asia, which lies in the extreme western part of Asia Minor. These Jews had doubtless been Paul's opposers while he was laboring in and about Ephesus. Found him purified in the temple—The apostle was so far from profaning the temple that he was carefully observing its sanctity and acting in accordance with the law of Moses. 19. And object—The Jews from Asia had falsely accused Paul of bringing Gentiles into that part of the temple where only Jews were allowed, and they should have been at Caesarea to bear witness to the validity of the charges against Paul if they were able. 20. These same here—Those who had come from Jerusalem to appear against the apostle. While I stood before the council—When Paul made his defense before the Sanhedrin. 21. This one voice—The apostle had given forth the utterance concerning the resurrection and the members of the Sanhedrin were aroused and contended among themselves, some holding the same views as Paul did and some opposing them. Called in question—Paul was put on trial for declaring his faith in the doctrine of the resurrection of the dead. The apostle had clearly proved that he was innocent of all the charges that had been brought against him.

III. Two years' imprisonment in Caesarea (vs. 22-27). Felix was well enough acquainted with Jewish customs and Roman law to know that there was in reality nothing against Paul. He said that he would hear the full report of the case from Lysias when he should visit Caesarea. He commanded that Paul be held a prisoner with certain privileges. He had him before him repeatedly and Paul improved the opportunities he had to declare the truths of the gospel to him, and Felix trembled. However, Felix would have released Paul if he had received from him a bribe, but Paul would not stoop to such a sin and he was held a prisoner there for two years. During these years Paul had the privilege of receiving his acquaintances, and his friends were permitted to aid him with gifts and service. Felix retained his office for two years after Paul was committed to him as a prisoner. When he went out of office, he might have given him his liberty; but he wished to have the Jews' favor, therefore to please them he left Paul a prisoner when he gave place to Festus, his successor.

Questions.—Who came to Caesarea to testify against Paul? How did Tertullus begin? What charges did he bring against Paul? Why had Paul gone up to Jerusalem? How did Paul answer his accusers? What privileges did Felix grant Paul? Before whom was Paul summoned to speak of Christ? Of what did he reason? What was the character of his hearers? How did the truth affect Felix?

PRACTICAL SURVEY.

Topic.—Paul as conqueror.

I. Before his own countrymen.

II. Before a corrupt Roman judge.

I. Before his own countrymen. It was a most humiliating thing for the Sanhedrin to appear before Felix, a Roman judge, for the purpose of getting one of their own countrymen into their power. The statement of Tertullus was supposed to convey to the judge an impartial description of the prisoner and a just outline of his offence. It consisted rather of flattery for Felix, falsehood against Paul and mockery against the Nazarenes. The charges embraced political rebellion, heresy, sacrilege and disorder. Tertullus implied that the Sanhedrin would have judged Paul righteously if Lysias had not interposed. The accusations were met by Paul in a clear and bold denial, by a simple and candid statement of his position as a private and public man. Paul was loyal to the revealed will of God and to the rules of social relations of men. He began by selecting the only ground on which he could count himself fortunate in being tried before Felix. He could depend at least upon his acquaintance with the rites and customs of Judaism. In whatever he had to do, in whatever he was engaged Paul sought to act faithfully. He indulged Felix in no flattering complimentary titles. He respected his office and the existing order which it represented, but not the wicked man in the office. He spoke with freedom and boldness. He challenged his accusers to prove their assertions. His most concise way of conveying his view of the state of things to his judge was in a simple confession of his religion. The calm, heroic, lofty minded apostle rejoiced that an opportunity was given him to proclaim the gospel. He was not overcome by the danger of his situation. Paul showed triumphantly that what was criminal in the charge against him was not true, and what was true was not criminal. A straightforward account was his best defense. He confessed Christ. He served God. He reverenced the Old Testament. He believed in the resurrection. He maintained a clear conscience. He held that he was truly orthodox. There was no manifest excitement in his reply and no resentment. He made no plea for clemency. He was intent on accomplishing a sublime purpose, that of presenting the kingdom of Christ. He stood with his enemies at bay and the world beneath his feet, a conqueror and not a captive.

II. Before a corrupt Roman judge. Paul stood before the highest tribunal of Judea. His accusers were his countrymen. His judge was an unprincipled Roman. The scene was extraordinary. Though the prisoner at the bar, Paul seemed to exercise the functions of prosecutor, witness and jury, handing over his judge as a condemned sinner into the hands of the supreme Judge of all, while the judge was neither able to defend nor excuse himself. Felix was a poor trembling transgressor on whom the words of Paul fell like a death sentence. Many things conspired to give Felix opportunity of hearing and knowing the truth. Paul sought to enlighten his mind and to carry conviction to his judgment. Felix played with opportunity. He did not entreat Paul to point out the way of escape, though his heart was smitten with fear. There was a great difference between the flattery he had received from Tertullus and the candid presentation of gospel truth as it came from Paul. Felix realized that a great crisis was upon him. He had never heard such a message from a prisoner. He was powerfully moved. He was conscious that he had lived in violation of righteousness and temperance. He had every reason to fear coming judgment. The contact of Christianity with a heart of corruption and a life of guilt caused an unmistakable disturbance. Paul knew the character of his hearers. He felt the great importance of his opportunity. He made known to Felix the one thing needful, the development of his nobler nature, the radical renunciation of sin. At the beginning of that interview Paul stood a captive before Felix. At its close Felix stood a moral captive before Paul. The trembling evidenced a momentary desire in Felix to put himself in the right. His cupidity was stronger than his sense of justice. His heart clung to sin, while his spirit was quaking at the thought of the wrath of God to which sin exposed him. Felix trembled and sent Paul away.

T. R. A.

New Product From Seaweed.

Algin is a new product made from seaweed, the discovery of which is announced from Liverpool, and for algin many valuable qualities are claimed. It is used in the treatment of paper to make the latter proof against the action of germs, water and flame, and it is also used in the manufacture of a non-inflammable film for moving picture purposes.

Side-Lights of Trenches

(By a Private in the London Daily Mail.)

Weather plays its part in the winning of this war. Then men on both sides of that barbed, ugly, shell-holed strip that nobody owns, have a longing for peace in their hearts at moments like that. They can't help it. After all, life is very, very sweet, and even in trenches on summer days, when there's peace for an hour or so life is good to live. Men are good-natured, everything is momentarily roseate. A sun-bath in a trench is like a sun-bath anywhere else — if you can forget the war for a minute or two; and most of us can do that. Most of us are young enough, you see.

On summer days we invent ways of making warfare tolerable, and we gossip. We have begun to love scandal and to live on rumors.

"I think," says one, gravely, "both sides ought to club up and shove arc-lamps up between the front lines. Consider the awful waste of all those 'Verey' lights that are sent up. They're pretty, of course, but if they are for beauty why not more red and green ones, and what's wrong with purples? What about a competition every night or the best display? But I do think arc lamps are the thing. Imagine Piccadilly lit by 'Verey' lights! They're out of date."

HE WANTS MUSIC.

"Music is what I miss," says another. "There's too little variety in the noises. Its' always a crash, a bang, a whistle, a wail, or a hiss. Now my idea is that each shell should have attached to it a gramophone record and needle, and as the shell revolves hurtling through the air, the music would amuse and entertain vastly—to say nothing of holding the enemy so entranced that he would never seek to escape the thing. One can easily suggest appropriate songs. What of 'I'm Longing For My Ain Folk'; 'You Made Me Love You'?

You could have a salvo playing 'See Them Shuffling Along,' and a whizz-bank might give 'Hitchy-koo' instead of its infernal bang-bang. On a clear night you could work off your spare 9.2's in couples on 'The Moon Hath Raised Her Lamp Above.' And in a big bombardment I don't see why we shouldn't charm them with Wagner's 'Meistersingers.' There's not enough originality about the ordnance people."

HE SAW THEM ALL.

Lastly, the latest tales are told. Luckily the other day we had some new troops in with us for instruction, and new troops do funny things. First of all I had better point out that a whizz-bang is a small 12-pounder shell fired at short range at incredible speed. It derives its name from the fact that the noise it makes is a whizz, followed at once by the report of the burst. It is utterly impossible to see them. Now a trench mortar is hurled high in the air, comes slowly, and can be easily seen. Sentries are posted to watch for them in the sky and to blow warning whistles of their approach that people may dodge them.

One of our officers went along to a new sentry—not a mortar sentry—staring fixedly in his periscope.

Officer—What are your duties?

Sentry—To watch in this 'ere glass for whiz-bangs.

That was funny enough, but farther along was the mortar sentry blowing his whistle to warn people of whiz-bangs that, of course, had burst already.

Whiz-bang! Then a shrill blast.

"What was that?" asked the officer.

"Trench mortar, sir," was the calmly confident reply.

"Did you see it?"

"Yes, sir."

Whiz-bang! again. Another blast.

"Did you see that, too?"

"Yes, sir; seen 'em all."

"My lad," said the officer, "you're a marvel."

* * * *

Unfortunately it isn't always sunny. Neither are we. Weather plays its part: but whether or not you are cheerful out here depends mainly on spirit. It is mostly all a matter of spirit, or, as a Lancashire man would say, of "guts." Without spirit life would be intolerable. You simply must keep a hold over yourself, not thinking too much of the pleasures and the dear ones at home or the risks you run here.

* * * *

SURE TO BE HIT.

I suppose that very many of us here have had periods when we were convinced that we were going to be hit. My own experience is that the last half a day, or maybe as long as two or three. You start, perhaps, by going on duty two or three times in succession, just as the gentle Hun has a fit of industry and shells you; or two nights in succession you work on the parapet; or the day when you are to be relieved is postponed. Sometimes a very vivid dream that you are being killed will do it, or maybe a letter from someone at home saying they are convinced that they will never see you again. This "sure-to-be-hit" sensation is mighty unpleasant.

You notice everything that seems to be added proof, and everything you do seems to make death doubly certain. You are sent on a message to some part of the line that receives more than its fair share of minenwerferers, or, if you are a mess orderly, you are suddenly transferred to some other duty and kept in the trenches all day, or if you are in billets you are sent up to the front line on a working party.

One is particularly susceptible to the feeling just before going home on furlough. If the news that one is for leave comes in the trenches, most of us all, I imagine, are certain that we shall be killed before we get out of them. One remembers tales of men out here for eighteen months and then killed as they walked out to go to "Blighty"; or a 'bus-load of them caught by a shell as they went down the road.

The "sure to be hit" periods are rare (I can remember two in seven months). It is well that they are, being "off color" is accountable for some of them, and the losing temporarily of one's grip over oneself for the remainder. It would be easy to be miserable and depressed. Cheeriness is mainly a matter of spirit.

—THE— Quiet Hour

FOR THOUGHTFUL PEOPLE

THE THREE GATES OF SILENCE.

If you are tempted to reveal
  A tale someone has told
About another, make it pass
  Before you speak, three gates of gold.

These narrow gates: First, is it true?
  This, is it needful? In your mind
Give truthful answer, and the next,
  Is last and narrowest, is it kind?

And if to reach your lips at last
  It passes through these gateways three,
Then you may tell the tale, nor fear
  What the result of speech may be.

WATCH, THEREFORE.

Take heed to yourselves, least at any time your hearts be overcharged with surfeiting, and drunkenness, and cares of this life, and so that day come upon you unawares. For as a snare shall it come on all them that dwell on the face of the earth. Watch ye, therefore, and pray always, that ye may be counted worthy to escape all these things that shall come to pass, and, to stand before the Son of man.

The day of the Lord so cometh as a thief in the night. For when they shall say, peace and safety; then sudden destruction cometh upon them, as travail upon a woman with child; and they shall not escape. But ye, brethren, are not in darkness, that that day should overtake you as a thief. Ye are all the children of light, and the children of the day; we are not of the night, nor of darkness. Therefore let us not sleep, as do others; but let us watch and be sober.

SPIRIT.

"There is a spirit in man, and the inspiration of the Almighty giveth him understanding." Here we touch isolation, separation, concentration. Man is in a time-world, flesh-world, sex-world, and yet he can sail round a headland, and get into a bay where he is apart from these, where he can revel in the beauty and dignity, and exalted company, of the spirits of just men made perfect. Here he can look back and see the world as it is seen to-day, and call these minor relationships, things, as Paul called them, with their care and vexation, and cheap enjoyment, and say: "None of these things move me, neither count I my life dear unto me, that I may finish my course with joy."

Can you have joy in prison, in persecution, in the loss of all earthly things, even a flowing reputation, and a noble birth?

So, then, it does not depend upon how many acres you have to your farm—how well filled your purse, how large a troop of friends, how well your body is filled with health. You are privileged to live, even in this life, in this inner circle of joyful life, to realize that you are essentially a spirit apart from the usual round of duties, and you can gladly obey the poet when he says:

"Retire and read thy Bible to be gay."

People are busy about clothing and furniture, and the accessories. You can think of your spirit without clothing, without furniture, you can outrun the fastest motor—rise above the most daring birdman, and be absolutely safe. Mountains, oceans, earthquakes, icebergs are nothing to you. Does the eagle in his flight study how he may cross a river? You have no care, no fear, no danger, your agility is past finding out, and they say a thousand spirits can dance on the point of a needle.

Come, sail in this beautiful yacht, drop anchor in this beautiful bay, hoist your signals, put yourself in communication with this multitudinous world, pure, brave, victorious. There are spirits bearing the burning bliss of the inner circle of the most adorable Presence. You, too, may come and find a welcome, an open door, and nothing to pay; why, take care that the one who has far less money than you does not glide in and get ahead of you, and rise above you in the true and enduring exaltation.

SCIENTIFIC JOTTINGS.

There are about 1,300 gas plants in the United States.

A condor can exist without food for 40 days and an eagle 20 days.

Serbia is said to lead in centenarians, and Ireland is a close second.

The centennial of gas lighting in the United States has just taken place.

There are 2,800 women working as guards on the railroads of Germany.

The first experiment in Japan in the manufacture of artificial silk is being tried at Yonezawa.

The perfume industry of Italy annually makes use of 1,860 tons of orange blossoms and 1,000 tons of roses.

Under the license law of Sweden no one may buy drink without buying something to eat at the same time.

Monaco has the smallest army in the world. It consists of fewer than 200 men, not much more than a regulation company.

The average weight of the Greenland whale is 100 tons—224,000 pounds—equal to that of 800 elephants or that of 400 bears.

As a race, the tallest people in the world are the Bororos, of the southwest of Brazil. They average 6 feet 4 inches in height.

The word "and" occurs 46,527 times in Holy Scripture—10,984 times in the Old Testament and 35,543 times in the New Testament.

Selling seaweed is one of the functions of the Philippine fishermen. The native women make use of it in the preparation of a dessert much like gelatine.

Ninety per cent. of the world's supply of cloves comes from the Zanzibar Archipelago, but much of the crop is lost through inefficient harvesting methods.

Aluminum is one of the most abundant of metals and ranks third among the elements which compose the crust of the earth, being exceeded only by oxygen and silicon.

The limit of the carrying power of thunder is about 15 miles, while twice that number of miles is not considered any great distance for the sounds of battle to travel.

For signaling time to vessels there are two lights in the Lisbon harbor which are automatically illuminated as the hour is about to end and are extinguished on the second of the new hour.

Wherever the storm carries me I go a willing guest.—Horace.

BURDOCK BLOOD BITTERS CURED DYSPEPSIA.

Unless the stomach is kept in good shape your food will not digest properly but will cause a rising and souring of food, a feeling of rawness in the stomach, pains in the stomach or a feeling as if a heavy weight were lying there.

Burdock Blood Bitters cannot be surpassed as a cure for dyspepsia and all its allied troubles.

Mr. James R. Burns, Balmoral, N.S., writes: "About two years ago I was badly troubled with dyspepsia, and could not get any relief. I tried most everything, not even the doctors seeming to do me any good. One day a friend told me to try Burdock Blood Bitters, as he had seen it advertised. I did so, and by the time the first bottle was gone I felt better, and after taking three bottles I was completely cured. I highly recommend it to all sufferers from dyspepsia."

B.B.B. is manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Bradstreet's Trade Review.

Toronto—Cool weather brought about a remarkable degree of activity in seasonable commodities, especially in clothing lines. Hats and shoes shared in the general activity. Industrial concerns are feeling the labor scarcity, although an appreciable improvement is being felt. Large retail firms are seriously held back in making deliveries, by reason of lack of help. Dry goods wholesalers report that goods are moving out in satisfactory volume, and that orders are at least 10 per cent. larger than during the same period of 1915. Although retail dry goods merchants have stocked up in advance in many cases, especially in country districts, substantial orders are being received. Hardware and paints are fairly active. Most wholesalers have no hesitation in describing conditions in the trade as good. Wholesale grocers state that trade is good. Collections are generally reported good.

Montreal—A healthy autumn trade is experienced in practically every line. Labor is very scarce, althoug a slight improvement has been note within the last week. Dry goods me report that conditions are very good with large orders booked ahead. Hardware, leather and shoe lines are experiencing considerable movement. Collections are reported good.

Ottawa—General business conditions are good. Satisfactory activity is in evidence in hardware, dry goods an grocery lines. Payments are said be very fair.

Hamilton—Labor shortage is hol ing up orders in most industries, pecially steel. A healthy autur trade is being transacted. Wome and men's clothing is being sold retailers in a volume that is m than satisfactory. Recent cool weat has had the effect of making fall li assume considerable activity. Groc les are active, with new canned go quoted substantially higher than the 1915 crop. Shoe retailers are m ing with an active trade. General c ditions and remittances are repo as being very good.

London—The autumn trade, esp ally in the country, is exception brisk and there is a general fe of confidence regarding the au and winter. Labor is scarce. All industries are working practicall capacity. Clothing, dry goods, a and hardware are all reported t active.

Winnipeg—The wheat market calmed down after the recent p of tension, and after its steady b vior during the past week, the er sharp increases and drops is beli to be over. A feeling prevalli higher prices will be obtained wheat and flour. Labor scarc reported in many quarters. The is practically all cut, and altho unsatisfactory weather has impe operations to some extent, and did damage just before the harve put the crop out of harm's way, is a general feeling of satisfac throughout the West. Merc business is brisk, with an active quiry for autumn and winter g being felt. Money is plentiful and prospects are good for a continua of prosperity for the rest of the year.

Calgary—Business conditions general are fair.

Vancouver—The salmon catche have been particularly small, highest prices will inevitably hav be paid this season. Retail bus is active. Mining returns are satisfactory, according to figure ceived recently. Money is plen and wholesalers report that paym are quite good.

Quebec—Little change is notice in trade conditions over that of preceding week. Business as a is satisfactory in wholesale and r lines. Manufacturers are well emp ed and outlook continues favora City and country remittances are o fair.

You never can tell. Many a m will is contested even before the l yer draws it up.

The ratio of color-blind people those of normal sight is about 65 to 164. This does not mean that all of 65 are absolutely color-blind, but t that is the ratio of those who are mo less affected.

A Sluggish Liver CAUSES LOTS OF TROUBLE.

Unless the liver is working properly you may look forward to a great many troubles arising, such as constipation, severe headaches, bilious headaches, sick headaches, jaundice, sick stomach, etc.

Mrs. J. Shellsworth, 227 Albemarle St., Halifax, N.S., writes: "I take pleasure in writing you concerning the great value I have received by using your Milburn's Laxa-Liver Pills for a sluggish liver. When my liver got bad I would have severe headaches, but after using a couple of vials of your pills I have not been bothered with the headaches any more."

Milburn's Laxa-Liver Pills are, without a doubt, the best liver regulator on the market to-day. Twenty-five years of a reputation should surely prove this.

Milburn's Laxa-Liver Pills are 25 cents per vial, 5 vials for $1.00; for sale at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

FARM AND GARDEN

TREATMENT OF CLAY SOILS.

The clay or clay loam types of soils are made up of particles which are extremely fine. They are very retentive of moisture and also of plant food. In the management of a clay soil, unless the proper methods are practiced, a condition will be secured which renders the soil impervious to moisture, air may be excluded and the soil rendered infertile.

Proper management of a clay soil would be to permit of the water of rainfall being quickly absorbed by the soil, the surplus water being quickly carried away by means of under drainage, the surface soil particles being flocculated or combined into what is called "compound soil particles," which will tend to prevent the formation of a crust, or the surface baking.

As the percentage of humus or decaying organic matter in the soil is increased the tendency of the clay particles to stick to each other is decreased, and in the successful management of a clay soil it is especially important that a liberal amount of organic matter be incorporated with the soil. This tends to change the character from that of the still, impervious clay to the type resembling the clay loam, and in this type we have our most fertile soils.

Probably no soil receives more benefit from an application of lime than does the clay soil. The well known cementing properties of lime in part account for this beneficial action. It prevents puddling of the clay and renders the surface soil more porous; it changes the physical properties so that the relation of the particles to each other is secured which is so well known to the buttermaker, who churns the cream until the globules of fat are brought into a granular condition. This granular condition of the clay soils, especially of the surface particles, is the ideal condition.

FALL PLOWING FOR CLAY SOILS.

There is such a thing as adapting the crop to the soil upon which it is to be grown, and, where our system of rotation makes it possible, the clay soils should be devoted to those crops where the seeding is done broadcast, as in the growing of grass and grains. Those crops which are to be given intra-culture can be grown to better advantage on soils which are of a lighter and looser texture. All, the cultivation which can be given to the sowed crops must be given before seeding, and the quality of the clay soil, which enables it to hold moisture, enables these sowed crops to thrive, when if they were grown on soils of a lighter, more open texture the effects of drought would be far more serious. There is no type of soil which requires more expert judgment in its management than does the clay soil. If we plow when too wet the particles are packed together and the open air space or pore space, which should exist between the soil particles, is largely closed.

There is no type of soil more likely to be benefitted by late fall plowing than clay. While there may be some slight loss of plant food, due to leaching and washing of the soil, yet if the furrows are left rough as they come from the plow, and are turned slightly on edge rather than being turned flat, the effect of the winter's freezing and thawing, and the pulverzing action of the rain, will do much toward making these soils friable and in good condition.

By incorporating humus with the clay its condition may be changed and it may be brought more into the condition of the clay loam. This humus can be most readily secured in coarse farm manures, and through plowing under cover crops. While, as a rule, we prefer applying farm manures to the surface of the soil and harrowing them in, yet on some clay soils where the physical action of the manure may be fully as valuable as its chemical action, we can plow under coarse manure to advantage.

COVER CROPS ADAPTED TO CLAY

Of the various cover crops which can be grown to advantage, rye, barley and peas are most valuable. The rye should be used in all cases where a winter covering is desired, the crop of rye to be plowed under in the spring, late April or early in May if spring crops are to be grown; and plowed under later if some such crop as buckwheat is the one desired. If the clay is to be plowed in the fall, then the other crops mentioned are valuable for plowing under.

Barley and Canada field peas might be used, the seed being sown and disked in after some special crops, as oats or early potatoes, or even after a forage crop of oats and peas.

In planning to increase the organic matter in the soil, it matters not as much what crop we grow so long as each year we plow under something. In some sections of the country, one crop will be better adapted to this work than others, and wherever the land is to be left for a few months without any special crop growing upon it, some means should be taken to secure a clover crop to plow under.

In the preparataion of a clay soil there is such a thing as harrowing much. It is almost a universal practice with those who advise concerning tillage to advise that we harrow the soil all that we think we can afford to harrow it, and then harrow it as much more. But in fitting clay soils this advice may lead to trouble. So much fitting should be given as is necessary in breaking down clods and in compacting the sub-surface soil, but the fitting should not be carried to the point that will make the clay particles over fine. Should that be done the injurious effects would be apparent at the first heavy rain, and seeds which might be placed in the soil would be effectually buried beneath the crust of the puddled clay particles.

In applying fine, well-rotted manure to the clay soil almost without exception, it should be applied as a surface dressing and harrowed in.

While it is important that clay soil be not worked when too wet, it is equally important that it be not too dry. If the spring plowing is delayed until the land is dry, then the plow instead of pulverizing and fining the soil as it should, will break the soil up in lumps and clods where it is almost impossible to reduce it to a good condition of tilth. This type of soil requires the exercise of more care and more judgment in its successful management than does any other. When properly handled it may be made our most fertile type of soil; but if improperly handled for a single season, it will require years of labor to restore it to good physical condition.

FARM NEWS AND VIEWS.

The average period of gestation for animals is given as follows: Jennet, 12 months; mare, 11 months; cow, 9 months; sheep, 5 months; pig, 3 1-2 months; bitch, 9 weeks; cat, 8 weeks; rabbit, 20 days.

Salt is being used on many farms this season as a plant food liberator, and practical investigators have shown that it possesses considerable power in making plant food in the soil available.

If a baby had the appetite of a young beetle it would eat from 50 to 100 pounds of food every 24 hours. If a horse ate as much as a caterpillar, in proportion to its size, it would consume a ton of hay every 24 hours. A caterpillar eats twice its weight of leaves every day, but a potato beetle devours every day at least five times its weight of foliage.

Keep posted and market products as demand and price suggest the best time to seed. A glutted market is the speculator's harvest field.

Allow no weed seeds to ripen. Kill weeds in the tender seeding stage. Induce fall sprouting by giving a late cultivation. Burn weeds bearing mature seeds. Never plow them under. Thoroughly compost stable manure if contaminated with seeds of noxious weeds. Sow only pure seed. Watch for weeds new to your locality. Practice rotation of crops. Turn weeds into pork, beef and mutton by grazing them. Plant smothering crops, winter and summer.

Fatigue from Poisoned Blood

Sluggish action of the liver, kidneys and bowels leave impurities in the blood which render it poisonous. Poisoned blood is the cause of tired, languid feelings, as well as of headache, backache and bodily pains and aches.

By awakening the action of these filtering and excretory organs, Dr. Chase's Kidney-Liver Pills thoroughly cleanse the system, purify the blood and cure such ailments as indigestion, biliousness, kidney derangements and constipation. 25 cts.

Any Woman's Struggle For Good Health Quickly Rewarded

A SIMPLE HOME TREATMENT NOW ADVOCATED THAT GIVES FINE RESULTS.

When a woman's face grows haggard and pale, when she is tired all day and ready to cry when night comes, she ought to know something is wrong.

Putting off only make matters worse. The best advice we can give any sickly woman is to test out the following treatment.

At the close of every meal, with a sip or two of water, take two chocolate-coated Ferrozone Tablets. This seems to be the best thing going for folks that are tired out, run-down and in need of a strengthening, building-up medicine.

Ferrozone's action aids the three principal functions of the body —digestion, assimilation, elimination.

By strengthening digestion it forms an abundance of rich, red blood—this gives good color.

By perfecting assimilation, Ferrozone supplies nutrition—this gives strength, vim, stability.

Elimination is assured because Ferrozone quickens the action of the liver, kidney and bowls— this guarantees the maintenance of vigorous health.

Ferrozone puts you on the right road—the one that leads to health.

Not a man, woman or child needing blood, vigor, endurance —not a person who is weak, nervous or sickly, not a person in ill-health who won't receive immediate help from Ferrozone.

As a tonic and restorative, as a health-bringer and body-builder, Ferrozone is unrivalled. It cures because it feeds and nourishes, because it contains the elements that build up and strengthen. Try it yourself—sold everywhere in 50 cent boxes, 6 boxes for $2.50, or by mail from The Catarrhozone Co., Kingston, Ont.

Going the Limit.

Jones was one of those men who grumble at everything and everybody. He was once attacked by inflammatory rheumatism and was carefully nursed by his wife, who was very devoted to him, in spite of his faultfinding disposition. His suffering caused her to burst into tears sometimes as she sat by his bedside.

One day a friend came in and asked him how he was getting on.

"Badly, badly!" he exclaimed: "and it's all my wife's fault."

"Is it possible?" asked the friend, in surprise.

"Yes. The doctor told me that humidity was bad for me, and there that woman sits and cries, just to make it moist in the room."

"All's fair in love and war," quoted the Wise Guy. "Still, it seems silly to kiss a girl behind her back," suggested the Simple Mug.

MUSIC OF THE SPHERES

Whole Creation One Endless Triumph of Rhythm.

There is music in the thunder, the weird mystery of the storm.

There is music in the falling rain as thirsty flowers look up to drink. There is music in the sunshine, the sweet and perfect harmony of earth and sky.

There is music in all the mysteries of the universe—the whole creation of on vast, eternal, boundless, endless triumph of rhythm. The unvoiced song of swinging worlds is merely the expression of universal rhythm.

"The music of the spheres" is more than a bit of fancy. It is a symbol of exquisite power. It portrays the refinement of world forces. Where the laws of earth are modified into universal principle—there music begins, where, knowledge grows dim where learning has lost its way — there music begins.

When space and distance are defied, when science has passed its confining boundaries, on the borderland of art—there music begins.

"The music of the spheres," as endless as eternity, as unfathomable as space, as mysterious as life.

The songs of the earth are the same songs that "the morning stars sang together" in perfect harmony and rhythm "when the world was young."

For earth is heaven and heaven is earth. The stars are ours and not circling globes of mystery, and we a star and not an earthly word to those who dwell beyond the sky.

For God is here and everywhere and His interpreter is the music of the soul.—Robert Foresman in Pictorial Review for October.

CURE YOUR BAD COUGH BY BREATHING CATARRHOZONE

You may dislike taking medicine, but coughs are best cured without medicine. The modern treatment is "Catarrhozone"—it isn't a drug—it's a healing vapor full of pine essences and healing balsams. It spreads over the surfaces that are weak and sore from coughing. Every spot that is congested is healed, irritation is soothed away, phlegm and secretions are cleaned out, and all symptoms of cold and Catarrh are cured. Nothing so quick, so sure, so pleasant as Catarrhozone. Beware of dangerous substitutes meant to deceive you for genuine Catarrhozone. All dealers sell Catarrhozone. Large size, which lasts two months, price $1.00; small size, 50c.; sample size, 25c.

HORSES ON THE BATTLEFIELD

Despite the use of motor traction there are, it has been estimated more than half a million horses in the various fields of war. Perhaps the number has been lessened by fatalities, for cable despatches tell of regiments of uhlans fighting as foot soldiers on account of lack of remounts. Experience shows that three hundred horses are killed on the average to one cavalryman.

The horse is always a worse sufferer than the man. It is not so hardy and it suffers more acutely from starvation and thirst, for instance. Generally speaking it is easily vulnerable.

Some horses will go on after receiving a score of wounds, but a horse struck by a bullet usually falls and is of no further use, either because of its loss of speed or because it is so stricken with fear as to become difficult to manage. In the Franco-Prussian war of 1870-71 about 50,000 horses perished.

Under the name of the Purple Cross a movement was started in England by a humane society to send a corps to battlefields with the object of putting wounded horses out of their misery. This movement was promptly stopped by the British Government. It was explained that the army veterinary department is sufficient to cope with the situation, and that independent civilian bodies would not be tolerated in the vicinity of the fighting.

The British army veterinary department came into being at the time of the Peninsular war a century ago. It was customary then to abandon any horses stricken down in battle and kill them eventually if opportunity offered. If no opportunity came the poor brutes died a lingering death from their wounds or starvation—which is still the fate of large numbers.

Some one suggested to the Duke of Wellington that many horses were abandoned which might be saved, as thousands were but slightly wounded. These could easily be nursed back to convalescence.

Wellington was convinced. He took the first veterinaries into the field. But the veterinary department did not amount to much until after the Franco-Prussian war. In that conflict the Germans organized a very efficient department, whereas the French did comparatively nothing. The lesson of the horse was learned in this war. From then on all important armies have had well equipped veterinary departments.

The Geneva convention, while making every provision for the care of wounded men, leaves wounded horses unmentioned. An army veterinary surgeon is therefore not allowed on the firing line. He must follow close in the wake of the line, attached to the field hospital for horses. His possibilities are limited. The field hospitals, however, have operating tables, chloroform and full sets of implements for animal surgery.

Not until a battle is ended do the veterinary surgeons go over the scene of conflict. They examine every animal shot down and if the horse is badly wounded it is killed at once. If, on the other hand, the wound is slight the horse is raised into one of the horse carts and taken to the horse hospital and nursed back to convalescence.

A well trained army horse behaves with as great gallantry in battle as its rider. But the cavalry horse is just as nervous during its first engagement as the recruit. The new horse is restive under the roar of exploding shell.

Cavalry in reserve, therefore, is kept well out of the range of shell, for there is nothing a horse dislikes more than standing still with the noise of conflict near at hand. But with the order to charge things are different. Racing at full speed in company with the rest of the regiment the horse is often cooler than the rider. If the rider is struck down the horse will usually go on without breaking away from the line.

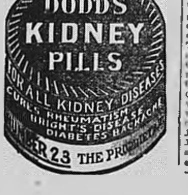
When the infantry meets a cavalry charge the men usually try to bring down the first line in the hope that the second line will be thrown over it on the ground. If a man falls it is quite likely that the horsemen behind will dash over him without leaving a hoof mark on his body. The horse leaps involuntarily over any obstacle in its path.

The infantryman seeing a line of horsemen approaching naturally fires at the horse, for the proportion of target is three or more of horse to one of cavalryman. A horse struck fair in the chest by a bullet usually rears high on its hind legs, then falls heavily on its head. This is a menace to the cavalryman.

It is no unusual thing when a regiment is charging to see riderless coming on with the regiment. They even leap into the enemy's trenches by the side of the others. But when the charge ends, the riderless horse rushes here and there wildly and probably will end by returning to the last camp. It is related that in the charge of the Light Brigade at Balaklava the front rank was composed entirely of riderless horses. It was these which charged upon the enemy's guns.

Every nation at war now has agents in neutral countries buying horses. Until a few years ago Hungary supplied half of Europe with mounts. The majority of British cavalry horses came from there until the Boer war, when Germany entered into an arrangement by which she absorbed such of the supply as Austria did not take for her army.

Some Powers are becoming independent of outside supplies by developing stud farms. Russia breeds all her own horses in south Russia. Germany has two enormous farms of this kind and France three.



RELIEF FROM INDIGESTION

The Most Common Cause of This Trouble is Poor Blood.

All conditions of depressed vitality tend to disturb the process of digestion. There is not a disturbed condition of life that cannot affect digestion. But few causes of the trouble are so common as thin, weak blood. It affects directly and at once the process of nutrition. Not only is the action of the gastric and intestinal glands diminished but the muscular action of the stomach is weakened. Nothing will more promptly restore digestive efficiency than good, red blood. Without it the normal activity of the stomach is impossible.

Thin, pale people who complain of indigestion must improve the condition of their blood to find relief. The most active blood builder in such cases is Dr. Williams Pink Pills. They make the rich, red blood which quickly restores the digestive organs to their proper activity, and the dyspeptic who has hated the sight and smell of food now looks forward to meal time with pleasure. As proving the value of Dr. Williams Pink Pills in curing indigestion Miss Edith M. Smith, R. R. No. 4, Perth, Ont., says: "I can honestly say I owe my present good health to Dr. Williams Pink Pills. My stomach was terribly weak and I suffered from indigestion and sick headache, and was always very nervous. I was troubled this way for three years, and in that time took a great deal of doctors' medicine, which, however, did not help me. I could not eat anything without experiencing the most agonizing pain. My sick headaches were most violent and I could not rest night or day. I was asked one day by a friend to try Dr. Williams Pink Pills and consented to do so. After taking them some time I found they were helping me, and I continued to take them steadily for several months, until I found that I was completely cured. While taking the pills I gained both in strength and weight, and I feel it impossible to praise Dr. Williams Pink Pills too highly."

You can procure these pills through any dealer in medicine or by mail, post paid, at 50 cents a box, or six boxes for $2.50, from The Dr. Williams Medicine Co., Brockville, Ont.

Cromwell and Quinine.

We owe to Sir Clements Marham the introduction of quinine yielding trees to British India and the consequent cheapening of the drug from a guinea to a halfpenny an ounce in Calcutta, but the medicinal properties of cinchona bark had long been known. They were discovered by the Jesuits, after whom it was called Jesuits' bark. Concerning that Sir Clements used to relate an odd coincidence. Oliver Cromwell died of tertian ague, and quinine might have saved him. In the very newspaper in which his death was announced, the Mercurius Politicus, there was an advertisement of Jesuits' bark for sale. But the name of Jesuit was abhorrent to the Puritans, and hence Cromwell's medical advisers would have nothing to do with it. —London Chronicle.

RAISING WATER.

Ancient and Modern Methods of Doing the Work.

In the beginning, when primitive man wanted to lift water from a lower to a higher level or to transport it any little distance, he carried it in an earthen jar or in a crude pail made of bark or skins. It wasn't very long, however, before the first spark of inventive genius began to burn and probably one of the first mechanical devices ever produced by man was a pump.

Man needs but little water for himself, and he needed even less in those distant days, so what he required for drinking or cooking was easily carried in a jar. It was only when water had to be lifted and carried for agricultural purposes that the pump was born. Irrigation required enormous quantities of water, and pumps are absolutely necessary when it has to be raised from one level to another to water the growing crops.

In the most ancient picture writings of Egypt and Babylon are to be found crude pictures of early water lifting devices. Perhaps the earliest of all is the shadoof, which is still used in the Far East, and looks not unlike the old-fashioned New England well sweep. It is merely a long pole or sweep, balanced on an upright post and provided with a bucket and rope on one end and a counterweight on the other. Along the Nile River irrigation water is still raised above the high mud banks in this primitive way. As the shadoof can raise water only about seven feet, these laborious contrivances must be worked in series to get the water up 30-foot embankments. And yet millions of acres in the Nile region are irrigated in this way. This type of water-lifting machine is also extensively used in China and was employed by the ancient Romans and other civilizations. It was somewhat improved by the Hindustans, who placed a plank on the pole and operated it by running back and forth.

The new development was the Archimedean screw, by means of which water was lifted a short distance. This was improved by the Persian wheel, operated by oxen or camels. To the rim of a large wheel are fastened a number of earthen jars. This wheel is driven by a series of crude wooden gears operated by a sweep to which are harnessed draft animals. With the revolution of the wheel the jars are dipped and filled in the well or river, hoisted to the top of the bank and automatically emptied into a wooden trough, from which the water flows into the irrigation canals. The wheel will lift about 2,000 cubic feet of water a day.

The latter type of water raising machine appears in a wide variety of forms. In the form of a chain or cups or buckets it is used to this day for elevating grain, flour, etc. From it was evolved the common chain pumps of to-day. The chain pump is, therefore, one of the oldest types in existence.

The suction pump, with cylinder and piston, is a later invention and is still used to raise water for short distances. It appears in a great many types.

But the real business of lifting water in large quantities did not begin until the centrifugal-pump was invented. This type of pump differs materially from all previous kinds. It lifts water by whirling it around and outward by vanes rotating on a shaft in a closed case. Nowadays, when there is a large amount of water to be lifted for any purpose whatever, there is a centrifugal pump designed purposely for the work. It is the general practice to drive these pumps by electric power. On account of their high speed the pump can be direct connected to the armature shaft of the electric motor.

An electrically driven centrifugal pump offers many advantages over all other kinds, foremost among which is its adaptability to automatic or remote control. The mere throwing of a hand switch will start or stop the largest pump. Pressing a button controls the smaller sizes. For pumping water from mines and in similar installations these pumps are provided with automatic control. When the water reaches a certain level the motor starts and pumps it out. Instances are on record where mine pumps and their driving motors have been totally submerged for days, but have pumped themselves clear in a few hours.

Saloniki a Sty of Squalor.

Saloniki resembles most ports of the eastern Mediterranean in being a picture of beauty from a distance and a sty of squalor near at hand. It is, in fact, a slatternly Levantine town in a beautiful medieval setting, comely in the mass, unpleasant in detail.

As you survey Saloniki from the water it has a dignified air that accords well with its historical renown, being set in stately isolation upon the steep slopes of its bare hills and girdled by ruined but still massive walls that rise to a great Venetian citadel on the landward side. Graceful white minarets that the Turks built are sprinkled about among the houses, and the quay, that is the chief street of the town, lined with picturesque Greek sailing craft, stretches for a full mile along the water's edge. But ashore, shut in by the narrow street of the "Frank quarter," your vivid impression of squalor and slovenliness soon makes you forget the graceful picture from the sea.—G. Ward Price in London Times.

TORONTO FAT STOCK SHOW

As evidenced by advertisement on another page of this issue, the Toronto Fat Stock Show are giving special attention to the farmer and breeder, and are offering many handsome prizes for classes where stock must be bred, fed and owned by exhibitor. This is work along the right lines, and should bring out a good entry.

A farmer in Western Kansas shaved off a month's beard, took a bath and dressed up in his best clothes before killing himself. He didn't know just where he was going, but he determined to make as good an impression as possible on his new acquaintances. —Kansas City Journal.

A GREAT CORPORATION

If all the trackage over which the Canadian Pacific has control—that is, all the leased lines, or lines taken bodily over, or with running rights —be included in a grand total, the company operates to-day 20,000 miles of tracks. This fact alone would tell of the bigness of the corporation which, thirty years ago, issued its first annual statement on a sheet of note paper. The company owns 100,000 miles of telegraph; 10,000,000 acres of unsold lands, worth $200,000,000, and controls shipping to the extent of 400,000 tons. One of the notable features of the great corporation is that it takes account of so many things, which, at the first blush, might not seem to be related to railways transportation. The comfort of the inner man on the trains is, of course, of prime moment; but note how the Canadian Pacific Railway went out of its way to provide dietetic gastronomy. The railway company milks its own cows and makes its own soap. It bakes its own bread, and it bores a tunnel through the mountains above the clouds. It grows its own potatoes, and its policies are of world-wide import and significance.

Why He Enlisted.

Some time ago, before conscription was seriously mooted, a certain patriotic grocer called together his staff, which consisted of a solitary assistant, and proposed that one of them should enlist. Further, to the somewhat relief of the other, he said he would go himself, being a single man. "Ye Mackay will stay behind and keep the business going?"

Mackay, with tears in his eyes, warmly seconded, so in a short time the deed was done.

Many months passed by, as the story book says, and the former grocer when going off trench duty received the shock of his life, for did he not see his assistant dressed in khaki standing before him?

"Mackay! Great Pirkins, can that be ye?" he exclaimed, aghast. "Did I no leave ye in chairge o' the shop?"

"So I thocht at the time, maister," replied Mackay, sadly, "but the fac' is, it wis no a shop ye left me in chairge o', but a' your wumman folk. So, sez I tae masel, 'Mackay, if ye got tae fecht ye may as well fecht something ye can hit;' an' I jined."—Tit-Bits.

"The plowman homeward plods his weary way." The reader put aside his volume of poems. "Times change," he commented. "I see in Kansas they are taking hired hands to the harvest fields in taxicabs."—Louisville Courier-Journal.

WIT AND HUMOR

A REAL SERVICE.

(Exchange)

A health journal is telling people "how to lie when asleep." If it could persuade them to tell the truth when awake, it would be doing real service.

AN EASY GUESS.

(Scribner's Magazine)

The only man she knew who lisped called her on the phone and said: "Thith ith you, ith'n't? Well, guess who thith ith?"

AIDING CONSERVATION.

(Exchange)

"Preservin' us trees would be easy," said Uncle Eben, "if ev'rybody had de same hesitatin' feelin' toward a woodpile dat I always 'sperience."

WOULDN'T DO.

(Boston Transcript.)

A baseball umpire would make a poor walking delegate."

"Why so?"

"He is always calling off strikes, isn't he?"

HARD LUCK.

(Brooklyn Citizen.)

"Hello, Newwedd, why so somber?"

"Say, old man, I've made a very painful discovery. My wife can't sing."

"Painful? Why, man, you are to be congratulated."

"Alas, no! You see she thinks she can."

HIS PREFERENCE.

(Exchange)

"You say this man stole your coat," said a magistrate to a prosecutor. "Do I understand that you prefer this charge against him?"

"Well, no, your worship," was the reply. "I prefer the coat, if it's all the same to you."

NO RELIEF.

(Rochester Times)

The cynical person was standing in front of a part of an exhibition of local art talent labeled "Art Objects."

"Well I suppose Art does object, and I can't blame her, but there doesn't seem to be any help for it," he finally said.

NO ERRORS.

(Exchange)

"Well, Peleg, how do you find the encyclopedia the feller left on approval?"

"Seems to be all right. Ain't no errors in it so fur as I hev see."

TOMMY'S MISTAKE.

(Life)

Sunday School Teacher—And the father of the prodigal son fell on his neck and wept. Now, why did he weep?

Tommy Tuffnut—Huh! I guess you'd weep, too, if you fell on your neck.

NOT HER WAY.

(Boston Transcript.)

"Do you ever ask your wife's advice about things?" "No, sir; she doesn't wait to be asked."

FOOLING THE COOK.

(Houston Post)

"How do you manage to keep your cook so long?"

"My husband has promised her that if he is working for us when we strike oil he will buy her an auto."

"But I did not know you had any oil prospects."

"We haven't."

PERHAPS.

(Louisville Courier-Journal.)

"Does money ever talk?"

"So they claim."

"I wonder when?"

"Well, you sometimes see it stated that money is tight. I suppose that's when it gets loquacious."

THE BOMBARDMENT.

(Tit-Bits)

"Bang!" went the rifles at the manoeuvres.

"Oo-oo!" screamed the pretty girl—a nice, decorous, surprised little scream. She stepped backward into the arms of a young man.

"Oh!" said she, blushing. "I was frightened by the rifles. I beg your pardon."

"Not at all," said the young man. "Let's go over and watch the artillery."

STUBKIN'S MISTAKE.

(Puck.)

"Maria, you'll never be able to drive that nail with a flat-iron. For heaven's sake use your head," admonished Mr. Stubkins. And then he wondered why she would not speak to him the rest of the day.—Puck.

TOO RISKY.

(Washington Star.)

"Don't you play bridge at Crimson Gulch?" "Not any more," replied Broncho Bob. "It upsets all the rules. When you lose at poker, you can keep your troubles to yourself and not talk about the hand. But when one of us loses at bridge he doesn't know what minute his partner is goin' to draw a gun an' rely on a verdict of justifiable homicide."

A DISAPPOINTMENT.

(Exchange)

Mr. S—— had a peculiarly irritating sneeze. It began with a complex and terrifying series of facial convulsions, but instead of concluding with the roar of a shot lion, it ended with a most lame performance that always disappointed the expectant observer.

"Your sneeze," said a friend, after watching him through one of his sternutations, "is a regular circus."

"A circus?" said Mr. S——.

"Yes, sir," was the rejoiner. "The performance never comes up to the advance notices."

EAGER TO PRACTICE.

(Exchange)

"My boy, you want to practice thrift."

"I know, dad, but I haven't the tools."

"What do you mean by that?"

"If you'll let me have the five dollars I need I'll see how long I can make it last."

VERY MUCH THERE.

(Rochester Times)

"Which is the most delicate of the senses?" asked the teacher.

"The touch," answered Johnnie.

"How's that?" asked the teacher.

"Well," said Johnnie, "when you sit on a pin, you can't taste it, but you know it's there."

SOLVED AT LAST.

(Rochester Times)

"This is about the worst dinner I ever sat down to," he said, as he surveyed the table; "but I s'pose I ought to make certain allowances."

"Yes, John," replied his wife. "If you would make certain allowances you would have no occasion to find fault with your food."

A FACT.

(Widow)

New Teacher—Who can tell me a thing of importance that did not exist a hundred years ago?

Little Boy—Me.

DIDN'T DISLIKE HER, BUT—

(Exchange)

"Why do you dislike your teacher so, Willie?" asked his mother.

"I don't exactly dislike her, mother," replied Willie, "but it's perfectly plain to me why she never got married."

SCRIPTURAL AUTHORITY.

(Rochester Times)

"Look here, doctor," roared the irate man who had just received a bill from the physician, "on what do you base these enormous charges?"

"On the best authority in the world," calmly responded the doctor. "Doesn't the Bible says: 'All that a man hath will he give for his life'?"

Entertaining Letter from Gallant Pinkerton Boy Now Missing—R. H. McKay Writes

LETTER FROM LIEUT. REID

Shortly before word came that her gallant son, Lieut. A. E. Reid was missing, Mrs. Adam Reid of Pinkerton received the following highly interesting letter.:—

Rat Palace, Somewhere in France,
September 2nd, 1916.

Dear Mother and Father:—

I am sitting in this above named dugout to night writing this on a little table of boards nailed together minus the legs of course as the dugout does not permit of standing. I am on duty at night in this particular place some distance from the front line but of course under fire though we are well protected from machine guns and rifle fire. Shells if sent over in quantity might prove embarrassing but lately Fritz's batteries do not seem inclined to talk much though ours do quite a bit. "Mother's" advice to Fritz is very convincing and a few quiet words from "Archie" carry considerable weight. Fritz generally sees the point and shuts up. I feel more or less sore on him for putting one on a mail bag that I am sure contained some letters for me. At any rate I haven't had any mail for over a week which is quite unusual.

When we go back to rest camp in a few days I will look John up and also some of the other chaps I know. How are Sam and Elmer getting along? I see Andy Colbam is still safe and sound. I met "Spot" Rolston a couple of weeks ago on his way to the front line. He is in the Brigade M. Gun Company and made quite a good figure astride a mule. My respect for a mule is considerable, especially for his heels. He can deliver the goods all right.

We had rather a trying time of it early this week owing to the frequent rains and poor shelter, but it has been sunny and warm the last few days and every thing is fine again. I was alright myself as my trench coat kept it out and my shoepacks are an unqualified success and the most comfortable things imaginable. Besides they are fairly light. This is where one sees the necessity of good socks and I am certainly well provided. One pair of white ones I have are so thick that it takes a full day of warm sunny weather to dry them when my batman washes them. The wool in them is extremely fine too. It will be two weeks by Tuesday since I had my clothes off and by that time I will be ready for a bath. Everyone will parade to the baths and be outfitted again where necessary. We have only what we carry so our wardrobe is limited but anybody with any sand in them can put up with anything we have to stand. It is largely a matter of adapting oneself and keeping fit. Loss of sleep is the worst of it but we manage alright except in the front line.

I cant explain it but there is a very optimistic feeling pervading the troops. We get practically no news here but abundance of rumours. We really know much less about what is going on than you. Of course in time we will get our papers daily but not just now.

By the time you get this, harvest will be over and the school well started. Who is going to Normal this year from around home? I suppose you have a teacher by now. Is the Bruce Battalion still at London or have they been sent to Borden. I rather think they will be sent to reinforce some of the battalions here. They will be lucky if they get over as a unit. (Have just seen a healthy looking grayback make a run across my board table but they come sooner or later and my Company O. C. has had them for some days. I am free myself yet.

Love to all.
Ern.

FROM EX-MAYOR R. H. McKAY

Walkerton, Oct. 6th, 1916

Editor Telescope,
Walkerton.

Dear Sir:—

Some authors of modern history have declared that temptation and opportunity are the driving wheels of science and progress. This may be so, but sitting on the platform of the Town Hall on the night of bidding farewell to our soldier boys, I thought of the opportunity presented which was so fully exemplified in the person of Mr. John Rowland, chairman of the meeting, from being the great cattle-buyer king of this northern country and from having harnessed up the river Saugeen to produce light for our homes and power for our manufacturers, we find him now in town fired with the same enthusiasm for our King and Country, and the marvelous good advice he gave to the soldier boys in parting made me feel like writing this article. The boys were impressed on the duty they owed to their fathers, mothers, sisters and sweethearts to not forget to write to them when far away and relieve them of as much anxiety as they could. To my mind I thought this advice would be refreshing to those at home and those going abroad. He even asked the band boys before leaving to go up to the House of Refuge and Hospital and give the unfortunate inmates of these institutions a parting tune to cheer them in their loneliness. I have listened to a great many sermons and speeches but few ever impressed me so much as the good advice given by Mr. Rowland on this occasion with the energy and zeal thus shown. I hope we as a people will not cease in our efforts to give a helping hand in every way we can to help and equip those brave lads who so cheerfully risk their own lives in the great cause of civil and religious liberty. Pardon me, but I am writing this as an appreciation of a man who has so unreservedly thrown himself into this noble work of assisting the Empire in her time of need and that the homes of our dear soldiers who were unable to be present may know the great interest which was manifest at this parting of our loved ones.

I remain,
Yours truly,
R. H. McKAY,
Ex-Mayor of Walkerton.

Multiply Thanksgiving Day

That cheery, grateful optimism which makes Thanksgiving real, springs with most of us from a feeling of physical well-being. EVERY DAY begins in this spirit for the man who spends five minutes with a

GILLETTE SAFETY RAZOR

There's something peculiarly refreshing and satisfying about this regular morning shave with a Gillette! It is so quick and easy—so clean and velvet-smooth—that you really enjoy the shave itself—and you get out in the morning looking and feeling your best. And such a start goes a long way toward a day you are glad to have lived!

If you haven't yet tried this way of keeping face and temper smooth, make a start now toward next year's Thanksgiving by getting a Gillette and using it. If you are already a Gillette enthusiast, isn't there someone you know, at home or Overseas, who would heartily appreciate from you a Gillette Razor or Blades?

Gillette "Bulldog", "Aristocrat" and "Standard" Sets cost $5—Pocket Editions $5 and $6—Combination Sets $6.50 up—at Drug, Jewelry and Hardware Stores. 213

Give and heal!

An urgent call for help again goes forth from the Motherland's mighty life-saving agency — the British Red Cross. The Empire is called upon to give greatly, give lovingly, give quickly, that the sick, wounded and suffering on all the battle fronts may not languish and perish in their hours of deepest need.

Here is a great work in which all can share. The Joint War Committee of the British Red Cross Society and Order of St. John is the only institution which carries voluntary aid to the sick and wounded of the British forces on land and sea in every region of the war. Thousands of lives of our bravest and best are saved through this splendid work. YOUR gift may save a life. Isn't it worth doing? It is. GIVE!

Make "Our Day" Your Red Cross Gift Day

Give on October 19th

Ontario's princely gift in 1915 of $1,514,000 rang a clarion mercy call throughout the Empire. The British Red Cross were grateful beyond measure, and their appeal through Lord Lansdowne, President, now comes to us as to friends who sympathize and help. The need is greater to-day than a year ago—it is ever growing. Will Ontario do less than she did last year? No! GIVE—give a day's pay, give all you can, GIVE

The Red Cross looks after the transportation of sick and wounded—it equips thousands of hospitals, rest and convalescent homes. It supplies countless requisites for hospital work, clothing and other comforts. Over 2,000 Red Cross Motor Ambulances are at work on the various fronts, while "rest stations," hospital trains, steamers and launches, food for prisoners, books, special work for the blind, etc., etc., are a few, only, of Red Cross activities.

The Sick and Wounded Call For Your Help

Give on October 19th

Your gift will go entirely to the British Red Cross, where, again, through much voluntary work, the working expenses are cut down to only 2¼% of the total revenue. Thus, if you give $10, actually $9.77½ goes to the healing and saving of some stricken hero. The expenses of the Ontario Committee, advertising, printing, etc., are being met entirely by the Provincial Government.

Premier Hearst Has Seen the Work

"My visit to England and France has aroused deeper appreciation than ever of the splendid work of the Red Cross. It deserves every support, and I trust the people of Ontario will respond with their usual generosity to the British Red Cross Appeal for October 19th."

HON. W. H. HEARST,
Prime Minister of Ontario.

Mr. N. W. Rowell, K.C., Brings a Red Cross Message

"I bring a message of cheer to those who have relatives at the front and who fear they may be wounded. I believe everything human skill can do, that human care and sympathy can provide, is being done and provided each day and each night throughout the year by the Army Medical Corps and the Red Cross. It is a perfect marvel of efficiency."

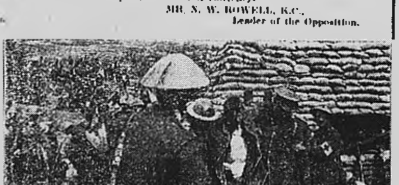
MR. N. W. ROWELL, K.C.,
Leader of the Opposition.

He gives twice who gives quickly. Your help is needed NOW!

The Motherland's only direct appeal to us for help in this great war is her great Red Cross mercy work. Ontario's response must and will be quick and generous. Give through the Treasurer of your Local Committee—or, send your subscription to the Clerk of your municipality—or, make it payable to Hon. T. W. McGarry, Treasurer British Red Cross Fund for Ontario, Parliament Buildings, Toronto.

Don't Let Your Stricken Defenders Call in Vain, but

Give and heal!



Wounded in the Trenches—Official Film, "Battle of the Somme."

POETS' CORNER

THE GOOD OLD DAYS

Dedicated to Hon. Col. W. K. McNaught C. M. G., after listening to his splendid address on "Pioneer Life in Huron County."

Don't you remember the good old days
When life was in its Spring,
When boys like us were full of hope
And we could laugh and sing.
In the old log house right in the woods
And the river near at hand
The spot that Dad selected
To commence to clear the land.

Don't you remember the old fireplace
With its backlog burning bright
The fire that warmed and cheered us all
As we sat around at night.
The old log house is standing still
And the grindstone is at the door
But the ladder's gone that we used to climb
To reach our bedroom floor.

The pond's still there where we used to swim
But the fishing's not the same.
The woods are gone and the lands all cleared
Where there used to be lots of game
The ox-yoke still in the stable stands
But the oxen are no more
And the jumper too has gone its way
From the old log cabin door.

Don't you remember the old sugar bush
Where the sap ran pure and sweet,
The camp where we slept, when the work was done
And the good things we got to eat,
And the sugaring off day when it came around
Don't we remember well
The times we had, and the girls who were there
Which was the best, we could scarcely tell.

Don't you remember the log school house
Where we first learned our A B C's
The wooden bench and the few panes of glass
Through which we could see the trees.
The teacher boarded round us all
And everyone knew him well:
And our folks asked him when he came to us
Who were the best boys, and he could hardly tell.

The folks that live on the old farm now,
Don't know the happy days we've seen,
They store our stuff in the old log house,
Which we thought good enough for the Queen.
Times have changed, and we've changed too,
But we can't forget the past
Our hearts are full when we think of them
And will be while life lasts.

Our neighbours then were kind and true,
Like one big family then.
Boys were boys, and girls were girls,
And the best of sterling men.
Our mothers we can't praise enough
For their work was never through,
But brave and cheerful, full of hope
Did things our women can't do now.

We'll meet someday in the land beyond
Where sorrow is no more
Our hardships and our pleasures past
We're on the Heavenly shore.
And then we'll hear the Heavenly King
Give us our welcome won
By useful lives, we've done our best,
And the King will say—Well done;

Lt-Col. A. F. Belcher,
President Bruce Historical Society.

News About Town

Mr. Harry Goetz of Buffalo, who was here recently attending the funeral of his father, Mr. J. B. Goetz, has two sons, Harry and Arthur, in the U. S. army on the Mexican border. Both are with the 74th Regiment of Buffalo.

Farm products cost more than they used to. "Yes" replied the farmer. When a farmer has to know the "Botanical" name of the thing he is raising and the "Zoological" name of the insect that eats it and the "Chemical" name of what will kill it, somebody's got to pay."

Mr. C. W. Cryderman has received some interesting souvenirs from his son, Wilbur, at Salonika, in the form of a pair of napkin rings made out of the metal from destroyed Zeppelin. Wilbur is still a patient in the Hospital where he was formerly a member of the staff. He is still thin and weak but making good progress.

✦ ✦ ✦

Wilkins—Gordon

A very pretty wedding was solemnized at St. George's Church Calgary, on Wednesday Sept. 20th. at 2 P. M. by the Rev. E. Hodson between Miss M Wilkins and Mr. Arthur Wm. Gordon. The bride looked lovely in white hat and handsome gown of white crepe, duchess trimmed with Maltese lace. She was attended by her sister Miss Lena who was dressed in Battleship silk poplin trimmed with old rose. The groom was attended by his brother Donald M. Gordon. After the ceremony the party left the church amid showers of rice and confetti, going to the house of the bride's parents where a bountiful luncheon was partaken of by the relatives and friends of both bride and groom. Afterwards a most enjoyable time was spent in music and dancing.

Chisholm—Hogg

A very pretty wedding was solemnized at the home of the bride's parents Mr. and Mrs. Robt. Hogg on 27th. September when their youngest daughter Isabella Beatrice was united in marriage to John Bell Chisholm of Cargill. The Bride leaning on the arm of her father entered the parlor to the strains of the wedding march played by Mrs. Littlejohns. The ceremony was performed under an arch of evergreens by Rev. Mr. Jeffreys assisted by Rev. Mr. McKinnon former pastor of the groom. After the ceremony the guests numbering about 45 repaired to the dining room which was tastefully decorated and partook of a sumptuous dinner. The bride's dress was of white Taffeta silk and Georgette crepe trimmed with pearls and white sequin with tulle veil. The bride and groom left on the afternoon train amid showers of confetti and good wishes for a short trip to Toronto and Detroit, the bride wearing a navy blue suit with hat to match. She carried the groom's gift a handsome hand bag. On their return they will reside in the vicinity of Walkerton.

✦ ✦ ✦

In Defense of Mr. Truax

A writer in the Toronto Star makes a good reply to an article by Arthur Hawkes in which Hawkes accuses the members for North and South Bruce of inactivity in recruiting efforts. He writes:—"Let me say a word as to my old friend Reuben Truax, who Hawkes says "is in the same boat as Clark." A more unjust and unwarrant statement could not be made. Hugh Clark is a military man—a colonel. Truax is a business man. He is an elderly man—seventy years of age—and has been in poor health for a year or more. During the hard times preceding the war and ever since he has kept his factory running at practically full time, providing steady work at a financial loss. Is this not very true and practical patriotism? For over forty years Reuben Truax has served his fellowmen, often when it meant a great sacrifice, for not only has he not accumulated a fortune out of public service, but his generosity to all worthy causes has far exceeded any financial returns in connection with his public service. He has always given the best that was in him, in whatever public capacity he was called upon to serve. The flippant reference in Hawkes' article to Mr. Truax was entirely uncalled for. Any man who lives to a ripe old age and is able to look back upon as useful, unselfish, patriotic and as honorable a career as R. E. Truax's will be able to pronounce the final "amen" with a consciousness that he has not lived in vain."

Culross Tp. Council

Town Hall, Teeswater, Sept. 25,

Council met on above date, members all present except Wm. Case. The minutes of the last meeting read and sustained.

Donaldson—McPherson—That Jno. Armstrong act as chairman of finance for this meeting. Carried.

Neighboring Villages

Country Correspondence Continued From Page Eight. . . .

HANOVER

The Hanover boys of the 147th Grey Battalion were home on last leave the past week. The boys expect to start Overseas within a few days.

In the recent severe fighting at Courcelett, Sergt. Jack Wilson of Hanover, at three different times took charge of his own men, the officers commanding his company having been put out of action.

Mrs. (Rev.) A. W. Sauer, wife of the pastor of Hanover Evangelical church, who has been in the hospital at Kitchener for the past two weeks, underwent an operation on Tuesday of this week. A late report was of a favorable nature. Her many friends hope for the best.

The following Hanover boys who are members of the Bruce County battalion were home on last leave this past week: Lieut. Harry Zinn, A. C. Augustinus, Ed. Wendorf, H. S. Sewell, D. Beamish, Sam Wright and W. George.

Mrs. Henry Tramp passed away at the family home here at the age of 78 years. She had been ill for about 2 years, having taken a paralytic stroke then. Deceased was born in Germany, her maiden name being Sophia Tamms. She married Mr. Tramp in the old land and they emigrated to Canada about 45 years ago, and very soon moved to Hanover and resided here ever since. They had 5 children, 4 living as follows: Fred, Theo and Mrs. James Maycock of Hanover and Joseph of Brandon, Man. Deceased was a member of the Lutheran church.

Mr. Harvey Lucas of Markdale, recently of the Winnipeg branch of the Merchants Bank, has been appointed accountant at Hanover to fill the position left vacant by the removal of Mr. R. M. Macpherson to Chatsworth.

PINKERTON

Miss Mary McKee of Stratford, spent Thanksgiving at her home here.

Mr. Tom Pinkerton and Mrs. R. Trotter of Toronto, renewed acquaintances here last week.

A large crowd attended the farewell banquet to seven soldiers who enlisted with the 160th and who were home on last leave. Each soldier was presented with $5, also a pair of socks by the Red Cross Society. Ptes. Edgar Campbell, J. Wolfe and Gordon Pinkerton returned to London on Saturday, and the remainder of the boys on Monday. We wish them every success and a safe return.

Messrs Harvey and Lloyd Pinkerton motored to the lake on Friday evening in the search for "coons" but unfortunately did not find any of the furry creatures.

The Annual Meeting of the Pinkerton Red Cross was held on Sept. 28th. All the officers were re-elected. Total amount of money received during the past year.......... $481.68.
Amount paid out.......... $351.65
Balance on hand.......... $130.03
Lunch was served at the close of the meeting.

Miss Marie Pinkerton spent Thanksgiving with her friend, Miss Sadie Colwell on the 9th of Kincardine.

The Ball in the Hall last Wednesday night was well attended.

OTTER CREEK

Mr. Edward Fennel and Miss Katie Grem were visiting in Mildmay last Sunday at Mr. Wm. Klein's.

Miss Susan and Jennie Bell were visiting friends near Mildmay last week.

Mr. Daniel Reuben and mother were visitors on the fourteenth last week.

Pte. Albert Fenner arrived home for the last time before going overseas.

Miss Anderson from Walkerton was a visitor at Mr. Walter Jasper's last week.

Mr. John Pfohl made a business trip to the 14th on Saturday last.

Corn cutting, Apple Butter Boiling and seeing the Threshers' Black faces is the order of the day.

Quite a number from here attended the Y. P. A. Social of the Evangelical Association last Tuesday night, all reporting having a splendid time.

Mr. Henry Ruswurm is at present at work putting up Mr. Adam Horsfeld's silo.

Mr. Wilfred Schulthies of Mildmay was a visitor at Mr. John Bell's last week.

Mr. Theodore Loos made a business trip to Mr. John Fenner's last week.

Mrs. Thomas Hutton was a visitor at Mr. Henry Wolfe's, Sunday,

Miss Elsie Clyndening of Walkerton was visiting friends around here.

Rev. and Mrs. Granzenbach were visiting friends around here last week.

Mr. Wilfred Gress met with a very peculiar accident last week at threshing when one man accidently struck the prongs of his fork in his throat mouth and eye. He got off luckily with nothing dangerous but a badly swollen eye which when put under the doctor's care soon became alright.

Mrs. Wm. Knechtel, Mr. and Mrs. Henry Knechtel, Mr. Elmer Knechtel and Miss Lilian Gress of Hanover and Mr. and Mrs. Emerson Schumacher and daughter of Mildmay and Mr. and Mrs. William Klein and son of Mildmay, Miss Susan and Jennie Bell, and Miss Kate Gress, were all at Mr. Philip Gress's on Sunday last to bid their friend, Pte. Albert Fenner farewell, before his going Overseas.

Mr. and Mrs. J. McGregor of Walkerton visited around here on Sunday.

Mrs. Hammel of Brant was a business visitor at Mr. Walter Hickling's last week.

Mr Peter Wolfe of Clifford was a visitor at Mr. Henry Wolfe's on Sunday.

EDEN GROVE

Now is the time to thresh the pumpkins.

The S. S. Rally held in the Methodist Church was a decided success.

Quite a number from here attended the Paisley fair Wednesday and report the town was'nt altogether dry during afternoon and evening.

Bring your Rifles and shot-guns to the Shooting Match here Thanksgiving.

Sunny Jim was the guest of Mr. and Mrs. Rosseau Mansion House Clifford Thursday and reports Tony doing a fine business and has everything up to date. Stop and see him while in that vicinity.

Leut. Gordon Connell of the 160th, was tendered a right royal welcome Monday evening at the home of Mr. and Mrs. R. Pearson, "Quality Hill" by his numerous friends in the Grove, whom the Hostess had kindly invited in for the evening to do honor to our young soldier who expects to soon go overseas. All wish him a safe return.

Mr. and Mrs. McBride were the guests of Mr. and Mrs. McKinnon last week.

The young people of the Methodist Church are busy arranging a good program for their Annual Fowl supper on the 16th.

Mr. T. Desmond shipped car of cattle to Toronto Saturday.

Mr. and Mrs. A. Rosseau, Clifford, called on friends in the Grove Sunday.

Will Reynolds spent the week end in London. Mr. Sparling, Cargill, relieves him during his absence.

Mrs. Elder Cargill visited friends here Thursday.

Canada has a great deal to be thankful for this year.

NARVA

A very pleasant time was spent at the home of Mr. and Mrs. Wm. Nicholls, con. 16 Greenock, on Friday evening Oct. 6th. when a large number of friends and neighbors called in to meet with their son John, who is on his last leave of absence before going overseas. John, like many other Bruce boys, heard the call of his Country and although young in years, he bravely responded by joining the 160th Bruce Battalion of which every Bruce citizen should be proud.

The evening was made enjoyable by speeches, songs, selections on the gramaphone and a general social time. Also the following address was read and John was presented with a handsome wrist watch and a fountain pen. With many good wishes to our genial host and hostess and to John, the friends withdrew.

To John Nicholls,
Dear Friend—

We your friends and neighbors, have met with you this evening on the eve of your departure for your final training course across the sea, and quite possibly for active service service on the blood stained fields of Flanders.

As we see and understand this great war, Britain, the home of the brave and the true, entered this war to protect the homes, the liberties and freedom of the weak against the strong. The wheel of oppression and tyranny rolled out toward Servia and along to and over little Belgium where many brave, noble and true hearts were crushed beneath the onward sweep of German Militarism. Britain stood the test and sent a few men, ill-equipped, and joined hands with France and stayed the onward sweep of one of the most gigantic enemies of freedom and right that ever drew the sword.

From our motherland went out the call and from each Colony that forms our great Empire the answer went back in the sending of thousands of our noble sons, willing to go to the Front, yes, willing to fight, to suffer, to bleed, to die, in the cause of freedom and justice. This has caused a deeper sense of brotherhood between all the overseas Dominions and of common loyalty to the Mother Country, linking us together in mutual sympathy.

We wish, we hope, we pray for peace, but the peace that costs a great sacrifice is the more lasting. This is a great war, the greatest conflict in history, the greatest number of men engaged, the greatest amount of property destroyed, the greatest engines of destruction that ever were invented are in use, the greatest number of lives will be lost, the greatest number of hearts will be made sad, the greatest number of chairs around the fireside will be made vacant, many of them never to be filled again.

As we think of these things, we are led to ask, "Does God still live? Does His hand still guide the destinies of the nations? What answer will we give? Germany forgot God. Russia France, Britain, Canada, yes, and Ontario were fast losing their hold on God. This great conflict as it draws to a close, when every home in every nation engaged feels the touch of this war, then we may realize that there is a God and that His hand is still at the helm to guide this great world conflict back to peace and to the Prince of Peace.

You have heard the call of your King and Country. You have enlisted. You have put on our King's uniform. You are ready to follow your captain. Be true to your King. Be true to yourself, and above all, be true to your God, trust and look to him for help, take His word as your guide and you are safe.

We ask you to accept this present just to remind you of your old home and friends in Greenock.

Signed

Chas. Webb, Thos. Fullerton,
Howard Parker, Thos. H. Purdy,
Scott Webb.

SOLWAY

Miss G. McGarity from Toronto spent the holiday at her home here.

Mr. and Mrs. E. O'Connor and Miss Elizabeth spent Sunday at Mr. Dave O'Connor's near Chesley.

Miss Gladys Lambertus returned to her home here on Monday after spending a week with friends in Teeswater.

Miss Aileen Rankin who has been residing at the home of her sister Mrs. Chas. Ormiston returned to the West last week.

Pte. C. McWhinney of the 160th, Bruce Batt. called on friends in this vicinity before returning to London on Saturday.

Mr. Julius Holm spent Thanksgiving with friends in Normanby.

Miss K. McGuire from Toronto spent the week-end at Mr. Jas. Cahoon's.

Miss Rosa Klein spent a few days last week at the home of Mr. Wm. Lambertus.

Mrs. Alex Coates from Walkerton spent the week-end at Mr. Thos. Coates'.

Miss G. Faills from Toronto is spending a few weeks at the home of her sister Mrs. Jas. Cahoon.

Mr. and Mrs. John Stroeder spent Sunday at the home of Mr. Alex Stroeder on the South Line.

Mr. and Mrs. Henry Bross from Mildmay spent Sunday at the home of the latter's sister Mrs. A. Knell.

MILDMAY

Mrs. J. T. Kidd and family moved to Toronto on Tuesday morning where they will take up residence on Markham Street.

Mr. Anthony Schneider and son Frank, returned home from the West this week.

Mr. Jack Schnurr of Galt is visiting at his home here this week. Jack is car checker for the C. P. R. at Galt.

Mr. and Mrs. John Schnurr motored to Elmwood on Sunday morning to attend the funeral of Mr. Schnurr's sister, Mrs. M. Goetz who died very suddenly on Friday evening. The funeral is to take place on Monday afternoon.

Mr. H. G. Wright has moved his furniture into the rooms above the bank where he and his family will now live.

Mr. Alfred Sauer left on Thursday morning of last week for the West, to take a position in the bank at Pipestone, Man.

Mr. Will Keelan who is manager of the bank in that place.

Miss Elda Gowdy was operated on three weeks ago for appendicitis. is now well on the way to recovery. She is able to about.

Rev. Walls of Hanover occupied the pulpit in the Methodist Church on Sunday last, both morning and evening. Rev. J. Mitchell B. A. of Woodstock will conduct Thanksgiving services next Sunday. Mr. Mitchel had charge of the church here last May and June and was well liked.

Mrs. Burn went to Hespeler on Monday morning to wait on Mr. Burn's mother who is very ill at present.

Lieut. Geo. Helwig of London Camp is home for his last leave before the 160th leave London. He returns on Tuesday. Earl Harper of the 160th Batt. is home on his last leave of absence. The other Mildmay boys in the 160th will get their leave of absence from Tuesday to Friday this week.

Mr. Fred Filsinger, son of Reeve Filsinger, motored up from Berlin on Sunday.

Mr. Hessenauer of Berlin was a visitor in town on Sunday and Monday last.

Jacob Palm's new residence, south of the Catholic Church, is nearly ready for occupation now.

Mr. Bricker of Berlin was in town over Sunday.

Miss Melinda Pietsch spent last week with Mrs. Jacob Ruswurm in Hanover.

A large number of the members of the local Y. P. A. went to Hanover last Tuesday to attend a social given by the Hanover Y. P. A.

Mr. and Mrs. J. Ruswurm visited in town over Sunday.

CURRENT COMMENT

PROHIBITION FIGURES.

The Province of Ontario is now under a prohibitory law for the duration of the war. It came quietly into force last Saturday night, and we believe that there is a desire on the part of the public to give it a fair trial and we also believe that the Ontario License Commission will do its best to have its provisions observed. Only in this way can a fair estimate of its worth be obtained. The whole of Canada is more or less under prohibition. We are indebted to the Pioneer for some figures on the question. The following table gives the last dates on which it was, or will be, lawful to sell liquor by retail in the different parts of the Dominion of Canada:

Prince Edward Island	1901
Saskatchewan	June 30th, 1915
Manitoba	May 31st, 1916
Nova Scotia	June 29th, 1916
Alberta	June 30th, 1916
Ontario	Sept. 16th, 1916
New Brunswick	April 30th, 1917
British Columbia	June 30th, 1917
Yukon Territory	July 15th, 1917

Quebec, as a Province, has passed no prohibitory law, but two-thirds of the Province are under local option. The prohibition includes all retail liquor selling, except in Saskatchewan, in which there are still twenty Government-operated liquor shops. Newfoundland also will finish up her licensed liquor-selling on December 31st, 1916.

It is anticipated that perhaps twenty licenses will be granted manufacturers of native wines under Section 44 of the Ontario Temperance Act. The Board of Commissioners has decided that before licenses are granted a member of the Ontario License Board will visit every place of manufacture.

The board takes the stand that the provision made in the Ontario Temperance Act extending special privileges to the makers of native wines from Ontario-grown grapes was put there to assist the grape-growing industry, and that the manufacturer of native wines who sells a product that is not entirely made of home-grown grapes is not complying with the spirit of the law.

"We propose to see that native wines sold in the province are manufactured from Ontario grapes and Ontario grapes only," said Chairman Flavelle. "I have been told that there are some makers who bring in cheap wine in bulk from outside the province, and by mixing in a small proportion of Ontario grapes hope to come within the law. Firms of that type will not receive licenses from this board."

A Parliamentary return issued by the British Government embodies statistics showing the number of convictions for drunkenness during the first six months of 1916, and the areas brought under partial prohibition as compared with the areas in the same districts for the first six months of 1915. The Board of Control area is now taking up a great deal of England and a considerable part of Scotland. Here is the statement:

ENGLAND.

District	Weekly Avge. 1915	1916
Greater London	1,077	349
Liverpool	207	107
Manchester	50	49
Newcastle	63	37
Birmingham	37	24
Leeds	24	10
Sheffield	22	11
Middleborough	27	10
Gateshead	21	12
SCOTLAND.		
Edinburgh	120	79
Glasgow	323	233
Dundee	70	48
Aberdeen	42	25

Reports from the Northwest of Canada are to the effect that the arrests for drunkenness have decreased since prohibition came into force.

A new summing up of the State prohibition situation in the United States by the Amethyst, the organ of the United States Presbyterian Board of Temperance, is in the following form:

There are 18 Prohibition States and the nineteenth, Virginia, will be added November 21, 1916. Of these 19 States 12 became dry by popular vote. The record is as follows:

POPULAR VOTE.

State	Date	Majority
Arizona	Jan. 1, 1915	3,144
Colorado	Jan. 1, 1916	1,572
Kansas	Nov. 23, 1880	7,998
North Carolina	Jan. 1, 1909	44,196
South Carolina	Dec. 31, 1915	[illegible]
North Dakota	Nov. 2, 1889	1,159
Oklahoma	1907	18,103
Oregon	Jan. 1, 1916	36,480
Virginia	Nov. 1, 1916	30,365
Washington	Jan. 1, 1916	18,632
West Virginia	Jan. 1, 1914	92,342
Maine	1884	41,972

BY LEGISLATIVE ACT.

Alabama	July 1, 1915
Arkansas	Jan. 1, 1916
Georgia	Jan. 1, 1908
Idaho	Jan. 1, 1916
Iowa	Jan. 1, 1916
Mississippi	Dec. 31, 1908
Tennessee	July 1, 1909

New Product From Seaweed.

Algin is a new product made from seaweed, the discovery of which is announced from Liverpool, and for algin many valuable qualities are claimed. It is used in the treatment of paper to make the latter proof against the action of germs, water and flame, and it is also used in the manufacture of a non-inflammable film for moving picture purposes.

The ratio of color-blind people to those of normal sight is about 65 to 1,164. This does not mean that all of the 65 are absolutely color-blind, but that that is the ratio of those who are more less affected.

HER HUMBLE LOVER

Signa shakes her head.

He takes her hand and draws her to the window.

"Look there," he says, with a quaint air of anticipating her surprise; and Signa utters an exclamation of astonishment. Below her lies the valley, with its river running down to the sea, which rolls on to the sands in gleaming bars of silver foam; but it is not the river, nor the sea, nor the climbing limbs of noble trees which call for the exclamation, but the apparition of a huge mansion which lies almost at their feet, and which she has hitherto missed. White, almost snow white in the moonlight, it seemed to float, phantom like, amidst the softly waving trees and flowing river.

The child laughs gleefully.

"I thought you hadn't seen it!" says, triumphantly. "Most people never guess that it's there. It's a real place, you know."

"So I suppose," says Signa, laughing.

"But I pretend it isn't," says Archie, gravely. "I pretend it is filled with knights, and ladies, and men in armor."

"Instead of which," says Signa, almost to herself, "it is probably filled with gentlemen in shooting jackets and ladies in the latest Newmarkets;" but softly as she says it, he hears her.

"Oh, no, but it isn't!" he says, growing over her. "It's empty."

"Empty!" exclaims Signa, staring at the magnificent pile. And, as she looks she notices that the gardens, exquisitely planned as they are, are lying in a state of decay under the moonlight; that there are no lights in the windows; that no sight or sound of living thing is to be seen or heard.

She turns with a laugh to the child, who kneels on a chair by her side, with his chin perched on his hands, staring gravely, comically down at the house.

"So it is, Archie. What a shame!"

"Isn't it?" he says. "That's what papa says. He says that the earl—it belongs to an earl, you know—is neglecting his duty," with a shrewd imitation of the rector's pulpit style—"neglecting his duty and wasting his substance in foreign lands, while the house of his fathers is left to decay," and he eyes Signa with an elfish gleam in his solemn eyes.

Signa struggles with her laughter, but the imitation is too good, and a silvery peal rings like music through the room, causing Archie to start and thrill with apprehension.

"Oh, I forgot," she says, checking herself. But it was your fault, you wicked, unearthly child. Archie, you must have learnt that by heart. But say—I'm not laughing at you — you mustn't imitate papa; it's very wicked."

"Is it?" he says, rather carelessly. "I won't do it if you don't like it. I won't do anything you don't like. You must tell me what you like, you know. I wish you would let me stay here. I could sleep on that woolly rug, couldn't I?"

"No—no," says Signa. "Mamma would be angry, dear. Come, you must go now. See, I will hold the light. Come," and she takes his hand in hers and opens the door.

"Will you stoop down and let me kiss you?" he asks, and she bends down.

"Good night, princess," he whispers solemnly, and Signa, holding the light above her head, sees his white figure disappearing not quickly, but slowly, down the long passage.

Then she closes and locks the door and goes to the window.

Yes, it is real enough, the vast place with every pillow and window standing out against the background of the trees, and as she looks down at it, all so solitary and silent, she can sympathize with Master Archie's childish dream, and almost feel inclined to dream herself.

"What a pity" she murmurs. "What an idiot a man must be to leave a place like this to the moth that devours, and to the rust that decays! An earl, the child said; perhaps he has a half dozen such places; at any rate, he has none grander than this. Yes, I can see the weeds on the great gravel path. I wonder now, whether my uncle, the rector, would deem it a great crime if I ventured to pay a visit of exploration? Archie should accompany me, and we would people the old place to our heart's content."

Then she turns from the window, and is about to close it, when a man's voice, singing a scrap of the opera "Carmen" floats upward.

With a start, Signa draws back and listens; half convinced that it was fancy. But after a pause the voice floats up again, and almost against herself she draws the blind aside and looks down.

As she does so the song, the scrap of careless song, ceases, but she sees, or fancies that she sees, a shadow of man cross the weedy gravel path and join the other shadows in the shrubbery.

For a moment her blood runs quicker in her veins, then, with a laugh, she drops the blind and turns away.

"I'd better go to bed," half ashamed of the effect the sudden appearance of life in the old place has produced on her. "Yes, certainly I had better go to bed, or, like Archie, I shall be dreaming 'big dreams.'"

CHAPTER III.

"The boy stood on the burning deck." "The boy stood on the burning deck," repeats Archie, with a yawn.

"Well," says Signa, "that boy has been standing on that burning deck a long time, Archie. Don't you remember any more of it?"

And she looks up from the volume of poems with an amused smile.

"There's something about dad, or fled, or head," says Archie, "but I forget exactly what it is. Oh, I remember now! 'The boy stood on the burning deck, whence all but him had fled.' The—the—no! It's no use, Signa; I think the sun has got into my head. It would be nice down by the shore. The tide is just coming in. Don't you think the boy might stand on the burning deck until tomorrow?"

And he looks up at her with the quaint gravity that is so much in advance of his years.

"Perhaps he might," says Signa, glancing out of the window rather wistfully. "Put the books up while I fetch my hat and we'll have a scamper."

A week has passed since Signa arrived at Northwell Rectory. Looking back at the monotonous seven days, Signa is inclined to think that but for Archie she would have been reduced to a state of imbecility like that of Mariana of "The Moated Grange." Never in all her varied and extended experience, has she known what boredom is until now; and but for Archie she feels that she must have given up in despair and taken refuge in flight. But Archie has been the saving clause.

"I must do something," she said to the rector on the first morning. "I'm afraid I shouldn't do much good to the poor, or be of much assistance in looking after the parish, I never know what to say to poor people, and should feel that I had been guilty of great rudeness in entering their houses without an invitation. Oh, no! I am sure I should prove a failure. But I think I can find something to do. I will teach little Archie, if you will let me?"

And the rector had coughed and set his book down and looked at Mrs. Podswell, who had moaned faintly and murmured something about the child being very slow and obstinate.

"Slow!" echoed Signa, but pulled herself up in time. "I've lots of patience," she said; "let me try. We have struck up an acquaintance, sworn a friendship, indeed, already."

The pleasant parents neither said "yea" nor "nay," but Signa took their incoherent response as a consent, and assumed the duties of Archie's guide, mentor and friend at once, much to the unexpressed relief of the rector and his wife, who were only too glad to shift their responsibility. For Signa soon discovered that these worthy people's duty consisted in urging upon other people the duty of hard work, and doing as little as they themselves could help. The "martyr" lay on the sofa all day and scolded the servants, and the rector lounged about the garden, or strolled aimlessly round his parish, and talked about "duty" to the curate, a lean and care-worn young gentleman, who worked from morning to night on a salary of something under a hundred a year.

Signa and her charge lived almost solitary lives together. An old room was found at the end of the rambling house, and converted into a schoolroom, and here, when they were not walking in the lanes, or clambering about the beach, the two spent their time; putting in an appearance in the dining room at meal times. It was an admirable arrangement, and it suited all parties concerned, and no one better than Signa herself. With her uncle and aunt, she was as quiet and silent as the first evening she arrived; but up in that old room overlooking the sea, there were many bursts of song and laughter, which never reached the gloomy apartments downstairs.

Archie was the companion of all her walks, and chatted to her as he never chatted to any one else, pointing out the celebrities of the village on the Stor, and amusing her with his quaint criticisms on persons and things.

He pointed out Captain Jenks, the half-pay captain, who used to promenade up and down the quay in a suit of blue serge with brass buttons, and with a telescope under his arm. He also showed her the captain's son, a local swell in gaudy costume, who, said Archie, shrewdly, "spends all his time, Signa, leaning over the bar of the hotel; you'll see him if you look in at the door, talking with the young lady behind the bar." But Signa declined. He told her the names of the boatmen sauntering on the beach, or mending their nets, and soon the "beautiful young miss that Master Archie allers has with him" began to be known, and the men touched their hats, and the women courtesied and Captain Jenks made a nautical salute, and young Mr. Jenks stared with all his eyes when her back was turned, and blushed and glared at his boots when he met her face to face. And thus the strange girl was getting gradually to be a part and parcel of the place, and—well, if she was not happy, she was at peace. She was living in one of Archie's enchanted castles for the present, but the time was coming when the spell should be broken, and how near that time was she little guessed.

"There is one thing I like about you awfully, Signa," says Archie, as they turn out of the gate and run hand in hand down to the shore. "You really mean it when you say you'll only be a minute; now it takes mamma half an hour to put her things on, and Miss Plumbe—that's the girl with the red cheeks, the doctor's daughter, you know; we met her yesterday in the High street, and she whispered to you that I was a singular child; but I heard her."

"I remember," says Signa, with a laugh. "You have sharp ears, Archie."

"Well, when she comes to dinner she takes a quarter of an hour to take her hat off. I've counted the time by the clock. Oh, Signa, let us go into the Grange gardens instead of to the sea," and he stops short in front of a pair of tall iron gates that stand at the entrance to the grass-grown avenue leading to the great white house, which he had shown her in the moonlight. It is not the first time they have stood and looked between the rusty bars, and Signa had listened to no end of Archie's stories about the big place, stories half wild and fearfully fabulous, made up from snatches of dinner table talk he had heard from his father. But hitherto they had not ventured beyond the gates, partly in consequence of Archie's never-ceasing anxiety to get to the beach, and partly because, for some reason too vague to put into words, Signa has avoided mentioning the subject to the rector.

They stand now looking in, Archie impatient, Signa hesitating.

"Come on," he says, with a tug at her soft, white hand. "Let us go right up to the house. I'll show you the sundial and the place where the prince sat when he was here—a prince did really come and stay here—papa remembers it——"

"The last temptation is irresistible," says Signa, with a smile; "but the gates are locked, Archie."

Archie laughs scornfully.

"Of course they are, and we couldn't open them if they weren't; they're too old and rusty: but I know a place to get in at, if you'll stoop. I suppose you're not too tall to stoop very, very low?" and he looks at her critically. "Let's see," and he half drags her to a gap in the hedge, half protected by a rough bar of wood, and instantly slips under like a rabbit. "Here I am, and I shan't come back," he says, with a laugh; "so you'd best follow, or I shall think you can't bend!"

Signa hesitates another moment, then stoops and passes beneath the bar. Wouldn't it have been better if she had kept straight on her way, and refused to pass the boundary-line of Northwell Grange? The Fates alone can say. It was the Rubicon of her young life—and she passed it.

"Come on!" exclaims Archie; "don't be afraid!" for Signa stops short as there flashes to her remembrance the snatch of "Carmen" that came floating up to her window, and the tall shadow that she saw or fancied that she saw, disappear among the trees. "There's nothing to be afraid of except the deer, and even a girl can't be afraid of them. See! there they go!" and he throws up his arms and scares a herd of deer, that flit across the grass-grown avenue, and stand looking at the intruders with wide-open eyes and pricked up ears.

"Tell me, Archie," says Signa, as she comes up to him, and stands to stare at the wide-stretching front of the great empty place, "do deer sing?"

"Do—deer—" and he bursts into a shrill laugh of glee. "Why, what made you ask that, Signa? Of course not; at least, not out of a fairy book. They do all sorts of things in Fairyland."

"Perhaps this is Fairyland," said Signa, "and I heard one of them in a fairly good tenor voice singing the air from 'Carmen'—I mean from an opera, Archie."

The child stares at her with his head on one side, then he goes on with the confidence of a superior mind.

"It must have been the gardener," he says. "He lives in that lodge there; you can't see it from here, and he sings sometimes, and he plays the concertina."

Signa laughs.

"We'll say it was the gardener," she asserts carelessly: "Ah, Archie, what a beautiful place!" and she leans her hand against the stone pier of the broad steps, and puts her hat back with an air of enjoyable admiration.

"Isn't it?" exclaims Archie, as proud as if it belonged to him. "But, come up the steps, Signa—come up and look through the window. Don't be afraid; there's nobody there. See, the lock's all rusted, and there's grass on the steps. Papa says that the furniture must be all worm eaten and decaying away. I should like to go inside, shouldn't you?"

Signa leans on the broad window-sill, and peers through the dirty glass into a vast hall.

"Very much," she admits, "but don't let that tempt you to commit a burglary, Archie; you were quite capable of it, I know! Ah! what a pity!"

"What a pity it's left like this," he says, in his shrewd, quick way. "Isn't it? Signa, do you know what I would do if I were Lord Delamere, and Northwell Grange was mine?"

"I can't even guess," she says, taking his hand and wandering round the terrace.

"I should marry you, and come to live here," he says, gravely.

"You might do worse, Archie," says Signa. "And I'm very much obliged to you. But come along, Archie, I'm not quite so hardened as you, and I'm in mortal fear of some one or something appearing on the scene and demanding our business here. Let us go back into the lane and down to the sea."

"Go back!" he laughs, with superior knowledge. "We needn't do that. Look here, come with me and I'll take you to the sea in a couple of minutes."

Signa pauses a moment to look back at the wing of the house they have wandered round, then she gives him her hand, and with all due triumph he leads her down a sheltered avenue of shrubs, and suddenly, as if by magic, she finds herself at the end of a miniature precipice, at the bottom of which lies a cove of sand all golden in the sunlight, and upon which the green sea is rolling in with a musical, lapping sound.

"Mind! Don't fall!" says Archie. There used to be a rail here, but it got rotten, and some one leant on it and toppled over and broke his arm, and so the gardener took it right away —not the arm, but the rail. There are some steps here. Give me your hand. Don't be afraid," and he drops like a feather on to the first rough step and holds up his tiny paw.

Under pretense of accepting his assistance, Signa keeps a pretty tight grasp of the small fingers, and they descend to the little sheltered bay, and Archie points up with a laugh.

"See, the Grange has disappeared, Signa. Nobody would ever guess it was there, would they? They say the earl—this one's father—had this cut out of the rock so that he could come and get into his boat without being seen from the house, and row over to the town. I don't know what for; but papa said that he was a wicked old man. Now you sit down; I dare say you're tired. Girls always get tired, don't they? And I'll just build a castle with a moat round it. Would you lend me your sunshade for a spade? I won't hurt it; sand comes off quite easy."

Signa looks at the sunshade for a second, then tosses it to him with a laugh, and curling herself up in a corner sits and dreams, her hands folded idly in her lap, her hat lying on the pebbles beside her, her eyes fixed on the distant horizon. Half an hour passes; Archie has erected a huge mound of sand surrounded by a canal; the sunshade is irretrievably ruined; his boots and stockings are wet; he is supremely and ecstatically happy. Signa has been erecting her castle, and it is as unsubstantial as Archie's. Half unconsciously, the sight of the deserted house has entered into her fairy visions, and she has been weaving a fantastic history of the owner.

(To be continued.)

The man who strains at a gnat and swallows a camel would choke on a fish bone and swallow a fish story whole.

Teacher—Tommy, can you spell "fur"? Thomas—Yes, sir, F-U-R. Teacher—That's right. Now can you tell me what fur is? Thomas—Yes, sir. Fur is an awful long way.—Cornell Widow.

Gunpowder and Artillery.

There is abundant evidence that the origin of gunpowder and artillery goes far back in the dim ages of the past. The Hindu code, compiled long before the Christian era prohibited the making of war with cannon and guns or any kind of firearms. Quintus Curtius informs us that Alexander the Great met with firearms in Asia, and Philostratus says that Alexander's conquests were arrested by the use of gunpowder. It is also written that those wise men who lived in the cities of the Ganges "overthrew their enemies with tempests and thunderbolts shot from the walls."

Minard's Liniment Cures Garget in Cows.

Storm Often Misnamed.

It is a curious fact that what is generally known in some of the eastern states as a northeastern storm is in reality, says Popular Mechanics, of quite a contrary origin. Because a strong wind which frequently carries heavy rain is apparently driven from a northeasterly direction it is popularly assumed in a specific area that the storm originates somewhere in a northeastern zone, while in truth its real source is in the west or southwest. The explanation is that such a disturbance is merely an air draft of a barometric depression in the opposite direction. The storm is known as a "flareback" and is one of the conditions which cause a weather forecaster difficulty.

GET A TRIAL BOTTLE TO-DAY.

With reliable old Nerviline you can rub out the pain of Rheumatism, Sciatica, Lumbago, or Neuralgia—rub it away so completely that you feel like new all over.

It matters not how deeply seated the pain is, or how long you have had it—rubbing with the king of all liniments "Nerviline" will cure you.

Nerviline is highly concentrated—about five times stronger than the ordinary white ammonia liniment—therefore it penetrates quickly—sinks in deeply—and gets right at the core of the pain at once—draws out the lameness, takes away the stiffness—eases the joints that have hurt you so much.

Out comes the pain every time you rub on Nerviline, which contains some of the most valuable pain subduing remedies known to science. Worth its weight in gold to every family in the land, and sure to cure the emergent and minor ills of a hundred kinds that constantly arise. Get the large 50c. family size bottle; small trial size 25c. Nerviline is sold by every dealer everywhere.

About the U. S. Presidents.

The religious connections of the presidents of the United States have been as follows:

Episcopalian — Washington, Madison, Monroe, W. H. Harrison, Tyler, Taylor, Pierce and Arthur.

Presbyterian—Jackson, Polk, Buchanan, Lincoln, Cleveland, Benjamin Harrison, Wilson.

Methodist—Johnson, Grant, Hayes, McKinley.

Reformed—Van Buren, Roosevelt.

Unitarian—John Adams, John Quincy Adams, Fillmore, Taft.

Disciples—Garfield.

Thomas Jefferson was not a sectarian, but his biographer says that he was a believer. President Johnson was not a church member, but attended the Methodist church, of which his wife was a member.

Three presidents of the United States have been Harvard men, the Adamses and Roosevelt. Two have been Princeton, Madison and Wilson. Jefferson, Monroe and John Tyler were from William and Mary. Polk was graduated from the University of North Carolina, Pierce from Bowdoin, Buchanan from Dickinson, Hayes from Kenyon, Garfield from Williams, Arthur from Union, Taft from Yale. Although there have been several soldiers elected to the presidency because of their military achievements, Grant is the only West Point graduate.—Syracuse Post Standard.

Frozen Food in Siberia.

The markets of Irkutsk, in Siberia, are an interesting sight, for the products offered for sale are in most cases frozen solid. Fish are piled up in stacks like so much cordwood, and meat likewise. All kinds of fowl are similarly frozen and piled up. Some animals brought into the market whole are propped up on their legs and have the appearance of being actually alive, and as one goes through the markets one seems to be surrounded by living pigs, sheep, oxen and fowls standing up. But, stranger yet, even the liquids are frozen solid and sold in blocks. Milk is frozen into a block in this way and with a string or a stick frozen into and projecting from it. This, it is said, is for the convenience of the purchaser, who is thus enabled to carry his milk by the string or stick handle.

A druggist can obtain an imitation of MINARD'S LINIMENT from a Toronto house at a very low price, and have it labeled his own product.

This greasy imitation is the poorest one we have yet seen of the many that every Tom, Dick and Harry has tried to introduce.

Ask for MINARD'S and you will get it.

French Foods.

Do you know them?

The French have many dainties.

Various places have special delicacies.

The "chitterlings" of Troyes are much sought after.

So are the "truffles" of Perigord and the "madeleines" of Commercy.

Did you ever eat the snails of Burgundy, the shrimps of Mantes or sardines of Nantes and Royan?

Great gastronomic delicacies are the capons of Mans, the Bayonne hams, Rouen ducks and Fecamp herrings.

Add to these oysters of Marennes, Cancale and Arcachon, fowls of Bresse (fed from the Doubs) and "grenouilles"—frogs.

Verdun, where the great battle rages, is noted for candied almonds; Nancy, of war fame, for macaroons; Chartres and Nerac for patés.

Among the specialities in French fruits and vegetables are Agen prunes, Montmorency cherries and Fontainebleau white grapes.

Isigny butter, Rheims biscuits, Arles and Lyons "saucissons," Cavaillon melons, La Garde chestnuts, Argenteuil asparagus, Chateau Briand Angelicas, Soissons haricots beans and Bar le Duc jams are among the table foods prized in war-torn France.

PILES CURED AT HOME BY NEW ABSORPTION METHOD

If you suffer from bleeding, itching, blind or protruding Piles, send me your address, and I will tell you how to cure yourself at home by the new absorption treatment; and will also send some of this home treatment free for trial, with references from your own locality, if requested. Immediate relief and permanent cure assured. Send no money, but tell others of this offer. Write to-day to Mrs. M. Summers, Box P. 8, Windsor, Ont.

Absolute Reality.

What does our science, so sublime compared with the frailty of our means, so contemptible in the face of the boundless spaces of the unknown, what does our science know of absolute reality? Nothing. The world interests us only because of the ideas which we form of it. Remove the idea and everything becomes sterile, chaos, empty nothingness. An omnium gatherum of facts is not knowledge, but at most a cold catalogue which we must thaw and quicken at the fire of the latter; we must introduce thought and the light of reason; we must interpret. —Fabre.

Union Stock Yards, Toronto

American "Howlers."

Some amusing examples of American schoolchildren's "howlers" are provided by recent examination papers in New York. Here are a few choice specimens:

A vacuum is a large empty space where the Pope lives.

In India a man out of a cask may not marry a woman out of another cask.

Elaine gave Launcelot an omelet before he departed for the tournament.

He succeeded because he had entry price (enterprise).

Tennyson wrote "In Memorandum."

Parallel lines are the same distance all the way and do not meet unless you bend them.

An angle is a triangle with only two sides.

The qualifications for citizenship are that you must be neutral born or made.

Gravitation is that which if there were none we should all fly away.

Louis XVI. was gelatined during the French Revolution.

A mountain range is a large sized cook (cooking) stove.

Horsepower is the distance one horse can carry a pound of water in an hour.

Guerilla warfare is where men ride on gurillas.

Have a Good Complexion! The Flower of Good Health

The true secret of complexion lies in the blood. Keep it rich, pure, nutritious, and, above all, keep the system regular. No aid to complexion compares with Dr. Hamilton's Pills. They tone and enrich the blood, clear the system of waste products, promote good digestion, and, in short, establish sound health, which, after all, is the keynote to all happiness and well-being. Don't delay; the charm of a lovely complexion and all the blessings of health are yours, once you employ this old-time family remedy. All dealers sell Hamilton's Pills in 25c boxes.

Pith of the Sunflower Stalk.

The sunflower is cultivated to a considerable extent in Central Russia, where every part of the plant is put to certain economic uses. The discovery of the extreme lightness of the pith of the stalks essentially increased the commercial value of the plant. This light cellular substance is now carefully removed from the stalk and applied to a good many important uses. One of its chief uses is the making of life-saving appliances. Cork with a buoyancy of one to five and reindeer's hair with one to ten has been used. The pith of the sunflower has a buoyancy of one to thirty five. The latter can be used advantageously in the construction of boats and life preservers. A sufficient quantity can be worn on a person without any inconvenience. The pith of the larger sunflower stalks is used extensively as a substitute for other materials formerly employed in making moxas for cauterizing purposes.—London Mail.

Minard's Liniment Cures Diphtheria.

Moorish America.

What kind of people do live in South America? The Spanish, the Portuguese, but chiefly the descendants of these European races who have intermarried with the Indians. Other nations have made lesser contributions. Brazil, which is only a few days by steamer from West Africa, is one-third negro, the crudest type of negro on the American hemisphere. There is a strong mark of the Moor upon the Spaniard. The Arabic Moor wrought his customs very deeply into the life of Spain. The people of Mexico and Cuba might be called Moorish Americans rather than Latin Americans. The customs, manners and heart experiences in these people of Latin America are more Moorish than Christian, more Moslem, more Arabic than Spanish.—World Outlook.

Minard's Liniment Cures Colds, Etc.

Romance of a Railway.

The Uganda railway possesses a history unrivaled for romance. Not only does it run through wild jungle, traverse lofty viaducts thrown across deep gorges and climb mountain passes to a height of 8,300 feet, but in its early days it received far too many unwelcome attentions from the natives. It was found that coils of telegraph wire became quite the rage in feminine fashions, while in the hands of sturdy warriors bolts and nuts became formidable weapons. The floods of the rainy season are now the only untoward occurrences that break the ordinary routine of the line.—London Chronicle.

Sore Corns Go! Absolutely Painless

No cutting, no plasters or pads to press the sore spot. Putnam's Extractor makes the corn go without pain. Takes out the sting overnight. Never fails—leaves no scar. Get a 25c bottle of Putnam's Corn Extractor to-day.

POLISHED RICE

Is Said to be Cause of the Dreaded Beri-Beri.

Recent investigations are said to leave no doubt that that terrible malady, beri-beri, is due to eating polished rice. The outer covering of the grain contains a principle inimical to the disease. Science has not succeeded in definitely establishing its identity, but regards it as an organic base which exists also in the yolk of an egg, in peas, beans, barley and, perhaps, yeast.

While but a minute quantity of it is required to fortify the system against neuritis, that amount is declared to be absolutely essential, and rice-eating people, therefore, and subject to beri-beri in case the outer covering of the rice, which contains this principle is removed, as it is, in the polishing process.

A quality of this principle, just discovered, is that it is destroyed when submitted to a temperature of 120 deg. Centigrade, or above. It thus appears that perfectly safe rice may be deprived of its neuritis-preventing quality when cooked under steam pressure, as is frequently done when the regular preparation of large quantities is necessary.

There are forms of neuritis called beri-beri which occur where rice is no part of the diet. They may result from alcohol, lead, arsenic and various bacteria. They are sometimes the result of a diet that is not well balanced. Whether they are true beri-beri, science has not yet definitely established.

There is no longer any doubt, however, that the typical disease is caused both in man and fowls, by the consumption of polished rice. Scientists insist that its ravages in civilized countries would be vastly wider, did not other foods contain the principle which we eliminate from rice to make the grain more sightly.

ISSUE NO. 40, 1916

HELP WANTED

WANTED—GIRLS TO WORK ON knit underwear—seamers and finished stitchers preferred. We also teach learners, any girl with good knowledge of plain sewing; good wages; ideal factory conditions. Zimmerman Manufacturing Co., Ltd., Aberdeen and Garth streets, Hamilton, Ont.

WANTED — HOUSEMAIDS AND waitresses. Previous experience not necessary. Apply, "The Welland", St. Catharines, Ontario.

MISCELLANEOUS.

WANTED—GIRLS OF GOOD EDUCAtion to train for nurses. Apply, Wellandra Hospital, St. Catharines, Ont.

LADIES WANTED

TO DO PLAIN AND LIGHT SEWing at home, whole or spare time; good pay; work sent any distance; charges paid. Send stamp for particulars. National Manufacturing Company, Montreal.

GIRLS WANTED

Experienced knitters and loopers, also young girls to learn. Clean work and highest wages.

CHIPMAN-HOLTON KNITTING CO., LIMITED, HAMILTON, ONTARIO.

ANTIQUE FURNITURE FINE CHINA, GLASS AND ART GOODS

We certainly made no mistake in this combination. Our faith in the liberal spirit, refinement of taste and broad-minded appreciation of the citizens of Hamilton, the surrounding cities and towns, has already proved that our faith was not misplaced. New goods now arriving will challenge comparison with the best shown in Canada.

ROBERT JUNOR

64 KING ST. E. SOUTH SIDE

Hamilton, Ont.

THE HOUSE FOR GIFTS.

Origin of the Name Siberia.

In 1552 Yermak, a Cossack chieftain, with a band of warriors "chosen for their bravery rather than for their morality," set out to chastise and subdue a powerful Tartar tribe east of the Ural Mountains. When Czar Ivan IV. heard of it he was badly frightened, for he feared to stir up the fierce Tartars. He frantically sent orders for the expedition to return. But it was too late. Yermak and his men had already crossed the mountains. When they approached the city of Sibir, the stronghold of the Tartar chief they found an army thirty times as large as their own awaiting them. But they were far better equipped with arms and ammunition than were the Tartars and administered to them a crushing defeat. Sibir was captured and became the nucleus of the expansion which the Russian empire has made in Asia, giving its name to the new country—Siberia.

Minard's Liniment Cures Distemper.

Geordie and the German Bullet.

Two Tyneside pitmen in the Northumberland Fusiliers were doing fatigue-work behind the lines when a stray bullet chanced to hit one, going right through his hand and lodging itself in the thigh of the other. In hospital their wounds were attended to, and as is the case when a bullet is extracted from a soldier the doctor invariably returns it to his patient as a keepsake. Unfortunately, in this instance this practice nearly ended in a free fight. Joe said: "Aye, I wes hit first; the bullet passed through ma hand first, so I shud hev the bullet!" His "pal" Geordie replied, with a rueful look at his wounded thigh: "Aye, ye wor hit first right eneuf; but I stopped her. If ye wanted the bullet, why did ye not keep it, man, when ye had it!"—Newcastle Weekly Chronicle.

A man is indeed lucky who can fall from grace and strike a soft thing.—Detroit Journal.

A Real "Peach Cobbler"—Not a soggy, doughy, inedible combination, but a crisp, tasty, easily-digested dish of whole wheat with peaches and cream. Cover one or more **Shredded Wheat Biscuits** with sliced peaches and then pour cream over them. Nothing so appetizing and satisfying and nothing so easy to prepare.

Made in Canada

The Channel Tunnel

(By Sterling Heilig, in Chicago Sunday Tribune).

Paris. — (Special Correspondence). —"Those too timid to go by tunnel will go by tube!" Such is the talk in Paris and London. "The tunnel will require ten years, at a cost not above $5,000,000." Nothing could show better the imminence of the tunnel itself than this sudden story of the tube.

Any one who, before the war, had proposed a high bridge of metallic tubes across the English channel, for the pneumatic conveyance of mails, parcels, and persons, would have been laughed at as a visionary. Yes, a tube in the air—across the channel. All objections are answered by a catchword: "And the Brooklyn bridge, does it blow down? Does the Brooklyn bridge imped navigation?"

We are getting a glimpse of to-morrow.

England is to cease to be an island.

The French, of course, have always been willing. There has been a French Company, law, and governmental concession since 1875, and 2,000,000 francs of actual digging was done (at Sangatte) up to 1880, under the direction of the eminent engineers, Ludovic Breton (brother of the painter, Jules Breton) and Albert Sartiaux, chief technician of the Nord Railroad company.

In England, only recently a house of commons committee, composed of sixty Liberals, sixty Conservatives, fifteen Nationalists, and five Labor members agreed on a motion, which will probably pass the house before these lines are printed:

"Resolved, That present circumstances demonstrate the great advantages which would have resulted for the United Kingdom and its allies from the existence of a tunnel under the channel. Consequently, it is important that the plans be immediately completed and the construction of the tunnel be undertaken at the end of the war, as soon as the necessary labor can be secured."

So speaks the British parliament — which always killed the project previously! What a change in England! The French desired to pierce the tunnel as early as the great Napoleon. Charles Fox favored it. "The union of France and England," said Fox, "will make for the happiness of the world." The rest of England, to a man, opposed it. France again proposed the tunnel in the time of Napoleon III., and an English engineer, Sir John Hawkshaw, undertook to obtain a British charter, but Queen Victoria and her military advisers were hostile, and the Franco-Prussian war stopped everything. Then came the French company of 1875, in which the Rottschilds and the Nord Railroad company weer interested. In 1880 the Southeastern Railway company of England came to an understanding with them and undertook to get a bill through parliament. Success was in sight. In 1886 a protocol was actually signed by France and England. Then Lord Wolsley killed the project with a word:

"A tunnel road from France to England," said Lord Wolsley, "would put England at the mercy of a French invasion. But I would have no objection to a bridge."

So, do not deem a bridge crazy.

Lord Wolsely liked it, and a world famous French engineer, extremely well known in America—I refer to M. Philippe Bunau-Varilla—taking a hint from Lord Wolseley, devised his "mixed passage," half bridge, half tunnel. In the Bunau-Varilla project the bridge would run some miles out into the channel from Dover to a species of artificial island of cement and masonry, through which railroad trains would slope down into the channel, which would continue to France. A few cannon shot could destroy the bridge in case of a French invasion.

And time has passed. England no longer fears a French invasion—"20,000 picked French troops disguised as tourists." On the contrary, it was Germany, in the heyday of her early war successes, which proposed, by her engineers, generals, and editors, to "pierce the tunnel with forced French and British labor" and "set up strong German military posts at each end, as a guarantee," once her consent of the French and English coasts should become definite.

That settled it for the British War Office. Lord Kitchener, Lord Roberts and Marshal French saw light, as did Paul on the road to Damascus. Immediately they put themselves on record as favorable to the tunnel—without Germans.

The tunnel, therefore, practically exists. Its length, as traced in modern plans, seems to be thirty miles, but not all under water. [The bee line distance from Calais to Dover is only twenty miles.] The tunnel's cost is estimated at $80,000,000 to $100,000,000 or something like $2,500,000 per mile. The piercing of the Simplon tunnel cost $1,300,000 per mile; that of the Paris railway tunnel between the Austerlitz and Orsay depots $1,650,000 per mile; and the Paris subway between $500,000 and $650,000 per mile.

As to its financial success, it has never been doubted that a railroad tunnel uniting the two richest countries and capitals of Europe would pay handsome dividends.

By the tunnel a business man will be able to go and return between Paris and London by direct trains in the same day, and yet have sufficient time to close a deal.

But by the tube the business man or moving picture star can swoop across in twenty minutes, and——

This, I think, is the grandest part of the great story. We hear talk about the tube, but nothing of it practically gets into the papers. Is it the censor? Is it the Bunau-Varilla bridge brought up to date? It is not said so. Doubtless the Bunau-Varilla cement, masonry and steel piles, to cary the tube bridge across the channel over the route discovered by Bunau-Varilla as having a bottom almost entirely of "Rouen chalk" (completely favorable to the sustaining of bridge piles) remain free to any engineer who chooses to utilize them.

Also a rumor connects the tubular end of the story with an English syndicate composed very much of great names out Birmingham way. We may judge that many of the tubes will come from Birmingham. Half the suspension steel cables may come from France. Some, they say, perhaps, even from America.

So, now for the tube. Imagine a high bridge on continuous smooth, joined tubes across the channel—high up, not to impede maritime traffic. They are two great tubes, about one yard in diameter, for passage through them in each direction. They are suspended from pillars like lighthouses, alternating red and green lights by night and fog, and so a guide and aid to navigation rather than a hindrance.

The laying of the pillars and the suspension of the tubes belong to trades of engineering and construction already perfected by long practice. The discovery of a route of "Rouen chalk" bottom practically all the way across the channel is considered to be a decisive advantage. Modern suspension bridging will permit pillars 1,000 yards apart. This means some eighteen pillars in depths varying between fifteen and thirty yards, down to ten yards close to the coasts of France and England.

Now for the pneumatic surprise. We know practically nothing except the word "pneumatic." It increases the interest. Imagine that the two great tubes have been suspended. Later they ma ybe four for increased traffic. They are one yard in diameter.

People will have to cross inside that tube of one yard diameter. How? In cars, of course. But who can stand up in a car which is not one yard high? Or sit?

The passengers must sprawl. The passengers will live on luxurious cushions during the entire trip of they may be four for increased traffic. minutes).

The motor power will be pneumatic —i. e., compressed or liquefied air. In Paris "pneumatic," when taken in connection with "tube," is popularly imagined to have analogy with the pneumatic tubes by which the quick delivery of specialy stamped letters is secured throughout the capital inside close fitting little cartridges of cylindrical form driven at great speed by compressed air in a partial vacuum.

The mistake is natural. The little cars of the channel tube are cylindrical in form; but they will not fill the tube as a projectile fills a gun barrel, and they will not be driven against a vacuum.

On the other hand, a startling innovation in this sense is described. The tube being a tube, and the trains passing through it with extreme rapidity, the entire mass of air in the tube can be kept moving in the same direction as the train with notable advantage. By what system of powerful air turbines this is to be done and at what speed is detailed in the story.

There is talk simply of a monorail and condensing power plants at Calais and Dover.

Will it pay? Why not? Its public will be financiers, big business men, members of Parliament, King's messengers, the stock exchange world, money brokers, theatrical stars and first nighters, milord and boulevardiers, racing men and jockeys, rich women and dressmakers, moving picture managers, society people with a date for dinner, pleasure seekers starting on an impulse—in a word, the great, rich rush between Paris and London, to whom time is money and ease and distinction more than money.

◆

A SOMNAMBULIST

(By Albert J. Kenyon.)

My uncle, with whom I went to live at the death of my mother—my father had died when I was an infant—had an only child, a daughter, Alice. She was much younger than I, and I saw very little of her, for when she was 10 years old I went to college, and after completing an academic course I studied a profession. When I returned, after having finished my education she was a girl of 17. One day my uncle called me into his study and said to me:

"As you know, Alice has inherited a fortune from her mother. If the property were mine to will I would leave half of it to you. I wish that you and Alice would make a match, for I consider you both as my children and would like you to enjoy the fortune in common. I can do nothing to bring about such a result and shall not mention my desire to Alice. I am her guardian under her mother's will, with power to appoint a successor to take my place if I should die before Alice comes of age. I have appointed you to the position, in case a successor becomes necessary, for I know of no one else in whom I have the confidence I have in you."

My uncle died about a year after speaking these words to me, and I became Alice's guardian. After her mother's death her father had taken in a woman to care for the child and the house at the same time. My uncle on his death had told us all that after his demise we had better keep everything as it was, living in the house as we had been doing. Therefore we made no change. I in a measure filled my uncle's place, and this was facilitated by my being Alice's guardian, since it gave me the control of the funds. Mrs. Withers, the housekeeper, I had had little to do with, since I had been so much of the time away.

The weak point in the accomplishment of what my uncle had desired was that I was obliged to antagonize Mrs. Withers, who having brought up Alice from a child, had great influence over her. She endeavored to poison Alice against me, but Alice had always been very fond of her "big brother," as she called me, and the poison process was not easy. Nevertheless the gap between myself and Mrs. Withers widened as time passed and poor Alice was constantly obliged to listen to attacks upon me by the housekeeper. When every other artifice failed the latter began to insinuate that I was managing Alice's estate badly, and from that it was intimated that I was gradually appropriating it to myself.

I kept the papers pertaining to the estate in a safe, where my uncle had always kept them. Before he died he gave me the combination, telling me that no one but himself knew it previous to him imparting it to me. One day I went to the safe to look for a receipt I had taken for moneys expended for Alice's estate, but could not find it. After satisfying myself that it was not in the safe I was forced to the conclusion that I had failed to place it there. Some time after this I looked for another paper, and, not finding it in its place, it began to appear to me that either I was becoming very careless or some one was purloining my papers.

When a boy I had been caught once or twice walking in my sleep. I feared that the habit had returned to me and that I was taking papers from the safe myself while asleep. This view was partially confirmed by by waking up one night belaboring the furniture with a cane, dreaming that I was driving burglars from the house.

Lovely summer hats built on wire frames are shown in flesh colored georgette crepe and are charmingly trimmed with lace rosebuds and velvet ribbon. The facing of the one illustrated is a delicate shade of pink Georgette crepe, while the plateau top is of cream Renaissance lace.

I argued that if I had been a somnambulist on this occasion I might have been one before.

I began to notice a change in Alice's bearing toward me. Something seemed to pain her and cause her distant treatment of me at the same time. Then one day I was called upon to make a special accounting of my stewardship for Alice's estate. I found that so many papers had disappeared from the safe that it would be impossible for me to make a satisfactory accounting. At this time Alice acted in such a way toward me that I was convinced she was in the secret of my trouble, or, rather, that she had been told about to my disadvantage.

By securing duplicate receipts for certain expenditures I managed to satisfy the court for the time being. But it was not long before I began to miss other papers and was in an agony because I saw ruin staring me in the face. I was convinced that while asleep I was making way with the papers, and since they were not to be found it was likely that I had destroyed them.

One night I was awakened by a shriek I was standing in the door of the room containing the safe, in my nightshirt. Mrs. Withers was kneeling before the safe, which was open, staring at me. It was her shriek at being discovered that awakened me. Had she known I was asleep she might have escaped undetected.

That was the end of the mystery. She confessed that while I had walked in my sleep she had heard me repeating the safe combination and had made use of it to ruin me.

On Alice's account I failed to prosecute her, but since it was necessary to get rid of her, Alice and I, after a consultation, agreed to be married and remain as we were.

◆

Some Good Recipes.

Stuffed Eggs—Put six eggs into cold water, boil for 15 minutes, put them into cold water, which keeps the whites of eggs a good color; cut them in halves lengthways and take out the yolks, which pound with one teaspoonful of chopped cold meat, add one tablespoonful of chopped parsley, salt, pepper and red pepper to taste, and one tablespoonful of melted butter. Mix all well together, take a small piece, fill the hollow of the white of egg with this; join the other half to it. When all are filled rub over the outside with flour, brush over with beaten egg, roll in fine bread crumbs. Fry a golden color in plenty of smoking-hot fat. Decorate with parsley and serve very hot.

Whole Wheat Bread.—One cup of yeast set in half-cupful of water with a little flour added. When raised, have ready in bowl two quarts of Franklin flour sifted; add yeast, half teaspoonful salt, one tablespoonful of syrup and luke warm water enough to mix into stiff dough wit ha spoon. Let rise for one hour, add a little flour, mold into two loaves and put into buttered and floured pan; let rise a second time; then bake one hour.

Noodled Ham.—To make the noodles beat an egg very light with a saltspoonful of salt and add as much flour as will be required to make a stiff dough. As eggs vary in size, the exact amount of flour cannot be given. Work smooth, roll out very thin and cut in narrow strips; roll these between the hands until round, like macaroni, then cut in pieces an inch or two in length. Lay on a board near the fire to dry. Then put two cupfuls of them into a stewpan and pour over them enough boiling water to cover. Let them boil 10 minutes. Chop enough cold boiled ham to make a large cupful. The broken bits and crumbly parts of boiled ham are used up in this way. Butter a baking dish, put in a layer of drained noodles, then more ham, more noodles, and so on until the dish is full, having the top layer of noodles. Beat two eggs, add a cupful of thin cream or rich milk, and pour over the top. Cover with a thin layer of buttered crumbs and make a delicate brown. Serve from same dish.

White Loaf Cake.—Cut bits of whole wheat bread into dice. Use a half cupful of any fruit that may have been left over—prunes, raisins, chopped dates or candied fruit. Grease an ordinary melon mould. Put a layer of bread in the bottom, then a layer of the fruit and so continue until you have the mold filled. Beat two eggs without separating with four tablespoonfuls sugar; add a pint of milk. Pour this carefully over the bread; let it stand for 10 minutes. Then put the lid on the mould and steam or boil continuously for one hour. Serve with lemon or orange sauce.

Turkish Soup.—Five cupfuls of brown soup stock, one-quarter cupful of rice, one and one-half of stewed and strained tomatoes, bit of bay leaf, two slices of onion, 10 peppercorns, one-quarter teaspoonful of butter, one and one half tablespoonfuls of flour. Cook rice in brown stock until soft. Cook bay leaf, onion, peppercorns and celery salt with tomatoes for 30 minutes. Combine mixtures, rub through a sieve and bind with butter and flour cooked together. Season with salt and pepper if needed.

"A burned child dreads the fire," quoted the Wise Guy. "And many a fellow's fingers have been burned by a love match," added the Simple Mug.

"I think the one you refused is much the most attractive of the two." "I admit that, but when he proposed he went into ecstacies over how happy I could make him; but the one I accepter spoke of how happy he would try to make me."—Houston Post.

Chats With the Doctor

BY A PHYSICIAN

THE CAUSE OF ITCHING.

As the result of an enormous number of experiments it has been found that itching is due to increased pressure on the nerve-endings in the tiny blood capillaries immediately under a horny layer of skin. Where there is no horny layer over the little blood vessels, as is the case in an open wound or an open ulcer, there is no itching, until a skin begins to form on the surface. The itching arises when, for some reason or other, these little capillaries become congested, and there is increased pressure throught the inelastic nature of the horny layer. Thus it is that itching can generally be temparairly relieved either by the application of some substance such as soap which softens the surface of the skin, and consequently reduces its resistance to pressure, or by any process which drives the blood from the surface blood vessels, and so reduces pressure in that way. The application of elastic stockings or of bandages acts in this way by pressing the blood out of the surface capillaries; so also does scratch; and we all know how scratching is followed by increased itching, as the blood flows back again. Every one, again, is familiar with the itching that often occurs when we take off our clothes, especially our stockings, and so by removing pressure, allow blood to flow to the surface.

When the surface of any part of the body is exposed to the extreme cold itching does not occur, but when that part is subjected to warmth, say from a fire, itching often begins.

HOW TO MAKE FLY-STICKS.

Few methods of destroying flies, which, as my readers know, are responsible for a very large proportion of summer illness, are more effective than the old-fashioned fly-stick. A good formula for their preparation is the following: Moderately beat six parts of colophonium with three parts of castor oil in an enamelled basin, until the colophonium is dissolved. Then add one part of honey and stir the whole until it cools. Slim sticks, about eighteen inches long, are then taken and their ends covered with this mixture. Four or five of these sticks are then to be stuck in a slanting direction in a flower-pot of earth, the stick ends being, of course, upwards, radiating outwards so as not to touch one another. Such pots should be placed about wherever flies abound. As they become smothered with trapped flies the stick may be scraped, recoated with mixture and used again.

ST. VITUS' DANCE.

St. Vitus' dance, or chorea, is a different disease from the curious epidemic known to the middle ages as St. Vitus' dance. That disease was probably a purely hysterical one, whereas the disease which now goes by that name has no relation whatever to hysteria. As many of my readers will know, chorea (which is a Greek word meaning dancing) is characterized by curious irregular involuntary movements of various muscles of the body, face and limbs. It generally occurs in young children, more than half of all the cases occurring before ten years of age. It is more than twice as common among girls as among boys. Occassionally grown-up people are attacked by chorea, but generally there is a history of a previous attack in childhood. Acute rheumatism or rheumatic fever is the most common preceding condition, though it is hardly to be called a cause.

The actual attack seems sometimes, at any rate, to be brought about by fright or other emotions, but this is by no means a necessary condition.

As the disease shows itself the patient is in a constant state of movement, these movements being involuntary and purposeless. The fingers open and shut, the wrists, elbows and shoulders are continually bent and extended, the muscles of the face keep twitching and every voluntary movement tends to increase the jerky and involuntary movements of the muscles. It becomes impossible for the patient to hold out the hand steadily, or to grasp an object with certainty. The movements become worse when the patient is being watched, and they stop entirely during sleep.

The disease continues for some time, two months being perhaps an average length. It is evidently associated with brain disturbances. In the way of treatment the first thing is to put the child to bed, and keep her there. Especially should she be protected from the comments or ridicule of other children. All excitement should be avoided. A light, yet abundant and nourishing, diet shoul d be provided, and the bowels should be kept well regulated. Medical treatment should, of course, be followed and the advice of a doctor, who has seen the case. Arsenic is the drug which has been found of the greatest value.

◆

MAY SALVAGE SUNKEN SHIPS

Must all of the million dollars that now lie at the bottom of the sea in the form of ships and their sunken treasure be forever lost to the world? Most of the vessels that have been sunk, whether by accident or in the course of the present war, lies in comparatively shallow waters, many of them at a depth of less than 300 feet, and the problem of their recovery does not seem entirely hopeless in the light of recent improvements in deep sea diving and the feats accomplished by the expert divers of the U. S. Navy. The matter is the subject of an article in the current number of the Bulletin of the Pan-American Union, Washington, D. C. In discussing the organization of companies in the United States whose purpose is the recovery of some of the wealth now lying in the ocean's depth, the writer says:

"Certain it is that the project of recovering sunken ships, or the most valuable of the treasures that have gone down with them, is more feasible now than it was only four or five years ago. Such great improvements in diving apparatus have recently been made that it is now possible for a diver to operate for a limited time even to the great depth of 300 feet below the surface. These improvements are largely due to the remarkable experiments in deep-sea diving conducted under the auspices of the bureau of construction and repair of the Navy Department of the United States in 1914. Prior to this time the greatest depth reached by divers was 210 feet, two English officers having accomplished that feat during a series of tests carried on by the British Admiralty in 1907. For the benefit of those who do not appreciate the difficulty of diving to such depths, it may be stated that at a depth of ten feet below the surface the pressure is 4.33 pounds per square inch of surface of the body submerged. This pressure increases proportionately and at a depth of 100 feet it is increased to 43.3 pounds and at a depth of 300 feet to 129.9 pounds.

"Notwithstanding this tremendous pressure, the expert divers of the United States navy have succeeded not only in reaching a depth of 300 to 305 feet, but in remaining at that depth for from five to twenty minutes at a time, making examinations and observations in regard to a sunken vessel that made its subsequent salvage possible. This work was done in connection with the raising of the United States submarine F-4, which, it will be remembered, plunged to the bottom of the sea just off the harbor of Honolulu on March 25, 1915. Not only did the divers establish a new world's record for deep-sea diving upon that occasion, but the subsequent raising and recovery of the F-4 is the only instance in history where a sunken vessel was recovered from a depth of 300 feet."

"The writer thereupon gives a brief sketch of the history of diving as a useful art from the time of Aristotle down to the present, and after describing a modern diving outfit and explaining in some detail the manner of the diver's being subjected to two pressures, viz., the pressure of the air inside the helmet and suit and the external pressure of the water, continues as follows:

"The necessity of having the air pressure within the diving dress compensate the external water pressure, thus subjecting the diver to pressure directly proportionate to the depth to which he descends, is the dangerous element in deep-sea diving. At a depth for instance, of 100 feet, a diver must be subjected to a pressure of four atmospheres, or 60 pounds per square inch, in order to compensate the external water pressure. Exposure to such pressure is apt to be followed by dangerous psychological effects, commonly known as "caisson disease," the symptoms of which include pains in the muscles and joints, commonly called "bends," deafness, embarrassed breathing, vomiting, fainting, etc., sometimes resulting in death. They do not appear while the pressure is being raised nor so long as it is continued, but only after it has been removed; and the view now accepted is that they are due to the rapid effervescence of the gases which are absorbed in the body fluids during exposure to pressure.

Experiment has proved that when the pressure is suddenly relieved the gas is liberated in bubbles within the body and that these do the harm. Set free in the spinal cord, for instance, they may cause partial paralysis, or in the heart lead to stoppage of the circulation. It has been found, however, that if the pressure is relieved gradually the bubbles are not formed, because the gas comes out of solution slowly and is got ride of by the heart and lungs. To prevent these effects, the withdrawal of the air pressure, in other words, the decompression should be slow. Hence the diver's ascent must re regulated accordingly and the deeper he has been the slower and longer must be the periods of decompression.

It was particularly in regard to this matter of decompression that the experiments of the U. S. Navy Department in 1914 led to improved methods enabling the divers to descend to 300 feet below the surface. Being able safely to observe and direct the work of rescue at such a depth and with modern lifting apparatus, who can say that the recovery of ancient treasures of sunken Spanish galleons, of hundreds or more recent wrecks of merchant vessels, and finally of many of the magnificent war vessels that have been sent to the bottom during the present war, is an idle dream?

Among the unusually smart novelties is the narrow striped chiffon motor veil coming in all colors or in two-color effects, as this one with the foundation in one and the stripe in another.

◆

Flowers of the Sea.

Like the land, the sea has its flowers, but the most brilliant of the marine flowers bloom not upon plants, but upon animals. The living chorals of tropical seas present a display of floral beauty that in richness and vividness of color and variety and grace of form rivals the splendor of a garden of flowers. The resemblance to blossoms is so complete that some persons find it difficult to believe that the brilliant display contains no elements of plant life, but is wholly animal in its organization.

Among the sea animals that bloom as if they were plants are included, besides corals, the sea anemone and the sea cucumber. It has been remarked that the birds and butterflies of the upper world are replaced by fishes of curious forms and flashing colors, which dart out among the animal flowers.

Hun Airmen Unequal to Those of Allies

There are altogether in Southeastern Europe some 14,000,000 Roumanians. They form a compact racial mass, of which hardly more than half are subjects of the Roumanian crown. Consequently Roumania claims relatively the largest irredent—"unredeemed" population under a foreign yoke—in Europe. Half the nation is subject to Hungarian, Austrian, Russian and other rule. The largest slice of unredeemed Roumania is the region of southern Hungary known as Transylvania and the Banat.

The Roumanians describe themselves as a Latin lake in a Slav ocean. They claim to be the descendants of the Roman legionaries planted along the lower Danube as a garrison colony by the Emperor Trajan at the beginning of the second century after Christ. In support of these claims to Latin origin, Roumanians point to the common language of the race, which is certainly a Latin speech, though it is greatly corrupted with Slav and other elements. When the tide of barbarian invasion swept over Southeastern Europe the Latin Roumanians, they say, remained untouched in their mountain fastness in Transylvania, which consequently they regard as the historic homeland of the race and peculiarly in need of redemption.

Ethnologists declare that the Latin element in the Roumanian race is, in fact, most negligible, and will have nothing to do with the theory of the "Latin lake." But cold science matters little to the Roumanians, who pride themselves on their Latinism to such a degree that they will not regard themselves as a Balkan folk, but as Westerners. Ethnologists, too, make short work of the Anglo-Saxon idea, but to equally little purpose as far as Englishmen are concerned. A nation is what it thinks of itself as being; the Roumanians have the right to be considered Western and Latin in so far as their culture is, as far as they can make it, that of the Latin West.

Naturally France, as being the leading Latin country, is the country that is copied in manners and civilization; and Bucharest is a deliberate imitation of Paris, at all events in respect of its boulevards and cafe life. Partly Roumania's Frenchiness is only skin-deep, and in many ways a mere adoption of the frivolities and vices of the western republic; but even the affectation, to put it at least, is sufficient to mark the nation off from its Balkan neighbors, whom it vastly surpasses in material civilization and the urbanities of modern existence. Roumania's chief Balkan trait—a very important one—is its religion, which, apart from the enormous Jewish population, is exclusively Orthodox.

Modern Roumania was born in 1859, when assemblies of the two principalities of Moldavia and Wallachia, prevented by the Congress of Paris of the previous wear from uniting the two principalities into a single state under the name of Roumania, evaded the prohibition and accomplished the union of Roumania by simultaneously choosing the same ruler, Prince Cuza. In 1861 this election was ratified by the powers and the porte. Five years later the prince was compelled to abdicate and the principalities elected on a referendum Prince Charles of Hohenzollern-Sigmaringen in his stead. Prince Charles was an officer in the Prussian army and had kinship not only with the King of Prussia, but with Emperor Napoleon III. of France, both of whom supported his nomination. The new prince was cordially received by his suzerain, the sultan, who confirmed the principle of hereditary succession to his family. Roumania joined Russia in the Turkish war of 1877, and her independence was recognized by the congress of Berlin. In 1881 she formally proclaimed herself a kingdom and was recognized as such by all the great powers. Since then the story of Roumania has been one of rapidly growing prosperity, marred only by agrarian troubles, and of almost entire freedom from external complications. His entry into the second Balkan war was as bloodless affair, but it brought her, by the treaty of Bucharest, Silistria and a strip of Bulgarian territory on the Dobrudja. That affair gave her the hegemony of the Balkans, but it turned her immediate southern neighbor, Bulgaria, into a bitter enemy.

The 4,000,000 Roumanians of Transylvania are acknowledged even by the Roumanians themselves to be the flower of the Roumanian race. Their middle class has a high level of culture; their peasants are literate and more advanced in every way than the peasantry even of Roumania proper. The language spoken in Transylvania is purer and much nearer to the original Latin than the speech current in the kingdom itself. This Roumanian Irredenta is keenly conscious of its national affinity; its lawyers, professors, merchants and traders are all ardent apostles of the greater Roumania; and long-continued and brutal Maygar oppression has not damped in the least its national spirit. Even physically these northern Roumanians belong to a higher type. There can be no doubt that their eventual incorporation in the kingdom will constitute a naccession of strength out of all proportion to their numbers.

Geographically this Transylvanian Roumania consist of the whole plateau region enclosed within the semicircle of the lower Carpathians and the Transylvanian Alps. Southern Bukowina, too, is predominantly Roumanian, as is at least the western two-thirds of the Banat. The maximum Roumanian claim extends as far west as the River Theiss, a tributary of the Danube. By the redemption of these territories Roumania will gain by about fifty per cent. in population.

Since their achievement of Hungarian independence, or rather equality, in 1867, the Magyars have been the most ruthlessly oppressive nation in Europe. Their brutal treatment of the southern Slavs was one of the fundamental causes of the war. Towards the Roumanians or Transylvania they have been equally cruel and unjust, and the same policy of Magyargation by force has been pursued. The Roumanian language was forbidden in defiance of the constitutional law; school and churches were closed in which Magyar was not used exclusively; Roumanian newspapers were systematically raided and suppressed; and the jails were filed with journalists and politicians. By a process of open faking and terrorism the Roumanian population was practically deprived of the vote, and instead of the 80 deputies in the Budapest parliament to which their numbers entitled them, the Roumanians have at this moment only three representatives. Though the fundamental laws of 1861 and 1868 put Roumania on an equality with Magyar and German as the official language, in practice only Magyars were allowed to become judges and magistrates; pleadings in the courts had to be in Magyar and sentences were pronounced in that language. Among the prohibitions were:

The right of meeting, literay or artistic societies, the national dress, the singing of Roumanian folk-songs, Roumanian national dances, wearing the Roumanian national colors, red, yellow and blue, etc.

No Roumanian could enter public employment unless he completely renounced his nationality. He had even to Magyarize his name.

It is a typical instance of the brutality of Hungarian rule that the prohibition of the Roumanian tongue extended even to the cemetery, where the names and inscriptions on the tombstones had to be in Magyar.

To-day Roumania is one of the richest parts of Europe. It is one of the granaries of the world, and one of its chief oil fields. Its middle class is probably the richest on earth and it is a reflex of this prosperity and wealth that Bucharest is generally admitted to be the most extravagant capital city and the most expensive to live in of any on the map.

A Greater Roumania, including the unredeemed territories of Transylvania and the Banat and Bessarabia, would be a kingdom as large as present Hungary and richer and more powerful. She would be rivaled in Southeastern Europe only by Greater Serbia. The creation of these two southern powers would be one of the certain results of an overwhelming defeat of the central empires. From the Danube and the Carpathians to the Black Sea, and the Straits to the map would become a new patchwork, with Greater Roumania, Greater Serbia, and diminished Hungary occupy ing the largest spaces.

The Roumanians are a prolific people, and, though numbering all told but 14,000,000, at their present rate of multiplication they would bid fair to outstrip, for example, an old nation like Spain within a measurable stretch of years. And this new Roumania, lying a the historic crossroads of the old world, would have an importance even out of proportion to her size and strength.—London Chronicle.

A NEW OFFICE BOY.

New Yorker Tried an Old Man, and is Delighted.

A Broadway business man was talking to a friend who was looking for a good office boy. "Cut out the boys," he said, with confidence, "and get an old man who is willing to work for less than a man's wages. I began it about a year ago and I never did a better thing.

"I got the suggestion from a man not in business, but a physician. He had ordered some article or other which had not come promptly, and he came in person to see about it. I told him, which was true, that I had been bothered so by changing my office boys that I couldn't get it to him. Then he blew out at me and asked me why I didn't get an old man to do office work and I wouldn't have any more bother.

"It looked so different at first that I laughed at him, but he insisted so that it was the only cure that I concluded I would try it. I knew of an old chap, honest and living with his son, doing small jobs and helping all he could for his keep, and I asked him how he would like to be office boy for me. He laughed just as I did at first, but I insisted on his trying it and he agreed to come and do the best he could, but wouldn't guarantee that he would be satisfactory.

"He came the next day and though he was a bit slow at first he was always ready and willing and in a week or so I was so well satisfied with him that I wouldn't have traded him for all the boys I had been bothered with for five years. He isn't perfect, nor is anybody for that matter, but he is reliable and honest, never soldiers on me, doesn't smoke cigarettes or read dime novels, isn't fresh around the store, is always polite and is always on time.

"I pay him $7 a week and he is glad enough to get it, and he isn't so old but that he is good for at least ten years of duty, which will also be ten years of comfort for me and my entire store. I don't say that any old man will be as satisfactory as this one, but I do say that nine-tenths of the old fellows will make better office boys than the average we have to put up with.

"Try an old man for an office boy and see if you can do any worse than you have been doing. Several of my friends are doing it and so far they are all pleased with the change."

◆

Clear Jelly.

And that's best.

How make it clear?

There are degrees of clarity.

Fruis is mashed and boiled before straining.

To each pint of juice add one pint of sugar.

The juice may then be put through a cheesecloth.

Strained through two thicknesses of cheesecloth, it will be clearer.

To make it perfectly clear it must be strained through a flannel or a felt bag.

And in many of these instances there must be no pressure at all brought to bear.

What remains after straining through flannel or felt may be made into second-class jelly or marmalade.

Nearly Lost Little Girl from DYSENTERY

She Was Cured By Using DR. FOWLER'S Extract of Wild Strawberry.

Dysentery manifests itself with varying degrees of intensity, but in well marked cases the attack is commonly preceded by loss of appetite, and some amount of diarrhoea, which gradually increases in severity, and is accompanied with griping pains in the abdomen. The discharges from the bowels succeed each other with great frequency, and the matter passed from the bowels, which at first resemble those of ordinary diarrhoea, soon change their character, becoming scanty, mucous or slimy, and subsequently mixed with, or consisting wholly of, blood.

Never neglect what at first appears to be a slight attack of diarrhoea or dysentery may set in. Cure the first symptoms by the use of Dr. Fowler's Extract of Wild Strawberry.

Mrs. John Peterson, Radville, Sask., writes: "I cannot speak too highly for Dr. Fowler's Extract of Wild Strawberry. I nearly lost my little girl, aged three years. I took her to the doctor, and he told me her temperature was 104, and forbid me taking her out to our home, six miles from town, but I was forced to go on account of leaving my small baby home. We managed to get her home, but the fever did not go any lower, and we thought we would lose her sure, as she was so bad with dysentery she even passed blood. A neighbor came in and brought Dr. Fowler's Extract of Wild Strawberry, and told me to give her a few doses. This we did, and the next day she took a change for the better, but it was quite a time before she was on her feet again. I do believe if it had not been for 'Dr. Fowler's,' my little one would have died."

The genuine "Dr. Fowler's" is manufactured only by the T. Milburn Co., Limited, Toronto, Ont. Price, 35 cents.

SHREWD SHAKESPEARE.

Was an Excellent Business Man, but Fond of Litigation.

One reason may be given for Shakespeare not publishing his plays, and we have reason to think it was of a kind to appeal to him. There was no copyright, and to publish the plays was to lessen their financial value to his company. This "gentle Will," this "sweetest Shakespeare," this "Swan of Avon," was an admirable man of business. If we had only the records of the law courts, in fact, we might not be able to think so very well of him. He had a keenness for litigation which he seems to have inherited from his father. As a taxpayer he was slow, if not positively evasive. He was apparently negligent of a debt contracted by his wife. Like many men of property, he evaded the restrictions against brewing malt liquor for his private use, being in his way a moonshiner.

Liberal in giving aid and lending money to his friends in need, he was strict in collecting debts. At about the time he wrote the final version of "Hamlet" he sued the village apothecary at Stratford to recover a small loan and while he was at work on the world tragedy of "Antony and Cleopatra" he engaged in litigation that brought him in conflict with the village blacksmith, a state of affairs that Emerson relates with something akin to horror. He conspired with his father to secure from the conniving Heralds' college a shady coat-of-arms and the right to subscribe himself "gent," and, while apparently not actively aiding an attempt to inclose Stratford common lands in defiance of the rights of the people, he at best remained strictly neutral toward the project.

Careless as he seems to have been as to his fame as a dramatist, he was in business by no means above current standards of conduct. One gathers that the chief interest of his later years was to live at ease as a gentleman and provide well for his family. It is related on pretty good authority that he died of "a feavour" after "a merry meeting" at Stratford with his old friend, Ben Johnson, and the poet Drayton. But it is not unlikely that the true cause of his fever was not drink, but the insanitary condition of the street in which he lived.

◆

French Army Helmets.

There are sixty four distinct operations necessary in turning out one of the plain steel helmets worn by French soldiers. The first step is stamping out discs from large sheets of steel. A special machine is used for this purpose, exerting a pressure of 150 tons and capable of cutting out 5,000 steel discs a day. Each disk is placed under a shaping machine, which presses the disk into the form of a helmet with a broad rim. Polishing and cutting machines remove all irregularities in the helmet, after which it has holes punched in the crown, some for ventilation purposes, others for fastening on the regimental crest. Each helmet is cleaned and dipped in a special mixture, which makes it a dull, inconspicuous bluish-gray. A lining and leather chin straps are then fastened on, and the helmet is complete.—Pearson's.

"What do you understand by suffering for righteousness' sake?" questioned the Sunday school teacher. "Please, miss, it means havin' to come to Sunday school," answered little Jack.—Life.

Heart Palpitated

Would Have to Sit Up in Bed.

FELT AS IF SMOTHERING.

Mrs. Francis Madore, Alma, P.E.I., writes: "My heart was in such a bad condition I could not stand any excitement, and at times when I would be talking my heart would palpitate so that I would feel like falling. At night, when I would go to bed and be lying down for a while, I would have to sit up for ten or fifteen minutes, as I would feel as though I was smothering. I read in the daily paper of a lady who had been in the same condition as I was, and was cured by using Milburn's Heart and Nerve Pills, so I bought a box, and they did me so much good, my husband got another, and before I had used half of the second box I was completely cured. I feel as though I can never say enough in favor of your Heart and Nerve Pills."

Milburn's Heart and Nerve Pills are composed of the very best heart and nerve tonics and stimulants known to medical science, and are for sale at all dealers, or will be mailed direct by The T. Milburn Co., Limited, Toronto, Ont.

Price, 50 cents per box, or 3 boxes for $1.25

Stephans' for Good Style and Good Service at Moderate Prices

This is the general consensus of opinion and never was it more truly justified than in regard to our immense stocks already assembled for Fall and Winter. We have never been better prepared to serve you promptly, efficiently, satisfactorily. We are more than ever convinced that this store offers distinct advantages to shoppers. Come in and see what we have provided in the way of new Fall Clothes and things for the home.

Ladies' New Fall Coats

Wise buyers are choosing from present stocks of Women's, Misses and Children's coats. Repeats are practically impossible owing to scarcity of materials.

We are showing a most beautiful range of the season's newest garments in checks, plaids, tweed effects and plush coats.

Plush Coats at $15, $22, $25 & $30.

Coats of this rich fur-fabric are very popular this season and are well represented in our stock of coats. Pressed plush, fancy figured plush and the sealette plush of extra fine quality and jet black. The styles of these coats are of the new full models with extra wide sweep at the foot and finished with deep choker collar.

Special at $15.00, $22.00, $25.00, and $30.00

New This Week

We have received big shipments of knitted goods direct from the factories and the values in every case are extraordinary considering the cost of raw materials.

Sweater Coats				Men's Underwear
Men's	$2.75	to	$5.00	Fleece Lined 50c & 75c.
Boys'	$1.25	to	$2.50	Heavy Wool 75c to $1 25

STEPHAN BROS.

THE PEOPLE'S STORE

ADVANCE SHOWING For Autumn Weather

Is here and with it comes the need for Heavier Clothing. Perhaps you need underwear or a sweater coat. We are ready to supply you with these.

Underwear

We have a very large range of Underwear for Ladies in natural wool, union and heavy cotton at prices in keeping with the quality. For Misses and Children in a variety of qualities and prices. Men's in natural and heavy wool and fleeced at popular prices. Boys' in wool and fleeced.

Sweater Coats

Our assortment in this line is large. We know there is something to suit you here. We have them in all sizes, styles, shades and prices. Just what you want for these cool evenings.

We have Wrapperettes and Kimona Cloths in a variety of patterns, both light and dark shades. See our new coatings, and dressgoods, etc.

Groceries

A Basket of Goodness is a basket of fine Groceries purchased at our store. We guarantee the perfect purity of every article we sell.

NEIGHBORING VILLAGES & COUNTRYSIDE

News of the Week Collected by Staff of Live Correspondents

EDEN GROVE

The next holiday will be Christmas so let us settle down to work for a couple of months.

The Misses Scanlan of Walkerton called on friends in the Grove Thanksgiving Day.

Pte. Dan Desmond of the 119th is spending a few days at his home here.

The ladies of the Red Cross Society held a progressive euchre party and social evening in the Masonic Hall Tuesday evening when a very pleasant few hours were enjoyed and a nice little sum netted for the Red Cross.

Pte. Ed Bailey of the 160th was home over the week-end.

Mr. and Mrs. Willoughby were the guests of Mr. and Mrs. A. McKeeman last week.

Rev. Mr. Creighton of Paisley will preach the anniversary services in the Methodist Church here next Sunday at 11 a. m. and 7 p. m. He will also act as chairman at the Fowl Supper the following evening.

Miss Francis Seiler, Walkerton, enjoyed the week-end at her home in town.

The shooting match Monday was a decided success.

Mr. and Mrs. Pearson and son motored to Mildmay Sunday.

Mrs. D. J. Connor, Walkerton, was a Thanksgiving visitor in the Grove.

Mrs. Pearson, Mrs. Todd and Miss L. Watson represented "Quality Hill" at the banquet at Cargill Friday evening.

Mr. and Miss Emery and Miss Powell enjoyed Saturday the guests of Mr. and Mrs. R. Perdue.

Mrs. R. Gregg and daughter of Paisley were visitors in town Monday.

Mr. and Mrs. Harry Fair and Mr. Barry Fair of Palmerston are spending a few days at the home of Mr. and Mrs. Fair, King St.

Mr. and Mrs. Robert Perdue motored to Clifford Sunday in their new Overland and spent the day with friends.

Miss Thompson of Walkerton is the guest of her cousin, Miss Lily Alexander, this week.

Now is the time to fatten up the pumpkins for Hallowe'en night.

The Misses Hood of Cargill visited friends here Sunday.

Last Wednesday a quiet Autumn wedding took place in Walkerton when Miss Matilda Childs of Eden Grove was united in marriage to Pte. Alf. Stewart of the 160th Overseas Batt. Congratulations

Miss Jennie Stoddy spent the week end at her home in Walkerton,

MILDMAY

Mr. and Mrs. Wm. Johnston and two children of Bronte were visitors in town over Thanksgiving.

Rev. J. A. Mitchell B. A. conducted Thanksgiving services in the Methodist church. A splendid congregation turned out to meet him. Mr. Mitchell will preach next Sunday also,

All of the local members of the 160th. Batt. on last leave bid their friends farewell at the station on Monday morning. The boys will soon leave for England. A large crowd was present to bid them good bye.

Rev. Mr. Allan preached in the Presbyterian church on Sunday.

The Banquet of the Carrick Branch of the Bruce Preparedness League on Thanksgiving evening was well attended. The supper provided by the Ladies was A1. Everybody had plenty to eat. Those who took part in the program were, A. H. Musgrove M. P. P. of Wingham, Rev. John Marsh, Miss Black, and Mr. Petch. Waechter's orchestra provided music for the evening. Mr. Albert Grub won the chair donated by the Hanel Furniture and Upholstering Company. The proceeds of the drawing for the chair amounted to $10.00. The proceeds of the supper totalled $62.00.

The following were among the Thanksgiving visitors in town—Pte. George Pross of the Peel Battalion, Niagara Camp, Miss Zetta Liesemer of Baden, Miss Lizzie Seiling of Oshawa, Miss Lillie Seiling of Cargill, Mrs. Reba Schwalm and Miss Dora Wendt of Harriston, Mr. and Mrs. J. R. Wendt of Wroxeter, Mr. Roy Schnurr and Miss Pearl Robertson of Guelph, Pte. Clarence Kramer of Toronto, Miss Myrtle Lambert of Toronto.

Pte. Albert Fiddler of 160th. left on Tuesday morning for London Camp.

Mr. Peter Reuber brought up a new Overland touring car from Toronto on Saturday.

RIVERSDALE

A number of people of the vicinity attended the Teeswater Fall Fair and report a large crowd.

Mr. and Mrs. Peter Beninger and Mr. Cleo Beninger paid a flying visit to the village last Wednesday.

Miss Jessie Brown of Toronto who has been renewing old acquaintances has returned to her home.

Mr. Nicholas O'Hagan was in Toronto last week on business.

Mrs. Dennis Donnelly and son Geo. of Idaho Springs, Colo. are visiting at the home of Mr. Albert Dietrich.

Mrs. Lawrence Beninger Sr. is spending a few weeks with Mrs. Mike Beninger of Kingsbridge.

Miss Clara Chatreau of Toronto spent Thanksgiving at the home of Mr. and Mrs. Jas. Halliday.

Mr. Frank Sanderson of Oakville motored here on Saturday. He was accompanied on his return trip by Mrs. Sanderson and two daughters.

Mrs. J. Allan of Walkerton spent a few days with her mother Mrs. Jacob Hindley

Pte. Frank Stephan of Camp Niagara was a visitor here on Sunday.

Mr. William Cassidy held a ploughing bee on Thursday last. In the evening a number of young people were entertained at cards and dancing.

We are glad to learn that Mr. Jos. Valad who had a serious mishap some time ago is improving steadily.

Mr. Frank Caskanette returned from Western Canada on Saturday. He was accompanied by his son Francis and family.

Pte. Tom Loftus of the 160th Batt. returned to Camp Borden on Monday.

Ptes. John O'Neil and Albert Kramer of the 160th Batt. returned to London on Monday. As their Batt. breaks camp on the 11th they will be leaving shortly for England. Their many friends here wish them good luck and a safe return.

Mr. Bert Chatreau of Walkerton was a visitor here on Sunday.

A number of youths spent Thanksgiving in the woods. As the rabbit season has not opened, they amused themselves by shooting squirrels and chipmunks.

CARGILL

The Annual Meeting of the Women's Patriotic League of Cargill was held in the Red Cross Hall, Thursday 28th Sept. at 3 p. m. The Meeting opened with the National Anthem after which the Pres. Mrs. T. Chisolm addressed the meeting and read the following report of the year's work:—Surgical night shirts, 15; Flannel shirts, 110; Pyjamas, 45 prs. Socks, 253 prs; Wash Cloths, 81; Sheets 12; Surgical supplies—Pads, 47 doz; bandages, 10 doz. compresses, 9 doz. handkerchiefs 7 doz. 3 barrels and 1 box preserved fruit donated to our soldiers in France, 21 boxes sent to Cargill boys in France and England.

The following business was then transacted:—Officers re-elected. Pres. Mrs. T. Chisolm, Vice. Pres. Mrs. W. M. Cameron, Sec. Treas. Maude McCoy. Committees were formed after which a formal vote of thanks was tendered Mrs. Wm Clark, one of the oldest residents of the village, for her active service in knitting 58 prs. socks since Sept. 1915. A vote of thanks was tendered Mr. W. D. Cargill for supplying free lights for the Hall and to Mr. Cameron for donating the use of his hall to the society.

M. McCoy—Sec.

Maude McCoy—Treas.

Among the visitors here for Thanksgiving holiday were: Mr. and Mrs. Jno. Sirrs, Toronto, at Geo. Sirrs; Mr. and Mrs. Clark Pickering, at F. F. Balsden; Mrs. Adair, Preston, at Mr. Ben Neil; Miss Nellie Clancy, of London at home; Mr. Walter Sparling and son of Toronto, at Henry Sparling, Mr. J. J. Sweeney of Toronto, at Power House; Balmer Somerville of Brussels, with Mrs. Mathews.

Mr. Simon Scharbach left on Friday for a visit with friends in Guelph and Kitchener.

Mr. and Mrs. Martin Bester, Sundayed in Walkerton.

Miss Fowlie who spent the past few weeks with her brother here, returned to Hamilton on Thursday.

Mrs. John Phelan of Georgetown, Mich. and Mr. Jas. Kerney of St Marys spent a few days last week at the home of Mr. John Clancy.

Messrs R. Loughleen, W. D. Cargill, J. T. Clancy and R. A. Fowlie as skip, went to Guelph on Monday to lift the Bowman Trophy against Messrs Johns, Huether, Mahoney and skip Bryden of that city but were defeated by 34 to 13. Though not successful they are not dismayed and hope next time to secure the much sought Cup. Jim says next time he goes it will not be on a bowling mission.

Mr. and Mrs. M. L. Ziegler visited with friends in Neustadt, on Sunday.

The following spent the holiday out of town:—Mr. and Mrs. G. R. Wells, Mr. and Mrs. Sam Cargill at Port Elgin, Misses Hood and Selling at Mildmay, Mr. Jno Keyes at Owen Sound Mr. W. J. Loughleen at Woodstock, Mrs. Jas. Alexander at Owen Sound, Miss Gladys Keeling at Stratford.

Quite a number from here spent Thanksgiving at Walkerton.

Mrs. John Clancy left on Tuesday on a visit with friends in Stratford.

The second banquet and presentation to the 160th Bruce Batt. boys was given on Friday evening and a very large crowd was present to give the boys an enjoyable time. After justice had been done to the well-laden tables the ladies had provided, the duties of Chairman was taken by W. D. Cargill, M. P. P. in his usual pleasing manner, and addresses were given by Rev. Almack, Ex-Reeve W G. McCallum of Brant and Mr. John Rowland of Walkerton, while Misses Keeling, Stausel and Mrs. Fowlie, Messrs Napper, Loughleen and Ziegler contributed the musical part of the program. The recipients were—Corp. Jas. Hamilton, Lance Corps. F. Andersen, J. J. Clancy and E. Zimmerman, Ptes. H. Hanson, F. S. Kirvin, Joe Martin, Sandy Thompson, A. Burrows, W. Sullivan, each receiving $5 in gold and a pair of socks. Some of the boys left on the special train Saturday while the others left on Monday and large crowds were at the station to wish them God speed and a safe return.

Messrs Jno. Clancy and M. L. Ziegler attended the meeting of the Preparedness League for Brant, in the Township Hall on Monday night and we understand they delivered very stirring speeches.

SOUTH LINE

Mr. Allen Sheppard and Mr. Arthur Younge of Toronto are spending their holidays at Mr. Andrew Kirstine's.

Threshing is now the order of "The Line";—The Threndyle and Denny outfits being on the line.

Miss Hamilton of the South Line and Miss Teeple of Maple Hill are spending Thanksgiving at their homes in Paisley.

Quite a number were out to see the soldiers off Saturday afternoon,

Mrs. Wm. Lines of Swift Current is visiting her sister, Mrs. Traynor.

FORMOSA

Mr. Alex Oberle spent the week-end in Owen Sound attending the funeral of the wife of an old friend, Mrs. Jean Lewis, which took place on Saturday last.

Mrs. Joe Schwalm and daughter of Owen Sound visited at Mr. Alex Oberle's.

Mr. Winterhalt of Kitchener, visited at Mrs. J. B. Gortz's over Thanksgiving.

Frank Heisz was in Buffalo last week.

Dr. McCue, our popular doctor, has volunteered for active service as a medical man at the Front. We understand that the Doctor's services have been accepted and he is waiting the word to report.

The death occurred last week of the thirteen year old daughter of Mr. Nicholas Schlestel, who lives near Belmore. Funeral was conducted at Formosa Church by Rev. Father Brohman on Monday morning.

home as often as possible.

The presentation to the boys was then made. The following soldiers answered when their names were called and were handed five dollars by Mayor Lippert or have since received it.

Major Moffat, Capt. Ross Clark, Capt. Whitehead, Capt. Shaw, Lieuts R. Rowland, H. Henderson, V. A. McKechnie, H. Patterson, Sergt.-Major Britton, Sergts. I. A. Nairn, J. A. Reichenbach, W. H. Kidd, H. K. Watts, G. M. McCarter, E O Diss, H. E. McDougall, R. W. McFarlane, Corp. W. Saunders, Corp J. Henderson, Ptes N. A. Ambrose, F. Bannister, R. Bates, Leo U. Bauman, H. E. Bolden, Gordon M. Bell, Philip Beutty, Adam Denny, G. Fewelling, J. B. Huffman A. N. McConnell, M. J. McNab, P. J. Murray, W. O. Pettyplace, T. Reinhardt, W. G. Rehl, E. L. Robinson V. G. Runstadtler, M. G. Seigfried, N. E. Webb, George Weiler, F. E. Wells G. S. Wells, R. G. Wilson, C. J. Zettle Andrew Zuber, F. I. Weichter, H. A. Threndyle, John Wallace, John Lumley, Sergt. Neil McDonald, Pte. Chas James, Sergt. Harold Harcourt, Geo Wanless, Sergt. Wright, Pte. Wright Russell White, Capt. Todd, Pte. Geo. Craig, Lieut. Oliver, Pte. W. G. Van Horne, Sergt E. R. Hall, Pte. Alf. Weiler.

Reeve R.S. Nesbitt and Deputy-Reeve Archie Weir of Brant were among those on the platform having met with the Walkerton League to present the Brant boys in khaki with a V. on behalf of the people of the municipality. Unfortunately we were not able to secure the names of the thirty-odd sons of Brant who received the envelopes.

Major McNally was called upon by Mr. Rowland, and graciously responded. The Major received a great ovation, and in his address, did not relate his experiences in the trenches but took for his topic "The Bruce Battalion" He gave his hearers a line on the inside workings of the Battalion and particularly "A" Company which is composed mostly of Walkerton men and of which he is in command. This was the best address Major McNalley has given in Walkerton and he left a very good impression with the audience.

Other speakers were:—Mayor Lippert, Judge Klein, Frank Rennie, Reeve Spence Nesbitt and Deputy Reeve Archie Weir of Brant.

An enjoyable dance was given at the rink later in the evening in honor of the Boys, excellent music being furnished by an orchestra composed of Messrs John Korman, C. B. Robinson, and Miss Oberle, assisted by some of the band players. The receipts of of the dance, amounting to $75 25 were turned over to the funds of the 160th Band.

The boys left on Saturday for London. Great crowds were at the station in the morning and afternoon to see them off.

Yesterday word came from London that the 160th Batt'n will leave London Camp next Saturday afternoon for an Eastern training Camp.

Nyals' Blood Purifier

"Purifies the Blood"

"Nyals' Blood Purifier" means pure blood. Try it and you will be convinced. Boils, sores, pimples, skin diseases and rough skin indicate impure, thin blood.

"Nyals' Blood Purifier" purifies and enriches the blood, driving out the poisonous materials that produce such disagreeable symptoms.

Get a bottle at our store; we recommend it because we know what is in it—and every Nyal remedy is good.

Lieut. Harold Young Here.
Lieut. Harold Young who recently returned from the Front, came over from Hanover on Monday and received a warm welcome from his many old friends here. Harold is not much changed in spite of all the horrors he has come through on the firing line. He walks slowly with a cane as a result of shrapnel wounds in the back but speaks of returning to the Front in a couple of months. An account of his eye-lash escape from death is told in the Hanover correspondence on page 4 of this week's Telescope.

+ + +

Not On Casualty List
Mr. Robert Ballantyne of the C. P. R. is confident that the report that his son, Albert, was killed at the front is not correct. Mr. Ballantyne wired Ottawa about the matter and had an answer on Saturday stating that a cable had been sent to England and no person of that name had been among the casualties. The report that Albert had fallen in action came through a chum, who became separated from Albert through being sent to an hospital, and later wrote home that Al was missing. Mr. and Mrs. Ballantyne believe that the first report was a mistake and are hoping to get direct news from their son before long.

160TH LEFT ON SATURDAY

Large Crowd Saw the Bruce Boys Off at London East—Commissariat Car Hooked on at Toronto Provides Great "Grub."

The 160th Bruce Battalion left London on Saturday afternoon for an Eastern point. Quite a number of Bruce people went down to see them off. They reported that the boys were "right on their toes", in the pink of condition and keen to get off.

The rejection of a hundred and fifteen men at the final medical test was quite a disappointment to the boys. Three of the most popular and efficient officers were also rejected, Capt. Ross Clarke, Lieut. Harold Patterson and Lieut. Hay.

The London Advertiser had a good account of the departure of the 160th which we republish.

Although the 160th Battalion has been in London but a few months, says the Advertiser, there were hundreds of Londoners at the East end G. T. R. station this afternoon to bid it good-bye when it left for other training quarters. Many from districts where the battalion was recruited came in this morning by train or auto, and formed part of the crowd. The farewell was a hearty one, the trains pulling out to the sound of hundreds of cheering soldiers of other units in the city as well as those of citizens.

Differing from the procedure usually followed at the departure of a battalion, its own band furnished the music for the march to the train, forming up at the rear of the battalion. The bugle band of the 153rd Battalion led the way down Rectory street, which was lined with people from Dundas street to the tracks. The men passed over almost the same route as that taken by the famous 18th Battalion on its departure, recalling many of the scenes at the beginning of the war. The furled colors of the Batt. were also carried on the march.

The men wore their full equipment and carried their kit bags.

At the station a cordon was drawn about the waiting coaches by the 153rd Battalion. The men joined hands, forming an unbreakable circle, and little of the confusion noticeable at the departure of other Battalions was experienced. The departing men passed through the line in single file, passing to the coaches assigned to their section. The train divided into two sections. A and B Companies occupying the first one in charge of Major Moffat; C and D, the Bace Companies and the band left with the last section, in charge of Lieut.-Col. Weir.

At Toronto a Commissariat car with eight experienced cooks, was taken on and from then on the boys have been enjoying a specially good line of "grub." According to post cards which reached many parents yesterday, the boys had a great time on the trip East thus far.

Mr. John Rowland had a line from Corp. John J. Clancy, dated Campbellton, N. B. stating that the boys were doing fine and were well looked after.

Gets Military Cross
A recent cable announced that Capt. Stanley Norsworthy of Ingersoll, had been promoted to Major and awarded a military cross for gallantry. At present he is in a hospital recovering from wounds. Major Watt is a cousin of Miss S. Watts, Walkerton.

+ + +

Would Start Tile Yard
Mr. William Adamson states that if the C.P.R. connects up Walkerton and Teeswater within a year or two he will open up a big tile yard on his property off McGivern St. According to the survey made a few ago, the C.P.R. branch to Teeswater would pass alongside his property. As the cost of loading in the tile business is one of the most important items, Mr. Adamson would be in a position to turn out the tile at a comparatively low cost. The fact that the Hanover Cement Co. recently took an option on some farms between here and Teeswater is pointed to as evidence that the C.P.R. extension will be put through in the not distant future.

+ + +

To Divide The Offices
The race for the County Court Clerkship has dwindled down to Dr. Clapp of Mildmay, who was recommended by the East Bruce Executive for the position and Mr. O. F. Stark, the Tara lawyer. It is whispered that the affair will be settled by dividing the three offices held by the late Mr. Coats, Dr. Clapp, taking the Clerkship of the Surrogate Court, worth two thousand a year, and Mr. Stark getting the County Court Clerkship and the position of Registrar of the High Court. The two last named offices are worth $600 and $675 respectively, along with certain extras. It is stated that Dr. Clapp, not being a lawyer, is not particularly anxious to load up with the three positions and would be satisfied with the Surrogate Court position.

Mr. and Mrs. John Ernst announce the engagement of their daughter, Edith Alberta, to Mr. Walter Widmeyer, the marriage to take place the latter part of October.

A telegram from Lieut. "Bob" Rowland to his father yesterday noon stated that the Battalion arrived safely at Halifax. They will probably be there for some time.

W. H. Wright, the well-known barrister of Owen Sound, was nominated by South-East Grey liberals for the House of Commons and Dr. Mearns of Hanover for the local Legislature.

Mr. Thos. Dixon had a line from his son, Elliott, on Monday, stating that he was well and comfortable. He and some companions were billeted over an old brewery on the Somme Front.

Miss Mabel Garner, who has been in training for a nurse at the County Hospital, left yesterday afternoon for New York where she will take an additional course at the Gouverneur Hospital, a branch of the famous Bellevue Hospital.

Mr. James T. Clancy of Cargill, had a line from his brother, Corp. John Clancy, posted at Moncton, N.B., 7.20 p.m. Monday:—"Just arrived. Will be in Halifax Tuesday morning. All well. Boys are away on another march."

Ex-Bandmaster Geo. J. Wright of the 160th Batt'n Brass Band left for Watterville, Que. on Saturday morning to take a position as foreman finisher with Geo. Gale & Son. Mr. Wright's family will remain in Walkerton for the present.

Monday night's blow was the strongest wind that has been experienced in this section since the Good Friday storm of three years ago. A number of shade trees were blown down in the town and the orchards suffered badly throughout the district.

A farmer who saw a local-dealer delivering a load of wood to a Walkerton lady, who has been left with a family of small children while her husband is lying wounded in a military hospital, was so sure that she was being cheated that he told Coun. George Lettner about it. George's indignation promptly rose. He hunted up Chief Ferguson, and together with two other well-known citizens, they visited the wood-pile with a tape-line. The pile measured a good quarter short of the full cord. The dealer came forward with excuses and the offer of a rebate which was accepted as the lady was anxious to have the matter settled quietly.

News About Town on page 5.

Mr. Thos. Young of Red is visiting old friends in town.

Pte. Harold Skilling of Teeswater is reported badly wounded.

Pte. J. McDonald of Chesley was reported wounded in Monday's list.

The Red Cross Society's need for support is greater than ever to-day.

Miss Leafy Moesch is spending a couple of weeks at Kitchener and Preston.

Pte. Thos. Sinclair of Kincardine was reported killed in action on Saturday.

Mrs. Harley of Hanover is visiting her parents, Mr. and Mrs. John McKinnon.

Mrs. Parker of Anaconda, Mont. is visiting her father, Mr. O'Hagen at Chepstow.

Mr. P. Bremner has bought the millinery stock of Mrs. Gardner, who made an assignment recently.

Mrs. Atkey, who makes her home with her daughter, Mrs. Henry Pletsch, returned last Thursday from Vancouver B. C.

Pte. C. C. McDonald, a young man of Culross who went overseas with the 42nd Highlanders, was reported Killed in Action in Monday's list.

Mr. George Whitehead came up from Guelph to spend the week-end with his brother, Mr. James Whitehead, who is still confined to the house with bronchial trouble.

Mrs. Chard and little son arrived here Friday on a visit to her uncle, Mr. John Whitehead. Mrs. Chard is a daughter of Mr. Albert Whitehead of Weyburn, Sask. formerly of Walkerton.

Private Mitch Hinsperger, of Mildmay, was among those reported wounded last week. Mitch is a former member of the Telescope staff. He went Overseas last year with a Toronto Battalion.

Mr. Thos. Dixon attended the Fair in his old home town of Milton last week. It was the first time he had attended the Fall Show since back in '66. Few, if any, of his old schoolmates are living now at Milton.

Mr. Art Schourr who was home for the summer months, returned to Cleveland O. this week. Art is taking a position in the Cleveland Daily Plaindealer, where his brother, Billy is foreman of one of the Departments.

Rev. C. W. Cosens, pastor of the Methodist Church, took Anniversary Services at another charge on Sunday. His work here was well taken by Inspector John McCool at the morning service and in the evening by Mr. John Leggat.

Sergt. "Pat" Stephenson was here visiting old friends on last leave this week before leaving for the Front with a battery of artillery. Pat was formerly junior in the Canadian Bank of Commerce and has many friends in town.

Mrs. G. C. Kilmer came up from Toronto Saturday on a visit to her father, Mr. N. Crawford. Mrs. Kilmer, who has just returned from England, states that her son, Capt. Kilmer is doing nicely and will be able to return to Canada in a couple of months.

Mr. W. D. Ostic came up from Toronto this week to spend a few days with his mother, Mrs. Whitehead sr. Mr. Ostic's only son is leaving for Overseas shortly with the Simcoe County Battalion. Before enlisting he was accountant of the Royal Bank at Collingwood.

Potatoes are a good crop in certain sections of the West, according to a letter received by Mr. John Seller of Eden Grove from his son, who is located at Vanguard, Sask. 45 miles west of Swift Current. The farmers are getting $1.60 for their wheat and have a fairly good crop of it in that section.

MUST SHATTER RECORDS

To Meet the Greater Needs of the Times People Must Give More and More Says Capt. Patterson at Public Meeting.

The rather small audience that turned out on Tuesday night to hear Capt. (Rev.) J. R. Patterson's appeal on behalf of the Red Cross, enjoyed one of the treats of the year. The Capt. is a very able speaker and is in close touch with the care of the sick and wounded. "We have done well", said the speaker in his closing message to Walkerton citizens, "but we must beggar and break and utterly shatter all past records."

Mayor Lippert, who occupied the chair, said he wanted to see Walkerton people excell themselves for the Red Cross on Trafalgar Day. An enjoyable feature was a number of good patriotic selections rendered by the Edison expert who is in town at present on the Edison Phonograph.

In moving a hearty vote of thanks to the lecturer, Mr. D. Robertson said that if this war had taught Canadians anything, it was to give. He looked to the people of Walkerton to do their utmost on Thursday. Mr. H. M. Lay, who seconded the motion, pointed out the amazing effectiveness the Red Cross had shown in reducing the number of deaths through wounds since its organization.

The Canvass To Day

Before the meeting a committee meeting to arrange for Thursday's canvass was held in the Council Chamber, Mayor Lippert presiding. Mayor Lippert was named as Chairman of the Trafalgar Day Committee and Mr. R. M. Taylor as secretary-treasurer. Thirty-six canvassers were appointed to canvass the town, beginning at nine o'clock Thursday morning. No special sum is aimed at but the Committee hopes to exceed last year's total of $2300.

Arrangements were made to publish the full list of Contributors in the local newspapers.

Tenders Wanted.
Tenders for the draining of the cellar of the Methodist Church will be received by Mr. A. P. Pengelly, from whom full particulars may be had.

+ + +

Auction Sale of Furniture
An auction sale of household furniture will be held at the home of John Kuntz next to the Walker House, on Saturday at 1 p.m., also at the same time and place, cattle and hogs, the property of Messrs. Kuntz and Zettler. No reserve as they are dissolving partnership. John Purvis Auctioneer.

Death of Mrs. Whayman
The death occurred at the home of her daughter, Mrs. (Dr.) Farewell, at 1.30 a. m. Saturday, of Mrs Eliza Louisa Whayman, relict of the late Dr. W. F. Whayman. Death was due to senility, her age lacking but eleven days of being eighty years. The late Mrs. Whayman was born in Orford, County Suffolk, England, of an old military family. She was of a bright, vivacious disposition, much travelled, and even in her later years, took a lively interest in all that was going on around her. For many years she had made her home with her daughter, Mrs. Farewell, who was an only child. The funeral, which was held on Monday, was conducted by Rev. Mr. Parke, rector of Southampton Anglican Church, assisted by Rev. Thos. Wilson, pastor of Knox Church, Walkerton, Rev. G. C. Rock, pastor of the Baptist Church, and Rev. D. McLennan. The following gentlemen acted as pall bearers:—Dr. Porter, Dr. Stalker, Rev. D. McLennan, R. E. Truax M. P., John Rowland, John Tolton.

+ + +

Death of Mrs. McCann
The death occurred at Regina, Sask. on Monday Oct. 16th, of Mrs. Sarah Gwynne McCann of this town. Mrs. McCann left Walkerton in June in company with her daughter, Mrs. Brewer, intending to visit her daughter's home at Calgary. She was taken ill on the way and removed to the home of her son, at Regina where she lingered up to the time of her death. Mrs. McCann was the daughter of the late Richard Gwynne, one of the pioneer settlers of Brant. She married the late Rev. William McCann, a Methodist minister, who passed away in early life, some thirty-six years ago. Her husband came of a clever family of four boys, of whom two were Methodist ministers, and one a Roman Catholic Bishop, the late Vicar General McCann, whose death occurred at Toronto last year. She was a woman of sterling Christian character, respected by all who knew her, and quite active in Church work for many years. One son and one daughter survive: Mr. Wm. McCann of Regina, and Mrs. Brewer of Calgary. Mrs. A. Todd of Walkerton, Mrs. Wm. Smith of Oak Lake, Man. and Mrs. Thos. Grainger of Oak Lake Man. are sisters. The remains are being brought East for interment. The funeral will be held here on Thursday on arrival of the noon C. P. R. train.

HYDRO ENGINEER HERE

Engineer James Says Hydro Would Cost 6 to 8 Cents Per Kilo in Walkerton—Will Furnish Complete Estimates in Two Weeks.

Mr. James, district engineer of the Hydro Electric Power Commission, was present at the Town Council last Wednesday evening and gave the Councillors some information regarding hydro as it would affect Walkerton. He promised, in two week's time, to furnish the Council with complete estimates of the cost of installing hydro here, the cost of power, and, the rates that Walkerton would require to charge consumers under hydro.

Mr. James stated that the Council's first step would be to submit a by-law to the people, called an Enabling By-law, to give the Council authority to enter into a contract with the Hydro Electric Power Commission. Power would be delivered at Walkerton by the Commission, but it would be necessary for the town to erect a distributing plant. The cost of the distributing plant would be charged up against the local power rate, the idea being that the plant would not cost the tax payers of Walkerton one dollar in the long run. Mr. James said he understand it cost Walkerton in the neighbourhood of $1500 for street-lighting. Chesley, with hydro, had 82 street lights burning all night at from between $1100 and $1200. Roughly figuring, lighting would probably cost 6 to 8c per kilo in Walkerton under hydro.

One of the big items in putting in a distributing plant is copper. Unfortunately copper at the present moment is abnormally high. Before the war it cost 15 cents a lb, today it is 35c. In any case it would be impossible to commence work in Walkerton until the Spring and by that time there might be a change in the market.

In reply to a question, Mr. James said that the houses of the town were no more likely to be rewired with hydro than without. The same wiring regulations apply to both hydro and non hydro towns. He understood the indoor wiring in Walkerton was in pretty good shape. Under hydro, the fixed minimum charge is reckoned by floor space. The average home would pay about 35c per month floor space. The minimum for floor space will be 50c the maximum 90c. In the village of [illegible], where the rate is about the same as it would be in Walkerton, house lighting averages from $1 to $1.25 per month.

Mr. James said he would have a man here in a week's time going over the ground and would submit detailed estimates to the Council in about two weeks.

Grant for Hospital

Mr. L. G. Benton, Chairman of the Board of Trustees of the Bruce County Hospital appeared before the Council asking for a grant. He pointed out that since the war began, the revenue of the hospital had naturally decreased while the expenses were constantly increasing. In spite of the fact that the County Council had increased its annual grant, there was some two thousand dollars owing the Bank.

The Finance committee recommended that the usual grant of $100 be made to the Hospital.

Mayor Lippert said the town had had patients in the Hospital a long time this year, and all things considered, should increase the grant.

Reeve McNab, Chairman of the Finance Committee, replied that if the Council wanted to increase the grant this year, it should have done so before passing the estimates.

More Grants

Rev. R. Perdue, sec-treas. of the local Branch of the Bruce Preparedness League, asked for $200 to make up the cost of presenting $5 gold pieces to the soldiers, and to provide for other expenses—granted.

The usual grant of $50 was made to the Northern Exhibition. Coun. Russell expressed the opinion that it was about time that the Fair and the grant were both cut out.

A number of accounts were passed.

Those present were:—Mayor Lippert, Reeve McNab, Couns. Douglas, Arscott, Russell, McCarter.

The Council adjourned.

Engagement Announced
Mr. Hugh J. O'Neil announces the engagement of his daughter, Mary Maria to Mr. Earl Dicks of Detroit, Mich. the marriage to take place quietly on October 23rd.

Death of John Wedge
The death of an old and well-known resident of Walkerton, Mr. John Wedge, took place at the House of Refuge on Monday morning. Mr. Wedge, who was in his [illegible] year, had been confined to his bed upwards of two years, death being due to old age. An only daughter survives him. He was a man of good principles, good-natured and generous to a fault. Arrangements for a proper burial were made by a nephew. The remains were interred in Walkerton Cemetery on Tuesday.

ISSUE NO. 41, 1916

CURRENT COMMENT

The British Tommies laughed when they saw the caterpillar tanks careening across country. But it was no laughing matter for the Germans.

The United States purchased Alaska from Russia in 1867 for $7,200,000. The gold, silver and copper production for the year 1915 alone was valued at nearly $32,000,000, to say nothing of the enormous returns from fish, furs, seal and other products. Alaska was a good buy.

Negroes in the South are moving North in such large numbers that there is a sentiment in the South of doing something to prevent the exodus Evidently the South cannot get along without colored labor, no matter how much the colored man is despised. Northern railways are causing a demand for the negro.

To show the feeling of the German people towards the British, we have only to quote Major Ernst Basserman, leader of the National Liberal party, who declared yesterday that the most ruthless methods of warfare should be used against their arch-enemy, England. What more ruthless can he conceive than the present methods?

Britain proposes to keep tab on the Germans in future. A bill is to be passed compelling all firms and business men to register by their original names, and in anticipation of this, the London Stock Exchange has been advertising the actual names of many such firms, for the purpose of keeping British trade in British hands. Here are a few names culled from the list showing how Germans had assumed English names for business purposes:

Present name, Drena, Edward, changed from Blumenthal. Present name, Davis, Edgar Frederick, changed from Zossenheim. Present name, Duckley, Harvey Albert, changed from Dunkelsbuhler. Present name, Goldsmith, George Charle, changed from De Goldschmidt. Present name, Kerr, Max, changed from Karo. Present name, Layton, Ralph, changed from Loewenstein. Present name, Morland, Stanley, changed from Mamelsdorf. Present name, Orpen, Ronald Charles, changed from Oppenheimer. Present name, Rowton, Ludwig Simon, changed from Rautenberg. Present name, Shaw, Ernest, changed from Schwabacher. Present name, Shaw, Max Joseph, changed from Schwabacher. Present name, Shirley, Clifford Ernest, changed from Schuler. Present name, Turner, Martin John, changed from Tuchmann. Present name, Whitehill, Joseph, changed from Weisberg.

WANTED—MEN FOR THE NAVY.

Captain Rupert Guinness, of the Royal Naval Volunteer Reserve, was in the city yesterday in connection with his mission to obtain five thousand Canadians to join the Royal Naval Canadian Volunteer Reserve. The British Admiralty and the Canadian Government have about completed arrangements to permit the recruiting of these men in Canada, and Captain Guinness is here to superintend the movement.

These recruits do not need to be seafaring men. There are many occupations on board a British man-of-war that landsmen can fill with a little instruction, as soon as they find their sea legs. Seamen, yachtsmen, etc., will be welcome, but most all able-bodied young men will be eligible for the service. The pay of these men will be the same as Canadian soldiers receive, and will be much higher than those paid British seamen. But, while on board ship, they will receive the same pay as the British seamen, the difference being put away to their credit to be paid over to them at the close of their service.

This is an excellent opportunity for Canadian young men to serve their country, to see the world and to do their bit for the Empire. When the war is over the likelihood is that work will be awaiting them in the Canadian navy, should they feel inclined to continue a life on the ocean wave.

The Hamilton Recruiting League is making arrangements to assist Capt. Guinness in recruiting the men, the particulars regarding which will be made public later.

True Ideal of Aristocracy.

It is the people who have the wrong ideal who are trying to build up an aristocracy of wealth instead of an aristocracy of integrity. It is the people with the wrong ideal who are ashamed of work and working ancestors. It is the people who have the wrong ideal who are substituting glitter and show for the stately and simple standard of your grandfather and mine. It is the people who have the wrong ideal who are thus robbing friendship of its grace and hospitality of its meaning.—Virginia Bair in Good Housekeeping.

Grape and Apple Jelly.

Stem half-ripe grapes.

Wash them very carefully.

To one quart add two apples.

Cover with water and boil till mushy.

Strain through jelly bag; let juice stand overnight.

To each cup of juice, add one cup of sugar.

Then boil. From time to time while boiling take out a spoonful.

Keep this up until that taken out cools and "sets," and this is of the required thickness.

When thick enough put in glasses and when cool cover with a layer of melted paraffin.

Joy isn't damaged if you crack a smile, or even if you burst into laughter.

HER HUMBLE LOVER

From what Archie has told her, from the scraps of information which she gleaned, it would appear that the present Lord Delamer, is, if anything, a shade worse than his father; that he has never seen Northwell Grange, the abode of his ancestors, and that it is probable he never will. Paris, London, the gay haunts of pleasure, are his happy hunting grounds, and there he deports himself, while the home of his ancient house is left to a herd of deer and a gardener who plays the accordion. Signa's fancy runs such riot that she is almost beginning to experience the sensation of scorn for the misguided youth, and has worked up an eloquent burst of imaginary reproach, when something, which proved to be a shower of small stones, falls from the top of the slight cliff and strikes the edge of her dress. She looks up, but there is nothing to be seen, and concluding that some bird has rested on the edge and dislodged the gravel, she is about to lose herself in a second series of visions, when she hears unmistakable footsteps coming down the rudely cut steps to the beach.

For a moment she feels half amused. Evidently the musical gardener has espied them, and has tracked them to the spot from whence there is no escape, that he may capture them in the very act of that dire offence, trespassing.

With her head half-turned, and a smile on her face, she waits for the appearance of the owner of the feet that are slowly descending: then suddenly the smile vanishes, for there appears in sight, not a fustian-clad tiller of the soil with sour visage, but a gentleman who is certainly not a gardener, and whose visage cannot be described as sour.

Curled up in her corner, and half hidden by the low sun-whitened rocks, she does not come within the scope of the new-comer's vision, and as he stands leaning with one hand upon his stick, she has opportunity and time to regard him critically. Archie, with the fickleness of youth, has deserted his castle, and has disappeared round the corner with the now disheveled sunshade, doubtless to erect a similar edifice.

Standing as motionless as a statue, the newcomer makes a picture that Signa, artist to the core, appreciates and enjoys. Most of us prefer the picturesque to the commonplace—the beautiful, as certainly the stranger is neither commonplace or plain. Half-unconsciously Signa takes in the principal points of her picture: the tall, square frame, with its broad chest and well-formed limbs; the shapely hand, brown and strong for all its delicacy of shape; the gracefully poised head with its short, rippling black hair; and, lastly, the handsome, distinguished face, tanned and somewhat lined, with its dark eyes and clearly defined brows. A handsome man, still in his youth, for all the somewhat haggard and worn look in the eyes and the pensive turn of the clear-cut lips, half-hidden by the dark and rather foreign-looking mustache. A man with a past and a history, unless the human countenance be utterly deceptive and unreliable.

Signa, motionless as he whom she is criticising, notices, with a woman's quickness, that, though this man is undoubtedly a gentleman, his dress does not smack of Saville Row, that it is well-worn, and also—significant fact—that the wearer is utterly careless of its unfashionableness and of its age. There is no shining spot of gold upon him, not so much as a watch-chain, and the stick he carries has evidently been cut by his own hand from the parent tree. And yet for all his carelessly worn clothes, his unpolished stick and soft, rain-stained deer-stalker Signa detects the signs of birth and breeding. It has taken some few minutes to set down her impressions of him; they were stamped on her mind in as many moments, during which the unconscious object of her criticism had remained standing gazing seaward with an absent, abstracted expression. It was amusing thus far, but presently Signa grew uneasy. She had expected and hoped that having gazed his fill he would turn, and, still unaware of her presence, ascend the cliff and disappear; but as the moments rolled to minutes she grew impatient. Archie was out of sight—might get into mischief or danger any moment; she wanted —woman-like now that she could not —to leave the spot and return home. And yet she did not like to rise or call Archie. She might have done so at first, and gone her way without any awkwardness or embarrassment; but to discover her presence now would also acquaint this handsome wanderer with the fact that she had been playing the spy upon his actions. At the thought the color rises to Signa's face, and her brows knit; but the momentary feeling of annoyance changes to one of dismay when she sees the intruder throw himself down upon the beach and take a book from his pocket.

"Gracious powers!" she murmurs, "he may sit there for hours. I can't sit here waiting helplessly while Archie may—be in danger of tumbling into the sea."

And yet she could not bring herself to move; each moment she felt more dislike to facing the look of surprise with which she knew he would regard her. Besides, he was lying right across the narrow path through the boulders, which she must pass to reach the steps—unless she climbed the aforesaid boulders. The alternative gives her an idea. Suppose she should creep away behind him and reach the cliff, she could call Archie from there and be safe from the stare from those dark eyes which she so vaguely, foolishly dreaded.

With a smile at the absurdity of the situation, and yet with a faint thrill of annoyance, she rose softly, went back as far as the cliff would allow, and stepped lightly on to the first boulder and so on. She had reached half her prescribed distance, was just behind him, and still, perhaps, unseen or unheard, and was congratulating herself upon her ingenuity, when her foot slipped, and with the clattering of small stones, she slid to the beach. For a moment she remained motionless, half leaning against the stone upon which her hand pressed hard to support her—remained with a flush on her face and a haughty light in her lovely eyes, ready to meet the much-dreaded stare. But, to her amazement, the handsome head was still bent over the book, the prone figure remained as motionless as before.

A sudden thrill ran through Signa's frame, as the thought flashes through her "He is deaf." The thrill of surprise was followed by one almost of relief, and gaining courage by the assurance that he could not hear her, she stood upright and walked bodly past him. Three steps she had taken when, with a quiet self-possession, he rose, and with the book in one hand and the hat in the other, took a step toward her.

"I beg your pardon," he said. "Are you hurt?"

The sudden shock of the discovery that her theory as to his deafness was an erroneous one rendered Signa for the moment speechless. With a strange air of mingled patience and respect, he put on his hat and waited, his eyes fixed with true delicacy and consideration upon the cliff above her head.

Even in her momentary confusion and irritation, Signa recognized the refined courtesy, and she felt vaguely ashamed of having put the foolish idea of flight to experiment. In that moment of waiting, too, she noticed something strange about the voice: it was English unmistakably, yet English softened and made harmonious by familiarity with more musical tongues. There is much in a voice.

"The devil hath not in all his quiver's choice,
An arrow for the heart like a sweet voice,"

says Byron, and there was something infinitely sweet in this man's voice, sweet, yet grave and full of manliness—a voice that one could imagine stern and hard under provocation. That it was soft now was, Signa knew, because he wished to check any foolish alarm she might feel.

The haughty look dies out of the dark eyes, slain by the voice, but she answers gravely enough:

"Thanks! not in the least. My foot slipped——"

"I know," he says, softly, with a grave smile. "I was dreading it from the moment you started——"

"Then you knew——" exclaims Signa, with a sudden flush and a flash of the dark eyes.

He inclines his head, half apologetically.

"Yes, I knew you were there, but," he adds, not hurriedly, but with a quick earnestness as if he would impress it upon her—"not until I lay down. If you will come here where I stand, you will see the opening of the rocks low down on the beach, through which I caught a glimpse of you. I could not while I stood up."

Signa half-unconsciously obeys the request—or respectful command, whichever it may be.

"You see!" he says, with a faint smile, his eyes meeting hers steadily and with an intent look, as if he were guarding against the faintest expression of admiration or anything save the respectful desire to reassure her.

Signa inclines her head in silence.

"I am afraid," he says, still looking at her intently, and leaning on the stick with one hand, "that you will think—that you have already thought me a boor to lie there without offering to assist you?"

Signa turns her eyes upon him with a momentary flash. He had read her thought.

"I feared so," he said, gently; "and yet will you tell me which it would have been better for me to do? Will you put yourself in my place, before you condemn me? Say that you were a stranger who had unwittingly and innocently intruded on a lady's solitude, that you had not discovered it until it was too late for her to escape without embarrassment, would you not have done as I did—pretend that you had not seen her, and carried that pretense even to the verge of being clown enough to remain inactive when she needed assistance?"

He puts the question in the calmest, the softest of voices, with the grave earnestness of a man pleading for forgiveness, and anxious to explain away his offense.

Signa remains silent. What can she answer?

"I see," he says, "I was afraid that you would not find it easy to forgive me, and yet I acted for the best, as I thought. And the result might have been a sprained ankle on your part and an endless remorse on mine."

By this time Signa had recovered her wonted self-possession—is it possible that he has made this long speech to give her time?—and she turns to him with a laugh.

"I'm afraid I have been very foolish," she says, frankly, "and I deserved my tumble. I had an insane idea that I could escape without disturbing you. I owe you an apology for interrupting your reading."

He smiles.

"The book was upside down," he says. "I was too absorbed in the problem of the moment for reading. Now, having gained your forgiveness, you will let me help you to reach the cliff?" and he holds out his hand.

"Thanks," said Signa, "but I have a little boy playing truant round the corner. I must find him. Good morning."

"Permit me," he says, gently, and he points to a rock. "Sit down and rest, and I will bring him to you." and taking her consent for granted, he walks off. Signa seats herself and looks after him, conscious of a distant feeling of curiosity respecting him. If she had ever had any doubts as to his status, his manner has completely dispelled it. Be he whom he may, he is a gentleman, and used to command and obedience.

"An artist, perhaps," she thinks, but the next instant the upright, military bearing of the tall figure cancels that conjecture. Signa had met the stereotyped cavalry man, and was acquainted with his swagger and his characteristic style. No, this man was not of that class. While she is idly trying to arrive at a conclusion, the object of her speculation reappears round the corner, holding Archie's wet and gritty hand in his, and carrying the remains of the sunshade.

That Archie, who usually regards strangers with marked distrust, is favorably impressed by this one, is patent by the stream of voluble chatter with which he is honoring his conductor.

"Two large castles and a lighthouse, all of sand!" says the stranger, in his pleasant voice. "It is indeed a grand morning's work; who shall say Rome was not built in a day!"

"I know all about Rome," says Archie, complacently. "I'm reading the history with Signa. Do you know Signa? What made her sand for me? There she is sitting on that rock. Doesn't she look like a mermaid? You know what they are, I suppose?"

"I have met with them—yes," Signa hears the stranger reply.

"Really—not pretending?" exclaims Archie, with wide opened eyes of awe. "Tell me about them, will you? Were they like Signa? Not so pretty, I expect, were they?"

"By no means," says the voice, almost inaudibly.

"I thought not," retorts Archie, with great triumph. "I don't think there could be anything more beautiful than Signa. Could there?"

"I mustn't answer that," is the reply. "You see I do no want to make your sister angry——"

"My sister!" exclaims Archie. "She is not my sister. Signa is going to be my wife."

"Then at last I have met a happy man!" says the stranger, with smiling gravity, as they stop at Signa's side.

"Our young friend and I have been exchanging experiences in natural history," he says, stroking Archie's hair.

"Archie's experiences are vast," says Signa. "We must go now, Archie," and she rises.

"Oh, wait a minute or two," pleads the child. "The tide is coming in, and I want to see it surround the moat of my castle. Do wait, Signa; you can talk to this gentleman, can't she?" and he looks up with frank innocence.

The gentleman smiles, not at all embarrassed, and Signa, coloring faintly, laughs good naturedly.

"Archie gives me credit for the proverbial loquacity of my sex," she says. "How long will it be before the tide reaches your moat? We will give it five minutes."

"All right," says Archie, and away he bounds, dragging the ill-treated sunshade after him, and singing at the top of his voice.

"That little fellow seems very happy," says the stranger, leaning upon his stick and taking in the fleeting, diminutive figure. "Some one I knew used to say that man ceased to be wise when he reached the age of twelve."

"He is a dear little boy," Signa says, with a smile. "There never was a better, sweeter-tempered child."

"You are great friends, I see!" he remarks. "His approbation of you is just as emphatic, I thought you were brother and sister."

Signa smiles.

"No, I never saw him until a week ago."

He looks at her with evident interest.

"Indeed," he says, with a curiosity which is leavened by the deepest respect.

"No," says Signa, "I have only a week's acquaintance with Northwell."

"You are almost as much a stranger as I myself," he says, looking down thoughtfully at the pebbles at his feet. "It is a beautiful place. In the whole course of my wanderings I have never seen more variety of scenery, such various types brought into so close a proximity. Wide-stretching sea, peacefully-flowing river, grassy vales and leaf-clad hills—one has them all here within the hollow of one's hand, so to speak. A favored spot, and this perhaps is the point from which one can view it to advantage," and he makes a movement with his shapely, sunburnt hand.

Signa listens and watches him as the musical voice falls into a grave, dreamy cadence inexpressibly pleasing.

"And yet the owner of this favored spot leaves it, as you see," says Signa, with a smile. "You came through the Grange grounds, did you not?"

"Yes," he replies. "That is, I just skirted them."

"Did you see the house?" she asks. "It is a grand old place."

He nods.

"Yes; a very fine old place. It is a pity that it should have been neglected so long."

"Is it not?" assents Signa, warmly. "It seems almost human in its sad solitude and desolation. I fancy if the owner could see it, he could not fail to be touched."

"Very likely. With pride or shame, do you mean?" he asks, looking down at her calmly.

"With a little of both," says Signa, her eyes growing dreamy. "Pride that such a place, such a house was his; shame that he should have deserted it for so long a time."

He is silent for a moment. Then half unconsciously he sinks down on a bowlder lower than her own, and, leaning his head on his hand, looks out to sea.

Then he says quietly, in a tone of ordinary interest:

"Do you know anything of Lord Delamere, the owner?"

"I! No," replies Signa. "And I do not think anybody else in Northwell does. He is a sort of sphinx or mystery," and she smiles. "A kind of Wandering Jew or perpetual romance. All sorts of wild stories are told about him; fearful traditions which are no doubt to be taken with a pinch of salt. But I myself know nothing of him; how should I? I have only been here a week, and he, I think, has never been here at all."

"No," he says. "I think not."

Signa starts and looks down at him with astonishment. There is something in his tone that seems to intimate that he does not share her ignorance of the wandering earl.

"You know him?" she asks, curiously.

He is silent for a moment, then he looks round at her with calm, pensive eyes.

"Yes, I know something of him," he says. "We have been in the same place together—abroad and on our travels, I mean."

"Yes," says Signa, with marked interest. "And—and is he—but I beg your pardon, I forgot he is your friend," and she colors.

He laughs, the short, grave, musical laugh, and makes a gesture, slightly foreign, with his hand.

(To be continued.)

The Armenians.

The Armenians are not Roman Catholics, but are members of the Armenian church, one of the very oldest of the eastern churches not in communion with the orthodox Greek church of the Church of Rome. The doctrines of the Armenian church are almost identical with those of the orthodox Greek church. The Eucharist is administered in both kinds to all church members, and the clergy may marry before ordination.

Foiled the Hogs.

A travelling salesman passing through a new district in Virginia came to a woods in which there were a number of hogs running in and out of the trees like mad. He wondered at their constant motion and driving up to the little shack, the home of the owner of the woods, asked the wife, who was standing in the doorway, "Are those hogs mad?" She said, "No, sir." "Well, why do they race about like that?" She said, "Sir, it is this way. My husband is both deaf and dumb and when it is feeding time he simply taps on the trees and the hogs come. But don't you know, sir, the darn woodpeckers have gotten those hogs crazy."

The salesman passed on.

Minard's Liniment Cures Garget in Cows.

Gifts of the Grass.

The grass is missed only by its absence. When we pass by a house which is minus a green lawn or grassy plot in front we exclaim, 'What a blot on the landscape!' In a vague way we realize that the grass gives tone and color to outdoor life as nothing else can; that no picture is complete without it. All the beauties of the seashore—the bold rocks, the crested surf, the dashing waves, the lights and shadows which play at sunrise and sunset beside old ocean—cannot compensate for the lack of the grass beneath our feet. Friends wintering at southern beaches have told us that they grew homesick for the grassy fields and meadows of home.—Margaret Woodward in Countryside Magazine.

Monsieur:

For 15 days in the month of January I was suffering with pain of rheumatism in the foot. I tried all kinds of remedies but nothing did me any good. One person told me about MINARD'S LINIMENT; as soon as I tried it the Saturday night, the next morning I was feeling very good; I tell you this remedy is very good; I could give you a good certificate any time you would like to have one. If any time I come to hear about any person sick of rheumatism, I could tell them about this remedy.

Yours truly,
ERNEST LEVEILLE.

218 Rue Ontario East, Montreal.

THE STONES OF VENICE.

(Rochester Post-Express.)

Neutral observers in Venice denounce with flaming indignation the aerial attacks the Austrians are making on that part of the city famed for its beautiful and historic works of art. There are no Italian guns, munitions or other stores within the limits of the art city. Not the slightest military advantage could be gained by blowing all its storied churches and other monuments into the lagoons. Yet in a spirit of malice and wanton destruction this part of the city is bombed persistently, though just beyond it are centres of great military importance which the aerial raiders could easily reach.

The last of the noted churches to be destroyed is that of Santa Maria Formosa, the first sacred edifice in Venice consecrated to the Virgin—an old and venerated pile when America was discovered. This was wrecked one day last month. Yet this spiteful demolition of the world patrimony of art took place also in Belgium and France, where particular pains were very evidently taken to batter the splendid fanes into rubbish heaps.

This war seems to have loosed a spirit of malignancy for which it is not altogether easy to account There was not such wanton ruin of wonderful edifices during the Napoleonic struggle; and it is yet to be proved that a single woman or child was murdered or mistreated during the Civil war. It is conceivable that the cities beyond the Rhine may suffer during the coming year and even the heaven-pointing spires of Cologne may crumble under enemy shells. It requires more saintliness than the average belligerent possesses to resist the temptation to reprisals in kind. But it is safe to say that the glorious mosque of St. Sophia will not be a target for British guns when the city of the Golden Horn is at their mercy, as it probably will be in a few more weeks or months.

The Turk has wholesale assassinations of Syrian and Macedonian Christians to his discredit and is an undeveloped, ignorant extortioner and robber on general principles, a sensualist, fatalist and fanatic whose power of oppressing subject races is manifestly near its end. Yet he has certain chivalrous characteristics. He never shoots at wounded and helpless men; and all accounts agree that warfare as he wages it has less of that deliberate, diabolical frightfulness than characterized the occupation of Belgium.

There must be some adequate reasons for all these things and we may be sure that, after the war is over they will be subjects of discussion until some light is thrown upon them. For the events of these five years through which we are passing will probably be the theme of thousands of writings for a thousand years. It is our lot to live in an epoch which humanity may always look back upon with wonder and horror as the era of the most stupendous uprush of animality which ever imperilled the evolutionary ascent of men.

HOW PNEUMONIA STARTS AND HOW OFTEN PREVENTED

You catch a little cold to-day, and by to-morrow it has reached the throat, next day the lungs are affected and you wish you had used "Catarrhozone," which kills colds in five minutes. In the first place, Catarrhozone soothes the irritated membranes and relieves congestion, then it cuts out the phlegm and destroys the germs. It enables the blood to retain a natural supply of oxygen, lungs food and vitality. In any cough, bronchitis or catarrh, it is guaranteed to positively cure. Beware of dangerous substitutes offered under misleading names for genuine Catarrhozone, which is sold everywhere, large size, containing two months' treatment, costs $1.00; small size, 50c; trial size 25c.

VARIED ACTIVITIES OF WOMEN.

Queen Elizabeth of Belgium is a fully qualified doctor of medicine.

Women barbers, hairdressers and manicurists in New York City number 2,364.

Over 8,000 women are engaged in commercial pursuits in England and Wales.

Pennsylvania has nearly 50,000 girl workers between the age of 16 and 20.

All the women of the Austrian Imperial family are acting as Red Cross nurses.

Miss Elizabeth Moran has been appointed state factory inspector of Michigan.

Mrs. H. W. H. Strong is the only woman member of the Los Angeles Chamber of Commerce.

Girls are now acting as elevator operators in London's largest department stores.

Miss Gertrude Dallas is the first American girl to be admitted to the Russian Drama school.

Girls in the Kansas City public schools will hereafter be taught how to launder shirts.

Mme. Poincare, wife of the president of France, is working four hours a day as a nurse in the Bordeaux hospital.

Sixteen-year-old Hazel Thompson captured the prizes for baking, canning and sewing at the Ohio State fair.

The new Colony Club building in New York, one of the richest women's clubs in the world, will cost over $400,000.

Mrs. Lawrence Marston not only writes plays for moving pictures, but acts and directs her own plays as well.

Miss Signe Bergman, president of the Swedish Society of Woman Suffrage, is chief cashier of the State Bank of Sweden.

The Rockefeller Foundation has given $200,000 to be used during the next ten years for pensioning widows with dependent families.

The kingdom of Saxony takes first place as an industrial state in Germany, and in 1912 had 806,405 workers, of whom 276,710 were women.

The International Association of Steam Operating Engineers has a woman's auxiliary organization which is independent of the men.

Women jurors in Washington are protesting against the non-provision of powder puffs and nighties for them when they are detained over night on a case.

Mrs Annette Abbott Adams, just appointed assistant district attorney in San Francisco, is the first woman in the United States to occupy such a position.

Suffragettes in England are now training themselves to shoot a rifle, and even the departmental stores have set up ranges for shoppers to practice at.

Miss Lois Weber is the highest salaried scenario writer and actress in the world, having just signed a contract with a moving picture concern at a salary of $60,000 a year.

Only 128 mothers are receiving pensions in Pennsylvania, while 1,660 who have made application will have to wait owing to the inability of the appropriation to provide for all.

HALLAM'S GUARANTEED
FUR COATS AND SETS

DIRECT FROM TRAPPER TO WEARER

You can save the many middlemen's profits by securing your fur garments from us.

We buy our Raw Furs direct from the Trappers for cash, and are the largest cash buyers of raw furs in Canada, buying direct from the trapper.

These furs are manufactured into stylish fur sets and fur coats at the lowest possible cost, consistent with the best workmanship.

Then we sell them direct to you at the very low catalog prices. We pay all delivery charges.

Every garment is sold under A POSITIVE GUARANTEE OF SATISFACTION TO YOU or your money back.

Our sales for fur sets and fur garments last year exceeded all our expectations and were the largest in the history of the house.

This year we confidently expect still larger sales, since the people realize more and more the bargains they obtain from Hallam.

We have in stock a large and varied assortment of all the articles shown in our FUR STYLE BOOK and can guarantee PROMPT SHIPMENT.

PRIZE CONTEST—$300 in Cash given away free in Hallam's Zoological Contest, 64 Prizes—Write to-day for the 1916-17 edition of

HALLAM'S FUR STYLE BOOK

which gives full particulars of the contest and contains 32 illustrated pages showing beautiful and stylish fur coats and sets, moderately priced.

RAW FURS—We are the largest Cash Buyers of Raw Furs direct from the Trapper in Canada. Our Raw Fur Quotations sent Free.

GUNS—Traps—Animal Bait, Fish Nets, Tackle and a complete line of Sportsmen's Supplies. 48 page Sportsmen's Catalogue Free.

311—MUSKRAT COAT—Made from select dark skins, well matched, deep shawl collar with cuffs. The graceful flare skirt and stylish lines of the coat combined with the handsome [illegible] border [illegible] give this garment a very striking appearance [illegible] in bust 32 to 42 [illegible] delivered to you [illegible]

312—MUSKRAT MUFF to match $10.00.

THE HOUSE FOR GIFTS.

Minard's Liniment Cures Distemper.

Giving a Horse Its Name.

The shire horse owes its name to Arthur Young's remarks, in the description of his agricultural tours during the closing years of the eighteenth century, concerning the large old English black horse, "the produce principally of the shire counties in the heart of England." But long previous to this the word "shire" in connection with horses was used in statutes of Henry VIII. Under the various names of the war horse, the great horse, the old English black horse and the shire horse the breed has for centuries been cultivated in the rich fen lands of Lincolnshire and Cambridgeshire and in many counties of the west. Curiously enough, the Shire Horse Society, which has done so much to promote the breed, was known for the first six years of its existence, which began in 1878, as the English Cart Horse Society.—London Chronicle.

Every Wage Earner Should Answer Question Himself or Herself

WHAT DOES THE FUTURE HOLD FOR YOU IF HEALTH GIVES WAY?

In dollars and cents, what is the worth of the brawn of your arm; what is the value of the staying power that permits continuous labor— what are they worth to you?

Suppose you did something so foolish as to reduce your strength, vitality or judgment one half, and it were impossible to get them back—how much would you pay to regain the lost portion?

When you let yourself run down, you reduce your chances for success in life— if sleeplessness comes you score lower still—should appetite or digestion fail, you are stared in the face by physical bankruptcy.

Don't let it go so far, take Ferrozone, it has cured thousands and it will cure you; it builds up bodily strength, makes muscles like steel, replaces spring tiredness by energy and new life. Ferrozone rebuilds sick folks because it contains the strengthening elements that every run-down system requires.

Especially before the hot weather comes, everyone needs a purifying tonic—Ferrozone fills the bill exactly—nothing known that juvenates and uplifts so fast.

At once the appetite improves. You feel well and arise next morning feeling fit and fine.

Headaches disappear, weakness gives way to the vigor that only Ferrozone can supply. Try it, results are guaranteed, 50c per box or six for $2.50 at at all dealers or by mail to any address if price is remitted to the Catarrhozone Co., Kingston, Ontario.

His Backbone is a Spring.

The snapping bug has a spring in his back, like a knife. When not in use as a spring it serves him as a backbone, so you see he is a believer in scientific efficiency, and makes one part of his machinery do the work of two. His spring backbone, few minutes. He came down in a gives him power to jump, which in turn gives him his name. Nature probably gave him the spring to help him get on his feet when he's on his back. You've noticed how helpless some insects are when you lay them on their backs. Not this one, however. He slips his backbone out of its groove and then slips it back again suddenly. The spring pops him up in the air, he turns a somersault and drops right side up. Spring backbones are common in several other beetles. The beetle of the pestiferous worm, which destroys the farmers' crops, has a spring in his back. Other members of the family make their homes in trees or decayed wood.

Minard's Liniment Cures Diphtheria.

How Japs Play Ken.

In its most widely practiced form the basis of the Japanese game of ken is that the fully outstretched hand signifies paper, the fully closed hand a stone, and two fingers alone extended, the rest being closed, scissors. Each of the players counting one, two, three, throws out his hand at the moment of pronouncing three, and the one whose manual symbol is superior to that of the others, according to the theory of the game, wins the trial. Superiority is determined on the hypothesis that whereas scissors cannot cut a stone they can cut paper and whereas paper is cut by scissors it can wrap up a stone—consequently scissors are inferior to stone, but conquer paper; stone is inferior to paper, but conquers scissors, and paper is inferior to scissors, but conquers stone. There are innumerable varieties of the game.

HELP WANTED.

WANTED—GIRLS TO WORK ON knit underwear—seamers and finished stitchers preferred. We also teach learners, any girl with good knowledge of plain sewing; good wages; ideal factory conditions. Zimmerman Manufacturing Co., Ltd., Aberdeen and Garth streets, Hamilton, Ont.

WANTED — HOUSEMAIDS AND waitresses. Previous experience not necessary. Apply, "The Welland", St. Catharines, Ontario.

WANTED— EXPERIENCED COOK-general; no laundry work; wages [illegible]; references. Address, 25 Queen street south, Hamilton, Ont.

MISCELLANEOUS.

WANTED—GIRLS OF GOOD EDUCATION to train for nurses. Apply, Wellandra Hospital, St. Catharines, Ont.

LADIES WANTED.
TO DO PLAIN AND LIGHT SEWING at home, whole or spare time; good pay; work sent any distance; charges paid. Send stamp for particulars. National Manufacturing Company, Montreal.

WANTED
Help for Woollen Mill, Carders, Weavers, Fullers and Napper Tenders. Good wages paid in all Departments and steady work assured. We have several openings for inexperienced help, where energy and ability will bring promotion. Wages paid to apprentices while learning weaving. Special inducements to family workers. Write, stating full experience, if any, age, etc., to the SLINGSBY MANUFACTURING CO., LTD., BRANTFORD, ONT.

GIRLS WANTED
Experienced knitters and loopers, also young girls to learn. Clean work and highest wages.
CHIPMAN-HOLTON KNITTING CO., LIMITED,
HAMILTON, ONTARIO.

Contrasts.

Now the hard times are upon us,
When from temporary dwelling
In the country and the suburbs,
Citywards the folks come trooping
From the dear delights of summer
To realities of autumn;
From the outdoor life of nature
To the pent-up brick and mortar;
From the fields and dells and woodlands
To the sight of backyard visions.
From the daylong songs of birdling
And the nightfall's chirp of crickets
To the strident yells of Arabs
And the clanging gongs of trolleys,
And the yowls of cats nocturnal,
From the happy peace and quiet
To the thousand awful noises
Of the loud, insistent city;
From the loneliness so welcome
To the curious gaze of neighbors,
From the idle ease of hammocks
To the toil of sweeping carpets,
Hanging pictures, cleaning ranges;
From the leisure stroll of roadsides
To the rust and push of shopping;
From the fruit-feasts in the orchard
To the weary trips to market;
From the Eden of contentment
To the murmurings of Hades.
Yes, the contract's hard and bitter
Of the move back to the city.
—Baltimore American.

Holy Lands of All Religions.

Christians call Palestine the Holy Land because it was the birthplace of the Christian religion on earth as well as that of the Saviour, whose birth, ministry and death are inseparably associated with the history of Jerusalem and vicinity. To the Mohammedans Mecca, in Arabia, is the holy land it being the birthplace of Mohammed, the saviour of the followers of that faith.

India is the holy land of the Chinese and other oriental Buddhists, it being the native land of Sakya Muni, the supreme Buddha. Elis, one of the several divisions of the ancient Peloponnesus, was the Mecca and the Jerusalem of the ancient Greeks. The temple of Olympus Zeus was situated at Elis, and the sacred festivals were held there each year. The believers in the Shinto religion make annual pilgrimage to Sitsa Kara, the immense stone pillar where their supreme ruler last stood while talking to men.

Minard's Liniment Cures Colds, Etc.

TWO PICTURES.

An old farmhouse, with meadows wide,
And sweet with clover on each side;
A bright-eyed boy, who looks from out
The door with woodbine wreathed about,
And wishes his one thought all day—
"Oh if I could but fly away
From this dull spot the world to see,
How happy, happy, happy,
How happy I should be!"

Amid the city's constant din,
A man who round the world has been,
Who, 'mid the tumult and the throng,
Is thinking, thinking all day long—
"Oh, could I only tread once more
The field-path to the farmhouse door,
The old green meadows could I see,
How happy, happy, happy,
How happy I should be!"
—Marian Douglas.

He takes the great ornament from friendship who takes modesty from it.
—Cicero.

More Man-Power Behind the Job is wanted in every factory, in every store, in every office. Man-power comes from nourishing food that is rich in muscle-making material. Shredded Wheat Biscuit contains all the body-building material in the whole wheat grain in a digestible form. A man's food for a man's job. Serve with milk or cream or with sliced peaches or other fruits.

Made in Canada

The Sniper's Busy Day

He had crept, before dawn, with a big "pasty" that had come straight from Devonshire, his rifle and enough cartridges for the day to a little fragment of wall that stood inconspicuously before the trenches and commanded, at almost an enfilading angle, the enemy's line and a part of his own. The bit of a wall, holed and broken, and belonged to a garden: a rose bush still clung to it and offered to his eyes, when darkness paled, one big, velvety crimson bloom, but a few weeks ago a German gunner four miles away, had placed with admirable precision a couple of shells in that sunny nook, and nobody could call it a garden now. With the exception of the flower it looked more like a Wandsworth corporation dust-heap.

The rose interested him, because just a year ago, in a garden of the west country, he had picked one very like it before breakfast one morning and set it on the table in a tiny vase and his wife had pinned it in his buttonhole as he started on a journey.

Daylight came and a French aeroplane at an immense height took the first sunbeams on its wings like some golden moth. He watched until it vanished; then, kneeling, pushed out a piece of loose stone ready for the muzzle of his rifle and peered over the landscape. He would have to be careful, after his first shot. Something moved in the distance, just below the parapet of a trench. Aiming steadily, he fired. There was a flicker of dust, and he saw an arm thrown up spasmodically.

An hour passed by before he perceived any other suspicious movement, and then his two rapid shots betrayed his position. A bullet pinged viciously against the wall and he smiled. His day, the lonely day of the sniper, was beginning. He tried the dear old trick of lifting his cap slowly, on a twig, into view; it fell at his feet with a ragged hole through the peak.

"That settles it," he said. "This is a kind of duel." Pulling out his field glasses very cautiously, holding them in one hand, he moved inch by inch until one lens coincided with the aperture in the wall. It is not wise at a sniping post to use glasses as freely as if you were in the stalls of a theatre. He guessed that somebody lurked behind a group of blunt tree stumps that verged on the No Man's Land 500 yards or so down the line. And that somebody was an excellent marksman. Also, that the news was going round; for five minutes, after as he still gazed attentively, a sputter sounded from the distance and a powdery cloud ascended from the desiccated mortar of the poor little wall.

"Machine gun," he said to himself. "Not quite cricket." One of the brief hail of bullets had swished through the loophole and tore the sleeve of his coat. "Fluke." Any duffer can squirt with a machine gun." He handled his rifle lovingly and took a pot at the middle tree stump, half expecting a flag to appear, as at the butts, and signal his score. Nothing happened.

The day wore on to afternoon. He ate most of his pastry and wondered if he dared start a tiny fire to make tea. Lighting a few dry sticks, and adding to them twig by twig, he managed to keep the smoke down and boil a cupful from his water bottle in an old tin. He drank his tea and sighed with satisfaction.

"That's better," he said. "But this is much too slow." Only a few shells had passed over head the whole morning: this portion of the line seemed half-asleep. It was the game to send a shell or two across just to show that the war was going on all right; but as to fighting—there simply wasn't any.

Towards evening he saw the top of a German head dodging along a trench; it disappeared at his next shot. The machine gun began its resentful protest again, and he sat with his back to the wall watching the bullets tear up the earth and grass on each side. But at a queer metallic sound that rapidly swelled to a roar his face looked troubled.

"Shells," he thought. "High explosive. And two hours to dark. Not sporting." The thing burst with a heavy concussion a quarter of a mile short. In five minutes came another—it fell beyond him.

"Nasty devils; getting the range." He peered upward and saw what he expected to see—an enemy 'plane circling high, spotting for its battery, regardless of the woolly puffs that denoted shrapnel from one of our Archies. It dropped two smoke balls and retired—just in time, for a friendly pilot was sailing up after it. The third shell followed, inevitably; it missed the wall, but it was near enough to send an uncomfortable tremor through the garden, and a piece of flying stone cut the rose off as neatly as if it had been snipped by a pair of scissors. He crawled to the bush, picked up the flower, and stuck it in his tunic.

The fourth shell burst in front of the wall and brought it down about his ears, all but about two feet of it, and he received, as he imagined, a nasty scratch. Two feet of stone wall is quite a decent protection against rifle fire, but precious little use against H. E. An idea struck him.

"I'll bet," he thought, "that other blighter is watching these crumps. If so, I've got him." Lying at full length he saw plainly through the glasses the head of his opponent, noting the effect of the last shell. With a careful sight, he fired and looked. There was no sign of the other. Two shells—friendly ones—screamed over his head at intervals of five minutes.

Soon twilight was falling, and as he waited for welcome darkness he suddenly felt faint. Surprised, he found that his scratch was a serious affair; his right trouser-leg was stiff with blood. He started to crawl home across the pitted earth, dragging his rifle.

Half way over, as he judged, he stopped. He had lost his sense of direction; the sky had clouded and obscured the glow that had shown him the east. He crept on, hoping he was right, feeling very rocky even after a sip from his small store of water. The silence was oppressive. But presently it was broken by a small sound, a small, gasping sound. He listened. Close by him something moved — the form of a man; and as it shuffled painfully nearer he saw that one arm was useless from the shoulder.

"Hullo!" he called. "Are you English?"

"No," came the answer. "I go to my trench. I am hit by your sniper. But I cannot farther go."

"So I did get you after all. Here—have a pull at my water bottle. But which way are your trenches?"

"So——," said his opponent of the tree stump, indicating the direction. "Quite near."

"Then you turn round and come with me," he replied. "Hot tea with something in it when we get there, and to eat."

"So!" exclaimed the German. "I thank you."

Half an hour after the two reached the British line and fell over the parapet almost into the arms of an astonished corporal.

"Party's gone out looking for you," said the corporal. "Our second shell curled up the battery that was putting at you. But who the blazes have you got there?"

"An honorable enemy, my son," said the sniper. "Look after him, and for heaven's sake give me a drink. My bottle's empty."

The next day, bandaged and easy, he lay in a bright ward at the base hospital, looking at a rose which the nurse had taken from his coat.

And three days after a little lady received that rose, flattened but fragrant, in a letter, and kissed it. For the news it brought was that the sniper was coming home, having done a good day's work, for a month's rest.—London Mail.

A rich and distinctive suit developed in cream La Jerz smartly belted at the waistline and elaborately trimmed with moleskin.

Huns' Wealth In Lorraine

Ferdinand Engeraud has written an informative article on what Lorraine means to Germany, more particularly from the point of view of its great mineral wealth. He lays stress upon the material wealth of Alsace and Lorraine and points out that it is only since the war that France has realized that it is the soil of the lost provinces which has made Germany's fortune.

He declares that the possession of Lorraine has been the strength of Germany that it is from there she derives her metallurgical supremacy, the cause of her political hegemony, and that it is in direct consequence of her grip on the few miles of Lorraine soil taken in 1871 and of those other mining districts now occupied by her in Belgium and Northern France that she has so far been able to hold her own against a world of foes.

M. Engeraud says:

"A few figures will make the matter plain. In 1913, out of 28,607,000 tons of iron ore extracted from German territory 21,135,000 came from the Lorraine mines alone. On May 20, 1915, representatives of the great industrial and agricultural associations of Germany, when explaining to the Chancellor that since the beginning of hostilities it was the iron ore of Lorraine which provided nearly 80 per cent. of the manufactured iron of the empire, declared that 'were the mining operations in Lorraine to receive any setback the war would be half lost thereby.'

WEALTH IN LITTLE CORNER.

"We actually did not know in France, and we have only learned the fact through Germany, and from our frontier line, Longwy-Briey, we could dominate with our guns nearly the whole of the mine fields of Lorraine. For it is in the narrow sector comprised between the Franco-Luxemburg frontier and the River Orne— a quadrilateral of from fifteen to twenty miles broad—that the Germans have concentrated their mining works, the mines to the south of the Orne being neglected.

"It is from this little corner of Lorraine that the German colossus draws his strength, the raw material for his metallurgical enterprises, the best weapon to assure his hegemony—and we ignored it completely. To be fair, one must admit that when Germans took over Lorraine in 1871, they ignored it too.

"The ferruginous basin of Lorraine starts from the slopes of the Moselle and runs toward the west. The ore is of two kinds, diluvial ore found in lodes and oolitic ore, popularly known as 'forsforts' and phosphoric 'minettes.' In 1870 metallurgists held the first-named only to be marketable; it was richer in iron, free of phosphor, and, lying near the surface, easier to work. But it was comparatively rare, and phosphoric 'minettes,' found by deep mining toward the west, were supposed to be worthless. Yet this formed the greater part of the strata.

LUCKILY OVERLOOKED BRIEY.

"Thus it came about that in 1871 the German General Staff and the engineers charged with settling the new frontier seized eagerly the most celebrated mines of 'forsforts,' that is to say, the surface mines to the north and east: the others they passed over. It is owing to this lucky mistake of theirs that we still possess the mines of Briey. Nevertheless, the great future of this region might have been foreseen, and any man discarding professional [illegible] must have known it already had been scientifically demonstrated that these ores could be dephosphorized and that the experiments of the laboratory must inevitably lead to practical metallurgical results.

"This is exactly what happened after the war of 1870. In the year 1876 a young Englishman, Sidney Gilchrist Thomas, junior clerk at Marlborough street police court, discovered a method for dephosphorizing pig iron, and the discovery proved to be one of the greatest economic revolutions in history. For France it was more fortunate than a great victory, giving a hitherto unsuspected value not only to the ores of French Lorraine, but also to those of Normandy of the west.

"France in the matter of metallurgy has always shown herself indifferent and short sighted. She failed to draw from Thomas' discovery the profits she should have drawn. Germany, on the contrary, rose to it at once and has derived immense wealth from its application to her iron ores it is, in fact, the Thomas process, invented after the annexation of the iron basin of Lorraine, which has allowed German metallurgy to attain its formidable predominance.

AMAZING TONNAGE.

"From 744,000 tons in 1875 the extraction of Lorraine ores rose in 1913 to 21,136,000 tons, iron smelting rose from 2,500,000 tons in 1880 to 19,000,000 in 1913, and steel smeltings from 800,000 tons rose to 19,000,000 tons. Of these 19,000,000 tons of ore more than 12,000,000 tons were produced by the Thomas process, and of the 19,000,000 tons of steel 11,000,000 tons came from the Thomas converter.

"To produce this huge output Germany exploited the Lorraine iron ores relentlessly. Up to 1903 she was able to obtain all she required from them, and the amount of ore she had to import was very small. But from 1903 onward the situation changed entirely. The figures for Lorraine ores remained almost stationary, while those for ores brought from foreign sources jumped to fantastic heights. From 4,000,000 tons they became in 1913 14,000,000 tons.

"The German metallurgists were now buying from other nations one-third of the ore they required. Worse still, they had observed during the preceding ten years a steady deterioration in their Lorraine ores, while those across the frontier at Briey had a ferruginous value four or five points higher. They recognized with dismay Bismarck's mistake in 1871 and the great opportunity lost to them. Every year as their need of iron ore increased the thought of this mistake weighed more heavily upon them.

"As we know now, thanks to the notorious petition addressed to Bethmann-Hollweg clamoring for permanent annexation of all conquered territory, the reparation of the above error was one of the chief ends if not the first cause of the present war. They claim all the iron mines of Briey, promising themselves similar points from these as they have already gained from those on the the German side of the frontier."

Mme. Petroff

(By Barbara Phipps.)

It was midwinter in what was then St. Petersburg, now Petrograd. A party of ladies and gentlemen were skating on the Neva. A lady was standing somewhat apart from the others, looking at the skaters. Noticing two gentlemen go by her in company, she turned to a lady standing near and asked who they were. She was informed that one of them was a grand duke, the other Count Demidoff. At the mention of the latter name the enquirer started. Her informant noticed it and asked the cause, whereupon the other said something which interested the hearer greatly.

"I am Mme. Garotsky," the latter said. "I know the count very well. If you will permit I will arrange a meeting between you and him."

The next day Count Demidoff received an invitation to dinner with Mme. Garotsky to meet a friend of hers from one of the provinces. He accepted the invitation, and the moment he laid eyes on a guest to whom he was introduced as Mme. Petroff he was struck with her beauty. Not only that; he was delighted with her intelligence. After the dinner Mme. Garotsky pleaded an indisposition and, retiring to her room, left the two guests together.

The count passed a delightful evening. Before taking his departure he had confessed that he was a married man, but was not living with his wife. Indeed, he had been married by proxy and had never seen his wife. He belonged to a very old family, the title dating back many centuries, and would have had the entree to the court circle had he the means to associate with persons who spent money like water. He had advertised for some rich commoner who would marry him and turn over to him a portion of her estate in lieu of being permitted to assume his rank. It was to be a mere commercial transaction, the two separating as soon as the marriage ceremony had been performed. His advertisement met the eye of a young widow who had inherited a large fortune from her husband, a very rich manufacturer much older than herself, who had died soon after their marriage. She offered a large slice of her estate for the privilege of being a countess, and, since neither expressed a wish to see the other and the widow lived in a remote province, they were married by proxy.

Mme. Petroff listened to this story, and the count fancied that he saw a sigh, which he attributed to the fact that he was a married man. Indeed, he had been captivated by the lady and was saddened at the thought that a marriage between him and her was impossible. However, when they parted he took her address in the city and the very next day called upon her.

Mme. Petroff remained in Petrograd some time and gave the count every encouragement to be with her. They drove together, skated together, and Demidoff secured invitations for her. One day he told her that he loved her and would be only too glad to marry her were it not for the insurmountable objection that kept them apart.

The quaint charm of this frock lies in the distended hoop skirt with its huge embroidered motifs of taffeta. The frock is developed in white organdie and the embroidery in pale grey and blue tones.

Notwithstanding the fact of that objection, when Mme. Petroff returned to her home she invited Count Demidoff to visit her there. He scarcely understood this, for she had given him evidence of being a good woman, and if she could be anything more than a friend to him it could only be a wife, and to be his wife was impossible. He was loath to go, feeling that since he could not possess her he was only sinking deeper in misery. He had sounded her on the matter of a possible return of the fortune he had received from his wife and a divorce. But she had declared that on no account would she marry a divorced man.

When the count entered the place wherein Mme. Petroff lived he was astonished at its magnificence. On entering the house he found every luxury. His hostess introduced him to her mother, who lived with her, thus making his visit perfectly proper.

Count Demidoff's stay in the home of Mme. Petroff was like a visit to fairyland. Every day the hostess contrived new methods of passing the time agreeably. One thing surprised the count—there were no other guests except himself. Moreover, all the servants seemed to be acting as if they had been trained to a part. When they said "Yes, madame," sometimes they got it "Yes, Mme. Petroff," and at all times they appeared to be saying what the simple creatures were not used to saying. One evening a lackey who was sent to summon the count for dinner said:

"The countess awaits your excellency."

"The countess!" exclaimed Demidoff.

"I mean Mme. Petroff," said the poor fellow, covered with confusion.

"There is something concealed here," said the count, half aloud to himself, and went down to his hostess.

"Countess," he said, "may I take you in to dinner?"

"What!" exclaimed the hostess. "You have cut my secret?"

"I have," replied the count, making a gigantic bluff.

"And you know that I am your wife, the Countess Demidoff?"

It was the count's turn to be astonished.

"You, my wife—you, the provincial with whom I exchanged my title for a portion of your fortune?"

Escaping Into Holland

A Belgian journalist named Egbert Hans, until recently serving with the Belgian army, narrates the following story of the electric cable which the Germans have fixed along the Dutch frontier to prevent the Belgians from escaping into Holland:

"During the first few days only dogs and cats were struck, and one could hear their howls and cries a minute before they died. The first human victim was a young Belgian who had heard King Albert's call and wanted to go through Holland to join the Belgian army. The second victim we heard of was a poacher who brought letters into Holland. He knew every inch of the country as they all do, and thought he could defy the electric cables.

"Others were killed, but the traffic continued, mostly after dark, and many a time shadows moved through the silent streets of Sluis at night; they were those who had succeeded and were now in safety. From them he learned how things were in Belgium.

"One morning very early I found a young woman sitting on one of the Dutch 'steps' in Sluis. She looked worn out, but her face wore that happy expression which told me at once that she was one of those who had crossed. A few hours later I met her arm in arm with a young man whom I knew was an escaped Belgian soldier. I met them again and again, and the young woman told me the name of her town, how things were going there, and how she had got into Holland.

"Clara Vermel was the young woman's name. She was an inhabitant of Costkerko. In the beginning of the war her husband had been called to the colors. She heard from him three times, then his letters ceased, and for months she had lived alone, hoping that her husband was still alive.

"One day Clara Vermel was brooding over her misfortunes, when the door opened, and in walked 'Limping Victor,' a cripple who was employed by the Germans to do errands, and had often to go to Holland.

"'Clara,' he said, 'I have seen Robert. He is at Sluis, just over the border. But don't ask any more. I risk too much already.'

"She heard the door bang and was again alone. Robert alive! Robert at Sluis, only a few miles away? Then she fell on her knees before the Holy Virgin in the corner and prayed.

"Then a shadow crept over her face. Sluis is in Holland! The electric cables! They meant death for those who came near them.

"But she would go. She would face death for him. Her father tried to dissuade her, but finally gave in.

"'There is only one man, Clara,' he said, 'who can help you if you really want to get to Sluis, and that man is Flor, the poacher. He knows every inch of soil for miles around and miles into Holland. Let us go and see him, or rather you go alone; that would be safer. You know where he lives.'

"'So you want to get to Sluis to see your husband, who was a soldier?' said Flor, when Clara called at his hut. 'But do you know what it means, young woman? Do you know how many have been killed by that devilish wire? Yes, they all live a few seconds after they are executed, as those devils call it, and many a time I have heard a soft crying, which always means that one more has been killed.'

"It was about midnight when the poacher and Clara left the hut.

"'This is the time that the guard is changed, and those old Landsturms are always late,' he said, cautioning her not to make any noise.

"Near the little River Mondel, running half a mile distant the poacher knew a kind of tunnel. This tunnel had been made years ago to deliver water to a factory, standing just across the border, near Sluis. The little tunnel had long been dry, but Flor, the poacher, knew that it was still open all the way, and still came out into Holland, he said.

"'The cable is only a few yards distant from us,' whispered the poacher to Clara. 'We must keep to the right, as we will soon turn with the path and leave the cable. A cat rushed past. Clara was frightened. A few seconds after the poacher stopped her. Listen, the cat has been killed,' and she heard the 'complaining crying' which always followed contact with the wire by man or animal.

"The poacher had now found the bridge he was looking for. 'Now about a hundred yards farther,' he said. He searched the grass and the rushes near the water until his foot sunk deep in a hole. Soon he found the opening. 'Come, young woman,' he commanded. They both disappeared in the earth.

"The tunnel was not high enough to stand up in, so they had to crawl. Clara thought it would never come to an end. She had never been in such darkness. She banged her head, hurt her feet, but only thought of her husband. At last she heard the poacher say, 'Here we are; this is Holland. But be quiet for another hour, for I want to go back. You follow this little river for about five minutes. You will then come on a road which will bring you into Sluis after twenty minutes' walk. And your soldier will be sleeping under one of the roofs there.'"

The Romance —OF— Robert Land

"I am wounded!" he cried, "hurt to the heart of me!
Yet I cannot take it God's will that I perish here—
Miserably—madly—no one to hear me or see—
Chased by my foes with cowardice and fear.

"Cry? I dare not! More than the beasts will hear!
The red man lurks in the thickets to strike me deep;
Or some blood-thirsty white from the crossfall will peer,
With aim to help me to dreamless, endless sleep."

So the strong will of Robert Land upbore him home,
By day the sun lit his path to liberty;
By night his surer guide the starry dome—
But to what a home came he!

'Twas that perilous time when America strove to be rid
Of the yoke of a brainless fool, who sat astride
The English throne; peace and mercy were hid,
Hatred and murder stalked lawlessly side by side.

For a few there were who saw past the fool on the throne,
To the Motherland, bleeding, and prone, and humbled by war;
And they loved her the more for every tear and groan,
For her woes and her foes she was dearer than ever before.

Robert Land, as a fearless Royalist strode abroad,
With a tongue that made no rest in Britain's cause;
Despatches he bore, to expose now a plot, now a fraud
The concerns of his King allowed not a moment of pause.

And thorny the way he walked among men newly free,
Kings in their own conceit, and fit to rule all
But their own uncurbed spirits, which rudely and ruthlessly
Would hurry the foe to destruction, both great and small.

Therefore this man was wounded hip and thigh,
As he carried despatches of weight from town to town;
And was left on the banks of the Delaware to die,
While men laughed to see him drown.

But when a high and proud will had borne him home,
(Oh, to what a home came he!)
With faltering steps, face flecked with bloody foam,
And wild eyes strained to see.

No home remained to him but an empty name—
His wife—his babies—all wiped out ever aught;
Victims in turn to the ax, or the sword, or the flame,
'Twas the red man's hand, compelled by the subtler white.

Then he vowed by his every wound, and bruise, and scar,
As the soul of him was gripped with the hate of hell,
To make his escape to the land of the Polar Star,
To the not—since 'twould please his foes too well!

But rather to creep, to crawl to dodge, to wait,
By night to advance a mile; by day to keep;
Till, mayhap, he should reach in time a friendlier state,
And live to mock his foes from the other side.

"There's a land," quoth he, "where Britain's claims are known,
A region stern, that sends its patriots forth
To fight, to die, if need be, for England's throne—
'Tis the white and silent North."

Thus after ventures perilous and wild,
He crossed Niagara's gorge; a free man stepped
On British soil, though torn from wife and child,
Prepared to settle down, ate, worked and slept.

Thus seven solitary winters sped,
While he dwelt beneath the chilly northern sky;
No hope, no hope had he; his heart was dead;
He lived because he was strong, and could not die.

His wife was only a phantom—his boys were ghosts,
Yet he babbled their names to all the men he met;
"His tales," said they, "are naught but idle boasts;
Would that his tortured brain for one day might forget!"

Full oft he placed the supper things for four,
And talked to the guests which none but he could see;
In fancy their footsteps thronged about his door,
Their voices rang with glee.

One night, through his 'wolfskin' window small, he spied—
Or thought he spied—a woman travel-worn,
Two youths of stalwart stature at her side,
All stooped with haggard care, distressed, forlorn.

And saw—or thought he saw—resemblance dim
To the wife and sons so many seasons lost;
The grudging past gave up its secret grim,
Hope travelled back with those pilgrims tempest-tossed.

A moment more and paused the weary three;
"And does a man by name of Land dwell here?
And loyalist of Delaware was he?
O God! At last; Robert; My husband dear!"

"My wife! My sons! What? Do I hear your voice?
Speak yet again—or shout I'll swear I've seen!
My loved ones, let us in this hour rejoice!
Forget the years between!"

And then two-sided did the converse run,
Right quickly was the wanderers' story told,
How they had fled their foes ere rise of sun,
And reached the Northland after ventures bold.

Canadian and they proved a friendlier zone,
Once in the east, next by Niagara's flood
Where first 'twas told them of a settler lone,
Who might be of their name, and stock, and blood.

So tramped they forty miles of wilderness,
And, if God pleased, they never more would part;
For after seven years of sharp distress,
They'd found their haven of his yearning heart.

So lived they at the Head of the Lake; so died;
And on their homesite a great city rose,
Which loves to do them honor and takes pride
In making record of their weary woes.

Mabel Burkholder, Mount Hamilton.

A charming afternoon gown fashioned in maize colored chiffon, delicately embroidered in self tone. The deep tucks broken by the embroidered panel front is an attractive feature.

GRAPE JELLY AND JUICE.

If you are fortunate enough to get grapes just before they are ripe, you will have them at their best for jelly making. Sometimes half-ripe grapes are brought to the markets and sold for that purpose at 10 cents a quart. Even at that price the jelly need not be so expensive, because one may combine with the grapes apple parings and two or three small apples. In this way more jelly may be made without spoiling the grape flavor. Wild grapes are especially fine, as they have a "tang" that makes the jelly very nice to serve with sliced cold meats, particularly lamb or veal.

Grape juice is such a delicious beverage when properly made that every housewife would do well to make it one of the essential articles for her fruit closet; for it is both a tonic and a food, and may be served plain, hot or cold, or diluted with one-third water. Concord grapes are usually cheap and plentiful. They are juicy, too, and for that reason are valuable. The following recipe for the making of grape juice has been proved good:

Wash grapes in colander and pick from stems. Put fruit in granite or porcelain-lined kettle and add one cup of water to each quart of grapes. Heat slowly, mash fruit lightly, and cook through a double cheesecloth laid over a colander on a large bowl or crock. Twist cheesecloth lightly to get all the juice. Put juice in the preserving kettle and let come to the boiling point; then draw kettle from the fire to skim. Do this twice, then add sugar in the proportions of one-half cup to each quart of juice. When the sugar has dissolved, which will take about five minutes, skim carefully and pour into hot sterilized bottles or jars and seal.

The finest grape juice that I ever had was made from a grape called Ives Seedling.

I used one cup of water to four quarts of grapes. Just enough to get the grapes started cooking. Then I proceeded as above, except that no sugar was added. The grape juice was sealed in bottles with rubber fasteners, and was just sweet enough for a mildly acid drink. It had a delightful flavor.

An Indiana man, 90 years old, attributes his long life to the fact that since boyhood he has eaten onions freely every day. But is life worth living under such circumstances?—Kansas City Journal.

"Our new cook's going to leave," said Mr. Crosslots. "What's the trouble?" "We can't agree. She wants grand opera on the phonograph and we like ragtime."—Washington Star.

Horror Week About Lille

The following are extracts from a letter which has been sent to the French Government from an inhabitant of Lille. There is no doubt about the authenticity of the document or the accuracy with which it describes the events which took place during Easter week in Lille:

"We have just been through three weeks full of the most hideous agony and moral torture which a mother's heart can be called upon to endure. The last week has been the worst. On the pretext of the difficulty caused by England in maintaining the food supply, and the refusal of inhabitants to volunteer to work in the fields, steps have been taken for an evacuation by force, which has been put into effect with every imaginable refinement of cruelty.

"They did not, as on the first occasion, take families as a whole. No. They thought it too humane a method to let members of families suffer together; so they took one, two, three, four or five members from each family—men, women, boys, girls—at the arbitrary will of an officer. To prolong the agony all round they worked by districts, never saying on which which night each district would be taken.

BARBARISM AND POMP.

"It was at break of day that these gallant soldiers, with fixed bayonets, armed with machine-guns and the band playing at their head, sallied forth to abduct women and children. God knows where to and where for. They say far from the front for work in no way connected with the war. However, we hear already that in some districts these poor creatures have been received with volleys of stones because it was said that they had volunteered to do work which the inhabitants of the districts refused to perform. It is a devilish lie, as is the whole plan. It was for this that the census card (which gave age, sex, ability and skill in particular work), and the identity card which we all have to carry, and the prohibition on sleeping away from home, were preparing.

"About three weeks ago raids were made in the two neighboring towns. People were seized anyhow in the streets and the tramcars, and people thus seized were never seen again. We were terrified. As several girls and children were seized, the civil and religious authorities made admirable protests. In reply, the authors of these protests were called together on Holy Thursday at four o'clock. During the meeting terrorizing posters were put up, and they were given to understand that this was the reply to their protests, and that on leaving they could read them in the streets in the same way as the rest of the population. The posters warned everyone excepting old and infirm persons, children under 14 and their mothers—to be ready for evacuation, every person being allowed to have 30 kilogrammes (66 lbs.) of luggage. To make the necessary arrangements domiciliary visits would be made. All the inhabitants of the house must be at the open door of the house, with their identification cards in their hands.

HERDED IN CHURCH AND SCHOOL.

"We never knew each night when our turn would come, and we awoke as though from some horrible nightmare, sweat on our brow and anguish in our heart. No word can describe to you the horror of these days. We are all quite broken by it. From the night of Good Friday to Holy Saturday, the troops passed our house to raid the first district. It was awful. The officers passed along and designated the men and women he wished to take, giving them ten minutes to an hour in which to be ready to start. In one place an old man, and in another two infirm old people were not allowed to keep the little girls who were the only persons they had to look after them. Everywhere they baited their victims, adding petty vexations to brutality.

"A sentry is placed at the door for each person marked down, and then the poor creatures are taken off to some place of assembly—a church or a school—and then in a body all classes and conditions are herded together, innocent girls and public prostitutes check by jowl they go, surrounded by soldiers, with the band playing before them, to the station, whence at evening they depart without knowing whither or for what labor they are destined.

"But throughout it all, our people bore themselves with the most admirable dignity and calm. In spite of the provocation they received in seeing the same day a procession of motors which were carrying off some of the poor abducted people, all left crying 'Vive la France!' 'Vive la liberte!' and singing the Marseillaise. They consoled those who were left behind—the poor weeping mothers and children.

TOWN HALL ON FIRE.

"They gave us a truce during Easter Sunday and Monday—48 hours. It was a lot. We hoped for a respite of at least another night, but at half-past nine that night the Town Hall caught fire. Let us keep silence, as we do, about this event. What is the use of talking about it? The fire broke out above the office where the only signed bonds for requisitions, guarantees from one state to another, lay. Thanks to our helpers whose devotion cannot be described, the bonds and the finances were saved—till next time! But soon the fire caught all four corners, water gave out, and nothing but the walls remain. And in the glare of the burning, at three o'clock in the morning, domiciliary visits were begun again in the Vauban district. The concentration camps really look like slave markets, and that is what one would take them for.

"Will our release never come? Think, dear friends, of the grief of the mothers who have brought up their daughters with such loving care, and who now see them snatched from their arms. And what must the soldiers and the officers be who can consent to do such deeds?

"But, above all things, let our soldiers, when they get there, not revenge themselves by committing similar deeds. To do so would be to sully the fair name of France. Let them leave such evil deeds and crimes to God's vengeance. These people, as a woman whose husband, daughter and son were seized told them, will be accursed in their race, in their wives and in their children."

When a big man is mean, he is meaner than a little man. There's more of him to be mean.

GOT DIARRHOEA
FROM DRINKING
BAD WATER.

People moving from one place to another are very subject to diarrhoea on account of the change of water, change of climate, change of diet, etc., and what at first appears to be but a slight looseness of the bowels should never be neglected or some serious bowel complaint will be sure to follow.

The safest and quickest cure for diarrhoea, dysentery, colic, cholera, cholera morbus, cholera infantum, pains in the stomach and all looseness of the bowels is Dr. Fowler's Extract of Wild Strawberry.

Mr. Ernest Jeffery, Moose Jaw, Sask., writes: "A few years ago, when I first came out to Canada, I went to the harvest field to work. Somehow or other the water did not agree with me. I had the diarrhoea so bad that blood was coming from me, and I thought my last days had come. One of the harvest hands advised me to take Dr. Fowler's Extract of Wild Strawberry, and before I had used the bottle I was able to go to work again. My advice to all is always keep a bottle of this wonderful diarrhoea cure on hand."

"Dr. Fowler's" has been on the market for the past seventy years, and has been used in thousands of Canadian homes during that time, and we have yet to hear of a case of bowel complaint where it has not given perfect satisfaction.

The genuine "Dr. Fowler's" is manufactured only by the T. Milburn Co., Limited, Toronto, Ont.

Price, 35 cents.

Bradstreet's Trade Review.

Toronto—Local trade is in a healthy condition in practically every line. Repeat orders are being sent to wholesalers for fall goods and staples, and no complaints were made about general trade conditions. There is a tendency towards higher prices in most lines, but this does not seem to be deterring buying to any degree. One large wholesaler declared business in dry goods was better than last year. Grocery lines are fairly active, in spite of advancing prices. Hardware wholesalers announce that building materials have been advanced. Conditions in the hardware trade show a fair degree of activity. The jewelry trade is active and more sales are being made than at this time in 1915. Collections are reported to be good.

Montreal—Autumn business is brisk and both retailers and wholesalers have a feeling of confidence for the future. Sorting orders for dry goods are increasing. All cottons and woolens are scarce and generally higher prices are ruling. Shoe manufacturers have begun work on spring samples, and they report higher prices for raw materials. The grocery trade is fairly active, and hardware lines show little change. Country trade for the fall and winter promises particularly well.

Ottawa—The volume of autumn trade is more than satisfactory to local retailers. Higher prices are generally being paid, but the public is buying goods in as large quantities as ever, and in many cases substantial increases are being shown. A good autumn and winter trade is confidently expected by both retailers and wholesalers. Manufacturers are busy, and all available labor is being used to advantage. Remittances are good.

London—Western Ontario business is unusually active. Country trade is especially brisk. Hardware, groceries, boots and shoes and millinery lines are experiencing a thriving trade. Labor is scarce. Collections continue to be good.

Winnipeg—Higher prices are being paid for Manitoba wheat than have been in force for many years. As high as $1.75½ was paid for No. 1 Northern on a cash basis during the week. Mercantile business is brisk. Prices are generally higher. Labor is reported to be very scarce. Payments are generally reported to be good.

Calgary—The wheat yield in the West is larger than was expected and the grades are poorer than was anticipated. Business conditions throughout the West are exceptionally good, and, with the high prices for wheat which are now being obtained a good winter trade is almost inevitable. Confidence is general, and merchants are satisfied with conditions.

Vancouver—The general situation is very satisfactory. Mercantile trade is good. Crop reports are generally satisfactory. The salmon yield is still reported to be abnormally light, and consequent advances in prices by canneries can hardly be avoided. Collections are nowhere reported to be unsatisfactory.

Hamilton—All industries are very active, a good volume of fall orders is being filled and general conditions continue to be excellent. Country trade is very good. Merchants generally are more than satisfied with conditions. Labor is scarce and much more help could be utilized to advantage.

Quebec—Wholesalers as a rule report favorably, especially dry goods. Groceries and provisions are in demand. Hardware and building trades are active. In the city retailers report activity. Remittances from country and city are fair for the season.

Unable To Sleep
Or Do Any Work.
SUFFERED FROM HER NERVES.

Mrs. Thomas Harris, 8 Corrigan St., Kingston, Ont., writes: "I had been a constant sufferer, for many years, with my nerves, and was unable to sleep at night, or do any work through the day. I at last decided to consult a doctor and find out what was really the trouble. The first one told me I would have to go under an operation before I would be well, but I would not consent to this. One day I took a fit of crying, and it seemed that if anyone spoke to me I would have to order them out of the house. I must have been crying two hours when my insurance agent came in. He advised me to try a box of Milburn's Heart and Nerve Pills, and I at once sent to the drug store and got two boxes, and before I had them taken I felt like a different person. I have told others about them, and they have told me they would not be without them. I am very thankful I started to take Milburn's Heart and Nerve Pills."

Milburn's Heart and Nerve Pills are 50 cents per box, or 3 boxes for $1.25, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

WALKERTON, OCTOBER 19th '16

WHY NOT JOIN FORCES?

Once more it was demonstrated this year that the Walkerton Fall Fair, conducted along present lines, is not and cannot be a success. The same may be said about most of the other sixteen fall shows held in Bruce County. Fall shows throughout the Country are going back. Possibly it is their very number that is doing it. At any rate, the same cannot be said of Christmas Fairs. Walkerton has a the Christmas Fair that has proven a great drawing card for the farmers and for everybody. It is the only Christmas Fair in the County. If Christmas Fair is given a proper chance, it will develope into the biggest affair of the kind in Western Ontario. We believe that the directors of the Fall Show would be acting in the best interests of their Society, and of the Community, to join forces with the Christmas Fair. Instead of being a drag, their society could render valuable help towards giving us a livestock show that would be a credit to Walkerton and to Bruce County. The government grant alone, if switched to the Christmas show, would be something worth while. The suggestion is not a new one but, in view of the Fall Fair's unhappy experience, repeated again this year, it is more than ever worthy of consideration. We believe the Fair Directors would have the enthusiastic support of every citizen if they would join forces with the Christmas Fair.

AN ANXIOUS TIME

Newspaper publishers throughout Canada are having an anxious time over the newsprint situation. The paper mills refuse to book new contracts at any price, and state that the price next year will be at least sixty per cent higher than at present. The publishers regard the increase as abnormal, and as the Canadian mills export the great proportion of their product to the United States, the publishers may look to the government to relieve the situation by placing an embargo on the export of newsprint. In the meantime government experts will investigate the cost of newsprint manufacture. The proposed increase is bad enough for the weekly men but it is worse for the dailies, many of whom are selling their newspapers at a good deal less than the white paper costs them. If nothing is done to relieve the situation, many dailies will be driven out of business. A slight increase in newsprint is to be expected in any case. And it would be not an unmixed evil. It would force the metropolitan dailies to raise their subscription price, and depend more upon revenue from subscriptions than upon the advertising of the big business Corporations. A rise in the subscription price of the big dailies, would help to free them from corporate influence and would be a good thing for Canada.

+ + +

LOCAL MERCHANTS AND LOCAL NEWSPAPERS

Every mail brings to Walkerton and the surrounding country parcels from the big deparmental stores. How did the big stores get in touch with all the individuals who send their money out of town? By Advertising. If the Department Store men had not used printers' ink extensively, they would still be in the same class as their smaller competitors. The Deparment stores met the threatened hard times, two years ago by doubling up on their advertising appropriations in the Metropolitan dailies. They would also advertise extensively in every local weekly in Canada if most of those weeklies had not closed their columns to protect the local merchants. The local weeklies are the local merchants first line of defence against the inroads of the Department Store. We believe if the local merchants thoroughly appreciated that fact they would give greater attention to the advertising that they are carrying in the Weeklies, and in a good many cases would carry a bigger space. And they would back their champions, the local weeklies, to the last ditch. Moreover the local weeklies are facing a crisis, owing to the impending rise in the newsprint market, which threatens to drive a good many papers out of business, and which makes it imperative in the interest of the local merchant that he support the local weekly to the utmost of his ability, not out of sentiment alone, but as a matter of cold, hard business.

+ + +

THE LIBERAL BANQUET

Quite an extraordinarily successful banquet was the one held in connection with the Annual Meeting of the Liberal Club Federation of Ontario at London on October 11th. Sir Wilfred Laurier, Mr. N. W. Rowell, Hon. T. C. Norris, Prime Minister of Manitoba, Hon. George Graham and S. W. Jacobs K. C. of Montreal, were the leading speakers and a high level of oratory was maintained throughout the whole evening. There was an attendance at the banquet of at least 1500 people coming not only from London City but from more than eighty other places in the province. Sir Wilfrid Laurier in his speech presented the noblest kind of ideals to the Federation and the young men of the Liberal Party. "You have a safe guide, an unfailing light, if you remember that faith is better than doubt and love is better than hate. Banish doubt and hate from your life. Let your souls be ever open to the strong promptings of faith and the gentle influence of brotherly love. Be adamant against the haughty. Be gentle and kind to the weak. Let your aim and your purpose in good report or in ill, in victory or in defeat, be so to live, so to strive, so to serve, as to do your part to raise the standard of life to higher and better spheres." Sir Wilfrid emphasized the fact that the war was at present the one task for all men. "This war has got to be fought to a finish" he said. "Germany has to be fought firmly and resolutely until victory is won. But then, when it is won let the better angels of our nature again guide us in our course." Sir Wilfeid did not pay much attention to politics but did criticise the Borden Government with great severity on account of their extravagance in civil expenditure during war time when all the resources should be conserved for the one main object.

Mr. Rowell made a profound impression by his speech, in which he too declared once more that the successful prosecution of this war transcended in importance all other considerations and problems. In their relation to the war he discussed three main issues—Prohibition, Nickel and Hydro. "The Legislature," he said, "by the consent of both parties has put the responsibility of finally determining the Prohibition question upon the people themselves in a referendum and no political party dare withdraw from the people that right now conferred upon them?" "I would a thousand times over," he added, "bring a message of hope to homes where there has been disencouragement and dispair, than be premier of this Province." Mr. Rowell assailed the Hearst Government in the most vigorous terms for its laxity on the nickel questions and also declared for keeping the Hydro strictly out of politics. He criticized the Government effort to draw it into the arena of partisan control.

The Prime Minister of Manitoba gave an interesting review of the progressive legislation put into effect by his government in its first session and made a stirring appeal for clean politics.

LIBERAL SPEAKERS AT LONDON

Some of the Men who Held up High Political Ideals To Young Canadians at Liberal Federation Banquet.

EDITORIAL COMMENT

The Toronto Daily Star and News have increased their subscription rates 50 cents per year to take effect December 1st. It will cost the Star $75,000 more for newspaper this year owing to the increased price at the mills.

+ + +

There may be much or there may be little in the report that Premier Hearst will go to the bench. It might be well for Conservatives to make certain before they let Hearst out, that they have another man big enough for the job.—Guelph Mercury.

+ + +

It is the pride of the British Red Cross that in every crisis in the campaigns of Great Britain and her Allies, it has been able to bring prompt and efficient aid to supplement the untiring work of the official services. It is the only institution that carries voluntary aid to the sick and wounded of the British forces on land and sea in every region of the war.

Walkerton Boys in The Trenches Write Home Interestingly of Conditions at The Front.

LETTER FROM PTE. A. TOLTON

Mrs. James Tolton had the following letter from her son, Pte. Alfred Tolton, a few days ago.

In France,
Sept. 23rd 1916.

Dear Mother;—

There are a few minutes just now that I can use for writing and I think you ought to have something more than a field post card from me. I filled one out yesterday and you may get it by the same mail as this. I did not know at the time when I would be at leisure to write to you. You would gather from my last letter to father that we would not have many spare moments for we are moving from place to place never being long in one place. Not long ago we, that is our battalion and other battalions, did some good work in this part of the western front when considerable ground was gained by the Allies. On this occasion I saw what real fighting is like. I was not in the front line with the men of the different companies but I was pretty close to it with my mule. We saw the ground gained in that particular part since the British Offensive started and could realize what hard fighting our boys had to do to drive the Germans back. I never heard or saw such a bombardment by our artillery as there is there, and Fritz don't forget to put a few over too. What I mean is that there are very few lulls in it and the number of shells used must be enormous. We have been back from the front lines for a few days for a so-called rest but this meant about half a dozen different moves. It is better than being in the front lines though for the boys for the casualties are not as heavy back here. We are on our way back to do another turn in the same place.

Your affectionate Son,
Alfred.

+ + +

PRIVATE ALBERT CONDY

Mrs. Joseph Condy of Brant received the following interesting letter recently from her son, Pte. Albert Condy, who is with the Canadians in the trenches:—

Somewhere in Belgium,

Dear Mother:

I guess you will be looking for a letter from me. I have just come out of the trenches and was under shell fire. We had no one hurt in our company, but one shell burst about six feet away from me and just about buried me with sand bags. After I got the dirt out of my eyes, I found I didn't have the least bit of a scratch, nor any of the fellows near us. The Germans shelled us very heavy but not so heavy as our artillery shelled them but all the same it was hell. I sure am having an experience worth going through. I don't mind the rifle and machine gun fire at all, but they would get you quick enough if one gets careless and sticks his head up too much.

I like the country here alright only if it wouldn't rain so much. They have splendid crops over here and in France. Everything is more old-fashioned here than in France. They still use those old-fashioned windmills for grinding flour. They don't make white flour like we do. They just grind the wheat up good and fine and some of the women can make pretty good bread out of it. I have often bought bread and things from them when we are on the move and I like it fine.

Well, Mother, I can't tell you very much about the war as I know only what is going on in our Front and there is not much doing at present, at least no very fierce fighting, for Fritz won't fight unless we stir him up a bit. I guess he is getting pretty sick of it for we sure are their superior in everything. Every time he goes to do anything he always gets the worst of it. If he sends a shell over to us, he gets a dozen back again; if he sends up an observation balloon, our aeroplane goes over and knocks it down with a bomb. One can see and hear an aeroplane any time. All day long you can hear the drone of the engines just like so many bees.

Dear Mother, many thanks for the parcels, which I received all O. K. this morning. The honey sure was some treat. I had not tasted honey for four months and the cake was fine and in good condition. That candy was fine, did you make it yourself? You should have seen one fellow in my company. When I gave him some honey this morning he said to get Dad to send over a hundred pounds and he would carry it around on his back. He always shares up his parcels with me.

We have been quartered in a Chateau owned by a German duke. All the town around it is in ruins from shell-fire. We sure have been living in state for a week only there are more than two of us in one room. There are some fine trees in the park and a moat around the castle, in which we swim. There sure are some ancient buildings here if one only knew the history of them. I am going to get a chip of the bell of Ypres if I can. One of our fellows has a bit but I was not with them that trip.

Well, Mother, will close hoping this finds you all well. I remain your loving son,

Albert.

+ + +

LETTER FROM FRED JEWEL

Pte Fred Jewel writes his mother, Mrs. Jewel from Belgium:

One night I was out in No Man's Land putting wire out and the party only out half an hour when a boy by the name of Walter Stanly was shot through the mouth. I was just passing him when he fell to the ground. I picked him up and carried him to the trenches but he died a few days later in the hospital. Simon Small was well and good and fat when I left. I had a slight touch of trench feet. The weather is pretty fine. It is just like a summer day. I have lots of news to tell you but wait till I get home.

Your loving son,
Fred Jewell.

The gasoline engine is the only hired man the farmer can get that does not flirt with the hired girl, yet is the steadiest sparker on record.

POETS' CORNER

MARY

Mary had a little lamb,
Her fiance, you know.
And everywhere that Mary went
The duffer had to go.
He followed her to pale pink teas
In truly lamb-like style,
He was as docile as you please
For quite a little while.
But after marriage, seems the gent
Assumed another tone.
Then everywhere that Mary went
She had to go alone.

—Louisville Courier-Journal.

News About Town

The Red Cross needs your help today.

Rev. Father Haller visited Chatham this week.

One of the brightest newsiest village Weeklies which comes to our desk is the Teeswater News.

The Telescope welcomes every item of local news. If you have any news of public interest, call up No. 48, or at night no. 146.

Enquiring boy: "Ma, did I come from the monkeys." Ma. "I don't know son, I am not acquainted with all your father's people.

Teachers' Convention will be held at Chesley on Thursday and Friday. Public School pupils here will have a holiday on the Convention days.

Bourassa throwing the harpoon into Sir Wilfrid Laurier is about the best credential that the Liberal leader can present to any loyal community.—Guelph Mercury.

Mrs. James Chisholm, a highly respected resident of the Dunkeld neighborhood, removed to town last week and is living in the house which she purchased recently from Mrs. P. Todd.

The Methodist Congregation subscribed $111 last Sunday to the Thanksgiving Fund. The money will be used for repairing the parsonage and putting a proper drain under the Church basement.

Lieut. Arthur Robertson is home spending his last leave with his parents, Mr. and Mrs. David Robertson. He leaves for Overseas with the Artillery on the 18th inst. All of Mr. Robertson's three sons will then be at the Front.

Nursing Sister Emma Grainger writes to a friend here that she has been attached to the Hospital Staff at Ramsgate, England. She speaks of the courageous spirit of the wounded soldiers and says she is enjoying the work.

Sergt. Neil McDonald says there is no truth in the report that he was rejected as medically unfit to serve in the 160th. Batt. He says he has passed and is glad to go overseas to serve King and Country.—Kincardine Reporter.

With prohibition in effect, an emptying of the poorhouses was anticipated; but with butter forty cents a pound, milk eight cents a quart, and bread eight a loaf, all hopes have been shattered. The institutions will have to be continued —Listowel Banner.

The Mission Band of Knox Church gave a Thankoffering of $18 last Wednesday night. They also put on a splendid program which was repeated later in the week for the inmates of the House of Refuge. This has been one of the best years that the Mission Band has had.

Mr. and Mrs. Hy. Hossfeld enjoyed a Sunday visit from the former's sister, Miss Katie Hossfeld of near Mildmay. This has been the first time in eight years that Miss Hossfeld has been able to call on her friends owing to ill health. She was accompanied by Mr. Eidt, Miss Eidt, Mr. Adam Hossfeld and Miss Hossfeld.

Mr. Martin of Mildmay, who is 81 years of age, walked from Mildmay to Teeswater on show day to see his grand son, Walter Oberle who was home on last leave with the Teeswater platoon of the 160th. Battalion from London. This is surely the kind of grandfather to be proud of.—Teeswater News.

Identification tags were presented to the men of the 160th. Battalion last week by Reeve Wm. Hunter and Mr. J. J. Hunter on behalf of the citizens of Kincardine. The tags bear the soldiers' names, numbers, the battalion number, and their religion, and represent an expenditure of several hundred dollars,

Mr. E. P. Weiss, who went West recently for a couple of months, writes home from near Edmonton that the crops are splendid in that section. A pioneer farmer of the Claresholm neighbourhood, named Noble, has a 1,000 acre field which yielded 62 bushels to the acre this year, which is the highest ever, in any part of the world.

A Toronto paper points out that there is need of redoubled efforts on the part of the women of this Country who have been sewing and knitting for the soldiers, and high time for those who have not started to begin. In some cases enthusiasm has died down in the face of hard work. If the soldiers followed that example the war would soon be over—and not in our favor. Here in Bruce, with our county battalion just off for the front the requirement for knitted goods will be very much greater than ever this coming winter.

Carrick Tp. has arranged for a personal canvass of the ratepayers on Trafalgar Day.

Last week's issue of the Farmer's Advocate showed the picture of "King of Diamonds" the short-horn bull purchased for $1100 by Hon. Duncan Marshall, Minister of Agriculture in Alberta, for his herd on his big farm at Old's. The bull was purchased from Geo. Anderson of Hepnor, Sydenham Tp., Grey County.

"J. P's. Weekly" edited by John P. McConnell, formerly of Walkerton, announces in its last issue that until the close of the war or until the paper situation in Vancouver improves, the owners of that journal have decided to suspend publication. At the present time it is impossible to buy the class of paper necessary for an illustrated newspaper on the Coast.

Rev. Thos. Wilson had word from his son, Sergt. Melville Wilson, the past week, that in visiting a little cemetery near the front, he had come across the grave of Pte. Ray Hyslop. He stated that the grave was nicely arranged and the cemetery well-kept. Mr. Wilson immediately conveyed this comforting intelligence to the parents, Mr. and Mrs. Thos. Hyslop.

The W. M. S. of Knox Church held their annual Thanksgiving meeting on Monday evening of last week. An address of special interest was given by Mrs. (Rev.) McLean of Hanover on the theme, "The Beckoning Hand" the subject being suggested to the speaker by the well-known recruiting poster. An offering of seventy-five dollars was taken. This is the second offering of the year, which has been one of the best years in the history of the Society.

Sometimes a preacher is sorely perplexed about the handling of complaints against church members. This is how one preacher handled them. He had learned that a person will often say a great deal which he is not prepared to substantiate, and whenever a member came with a complaint he took a blank, and his pen and said, Now I shall write down what you say, and you can sign it, and then I shall know just what the complaint is." And he carried the book for forty years and opened it perhaps a thousand times, but he never wrote a word in it. When people have to sign their complaints they usually prefer not to make them,

Thursday Oct. 19th

Dorenwend's of Toronto, Canada's foremost hair-goods designers and manufacturers will pay a special visit to the Hartley House, Walkerton, to display and demonstrate the newest creations in fine hair-goods for ladies and toupees and wigs for men who are bald. A free demonstration of any style is available to any interested,

+ + +

Potatoes More Plentiful

The potato crop around Walkerton is turning out better than was expected, the tubers profiting by the rainy weather of the past month. The other day we saw some potatoes from the field of Mr. George Knoll, Dunkeld, which averaged about a lb. each. Mr. Knoll says he has plenty of big ones this size. The present tendency of potato prices is distinctly downward.

+ + +

A Former Walkertonian.

Mr. A. G. Saylor, at one time a telegraph operator at Walkerton, has retired from the important position of General Manager of the Eastern Division of the Western Union Telegraph Service after fifty years of service Mr. Saylor was born in Bloomfield, Ontario June 11, 1859. He entered the Dominion telegraph service as messenger at Ingersoll, Ont., at the age of ten, and two years later was made an operator for the same company at Walkerton. After a year's service with the Montreal Telegraph Company at the Parliament Building and the main office, he went to the United States as night operator for the Grand Trunk Railway at Portland, Me. Later he entered the employ of the Atlantic and Pacific Telegraph Company and later of the Western Union, with which company he has ever since been associated. He was made assistant general superintendent January 1, 1907, and on March 1, 1910, became general superintendent of the Eastern Division, which title was shortly afterward changed to that of general manager.

+ + +

Sunday School Convention

The Annual Meeting of the East Bruce Sunday School Association was held at Cargill on the 5th inst., the President, Mr. M. G. Dippel in the chair. Mr. E. D. Otter, superintendent of the Secondary Division of the Provincial Association, was present and delivered an instructive address on "How to make the Sunday School a Success", which was listened to with great interest. Rev. Thos. Wilson then held a Round Table Conference on Sunday School Problems. At the evening session, interesting addresses were given by Rev. R. M. Gale on "Missionary Work" and by Mr. Otter on "The Rights of the Child". Officers for the coming year were elected as follows:—President, Rev. C. W. Cousins, Walkerton; Vice-Pres., Mr. Howard Hettrick, Pinkerton; Sec-treas., Miss M. McCoy, Cargill; Supts. of Departments; Elementary, Mrs. F. P. Moore, Teeswater; Secondary, Mr. A. S. Royce, Walkerton; Adult, Mr. M. G. Dippel, Walkerton; Home, Mr. Wm. Little, Teeswater; Teacher Training, Rev. Thos. Wilson, Walkerton; Missionary, Rev. R. M. Gale, Pinkerton; Temperance, M. T. H. Purdy, Glamis. The fixing of the date and place of the next Convention was left with the Executive.

HANOVER

The third of a series of silver medal contests was held in the Town Hall here and proved a great success. Miss Clara Diebel won the prize for elocution, and Miss Louise Selling the prize for Music.

The 147th Grey Battalion left Camp Borden on October 6th for a point East

Lieut. "Billy" Gould, formerly of Hanover, who has been wounded at the front, expects to be invalided home shortly. Lieut. Gould went through the South African war and was banqueted in Hanover on his return. He went to England as a private in this war, and won his commission on the field.

Lieut. A. C. Helwig of the 162nd Battalion, Niagara-on-the-Lake, son of Mr. and Mrs. Geo. W. Helwig of Hanover, was married to Miss Madge L. Smith of Drayton at Toronto on Oct. 11th, Rev. Mr. Macnamara performed the ceremony. They were unattended.

The Liberals of this riding are getting things in shape for the coming elections in both the Provincial and Federal Houses. The Post says it is no secret that Dr. Mearns of Hanover will be a candidate for the convention for the local house, and without a doubt he will be the Liberal nominee. Who the candidate will be for the Dominion House is not so certain. The names of Mr. M. A. Miller B. A. son of the late H. H. Miller, of Hanover, and Mr. Wright, barrister of Owen Sound are mentioned in well informed circles as likely candidates.

Lieut. Harold C. Young arrived home from the Front last week on five months sick leave. He received his wounds in one of the fierce battles on the Ypres Salient on June 6th. With a corporal and six men he was occupying an elevated machine gun position, firing at the enemy over the heads of his own men in the front trenches. A German shell found their position and the six privates were killed outright. Lieut. Young was thrown some distance and received shrapnel wounds in the small of his back. The Corporal got away scott free and he believed from the nature of the explosion that the rest had been killed. This probably accounts for the first newspaper report reaching Canada that Lieut. Young was missing. Harold lay out in "No Man's Land" all day, and in the evening he managed to crawl back to the communication trench where he was found by Red Cross stretcher bearers that night. Lieut. Young believes that the war will still be in progress at this time next year.

OTTER CREEK

Mr. and Mrs. Henry Wolfe are visiting in Clifford.

Mr. and Mrs. John Reuber were visiting on the line.

Mr. Herbert and Milton Dippel motored to Kitchener on Saturday.

Mr. John Gateman, Mr. William Diebie and Miss Stella Huber, Miss Lillian Huber and Miss Florence Bildstein and Annie Gateman of Hanover were visiting Mr. P. Uress' over the holiday.

Pte Gordon Hogg left for London Monday last.

FORMOSA

SEPARATE SCHOOL REPORT

FORM IV.

Anthony Wiesser, Leo Kraemer, Louise Oberle, Stanislaus Baumann, Hildegarde Kuntz, Hedwig Benninger, Irene Hibo, Rosalia Weller, Leander Dentinger, Cyril Beingessner.

FORM III.

Marie Sauer, Alice Weller, Johanna Fedy, Olivia Kraemer, Nicholas Weller, Richard Kuntz, Edgar Lehmann, Nettie Beninger, Joseph Waechter, Rupert Welsbar, Marie Dentinger, Clara Oberle, Elizabeth Massel, Magdalena Durrer, Leo Oberle, Mary Weiss, Frank Schnurr, Georgina Kuntz, Arthur Knoll.

FORM II.

Henrietta Zettel, Mildred Bildstein, Edwin Hauck, William Massel, Gertrude Zimmer, Clara Lehmann, Matrona Brick, Elvira Morteg, Clarence Beninger, Alfred Hettinger, Rosetta Rettinger, Ludwina Kuntz, Leonard Oberle, Mathilda Gutscher, Julitta Weller, Margaret Kimmer, Norman Strauss, Lucy Beingessner, Edwina Weiss.

FORM I.

Elmer Schefter, Emelia Benninger, Malinda Schnurr, Mary Fischer, Jerome Gutscher, Clara Heisz, Arthur Hibo, Marie McCue, Bertha Knoll.

OUR OTTAWA LETTER

BY H. F. G.

The Borden Government is in doubt whether to pull off a general election in December—make it a coonskin coat campaign, as it were—or to postpone the day of wrath until next April. The chances favor the later date.

The April date suits better because many of the surprise packages that found themselves supporting a conservative Government after the election of 1911 realize that their present sojourn in the House of Commons is their last. If the people, at that time, had any idea that these fellows were going to be elected they would never have received the nominations. They were forlorn hopes and they looked it. With brighter chances of success better candidates would have been put in the field.

Naturally, these last-chance statesmen want to hang on as long as possible. They need the money. It's the last bit of easy money they will make so they demand another session. Being about to die, they want to die in as good condition as another sessional indemnity will make them. The Government's friends, the trusts, the combines, the boosters and the food usurers also favor the April date, because they believe that the high cost of living can be given two or three more twists in that time.

The Borden Government has been very kind to the High Costers, never once giving them a slap on the wrist or in any way exercising their power to keep prices at a decent figure, as has been done in other belligerent countries. No indeed! Let them take their fill, said the Borden Government and we will take ours. Which was done accordingly. The Borden Government is willing, maybe, to continue its kindness to the High Costers, but the High Costers themselves are the first to see that the goose that lays the golden egg is near its last squawk. They reckon that next April will see a limit to the people's tolerance of their extortions. After that, the Borden Government may do as it pleases. The High costers will be gored to the ears by that time. They will be ready to quit and if the Borden Government quits then, too, why who cares? They will go out together, both with that full feeling after eating. Meanwhile, as I said before, they will give the dear public a couple more squeezes.

The Government itself looks on April as a desirable date to test public feeling for two or three reasons. In the first place, an April campaign means a short session of Parliament. To dissolve the House and make the writs returnable means a clear space of a month, and that in turn means an adjournment by the end of February. A six weeks session, occupied largely with estimates and appropriations will not give a scandal crusade much chance to make headway. The Borden Government has enough scandals on its hands already. It doesn't want any more. Above all, it doesn't want a long session devoted to new scandals of tremendous proportions, many of which the Opposition has up its sleeve. The people have enough scandals to remember already. Frank Cavell and his comrades must not be allowed another last word to the Jury. The verdict is fatal enough right now.

The Borden Government has given up hope that a great victory by the Allies will cause the Canadian people to forget its long list of sins, because it realizes that no victory, however great, could do that. Even if the Allies could show a victory for every sin the Borden Government has committed, the people would not forget their grievance. It has been accumulating ever since the Borden Government took office five years ago. It didn't take the people long to see which way the Borden Government was headed. All the war did was to grease the skids. However, the Government will hesitate as long as possible before taking the plunge next April.

Yes, and then some, if the Government can bring it about. It will ask for another extension—that goes without saying. But it will not expect to get it, because it is quite clear that the country doesn't want it. The old excuses are all played out. What the country wants is to get rid of the Borden Government—the sooner the quicker. Armageddon or no Armageddon, the Borden Government realizes that it has got to go. The millennium won't get a fair start until the Borden outfit of listless lingerers is out of the way. However that won't prevent the Borden Government asking for another year's reprieve, the idea being to put the onus on the Liberals for refusing.

Truth to tell, this onus is only a bogey. Nobody takes any stock in it. The citizens of Canada, the honest patriots on both sides of politics, are ready and willing to assume any onus that will put the Borden Government on the blink. One onus is as good as another, so long as it does the trick. A million onuses won't save the Government's bacon. It will say: "Don't swap horses while crossing a stream." Yes, it will say that, even if the horse is broken-winded and spavined—the kind of a horse, in short that Arthur DeWitt Foster, M.P., used to buy. The voters know all about that. They will see to it that the horse is on the Borden Government, not on them.

Easily rocked are the three-bar grates which smash up clinkers easily and last longer because each grate is three-sided.

McClary's Pandora Range

The man who designed the Pandora knew his job. I know that and that is why it carries my guarantee as well as the makers'.

Sold by Patterson Bros.

Advertise In The Telescope

Shingles!

New Brunswick White Cedar Shingles, Grades, Extra and Clear. Also a large stock of British Columbia Shingles in grades, 1, 2, 3, 4 and 5 X. Call and get special prices.

"MADE IN CANADA"

The 1917 Ford Touring Car
$495.00
f. o. b., Ford, Ontario

Streamline effect, tapered hood, crown fenders, new radiator with larger cooling surface.—these are the principal new features of the 1917 model.

The demand for this new model has been so great that we are having difficulty in obtaining sufficient cars to satisfy our customers.

To insure delivery of your car, we suggest placing an order today.

Call and see us.

Liesemer & Kalbfleisch
Opposite Queens Hotel . Walkerton

AMMUNITION and GUNS

We have a full assortment of Shot Guns and Rifles and our stock of Ammunition is complete and at the right price.

S. W. VOGAN

AN EVIL HERITAGE

It so happened that the Coolies of White Village were that day in a state of mind that was both festive and busy. Linen awnings were spread in front of several of the huts, and an extra quantity of rice was being boiled in almost every household. The Captain had chosen a rather unfortunate moment, for everybody was at home, and nobody had time to trouble themselves about such a trifle as a mule's leg. Of course the Captain insisted, and of course the White Villagers resisted. It took some time and trouble to sufficiently detach their attention from the rice and the awnings to call an argument into life, but this being once effected—and, naturally, the Captain could not rest until it was so—he had no further reason to complain of neglect. As door after door was opened, and corner after corner of the linen awnings lifted in order to add some new member to the group that began to gather around his horse, as the red and yellow figures of the women with pans of rice in their hands and babies astride on their hips came to swell the crowd, as the usually so gentle brown eyes lighted up ominously, as broken English turned into rapid Hindostanee and the silver bangles rattled threateningly on all sides—then the Captain's mind was crossed by the thought that a little less attention might perhaps have been preferable. At any rate he was thankful that he had remained in the saddle. Clearly it was, under existing circumstances, by far the most advantageous position to occupy. The Coolies seemed to be of the same opinion, for scarcely had the thought found expression in his mind when a dash was made at his legs by the nearest of his assailants, obviously with the intention of unhorsing him. And now the Captain was yet more thankful, because of another circumstance: for he had not been quite as imprudent as Marian had supposed, and though he possessed no revolver of his own, had borrowed Mr. Ritchie's. At this juncture he brought it out with a jerk, upon which he immediately felt that his legs were at liberty, and perceived that the various hands which had already closed over his bridle dropped down like lead,—for the Coolies have a mortal dread of fire-arms. Several feminine shrieks were heard on the outskirts of the crowd, and most of the rice-pans and babies disappeared under the awnings, while the men fell back a little from the sides of the horse.

"Further back!" shouted the Captain, who by this time had come to the conclusion that the question of the mule's leg must stand over till a more favorable opportunity. "Make room, I say, you pack of cowards! I'll shoot the first man who touches the bridle!" and he sent a warning shot into the air.

It was a long time since the Captain had handled a firearm of any sort and whether it was due to the excitement of the moment, or to the inferior quality of Mr. Ritchie's weapon, certain it is that the first pull upon the trigger proved to be the last for the time being. The Captain, seeing the men still hesitate, attempted to fire another air-shot, and discovered that the trigger would not move, its constitution having suffered in its first exploit. He tried again—no use; and now, with that delightful clearness which never fails to illuminate a blunder in the very moment that it becomes irretrievable, he understood how much wiser he would have been if he had attempted no second shot, but, with the smoking weapon in his hand, had broken through the hesitating circle around him. He was still saying this to himself, when with a yell the ring closed in once more, a dozen yellow hands were on the bridle the useless revolver was knocked out of his grasp, and he himself dragged to the ground with such violence, that for the present he knew no more.

When he at length opened his dazed eyes, Captain Berrincott found himself lying in a huge four-poster bed, which occupied about two-thirds of a very limited apartment, in which goat and sheep skins, and Carib baskets, and bunches of bananas, and bundles of dried grasses littered the floor. A small black boy, audibly sucking a junk of sugar-cane, and wearing the yoke of a canary-colored chemise, from which streamed a few limp canary-colored strips, was the first figure that met his eye. Bending over him was a profile which, though familiar, seemed at first to be part of a nightmare, but which he gladly recognized as belonging to Mr. Hibbert!

"That was a pretty close shave, I fancy," said the Captain, after a long minute, during which his scattered senses were beginning slowly to return to him. "And, by the way, would you mind telling me, in the first place, where I am, and, in the second place, how the dickens you happen to be here, too?"

Mr. Hibbert explained his presence, and informed the Captain that he was at present under the roof of the negro hut that stood nearest to White Village.

"And what do you suppose they would have done to me if you hadn't arrived—you and your revolver?"

"Made mincemeat of you," said Mr. Hibbert, with perfect simplicity.

"Humph," remarked the Captain, and then was silent for some minutes, apparently struggling with himself.

"He is going to make a speech," reflected Mr. Hibbert, with an inward shudder.

But all the captain said after that meditative pause was—

"It's a d——d shame of Ritchie to lend about such gimcrack shooting-machines."

While her father still lay stretched out on the four-poster bed, Marian was already beginning to pace the gallery with a step that grew ever more restless. As midday came and went, and afternoon waned towards evening, her eyes scarcely left the scrap of yellow road which was all she could see between the cane fields; and her fancy—always unpleasantly lively—began to play her all sorts of mischievous tricks. She scarcely noticed that her head was aching. Under these circumstances it was only natural that it should ache; and it was natural, too, that she should feel hot and cold by turns, and that "the balance of yesterday's chicken," as it was technically described by Catherine, and which was served to her somewhere about the middle of the day, should taste something as old kid gloves might be supposed to taste like if boiled down to a stew, and seasoned with a gravy made of sawdust and water. What between one thing and another, her nerves were pretty nearly on their last legs by the time that two black specks became visible upon the scrap of yellow road.

Her first impulse was to go and meet them, but, somewhat to her consternation, she now discovered that she could not walk. It was in the rocking-chair, to which she staggered back again, that her father and Mr. Hibbert found her sitting.

The Captain, while somewhat painfully dismounting, was debating within himself upon a delicate question. Mr. Hibbert had not yet been thanked. Not that the Captain was ungrateful—quite the reverse—but that he labored under an even more deeply rooted constitutional dislike to giving utterance to his feelings than that from which his daughter suffered. A mere bare and bold "Thank you"—would scarcely fit the case here—he was aware of that—and to say more would come dangerously near to a "scene," which of all things in this mortal world the Captain dreaded with a dread that was well-nigh fanatical.

His perplexity was at its height as, leaning perforce on Mr. Hibbert's arm, he mounted the wooden steps. And then his eye fell on Marian, and an idea came to his aid. Why should not she do the job for him?

Marian had risen and come two unsteady steps forward, while her eyes moved inquiringly from her father to Mr. Hibbert. There were a hundred questions on her lips, but all she finally succeeded in saying was:

"Oh, thank God!"
